### Changes in Rates of Wages and Hours of Labour.

The Board of Trade Report records a decline for the third time since '95; in 1900 the general level of wages was higher than in any year for which statistics exist. Excluding agricultural labourers, seamen, and railway servants, in 1903 21,000 workpeople received advances aggregating £1500 per week, while 875,000 had to submit to a total weekly reduction of £39,800. The net weekly decrease for the year was £38,300, compared with decreases of £72,700 in 1902 and £77,300 in 1901. Taking into account the dates at which the changes in 1903 came into operation, the net decrease in the year's wages is about £500,000, compared with decreases of £2,300,000 in 1902, and £1,600,000 in 1901. Only 1·5 per cent. of the workers whose wages were changed were engaged in disputes on this account.

The following table shows the distribution of wage changes in 1903, according to groups of trades:—

Groups of Trades.	Number of Workpeople affected in 1903.			Total Net Increase (+) or Decrease (—) per week in wages.
	By Increases.	By Decreases.	Total.*	
Building Trades . . . . .	4,106	282	4,638	£ 304 9 0
Mining and Quarrying . . . . .	173	764,538	764,711	— 33,139 8 0
Metal, Engineering, and Shipbuilding .	933	98,868	100,106	— 5,534 10 0
Textile Trades . . . . .	556	445	1,001	+ 18 7 0
Clothing Trades . . . . .	1,709	1,787	3,496	— 85 17 0
Miscellaneous Trades† . . . . .	5,195	8,801	13,996	— 401 9 0
Employees of Public Authorities . .	8,650	—	8,650	+ 511 13 0
Total† . . . . .	21,327	874,721	896,598	— 38,326 15 0

\* Including those whose wages were changed in the year, but were the same at the end as at the beginning of the year.

† Excluding agricultural labourers, railway servants, and seamen.

The decline is again mainly due to the fall in wages in the mining and quarrying trades, where in 1900 there was a net weekly increase of 4s. 9½d. per head, but in 1901 a decrease of 1s. 8½d., and in 1902 of 1s. 11½d.

During the first half of 1904 changes in

wages are reported to have affected 275,227 persons, of whom 152,690 are engaged in coal-mining, 11,181 in pig-iron manufacture, 51,156 in iron and steel manufacture, and 29,748 in engineering and shipbuilding. Most of the changes have resulted in net reductions, 261,958 of the persons above mentioned being thus affected. The net reduction was slightly over £13,000 a week, of which £6000 is represented by coal-mining and £5800 by the three groups of metal trades.

The changes in hours of labour in 1903 were comparatively unimportant. They resulted in a net reduction of 15,427 hours weekly of the 7447 workpeople affected. The number of people is by far the lowest recorded since the statistics were first collected—the next lowest being 29,276 in 1901. The largest reductions in the year have been among public employees, the metal, and the building trades. In the first half-year of 1904 there has been a reduction of 11,048 hours a week, against an increase of 513 a week.

Only approximate estimates can be made of the changes of weekly cash wages of agricultural labourers, seamen, and railway servants. It is estimated that in 1903 in England and Wales the average rate of wages was increased to 51,095 agricultural labourers, and decreased to 24,953, with a net increase of £556 per week, in comparison with a net increase of £312 in 1902, of £3952 in 1901, and £8150 in 1900. Returns from correspondents to the Board in Scotland and Ireland show that there was no material change in agricultural wages in those countries in 1903.

As to seamen, such returns as are available show an average decrease of 1d. to seamen

and 4d. to trimmers per month in steamships, and an increase of 2d. in sailing-ships.

As to railway servants, the only returns available are those made to the Board of Trade by 27 railway companies (employing over 90 per cent. of the total number of railway servants in the United Kingdom) for the first week in December, 1903, when the average earnings per head were 24s. 10½d., as against 24s. 11½d. in 1902. As this is a return of earnings, not of rates of wages, it would be affected by quantity of overtime and other causes independent of any variation in wages.

### Strikes and Lock-outs.

The following table summarises the figures for the years 1899—1903 :—

Year.	No. of disputes beginning in each year.	No. of workpeople affected by disputes beginning in each year.	Aggregate duration in working days of all disputes in each year.
1899 .	719	180,217	2,516,416
1900 .	648	188,538	3,152,694
1901 .	642	179,546	4,142,287
1902 .	442	256,667	3,479,255
1903 .)	387	116,901	2,338,661

The following table summarises the methods of settlement for the past five years. Some of the figures for the years 1899-1902 differ from those previously published, as they now include the methods of settlement of disputes that were terminated after the Reports of the respective years had been published :—

Year.	By arbitration.	By conciliation and mediation.	By direct arrangement or negotiation between the parties or their representatives.	By return to work on employers' terms without negotiation.	By replacement of workpeople.	By closing of works.	Indefinite or unsettled.	Total.
1899	16	22	564	22	91	3	1	719
1900	19	14	487	46	74	4	4	648
1901	25	18	456	45	90	5	1	642
1902	16	13	319	40	50	3	1	442
1903	18	8	266	36	47	5	7	387

The years in the above table have been free from such large general disputes as occurred in several preceding years. In the whole of the ten years, 1893—1902, the average annual number of disputes and of workpeople affected were 724 and 271,000 respectively, and the average duration of disputes was 8,839,347 working days. The aggregate duration of disputes in 1903 in working days was less than one-thousandth of the aggregate available working days; and estimated by the entire body of workpeople, was less than a quarter of a day per head.

Disputes about wages involved 53 per cent. of the workpeople affected by disputes beginning in 1903. A dispute in the tin-plate trade, affecting 14,000 operatives, had reference to the system of payment for certain kinds of plate. Disputes as to hours were of comparatively little consequence, and had regard mainly to the arrangement of hours. Refusals to work with non-union men, and other questions of

trade-union principle, accounted for 19 per cent. of the total of all disputes.

The following are the results for three years :—

Results.	1901.	1902.	1903.
In favour of the workpeople	27'5	31'8	30'9
In favour of the employers .	34'5	31'8	47'3
Compromised . . . . .	37'3	36'1	20'7
Indefinite or unsettled . .	0'5	0'3	1'1

Of the 387 disputes, 266, embracing 68'5 per cent. of all the persons involved in disputes, were settled by direct negotiation between the parties concerned.

There were no serious trade disputes in Great Britain during 1903.

The only notable dispute of the year abroad occurred on July 14th, 1904, when 20,000 men employed by meat-packing firms in Chicago, and

30,000 employed at similar establishments elsewhere in the Chicago Consular District, went out on strike. A sympathetic strike of all the allied trades was instituted in Chicago, and a further 30,000 men were thereby involved, or 80,000 in all. At a conference in Chicago on July 20th, agreement was come to upon a number of points, and the strikers, both in Chicago and New York (where the Butchers' Union had ordered a strike involving 4000 workpeople) resumed work on July 22nd. But the Chicago men were again called out on the alleged grounds that the employers had violated the terms of the above agreement by discriminating against the Union strikers who had been prominent in the dispute. In New York, also, 3500 men were again called out on August 2nd. In September the strike in Chicago terminated, arrangements having been made as to taking back the skilled men at the old wages as vacancies occurred, and the unskilled men at a slight reduction.

### ***Conciliation and Arbitration.***

Of the persons whose wages were affected in 1903, 75·4 had the changes arranged by conciliation, arbitration, wages boards, and similar machinery. Changes in the iron, coal, and boot trades are generally regulated by conciliation or wage boards representative of employers and employed, with reference to an independent umpire. Permanent boards of conciliation and arbitration have comparatively little to do with actual strikes.

In 1903, 73 permanent boards considered 1,633, of which 785 were withdrawn, referred back, or settled independently of the boards; 506 were settled by the boards or committees; 282 by arbitrators or umpires appointed by them; and 60 remained over, under consideration.

As the result of recommendations made in the report of the Royal Commission on Labour, 1894, the Conciliation (Trade Disputes) Act, 1896, was passed, empowering the Board of Trade, where a dispute had arisen or was apprehended, (a) to inquire into the causes of the dispute, (b) to induce the parties to confer together with a view to a friendly settlement, (c) to appoint a person to act as conciliator at the request of either party, and (d) on the application of the parties to appoint an arbitrator. Provision is also made for the registration of private boards of conciliation and arbitration, and the Board of Trade is authorised to take steps to secure the formation of such boards where none exist. The Board of Trade has no power to compel a settlement, and therefore the Act has been valueless in the case of large and embittered disputes, like the Engineering, Taff Vale, and Penryn stoppages. Nevertheless, it has been successful in settling a number of minor quarrels. From August 1896 to June 30th, 1903, the Board dealt with 154 cases. Of these, 56 were in the building trades, 31 in the metal, engineering and shipbuilding trades, 21 in the mining and quarrying trades, 14 in the transport trades, 8 in the textile trades, 7 in the printing, bookbinding and paper-making trades, 6 in the clothing trades, and 11 in other groups of trades. Of the total of 154 cases, 99 were settled under the Act, and 14 others by the parties themselves during the negotiations. In 40 cases either the Board declined to take action or no settlement resulted from their

intervention. Of the 99 settlements, 65 were effected by arbitration and 34 by conciliation, 23 of the latter being arranged by officials of the Department.

In Belgium a new Workmen's Compensation for Accidents Act was passed in Dec. 1903, to come into operation six months after the promulgation of royal decrees regulating its execution. The law applies to a large number of specified trades, as well as to any not specified, but in which at least five workpeople are usually employed. It also applies to agricultural undertakings, to commercial establishments employing at least three workpeople, and to any undertakings which shall, on the recommendation of the Commission of Labour Accidents (created by the Act) be declared, by royal decree, to be dangerous.

Among laws recently passed in New Zealand are: the Inspection of Machinery Act Amendment Act, 1903; the Arbitration Court Emergency Act, 1903, and a sequel to this Act; the Labour Department Act, 1903, which creates a Labour Department of the Public Service, with a Minister of Labour, to administer the labour laws, to acquire and disseminate knowledge on all matters relating to labour, etc.; the Industrial Conciliation and Arbitration Amendment Act, 1903; and the Workers' Compensation for Accidents Amendment Act, 1903.

### ***Accidents and Poisonous Trades.***

During 1903, 4135 workpeople were reported killed in the United Kingdom by accidents in the course of their employment. This is a lower number than any since 1898. The decrease is accounted for chiefly by reductions in the number of fatalities among seamen and factory operatives. The detailed figures are: Shipping, 1380 deaths; mines, 1097; quarries, 88; railway service, 459; factories, 742; workshops, 6; works, 299; railway service (contractors' servants), 26; under notice of Accidents Act, 56. Of the seamen killed, 920 were employed on steamships and 460 on sailing-vessels, or 1 for every 223 persons employed on steamships and 1 for every 93 employed on sailing-ships. Wrecks or casualties accounted for 622 out of the 1380 deaths. Half the deaths in mines were occasioned by fall of roof or side. Of the 459 killed in the railway service 94 were permanent-way men, 49 porters, 37 shunters, 34 brakemen and goods-guards, and 245 in various other occupations. Among the 742 factory-workers killed the greatest number of deaths in any one group of occupations was in the founding and conversion of metals, viz. 107; there were 91 in shipbuilding, 65 in textile factories, and 48 in extraction of metals.

Between 1900 and 1903 inclusive the annual number of cases of lead-poisoning fell from 1058 to 614, or 42 per cent., and the deaths from 38 to 19, or 50 per cent. Cases of anthrax rose from 37 to 47, and deaths from 7 to 12. Cases of other forms of industrial poisoning fell from 34 to 13, and in 1903 there were no deaths from these causes. Special attention has been drawn to the connection between rock-drills and lung disease among the Cornish miners, among whom the death-rate has grown to be eight or ten times that among coal or ironstone miners. Certain sanitary measures have been suggested.

*Miscellaneous.*

**Workmen's Compensation.**—A Departmental Committee was appointed by the Home Secretary in Nov. 1903 to consider what amendments in the law relating to compensation for injuries to workmen are necessary or desirable, and to what classes of employments not now included in the Workmen's Compensation Acts those Acts can properly be extended with or without modification. The committee consisted of Sir Kenelm Digby, K.C.B., Judge Lumley Smith, Sir Benjamin Browne, D.C.L., M.I.C.E., Capt. A. J. G. Chalmers, and Mr. George N. Barnes. The Report was issued in Sept. 1904. It recommended the extension of the principle of the Act of '97 to seamen, and suggested a special inquiry in the case of fishermen. Also that the benefits of the Act be extended to carriers, workers in workshops where more than five are employed, to persons in care of horses and locomotives, and that the Home Office have power, after inquiry, to extend the application of the Act to other occupations, subject to approval of Parliament. It further recommended that the Act cover all building operations, employment on docks, wharves, etc., and in laundries with mechanical power. It recommended special provision for compensation in the case of old or infirm persons, to remove or lessen the difficulty of employing such persons. As to the Act of 1900, it recommended that it shall not apply to casual labour in agriculture.

*The Unemployed.*

Employment during 1903 showed a falling off compared with the three immediately preceding years. The mean percentage of unemployed returned by Trade Unions during 1903 was 5·1, compared with 4·4 in 1902 and 3·8 in 1901. The average percentage for ten years '94-1903 was 4·1. The falling off in 1903 was most marked in the latter half of the year.

In October 1904 inquiries were addressed by the Labour Department to the London boroughs, to the principal provincial towns, and to the local correspondents of the Department, on the subject of exceptional distress due to unemployment, and also as to measures taken for relief. The returns reported exceptional distress in 26 of the 28 Metropolitan districts, and in 52 of the 71 provincial towns. Relief works were reported in operation in November in 22 of these towns, and public works were being expedited. In pursuance of a scheme suggested by the President of the Local Government Board at a conference of Metropolitan Guardians (Oct. 14th), Joint Committees, representing the Borough Councils, the Guardians, and charitable associations, have been formed in nearly all the Metropolitan boroughs. A Central Committee (consisting principally of representatives of the Joint Committees) has also been formed, and met on Nov. 26th and Dec. 2nd. The main object was to ensure the provision of work, as far as possible, for those of the able-bodied unemployed of London, who, though willing to work, were out of employment through no fault of their own. The Lord Mayor issued an appeal for funds on Dec. 12th, and the response was subscriptions amounting to over £33,000 on Dec. 30th, 1904.

The Board of Trade issued, in a substantial volume, a "Report on Agencies and Methods for Dealing with the Unemployed in Certain Foreign

Countries," compiled by Mr. D. F. Schloss. This report deals with Germany, Austria, Switzerland, France, Belgium, and Holland. Nearly half of the volume is devoted to Germany, where, Mr. Schloss says, every form of relief has been more fully tried than elsewhere. The German Trade Unions give assistance to unemployed members both in the form of allowances to those out of work and of travelling money to those who desire to journey in search of employment. Of the several offices for Insurance against Unemployment in Winter in Germany, Mr. Schloss does not speak hopefully. The premium does not meet the demands upon the funds, which have to be made up by benevolent contributions or municipal subsidies; and it is difficult to prevent abuse on the part of the claimant. Travellers' Homes exist, to the number of nearly 500, organised by a Travellers' Homes Society. In these homes the traveller may either pay for his entertainment or perform work in exchange for board and lodging. Then there are Relief Stations maintained by the public authorities, a system which has been in operation for fifty years. The travelling workman has to work in exchange for relief. The stations are in connection with a Labour Registry. "The German workman," says Mr. Schloss, "who has become weary of travelling from relief station to relief station in his search for work, or who despairs of obtaining employment, . . . has the opportunity afforded him of taking refuge in an institution which will receive him for a more or less prolonged stay—the Labour Colony." These colonies are avowedly charitable institutions for those who, as the rules say, "have suffered inward or outward shipwreck, or who stand in danger of so suffering." The inmates of these colonies consist mainly of the "wreckage" of the population. The Labour Registries, of seven types, are described as the most interesting of the institutions in Germany dealing with the unemployed. By means of Clearing-houses, or Central Registries, a great number of local registries are linked together, and can thus bring the workman into communication not only with a large area within the Empire, but even beyond. Relief Works are often set on foot in German towns.

In Austria the unemployed find a number of Registry Offices of different kinds accessible to them. The Trade Guilds also assist their members to obtain work, as do the Trade Unions and other employees' associations and the employers' associations. The German system of Relief Stations has been copied by the Austrians.

In Switzerland there are three distinct types of Insurance against Unemployment—voluntary, compulsory (St. Gall), and trade union insurance. There are, besides, Relief Stations, Travellers' Homes, Labour Colonies, and Labour Registries.

In France there are Labour Colonies, Labour Registries, and both philanthropic and municipal Relief Works.

Belgium has Insurance against Unemployment, Labour Colonies, and Labour Registries.

In Holland there are two kinds of Labour Colonies—free and penal. Mr. Schloss says that the Dutch Free Labour Colonies do not "exhibit any conspicuous appearance of substantial success."

See VAGRANCY AND LABOUR COLONIES.

**Land Law Reform Association.** The Association advocates amendments of the law to encourage occupiers in improving either houses or agricultural holdings, by giving them absolute security for the results of their outlay; the rating of ground values; more adequate provision of land for small holdings, etc.; healthy and adequate housing for the working classes; abolition of copyhold, the customary tenure, obsolete manorial rights, and the law of primogeniture; the conveyance of land by registration of title, etc. **President,** Sir Walter Foster, M.P. **Hon. Secretary,** James Rowlands. **Secretary,** F. A. Creed, 18, Cockspur Street, London, S.W.

### LANDLORD AND TENANT.

The relation of landlord and tenant is created wherever a person having an estate in land grants to another person in consideration of a rent a lesser estate in this land. Thus, when a freeholder lets his land to a farmer for a term of years, he becomes landlord and the farmer becomes tenant.

Tenancies are of many kinds; and the most usual are a tenancy for a term of years, a tenancy from year to year, a tenancy at will, and a tenancy on sufferance. A tenant for a term of years is a leaseholder; and if the term be longer than three years the lease must be by deed, although, where no deed has been executed, evidence is admissible to prove that there has been an agreement for a lease. Where there is a lease in proper form the tenant is secured in his possession so long as he pays his rent, and at the expiry of his term he is supposed to give up possession without the formality of a notice to quit. Formerly a breach of any of the covenants contained in the lease was enough to void it; but now a breach may usually be compensated by a money payment. A tenancy from year to year arises when land is let from year to year, or when it is let without any express stipulation to that effect, but with the reservation of a yearly rent, or when the tenant holds over after the expiration of his term and pays rent for so doing. This tenancy cannot be terminated by either party otherwise than by giving a half-year's notice; so that if this notice be not given before the expiration of the first half-year, another year is added to the tenancy, and so on. A tenancy from year to year may be created by word of mouth, and a verbal notice to quit is valid, although it is always desirable, as a precaution, to give written notice. A tenancy at will is a tenancy terminable at the pleasure of either party. The Courts are reluctant to construe any tenancy as a tenancy at will unless there is an express agreement to that effect. But this agreement need not be in writing. A tenancy by sufferance is little more than the fact of possession. It occurs when a tenancy of a higher kind, such as a tenancy from year to year, has expired, and the tenant remains in possession without either hindrance or sanction from the landlord. Tenancy by sufferance cannot be created by the will of the parties, but only by legal construction. If the landlord accept rent from the tenant by sufferance, he immediately creates, according to circumstances, a tenancy at will or from year to year. A tenant under a lease or from year to year may sub-let unless expressly restricted from so doing, but a tenant at will or on sufferance cannot do so.

For the recovery of rent in arrear the landlord has, beside the other remedies of a creditor, the remedy of distress. He may, by his bailiff holding a certificate under the Law of Distress Amendment Act, '88, take possession of so much of his tenant's chattels upon the holding as by their sale will produce a sum sufficient to discharge the arrears. He must distrain at one time for the whole of that which is due. No arrears of rent can be recovered by distress but within six years of their becoming due. After five days have elapsed from the seizure of the goods they may be sold, first having been valued by two sworn appraisers if so required by the tenant or owner of the goods, and the surplus, if any, must be repaid to the tenant. If the distress was unlawful the tenant has an action of replevin. It is a general rule that whatever is affixed to the freehold goes with the freehold; and this rule with its exceptions gives rise to a large part of the law of landlord and tenant.

**Fixtures** made by the tenant may be subdivided into three classes: (1) fixtures for purposes of trade, (2) fixtures for ornament or convenience, and (3) fixtures for agricultural purposes. As regards (1) trade fixtures, like machinery, furnaces, brewing vats, salt-pans, etc., these may be removed by the tenant who has set them up, in every case in which their removal occasions no material injury to the freehold. (2) Fixtures for ornament or convenience, like window-blinds, marble chimney-pieces or kitchen ranges. These also, if set up by the tenant, may be removed by him, provided always that in removing them he does little or no damage. (3) Fixtures for agricultural purposes. The law relating to these is chiefly contained in the Agricultural Holdings Acts.

Somewhat analogous to fixtures are **emblements**—that is to say, crops resulting from the tenant's cultivation which at the expiration of his tenancy are still uncut and growing. The general rule with respect to these is that the cultivator has the right, after such expiration, to enter on the land to reap and to carry away the produce of his labour. If he die before the harvest, such crops fall into his personal estate and his executor or administrator succeeds to the rights which he had. Where a tenant from year to year holds of a landlord who has only a life estate, and the landlord dies in the course of the current year, the tenant is entitled to occupy the holding until the year has expired, and the new landlord is entitled to a proportionable part of the year's rent.

The **non-payment of rent** does not affect the validity of a notice to terminate a tenancy. Thus a notice given on March 25th to take effect on Sept. 29th is good, even though the rent due on March 25th may not have been paid. The tenant who agrees to "keep in repair" a house, without any saving clause, takes upon himself a liability to rebuild or renovate the house if destroyed or rendered uninhabitable by fire, settlement, etc. The tenant who agrees to pay "all rates and taxes," without any saving clause, may thereby become liable for a special rate for making up and paving the road, if it has not been taken over by the local authority.

**Land Nationalisation.** For an exhaustive article upon this subject, dealing with it under the following heads—Growth of the Movement, the Legal Argument, the Change from

Tenure to Ownership, and How to Nationalise the Land—see eds. '93 and '94. See also next article, and LAND VALUES LEAGUE.

**Land Nationalisation Society.** This Society was established in the spring of '81, and is the oldest of the British societies which have for their object the abolition of the present system of private ownership of land and the establishment of a general system of public land ownership. It advocates that all land should be assessed on its true value, not on its rental, and that either the State or local authorities should have larger powers of compulsory land purchase on the basis of the assessment. Embodying these two objects, a **Tax and Buy Land Bill** was introduced into Parliament and read a first time on Feb. 5th, 1904. See **Session**, sect. 51. The Society's **Yellow Vans** were started in 1890, and are sent out every summer. **President**, Prof. Alfred Russel Wallace, D.C.L., LL.D., F.R.S.; **Treasurer**, G. A. Hardy, L.C.C.; **Hon. Secretary**, Clement M. Bailhache, LL.B., C.C.; **Secretary**, Joseph Hyder. **Office**, 432, West Strand, London, W.C.

**Land Registry.** The Land Transfer Act '97, which came generally into operation on Jan. 1st, '98, will be found summarised in eds. '98-1902. In the three years '99-1901 a general register of title for the county of London was constructed, and 32,268 properties, of the aggregate value of £34,907,643, were placed on it, while 21,875 transactions of sale, mortgage, inheritance, and otherwise were recorded of these properties. The Land Registry general offices are at 34, Lincoln's Inn Fields. The business of registration for the portions of the county of London lying north of the Thames is carried on on the ground floor of No. 6, Portugal Street, Lincoln's Inn, which can also be approached through No. 34, Lincoln's Inn Fields. The business for the portions of the county lying south of the Thames is carried on at No. 3, Clement's Inn, Strand. Office hours: Registration 11 to 3; other business 10 to 4. Saturdays, closed at 2. The staff of the Registry includes: **Registrar**, Charles Fortescue-Brickdale; **Assistant Registrars**, Hugh Pollock, T. S. Dury, and C. T. Musgrave; **Secretary**, Guy M. Kindersley; **Assistant Secretary**, C. W. Heneage; **Examiners of Titles**, the Conveyancing Counsel of the Chancery Division and Frederick Stallard, Edward Hume, William Seymour Eastwood, and Thomas R. Colquhoun Dill. The Land Registry also contains the Land Charges, Registration, and Searches Department, and the Middlesex Deeds Department.

**Land Tax.** The land tax in England and Wales is an apportioned tax. It is not charged at the same rate in the pound over the whole country, but each parish is liable to contribute a fixed annual quota. The parochial quotas were fixed permanently and made perpetual in 1798 by the Act 38 Geo. III. c. 60, but subject to redemption. The land tax quota payable is required by law to be raised in each parish by a new assessment yearly and from year to year at an equal rate on the annual value of all lands and tenements, etc., which have not been exonerated from land tax (42 Geo. III., c. 116, s. 180). Such lands and tenements are to be charged "with as much equality and indifference as is possible by a pound rate" (38 Geo. III. c. 5, s. 4). Under the Finance Act, '96, s. 31, the amount assessed may not exceed the amount which would be

produced by a rate of 1s. in the £ on the "annual value." For the purposes of sect. 31 of that Act "annual value" is the annual value as assessed under Schedule A in the Income Tax Act, '42. The assessment of the land tax rests exclusively with the Land Tax Commissioners for each Division, and any complaint against a land tax assessment on the ground of inequality or incorrectness must be by way of appeal to them. Every person intending to appeal is required to give notice of his intention in writing to one or more of the assessors. Appeals once heard and determined by the Commissioners are final. If the income of an owner is less than £160 per annum, he can claim exemption from land tax; or the remission of half the tax if his income does not exceed £400. Any person having an estate or interest in lands and tenements (except tenants at rack rent, or holding under the Crown) may contract for the redemption of the land tax charged thereon. By the Finance Act '96 the consideration for the redemption has been fixed at thirty times the amount of the tax. Information as to redemption may be obtained from the clerk to the Commissioners of Taxes for the division in which the land tax desired to be redeemed is assessed, or (by letter) from the **Registrar of Land Tax**, Inland Revenue Office, Somerset House, London, W.C.

**Land Values, English League for the Taxation of.** This League was founded, under the name of the Land Reform Union, in April '83, "to advance the principles laid down by Henry George in "Progress and Poverty" for the restoration of the land to the people." The League has always advocated the taxation of land values, and has offered a strenuous resistance to every proposal "for buying out Irish or other landlords at the expense or under the guarantee of the ratepayers." The League devotes special attention to lantern lectures. Its reports and publications deal with every aspect of the Land Question. **President**, J. H. Whitley, M.P.; **Gen. Sec.**, Frederick Verinder; **Hon. Treasurer**, Lewis H. Berens. **Office**, 376 and 377, Strand, London, W.C. Monthly paper, *Land Values*.

**Lang, Andrew, M.A., LL.D.,** hon. D.Lit., Oxford, was b. at Selkirk, 1844, and ed. at Edinburgh Academy, St. Andrews University, and Balliol College, where he graduated first class in classics. Elected a **Fellow of Merton**, '68. He has for some time been on the literary staff of the *Daily News*, and is a well-known contributor to periodical literature. The monthly article "At the Sign of the Ship," in *Longman's Magazine*, is his work. His "Ballads and Lyrics of Old France," and "Ballades in Blue China," '81, brought him into prominent notice. His subsequent works, especially "Helen of Troy," "Rhymes à la Mode," and "Custom, Ritual, and Myth," increased his reputation. He is joint translator, with Prof. Butcher, of the "Odyssey," and with Mr. Myers and Mr. Leaf of the "Iliad." In '88 he was appointed Gifford Lecturer on Natural Religion at St. Andrews University, and delivered his inaugural address Jan. 17th, '89. Recent works of his include "The Gold of Fairnilee," "Lost Leaders" (leading articles which had appeared in the *Daily News*), "Prince Prigio," "The Life of Lord Idlesleigh," "The World's Desire" (in collaboration with Mr. Rider Haggard), "Essays in Little," "Angling

Sketches," "Homer and the Epic," "Ban and Arrière Ban," "A Monk of Fife" (a novel), "Life of John Gibson Lockhart," "Pickle the Spy," a history of the obscure years of Prince Charles, "Modern Mythology," "The Book of Dreams and Ghosts," "The Making of Religion," and "The Disentanglers." Mr. Lang has also edited a charming series of "Fairy Tales" in five books, a "Blue Poetry Book," and two books of "True Stories," all for children. Address: 1, Marloes Road, W.

**Lang, Very Rev. John Marshall, D.D.**, was b. at Glassford, Lanarkshire, 1834. Ed. at home privately, at Glasgow High School, and the University. Ordained in the Church of Scotland, '56, he became minister of East Parish (Aberdeen), Fyvie, Anderston (Glasgow), Morning-side (Edinburgh), and in '73 Barony (Glasgow), where he succeeded Dr. Norman Macleod. In '93 he was elected Moderator of the General Assembly, and was President of the Pan-Presbyterian Alliance '97-1900. He was appointed Principal of the University of Aberdeen in 1900. His works include "Ancient Religions of Central America," "The Anglican Church," "The Last Supper of our Lord," "Life: is it worth Living?" "The Expansion of the Christian Life" (Duff Lecture), and "The Church and its Social Mission" (Baird Lecture). His son, the Right Rev. Cosmo Gordon Lang, D.D., was during 1901 appointed a residential Canon of St. Paul's and consecrated as Bishop of Stepney.

**Laurier, Sir Wilfrid, G.C.M.G.**, the first French-Canadian Premier of the Dominion, was b. at St. Lin, 1841, and educated for the bar. Called in '64, he at once began to show his great ability, and rose rapidly in his profession. He embarked on his political career in '71, when he was elected as a Liberal to the Quebec Provincial Assembly; and here, too, his eloquence and ability at once brought him to the front. In '74 he was elected to the Federal Assembly, and his high personal character, his undoubted loyalty and attachment to the connection of the colony with Great Britain, together with his great oratorical powers, which have earned for him the title "Silver-tongued Laurier," soon gave him high rank in the Liberal party. From the first he advocated a policy of free trade, so far as the revenue requirements of the country would allow; and, although a Catholic, his spirited resistance to the attempted dictation of the Roman Catholic hierarchy in regard to the Manitoba Schools question, showed that he was independent of such influence in political affairs. On the retirement of Mr. Blake in '91 he was chosen as leader of the Liberal party, and at the General Election of '96 he led his followers to a notable victory. His tariff legislation during '97, giving Great Britain the benefit of preferential trade with Canada, aroused much enthusiasm both in the colony and at home, and he was warmly welcomed when he came to London to attend the Jubilee festivities. He was then appointed a member of the Privy Council and made a G.C.M.G. In 1900 he again secured the approval both of the Dominion and of the Empire by the prompt despatch of Canadian troops to aid the mother country in South Africa, and led his party to another victory at the polls in November. He attended the Colonial Conference (*q.v.*) and the Coronation in England in 1902. He was again returned to power in 1904. See CANADA.

## LAW, ENGLISH COURTS OF.

The English Courts of Law having jurisdiction in actions between parties are the **House of Lords**, the **Supreme Court of Judicature**, with its two main divisions—the Court of Appeal and the High Court of Justice—and the **County Courts**. In addition to these Courts, which have jurisdiction over all England, there are certain **Local Courts of Record**, of which the chief are: The Mayor's Court in the City of London (which has a concurrent jurisdiction with the High Court in all matters affecting residents within the city or in which the cause of action arises in the city), the Chancery Court of Lancaster, the Liverpool Court of Passage, and the Salford Hundred Court. The Courts having criminal jurisdiction are the High Court of Justice (King's Bench Division), the Central Criminal Court, the Courts of Oyer and Terminer and Gaol Delivery (usually called the Assizes), the Courts of General Quarter Sessions in counties and boroughs, and the Petty Sessional Courts, metropolitan, county, and borough. Besides these Courts there are certain **Ecclesiastical Courts** having jurisdiction in matters affecting the churches, church property, and the discipline of the clergy of the Established Church.

The Judicial Committee of the Privy Council is the body by which appeals to the King in Council are heard. These are appeals from Colonial or Indian Courts, and from Ecclesiastical or Prize Courts in England.

The following is a list of judges of the Supreme Court of Judicature:—Lord High Chancellor: The Earl of Halsbury. **Court of Appeal**: The Lord Chancellor, Lord Alverstone (Lord Chief Justice of England), the Right Hons. Sir R. H. Collins, LL.D., D.C.L. (Master of the Rolls), Sir F. H. Jeune (President of the Probate Division), Sir R. Vaughan Williams, Sir R. Romer, Sir J. Stirling, Sir J. C. Mathew, and Sir H. H. Cozens Hardy.

**Chancery Division**: Lord Chancellor, Sir A. Kekewich, Sir G. Farwell, Sir H. B. Buckley, Sir M. Ingle Joyce, Sir C. Swinfen Eady, and Sir T. R. Warrington.

**King's Bench Division**: Lord Alverstone, Sir A. Wills, Sir W. Grantham, Sir J. C. Lawrence, Sir W. R. Kennedy, Sir E. Ridley, Sir J. C. Bigham, Sir C. F. Darling, Sir A. M. Channell, Sir W. G. F. Phillimore, Bart., Sir T. T. Bucknill, Sir J. Walton, Sir A. R. Jelf, Sir R. Bray, and Sir A. T. Lawrence.

**Probate, Divorce and Admiralty Division**: The Rt. Hon. Sir F. H. Jeune (President), and Sir J. G. Barnes.

Other Judges are the **Lords of Appeal in Ordinary**, Lords Macnaghten, Davey, Robertson, and Lindley. Paid Member of the Judicial Committee of the Privy Council: the Rt. Hon. Sir Richard Couch. **Court of Arches**: Sir Lewis T. Dibdin. **Consistory Court**: Mr. T. H. Tristram, D.C.L. **Bankruptcy Court**: Sir J. C. Bigham: **Railway and Canal Commission**: Sir J. C. Bigham, Lord Stormonth-Darling, Mr. Justice Madden, Sir F. Peel, and Viscount Cobham. As to salaries, see FINANCE, NATIONAL, III., p. 187.

### I. Civil Courts.

i. The House of Lords is the final Court of appeal for England (and also for Scotland and Ireland) in all civil matters. It has a certain jurisdiction in criminal matters by writ of error

(but this jurisdiction is practically in abeyance), and it has also an original jurisdiction in certain criminal cases affecting a peer of Parliament or a peeress. No appeal can be brought to the House of Lords except from a judgment of the Court of Appeal, and in some cases then only by leave of the Court of Appeal. Technically and historically an appeal to the House of Lords is an appeal to "His Majesty the King in his Court of Parliament"; practically and in fact it is an appeal to a Statutory Court of Appeal, of which the judges are the Lord Chancellor, the Lords of Appeal in Ordinary—who are judges appointed to that office at a salary, and who as such become life members of the House of Lords, both in its judicial and legislative capacities—and such members of the House of Lords as have held high judicial office in England, Scotland, or Ireland, which includes ex-lord chancellors and ex-judges of the Supreme Court. To form a quorum for judicial business three of these persons must be present. Lay peers claim the right to sit at the hearing of appeals, and have on one or two occasions exercised it.

ii. **The Supreme Court of Judicature** consists of two main divisions—the **Court of Appeal** and the **High Court of Justice**. All appeals from a judge of the High Court and all divisions of that court, except on a criminal matter, and from many inferior courts, now go direct to the Court of Appeal. From its decisions an appeal in most cases lies to the House of Lords. The **Court of Appeal** commonly sits in two divisions of three judges each, Court No. I. dealing with appeals from the King's Bench and the Admiralty Divisions of the High Court and appeals lying direct to the Court of Appeal from the Inferior Courts in matters of a nature similar to those dealt with by these divisions of the High Court, and Court No. II. dealing with appeals from the Chancery and Probate and Divorce Divisions of the High Court, and similar appeals from inferior courts lying direct to the Court of Appeal. "Under the **Supreme Court of Judicature Act, 1902**, the Court of Appeal may sit in three divisions, subject to the necessary number of judges attending each division, and sometimes during 1903 three divisions have sat, the Lord Chancellor, the Lord Chief Justice, and the President of the Probate Division forming the third Court." To the judges of this court also now belongs the jurisdiction in **Lunacy** which formerly belonged to the Lord Chancellor, though most of this jurisdiction is in practice exercised by the Masters in Lunacy. All ordinary appeals must be heard by at least three judges of the Court of Appeal sitting together, unless in pursuance of the Act of '98 the parties consent to the appeal being heard by two. Appeals of an interlocutory nature are heard by two Lords Justices.

**The High Court of Justice** now consists of three divisions. The **Chancery Division**, of which the Lord Chancellor is President but not an ordinary judge, has six judges, arranged in couples, one sitting for trial of actions only, and the others taking all other business. The **King's Bench Division**, of which the Lord Chief Justice of England is President and an ordinary judge, has in addition fourteen other judges, called puisne judges. The **Probate, Divorce, and Admiralty Division** has two judges, of which the senior is called the President of the Division.

All actions originating in the High Court of Justice are tried therein by one judge—

sitting without a jury in the Chancery Division, with or without a jury in the King's Bench Division, with or without a jury in the Probate, Divorce, and Admiralty Division when sitting for Probate or Divorce, and with or without naval assessors (Elder Brethren of Trinity House) when sitting in Admiralty. Procedure in all the divisions is regulated by Rules of Court, and is as follows: The writ of summons is issued in the name of the King, tested by the Lord Chancellor for the time being, and served on the defendant by the plaintiff's solicitor. The defendant must within eight days of the service enter an appearance (by himself, or by his solicitor filling up a formal document) at the offices of the High Court. The plaintiff then, if required, delivers a statement of claim, and the defendant in reply a statement of defence. To this the plaintiff delivers a reply, and the pleadings as they are called are closed. The action is then set down for trial, and is tried according to its nature by a judge alone, or a judge and jury.

Much of the work of the High Court of Justice never comes into Court, but is done in **Chambers**, that is, before the Masters of the High Court (who sit privately), and in more important matters before a judge sitting privately. The proceedings on a writ for the recovery of a debt are, where there is no dispute, conducted entirely in Chambers, and where the debt is disputed, but the dispute is not in the judgment of the master, or on appeal the judge in Chambers, a *bona-fide* one, the master or judge can give the plaintiff the right to sign judgment and issue execution for his debt without any trial. Most of the administration and advisory work of the Chancery Division is done in Chambers. The Chambers of the Probate, Divorce, and Admiralty Division are called Registries, there being a Probate Registry, a Divorce Registry, and an Admiralty Registry. This chamber work can proceed to some extent in District Registries, which exist all over England, and in which registries writs can also be issued.

iii. **The County Courts**, as they now exist, were established in 1846. They have jurisdiction in all claims for debt or damages (with very few exceptions) not exceeding £100. They have exclusive jurisdiction under the Employers' Liability Act '80 and the Workmen's Compensation Act '87 (whatever may be the amount claimed) under the Tithes Act, and also outside the Metropolitan area in bankruptcy. They also have collateral jurisdiction with the High Court in many matters on the Chancery or Equity side, and in Admiralty and Probate. The Courts would be much more correctly described as District Courts. The whole of England and Wales is divided into circuits, to each of which a judge is assigned. Each circuit is divided into Court districts. In every district a court must be held at least once a month (except September); in London and in some large towns courts are held on several days in each week. The judge, appointed by the Lord Chancellor, must be a barrister of at least seven years' standing; the registrar of each court, appointed by the judge, must be a solicitor of at least five years' standing; the high bailiff, who is responsible for the service of the process of the Court, and for levying executions, etc., is also appointed by the judge. This post is in many cases, and must be in all cases where there has been a

vacancy in the office of bailiff since '66 (unless by special order of the Lord Chancellor) held by the registrar. Besides actions that may be commenced in the County Court, many actions commenced in the High Court may be, and commonly are, sent down from the High Court and heard in the County Court. Only a few courts held in towns situate on the coast, appointed by an Order in Council, have Admiralty jurisdiction. The procedure is simple. On the day fixed for the trial the parties appear, either in person or by solicitor or counsel, and the case is heard and determined by the judge or registrar. Cases of contract where the defendant does not appear are heard by the registrar; who also settles the terms of payment where the debt is admitted; he also has power to try disputed cases by consent of the parties, where the sum claimed does not exceed £2. A jury of eight persons may be summoned if the amount involved exceed £5, or if under that amount by leave of the judge. The Court fees payable are 1s. in the £ for each £ claimed on entering the plaint, and 1s. additional, and 2s. in the £ for the hearing, with a maximum of 21s. and 40s. respectively. There is an appeal to the High Court on a question of law, but not of fact, in cases where more than £20 is claimed, but where less than that sum is claimed leave to appeal must be obtained from the judge. There is a special form of summons, called a default summons, commonly used for the recovery of simple debts, which requires personal service.

## II. Criminal Courts.

i. The Court of Crown Cases Reserved is a statutory Court consisting of at least five judges of the Queen's Bench Division of the High Court, of which the Lord Chief Justice should be one, and is the Supreme Court of Appeal in all questions of criminal law. It is not a Court of Appeal "of fact." Questions of law can be brought before this Court on appeal from the Central Criminal Court, the Assize Courts, and the Courts of Quarter Sessions, but only if the Court below consents to reserve the point for the decision of the Court.

ii. King's Bench Division of the High Court. All proceedings in the nature of appeals on points of law from justices sitting in Petty Sessions come before the King's Bench Division of the High Court, by way of a case stated by the magistrates, or of an application for a writ of mandamus requiring the magistrates to hear and determine a matter that they have dismissed on a preliminary objection without going into the merits, or where there has been a conviction without jurisdiction, and the justices decline to state a case by writ of certiorari, to have the conviction brought up, when the Court may quash or confirm it. "Stating a case" is a similar process for justices at petty sessions to reserving a case for the Court for Crown Cases Reserved by Assizes or Quarter Sessions, and a case can only be stated on questions of law. Besides this appellate jurisdiction the King's Bench Division has power by certiorari to remove all indictments found at the Central Criminal Court, the Assizes or Quarter Sessions into the King's Bench Division, the Central Criminal Court, or to any Assize Court for trial, and by virtue of the Judicature Acts the Assize Courts form part of the High Court of Justice.

iii. The Central Criminal Court is a special statutory Court for the City and County of London,

the County of Middlesex, and some portions of the Counties of Surrey, Kent, and Essex. It takes the place of the Assize Courts for these districts, and is also the Quarter Sessions Court for the City of London. The judges of the Court are the Lord Mayor, the Lord Chancellor, all the judges of the Supreme Court, the Aldermen, Recorder, and Common Sergeant of the City of London, and certain other judicial and ex-judicial dignitaries (see LONDON CORPORATION). Trials take place on true bills found by a grand jury before two of the judges of the Court and a petty jury. As a rule there are three Courts, one before a judge of the King's Bench Division with the Lord Mayor or an alderman, and the others before the Recorder and the Common Serjeant, with an alderman in each case. The more serious cases (murder always) are tried before the judge of the High Court. The Court sits twelve times a year. To this Court is now also attached the Criminal Jurisdiction in Admiralty.

iv. The Assizes, or the Courts of Gaol Delivery and Oyer and Terminer, are now, by virtue of the Judicature Acts, Circuit Courts of the High Court of Justice. At these Courts, which sit in the assize town of each county two or three times a year, are tried all criminal cases (except those triable at the Central Criminal Court, Quarter Sessions, or by Courts of Summary Jurisdiction). The Court usually consists of a judge of the King's Bench Division, sitting with a petty jury; but any King's Counsel may, as a commissioner of assize for his circuit, if specially appointed for the purpose, sit instead of a judge. The procedure before the Assize Court, is as follows: The grand jury, which consists of not more than twenty-three or less than twelve jurors of the county, after being charged, examines the bills of indictment against accused persons, and decides, after hearing the witnesses for the prosecution, if there is a *prima-facie* case, either returning "a true bill" (in which case the accused stands his trial), or ignoring the bill (in which case the accused is discharged). Though a grand jury, as a rule, only considers bills preferred against persons who have previously been committed for trial by justices, it may prefer an indictment on its own motion, and new counts may be added, or the offence may be differently charged. Under certain circumstances, too, a prosecutor may be bound over to prosecute at his own desire where the justices refuse to commit. The grand jury having found a true bill, the accused is arraigned and the indictment read over to him, and he is called on to plead guilty or not guilty. If the plea is not guilty, the trial proceeds before the judge and petty jury in almost precisely the same way as a trial between parties in the King's Bench Division (*q.v.*).

v. Quarter Sessions are Criminal Courts held at least quarterly in every county or division of a county for which there is a separate Court of Quarter Sessions, and in every borough having a grant of Quarter Sessions or right to hold Quarter Sessions for trial of offences arising in the borough. The judges of County Quarter Sessions are all the justices of the peace for the county. The chairman is only their spokesman, but on a criminal trial he practically acts in the same way as the judge at the Assizes, charging the grand jury, directing

the trial, and summing up to the petty jury. The procedure on the trial of prisoners is similar to that at the Assizes: after indictment found by a grand jury, the trial takes place before the Court and a petty jury. The judge of a **Borough Quarter Sessions** is the Recorder of the borough (a barrister appointed by the Crown), who is sole judge, though the other magistrates attend; otherwise the procedure is the same as at County Sessions. At Quarter Sessions all criminal cases, except those triable only at Assizes, can be tried; the chief exceptions are treason, murder, perjury, bigamy and offences against women. These Courts also hear appeals from summary convictions, where the penalty imposed is imprisonment without the option of a fine; appeals from certain other orders and convictions of justices where an appeal is given by statute; and appeals against rates. On all these appeals the magistrates sit without a jury, and in counties they all have an equal voice. The Clerk of the Court is the Clerk of the Peace for the county or borough.

**vi. Courts of Summary Jurisdiction and Petty Sessions** (usually called Police Courts) consist of two or more justices of the peace, or a stipendiary or a metropolitan magistrate, sitting for and in a borough, petty sessional division of a county, or other summary jurisdiction district. Justices of the peace are appointed by the Crown, through the Lord Chancellor: in counties on the nomination of the Lord-Lieutenant; in boroughs on the nomination or suggestion of any person whose suggestions the Lord Chancellor thinks fit to accept. These Courts can try all minor offences; and many offences that can also be tried at sessions or assizes may, under certain circumstances, be tried by these Courts. These Courts also hold preliminary inquiries into the more important cases, and if they consider there is a *prima-facie* case commit the accused for trial at the next Assizes or Quarter Sessions as the case may require. The stipendiary and metropolitan magistrates are statutory judicial officers appointed by the Crown, and having special jurisdiction—enabled to exercise every power given by any statute to two justices of the peace, and forming by themselves Courts of Summary Jurisdiction. There is an appeal from many convictions of a Court of Summary Jurisdiction to the Quarter Sessions (*q.v.*), and on points of law there is an appeal by way of a "case stated," mandamus and certiorari, to the High Court, King's Bench Division (*q.v.*). There are special provisions enabling accused persons in some cases to elect to be tried by the justices and not be committed for trial to Quarter Sessions, and in other cases of electing to be sent for trial. The greatest term of imprisonment justices in Petty Sessions can give is six months. One justice sitting alone can, for certain minor offences, inflict a fine not exceeding, with costs, 20s., and not exceeding fourteen days' imprisonment; and can generally grant summonses, issue warrants, and remand arrested persons to prison pending the next meeting of Petty Sessions.

### III. Ecclesiastical Courts.

These are of three degrees of jurisdiction. **First**, purely spiritual courts, including the Archdeacon's Court, the Bishop's Consistory, and the Archbishop's Court; **second**, courts of mixed spiritual and secular jurisdiction—*e.g.*,

the Court of Arches and the Court of the Official Principal of York; and, **third**, courts of purely secular constitution—*e.g.*, the Judicial Committee of Privy Council, which is the Court of Final Appeal in ecclesiastical causes. Practically none of these courts now pretends to undisputed authority. The report of the Royal Commission on Ecclesiastical Courts ('83), while vindicating the historical position of them all, bewailed the confusion into which the administration of ecclesiastical law had fallen, and urged the adoption of various reforms. Absolute power, however, meanwhile rests with Sir Lewis T. Dibdin, K.C., D.C.L. (*q.v.*), "Judge of the Provincial Courts of Canterbury and York," under the Public Worship Regulation Act, '74, and, as such, **Dean of the Arches** and Master of the Faculties. By the issue of writs *de contumace capiendo* clergymen have been, and may be, imprisoned for defying sentences of **monition**, by **inhibition**, **suspension**, or **deprivation** decreed by this court. The judgments of the **Judicial Committee** may be upheld and enforced by any of the High Courts of Justice.

The **Archdeacon's Court** is a survival, and nothing more. It is a court of first instance, and appeals lie to the bishop, but its aid is seldom invoked.—**Consistory**. Every bishop has his Consistory Court held before his Chancellor or Commissary, in his cathedral church, or other convenient place in his diocese. In this court are granted **faculties** for the alteration, repair and renovation of churches. Nothing can be added to or taken from the **ornaments of the Church** except a faculty is obtained for the purpose. The **Archbishop's Court**, distinguished from the **Provincial Court**, is the canonical tribunal for the hearing of spiritual causes. **Sir Lewis Dibdin's Court**, or the old Court of Arches modified as stated, unites the powers of the *jus canonicum* with new powers conceded by the Church Discipline Act, '41, and the similar statute of '74, exercising authority in both Provinces. The Registrar is Mr. F. Hugh Lee, and the Court is held at Church House, Westminster. Lastly, the Judicial Committee of Privy Council, as representing the Royal Supremacy, is the absolute though not the canonical court of final appeal.

The Bishops assembled at Lambeth in January '99 resolved that a **Bill for the Reform of the Ecclesiastical Courts**, drawn on the lines laid down by the Royal Commissioners in '83, should be submitted to the Houses of Convocation. During 1900 and 1901 Convocation considered the subject, and a Joint Committee of both Houses presented a report on July 3rd, 1901. The following resolutions were then adopted:—  
 "(1) That it is desirable (a) to strengthen the constitution of the diocesan and provincial Courts; (b) that complaints concerning ritual or doctrine should, if the promotion of the suit be approved by the Bishop, be tried by the Diocesan Court in the first instance; (c) that if an appeal be carried to the Provincial Court it should there be heard before a Court constituted as hereinafter proposed. (2) That the Bishop sit in the Diocesan Court accompanied by two theological assessors, one nominated by the Bishop, the other elected by the benefited clergy of the diocese, and two legal assessors, of whom one shall be the Chancellor or his deputy, and the other a layman member of the Church of England learned in the law, chosen by the chairman or chairmen of the

Court of Quarter Sessions within the area of the diocese. (3) That an appeal to the Provincial Court shall be heard and determined by the Archbishop, accompanied by not less than two Episcopal assessors being Bishops of the province, nominated by himself, and approved by the Upper House of the Convocation of the province, and by two legal assessors, of whom one shall be the Archbishop's official principal or his deputy and the other appointed by the Lord Chancellor, and by not less than two theological assessors nominated by the Lower House of the Convocation of the Province, and approved by the Archbishop. (4) That in all cases arising in the diocese of the Archbishop, the Archbishop of the other Province shall take his place in the Court of appeal. (5) That all the non-official assessors specified in the foregoing resolutions shall be appointed for a term of years." The matter was further considered in Convocation during 1902, with the result that all the resolutions were approved by both Houses of the Canterbury Convocation except (4), which was referred back to the Committee. It was redrafted as follows:—“(4) That when the appeal is from the Diocesan Court of the Archbishop, it shall be heard and determined by three Bishops of the Province, appointed by the Upper House of the Convocation of the Province, accompanied by two legal assessors, one of whom shall be nominated by the said three Bishops, and the other appointed by the Lord Chancellor, and by not less than two theological assessors, nominated by the Lower House of the Convocation of the Province, and appointed by the said three Bishops when approved by them.” These resolutions were approved by the Lower House in 1902, and by the Upper House in 1903.

## LAW, SCOTTISH COURTS OF.

The principal Scottish Courts of Law having civil jurisdiction are (1) **The House of Lords**, which is the final Court of Appeal in Scottish as well as in English and Irish cases; (2) **The Court of Session**, sitting in Edinburgh, with its two main divisions, **The Inner House** and **The Outer House**; (3) **The Sheriff Courts**.

The principal Courts having criminal jurisdiction are (1) **The High Court of Justiciary**, (2) **The Sheriff Courts**.

The following is a list of the judges of the Court of Session, or, as they are more properly designated, Senators of the College of Justice:

**Inner House, First Division**—The Lord President (Lord Kinross), Lord Adam, Lord McLaren, Lord Kinnear. **Second Division**—The Lord Justice Clerk (Right Hon. Sir John Hay Athole Macdonald, K.C.B., Lord Kingsburgh), Lord Young, Lord Trayner, Lord Moncreiff.

**Outer House, Permanent Lords Ordinary**—Lord Kyllachy, Lord Kincairney, Lord Stormonth-Darling, Lord Low, Lord Pearson.

### 1. Civil Courts.

(i) **The House of Lords.** See LAW, ENGLISH COURTS OF.

(ii) **The Court of Session** consists of (1) the **Inner House**, with its two divisions of equal and co-ordinate authority:—The First Division, presided over by the Lord President of the whole Court, and the Second Division, presided over by the Lord Justice Clerk; and (2)

**The Outer House**, consisting of the five **Lords Ordinary** sitting singly. Each division of the Inner House contains four judges, of whom for most purposes three form a quorum, but as a general rule the full number hear every case. When necessary a quorum may be made up by the addition of one or more of the **Lords Ordinary**. The **Inner House** hears appeals from the judgments of the **Lords Ordinary**, from the **Sheriff Courts**, and from the **Dean of Guild**. It also acts as a court of first instance (1) where its *nobile officium* (or equitable power) is appealed to, as e.g. in petitions which have not been transferred by statute to the **Junior Lord Ordinary**, e.g., in the settling of schemes of administration of charities, also in cases where a statute has failed to provide for a particular contingency; (2) in actions appropriated to it by custom or by statute—of which latter the most important are company winding-up petitions and special cases on points of law when the facts are not in dispute.

The **Lords Ordinary** have, generally speaking, original jurisdiction in all Scottish civil actions. In some cases this jurisdiction is exclusive, as e.g. in Exchequer cases, most Maritime cases, actions relating to Rights of Status, as divorce, declarator of marriage, etc., and in reductions of deeds, and actions relating to the ownership of heritage of a greater value than £50 a year or £1000 in all. In other cases this jurisdiction is concurrent with that of the **Sheriff Courts** (*q.v.*). Where the value of the cause is not greater than £25 the cause cannot be brought before the Court of Session, but must be determined in one of the inferior courts. The pursuer may select the **Lord Ordinary**, who is to try the action, and the Division of the Inner House to which it is to belong and to which an appeal must be taken if such a course be resolved upon. The Lord President may, however, transfer cases from one Lord Ordinary to another and from one Division to another. To certain of the judges various classes of cases have, moreover, been appropriated by statute. An appeal from a Lord Ordinary to a division of the Inner House is termed a **Reclaiming Note**.

The **Bill Chamber** is a department of the Court of Session which acts in some respects as a separate court. It exercises the preventive jurisdiction of the court, granting interim remedies in regard to such matters as interdict and suspension of judgments. Under the Bankruptcy Acts it is the court which disposes of the numerous matters relating to sequestrations which require judicial authority. Further, in vacation it acts as the Court of Session in such matters as may be competently brought before it, its powers being very wide, and including all matters of urgency. The **Junior Lord Ordinary** is Lord Ordinary on the Bills during session. During vacation his duties are taken by the various members of the bench (except the Lord President and the Lord Justice Clerk) in rotation, each discharging the duties for a fortnight.

(iii) **The Sheriff Courts.**—These are territorial courts, each sheriffdom consisting of a county or group of counties. The **Sheriff Principal** acts mainly as a judge of appeal from the judgments of his substitutes and as an administrative officer. He may also, and generally does, practise as an advocate in the Court of Session. The **Sheriff-substitute** is the ordinary judge of first instance in the Sheriff Court. He may

entertain actions upon contracts or other personal obligations, however great their value, and actions relating to heritable right or title where the subject in dispute is not worth more than £50 a year or £1000 in value, but not actions relating to status. Besides presiding in the ordinary Sheriff Court, the Sheriff-substitute presides in the Debts Recovery Court and in the Small Debt Court.

In most cases an appeal from the Sheriff-substitute may be made to the Sheriff Principal, and then from him to one or other of the divisions of the Inner House of the Court of Session, or the appeal may be made directly to the latter.

(iv) **The Teind Court** is composed of four Inner House judges and one Lord Ordinary, styled the Lord Ordinary on Teinds. It deals with discretionary and administrative matters relating to parishes—*e.g.*, the augmentation of ministers' stipends, the disjunction and erection of parishes, etc.

(v) **The Valuation Appeal Court**, composed of two judges of the Court of Session, is, as its name indicates, the court which decides appeals against the decisions of county councils and magistrates of burghs relating to the valuation of lands and houses for the purpose of assessment.

(vi) **The Registration Appeal Court** is composed of two judges of the Inner House—one from each division—and one Lord Ordinary. It is the court of appeal against the judgments of Sheriffs upon petitions for registration as parliamentary (but not as municipal) voters.

(vii) **The Court for Election Petitions**.—Two judges of the Court of Session form the court to try petitions against the election of a member of Parliament.

(viii) **The Dean of Guild Court** is a court held in burghs for the purpose of exercising jurisdiction over the erection of new buildings, alteration of existing buildings, and such-like matters.

(ix) **The Lyon King at Arms** has jurisdiction in matters relating to heraldry and the right of bearing arms.

(x) **The High Court of Justiciary** (see **Criminal Courts**) is somewhat anomalously the court provided by statute for appeals from the Sheriff Courts under the Small Debt Act, 1837.

## 2. Criminal Courts.

(1) **The High Court of Justiciary**.—This is the Supreme Criminal Court of Scotland. It is composed of the thirteen judges of the Court of Session who are *ex officio* Commissioners of Justiciary. The President of the Court is the Lord Justice General of Scotland, who is also Lord President of the Court of Session. The Lord Justice Clerk comes next, and the seniority of the others is determined by the date of their commissions. Its jurisdiction extends to all crimes against the public law of Scotland committed in the country; but Scottish peers are amenable for felonies only to their own order. Its jurisdiction in the matter of crimes committed at sea is regulated by statute. The jurisdiction of the High Court is so extensive that it covers all acts that are plainly of a criminal nature, though previously unknown to the common law and not within any statute. It is the only competent court for the trial of certain major offences, as treason, murder, etc., and

in all cases in which by statute a higher punishment than imprisonment is directed. The Court may sit in any town, but in fact sits only at Edinburgh and in certain of the larger towns of Scotland. One judge can try cases, but where the case is important or difficult two or more may sit, and points of law may be referred to the decision of the whole Court, in which case three or more may dispose of the matter. Circuits are generally held twice in each year, in spring and autumn, and at Glasgow there is a third circuit in the winter. Under an Order in Council at present in force further additional circuits are now held. As a rule two judges go together on circuit and sit in different courts. The prosecution of offences at the instance of private persons, though valid in certain cases, is unknown in practice except in summary matters. The Lord Advocate is the only competent public prosecutor in the High Court, the Solicitor-General and the Advocates-Depute (of whom there are four) being his deputies. The High Court also sits as a Court of Appeal from the inferior criminal courts where some error in law or irregularity of procedure is alleged. In Scotland counsel and agents are always provided for prisoners who are unable to pay for their assistance. A jury in criminal cases has fifteen members, and they may give a verdict by a majority. They may find the prisoner "guilty" or "not guilty," or they may find the charge "not proven." When a verdict of "not proven" has been given the prisoner is released, and cannot be tried again for the same offence, even though fresh evidence may have come to light.

(ii) **The Sheriff Courts** have jurisdiction where the offence is committed within the sheriffdom. They may in general try any offence for which the punishment is arbitrary. The greater offences are tried by a sheriff (or his substitute) and a jury. The smaller offences are tried summarily without a jury.

(iii) **Borough Magistrates and Justices of the Peace** have a common-law jurisdiction now confined to petty cases, and a statutory jurisdiction in certain minor contraventions of Acts of Parliament.

## LAW, SCHOOL OF.

In 1904 a draft Charter of Incorporation was prepared for the establishment of a School of Law, and approved by the Joint Committees of the four Inns of Court and of the Law Society. The objects of the School are defined as the teaching and study of law in all its branches; and the governing body is to be a President and Council, the President being elected annually by the Council from among their number, and the Council consisting of 30 members (retiring after holding office for four years) to be nominated as follows: 4 each by the four Inns of Court, 8 by the Law Society, and 1 each by the Lord Chancellor, the Colonial Secretary, the Secretary for India, and the Universities of Oxford, Cambridge, and London. One-half of the first members nominated by the Inns of Court and Law Society, as well as the first University members, will retire after two years' service, being eligible for renomination.

The Charter provides that the present Treasurers and two Masters of the Bench of the several Inns of Court, and the present President, Vice-President, and two members of the Council of the Law Society shall be one

body politic and corporate by the name of the School of Law, shall have perpetual succession and a common seal, may hold, notwithstanding the Statutes of Mortmain, any lands, tenements or hereditaments within the United Kingdom not exceeding in the whole the annual value of £5000, and may grant, demise, or otherwise dispose of all or any lands, tenements, or hereditaments that may from time to time belong to the School of Law.

A petition has been presented to His Majesty in Council to grant this Charter. It points out that the Inns of Chancery have now ceased to exist, but that certain sums of money representing part of the proceeds of the sale of properties of the societies of New Inn and Clifford's Inn are subject to a trust for the promotion of legal education; and that on the application of the Attorney General the disposal of these funds has been held over to give time for the establishment of a School of Law.

### **Inns of Court.**

The Inns of Court are as follows:—  
**Inner Temple, Fleet Street.** Sub-Treasurer, Sir Henry Lawrence; Clerk, J. H. Milton.  
**Middle Temple, Fleet Street.** Under-Treasurer, J. W. Waldron.  
**Gray's Inn, Holborn.** Steward, Dennis W. Douthwaite.  
**Lincoln's Inn, Lincoln's Inn Fields.** Hon. Solicitor, S. L. Mumford; Steward, A. Weatherley Marriott.  
 At these Inns students for the Bar are entered. They are governed by Benchers.

### **Council of Legal Education.**

The Council of Legal Education was established by the four Inns of Court in 1852 to superintend regulations for admitting barristers. The Council is charged with the education and examination of such students. **Chairman, Lord Macnaghten; Clerk, Frederick Dapp. Office, 15, Old Square, Lincoln's Inn, W.C.**

### **The Bar Council.**

**General Council of the Bar.** The Council is the accredited representative of the Bar, and its duty is to deal with all matters affecting the profession, and to take such action thereon as may be deemed expedient. The Council consists of: (1) the Attorney General and Solicitor General for the time being, and every former Attorney General or Solicitor General whilst remaining in actual practice at the Bar; (2) 48 practising barristers elected by the whole Bar (not less than 12 of the Inner Bar and not less than 24 of the Outer Bar), one-half of the total number retiring from office at the time for the close of the election in each year. The Council has power to appoint additional members, not exceeding 6 in number, as the Council may consider desirable by reason of their Parliamentary or professional position. Such members go out of office at the time for the close of the election following their appointment. The time of the annual election is fixed by the Council, and is held as soon as possible after the annual general meeting of the Bar. A statement of the proceedings of the Council is published annually, and copies thereof are supplied to every barrister having an address in the Law List. Surplus copies may be obtained

on application to the secretary. The Council has received recognition at the hands of the legislature. **Chairman, Mr. C. M. Warmington, K.C.; Vice-Chairman, Mr. W. English Harrison, K.C.; Hon. Treasurer, Mr. T. T. Methold; Secretary, Mr. Henry C. A. Bingley; Clerk, Mr. C. Worthy. Offices of the Council, 2, Hare Court, Temple, E.C.**

### **The Law Society.**

The Law Society was established in 1825, and a royal charter was obtained in Dec. '31. In '45 it was remodelled upon the principle of other learned and professional bodies, and received a new charter. This charter was amended by a supplemental one in '72. Any solicitor practising in England or Ireland, and any writer practising in Scotland, as well as any solicitor or writer who has ceased to practise, is eligible for election as a member of the Society. The administration of business is in the hands of an elective council of forty ordinary members, of whom ten vacate their seats every year, and ten extraordinary members chosen by the Council from among those members of the Society who are members of provincial law societies, and nominated by various groups of these societies. The President and Vice-President are annually elected by the members of the Society from the members of the Council. The members of the Society at present number 7855. Its buildings are situated in Chancery Lane, and comprise a handsome hall and a library of upwards of 38,000 volumes. The general function of the Society resembles that which the Inns of Court discharge. It takes care of the professional training, character, and interests of solicitors. When it was founded no test was required from any person wishing to become a solicitor, beyond evidence of character and of having served under articles for the prescribed time. The Society instituted lectures on law in '33, and in '36 obtained from the judges authority to examine students on the completion of their articles. Since then Preliminary, Intermediate and Honours Examinations have been added, and the entire control of all the examinations has been transferred to the Society. Under recent legislation, all cases of alleged malpractice by solicitors are heard before a specially appointed committee, which, when necessary, makes a report to the High Court, which has the power of striking off the names of the offenders from the roll. The committee has never undertaken the duty of prosecuting offenders against the criminal law, and no such duty, express or implied, is cast upon it by charter or statute. The committee, however, places any evidence it obtains at the disposal of the Public Prosecutor. **Secretary, E. W. Williamson. Office, Chancery Lane.**

### **LAW CASES, 1904.**

An attempt is made in the following pages to bring under convenient headings readily recognisable by the layman some of the most important decisions of the legal year. Nearly every branch of law is illustrated; and while the object chiefly in view has been the collection of those decisions that are important to the man of affairs, it is hoped that the collection may be of use to the legal student in summarising the effect of the year's cases.

**Civil Judicial Statistics, 1902.**

The following table of proceedings in the various civil courts is taken from the civil judicial statistics published by the Government and edited by Sir John Macdonell.

	Proceedings begun, 1902.	Appeals, Actions, etc., heard and determined, 1902.
<b>Appellate Courts.</b>		
Judicial Committee of the Privy Council . . . .	85	71
House of Lords . . . .	96	49
Court of Appeal . . . .	731	618
High Court of Justice (Appeals from Inferior Courts) . . . . .	407	312
<b>Total Appellate Courts .</b>	<b>1,319</b>	<b>1,050</b>
<b>Courts of First Instance.</b>		
High Court of Justice:—		
Chancery Division . . .	7,588	838
King's Bench Division . .	72,145	3,513
Probate Actions . . . .	173	103
Divorce and Matrimonial Suits . . . . .	1,050	734
Admiralty Actions . . . .	492	263
Lunacy . . . . .	111	132
Railway and Canal Commission . . . . .	254	28
Lancaster Chancery Court .	687	80
Durham Chancery Court . .	36	9
County Courts . . . . .	1,297,296	464,515
Mayor's Court, London . .	8,715	358
Borough Courts of Record, etc. . . . .	20,606	408
Ecclesiastical Courts . . .	12	10
<b>Total Courts of First Instance . . . . .</b>	<b>1,409,165</b>	<b>470,991</b>
<b>Total Proceedings in all Courts . . . . .</b>	<b>1,410,484</b>	<b>472,041</b>

The number of proceedings commenced was in 1901 1,358,587, and of cases heard and determined 456,242. The percentage of cases heard and determined to cases commenced was in 1901 33·59, and in 1902 33·47.

**The Scottish Church Case.**

The four cases in 1904 which excited most interest were the Free Church of Scotland case, the Beck case, and the Hooley Lawson and Slater's Detective Agency trials. These are dealt with here before giving the usual summary of cases affecting legal principles in more especial connection with Trade, Property, and Family law.

The *Scottish Church case* (for the facts of which, and further developments relating to which, see RELIGIOUS BODIES), which was heard in the House of Lords on appeal from the Scotch Courts, involved the important principle of how far a Church whose trustees held property for the Church could vary its doctrines, and how far the Courts could consider any doctrines held by the Church as distinctive and essential, or capable of modification. The United Free Church contended that the Free Church had full power to change its doctrines

so long as its identity was preserved. The appellants (a very small minority of the Free Church) objected to the union, maintaining that the Free Church had no power to change its original doctrines, or to unite with a body which did not confess those doctrines; and they complained of a breach of trust, inasmuch as the property of the Free Church was no longer being used for behoof of that Church. The action was brought by the small dissident minority, practically claiming the whole property of the Free Church. The House of Lords, consisting of the Earl of Halsbury and Lords Davey, James, Robertson, and Alverstone (Lords Lindley and Macnaghten dissenting) held that the minority were entitled to succeed, and that the property belonged to them. Some of the principles laid down were:

1. That the identity of a religious community described as a Church consists in the identity of its doctrines, creeds, confessions, formularies, and tests.

2. That the bond of union of a Christian association may contain a power in some recognised body to control, alter, or modify the tenets or principles at one time professed by the association; but the existence of such a power must be proved.

3. That the Establishment principle and the Westminster Confession were distinctive tenets of the Free Church; that the Free Church had no power, where property was concerned, to alter or vary the doctrine of the Church; that there was no true union, as the United Free Church had not preserved its identity with the Free Church, not having the same distinctive tenets; and that the appellants were entitled to hold for behoof of the Free Church the property held by the Free Church before the union in 1900.

**The Beck Case.**

This excited more general interest than the Scotch Church case. The facts were as follows, as found by the Beck Committee of Inquiry:—

In 1877 a man, who called himself John Smith, was convicted at the Old Bailey for frauds on women of loose character, whereby he had obtained from them articles of jewellery or money. His methods were to introduce himself as a nobleman of wealth, with an establishment in St. John's Wood, and offer the position of mistress to his victim. He would then suggest that she would require a new outfit, write out an order on some well-known tradesmen at whose shops she was to purchase what was required, and give her a cheque on a non-existent bank. He would then on some pretext borrow some article of jewellery or money, with which he decamped. The name under which he perpetrated these frauds was Lord Willoughby. John Smith was sentenced to five years' penal servitude; he continued in prison till April 1881, when he was released on licence.

Towards the end of 1894 the police began to receive complaints from women, mostly of loose character, that they had been defrauded by a man who gave himself out as Lord Wilton or Lord Winton de Willoughby, with an establishment in St. John's Wood. His methods were precisely similar to those which had been deplored in the Smith case. The efforts of the police to find the culprit were unsuccessful. On Dec. 16th, 1895, Ottilie Meissonier, a woman who had been defrauded in the previous month happened to meet Mr. Beck in Victoria Street,

and charged him with having robbed her. He indignantly protested that he had never seen her before. She followed him along the street till they met a policeman, to whom they both appealed; and as the woman persisted in her charge, they were taken by the policeman to the station, where a charge was entered against Mr. Beck. This was the first intervention of the police in the Beck case. A large number of the women who had complained to the police were then in the ordinary way given opportunities of seeing Mr. Beck, with a view to ascertain whether they could identify him as the man who had defrauded them. Of these, several with varying degrees of confidence affirmed that he was the man, and gave evidence to that effect before Mr. Shiel at the Westminster Police-court. After publicity had been given to the case by the reports of the proceedings, a gentleman who had been interested in the Smith case, and was entirely unconnected with the police, informed them that Mr. Beck was no doubt the ex-convict Smith. Upon that information Spurrell, an ex-police-constable, who had arrested Smith in 1877, was found. He swore positively that Mr. Beck was Smith, and was confirmed in his opinion by another officer who had been concerned in the Smith case.

Mr. Beck was finally committed for trial on all the charges brought against him. His case came on for trial before Sir Forrest Fulton, then Common Serjeant, at the Old Bailey, in March 1896, when he was convicted and sentenced to seven years' penal servitude. He was tried on an indictment for misdemeanour only; there were also four felony indictments on the file, in which it was charged that he had been convicted in '77 in the name of Smith; but these were postponed till the next Sessions, when a *nolle prosequi* was entered. His defence was that the real culprit was the man who had been convicted in '77, and that he was not that man. He was sent to Chelmsford prison and ultimately to Portland, and in both prisons was classed and treated as a prisoner who had been previously convicted, and wore a dress bearing marks indicative of that fact.

Immediately after his conviction he petitioned the Home Office on the ground that the case was one of mistaken identity, and that there had been a mistrial. He presented several subsequent petitions on the same grounds, to all of which he received a reply refusing relief, until in May 1898 his solicitor addressed another demand to the Home Office for a reopening of the case. Inquiries instituted for the first time by the Home Office, in consequence of this letter, elicited the fact that in '79 Smith had, under special circumstances, been examined at Portland by the prison doctor, who had reported in writing to the Governor that he had undergone the rite of circumcision. Orders were accordingly given to have Beck examined, to ascertain whether he was circumcised. It was found that he was not. On this new fact the Home Office, for the first time, consulted the Common Serjeant on the case, and came to the conclusion that they ought not to interfere in the case, except by ordering that Mr. Beck should be allotted a new number and letter not indicating a previous conviction. The fact that Smith had been circumcised, though known to the prison authorities in '79, and thus communicated by them to the Home Office in '98, never became known to the Public Prosecutor or to the police until July 1904.

In July 1901 Mr. Beck, having served his time, was released on licence. In April 1904—nearly three years after he had been released—Mr. Beck was again arrested on a charge similar to those on which he had been previously convicted. He was tried before Mr. Justice Grantham, and again convicted; and, as he could not deny that he had been convicted in '96, was treated as having pleaded guilty to a charge averring a previous conviction. The learned judge, however, felt misgivings as to his case, and postponed sentence till the next Session; and though, after making inquiries of the police and the medical officer of the gaol where Mr. Beck was incarcerated, he could find no solid ground for further withholding sentence, none was, in fact, pronounced, as in the meantime the arrest of the ex-convict Smith on similar charges, based on acts committed while Mr. Beck was in custody, led to further inquiries, and the consequent release and pardon of Mr. Beck in respect of both the '96 and 1904 convictions. Smith was subsequently convicted and sentenced.

In the meantime a grant of £2000 had been offered to Mr. Beck by the Treasury and refused, Mr. Beck demanding an inquiry. A Committee of Inquiry was appointed by the Home Office, consisting of the Master of the Rolls, Sir Spencer Walpole, and Sir John Edge. This Committee exonerated the police from blame, and considered there was no evidence of *mala fides* or conspiracy on the part of any one. Their principal findings were:—

1. That the Recorder of London had been wrong at the first trial in refusing to admit evidence that Beck was not Smith, and that they recommended as a remedy for such an error in future that all criminal judges should be compellable (as police magistrates are) to state a case on a point of law for the opinion of the High Court (the Court of Crown Cases reserved was recommended); and

(2) That the non-correction of the error was due to want of co-ordination between the Home Office, the office of the Public Prosecutor, and the police; and recommended, amongst other things, that all the officials in the Home Office by whom prisoners' petitions were considered should be men who have had a legal training.

#### **The Hooley-Lawson and Slater Cases.**

The other two trials involved much less important legal principles, though exciting great popular interest. In the Slater detective-agency case the proprietor, Mr. Slater or Scott, Mr. Osborne, a solicitor, and three others were indicted for conspiracy to defeat justice in connection with an unimportant divorce suit of Pollard *v.* Pollard. Slater was discharged by the judge, the jury did not agree as to Osborne, and the Crown did not proceed again, while the minor defendants were convicted and sentenced. In the Hooley-Lawson case Mr. Hooley and Mr. Lawson were indicted for various offences under the Companies Acts, by which a Mr. Paine alleged he had been defrauded of money and shares. Mr. Hooley was acquitted and Lawson convicted, and, subject to a reserved point of law, sentenced to 12 months' imprisonment.

#### **Bankruptcy.**

A bankruptcy notice cannot be founded on two judgments (*In re O. C. S.*—a debtor. Nor

is it a good notice if there is, apart from the judgment, an agreement to pay by instalments and only some instalments are due and the notice only claims those due (*In re H. B.—a debtor*).

At the date of his bankruptcy a bankrupt owed some £16,500 for moneys advanced to him on the deposit of a transfer of shares which turned out to be a forgery. Subsequently the bankrupt's former partner, whilst repudiating all liability for the fraud, voluntarily paid £6500 for the loss thereby sustained. This payment was made without the bankrupt's knowledge; and it was held by the Court of Appeal in the bankruptcy that the payment was not made on account of either the debt or the debtor, and that the creditor could prove for the full amount of the debt without deducting the £6500 (*In re Rowe—ex parte Derenburg & Co.*).

In the administration of an insolvent's estate in Chancery, the Chancery Masters, in the case of *In re Green, Ball, & Ellis*, certified to Mr. Justice Kekewich that the rule as to deduction of income tax was as follows: "It was agreed that in the administration of an insolvent's estate creditors are admitted to prove for the amount of the principal of their debt with interest (less income tax) on debts carrying interest by law to the date of the judgment or order for administration. The interest, less tax, and any costs allowed are added to the principal, and the dividend or payment made to the creditor is calculated upon the total debt so found due. This practice is common to all the chambers. The income tax so deducted is not accounted for to the Revenue, because, until the principal sum is paid, it is considered that no income tax is in fact payable." In a company winding-up case of *Smith v. Law Guarantee and Trust Society, Ltd.*, it was held that the Commissioners were not entitled to the income tax on interest on debentures proved for where the dividend would not pay the principal.

A case of interest to conveyancers was the following: By a settlement made in 1893 the settlor assigned property to trustees on trust to pay to him the annual income until he was declared bankrupt; thereafter his rights were to cease, and the trustees were to have power to apply at their discretion the income or any part thereof for his personal maintenance and support, and were to apply the residue for the benefit of his children, if any, or to accumulate it and add it to the corpus, which was ultimately to go to his relatives. In 1900 the settlor was adjudicated bankrupt, and the trustee in bankruptcy applied to set aside the settlement, and it was set aside so far as was necessary to pay the bankrupt's debts provable in the bankruptcy. The trustees of the settlement by consent raised a sufficient sum to pay the bankrupt's debts in full and the costs, but the bankruptcy was not annulled. In 1902 the settlor was adjudicated bankrupt for the second time, and the trustee in that bankruptcy applied again to set aside the settlement, but was refused on the ground that at the time of making the settlement the bankrupt was in a position to pay his debts without the aid of the settled property. The trustee in bankruptcy then applied for a declaration that the bankrupt's life estate under the settlement vested in the trustee in bankruptcy. Throughout these transactions the bankrupt was unmarried; and it was held by the Di-

visional Court that the first bankruptcy had operated under the settlement as a forfeiture of the settlor's life estate, and that it did not, therefore, vest in the trustee of the second bankruptcy (*In re Johnson Johnson—ex parte Matthews and Wilkinson v. Johnson Johnson and Dibb*).

The two following decisions illustrate the relation of the rules of the Stock Exchange with regard to a defaulter to the ordinary bankruptcy laws. The rules of the Stock Exchange operate to effect an assignment of all the assets of a member of the Stock Exchange declared a defaulter to the official assignee of the Stock Exchange; and that assignment, unless invalidated in bankruptcy proceedings against the defaulter, is valid as against persons who are not, as well as those who are, members of the Stock Exchange (*Lomas v. Graves & Co.*). Where a member of the London Stock Exchange is declared a defaulter, and his contracts are dealt with by the official assignee of the Stock Exchange, the proceedings in that liquidation are not an accord or satisfaction of the member's debts, and do not bar his creditors from suing him at law for the balance of their claims after deducting the dividends received by them in that liquidation. A creditor who has obtained judgment in such an action can maintain a petition in bankruptcy against the defaulter (*Mendelsohn v. Ratcliff*).

### Conflict of Laws.

It is a rule of law that a contract made in a foreign country will be enforced in accordance with the law of the country where it is made, unless it is contrary to some essential principle of justice or morality or to the policy of English law. The plaintiff, who was domiciled in a foreign country, sued on a contract made in that country between himself and the defendant, a woman likewise domiciled there, whom he had coerced into signing the contract by threats of a criminal prosecution against her husband for an offence which he had committed, the consideration for the contract being that the plaintiff would not prosecute the husband. Evidence was given to the effect that the contract was not invalid by the law of the country in which it was made, and Mr. Justice Wright held it could be enforced, but the Court of Appeal reversed this decision (*Kaufmann v. Gerson*). But in a case where a domiciled Englishman married in Scotland a domiciled Scotswoman, and a settlement was made in Scotch form reserving to the husband a life interest in the wife's Scotch property declared to be strictly "alimentary"—that is, not alienable by him, and not liable for his debts except for alimentary purposes—it was held that the contract was governed by Scotch law, and though void by English law could be enforced in England, as not contrary to justice or morality (*In re Fitzgerald, Surman v. Fitzgerald*).

### Company Cases.

In a case from New South Wales the Privy Council approved the decision in *Barwick v. English Joint Stock Bank*, and held that a corporation cannot be held to be incapable of malice so as to be relieved of liability for malicious libel when published by its servant acting in the course of his employment. Although the

servant may have had no actual authority, express or implied, to write the libel complained of, containing statements against the plaintiff which he knew to be untrue, if he did so in the course of an employment which is authorised, the corporation is liable (*Citizens' Life Assurance Co. v. Brown*, P. C. (1904), A. C. 423).

The memorandum of association of a limited company, besides stating the objects of the company and the amount of its capital, stated that the capital was to be divided into specified numbers of preference, ordinary, and deferred shares, which were to have specified rights *inter se*. The memorandum further provided that the rights for the time attached to the several classes of shares respectively might be modified or dealt with in the manner mentioned in the accompanying articles of association. Under such provisions the company may prejudicially affect the rights of preference shareholders for the benefit of the ordinary shareholders by altering its articles (*In re Welsback Incandescent Gaslight Co.*).

A director of a company is liable under the Directors' Liability Act, '90, for the omission from the prospectus of a material contract, although he, in fact, was advised and honestly believed it to be immaterial. Although not, in fact, fraudulent, he must be "deemed to be fraudulent" (*Shepherd v. Broome*).

A company proposed to issue to its shareholders debentures at a discount of 20 per cent., repayable on Nov. 1st, 1909, upon the terms of a circular whereby the registered holder was to have the right at any time prior to May 1st, 1909, to exchange his debentures for fully paid shares in the company at the rate of one £1 fully paid share for every £1 of the nominal amount of the debentures; and by the conditions of the debentures, in the event of the debenture-holder giving to the company a written demand for shares in exercise of this right, the principal moneys were to become immediately repayable. Such a provision is void, as it is likely to result in shares being issued at a discount, which is illegal (*Mosely v. Koffyfontein Mines, Ltd.*).

Under powers contained in its memorandum and articles of association, a company issued a series of 750 first mortgage debentures of £100 each, to rank *pari passu* as a first charge on the assets of the company. All the debentures were issued. From time to time some of them came into the market, and 16 of them were there purchased by the company itself. These debentures were in each case transferred to the company, "George Routledge & Sons, Ltd.," by transfers in common form, and a note of the transfer was indorsed on the debenture. The company proceeded to enter upon the register of debenture-holders the name of the company itself as registered owner of the debenture in question. Subsequently the company transferred these debentures to various persons by transfers in common form, in which the transferor's name was given as "George Routledge & Sons, Ltd.," and a note of the transfer was indorsed on the debenture; and it was held that the result of the transfer of the debentures to the company was that in each case the debt was absolutely gone, and that the security had therefore also ceased to exist; the transferees from the company had acquired nothing by the transfers to them, and were not entitled to receive new debentures ranking *pari passu* with

those of the issue of £75,000 (*In re George Routledge & Sons, Ltd.*; *Hummel v. George Routledge & Sons, Ltd.*).

The rule against clogging the equity of redemption, that a mortgagee is not allowed at the time of the loan to enter into a contract for the purchase of the mortgaged property, was held to apply to the following case:—A limited company borrowed money upon the security of their debenture stock subject to the lender having the option to purchase the stock at 40 per cent. within 12 months, the loan to become due and payable with interest at 30 days' notice on either side. Within the 12 months, and before the company gave notice of their intention to repay the loan, the lender claimed to purchase the stock at the agreed price; and the House of Lords held that the option was void, and that the company was entitled to redeem the loan on payment of principal, interest, and costs (*Samuel v. Jarrah Timber and Wood Paving Corporation, Ltd.*).

The accounts of a limited company, at the commencement of their financial year, in 1900, showed a considerable debit balance on the previous year's trading; but the directors illegally though honestly applied a profit made in the earlier part of 1900 in payment of an interim dividend instead of in reduction of the debit balance, thus, in effect, paying a dividend out of capital. The balance-sheet for 1900, showing the debit balance and also the payment of the dividend, was submitted to and approved by the shareholders in general meeting. Subsequently the directors, recognising their mistake, proposed to apply any future profits in wiping out the debit balance, and this was almost entirely accomplished out of profits in 1901 and 1902, as appeared from the balance-sheets for those years also submitted to and approved by a general meeting. Two shareholders (who had themselves acquiesced in the payment and received their dividends) sued the directors in 1903 for a repayment to the company of the dividends so illegally paid. It was held by the Court of Appeal that they, having had full notice, could not sue, but must themselves return what they had received (*Towers v. African Tag Co.*).

When shares which have been forfeited for non-payment of a call are sold, and a certificate of proprietorship is delivered to the purchaser under Art. 22 of Table A of the Companies Act, '62, stating that he is to be deemed to be the holder of the shares "discharged from all calls due prior to the date" of the certificate, he is liable for the payment of future calls duly made (*New Balkis Eersteling, Ltd., v. Randt Gold Mining Co.*); but such an allottee is entitled on the winding-up of the company to be credited with all sums paid by the previous holder, whether in respect of moneys paid by him as a shareholder in respect of the shares, or as a debtor in respect of his liability under the articles to pay calls notwithstanding forfeiture (*In re Randt Gold Mining Co.*).

A liquidator who is not himself a professional accountant may at his own expense employ an accountant to investigate the books of the company, although his co-liquidator objects to such employment and examination (*In re Gold Coast Finance Syndicate, Ltd.*).

A liquidator invalidly appointed has no claim for remuneration or *quantum meruit* for his services, except in so far as he may have done work useful apart from the liquidation or work

which the official receiver and liquidator, with full knowledge of the facts, makes use of in a subsequent compulsory liquidation (*In re Allison, Johnson & Foster, Ltd.*—*ex parte Birkenshaw*).

A director who has an interest in a contract with the company, if he does not disclose his interest, and the articles provided that in that case he shall vacate his office, *ipso facto* vacates his office by the fact of his becoming so interested; but if, the fact still being unknown, he is, after the contract has come to an end, re-elected, the re-election is good. The company was held entitled to recover all fees paid to him in the interval between the date of his becoming "interested in the contract" and his re-election (*In re Bodega Co., Ltd.*).

An important and interesting point came before Mr. Justice Farwell and Mr. Justice Buckley in three cases (*In re General Accident Assurance Co.*; *In re No. 12 Cable Road*; and *In re Taylor's Agreement Trusts*). Mr. Justice Farwell in two of the cases deciding that the legal estate outstanding in a company that had been dissolved, but in trust for a purchaser or other party, could be vested by order under the Trustee Acts in the person entitled; and Mr. Justice Buckley holding in the third case that the legal estate vested in the Crown, and the Crown could not be bound by any order under these Acts.

### Copyright.

The House of Lords held, reversing the Court of Appeal, that when the proprietor of an encyclopædia employs and pays another person to compose articles for publication in the encyclopædia, the question whether the copyright in the articles belongs to the proprietor within sect. 18 of the Copyright Act, '42, depends on an inference of fact—not law—to be drawn by a reasonable man from the nature of the contract and all the circumstances. The contract need not be in writing; no express words need be used; and the inference that the copyright was intended to belong to the proprietor may be fairly drawn where there are no special circumstances, and the only material facts are the employment and the payment (*Lawrence & Bullen, Ltd. v. Aflalo and Cook*).

### Ecclesiastical Law.

A moveable marble communion table is an illegal ornament; but a wooden table, to the three exposed sides of which moveable slate slabs covered with marble mosaics are attached, is a legal ornament (Rector, etc., of St. Luke's, Chelsea, *v. Wheeler*).

### Electoral Law.

In the case of the Passive Resisters, it was held by the King's Bench that the Education Rate is a part of the poor rate, and failure to pay the whole poor rate, including the education rate, will disfranchise the person so failing under sect. 3 of the Representation of the People Act '67, and sect. 9 of the Municipal Corporations Act '82 (*Ash v. Nicoll and Cox v. Merriman*).

A ratepayer tendered to the overseers a portion of the sum that he was liable to pay in respect of the rate, but refused to pay the balance. The overseers refused to accept part

payment of the rate, and preferred a complaint before the magistrate, who refused to issue a distress warrant for more than the amount of the balance. It was held that under the circumstances the magistrate was not bound to issue his distress warrant for the whole amount of the rate (*Rex v. Gillespie*).

A husband living with his wife in a house of which the wife is the owner and of which the husband is tenant under an agreement of tenancy with the wife is entitled to be registered as a voter under sect. 3 of the Representation of the People Act, '67 (*Pearce v. Merriman*).

A schoolmaster permitted, but not required, by his employers to live in a certain house so long as he continued to hold the appointment of schoolmaster, is entitled to have his name inserted in Division 1 of the list of voters (*Dover v. Prosser*).

### Gaming.

After an action to recover a gaming debt had been dismissed, the treasurer wrote to the committee of the debtor's club complaining of his conduct in not paying his debts of honour. The debtor, in consideration of this letter of complaint being withdrawn, gave the creditor bills in satisfaction of the debt. Before the bills were paid the debtor became bankrupt; and it was held in proceedings in the bankruptcy that the bills were given for a good consideration, and that the creditor could prove for the amount due thereon (*In re Browne—ex parte Martingell*).

In *Hardwick v. Lane* the keeper of a beer-house arranged for a sweepstakes on a horse-race to be held on his premises. Sixty-one persons entered, each of whom paid 6d. to the respondent; and prizes amounting in the aggregate to 30s. were paid by the respondent to the persons who respectively drew the first three horses in the race, less the price of a certain quantity of beer which by the conditions of the sweepstakes had to be bought from the respondent by the prize-winners. It was held that this was a lottery within sect. 2 of the Gaming Act, 1802.

### Gas.

When a consumer of gas supplied by the Gas Light & Coke Co. on premises within the company's district leaves the premises without paying for the gas, and the incoming tenant continues the trade or business of the outgoing consumer and pays him a consideration for so doing, the company cannot under its special Act of '72, c. xliii., recover by legal process the arrears from the incoming tenant (*Cannon Brewery Co. v. Gas Light & Coke Co.*).

### Husband and Wife.

The Gordon child case was before the Court of Appeal early in the year on an appeal by the wife against an order making her liable for the costs of the proceedings out of her separate estate restrained from anticipation; and, notwithstanding that she was in contempt by reason of her removing the child, she was held to be entitled to be heard, and the order was reversed on the ground that the proceedings as to the custody of the child were part of the divorce proceedings.

The House of Lords affirmed the decision in *Morel Brothers v. Earl of Westmorland*. The

fact that husband and wife live together, and that necessaries for the household are supplied on the orders of the wife, is not evidence that husband and wife are jointly liable. The presumption that the wife has in such a case authority to pledge the husband's credit may be rebutted by proof that he made her a sufficient allowance, though this arrangement is not known to those who supply the necessaries.

In an action of tort against a husband and his wife jointly for a libel published by the wife, the husband cannot plead payment of money into court in satisfaction of the claim, and the wife denial of liability (*Beaumont v. Kaye*).

A judgment against a married woman in respect of a debt contracted by her before marriage cannot be enforced by way of equitable execution against her separate property subject to a restriction against anticipation, where the restriction is not contained in a settlement, or agreement for a settlement, of her own property, made or entered into by herself (*Birmingham Excelsior Money Society v. Lane*).

Execution cannot be enforced after discovery against the property of a married woman subject to a restraint against anticipation in respect of a debt incurred during coverture (*Brown v. Dimbleby*).

Under sect. 1 of the Married Women's Property Act, '93, in order to bind the separate estate of a married woman there must be a contract by her entered into after the passing of the Act, and then entered into for the first time. An acknowledgment since the Act of the fact that the married woman had had moneys advanced to her prior to the Act, but for which she was under no liability, having had no separate estate at the time of the advance, even if such acknowledgment is in such terms as would make a debt recoverable though barred by the Statute of Limitations, is not sufficient to render her liable to repay such advances; and therefore an executor cannot set-off such a debt against a legacy, as the debt could not, apart from the Statute of Limitations, be recovered (*In re Wheeler*).

The effect of condonation of an offence which is specified as a ground of complaint within the terms of the Summary Jurisdiction (Married Women) Act, '95, does not depend on the wording of any section of that Act, but on the common law. Therefore, where a wife complained of desertion within the meaning of that Act, and, during an adjournment of the hearing of the summons, resumed cohabitation with her husband, and subsequently, but before the date appointed for the adjourned hearing, separated from him again and obtained an order for separation and an allowance for maintenance, it was held that the condonation by voluntary resumption of cohabitation had blotted out the cause of complaint, and there was nothing for the justices to adjudicate upon at the date of the order, and the order made was therefore discharged (*Williams v. Williams*).

In an order that the Court should exercise the discretion conferred by the 31st section of the Matrimonial Causes Act, '57, in favour of a petitioner guilty of adultery, it is not enough that the petitioner's misconduct was more or less pardonable or capable of excuse; but the court must find, as a fact, that the petitioner's misconduct was caused directly by the matrimonial offence or offences of the respondent (*Wyke v. Wyke*).

By a post-nuptial settlement a husband

assigned certain leaseholds to trustees upon trust to pay the rents to his wife for life, or so long as she should continue the cohabiting wife or the widow of the settlor, for her separate use, and upon the determination of the trust in favour of the wife the husband took an interest in the settled property. Some years after the date of the settlement the husband and wife separated by mutual consent, and they had not since cohabited. Such a restriction is good, and the wife's interest ceases with the cesser of cohabitation (*In re Hope Johnstone; Hope Johnstone v. Hope Johnstone*).

### Insurance.

An insurance company cannot by altering its articles or bye-laws affect prejudicially the rights of policy-holders or justify a breach of a contract. The company which advertised that all the profits of its mutual branch were divided amongst the policy-holders now proposed to create a reserve fund out of these profits (*Baily v. British Equitable Assurance Co.*).

### Landlord and Tenant.

An agreement in a three years' tenancy to pay all outgoings throws the liability for drainage works on the tenant (*Stockdale v. Ascherberg*); but where a lessee held over after the expiration of a lease and the owners after notice from the sanitary inspector and notice to the tenant and refusal by him to do the work relaid the drains without waiting for the formal statutory notice, it was held: (1) That the owners, having done the work immediately upon receipt of the intimation of the existence of the nuisance and before service of any notice requiring them to abate it, did it voluntarily and not under any obligation, and that the expenditure was consequently not an "outgoing" within the meaning of the covenant; and (2) That, even if a covenant to pay outgoings would cover such an expenditure, it was not, having regard to the proportion which the expenditure bore to the yearly rent, a covenant which was applicable to a yearly tenancy, and that the defendant in holding over after the expiry of his term and paying rent could not be presumed to have intended to become a yearly tenant on the terms of such an obligation (*Harris v. Hickman*).

Although premises may have been let as a bakehouse, and although the certificate required by sect. 101 of the Factory and Workshop Act, 1901, cannot be obtained unless structural alterations are made, if the lease contains a covenant by the tenant to pay all "outgoings" a magistrate has no jurisdiction to make an order under subsect. 8 of that section apportioning the expenses of those alterations between the landlord and the tenant; and Mr. Justice Kennedy thought that premises are not "let as a bakehouse" within the meaning of the section unless the terms of the lease impose an obligation upon the tenant to use them as a bakehouse and not merely confer a permission to so use them (*Morris v. Beal*).

If a landlord agrees with his tenant not to let an adjoining shop for certain businesses, he is liable in damages and may be enjoined in event of a breach, but the new tenant is not liable under the covenant although he has notice of it unless the covenant is also "not to use" (*Brigg v. Thornton*).

The true object of the covenant by the assignee usually inserted in an assignment of leaseholds is merely to indemnify and protect the lessee against breach of covenants contained in the lease; and consequently a lessee is not entitled to enforce by injunction the specific performance by his assignee of the negative covenants contained in the original lease by means of the covenant "to perform and observe" the covenants and conditions contained in the lease, and to indemnify the assignor from and against all claims and demands on account of the same. A covenant to perform and observe the negative covenants in a lease is not of itself a negative covenant within the rule which binds the Court to grant an injunction on evidence of its breach (*Harris v. Boots, Cash Chemists (Southern), Ltd.*).

By an agreement of tenancy premises were let "at an inclusive rental of £25 per annum from Oct. 1st; the tenant to pay rates and taxes in addition; three months' notice on either side to terminate this agreement." This agreement created a yearly tenancy determinable by three months' notice expiring with a year of the tenancy and not at any other time (*Dixon v. Bradford and District Railway Servants' Coal Supply Society*).

### Licensing.

In *Raven v. Southampton Justices* the Justices had a map prepared of a district in which they considered there were too many licensed houses, and on the evidence of the map alone Quarter Sessions confirmed the refusal of the renewal of one licence in the district. The house had been fully licensed for years, and the neighbourhood had not altered except that the population had increased. It was held in the King's Bench that this evidence did not entitle Quarter Sessions to refuse the renewal.

### Local Government.

The pension that a constable may claim under the Police Act, '90, after 25 years' service can only be claimed where the service has been continuous. Two breaks of four and two months in a service extending altogether over upwards of 25 years destroys the right to the pension (*Garbutt v. Durham Joint Committee*).

By the scheme for the constitution of the Education Committee of the Barry Urban District Council, approved by the Board of Education on April 16th, 1903, it was provided that the committee should consist of nine members, and that the members of it should hold office for a period of three years, provided nevertheless that one-third should go out of office on May 1st in the year 1904 and in each succeeding year. "The council shall determine the order in which they shall retire." On April 20th, 1903, the council passed resolutions under which the plaintiff was to be a member of the committee and retire at the end of the second year. On April 18th, 1904, the council, purporting to act under their standing orders, passed a resolution rescinding so much of the resolution of April 20th, 1903, as decided that the plaintiff should retire at the end of the second year—namely, on May 1st, 1905—and directing that in lieu thereof he should retire on May 1st, 1904. It was held that the council had power to make a final scheme and determine the method of retirement; that when they had once fixed the dates of retirement they could not alter them

without a new scheme; and that the resolution of April 18th, 1904, was *ultra vires* (*Milward v. Barry Urban District Council*).

In the case of *Livingstone v. Westminster City Corporation* it was held that a corporation assessing compensation for an abolished office acted once for all, and could not subsequently vary its resolution.

Under sect. 5 of the Education Act of 1902 the school boards were abolished and ceased to exist on the appointed day for all purposes; and on the same day the county councils as education authorities came into existence. Clause 1 of the second schedule says that the property, powers, rights, and liabilities of the school board "shall be transferred" to the council. That was to take place at the appointed day. It could not be by a transfer in the ordinary sense, for there was no moment at which both bodies were alive. The clause clearly means that on the appointed day the property was by the operation of the Act itself to vest in the council. No further transfer was necessary, and consols standing in the name of a school board are transferred by the Act, and the Bank of England must make an entry in their books accordingly (*Oldham Corporation v. Bank of England*).

In *The London County Council v. South Metropolitan Gas Co.* it was held that Sunday was "a day" on which the local authority was entitled to test the gas at a testing station.

In *Hobbs v. Moray* it was held by the Divisional Court that if one of two persons nominated for the office of councillor is disqualified in fact, by reason of his interest in a contract, but this is not known to the electors, and such candidate obtains a majority of votes, the defeated candidate cannot claim the seat.

There were two decisions as to what is a "single private drain" within sect. 19 of the Public Health Act, '90. In *Thompson v. Eccles Corporation* it was held that where two or more houses are drained by a single pipe, neither the fact that the pipe is wholly situate on private land, nor the fact that the houses belong to different owners, will suffice to make the pipe a "single private drain" within the meaning of sect. 19 of the Public Health Acts Amendment Act, '90, so as to entitle the local authority, in the event of the pipe becoming a nuisance, to require the owner or occupier of the premises to amend it under sect. 41 of the Public Health Act, '75. The words "belonging to different owners" in sect. 19 of the Act of '90 mean "not all belonging to the same owner." In order to bring a case within the section it is not necessary that all the houses should belong to different owners. The Court expressed great difficulty in arriving at any meaning of "single private drain." Some effect must be given to "private."

In *Jackson v. Wimbledon District Council* it was held that if a drain could not be brought within this section and out of the definition of "sewer" in any other way, it was not sufficient to so bring it that it discharged into a drain that was admittedly within sect. 19. It was doubtful in this case if, apart from the admissions of the parties, the portion of the drain agreed by the parties to be within sect. 19 would have been so held by the Court.

A building owner deposited a plan showing several houses, and proceeded to build some; and more than three years (the statutory period by special Act) after the deposit commenced

other buildings included in the plan. It was held by the Court of Appeal that each house was a separate building, and that no houses can be proceeded with after the three years without the deposit of new plans (*Harrogate Corporation v. Dickinson*).

Where proceedings to divert a highway are taken under the Highway Act, '35, if one set of justices refuses the certificate, the surveyor of the local authority may apply to two others without a fresh resolution of the council (*Rex v. Kent Justices*).

The inhabitants of a parish may still be indicted for non-repair of a highway, although the liability to repair now rests on the district council (*Rex v. Morse*).

A curious effect is produced by the decision in *Fitch v. Bermondsey Guardians*, where it was held that the visiting committee of a lunatic asylum are not entitled under sect. 283 of the Lunacy Act, '90, to fix a greater sum than 14s. to be charged for the expenses of lodging and maintenance of pauper lunatics in the asylum, in the case of pauper lunatics other than those sent from or settled in a parish or place within the county or borough to which the asylum belongs. It may, however, do so in respect of lunatics from its own county or borough.

The rule that, where necessities are supplied to a person who from any disability cannot himself contract, the law implies an obligation to pay for them out of his property, extends to the case of an infant pauper supported by guardians in discharge of their statutory duty. This liability is not cut down by the Poor Law Amendment Act, '49, sect. 16, which gives special means of recovering one year's maintenance; and the guardians can therefore recover six years' arrears of moneys expended for the maintenance of an infant pauper (*In re F. W. Clabbon*).

If a "street" proposed to be paved, etc., under the Private Street Works Act, '92, is once held by the justices to be a highway repairable by the inhabitants at large, the question is *res judicata*, and cannot be again raised with regard to the "street" (*Wakefield Corporation v. Cooke*), such a question can be raised on an objection by a frontager that the "street" is not a street within the meaning of the Act (*Carey v. Bexhill Corporation*).

A sanitary authority or other statutory corporation must not use powers given to it for one purpose for another; and where a sanitary authority under its statutory powers to provide underground lavatories in the highway provided such lavatories with a subway from either side of the street, the subway being so constructed as to be suitable for, and being intended to be, a means of crossing the street, this was held by the Court of Appeal *ultra vires* (*London & North-Western Railway and Westminster Corporation*).

The funnel of a steam tug is a chimney within the Public Health (London) Act, '91 (*Tough v. Hawkins*).

A club of 750 members, managed by a committee of the members, had for many years occupied premises which had previously been a private dwelling-house. In the basement were cooking ranges, a large roasting grate, and a vertical boiler with furnace attached; the smoke from all of them was discharged into one flue or chimney, which sent forth black smoke in such quantity as to be a nuisance. This was held not to be a private dwelling-house,

and the secretary is liable to be convicted under the Public Health (London) Act, '91 (*McNair v. Baker*).

The establishment of a small-pox hospital, properly conducted, is not of itself necessarily such a serious source of danger to persons resident, working, or passing by in its immediate vicinity—say, a radius of 50 ft.—as to constitute a public or a private nuisance for which an injunction will lie in a *quia timet* action. In such an action evidence is admissible to show what has occurred in the neighbourhood of other small-pox hospitals (*Attorney-General v. Nottingham Corporation*).

### Property Cases.

A power of attorney authorising the sale of all real property and the giving of receipts for all money does not enable the attorney to sell under the statutory power of sale property mortgaged to the donor of the power (*In re Bonson & Jenkins' Contract*).

The owner of two adjoining tenements granted one of them to the plaintiff's predecessor in title, while retaining the other, without expressly reserving to himself any rights over the tenement granted. The plaintiff built a wall on her premises so as to block out the light to two windows in the defendant's premises. One of these windows lighted a pantry which could not be lighted in any other way except by means of borrowed light, and the obstruction rendered the pantry useless as a pantry; and it was held in the Chancery Division that there was no implied reservation of the right of access of light to the pantry window, inasmuch as it was not an easement of necessity (*Ray v. Hazeldine*).

To constitute an actionable obstruction of ancient lights it is not enough that the light is less than before. There must be a substantial privation of light, enough to render the occupation of the house uncomfortable according to the ordinary notions of mankind and (in the case of business premises) to prevent the plaintiff from carrying on his business as beneficially as before (*Colls v. Home and Colonial Stores*).

An easement, such as a right of way, cannot, under sect. 2 of the Prescription Act, '32, be acquired by a tenant by user over land occupied by another tenant under the same landlord, even if that user has existed for the period of 40 years mentioned in the section (*Kilgour v. Gaddes*).

A former owner of plot A bought an adjoining plot, B, together with a right of way thereto over plot C from a public street. The present owner of plot A and plot B built a factory on both, with the entrance on plot B, the dominant tenement. The present owner of plot C brought an action to restrain the owner of A and B from using the right of way to the factory, contending that the effect of the building was to extend the user of the way unlawfully to plot A, and as it was practically impossible to separate the lawful from the excessive user the right of way was wholly extinguished. In any case the defendants were not entitled to use the way as a means of approach to the part of the factory built on plot A. It was held by Mr. Justice Swinfen Eady that the right of way was not extinguished, and the defendants could not be restrained from using it as a means of access to the factory merely because, having entered by the doorway on plot B, the dominant tenement, they might pass to the portion erected

on plot A. They were using the right of way *bonâ fide* for the purpose of access to the dominant tenement and the building thereon, and none the less so because a portion of the building extended beyond the dominant tenement (*Harris v. Flower & Sons, Ltd.*).

The owner of a tenement adjoining a natural stream has no right to divert the water to a place outside the tenement, and there consume it for purposes unconnected with the tenement. A natural stream was crossed by a railway line and flowed down to a mill. The railway company claimed the right to insert a pipe into the stream at the crossing (which was the only place where their land adjoined the stream), and to carry the water along their line to a distant tank, and there to consume it in working their locomotive engines along the whole of their railway. If the pipe was used to its full capacity it might not have substantially injured the mill. The railway company were not entitled to carry out their proposal (which was not for purposes connected with the land where it crossed the stream), and the millowner was justified in stopping up the proposed pipe (*McCartney v. Londonderry and Lough Swilly Railway Co.*).

The expenses of paving a new street become a charge, and as such payable by the vendor of property from the date when the work was completed (*In re Allen and Driscoll's Contract*).

The proper covenant for a purchaser to enter into who buys land subject to certain restrictive covenants is to observe such covenants prefaced with the words "with the object and intention of affording to [the vendor], his heirs, executors, and administrators, a full and sufficient indemnity in respect of [the restrictive covenants], but not further or otherwise" (*In re Poole and Clarke's Contract*).

A mortgage of a lease includes all the fixed machinery in the premises, although not the property of the lessee. Machines were supplied by the owner of them to the lessee of a factory upon the hire-purchase system, the machines to remain the property of the owner till they had been wholly paid for; upon default in payment the owner to have power to determine the hiring and remove the machines. They were affixed to the floor by bolts and nuts, and could have been removed without injury to the building or to the concrete bed in which the bolts were embedded. The lessee made default in payment, and a mortgagee of the term who had taken possession was held entitled as against the owner of the machines (*Reynolds v. Ashby & Son*).

### Trade Cases.

A building contract provided for the architect certifying extras and defective work, and giving certificates for payment; but declared that certificates for payment should not be conclusive so to relieve the contractor from making good defective work. In an action by the builder against the employer it was held that in the absence of a certificate by the architect of defective work, a certificate for payment was conclusive against the employer (*Robins v. Goddard*).

In a partnership where the capital is found in unequal shares and the profits are divided equally, having regard to sect. 44 of the Partnership Act, '00, the true principle of division of assets is for each partner to be treated as

liable to contribute an equal share of the deficiency of the capital, and then to apply the assets in paying to each partner rateably what was due to him in respect of capital (*Garner v. Murray*).

Mr. Justice Byrne held that a conviction for travelling on a railway without paying his fare was a conviction for dishonesty, and that under articles of partnership which provided that in the event of either of the junior partners being "addicted to scandalous conduct detrimental to the partnership business," or being guilty of "any flagrant breach of the duties of a partner," the senior partner might give the offending partner six days' notice of expulsion from the partnership, the partner so convicted could be expelled (*Carmichael v. Evans*).

On the sale of goods a condition as to the price at which they may be resold cannot, in the absence of agreement, be imposed on a sub-purchaser, even though he bought with notice of the condition. A retail trader bought from the agent of the licensee of a patent an article manufactured by the licensee under the patent. On the inside of the lid of a box in which the article was packed was printed a condition that the goods were not to be resold at less than a specified price. The retail trader had sold some of the goods at less than the specified price; and it was held he could not be restrained from doing so (*McGrath v. Pitcher*).

A contract in writing for the sale of barley at an agreed price per bushel provided that the barley at the time of shipment under the contract was to be "about as per sample," and contained an arbitration clause. The buyers having rejected the barley for inferiority to the sample, the sellers relied before the arbitrator upon a custom of the London Corn Exchange, applicable to such contracts, by which the buyer was not entitled to reject for difference or variation in quality, unless the same was excessive or unreasonable, and was so found by arbitration under the contract. The arbitrator found that the barley was not "about as per sample," so as to entitle the sellers to insist upon payment of the full contract price without any allowance; but that the inferiority was not excessive or unreasonable, nor so great as to amount to a difference of description; and he awarded that the buyers were not entitled to reject the barley, but must accept it with an allowance in price in respect of the inferiority. It was held that the custom was good in law, not being unreasonable or uncertain or in contradiction of the written contract, and that the award must therefore be upheld (*In re Walkers, Winsor & Hamm, and Shaw, Son & Co.*).

Where the goodwill of a business is sold, the rights of the purchaser and the obligations of the vendor ought to be clearly defined by covenant; but apart from covenant the vendor of the goodwill of the business may not solicit any person who was a customer of the old business prior to the sale to continue to deal with the vendor, or not to deal with the purchaser; and this rule applies to all such persons, and ought not to be limited so as to exclude persons who before solicitation have of their own accord become customers of the vendor (*Curl Brothers, Ltd., v. Webster*).

Ogdens Ltd. made a contract with many retail tobacconists that, in consideration of the tobacconists' undertaking to become customers of the company and to purchase goods direct from them, and not to sign any agreement with

any other firm in the tobacco trade which would prevent them from dealing with the company, the company would for the next four years distribute as an annual bonus among their customers, and in proportion to the purchases made by them respectively, a certain fixed annual sum, and also the expected net profits on goods sold by the plaintiffs in the United Kingdom during that period. Before the four years had expired the company sold their business to third persons. In actions for the price of goods sold to the tobaccoists who counterclaimed against the company for damages for breach of the contract, it was held by the Court of Appeal, affirming the judgment of Lord Alverstone, that upon the true construction of the contract there was an absolute undertaking on the part of the company to distribute for a period of four years among their customers the fixed annual sum and expected net profits, and that a term must necessarily be implied that the company would not during that period do any act which would put it out of their power to carry out their contract to distribute these sums, and that the defendant was entitled to damages.—*Ogdens Ltd. v. Nelson*; the same *v. Telford*.

A firm of bankers who were financing a firm of indiarubber importers accepted bills drawn by the sellers abroad for the price of indiarubber bought by the importers, and afterwards resold by them to the defendants. When the indiarubber was delivered to the defendants, the importers sent to the bankers a document consisting of two parts, which were detachable from one another, and were in substance as follows. The first part was a letter signed by the firm, and addressed to the defendants, requesting them to sign and forward to the bankers the attached letter, which formed the other part of the document. That letter was addressed to the bankers, and stated that the undersigned begged to confirm that they would remit the price of the indiarubber due from them to the importers direct to the bankers for account of the firm. The bankers forwarded this document to the works belonging to the defendants, where the letter attached was signed by the defendants' manager, who returned it to the bankers. The manager had no authority from the defendants to sign such a document. He omitted to advise the defendants of the fact that he had signed the letter, and they subsequently paid the price of the indiarubber to the importers, who afterwards became bankrupt. The bankers sought to recover the price from the defendants, alleging that the letter was an assignment to them of the debt; but the Court of Appeal held it was not (*Brandts, Sons & Co. v. Dunlop Rubber Co.*).

### Wills and Settlements.

In *In re W. C. Irwin—Irwin v. Parkes* a settlement by which equitable interests in fee in freehold property were conveyed to trustees without words of inheritance upon trust for sale was held to give the trustees an estate for their lives and the life of the survivor only, and not the full interest of the settlor; but *In re Tringham's Trusts*, where copyholds were settled in trust for life estates followed by a gift to children as tenants in common without words of inheritance, the equitable estate of the children was held to be in fee.

It is competent for an executor in a proper case to compromise a claim by his co-executor

against the estate. Where an executor, acting honestly and reasonably, allowed, after inquiry, a claim by the testator's widow, who was co-executrix of the will, to a large sum of money which as she alleged belonged to her, but was represented by securities apparently belonging to the testator, it was held that the transaction was valid and binding on residuary legatees (*In re Houghton—Hawley v. Blake*).

A testator by his will left his residuary estate upon trust for his wife for life, and gave her power to appoint the funds amongst their four children. In default of appointment the children were to take equally. Any child who had received any part of the funds under any appointment was, in default of appointment to the contrary, to bring the appointed funds into hotchpot. The will also contained an advancement clause. After the testator's death £795 was advanced to one of the children. The widow subsequently by her will appointed one equal fourth part to each of two of her children absolutely, and one equal fourth part upon trust for each of her other children (including the one advanced) respectively for life, with remainder to their respective children. The testatrix did not in her will make any reference to the advance; and it was held that the advancement was not to be brought into hotchpot (*In re Fox—Wodehouse v. Fox*).

*In re Rayner—Rayner v. Rayner* it was held that in the will of a general broker "securities" must not be restricted to mortgages, but would include railway stocks and shares and other "investments."

*In re Richardson—Richardson v. Richardson* was a curious case. A testator had a lunatic sister, confined in an asylum. He gave his residuary estate, including a house named Brooklyn, to his niece Mabel on condition that she resided in Brooklyn during the lifetime of his sister and there provided a home for the sister. In the event of her not complying with the condition there was a gift over to two other nieces successively. Mabel disclaimed the conditional gift. The next in succession, Catherine, accepted, and it was held that the condition was void under sect. 51 of the Settled Land Act 1882, and Catherine was absolutely entitled.

In *In re Lewis—Lewis v. Lewis* it was held by the Court of Appeal that an executor is not bound to inform a legatee of his legacy, even where in the event of the legatee not claiming there is a gift over to the executor.

In a case that came from Jamaica, and was heard before the Judicial Committee of the Privy Council, it was held that a gift "to the eldest son of my sister and his heirs for ever" operates in favour of the elder of her two sons living at the date of the will, though he predeceased the testator, in the absence of any contrary intention appearing in the context. As the gift lapsed on the death of the donee, there was an intestacy in favour of the heir-at-law (*Amyott v. Dwaris*).

A legacy for a daughter attaining 21, to be held by the trustees on trusts for her and her children, gives the daughter a right to maintenance out of the income during minority, but all accumulations of income must be added to the corpus, and are in such a case subject to the settlements and do not belong to the daughter on her attaining 21 years (*In re Scott* overruled (*In re Bowly—Bowly v. Bowly—Court of Appeal*)).

A legacy was bequeathed by a father to his daughter subject to her not marrying against her mother's wish. Nearly two years before the testator's death the daughter became engaged with the consent of the testator and his wife, conditionally on the marriage being deferred two years. The mother subsequently to the testator's death withdrew her consent, and after the two years the daughter married without it. She was held entitled to her legacy (*In re Brown—Ingall v. Brown*).

A testatrix by her will, dated Feb. 1st, 1901, gave many legacies, including three legacies of £200, £500, and £3000. On Oct. 19th her servant, by her direction, struck out the three legacies. On Oct. 21st, 1901, testatrix executed a codicil referring to her will as of Feb. 1st, 1901, and thereby revoked the legacy of £500 but did not refer to the other two legacies, and concluded by ratifying and confirming the will in other respects. It was held that only the legacy of £500 was revoked (*In re Hay—Kerr v. Stinnear*).

The effect of sect. 15 of the Wills Act, in avoiding (*inter alia*) a devise to the wife of an attesting witness, *quoad* her interest, is not to strike the devise out of the will. The will must be construed before sect. 15 is applied, and when so construed on the facts at the date of the death the gift avoided fails, but any gift in the event of such gift lapsing does not take effect. And where there is a gift to a daughter whose husband attests the will, with a gift over to her children in the event of her predeceasing the testator, the effect is, if the daughter survives the testator, to cause an intestacy (*Aplin v. Stone*).

A testator gave, bequeathed, and devised to his wife "the whole of my real and personal estate and property absolutely, in full confidence that she will make such use of it as I should have made myself, and that at her death she will devise it to such one or more of my nieces as she may think fit; and, in default of any disposition by her thereof by her will or testament, I hereby direct that all my estate and property acquired by her under this my will shall at her death be divided among the surviving said nieces." The Court of Appeal held that the widow took the property absolutely for her own benefit, and that no trust was created in favour of the nieces; for the gift over in default of any disposition of the property by the widow by her will was repugnant to the prior absolute gift to her, and was therefore invalid (*In re Hanbury—Hanbury v. Fisher*).

In the following case the trust was held to be a good trust for accumulation to provide a portion under Thellusson's Act, and the accumulations had to be carried on and the fund was not divisible until the youngest child attained twenty-one, including children born after the testator's death. A testator, who died in March 1888, directed that his trustees should out of the income of his residuary estate set apart a yearly sum of £24 "while and so long as there shall be a child of my daughter (naming her), for the time being under the age of twenty-one years, subject as hereinafter mentioned," invest the same and accumulate the income thereof, and should hold the aggregated and accumulated fund in trust for such of the children of his daughter as being sons should attain twenty-one, or being daughters should marry, in equal shares,

the shares to be vested interests and to be paid and payable in the case of a son at twenty-one, and in the case of a daughter at twenty-one or marriage. Subject as aforesaid, the testator directed the trustees to pay the income of his residuary estate to the daughter for life, and after her death to her husband for life; but he directed that if the daughter should survive her husband, the trustees should during the rest of her life pay her the whole income of his residuary estate, and should no longer set apart the annual sums (without prejudice to the sums already set apart and invested and the income thereof). The daughter and her husband survived the testator and had five children, three of whom were born in the testator's lifetime, and two after his death. The eldest child was born in 1882, and attained twenty-one in 1903; the youngest was born in 1896 (*In re Stephens—Kilby v. Betts*).

Settlement estate duty on personality is not a testamentary expense, although the executor is accountable for it. It is therefore payable out of the settled property under the Finance Act, 1896, sect. 19, subsect. 1, notwithstanding a direction in the will to pay testamentary expenses out of residue (*In re King (Travers v. Kelly)*); but if the testator directs his debts, funeral and testamentary expenses and duties to be paid out of the proceeds of the sale and conversion of his residuary estate, the settlement estate duty as well as the estate duty payable in respect of specifically devised realty must be paid out of the general residuary estate in exoneration of the specifically devised realty (*In re Pimm—Sharpe v. Hodgson*).

### Workmen's Compensation.

The following are some of the more important cases that have arisen under the Workmen's Compensation Act:—

On an application for compensation under the Workmen's Compensation Act, 1897, it was held that an accident arose in the course of employment in the following circumstance:—A workman employed in a wool-combing factory, in which there was wool which had been taken from sheep infected with anthrax, contracted that disease by contact with the anthrax bacillus which was present in the wool (*Higgins v. Campbell & Harrison, Ltd. Turvey v. Brintons, Ltd.*).

An engine-driver in the employ of a railway company had, in order to commence his day's work, to go in the morning to the company's engine shed. His proper route to the engine shed was through a gate opening from the public road on to the railway, and thence by a pathway which did not cross the rails. One morning, instead of going along the pathway towards the engine-shed, he went in the opposite direction along the railway to a signal-box, which stood in the middle of the line with rails on both sides of it, in order to see the signalman for his own purposes. He was killed on his way back from the signal-box, and the Court of Appeal held that the accident could not be said to have arisen out of and in the course of the deceased man's employment, and therefore the claim by his dependants for compensation must fail (*Benson v. Lancashire and Yorkshire Railway Co.*).

In *Dyer v. Swift Cycle Co.*, it was held that a building more than 30 feet high, and in which more than 20 persons were employed, and

which, therefore, came within sect. 105, subsect. 2, of the Factory and Workshop Acts, was not a factory for the purposes of the Workmen's Compensation Act, 1897.

While a ship was at a buoy in a dock, a seaman belonging to her was employed, as part of his ordinary duty, in clearing out a hold for the reception of cargo. In the course of that employment an accident caused personal injury to him which resulted in his death. It was held by the Court of Appeal that the deceased being at the time of the accident on a ship in a dock, was employed in a factory, and, there being no words in the Act expressly excluding seamen from its operation, the case fell within the provisions of the Act, and the application was well founded (*Griffin v. Houlder Line, Ltd.*).

A "warehouse" includes the warehouse of a wholesale firm auxiliary to their business, and a "wharf" includes every wharf, whether subject to the Factory Acts or not (*Green v. Butler, and Gilson & Barrett v. Kemp Bros.*).

A seaman, employed as a fireman on a steamer, was injured by an accident while attending to the boilers. The vessel was a passenger steamer, and was made fast by ropes to a pontoon outside a dock. She was so moored to the pontoon at the time when the accident happened, and for some time previously gangways had been out connecting the vessel with the pontoon to enable passengers to go on board. The seaman's employment was not an employment having relation to the purposes for which his employers had the use of the pontoon; his employment was, therefore, not "about" a wharf, and the case did not come within sect. 7 of the Act (*Owens v. Campbell, Ltd.*).

In *Weavings v. Kirk & Randall* the employers had contracted to erect certain pigeon-holes twelve feet high in a Government factory at Woolwich which had been erected by other contractors, and although the Government had possession of the lower floors the contractors still had the upper. It was held that the employers had sufficient occupation of the factory to make them "the undertakers." The facts were somewhat special.

A man employed as one of a crew of two hands on a barge employed in the estuary and upper tidal waters of the Thames is a seaman, and the barge is a ship, and the man being a seaman is not entitled to sue under the Employers' Liability Act, 1880 (*Corbett v. Pearce*).

Whether a ladder is or is not a scaffold is a matter for the county court judge; and where, during the operation of whitewashing a building, workmen used a ladder by placing it against a wall and standing or sitting on the rungs of it, the Court of Appeal held that it was impossible to say as a matter of law that the ladder must be a scaffolding within the meaning of the Act, and therefore the Court was bound by the finding of the county court judge (*Crowther v. West Riding Window-cleaning Company*).

A workman was awarded a weekly payment as compensation under the Workmen's Compensation Act, 1897, and went into a business that he had started after the accident; and the Court of Appeal held that the expression "the average amount which he is able to earn after the accident," in paragraph 2 of the first schedule to the Act, is not restricted to earnings in the service of an employer, but

includes earnings in an independent business (*Norman & Burt v. Walder*).

Lodging money allowed to a railway guard whenever his duties require him to lodge away from home are part of his earnings (*Midland Railway Co. v. Sharpe*).

A county court judge cannot lay down and act on a general rule as to the amount he will give in compensation, as that he will always give the maximum where wages are being earned after the accident for partial employment, and they with the maximum compensation do not exceed the original wages. He must exercise his discretion in each case (*Webster v. Sharp & Co.*).

A workman was employed on the common terms of payment by the hour for the number of hours per week that he was actually engaged on his work, not including the midday dinner-hour. During that hour he was at liberty to stay and take his meal on the premises, or to go elsewhere. He stayed on the premises, and sat down to eat his dinner, and while so doing a wall fell upon him, and he was injured. It was held on appeal that during the dinner-hour there had been no break in the employment of the workman, and that he was entitled to claim compensation (*Blovelt v. Sawyer*).

A workman employed as a haulier at a colliery was totally incapacitated for work. Compensation was, by arrangement, paid him at the maximum rate under the Workmen's Compensation Act, '97—namely, 17s. per week, that being 50 per cent. of £1 14s., the amount of his average weekly earnings before the accident. He subsequently so far recovered from the effects of the accident as to be capable of light work, and his employers took him back into their service as a lampman at wages of £1 9s. 5d. per week, and ceased to pay him compensation. At that time the rate of wages paid to hauliers in the colliery had fallen to £1 9s. 5d. per week. The workman having filed a request for arbitration in the county court to assess compensation under the Act, the county court judge refused to award him compensation, giving reasons for so doing which indicated that he considered the average weekly wages forming the basis of the award might vary with the fluctuations of the wages market. The case was remitted to the county court, it being held by the Court of Appeal that the subsequent fall in wages had no effect (*James v. Ocean Coal Co.*).

Where a scheme under the Workmen's Compensation Act is in force and is accepted by the workman, he cannot, in the event of an accident, claim under the Employers' Liability Act, 1880: the acceptance of the scheme is a conclusive election to take under the Compensation Act—*Taylor v. Hamstead Colliery*—but an apprentice being "an infant" is not prevented from bringing an action even if he have taken compensation, as he cannot elect (*Stephens v. Dudbridge Ironworks Co.*).

The case of *Crossfield v. Tanian*, in which it was held that a county court judge could not review his decision as to compensation except on a change of circumstance, was held not to apply to the following case: Upon an application by employers for a review of the weekly sum paid as compensation to a workman, the judge, acting on the opinion of medical experts that the workman was not incapacitated for work, made an award ordering the weekly payment to be reduced to a nominal amount.

The workman subsequently repeatedly applied for employment, and had been unable to obtain it on account of his condition arising from the accident. The county court judge refused to entertain an application by the workman for review on the ground that the condition of the workman was *res judicata*, and that there had been no change of circumstances since the previous hearing, so as to give him jurisdiction to review the payment. The Court of Appeal directed a new hearing, holding that there was evidence of a change of circumstances (*Sharman v. Holliday & Greenwood, Ltd.*).

The registrar of a county court cannot refuse to record the memorandum merely because, owing to altered circumstances, the workman is no longer entitled to the amount of compensation fixed by the agreement, but his only duty is to ascertain whether the memorandum accurately represents the agreement which has been entered into (*Blake v. Midland Railway Co.*).

A sub-contractor for the scaffolding of a building must indemnify the general contractor in respect of compensation recovered by a workman of the sub-contractor (*McCabe v. Jopling & Palmer's Travelling Cradle*).

**Legal Tender.** The following are legal tender up to and including the annexed amounts:—

Of the	Gold coins . . .	up to any amount.
Royal	Silver coins . . .	£2.
Mint.	1d. and ½d. coins . .	1s.
	¼d. coins (farthings) . .	6d.

Bank of England notes are legal tender in England and Wales (except by the Bank of England itself), but a creditor cannot be compelled to give change. The actual notes or coins must be produced by the debtor, and offered in payment, otherwise legal tender has not been made.

**Legion of Honour, The.** Instituted by Napoleon when First Consul of France (May 1802), and intended as a reward for military and civil services. There were originally four grades—Grands Officers, Commandants, Officers, and Légionnaires (see ed. '87). On the coronation of Napoleon I. the Grand Officers were divided into two classes. The constitution of the Legion was remodelled by Napoleon III. in '52, and now it includes the following grades in order: Grands Croix, Grands Officers, Commandeurs, Officers, and Chevaliers. The President of the Republic is the Grand Master of the Order. Membership of the Order is for life. The number of Chevaliers was, in June 1902, 37,309; of Officers, 6,664; of Commandeurs, 1,071; of Grands Officers, 219; of Grands Croix, 51. Military members only are allotted annually—Chevaliers, 250 fr.; Officers, 500 fr.; Commandeurs, 1,000 fr.; Grands Officers, 2,000 fr.; Grands Croix, 3,000 fr.

**Legitimist Jacobite League of Great Britain and Ireland.** This Society was founded in '91 with the object of forming a nucleus for the reassertion in the United Kingdom of royal authority as against the popular trend in favour of democracy. To recognise a parliamentary sanction for the tenure of the crown is against the principles of the League. It advocates the restoration of the legitimate dynasty as represented in the descendants of the elder branch of the Royal Family. The President is W. Clifford Meller, Esq. The Hon. Secretaries are Mr. O.

Kelly, 24, Plough Road, Rotherhithe, S.E.; Mr. Theodore Napier, Balmanno, 7, West Castle Road, Edinburgh; and Mr. Eudo A. Bellingham, Dunamy Point, Co. Louth.

**L'Entente Cordiale**, an Anglo-French Association, is a non-political society founded in 1898 by Col. Sir J. Roper Packington. It has about 580 members. Its objects are to maintain and perpetuate friendly social intercourse between the two nations. Two scholarships, enabling students to spend a month in France, are offered for competition. The Council, besides keeping itself in communication with members of the Universities of Grenoble and Rennes, Nancy and Dijon, also publishes pamphlets giving much useful information about provincial France to intending tourists. Chairman, A. Barton Kent, Esq., 31, Marlborough Place, N.W.; Hon. Sec., W. H. Sands, Esq., 6, Fig Tree Court, Temple, E.C.

**Liberator Relief Fund.** This Fund was started in 1892 to relieve the wide-spread misery caused by the disastrous failure of the Balfour group of companies. Secretary, Rev. J. Stockwell Watts. Office: 16, Farringdon St., London, E.C.

## LIBERIA.

Liberia is a negro republic on the coast of West Africa, lying between the French colony of the Ivory Coast on the east and Sierra Leone on the west, and between the French possessions in the interior and the sea. Area about 35,000 sq. m.; pop. 1,500,000, including about 20,000 civilised Americo-Liberians, the rest being natives. Capital, Monrovia, pop. 5,000. Liberia was founded in '22 by American philanthropists for the settlement of freedmen. It was declared independent in '47, was recognised as a sovereign state by Great Britain in '48, and by the United States in '62. The constitution is on the model of that of the United States. The President is elected for two years, the House of Representatives (13 members) for two years, and the Senate (9 members) for four.

The development of the country is hindered by the laws prohibiting any but Liberian subjects from holding land, and forbidding foreigners to trade in the interior or anywhere except at the official ports of entry. There has been much inter-tribal warfare, also, in the interior, but a conference was held at Monrovia in 1904, at which all the important chiefs signed a declaration of peace. There are magnificent forests in the interior, and much mineral wealth exists, some of which is being prospected by the West African Gold Concessions Company. The chief products are palm oil, coffee, rubber, and ivory. Cotton is indigenous, but is not cultivated to any extent.

Revenue, 1900, £40,000; expenditure, £40,000. Imports, 1901, £120,000; exports, £90,000. In '71 a debt of £100,000 was contracted in England, on which no interest was paid. Under an arrangement made in '99, the service of the debt, with reduced interest, has been resumed; and in 1902 it stood at £96,997, including arrears of interest.

President, Arthur Barclay (elected May 1903), took office Jan. 1904.

British Consul, E. MacDonell, at Monrovia.

Consul-General in London (and acting Chargé d'Affaires), Henry Hayman.—Consul, S. de Stein, 3, Coleman Street, E.C.

**Liberty and Property Defence League.** The (motto "Self-help *versus* State-help"), was established in 1882 for maintaining security and freedom of contract, for upholding proprietary rights, and for resisting socialistic legislation. Federated with the League are about 220 **Defence and Protection Societies**, representing the chief industries in the kingdom. **Chairman**, Earl of Wemyss. **Central offices**, 25, Victoria St., S.W.

### LIBRARIES OF THE UNITED KINGDOM.

The special feature of our English library system has been the work done under the **Public Libraries Acts**. These Acts date from 1850, the Act of that year having been followed by Acts extending the principle to Scotland and Ireland and amending matters of detail. A consolidating Act was carried in '92. The Acts enable towns, local board districts, and parishes to establish libraries, to be maintained by a rate not exceeding 1d. in the £.

There are in the County of London 70 libraries established under the **Public Libraries Acts**; these contain about 1,000,000 volumes and issue between 6,000,000 and 7,000,000 volumes annually.

Of the older libraries of the country the most important, of course, is that of the **British Museum** (*q.v.*), which is only exceeded in extent by the **Bibliothèque Nationale** at Paris. It possesses over 2,000,000 volumes and 100,000 MSS. and charters. It is entitled under the **Copyright Acts** to a copy of every work published in this country—a privilege which is also enjoyed by the **Bodleian Library**, Oxford (600,000 vols. and 30,000 MSS.), and the **Cambridge University Library** (550,000 vols. and 5000 MSS.), the **Advocates' Library**, Edinburgh (430,000 vols. and 3000 MSS.), and the library of **Trinity College**, Dublin (238,000 vols. and 2000 MSS.). Valuable and extensive libraries are attached to the other universities, to the colleges of Oxford and Cambridge, and to most cathedrals.

There are a number of important **professional libraries** in London, Dublin, and Edinburgh, and a few **endowed libraries**, such as the **Chetham** (1653) and **John Rylands** at Manchester (in which is placed the **Althorp Library**), and **Mitchell** at Glasgow (1874).

The concentration of literary and intellectual interests in London has naturally given birth to a large number of **special libraries**, many of which are open to the student upon proper introduction. The more important of them are included in the following alphabetical list of the **principal London libraries**: **Admiralty** (40,000 vols.); **Bethnal Green Free Library**, London Street, Bethnal Green, E. (36,000), open 10 to 5 and 6 to 10; **Bishopsgate Institute** (27,000); **Chemical Society** (17,500); **Church House** (15,000); **College of Preceptors** (7000); **Colonial Office** (13,000); **Corporation, Guildhall** (112,000), open free; **Cripplegate Institute** (25,000); **Dr. Williams'** (40,000); **Foreign Office** (75,000); **Geological Society** (17,000); **Gray's Inn** (15,000); **House of Commons** (42,000); **House of Lords** (32,000); **Law Society** (37,000); **India Office** (60,000); **Inner Temple** (58,000); **Institute of Civil Engineers** (40,000); **Lambeth Palace** (30,000 and 14,000 MSS.); **Lincoln's Inn** (72,000); **London Institution** (100,000, subs.); **London Library** (190,000, subs.); **Middle Temple** (40,000);

**Museum of Practical Geology** (30,000); **Patent Office** (88,000); **People's Palace**, Mile End Road, E. (12,500); **Royal Society** (80,000); **Royal Asiatic Society** (13,000); **Royal Astronomical Society** (10,000); **Royal College of Physicians** (20,000); **Royal College of Surgeons** (55,000); **Royal Colonial Institute** (40,000); **Royal Geographical Society** (35,000); **Royal Institution** (60,000, subs.); **Royal Medical and Chirurgical Society** (46,000); **Royal Society of Literature** (8000); **Royal United Service Institution** (26,000); **Russell Institution** (18,500, subs.); **St. Bride Foundation Institute** (17,000); **St. Paul's Cathedral** (10,730); **Sion College** (60,000); **Society of Antiquaries** (42,000); **Society of Telegraph Engineers** (3500); **South Kensington, Educational** (50,000); **National Art** (60,000); **Dyce and Foster** (35,000); **Royal Statistical Society** (30,000); **University College** (110,000); **University of London** (11,000); **War Office** (26,000); **Westminster Chapter** (12,000).

The **Library Association**, founded '77, incorporated by Royal Charter '98, now numbers 600 members, including chairmen and members of committees and the chief librarians of the country. A list of the municipal and other libraries in the United Kingdom, as well as the principal libraries of the British Colonies, is published in the "**Year-Book**" of the Library Association, published by the Association at Whitcomb House, Whitcomb Street, Pall Mall East, price 1s. net. **President**, Thomas Hodgkin, B.A., D.C.L., Litt.D. **Hon. Secretary**, Lawrence Inkster, 265, Lavender Hill, S.W.

Marriage—special . . . . .	*	5	0
" not special (see MARRIAGE REGULATIONS) . . . . .	0	10	0

\* The stamp duties, etc., bring this sum up to about £30.

2. Watching the administration of the existing law, and urging and supporting its enforcement.

In its annual report, up to Aug. 31st, 1904, that Board said: "The passing of this measure alters the whole legislative situation. It renders void the great decisions of the High Courts during the past few years, which have served to make clear the legal position of the magistrates regarding the administration of the law relating to the sale of intoxicating liquors, and to guide them in the execution of their duty. Proposals for licensing reform will have to be made from an entirely new standpoint."

The question of administering the Act was discussed at a joint Conference in Caxton Hall, called together by the C.T.L. Board and the Licensing Laws Information Bureau, and the following recommendations were made:—

That, inasmuch as the future working of the Act cannot be completely foreseen, the borrowing powers under the Act should not be exercised for the present.

That it is desirable that no new "on" licence should be granted except for a longer term than an annual grant, though not necessarily for the maximum period of seven years.

That those Quarter Sessions which have not already done so should be urged to instruct the Chief Constable to obtain a return as to the licensed houses of each district and for each civil parish.

That in framing the new rules under the Act provisions should be made whereby any member of the public who has been entitled to be heard at Brewster Sessions, either personally or by counsel or solicitor, shall be recognised by the Committee of Quarter Sessions.

That no question as to the renewal of any referred licence should be determined at any private meeting of the Quarter Sessions Committee, but any objector should be heard in public before a reported licence is renewed.

That Quarter Sessions should by their rules secure to the Justices of the licensing district immunity from any personal liability for expenses incurred in the discharge of their duties.

The views of the Church of England Temperance Society were expressed in the following resolutions :—

"That this Council objects to the Government Licensing Bill for the following, among other, reasons: (1) Because no limit is put to the time during which the compensation clauses would take effect; (2) because it would deprive local justices of that salutary power of refusing the renewal of licences which they consider not to be required for the public advantage; (3) because it would utterly fail to promote such a large reduction of licences as both the Majority and Minority Reports of the Royal Licensing Commission have declared to be essential; (4) because it would practically nullify the principle that licences are granted for one year only, and would impart to licences

The discussion in Parliament on, and the details of, the **Licensing Act 1904** are set out in the article on Session, sects. 53, 54. Below will be found an account of the attitude and action of the Temperance Party while the Bill was under discussion and since it was passed into law. The Central Temperance Legislation Board endeavoured at every stage of the Bill to present adequately the position, and if possible to secure some concession to the wide expression of objection to the Bill manifested throughout the country. This was particularly the case in regard to the strenuous endeavours made by Temperance reformers on both sides of the House to secure the introduction of a "time limit" to the compensation clauses of the Bill.

After the Bill became law, the C.T.L. Board revised its constitution, and has substituted the following as its policy :—

1. The amendment of the Licensing Acts by—

The introduction of a time limit to the operation of the compensation provisions of the Licensing Act of 1904, at the end of which time all then existing licences shall cease, and all future licences be issued as new licences, the full monopoly value of which shall be secured for the public.

The restoration and extension of the power and discretion of the local licensing authority.

Making compulsory a substantial and definite reduction in the number of licensed premises.

The introduction of such reforms as: Sunday closing, shortening the hours of sale, the appointment of special inspectors, the prevention of persons who are interested in the liquor trade from being members of Watch Committees, and other changes which may from time to time seem desirable.

The enactment of provisions for more effectively controlling and limiting the number of clubs in which intoxicants are consumed.

The adoption of a wide measure of local control.

a property value entirely inconsistent with that exclusive public interest for which they are presumably issued."

At their Council meeting, held in Brighton on Oct. 21st, the following resolution was passed:—

"That in the opinion of this Council future licensing legislation should endeavour to secure, among other things: (1) Sunday closing, (2) a reduction of hours, (3) the imposition of a time limit, and (4) the placing thereafter of applications for renewals in the same position as applications for new licences."

### ***The U.K. Alliance View.***

The United Kingdom Alliance expresses its disapprobation in stronger terms. At the annual meeting the two following resolutions were passed:—

"That this Council regards the Licensing Act of 1904 as an intolerable wrong, and a formidable barrier in the way of temperance reform. It holds that the Act was carried by a discreditable employment of the closure, in defiance of the popular will, by the votes of members of Parliament financially interested in the trade, and at the dictation and electoral menace of the brewers. It condemns this Act so passed, as destitute of moral authority, and demands its reversal by Parliament at the earliest possible opportunity."

"That this Council desires to take full advantage of the awakening of the national conscience to the evils of the liquor traffic, and calls upon all friends of the Temperance movement, without respect of creed or party, to endeavour to educate the constituencies upon the great controversy raised by the Licensing Act, which was deliberately intended to cripple the powers of the magistrates, to hinder the reduction of licences, and to erect a barrier against local prohibition; and this Council urges all its followers to strain every nerve to return to power a Parliament pledged to break down that barrier and to make the path clear for Temperance reformers."

### ***The National Temperance Federation View.***

The National Temperance Federation spoke in equally unambiguous terms at the annual meeting on Oct. 19th:—

"The National Temperance Federation condemns the Licensing Act of 1904 as retrograde, revolutionary, and obstructive to the progress of Temperance reform; carried by an unwarrantable use of the forms of Parliament, in defiance of the will of the people, and in subservience to the electoral pressure of the trade, the Act is of no binding effect; and, in so far as it fetters the discretion of the Licensing Authority or gives a vested interest in an annual licence, must be repealed at the earliest opportunity."

### ***Views of Licensed Victuallers.***

Upon the introduction of the Bill, the Licensed Victuallers' Central Protection Society of London passed the following resolutions:—

"That the Board of the Licensed Victuallers' Central Protection Society of London, Limited, having carefully considered the provisions of the Licensing Bill introduced in the House of Commons

by His Majesty's Government, are of opinion that the general scheme of the Bill should be accepted.

"In expressing this opinion the Board do not lose sight of the fact that, as a matter of Imperial justice, the State should pay for what the State takes from the owner of any property whatsoever, and the Board do not for a moment justify the departure which the Licensing Bill makes for the first time from that general principle.

"Having regard, however, to the irksome uncertainty which has of late attended the holding of licences, and to the necessity for some remedy being found for a state of things which has become intolerable, the Board are of opinion that it is better, in the interests of the trade, to support the second reading of the Bill with a view to its amendment in Committee.

"It at least gives some increased security of tenure, and affirms the doctrine of compensation, and in other respects it improves the position of the licensee and of licensed property in general."

The Licensed Victuallers' view of the Act may be gathered from a resolution passed at a mass meeting at Queen's Hall in February 1903, and from various utterances of leading traders and trade journals since. The resolution ran: "That the licensing justices in many divisions of the Metropolis and elsewhere having declared their intention of reducing the number of licences in their respective divisions, but having in many cases postponed their action until the year 1904, this aggregate meeting of the trade within the Metropolitan police district emphatically protests against any reduction of licences in the assumed interest of the public unless accompanied by full compensation to all interests involved. For centuries the sale by retail of alcoholic liquor has been legalised and regulated by Act of Parliament, and the holders of licences have acquired a statutory interest which has always been the subject of sale and purchase, and upon which death duties have always been levied by the State."

### ***The Rowntree-Sherwell Scheme.***

Messrs. Joseph Rowntree and Arthur Sherwell have for some years advocated a measure for eliminating the element of private profit from the sale of strong drink, which they regard as the main difficulty and evil. Their proposal is that companies should be legally empowered to take over the whole of the retail sale of liquor, and conduct it free from any pecuniary profit to the locality, over and above a low rate of interest on the capital; all the profits accruing from sales to be put into a national fund, the first charge on which—a sum of about £4,000,000 per annum—should be paid over to each centre of population, not according to the amount of liquor sold there, but at the rate of £1000 to every 10,000 people, to be used for social improvement and counter-attractions to the sale of alcoholic drinks. This scheme is sometimes, but wrongly, described as "Municipalisation of the Liquor Traffic." It differs, however, entirely from it in that under it there would be no possible inducement to press the sale of liquor, seeing that a community where no liquor was sold would receive exactly the same *per capita* grant from the national fund as another where there were large sales.

On Oct. 21st, 1903, a manifesto was published, which was eventually signed by several hundred influential people, embodying Messrs. Rowntree and Sherwell's views. In this manifesto a scheme of compensation was suggested which was to leave undisturbed the full and unfettered discretion of the licensing magistrates; to have a definite termination; to place no limit on the amount of reduction to be made; and to effectually clear the ground for future reforms. In order to give effect to these suggestions, a **Provisional Committee** was formed, and in May a secretary was appointed. Upon the passing of the Act the Committee came to the conclusion that their aims were no longer feasible, and the organisation was dissolved; but Mr. Seeböhm Rowntree, with some others, held a number of meetings about the country advocating the proposals of the manifesto. The **National Temperance Federation** discussed the question at their annual meeting, and passed this resolution: "That this Federation reaffirms its determined opposition to all schemes providing for the municipalisation or other form of public management for the sale of intoxicating drinks, as any such methods would involve the entire community in the carrying on of the traffic and in the responsibility for its evil results."

#### **Public-house Trust Movement.**

During the last three years systematic attempts have been made, in different parts of Great Britain, to get public-houses into public hands by means of **Public-house Trust Companies**. Their objects are as follows:—

1. Whilst recognising that public-houses are a public necessity, to eliminate, as far as possible, the element of private profit from the retail trade of intoxicating liquors.
2. To accept new licences wherever magistrates are willing to grant them, owing to the growth of population, or for other reasons, and to acquire any existing licensed houses.
3. To place these public-houses under managers who receive no profit from the sale of intoxicants.
4. To secure a strict enforcement of the regulatory provisions of the existing licensing law.
5. To maintain the public-houses acquired, not as mere drinking saloons, but as refreshment houses so far as local conditions will permit.
6. To provide counter attractions to the bar in reading and recreation rooms, where food and non-intoxicants can be obtained.
7. To supply only the purest and most wholesome articles that can be obtained in the open market.
8. To establish canteens and refreshment bars where required on large public works, at collieries and elsewhere.
9. To limit the shareholders' dividends to 5 per cent., and to pay all profits (over and above depreciation, reserve, and dividend) to trustees for public purposes.

In order to remove all temptation to the manager to push the sale of intoxicants, he is paid a fixed salary, and is allowed no profit whatever on the sale of alcoholic drinks, but is allowed a profit on all trade in food and non-alcoholics. Tea, coffee, and other temperance drinks, and food, are made readily accessible at the bars, and are served promptly. The aim of the Association is to maintain the house in a general sense as a public-house, but to conduct the trade on the lines of a respectable

house of refreshment at popular prices instead of that of a mere drinking bar. To guard against the evils of bad liquor great care is taken that everything supplied is of the best quality.

The movement aims at arresting the further absorption of licences into the tied-house system, and its efforts are being directed at securing that in every case where the Licensing Courts decide that a new public-house is wanted, the licence, instead of being given to a brewer, shall be given to one of the Public-house Trust Companies. The **Licensing Act, 1904**, opens out great possibilities to Trust Companies in this direction. Sect. 4 of the Act provides that the justices, on the grant of a new licence, may attach such conditions both as to payments to be made and the tenure of the licence, and as to any other matters, as they think proper in the interests of the public. Such conditions shall in any case be attached as, having regard to proper provision for suitable premises and good management, the justices think best adapted for securing to the public any monopoly value of the licence.

To Earl Grey and the Bishop of Chester is due the credit of having originated the movement. There is abundant evidence that the Trust Companies' public-houses have done much good in promoting temperance and better behaviour in the districts in which they are situated.

Trust Companies have been formed in nearly every county in England, only five counties not having availed themselves of the scheme. The movement is spreading in Wales, Scotland and Ireland; and there are (Oct. 1904) 54 Trust Companies in the United Kingdom. It is working well in several of our colonies, is approved in the United States, and the German Emperor is attracted by the scheme. There are 148 houses now under trust management, and a large number will be offered for trust management on the expiration of the existing leases.

The Central Public-House Trust Association's office is at 116, Victoria Street, Westminster.

#### **Number of Licences and Licences Refused.**

The total number of licences in England and Wales, according to a 1904 Parliamentary return, showing the number of Publicans', Beerhouse, and Hotel Licences within each grade of the schedule to the Licensing Act 1904, is 99,465, including:

- 65,353 publicans' licences.
- 32,672 beerhouse licences.
- 1440 hotel licences.

The number of licences the renewal of which was refused in England and Wales in 1904 was 422, 170 in the counties and 252 in the boroughs. Of these 286 were victuallers' licences, 101 beerhouse licences, and 35 other licences. The number of appeals was 263, of which 21 were abandoned, 108 dismissed, and 114 allowed, while at the date of the return (June 29th, 1904), 20 were pending.

A statement of the number of licences the renewal of which was refused by the Licensing Justices, but which were renewed on appeal to Quarter Sessions, was given by the Home Secretary in May 1904. The numbers were: 1894, 65; 1895, 24; 1896, 32; 1897, 32; 1898, 20; 1900, 45; 1903, 150.

See **Licensing Act 1904** under SESSION, sect. 54; TEMPERANCE SOCIETIES; WINE, SPIRIT, AND BEER, CONSUMPTION OF.

**Lifeboats** (for their origin and development see ed. '87). The **Royal National Lifeboat Institution** is supported by voluntary contributions, and was founded 1824. It has 286 lifeboats on the coasts of the United Kingdom. Total number of lives saved since Institution founded, 44,361. Pecuniary rewards paid for gallant services since '24, £242,004; besides gifts of 99 gold medals and clasps, 1204 silver medals and clasps, 63 decorations, 344 binocular glasses, 15 telescopes, 52 aneroid barometers, 158 framed certificates of service, and 1736 votes of thanks inscribed on vellum. The payments for last year amounted to £93,217; of which £41,326 was expended on lifeboats, lifeboat carriages, boathouses, and slipways; £16,100 on stores, etc., and the balance on rewards, special grants, etc. During the past fifty years the self-righting boats have been launched more than 9,000 times on service, and have saved upwards of 16,000 lives. Those boats have been capsized altogether 58 times while out on service, but only on 30 of those occasions was there any loss of life. The number of lives lost (counting 42 men who perished on the occasion of disasters which befell the Southport and St. Anne's lifeboats on Dec. 9th, '86, and the Kingstown lifeboat on Dec. 24th, '95), amounts to 150, including 15 shipwrecked persons. The 135 lifeboatmen lost represent about 1 in 1000 of the men employed in the boats on service; and the upsets were at the rate of 1 in each of the 171 service launches. **Secretary**, Mr. Charles Dibdin, 20, Charing Cross Road, W.C.

**Life Saving Society.** The objects of this Society, which was founded in '91, are to promote technical education in life saving and resuscitation of the apparently drowned; and to stimulate public opinion by lectures, demonstrations and competitions, in favour of the general adoption of swimming and life saving as a branch of instruction in schools, colleges, etc. Various awards and diplomas are granted by the Executive according to ability of candidates to render aid to those in danger of drowning. A *Handbook of Instruction* has been issued (price 1s.), giving full details as to the course of instruction. The Society has branches in all parts of the United Kingdom, Canada, India, South Africa, New Zealand, Sweden, Malta, Australia, and Italy. **President**, H.R.H. the Prince of Wales; **Hon. Secretary**, Mr. William Henry. **Offices**, 8, Bayley Street, Bedford Square, London, W.C.

**Limitations, Statutes of.** These statutes limit the time within which a man may seek redress for an injury he has sustained. Lapse of time will not protect any one who has ever committed a crime from being prosecuted for it, unless, as regards certain statutory offences, a limit is fixed by any particular Act. Redress from a trustee for such a breach of trust as to constitute a fraud may always be had, however long the interval since its commission. But with this exception the remedy for any civil injury may be barred by lapse of time. An action of debt or covenant, if founded on a deed, must be brought within 20 years of breach; if founded on any less formal agreement, within 6 years of breach. Part payment of a debt, or payment of interest, is sufficient to prevent the Statute from running, as is also a written document or letter admitting the debt or promising to pay it; either of these will enable a creditor to sue even after the 6 years has

passed since the date of debt being contracted. An action to recover land must be brought within 12 years after the right to bring it first accrued. Should the right have accrued to a person under disability, as an infant or lunatic, an action may be brought within 12 years of its accruing, or within 6 years of the disability ending or the disabled person dying; but in no case of disability are more than 30 years to be allowed altogether. The above term of 12 years applies also to an action brought by a mortgagor to recover possession of his land, and to an action brought to recover money charged upon land by mortgage or otherwise. Only such arrears of rent as have accrued within 6 years before bringing an action for them can be recovered. Actions of trespass to goods, of assault, battery, wounding or imprisonment, must be brought within 4 years of the time when the injury was committed; actions for slander being limited to 2 years. Actions on penal statutes, if brought by the party aggrieved, are limited to 2 years; if brought by a common informer, are limited to 1 year. The lapse of 60 years bars actions for the recovery of real property, when brought by the Crown against a subject. The remedy in all the above cases may be lost by the lapse of time, but the right survives and may sometimes be made available in other ways than by action. Formal acknowledgment of a right by the person to whom it is adverse will render of no effect any lapse of time which has taken place, but time will run afresh from the acknowledgment. The law upon this subject is very complex and difficult.

**Literature, Royal Society of**, 20, Hanover Square, W. **Secretary**, Percy W. Ames, LL.D., F.S.A.

### LITERATURE, 1904.

As in previous issues, the works here mentioned form only a selection of those which promise to be of permanent value or have received special attention during the year. A new feature in the list is the addition of the price.

#### Art, Music, etc.

A prominent feature in art publications at the present time is the number of special "Series," mostly monographs, at popular prices. The one important series that does not consist of monographs is Heinemann's "Great Masters Series," each number of which gives several plates with descriptive text by Sir Martin Conway. More than twenty parts have already been published, at 5s. each.

Among the monograph series, of which numerous volumes have been published, are Methuen's "Little Books of Art," 2s. 6d. each; Newnes's "Art Library," 3s. 6d. each; Bell's "Miniature Series of Painters," 1s. each; Grevel's "Monographs on Artists," 4s. each; Bell's "Great Masters" of Painting and Sculpture, 5s. each; Scott Publishing Co.'s "Makers of British Art," 3s. 6d. each; and Duckworth's "Popular Library of Art," 2s. each.

The more sumptuous art publications of the year include:

**Romney**, a Biographical and Critical Essay, with Catalogue Raisonné, by Humphry Ward and W. Roberts, 2 vols. (Agnew & Sons, £12 12s. and £3 8s.).

**The History of Portrait Miniatures**, by G. C. Williamson, Litt.D., 2 vols. (Bell, £10 10s. net).

Rubens, by Max Rooses, translated by Harold Child, over 350 reproductions (*Duckworth*, £5 5s. net).

The Golden Age of Classic Christian Art, by Jean Paul Richter and A. C. Taylor (*Duckworth*, £5 5s. net).

Etchings of Rembrandt, by P. G. Hamerton, annotated catalogue by C. Dodgson (*Seeley*, £5 5s. net).

The Prado and its Masterpieces, by C. S. Ricketts (*Constable*, £5 5s.).

Selected Drawings from Old Masters in University Galleries and Library at Christ Church, Oxford, described by Sidney Colvin. Part II. (*Clarendon Press*, £3 3s. net).

Notes on the Authentic Portraits of Mary Queen of Scots, based on researches of late Sir G. Scharf, K.C.B., rewritten by Lionel Cust (*Murray*, £3 3s. net).

Phil May Folio (*Thacker*, £2 2s. net); and Phil May in Australia (*Edwards, Dunlop*, £1 1s.).

The Work of George W. Joy, with autobiographical sketch (*Cassell*, £2 2s. net).

Smaller works are:

Samuel Cousins, by A. Whitman, British Museum Department of Prints and Drawings (*Bell's* "19th-Century Mezzotinters," £1 5s. net).  
Cruikshank's Water Colours (*A. & C. Black*, £1.).

The following are contributions to the literature of art, most of them nicely illustrated:

Memorials of Edward Burne-Jones, by G. B. J., 2 vols. (*Macmillan*, 30s.).

Whistler as I Knew Him, by Mortimer Menpes (*Black*, £2).

George Morland, Life and Works, by George C. Williamson, Litt. D. (*Bell*, £1 5s. net).

Giovanni Costa, Life, Work, and Times, by Olivia Rossetti Agresti (*Richards*, £1 1s. net).

The Art of the Italian Renaissance, from the German of Heinrich Wölfflin, note by Sir W. Armstrong (*Heinemann*, 10s. 6d.).

Impressionist Painting, by Wynford Dewhurst (*Newnes*, £1 5s. net).

British Water-Colour Art, by Marcus B. Huish, LL.B. (*Black*, £1 net).

Japanese Art, by Sadakichi Hartmann (*Putnam*, 6s. net).

Japanese Illustration, by E. F. Strange, revised ed. (*Bell's* "Connoisseur Series," 6s. net).

Holland, Illustrated by Nico Jungman, text by Beatrix Jungman (*Black*, £1 net).

In sculpture and architecture there are:

Greek Sculpture, its Spirit and Principles, by E. von Mach, Ph.D., an American (Boston, U.S.A., *Ginn*, 15s. net).

The Mechanical Triumphs of the Ancient Egyptians (Pyramids, quarrying, building, etc.), by Commander F. M. Barber, U.S. Navy (*Kegan Paul*).

Architecture and other Arts, by Howard Crosby Butler, A.M. (*Heinemann*, £4 4s. net). Part II. of publications of an American archaeological expedition to Syria, 1899-1900.

Venice, by Mortimer Menpes, text by Dorothy Menpes, pictures in three-colour photography (*Black*, £1 net).

Next comes a group including

The Art of Heraldry, by A. C. Fox-Davies (*Jack*, £5 5s.), mainly a translation of Herr Ströhl's "Heraldischer Atlas," with British portion rewritten.

The Armoury of Windsor Castle, European Section, by Guy Francis Laking, M.V.O., F.S.A. (*Bradbury, Agnew*, £5 5s. net).

English and Scotch Wrought Iron Work, by Bailey S. Murphy (*Batsford*, £3 3s. net).

Arts and Crafts (*Hulchinson*, 1s. per no.), a new periodical with supplements giving designs.

Biographical Dictionary of Medallists, Coin, Gem, and Seal Engravers, etc., B.C. 500—A.D. 1900, compiled by L. Forrer, Vol. II. (*Spink*).

The 19th-Century Token Coinage of Great Britain, by W. J. Davis (*Spink*, £2 2s. net).

Pewter Plate, Historical and Descriptive Handbook, by H. J. L. J. Massé (*Bell*, 21s. net).

Porcelain, by E. Dillon (*Methuen's* "Connoisseur's Library," £1 5s. net).

History and Description of English Earthenware and Stoneware, to beginning of 19th Century, by W. Burton, F.C.S. (*Cassell*, £1 10s. net).

French and English Furniture, by Esther Singleton, illustrated by H. S. Nichols (*Hodder & Stoughton*, £2 2s.).

History of English Furniture, by P. Macquoid (*Lawrence & Bullen*), published in 20 monthly parts at 7s. 6d. net each.

The history of music is illustrated by the following:—

The World's Earliest Music, by Hermann Smith (*Reeves*, 6s.).

The Earliest English Music-Printing, to close of 16th century, by Robert Steele (illustrated Monographs, No. XI., printed at Chiswick Press for the Bibliographical Society).

Critical History of Opera, by A. Elson (*Seeley*, 5s. net).

Life of Richard Wagner, by W. Ashton Ellis, Vol. IV. (*Kegan Paul*, 16s. net).

Life of Sir Herbert Stanley Oakeley, by E. M. Oakeley (*Allen*, 10s. 6d. net).

### Biography.

At the head of this list may be placed the biographies of some notable men still living:—

Life of Joseph Chamberlain, by Louis Creswicke, Vols. I., II., and III. (*Caxton Publishing Co.*, 7s. 6d. net each vol.).

The Duke of Devonshire, a Personal and Political Biography, by H. Leach (*Methuen*, 12s. 6d. net).

Reminiscences of Sir Henry Hawkins, Baron Brampton, edited by Richard Harris, K.C., 2 vols. (*Arnold*, 30s. net.).

Notes from a Diary, 1892-95, by Sir M. E. Grant Duff, G.C.S.I., 2 vols. (*Murray*, 18s.).

Theodore Roosevelt, the Man and the Citizen, by Jacob A. Riis (*Hodder & Stoughton*, 7s. 6d. net).

Life of Florence Nightingale, by Sarah A. Tooley (*Bousfield*, 5s. net).

D'Israeli: a Study in Personality and Ideas (12s. 6d. net), and Life of Lord Beaconsfield, (3s. 6d.) by Walter Sichel (*Methuen*).

Life and Correspondence of Chief Justice Coleridge, by Ernest Hartley Coleridge, 2 vols. (*Heinemann*, 30s. net.).

William Cecil, Lord Burghley, edited by F. P. Barnard, F.S.A. (*Jack's Historical Monographs*, £2 2s. net.).

Life and Adventures of Prince Charles Edward Stuart, by W. Drummond Norie, completed in 4 vols. (*Caxton Publishing Co.*, 25s. each).

Lucretia Borgia, by Ferdinand Grigorovius, translated from German by J. Leslie Garner (*Murray*, 10s. 6d. net.).

Among lives of philosophers, essayists, and general litterateurs are the following:—

An Autobiography, by Herbert Spencer, 2 vols. (*Williams & Norgate*, 28s. net).

Autobiography, by Alexander Bain (*Longmans*, 14s. net).

The Life of Voltaire, by S. G. Tallentyre, 2 vols. (*Smith, Elder*, 21s.).

Matthew Arnold, and his Relation to the Thought of our Time, by W. Harbutt Dawson (*Putnam*, 7s. 6d. net).

Letters of Lord Acton, to Mary, daughter of W. E. Gladstone, edited, with memoir, by Herbert Paul (*Allen*, 15s. net).

New Letters of Thomas Carlyle, edited by Alexander Carlyle, 2 vols. (*Lane*, 25s. net).

Emile Zola: Novelist and Reformer, by Ernest Vizetelly (*Lane*, 21s. net).

Correspondence of William Cowper, by Thomas Wright, 4 vols. (*Hodder & Stoughton*, £3 3s.).

Shelley, an Essay by A. A. Jack, Fellow of Peterhouse, Cambridge (*Constable*, 3s. 6d. net).

William Blake, a Study of his Life and Art Work, by Irene Langridge (*Bell*, 10s. 6d. net).

Christopher Marlowe, and his Associates, by John H. Ingram (*Richards*, 12s. 6d. net).

Christopher Columbus, Vol. III., by John Boyd Thacker (*Putnam*, 36s. net).

Sir William Henry Flower, K.C.B., F.R.S., by C. J. Cornish, F.Z.S. (*Macmillan*, 8s. 6d. net).

Eleanor Ormerod, LL.D., Autobiography and Correspondence, edited by Robert Wallace (*Murray*, 21s. net).

Life and Letters of Henry Parry Liddon, D.D., by the Rev. J. O. Johnston, M.A., Principal Cuddesdon College (*Longmans*).

Life and Letters of Mandell Creighton, D.D., by his Wife, 2 vols. (*Longmans*, 28s. net).

Life of Frederic William Farrar, by his son, R. A. Farrar, M.D. (*Nisbet*, 6s.).

Letters of William Stubbs, Bishop of Oxford, 1825-1901, edited by William Holden Hutton, B.D. (*Constable*, 17s. 6d. net).

Early Associations of Archbishop Temple, by F. J. Snell (*Hutchinson*, 6s. net).

Father Damien, translated from the French of the Rev. Philibert Tauvel, SS.CC. (*Art and Book* Co., 2s. 6d. net).

The Epistles of Erasmus, from his earliest letters to his first year, translated by F. M. Nichols, Vol. II. (*Longmans*, 18s. net).

Lives and Legends of English Bishops and Kings. Mediæval Monks, etc., by Mrs. Arthur Bell (*Bell*, 14s.).

### Education.

#### Educational Theory:

Education as Adjustment: Educational Theory viewed in light of Contemporary Thought, by Prof. M. V. O'Shea (*Longmans*, 6s.).

Education through the Imagination, by Margaret McMillan (*Sonnenschein*, 3s. 6d.).

Desiderius Erasmus on Aim and Method of Education, by Prof. W. H. Woodward (*Camb. Univ. Press*, 4s. net).

Public Schools and Public Opinion, an Apology for Certain Methods in English Higher Education, by T. Pellatt (*Longmans*, 2s. 6d.).

The Free Church of Scotland Appeals, 1903—4, edited by R. L. Orr: authorised report of pleadings in Court of Session and House of Lords (*Edinburgh: Macniven & Wallace*, 5s. net).

Dealing with versions of the Scriptures are: Fourteenth-Century English Biblical Version, of which 5 MSS. are extant, edited by Anna C. Paves, Fellow of Newnham College, Cambridge (*Camb. Univ. Press*, 10s. net).

Historical Catalogue of Printed Editions of Holy Scripture in Library of British and Foreign Bible Society, compiled by T. H. Darlow, M.A., and H. F. Moule, M.A., 2 vols.: Vol. I., English (*London: Bible House*).

Story of the Bible Society, by W. Canton (*Murray*, 6s.).

Contemporary controversies, more particularly between the orthodox and the rationalising sections of thinkers, have produced a number of interesting works.

The Religions of Authority and the Religion of the Spirit, by the late Auguste Sabatier, with memoir by Jean Réville, and note by Madame Sabatier (*Williams & Norgate's* "Theological Translation Library," 10s. 6d.).

What is Christianity? by Adolf Harnock, translated by T. B. Saunders, third and revised edition (*Williams & Norgate's* "Crown Theological Library," 5s.).

The Value of the Bible, and Other Sermons (1902-1904), by H. Henslow Henson, D.D. (*Macmillan*, 6s.).

Haeckel's Contribution to Religion, by A. S. Morris (*Watts*, 6d.). Defence of Haeckel.

Selections from the Literature of Theism, edited by A. Caldecott, Professor of Mental and Moral Philosophy, King's College, London, and H. R. Mackintosh, United Free Church, Aberdeen (*Clark*, 7s. 6d. net).

A Soul's Emancipation, a Record of Personal Experience, by F. F. Granjon, a seceded French priest, translated by R. C. Faithfull (*Stock*, 5s.).

Faith and Morals, by W. Herrmann, D.D., a Marburg professor, friend and expositor of Ritschl, translated by Donald Matheson and R. W. Stewart (*Williams & Norgate*, 5s.).

The Gospel and Human Life, Sermons by Alfred Ainger, LL.D. (*Macmillan*, 6s.).

Dr. Hastings' Dictionary of the Bible, an extra volume containing articles that needed separate treatment, indices, and maps (*Clark*, £1 8s.).

The Jewish Cyclopædia, in Vol. VII. embraced Italy—Leon (*Funk & Wagnall*, 25s. each vol.).

Hodder & Stoughton brought out a Protestant Dictionary, edited by the Rev. Charles H. H. Wright, D.D., and the Rev. Charles Neil, M.A. (15s. net).

Works treating of non-Christian religions : The Evolution of Theology in the Greek Philosophers, "Gifford Lectures," 1900-1 and 1901-2, by Edward Caird, Master of Balliol, Oxford, 2 vols. (*Glasgow : MacLachlan*, 14s. net).

Prolegomena to the Study of the Greek Religion, by Jane E. Harrison, with appendix on the Orphic Tablets, by G. G. A. Murray (*Camb. Univ. Press*, 15s.).

Christianity in Talmud and Midrash, collection of passages in Rabbinical literature down to middle of 4th century referring to Christianity, by R. T. Herford (*Williams & Norgate*, 18s. net).

Dictionary of Faiths and Folklore, etc., by W. Carew Hazlitt, 2 vols. (*Reeves & Turner*, £1 1s.).

### Science and Medicine.

The Mammals of Great Britain and Ireland, by J. G. Millais, F.Z.S., richly illustrated : Vol. I. (*Longmans*, £6 6s. net each vol.).

Collections in the Natural History Department of British Museum, Vol. I. (*British Museum*, 15s.).

Fauna and Geography of Maldives and Laccadive Archipelagoes, Work of Expedition in 1899-1900, Vol. II., Part III., edited by J. Stanley Gardiner, M.A. (*Camb. Univ. Press*, 15s. net).

British Fresh-Water Fishes, by Sir Herbert Maxwell, Bart., F.R.S. ("Woburn Library of Natural History," *Hutchinson*, 12s. 6d. net).

British Salt-Water Fishes, by F. G. Afslalo, with chapter on Artificial Culture of Sea Fish, by R. B. Marston ("Woburn Library of Natural History," *Hutchinson*, 12s. 6d. net).

Butterflies and Moths of the Country Side, by F. E. Hulme, F.L.S., F.S.A. (*Hutchinson*, in 13 sixpenny parts).

Classification of Flowering Plants, by A. B. Rendle, D.Sc., of the British Museum : Vol. I. Gymnosperms and Monocotyledons ("Camb. Biological Series," *Camb. Univ. Press*, 10s. 6d. net).

The British Freshwater Algae, by G. S. West, A.R.C.S., Prof. Nat. Hist. Cirencester ("Camb. Biological Series," *Camb. Univ. Press*, 10s. 6d. net).

The Tertiary Igneous Rocks of Skye (Geological Survey), by A. Harker, M.A., F.R.S. (*Stanford*, 9s.).

20th-Century Atlas of Microscopical Petrography, Part I. (*Murby*, 10s., or 7s. to subscribers).

Earthquakes in the Light of the New Seismology, by Major C. E. Dutton, U.S.A. ("Progressive Science Series," *Murray*, 6s. net).

An Attempt towards a Chemical Conception of the Ether, by D. Mendeléeff, translated by George Kamensky, A.R.S.M., of Imp. Mint, St. Petersburg (*Longmans*, 2s. net).

Elements of Chemistry, by M. Pattison Muir, M.A., Fellow and Professor in Chemistry, Gonville and Caius Coll., Camb. (*Churchill*, 10s. 6d. net).

Radio-Activity, treated from the standpoint of the Disintegration Theory, by Fred. Soddy, M.A. ("Electrician" Publishing Co., 6s. 6d. net).

Radio-Activity, by E. Rutherford, D.Sc. F.R.S., &c. ("Cambridge Physical Series," *Univ. Press*, 6s. net).

Becquerel Rays and Properties of Radium, by the Hon. R. J. Strutt, Fellow of Trin. Coll., Camb. (*Arnold*, 8s. 6d. net).

Baltimore Lectures on Molecular Dynamics and Wave Theory of Light, by Lord Kelvin (*Camb. Univ. Press*, 15s. net).

Collected Mathematical Papers of J. J. Sylvester : Vol. I., 1837-53, with prefatory note by H. F. Baker (*Camb. Univ. Press*, 18s. net).

Mathematical and Physical Papers, Vol. IV., by the late G. G. Stokes, Bart., &c. (*Camb. Univ. Press*, 15s.).

Technological and Scientific Dictionary, edited by G. F. Goodchild and C. F. Tweney, complete in 15 monthly parts (*Newnes*, 1s. net each part).

In medical literature may be mentioned :

English Medicine in Anglo-Saxon Times, by J. F. Payne, M.D. ("Fitzpatrick Lectures," 1903, *Frowde*, 8s. 6d. net).

Blood Immunity and Blood Relationship, investigations conducted in Pathological Laboratory, Camb., 1902, by G. H. F. Nuttall, M.A., M.D., &c., G. S. Graham-Smith, M.A. M.B., &c., and T. S. P. Strangeways, M.A., M.R.C.S. (*Camb. Univ. Press*, 15s. net).

The Confessions of a Physician, by "V. Veresaeff" (V. Smidovitch), translated from Russian by Simeon Linden (*Richards*, 7s. 6d.). This book caused a great sensation in Russia.

### Travel, Topography, and Sport.

Japan, by the Japanese, a Survey by its Highest Authorities, edited by A. Stead (*Heinemann*, £1 net).

Present-Day Japan, by Augusta M. Campbell Davidson, M.A. (*Unwin*, £1 1s.).

Japan, Aspects and Destinies, by W. Petrie Watson (*Richards*, 12s. 6d. net).

Japan and her People, by Anna C. Hartshorne, 2 vols. (*Kegan Paul*, £1 1s. net).

Queer Things about Japan, by Douglas Sladen (*Treherne*, £1 1s. net).

Dai Nippon, the Britain of the East, by H. Dyer, C.E., D.Sc. (*Blackie*, 12s. 6d. net).

Impressions of Japan, by George H. Rittner (*Murray*, 10s. 6d. net).

Far Eastern Impressions, by F. G. Hatch, M.P., Japan, Korea, China (*Hutchinson*, 6s. net).

Japan To-day, by J. A. B. Sherer, Ph.D. (*Kegan Paul*, 6s. net).

The Gems of the East, by A. Henry Savage Landor, 2 vols., record of journey through Philippine and Sulu Islands (*Macmillan*, £1 10s. net).

Manchuria and Korea, by H. J. Whigham (*Isbister*, 7s. 6d.).

**Manchu and Muscovite**, by B. L. Putnam Weale: letters from Manchuria during autumn of 1903, with Historical Sketch (*Macmillan*, 10s. net).

**My Chinese Note-Book**, by Lady Susan Townley (*Methuen*, 10s. 6d. net).

**Europe and the Far East**, by Sir R. K. Douglas (*Camb. Univ. Press*, 7s. 6d.).

**Through the Highlands of Siberia**, by Major H. G. C. Swayne, R.E. (*Rowland Ward*, 12s. 6d. net).

**Tibet and the Tibetans**, by Mons. Grenard, translated by A. Teixeira de Mattos (*Hutchinson*, 10s. 6d.).

**Through the Unknown Pamirs**, second Danish Exploration, 1898-9, by O. Olufsen (*Heinemann*, 15s. net).

**On the Outskirts of Empire in Asia**, by the Earl of Ronaldshay, F.R.G.S. (*Blackwood*, £1 1s. net).

**The Web of Indian Life**, by the Sister Nivedita (Margaret E. Noble) of Ramakrishna-Vivekananda (*Heinemann*, 7s. 6d.).

**By Nile and Euphrates**, by H. Valentine Greene, member of Babylonian Expedition sent by University of Pennsylvania (*Clark*, 8s. 6d. net).

**Dar-ul-Islam**, Journey of Asiatic Provinces of Turkey, by Mark Sykes (*Bickers*, 15s. net).

**In the Palaces of the Sultan**, by Anna Bowman Dodd, an American writer (*Heinemann*, 16s. net).

**Three Years in Klondyke**, by Jeremiah Lynch (*Arnold*, 12s. 6d. net).

**Sport and Travel in the Northland of Canada**, by David T. Hanbury (*Arnold*, 16s. net).

**Canada in the 20th Century**, by M. Bradley (*Constable*, 16s. net).

**Greater America**, by Archibald R. Colquhoun (*Harper & Bros.*, 16s.).

**The Northern Tribes of Central Australia**, by Baldwin Spencer, M.A., F.R.S., Prof. Biology University Melbourne, and F. J. Gillen, Sub-Protector of Aborigines (*Macmillan*, 21s. net).

**Things Seen in Morocco**, by A. J. Dawson (*Methuen*, 10s. 6d. net).

**The Truth about Morocco**, by M. Aflalo, with preface by R. B. Cunninghame Graham (*Lane*, 7s. 6d. net).

**Morocco**, painted by A. S. Forrest, described by S. L. Bensusan (*Black*, £1 net).

**Africa from South to North**, through Marotse-land, by Major A. St. H. Gibbons, F.R.G.S., R.C.I., 2 vols. (*Lane*, £1 12s. net).

**The Essential Kafir**, by Dudley Kidd (*Black*, 18s. net).

**The Norwegian North Polar Expedition, 1893-6**, Scientific Results, edited by Fridtjof Nansen: Vol. IV. (*Longmans*, £1 1s. net).

**Four Years in the Arctic Regions**, by Otto Sverdrup, translated by Ethel Harriet Hearn (*Longmans*, 36s. net).

**The Alps**, described by W. Martin Conway, painted by A. D. McCormick (*Black*, £1 net).

**The Log of the Griffin**, a Cruise from the Alps to the Thames, by Donald Maxwell (*Lane*, 10s. 6d. net).

**The Microcosm of London: or London in Miniature**, reprinted from original edition in 1811, with coloured plates by Pugin and Rowlandson (*Methuen*, £3 3s. net).

**Alken's National Sports of Great Britain**, (*Methuen*, £5 5s. net).

**Sportsman's Book for India** (*Horace Marshall*, 18s. net); and

**Fifty Leaders of British Sport**, portraits by Elliott, of Elliott & Fry (*Lane*, £1 1s. net), both by M. Aflalo.

**History of English Turf**, by T. A. Cook, F.S.A., 3 vols. (*Virtue*, £3 3s., subscribers only).

**Driving**, by F. M. Ware (*Heinemann*, 36s. net).

**Shooting Trip to Kamthakka**, by E. Demidoff (Prince San Donato), (*Rowland Ward*, 21s. net).

**With Hound and Terrier in the Field**, by Alys F. Serrell, edited by Frances Slaughter (*Blackwood*, 15s. net).

**The 20th-Century Dog**, by H. Compton: Vol. I. Non-sporting; Vol. II. Sporting (*Richards*, 7s. 6d. net each).

**The Sporting Dog**, by J. A. Graham (*Macmillan's* "American Sportsman Library," 8s. 6d. net).

**Salmon and Trout Rivers of England and Wales**, by A. Grimble, 2 vols. (*Kegan Paul*, £3 3s. net).

**Fishing**, by H. C. Hutchinson, 2 vols. (*Newnes*, 12s. 6d. net).

**How We Recovered the Ashes**, by P. F. Warner (*Chapman & Hall*, 10s. 6d. net).

**History of Yorkshire County Cricket, 1833-93**, by the Rev. R. S. Holmes (*Constable*, 5s. net).

**Swimming**, its history and literature, by Ralph Thomas (*Sampson Low*, 10s. 6d. net).

**Great Golfers**, their Methods at a Glance, by G. W. Beldam (*Macmillan*, 12s. 6d. net).

**Ladies' Golf**, by May Hezlet, Open Ladies' Champion 1899 and 1902, Irish Ladies' Champion 1899, by instantaneous photographs (*Hutchinson*, 6s. net).

### LLOYD'S.

This world-famous institution takes its name and derives its origin from a coffee-house established in Tower Street by one Edward Lloyd about the end of the 17th century, and removed in 1692 to the corner of Lombard Street and Abchurch Lane. There were numerous rival houses in existence then, but Lloyd's was distinguished above all others, especially by his news of the movements of vessels received from various correspondents at home and abroad, in which may be found the germ of "Lloyd's List." In 1696 *Lloyd's News* was commenced, and published three times a week. But after seventy-six numbers had appeared the proprietor was so foolish as to insert a paragraph about the proceedings in the House of Lords. For this he was summoned to the bar of the House, and then he stopped the print, substituting handwriting for printing, till 1721, when *Lloyd's List* appeared, and has continued even unto this day. Besides being a news centre, Lloyd's began to be used as the centre of Marine insurance, and this business rapidly increased. In 1771 the brokers and underwriters frequenting the house, to the number of 79, resolved to find fresh and more commodious quarters, and in 1773, chiefly through the energy of a Mr. Angerstein, rooms were taken on the north-west side of the Royal Exchange, where ever since this great institution has been established. A subscription of £20 a year was required of members, and rules were laid down for the conduct of business. During the forty years of war, from 1775 to 1815, Lloyd's grew and flourished amazingly, and business flowed in from all over the world, the reorganisation of the whole institution, accomplished in 1811, adding to the general confidence in its security.

In 1870 an Act of Incorporation was applied for, and obtained in '71, notwithstanding considerable opposition.

The objects of the Institution were described as being (1) the carrying on of the business of marine insurance by members of the society, (2) the protection of the interests of members of the society in respect of shipping and cargoes and freight, and (3) the collection, publication, and diffusion of intelligence and information. To carry out the third object Lloyd's has a staff of about 1500 agents in all parts of the world constantly reporting to headquarters, where clerks are employed both day and night.

Lloyd's also maintains an extensive system of signal stations for reporting vessels, etc., which is of great benefit to the shipping community. An inquiry office is also maintained, where the relations of crew or passengers may obtain, without cost, information concerning the movements of the vessel in which they are interested. In addition to "Lloyd's List," various works are now published by the Corporation for the benefit of the mercantile and shipping communities, such as "Lloyd's Weekly Shipping Index" (a record of the movements of shipping throughout the world, published every Thursday), "Lloyd's Calendar" (an annual publication containing information of value to officers of the mercantile marine, yachtsmen, and others), and "Lloyd's Book of House Flags and Funnels" of the principal steamship lines of the world, etc. Then a "Captains' Register" is kept, consisting of a biographical dictionary of all the certificated commanders of the British mercantile marine, about 24,000 in all. The record of losses is kept in the "Loss Book."

The medal of the Society is presented by the Corporation of Lloyd's, as an honorary acknowledgment, to those who have, by extraordinary exertions, contributed to the saving of life at sea; and the Medal for Meritorious Services is granted to officers and others who, by extraordinary exertions, have contributed to the preservation of vessels or cargoes. In 1803 "Lloyd's Patriotic Fund" was established for the relief of sailors and soldiers, their relatives and dependants, who suffered in the great war. This fund is still administered by trustees, the majority of whom are members of Lloyd's, the chairman being Mr. Herbert de Rougemont, a member of the Comité of Lloyd's.

Lloyd's is, of course, open only to members and subscribers. These may take their friends in and show them round, through the underwriting rooms, the reading room, the captains' room, used for luncheon purposes, and the committee room, full of relics. Members of Lloyd's may be either underwriting or non-underwriting members. There are also annual subscribers and associates. All candidates for membership must be recommended by six members and then elected by the committee by ballot; subscribers and associates can recommend gentlemen for election to their own grades. Underwriters are required to deposit with the Committee in respect of liabilities incurred on account of marine and transport risks at least £5000 in approved securities, the dividends on which are received by the depositor. The aggregate amount thus placed at the disposal of the Committee of Lloyd's is very large, but in no way represents the total capital possessed by the underwriting members of Lloyd's. The Committee have also recently

adopted a system under which a separate guarantee, applicable only to claims on fire policies, and other policies not covering marine and transport risks, is, when the Committee consider necessary, required from members on their admission, and members who engage in such business, and who were elected before the adoption of this system, have generally furnished similar guarantees. They are also required to pay an entrance fee and an annual subscription of £21. But those members elected prior to Dec. 31st, '92, only pay an annual subscription of £16 10s. Non-underwriting members are exempted from the deposit, but pay an entrance fee, and an annual subscription of £7 7s. Subscribers pay an annual subscription of £7 7s. and associates one of £5 5s. See MERCANTILE MARINE.

### LLOYD'S REGISTER OF BRITISH AND FOREIGN SHIPPING.

This is a Society voluntarily maintained by the shipping community with the primary object of the classification of vessels. It is the recognised authority on such matters all over the world. The Society's affairs are managed by a committee of 59 members, composed of merchants, shipowners, and underwriters, elected at the principal shipping centres of the country. In technical matters affecting the Society's rules for the construction of vessels and machinery, the Committee has the advantage of the co-operation of a body of experts, 14 in number, selected by the principal institutions of the United Kingdom associated with naval architecture, engineering, and the iron and steel industry. Branch Committees of the Society are established on the Mersey and on the Clyde. Rules are published annually embodying the best current practice, and are kept abreast of the latest developments and improvements in the construction of ships and engines. In the case of new vessels, after the plans have been submitted to and approved by the Committee, the building of the vessels proceeds under the supervision of the Society's surveyors, who, when the vessels are completed, send a detailed report to the Committee, by whom the class is assigned. The highest class for iron and steel vessels is represented by the character 100A1, and for wooden vessels by A1. It is from the latter character that the phrase "A1 at Lloyd's" is derived, which is used to express a state of perfection.

In addition to the classification of vessels other duties have from time to time been entrusted to the Society. Under the authority of Government it controls the testing of anchors and chains at all the public proving-houses in the country. During the year ended June 30th, 1904, 336 miles of chain cable and 7322 anchors were tested. Lloyd's Register has, moreover, been entrusted by Parliament with the duty of assigning freeboards to vessels under the Merchant Shipping Act, 1894, and the load lines of 12,800 vessels have been dealt with by the Committee. The Society also conducts the testing of steel used in the construction of vessels and machinery. During the above-stated period 655,000 tons of steel were submitted to the tests required by the Rules.

It is a distinctive characteristic of Lloyd's Register that it is in no sense carried on with any purpose of pecuniary profit, all fees being exclusively devoted to the operations of the Society for the public advantage. To indicate

the extent of these operations, and also the confidence of the shipping community at home and abroad in the Society's classification, it may be stated that, although application for a class is entirely a voluntary matter, at the end of June, 1904, 9672 vessels of 17,716,999 tons were classed in the Society's Register Book, and 372 vessels of 901,844 tons were building at home and abroad under the supervision of a surveying staff which includes at present nearly 300 officers stationed at all the principal shipping centres of the world. During the last 6 years nearly 7,750,000 tons of new vessels have been classed by the Society.

Lloyd's Register was established in 1834 by the amalgamation of the two rival registers of shipping which then existed—viz., the "Green Book," founded in 1760 by a Committee of Underwriters, and the "Red Book," founded in 1798 by a Committee of Shipowners. Lloyd's Register issues annually to its subscribers a very bulky Register Book, containing full particulars of not only vessels classed with the Society, but also of all seagoing vessels and steel and iron vessels trading on the Great Lakes of North America. The 1904-5 edition of the Register Book contains 29,295 vessels of 100 tons and upwards. A Register of Yachts is also published annually, giving detailed particulars of upwards of 8000 yachts of all nationalities, including about 500 classed with the Society. Another Register is also issued yearly by the Society in New York, giving similar particulars of about 3000 yachts belonging to the United States and Canada. The Society publishes very complete statistical returns quarterly and annually regarding vessels building and vessels lost all over the world. See MERCANTILE MARINE. Offices: 71, Fenchurch Street, London, E.C.

### LONDON BOROUGH COUNCILS.

The London Government Act, '99, divided the administrative county of London (with the exception of the City), which had formerly been under the rule of over 120 local authorities, including Vestries, District Boards, Burial Boards, etc., into 28 Municipal Boroughs, each under a Municipal Council. A detailed summary of its provisions will be found in Session, sect. 70, ed. 1900.

The following is a list of the boroughs, with the number of aldermen and councillors assigned to each:—

Boroughs.	Aldermen.	Councillors.
Battersea . . . . .	9	54
Bermondsey . . . . .	9	54
Bethnal Green . . . . .	5	30
Camberwell . . . . .	10	60
Chelsea . . . . .	6	36
Deptford . . . . .	6	36
Finsbury . . . . .	9	54
Fulham . . . . .	6	36
Greenwich . . . . .	5	30
Hackney . . . . .	10	60
Hammersmith . . . . .	6	36
Hampstead . . . . .	7	42
Holborn . . . . .	7	42
Islington . . . . .	10	60
Kensington . . . . .	10	60
Lambeth . . . . .	10	60
Lewisham . . . . .	7	42

Boroughs.	Aldermen.	Councillors.
Paddington . . . . .	10	60
Poplar . . . . .	7	42
St. Marylebone . . . . .	10	60
St. Pancras . . . . .	10	60
Shoreditch . . . . .	7	42
Southwark . . . . .	10	60
Stepney . . . . .	10	60
Stoke Newington . . . . .	5	30
Wandsworth . . . . .	10	60
Westminster . . . . .	10	60
Woolwich . . . . .	6	36

The first election of councillors took place on Nov. 1st, 1900, and of mayors and aldermen on Nov. 9th.

The second election took place on Monday, Nov. 2nd, 1903, and considerable changes took place in the constitution of the Councils. Of the 28 Boroughs there were before the election 17 or 18 with Moderate (or Conservative) majorities, 8 with Progressive majorities, and 2 or 3 which were regarded as non-party. After the election there were 14 Councils with Progressive majorities, 12 with Moderate (or Conservative) majorities, and 2 were still non-party, as follows:—

#### Progressive.

1. Battersea.
2. Bethnal Green.
3. Camberwell.
4. Deptford.
5. Finsbury.
6. Fulham.
7. Hackney.
8. Islington.
9. Lewisham.
10. Poplar.
11. St. Pancras.
12. Southwark.
13. Stepney.
14. Woolwich.

#### Moderate or Conservative.

1. Bermondsey.
2. Chelsea.
3. Greenwich.
4. Hammersmith.
5. Holborn.
6. Kensington.
7. Lambeth.
8. Paddington.
9. St. Marylebone.
10. Shoreditch.
11. Wandsworth.
12. Westminster.

#### Non-Party.

1. Hampstead.
2. Stoke Newington.

The members of the Councils number in all 1362, and the following is an analysis of the strength of parties:—

Progressives . . . . .	616
Conservatives (Moderates) . . . . .	594
Independent Conservatives . . . . .	9
Labour . . . . .	40
Independents . . . . .	31
Non-Politicals . . . . .	72

1362

There were 705,725 electors on the register, of whom 49,375 could not vote because there was no contest in their district. The possible number of voters therefore was 656,350, of whom 310,513 or 47·3 per cent. voted.

#### Qualifications of Electors.

The elections of borough councillors in London are conducted by ballot in the same way as Parliamentary elections, and are regulated by rules issued by the Local Government Board. The persons qualified to vote at the election of Borough Councils are the "parochial electors," that is to say, the persons on the register "for the purpose of borough elections." All persons qualified to vote at a Parliamentary

and County Council election in London can vote at an election of borough councillors, with certain "separate list" voters in addition. Women, if otherwise qualified, may vote. This franchise is the same as that in the case of the elections of guardians and vestries since '94. A woman is not eligible for the office of councillor. The Mayor of a London Borough is by virtue of his office a justice of the peace for the County of London; he is not disqualified by reason of being a solicitor practising or carrying on business in the County of London or the City, but he is not to practise as a solicitor before any justices of the County of London.

### **Rates and Accounts.**

One important change effected by the '99 Act was the abolition of overseers of the poor throughout the whole of London except the City. The Council of each borough are the overseers of every parish within their borough (sect. 11), and their powers and duties are exercised by the borough councils. The principal duties of overseers related to the making and collection of the poor rates and the preparation of the valuation lists, and these duties are now performed by the councils. The town clerks have the powers and duties of the overseers as regards the preparation of lists of voters and jury lists. The Council levy but one rate to meet all central and local expenses—the general rate—but this is likely to vary in every parish within a borough, by reason of the parish remaining the final unit of rating. The general rate includes the poor rate, and is assessed, collected, and levied as if it were the poor rate. Precepts for money issued by any authority in London must be sent to the borough council at their office. The rates collected in a London borough are levied in one demand note, which is to show the rateable value of the premises, the rate in the pound, the period for which the rate is made, the purposes for which it is levied, and the amount required for each purpose. The accounts of every borough council, and of any committee appointed by them, and of their officers, are audited by district auditors appointed by the Local Government Board. The auditor has power to disallow items in the accounts, or make a surcharge on the councillors who authorised any illegal payment. Sums disallowed or surcharged must be paid over to the borough treasurer, unless an appeal be made to the Local Government Board against the auditor's decision. The Board has power to remit any disallowance or surcharge. The accounts are audited yearly for the period ended March 31st. The form in which the various accounts of the council are kept is prescribed by the Local Government Board. Where the whole of a Poor Law Union is within one borough, or where the borough comprises the whole of two or more unions, the council appoints the Assessment Committee, and the town clerk is the clerk to that committee.

**London Chamber of Arbitration.** The City Corporation and the London Chamber of Commerce, acting in concert, decided in '92 to establish a body to be called the Tribunal of Commerce or the London Chamber of Arbitration, for the settlement of trade and commercial difficulties. The procedure is as follows:—An agreement of reference is signed, on payment of a fee of one guinea at the Guildhall

by those wishing to settle any commercial dispute. Option is then given to the parties to refer the case to a single arbitrator, to three arbitrators with a majority vote, or to two arbitrators and an umpire. The arbitrator, or arbitrators, or umpire, has power to examine witnesses on oath, and to call for any documents necessary. Any party to an arbitration who so desires may be represented by a barrister or solicitor. The Chamber has prepared a model clause for insertion in trade contracts providing for the submission of disputes arising in connection with such contracts to the Chamber. A moderate scale of fees to be charged for arbitrators and umpires is arranged, yet high enough to secure the services of the best experts in the City. In ordinary cases the minimum is put at £2 2s. for the first hour and £1 1s. per hour subsequently. In complicated cases two legal officers, appointed by the Corporation, are open to consultation. These are the legal assessor—a prominent K.C. specially retained for the purpose—and the registrar. The scale of fees for consulting the legal assessor is £5 5s. for three hours, or £10 10s. per day of more than three hours. The Registrar's Office, where all information and forms can be obtained, is at No. 5, Church Passage, Guildhall Yard, E.C.

### **LONDON CHAMBER OF COMMERCE.**

Incorporated under the Limited Liability Act, Oct. '81. The L. C. of C. takes cognisance of, and action in regard to, all questions affecting the good of the community at large, which from time to time occupy the attention of the mercantile world. The affairs of the Chamber are governed by a Council. From its first formation the Chamber has adopted the principle of dividing itself into sections, each dealing with subjects of interest to particular classes of business men, and 44 trades have already been organised in this way. The Chamber has on its premises a good commercial library, and through its Statistical and Information Department inquiries on an immense variety of matters connected with commerce, etc., are conducted. The Chamber issues certificates of origin for goods exported to Russia, Italy, France, Turkey, Canada and Spain, both to members and non-members; special certificates on trade customs and usages as required; also commercial travellers' certificates for Switzerland, Spain, Roumania and Russia. Under the scheme of Commercial Education, on which the Chamber has been engaged for fifteen years past, the fifteenth examination for junior commercial certificates, and the eleventh examination for senior commercial education certificates took place during 1904, when 4695 candidates presented themselves, of whom about 50 per cent. were successful. Partly as a consequence of the granting of these certificates, and the necessity for a medium through which employers and certificated youths may be brought in contact, the Chamber has an Employment Department in active operation. A special feature of the proceedings of the Chamber is the delivery of addresses by specialists on a variety of subjects. These addresses are reported in *The Chamber of Commerce Journal* (issued monthly, price 6d., annual subscription 6s., post free), of which a new series was started in April '04. The journal deals with commercial questions of the day, and special attention is given to trade openings in all parts of the world. Amongst other matters

dealt with are commercial legislation, Customs tariffs, commercial law, Consular and other trade reports, and the proceedings of Chambers of Commerce throughout the country. **President**, Thomas F. Blackwell, Esq. **Office**, Oxford Court, Cannon Street, E.C. **Secretary and Editor**, Mr. Kenric B. Murray.

### LONDON CITY AND GUILDS INSTITUTE.

The City and Guilds of London Institute was established in 1878 by the Corporation and Livery Companies of the City of London to promote the applications of science and art to productive industry, and received the grant of a Royal Charter from H.M. the late Queen Victoria. The Institute consists of Members elected by the contributing bodies in proportion to their subscriptions, a Council, and an Executive Committee. The total income amounts to about £35,000 a year. The operations of the Institute are divided under the following heads:—(1) The City and Guilds' Central Technical College at South Kensington, the object of which is to give London a college for higher technical education in which advanced instruction is provided in those kinds of knowledge which bear upon the different branches of industry. It is a "School of the University of London," and the main purpose of the instruction given is to qualify students to become mechanical, civil, electrical and chemical engineers, technical teachers, principals, superintendents, and managers of chemical and other manufacturing works. It was built and equipped at a cost of over £120,000, and was opened in '84. (2) The City and Guilds' Technical College, Finsbury, is an intermediate college, with which have been incorporated the provisional classes started in the Cowper Street Schools in '79, and the City School of Art. The college includes day classes for those who are able to devote two or three years to systematic technical education, and evening classes for those who are engaged in industrial or commercial occupations in the daytime, and who desire to receive supplementary technical instruction in the evening. It fulfils the functions of a finishing technical school for those entering industrial life at a comparatively early age; of a supplementary school for those who are already engaged in workshops; and of a preparatory school for the City and Guilds' Central Technical College. It was opened in '83, the building and equipment having cost about £40,000. (3) The South London School of Technical Art, Kennington Park Road, provides instruction in modelling, drawing and painting from the life, and house decoration, (4) The Department of Technology, the object of which is to encourage the formation of technical classes throughout the country, and, by the publication of carefully prepared syllabuses for the guidance of the committees and teachers of these classes, by annual examinations, and also by an organised system of inspection, to place the teaching on a sound educational basis. The examinations are held during the month of May in over sixty different subjects. (5) The Leather Trades' School, in Bethnal Green Road, is entirely an evening school for apprentices and others engaged in boot and shoe manufacture. The school is conducted by a joint committee of the Institute, the Leathersellers' and Cordwainers' Companies, and the Boot and Shoe

Manufacturers' Association. **Patron and Visitor**, His Majesty the King; **Chairman of Council**, The Right Hon. the Earl of Halsbury, Lord Chancellor; **Treasurer**, S. S. Gladstone, Esq.; **Hon. Sec.**, Sir John Watney; **Assist. Sec.**, Mr. A. L. Soper. **Head Office**, Gresham College, E.C.

### LONDON CORPORATION.

The Corporation of the City of London consists of the whole body of the citizens or freemen, under the style of "the Mayor, Commonalty, and Citizens." The small portion of this great Metropolis which is comprised within the City and its liberties is divided into 27 wards, including Bridge Without. There is an alderman for this ward, but no freemen and no common councillors. Each of the other wards, with the exception of the two Cripplegate wards (which return an alderman jointly), elects one alderman and a number of common councillors varying from 4 to 16, but amounting in all to a total of 232; or, in other words, 26 aldermen and 206 commoners. An alderman is elected when a vacancy occurs, and holds office for life; the councilmen are elected on St. Thomas's Day, and hold office for one year, but are of course eligible for re-election. The electors are in each case freemen, who may have obtained their freedom by birth, apprenticeship, purchase, or gift; but who must be rated householders before they can vote at a ward-mote, as a meeting of the ward is termed. A liveryman is a freeman who, by payment of a fee, has entered the livery of one or other of the City companies or guilds, and was first so called because he was entitled to wear the livery of his company. He has the right to vote at the elections of Lord Mayor, sheriffs, chamberlain, and other Corporation officers, and also for M.P.'s for the City.

The Lord Mayor is elected on Sept. 29th by the liverymen of the several companies assembled together at the Guildhall, and as it is termed in Common Hall, and to be eligible he must have served as sheriff of London. The Livery may select any alderman thus qualified, but they almost invariably accept the names of the two senior aldermen who have not passed the civic chair. A poll, to be taken by ballot, may however be demanded, if necessary. The names of the two selected aldermen are then submitted to the general body of the aldermen, who choose usually the first, but sometimes, for a special reason, prefer the second. The Lord Mayor elect is presented to the Lord Chancellor to receive the assent of the Crown to the election; he is sworn before the retiring Lord Mayor and aldermen on Nov. 8th, and on Nov. 9th he is escorted by the citizens in procession to the Royal Courts of Justice to be presented to the Lord Chief Justice and again sworn. The mayoralty thus commenced lasts a year, but the same alderman has in rare instances been re-elected for a second, and in ancient times for even a third period of service. His public duties absorb every moment of the Lord Mayor's time, and the £10,000 annually voted by the Corporation does not anything like cover his expenses while in office. He is expected to preside during the day over meetings for public or benevolent objects, and to take part in many important ceremonies: to open schools, distribute prizes, initiate subscriptions for relief of distress; and by night to entertain eminent and distinguished personages at his official residence, or to preside at Charity Festivals

As head of the Corporation he presides at Common Hall, the Court of Aldermen, and the Court of Common Council; he presides at the justice-room of the Mansion House, and is first commissioner of the Central Criminal Court; he is a trustee of St. Paul's and a governor of the Royal Hospitals and other institutions, and of several charities. He is head of the City Lieutenancy. He is styled "right honourable," and, although not actually of the Privy Council, he attends when, on the demise of the Crown, the new sovereign is proclaimed; and at the Coronation he is present as chief butler, receiving therefor a golden cup and cover.

The present Lord Mayor is Mr. Alderman Pound (*q.v.*). The Lord Mayor's private secretary is Sir W. J. Soulsby, C.B., C.I.E., Mansion House.

The Sheriffs are Alderman Thomas Vezey Strong and Mr. George T. Woodman, J.P.

The alderman of the ward, or (in his absence) the Lord Mayor, presides over the annual ward-mote for the election of common councilmen. At a bye-election during the year the deputy may preside in the absence of the alderman. Each alderman is a justice of the peace, and may preside at the Guildhall or Mansion House justice rooms. Each is a commissioner of the Central Criminal Court.

The Aldermen are the bench of magistrates for the City, the visiting justices to the prisons; they admit freemen, and decide disputes at ward elections. When a vacancy in the aldermanic representation of the ward of Bridge Without occurs, they choose one of their number, usually the senior alderman, to fill it, whose successor in the ward he retires from is elected in the usual manner. They sit in the Court of Common Council, the full title of which is "Lord Mayor, Aldermen, and Commons of the City of London in Common Council assembled," and no business can be done unless some of each body be present.

The Common Council manages the financial and general affairs of the Corporation, has charge of its own police (see LONDON, POLICE OF), lets its lands, has full power over its funds, and has charge of certain of the Thames bridges. The work until then done by the Commission of Sewers was given to the Corporation in '98, the Commission being dissolved. To cope with this new work a Public Health Department was formed by the Corporation.

The Recorder (Sir Forrest Fulton, K.C., salary £4000, and £57 as steward of Southwark) presents the Lord Mayor elect to the Lord Chancellor and to the Lord Chief Justice, is principal adviser of the Lord Mayor, and attends him on all occasions of State ceremony. He tries cases in the Lord Mayor's Court, is one of the judges in the Central Criminal Court, and is chairman of quarter sessions for the City. This officer is appointed for life by the Court of Aldermen, but he may not exercise any judicial functions unless he is appointed by His Majesty to exercise such functions. The necessary confirmation was of course given by the Crown in the case of Sir F. Fulton, who was appointed in 1900.

The Chamberlain (the Right Hon. Sir J. C. Dimsdale, Bart., K.C.V.O., M.P., who was Lord Mayor in 1902, salary £2500) is elected by the Livery on Midsummer Day, and comes up annually for re-election. He receives the revenues of the Corporation or City cash, pays

all salaries, charges, and outgoings, and has the custody of accounts, admits all duly qualified persons to the freedom, and is custodian of the records relating to freemen. He has also jurisdiction to punish refractory City apprentices, whom he sometimes commits to Bridewell.

The Common Serjeant (Mr. Bosanquet, K.C., salary £2500) is now appointed by the Crown; he attends the Lord Mayor on all state occasions, and is present at meetings of the Courts of Aldermen and Common Council; he is a legal adviser of the Corporation, one of the commissioners at the Central Criminal Court, a judge of the Mayor's Court, and acts on certain occasions as Deputy Recorder.

The Town Clerk or Common Clerk (Mr. James Bell, salary £2000) keeps the charters and records of the City, and attends all courts held before the Lord Mayor and Aldermen. He has the special privilege of signing documents with his surname only.

The Remembrancer (Mr. Adrian Pollock, salary £2000) is the Ceremonial Officer of the Corporation, attends the Parliament House during session, and watches the interests of the Corporation in all legislative matters.

The Sword Bearer (Mr. Winzar) carries the sword, being the emblem of justice, before the Lord Mayor. The last three are appointed by the Common Council. There are a number of other officers—legal, ceremonial, and official.

See also LONDON BOROUGH COUNCILS.

### Corporation Accounts, 1894-1903.

The Corporation receipts were: 1894, £718,722; '95, £509,545; '96, £733,123; '97, £1,010,835; '98, £1,508,604; '99, £436,408; 1900, £464,396; 1901, £611,336; 1902, £917,478; 1903, £445,638; total, £7,356,099.

The principal items of this total were: rents, £1,855,494; interest on securities, £50,378; markets, £1,877,367; corn and fruit duties; £5,700; Mayor's Court fees, £65,590; judiciary fees, £23,732; and loans raised for markets, etc., £3,261,146.

The expenditure was: 1894, £720,355; '95, £499,753; '96, £740,359; '97, £1,004,048; '98, £1,332,301; '99, £422,677; 1900, £489,859; 1901, £625,006; 1902, £955,938; 1903, £463,629; total, £7,463,111.

The chief items of expense in the ten years were: charges on the City's estates, £147,325; interest on moneys borrowed, £177,993; income and property tax, £130,718; charges on the markets, £1,515,602; expenses of the magistracy, £112,893; City's proportion of police expenses, £379,596; administration of justice, £84,411; office of coroner, £24,756; allowances to Lord Mayors (with income-tax), £104,708; expenses of Mansion House, £76,819; salaries to officers, etc., £333,133; expenses of Guildhall and Law Courts, £101,673; wages to workmen and materials, £78,446; charitable donations, £249,604; honorary freedoms, £4,559; City of London Schools, £62,796; Freeman's Orphan School, £60,495; technical education, £4400; Guildhall School of Music, £25,215; sanitary expenses Port of London, £79,026; expenses of Epping Forest, etc., £39,710; celebration of the Coronation, £27,705; celebration of Queen's Diamond Jubilee, £9,786; receptions of foreign sovereigns and others, £21,073; Bills in Parliament, £16,545; City Library and Museum, £62,808; Fine Art Gallery, £29,781; debenture redemption fund, £90,000; and loans repaid, £3,538,959.

# LONDON COUNTY COUNCIL.

The Council was constituted by the Local Government Act, 1888, and is the authority for the administration of the County of London, which has an area of 116·93 miles. The Council consists of 19 Aldermen and 118 Councillors. The aldermen sit for six and the councillors for three years. Under the London County Council Electors' Qualification Act, 1900, every parochial elector is entitled to vote at the election of a London County Councillor. No elector can legally vote more than once in the county.

The last election, the sixth, took place on Saturday, March 5th, 1904. There were elected, 83 Progressives, 34 Conservatives and Unionists members, and 1 Independent. As compared with the state of parties before the election, the Progressives lost 1 seat, the Conservatives and Unionists gained 3 seats and the Independents lost 2 seats. There were elected in 1901, 84 Progressives, 32 Conservatives and Unionists (as the Moderates were renamed), and 2 Independents, as against 70 Progressives and 48 Moderates in '98, 59 Progressives and 59 Moderates in '95, 84 Progressives and 34 Moderates in '92, and 71 Progressives and 47 Moderates in '89.

## Members of the Council.

The members elected on March 5th, 1904, or since that date, to represent the various electoral divisions are given below. An asterisk denotes that the member was also in the former Council. The figures in brackets after the name of the division give the number of voters in those divisions. The list has been corrected up to the end of 1904.

† There were 56 contested elections, and 2 uncontested, the latter being at Deptford and Greenwich. Out of a total of 699,363 voters on the register in the 56 contested divisions, 319,681, or 45·7 per cent., voted, as compared with 40·8 per cent. who voted in 1901.

The highest percentages of voting at the recent elections were in the following divisions:—Stepney, 64·9; St. George, 62·7; Whitechapel, 62·3; East St. Pancras, 61·0; Dulwich, 60·2; Mile End, 59·3; Woolwich, 58·0; East Finsbury, 57·9; Norwood, 54·2; Rotherhithe, 53·9; Central Hackney, 53·7; North St. Pancras, 53·3. In 16 divisions the percentage voting was over 50. The lowest percentages were in the following divisions:—City of London, 26·6; South Kensington, 30·6; Holborn, 31·9; North Camberwell, 32·0; Strand, 32·3; Westminster, 33·3; North Lambeth, 34·9; and South-West Bethnal Green, 37·6.

 Superintending Architect, W. E. Riley.  
 Housing Manager, S. G. Burgess.

### *The Council's Work.*

The Council meets weekly, but the greater part of its real administrative work is done by its Committees. Included in the work, besides the duties imposed upon it by the Local Government Acts, are the control of the Hanwell, Colney Hatch, Canehill, Claybury, Heath, Manor, and Horton Lunatic Asylums, and villa colony for epileptics at Ewell; the great Housing Schemes (see p. 254) for the people displaced by the clearance of insanitary areas and street improvements, the control of the Tramway Systems purchased by the Council, the direction of the London Fire Brigade, of the Parks and Open Spaces of London; and under the 1903 Education Act the Council is now the authority for all public education in the county.

The net capital expenditure on the Council Tramways in South London up to March 31st, 1904 was £2,124,228, of which £140,714 had been repaid out of revenue. During 1903-4 the receipts were £536,239 and the expenditure £441,786, showing a surplus revenue on working of £94,453. After paying £100,536 for interest and sinking fund charges, with £2200 on account of income tax, a net deficiency of £8283 was left. The number of passengers carried was 133,139,085, an increase of 23,573,589 as compared with the previous year. The Council Tramways in North London, leased to the North Metropolitan Co., showed a net revenue by way of rent, etc., of £64,267, and after paying £36,610 for interest and sinking fund charges, a net profit of £27,657.

In 1904 the Council obtained Parliamentary powers to establish a steamboat service on the Thames, and accepted tenders for the construction of 30 steamboats, to be ready for use in May 1905, when the service will commence. See SESSION sect. 57.

### *London Fire Brigade.*

Since its establishment in 1866 the strength and appliances of the Brigade have been more than quadrupled, and many alterations have been made in the constitution of the force, which now consists of 74 land

stations, 18 street stations, 5 floating stations, 8 hose-cart stations, 2 hose-and-ladder-truck stations, 21 fire-escape stations, 5 steam fire engines on barges, 79 land steam fire engines, 13 manual engines, 67 horsed escapes, 45 miles of hose, 100 hose carts, 7 hose-and-ladder trucks, 1 fire float, 4 steam tugs, 9 barges, 7 skiffs, 120 manual fire escapes, 41 watch boxes, 1063 officers and men, 36 men under instruction, 17 pilots, 180 coachmen, and 308 horses (hired). The area protected by the Brigade is about 117½ square miles, including the City and County of London, and extends roughly from Highgate in the North to Sydenham in the South, and from Roehampton in the West to Plumstead in the East. Each station is connected by telephone with at least one other station of the brigade, and each superintendent's police station is in telephonic communication with a fire station. In addition several fire stations are connected with exchanges of the National Telephone Company and the General Post Office, and a large number of public buildings and business premises have by the Council's permission been placed in direct telephonic communication with the nearest fire station in each case. Every land station has a system of fire alarms fixed in the public thoroughfares, and the total number of these alarms is about 975. The cost of maintaining the brigade during the financial year 1903-4 was £235,078. Of this sum the fire insurance companies contributed £34,316 5s. 7d., the Government £10,000, and the ratepayers £182,004. The balance was made up by miscellaneous receipts. The report of the chief officer of the brigade for the year 1903 shows a decrease in the number of fires of 174 as compared with those in 1902. The number of calls for fires, or supposed fires, received during the year was 4644. Of these 1006 were false alarms. There were 238 calls for chimneys on fire. Chief Officer, Captain J. De C. Hamilton, R.N. (Retd.); Second Officer, Mr. Sidney G. Gamble, C.E.; Third Officer, Lieut. S. Sladen, R.N. Headquarters, Southwark Bridge Road, S.E.

### *Statistics.*

The assessable value of the County was in 1904 £41,078,058, a penny rate producing £171,158.

The revenue, 1903-4 (excluding tramways and working-class dwellings) was £4,725,595; and the estimated revenue, 1904-5, is: ordinary £4,510,834, education £4,064,617, total £8,575,451, including £421,419, the cash balance on April 1st, 1904.

The expenditure, 1903-4, was £4,601,813, and the estimated expenditure, 1904-5, is: ordinary £4,509,257, education £4,030,969, total £8,540,226.

The Council's rates have been as follows:—

1889-90 . . . 12½d.	1897-98 . . . 14d.
1890-91 . . . 13½d.	1898-99 . . . 14d.
1891-92 . . . 11½d.	1899-1900 . . . 13½d.
1892-93 . . . 12½d.	1900-1901 . . . 14½d.
1893-94 . . . 13d.	1901-1902 . . . 15d.
1894-95 . . . 14d.	1902-1903 . . . 15½d.
1895-96 . . . 15d.	1903-1904 . . . 16½d.
1896-97 . . . 15d.	* 1904-1905 . . . 25½d.

The gross debt was £61,131,081 on March 31st, 1904; but deducting loans due, Council properties and other assets, the net debt was £30,601,832.

\* Including 8½d. for Education, half-year's charge.

## LONDON EDUCATION COMMITTEE.

The Elementary Education Act of 1870 specially provided that a school board should be formed for London. The first board was accordingly elected only a few months after the passing of the Act (Nov. '70).

By the London Education Act, 1903, the Education Act 1902 was, with some modifications, applied to London; and the control of all education, primary and secondary, passed into the hands of the London County Council as the Education authority on May 1st, 1904.

## The Council's Scheme.

The scheme drawn up by the Council, approved by it Jan. 26th, 1904, and approved by the Board of Education March 14th, is as follows:—

"1. The London County Council shall establish for the purposes of the Education (London) Act 1903 an Education Committee, which committee shall consist of 43 members, and shall include (a) the chairman, vice-chairman, and deputy-chairman for the time being of the Council; (b) 35 persons, who shall be members for the time being of the Council; and (c) five women selected by the Council. Persons of experience in education, and persons acquainted with the needs of the various kinds of schools in the administrative county of London, shall always be included in the Committee.

"2. In addition to the said 43 members, the Council may appoint, as members of the first Committee, members of the London School Board not exceeding five in number.

"3. The first members of the Committee, other than the chairman, vice-chairman, and deputy-chairman of the Council, shall be appointed by the Council at a meeting of the Council to be held on March 22nd, 1904, and shall hold office until the ordinary day of election of committees of the Council in the month of March in the year 1906.

"4. Except as provided by Clause 3, the members of the Committee shall retire annually, and shall hold office until the first meeting of their successors; but in the year in which the triennial retirement of county councillors takes place they shall retire on March 7th.

"5. Every member of the Committee not being a member of the Council shall, after appointment or reappointment, and before being entitled to act as a member of the Committee, sign a declaration of acceptance of office on a form to be prescribed by the Council.

"6. Any member of the Committee who shall notify in writing to the Clerk of the Council his intention to resign, or who shall (except in case of illness, or for a reason approved by the Committee) be for six successive months absent from all meetings of the Committee, or who being, when appointed, a member of the Council, shall cease to be a member thereof, or who, not being a member of the Council, shall fail for the period of three calendar months to sign the declaration of acceptance of office, or shall become bankrupt, or shall file in any court having jurisdiction in bankruptcy a declaration of inability to pay debts, shall thereupon cease to be a member of the Committee.

"7. Any casual vacancy in the Committee shall be filled up by the Council as soon as conveniently may be, the appointment being

made only for the remainder of the term for which the vacating member was appointed."

The Board of Education, though approving the scheme, said they "must not be understood to accede without regret to the desire of your Council to limit the Committee so closely to members of their own body.

## Members of the Committee.

The Education Committee was constituted as follows, the names being formally approved by the Council on March 22nd, 1904:—

Members of the Council (38—3 *ex-officio*)—

J. W. Benn (Chairman of the Council).	W. J. Lancaster.
E. A. Cornwall (Vice-Chairman of the Council).	A. L. Leon.
F. P. Alliston (Deputy-Chairman of the Council).	Sir F. Mowatt.
A. A. Allen.	W. E. Mullins.
E. Barnes.	John Piggott.
E. Bayley.	W. Pope.
R. Bray.	G. H. Radford.
W. C. Bridgeman.	Arthur B. Russell.
E. Collins.	W. S. Sanders.
Sir W. J. Collins.	A. J. Shephard.
G. Dew.	Evan Spicer.
W. H. Dickinson.	James Stuart.
E. B. Forman.	C. Y. Sturge.
T. Gautrey.	J. T. Taylor.
Hon. R. Guinness.	Hon. F. Thesiger.
T. E. Harvey.	A. A. Thomas.
Rev. A. W. Jephson.	W. W. Thompson.
	G. Wallas.
	Sidney Webb.
	W. Wightman.
	T. McKinnon Wood.

## Women (5)—

Dr. Sophie Bryant.	Hon. Maude Lawrence.
Miss Margaret Eve.	Miss Susan Lawrence.
Mrs. Homan.	

## Members of the London School Board (5)—

Sir Charles Elliott.	J. G. Ritchie.
Rev. J. Scott Lidgett.	G. L. Bruce.
H. W. Liversedge.	

It was decided that the Committee should conduct its business in private, and report to the Council each week.

## London's Educational Progress.

The educational progress of London since '70 will be seen by the following table, and also the "rate" at the end of each triennial period:—

## COUNCIL SCHOOLS.

	Rate at end of each Triennial Period.	School places provided.	No. on the Roll.	Average attendance.
	<i>d.</i>			
1870	—	—	—	—
1873	'89	58,581	59,606	40,481
1876	3'0	146,074	146,031	114,380
1879	5'15	219,291	233,480	185,518
1882	6'15	280,275	295,833	238,205
1885	8'0	357,298	364,140	290,099
1888	8'37	407,636	420,914	328,578
1891	10'7	428,035	450,981	347,857
1894	10'2	468,300	488,038	390,812
1897	12'34	512,025	520,877	421,960
1900	13'37	546,483	536,019	439,744
1903	14'66	572,649	549,667	475,510
1904	—	579,030	550,329	485,343

## NON-PROVIDED SCHOOLS.

	School places provided.	No. on the Roll.	Average attendance.
1870	261,158	221,401	173,406
1873	282,936	259,543	195,662
1876	287,116	259,436	199,605
1879	271,314	235,084	182,728
1882	263,617	223,297	174,723
1885	262,175	211,711	168,712
1888	262,022	207,887	162,349
1891	258,329	210,516	162,525
1894	257,652	226,163	177,579
1897	256,896	227,568	178,257
1900	220,987	192,921	174,702
1902	218,376	215,359	175,330
1903	217,088	213,297	177,974
1904	215,121	210,141	177,884

**Subjects of Instruction.**

The general subjects of instruction in all schools include :

(a) English language—correct pronunciation, reading aloud, recitation, writing, oral and written composition, and grammar.

(b) Arithmetic—oral and written.

(c) Knowledge of the common phenomena of the external world—formation of the habit of intelligent and accurate observation, and its application, with simple experiments, to the daily life and surroundings of the scholars.

(d) \*Geography—physical features of the earth, and specially of the British Isles and the British Dominions.

(e) \*History—great persons and events in English history, and the growth of the British Empire.

(f) Drawing—from actual objects, memory and brush drawing, and hand and eye training.

(g) Singing—by note, with proper breathing.

(h) Physical exercises—according to an approved system.

(i) Plain needlework—for girls.

For older scholars.—For boys: manual instruction in woodwork and metalwork. For girls: cookery, laundry-work, household management, and cutting out garments.

One or two subjects, other than those named above, are in many cases taught to older scholars. As a rule, these extra subjects are one or more of the following: algebra, Euclid, mensuration, mechanics, chemistry, animal physiology, hygiene, botany, Latin, French, German, bookkeeping, and shorthand.

Part of the instruction for infants is given by means of appropriate and varied occupations. Bible instruction also is given.

**Teachers, Defective Children, Evening Schools, etc.**

Taking advantage of the Elementary Education Act, '91, which came into operation on Sept. 1st, '91, all the day-schools under the control of the School Board were made free. The number of teachers employed in L.C.C. schools at Lady-day 1904 was 11,829. There were also 2300 pupil teachers and probationers. The number of teachers (including pupil teachers and probationers) in non-provided schools at Sept. 1904, was 5605. Efficient instruction is provided for blind and deaf

children; and under the powers of the Elementary Education (Blind and Deaf Children) Act, '93, arrangement have been made, where necessary, for the admission of such children into suitable homes or institutions. There are also special arrangements for the instruction of physically and mentally defective children, and for the physically defective in separate centres. The number of teachers employed in the L.C.C. schools for blind, deaf, and mentally and physically defective children at Lady-day, 1904, was 305.

Advantage has been taken of the provisions of the Industrial Schools Acts and the Education Acts relating to children wandering or not under proper control, or begging or not under proper guardianship, or persistently truanting from school, or charged with felony, etc., to send such cases to industrial schools (a) under voluntary management, or (b) under public management. There are 61 of the former schools and 10 of the latter: (1) a training-school ship on the Thames; (2) two industrial schools for boys, one at Feltham and one at Mayford; (3) an industrial school for girls at Isleworth; (4) a home for little boys at Clapham Park; (5) two truant schools for boys, one at Homer-ton and the other at Highbury; and (6) day industrial schools (mixed) in Drury Lane, Brunswick Road, Poplar, and Ponton Road, Nine Elms.

Evening schools are held in every part of the Metropolis. The total number of pupils admitted this session up to Oct. 1904 was 113,400; average number on rolls at the end of October 99,000. The subjects taught are classed under the following heads: Elementary English, commercial, languages, science and art; Euclid, etc.; vocal music; cookery, laundry-work, etc.; manual training, wood-carving and metal-work. Instruction in some form of physical exercises is given in every school; in the summer months swimming is taught; and the libraries of the schools are open for the free use of the students. A small sessional fee is charged.

The expenditure on maintenance account in the financial year ending March 25th, 1904, was £3,372,203, and the revenue amounted to £3,510,867, leaving a surplus in hand of £144,664.

**Higher Education.**

The Technical Education Board of the London County Council, to which the London County Council delegated its powers under the Technical Instruction Acts, was formed in '83, and consisted of 20 members of the Council, 3 of the London School Board, 3 of the City and Guilds of London Institute, 3 of the London Trades Council, 2 of the London Parochial Charities, 1 each of the Incorporated Association of Head Masters and of the National Union of Teachers, and 2 members appointed by the Council—total, 35. The work of this Board is now entrusted to the Education Committee.

The total expenditure during the year ending March 31st, 1904, was £304,308, derived mainly from the beer and spirit duties (£186,000) and Government grants (£28,689). The expenditure is thus accounted for: Technical departments of 8 Polytechnics, £56,880; Institutions of Higher Education, £17,986; Technical Schools, £70,847; Technical Departments of Public Secondary Day Schools, £39,847; County Scholarships, £33,129; Art, Science, Tech-

\* Not required in infants schools.

nology, and Manual Instruction, £25,092; Domestic Economy, £7649; Commercial Teaching, £1782; Technical Museums, £221; Government grants, £36,686; Government grants (King's Scholars), £2731; and expenses of administration, £9314.

The work of the Council in regard to Higher Education may also be stated by giving a list of the institutions aided or conducted by the Council: viz., 5 University Schools; 8 Polytechnics; 14 Institutions conducted by the Council; 12 Technical Institutes conducted by separate governing bodies; 6 Schools of Art; 4 Evening Classes in Science, Art, and Technology; 40 Secondary Boys' Schools; 16 ditto Girls' Schools; 8 Mixed Schools; and 22 Domestic Economy Schools and Classes. The Board's Annual Report can be obtained from the Secretary, 116, St. Martin's Lane, E.C.

The last Report of the Board—issued before the Education (London) Bill, 1903, came into operation—gives a succinct account of the increase of Polytechnic Institutions and other Technical Schools which were either under the control of the Board or assisted by that Board. When the Board began its work in 1894, there were only 15 Polytechnics and Technical Institutes, while there are now 26. The number of student-hours has increased in a much larger ratio, having in certain departments quadrupled. The number of trade classes has trebled, and 39 fresh subjects are represented by those classes. Of the parents of the 614 students who gained junior county scholarships in 1903, 61·2 per cent. were workers in trades, 15·5 officials and servants, 2·7 shopkeepers and assistants, 16·4 engaged in clerical and subordinate professional occupations, and of 4·2 per cent. the occupation was not specified. Ten years ago the secondary schools in London gave very little scientific and technical instruction; but under the aid and stimulus of the Technical Education Board, 90 per cent. of the pupils in more than 40 of these schools now receive instruction in theoretical science and practical work. The scope of the work done by the Polytechnics and the other Technical Institutions may be gathered from the figures in the paragraph above. The Report of the Board includes a large map of London showing all the educational establishments within the County Council area.

### LONDON ELECTRIC LINES.

In our last edition reference was made to the action of the London County Council in calling attention to the necessity of an inquiry into the question of establishing some method of public control in the matter of underground railway schemes in London, and the subsequent appointment of a London Traffic Commission (*q.v.*). The criticism by the Council of the general undertaking of the Underground Electric Railways Co. of London was also summarised. With regard to the North and South Woolwich scheme, which was mentioned, it was understood, early in the Session of 1904, that the Bill was withdrawn. The project was to run a single line under the Thames at a cost of £233,376, there being a station at each end, penny fares, and a six-minute service. A Commons Committee passed the preamble on March 11th, with the proviso that the promoters should not be able to claim compensation if the London County Council should construct a free Woolwich subway. The Bill

was down for hearing again on March 21st, when, in consequence of this provision, it was unofficially stated that it would not proceed. At the beginning of November the Board of Trade intimated that the warning issued by the House of Lords on Aug. 6th, 1903, still held good. This was to the effect that all ordinary proposals for new "tubes" and large railway extensions should await the report of the Traffic Commission. Notwithstanding this intimation, several large schemes were notified shortly afterwards. They included a revival of the Central London project to convert the line into a circular railway by means of a loop *via* Knightsbridge, Piccadilly, the Strand, and Fleet Street; the North-East London, starting near the Monument, with termini at Cheshunt (G.E.R.) and Leyton; and the Hammersmith, City, & North-East London, to run from Hammersmith Broadway to Walthamstow. Some details of the progress of the "tube" railways in course of construction are given below.

**Central London.**—The line is 5½ miles long, starting at Shepherd's Bush, and proceeding under Uxbridge Road, Oxford Street, Holborn, and Cheapside, to the Bank. Lifts and staircases are used from the street level, and the cars are models of comfort. The fare is 2d. any distance, and 2d. return for workmen in the early morning. There are 13 stations on the route. At the half-yearly meeting of the company on Feb. 3rd, 1904, Sir Henry Oakley, chairman, presiding, dividends were declared at the rate of 4 per cent. per annum, although there were 650,000 fewer passengers as compared with Coronation year. The early morning service had been increased. The same dividends were announced for the half-year ending June 30th, and £48,737 carried forward.

**City and South London.**—The company's bill, for an extension from the "Angel" to Euston, and to take over the powers of the authorised City and Brixton line, passed committees of both Houses during the Session of 1903. At the meeting on Feb. 2nd, 1904, the dividend declared for the half-year was at the rate of 2 per cent. per annum, against 3½, there having been a comparative decrease of over a million passengers. Mr. C. G. Mott, the chairman, attributed the falling away to L.C.C. tramway competition. Arrangements had been made with other lines for through bookings, and the directors attached much importance to the Euston extension, as it would result in securing traffic from five other railways. For the half-year ending June the dividend was at the rate of 2½ per cent. per annum.

**Great Northern and City.**—This line, which was opened on Feb. 14th, 1904, is 3½ miles in length, and runs from Finsbury Park to Moorgate Street, with intermediate stations at Drayton Park, Highbury, Essex Road, and Old Street. The tunnels differ from the usual electric railway tunnel in that they are about 16 ft. in diameter, large enough to take the heaviest G.N. suburban trains, and of course widen out at the stations, where there are lifts. The whole-distance fare is 2d., with intermediate 1d. fares. At the half-yearly meeting on Aug. 15th, Sir C. Scotter said the working had been most satisfactory; they had succeeded in establishing a 2½-minute service, the whole distance being covered in 13 minutes. The extension to Lothbury was authorised, but this work was deferred.

**Metropolitan.**—For the half-years ending Dec. 1903 and June 1904 dividends of 3 per cent. per annum were announced on the ordinary stock. On June 30th an extension to Uxbridge was opened. Speaking at the meeting on July 20th, Sir C. McLaren, M.P., said that if the District Company (see below) were ready, the new electric system on the two companies' lines would be in working order at the end of the year. The official inspection of the Neasden and Baker Street section took place on Dec. 13th, and an invited party were taken by electric tram over the extension from Baker Street to Harrow, and thence over the new line to Uxbridge.

**Underground Electric Railways Co. of London.**—Under this heading are grouped the various schemes in which the company is concerned. On June 16th, 1903, the final Board of Trade inspection was held of the electrical equipment of the new portion of the District Railway between Ealing and South Harrow. The new line is about five miles in length, and brings Harrow, Sudbury, and Alperton into direct and easy communication with the City. During the Session of 1904 the Baker Street and Waterloo Railway Bill, which, among other provisions, authorised the raising of £288,000 more share capital with additional borrowing powers for £96,000, was passed after some opposition in the Commons. This arose in reference to the provision of subways at the Elephant and Castle station, but it was stated in the House on April 28th that the Company had agreed to contribute £6000 towards the cost, the Southwark Borough Council to find the remainder. At the meeting of the Underground Electric Railways Co. on Oct. 18th, Mr. Yerkes said the power-house at Chelsea was nearly finished and that the District, the Great Northern, Piccadilly and Brompton, the Charing Cross, Euston and Hampstead, and the Baker Street and Waterloo Railways would all take their energy from it by agreement. The electrification of the District was making good progress, and by Jan. 1st, 1905, it was hoped that electric trains would be running on part of the line, probably from Ealing to the Mansion House. Work was going on satisfactorily on the three other lines, but there might be some slight delay in laying the permanent way and building the stations of the Baker Street and Waterloo. The board was authorised to raise any additional sums they might require up to £850,000.

**Waterloo and City.**—The sole purpose of this line, which has no intervening stations, is to connect Waterloo Station with the City. The length of the line is given at 1 mile 4 furlongs 6<sup>80</sup>/<sub>100</sub> chains. The South-Western Co. guarantee a 3-per-cent. dividend. During the half-year ending Dec. 1903 the expense of working was 46<sup>44</sup>/<sub>100</sub> per cent., and for the half-year ending June 1904 it was 47<sup>55</sup>/<sub>100</sub>. The railway earned its 3 per cent. per annum, carrying forward £355 and £422 each half-year respectively.

**London Parochial Charities.** The parochial charities of the City of London are now administered by a number of trustees, nominated by various bodies, who are as follows:—**Nominated by the Crown,** Messrs. C. J. Drummond, W. H. Fisher, M.P., the Rev. R. H. Hadden, E. Bond, M.P., and Earl of Lytton; **by the Corporation,** Sir J. Savory, Bart., Messrs. C. T. Harris, C. J. Todd, and T. H.

Ellis; **by the London County Council,** Messrs. Evan Spicer, Sidney Webb, Edric Bayley, and Sir W. J. Collins; **by the Ecclesiastical Commissioners,** Messrs. C. A. Whitmore, M.P., and Sir Lees Knowles, Bart., M.P.; **by the University of London,** Sir Philip Magnus; **by University College,** Sir William Ramsay, K.C.B., F.R.S.; **by King's College,** Sir O. Roberts; **by the City and Guilds of London Institute,** Mr. L. B. Sebastian; **by the Bishopsgate Foundation,** Rev. T. Gear; **by the Cripplegate Foundation,** Mr. H. J. Felton. During the last few years over £170,000 out of the funds of the trust have been devoted to the securing of open spaces, while about £33,000 a year is given in support of the various Polytechnics that have recently been started. The foundation is the largest for charitable purposes in the kingdom. The annual income now is £95,500. **Offices,** 3, Temple Gardens, E.C. Clerk, Mr. H. Howard Batten.

**London Police Courts and Magistrates.** **City:** Mansion House, presided over by the Lord Mayor or an Alderman. **Guildhall,** presided over by one of the Aldermen, in rotation, for a week at a time. **Metropolitan:** Bow Street, Covent Garden: Sir A. De Rutzen, R. H. B. Marsham, and E. W. F. Fenwick, Esqs. **Clerkenwell,** King's Cross Road: J. R. W. Bros and E. C. T. D'Eyncourt, Esqs. **Lambeth,** Lower Kennington Lane: A. A. Hopkins and C. K. Francis, Esqs. **Great Marlborough Street:** G. G. Kennedy and G. L. Denman, Esqs. **Marylebone,** Seymour Place: H. Curtis Bennett and A. C. Plowden, Esqs. **Southwark,** High Street, Borough: G. Paul Taylor and C. M. Chapman, Esqs. **North London,** Stoke Newington Road: E. S. Fordham, Esq. **Thames,** Arbour Square, Stepney: F. Mead and J. Dickinson, Esqs. **Westminster,** Vincent Square: Horace Smith, Esq., and ——. **Worship Street:** Haden Corser and A. R. Cluer, Esqs. **West London (West Kensington),** Vernon Street: J. Rose and R. O. B. Lane, K.C., Esqs. **South-Western,** Lavender Hill: E. W. Garrett, Esq. **Greenwich and Woolwich:** E. Baggallay and R. Kettle, Esqs. **West Ham,** West Ham Lane, Stratford: R. A. Gillespie, Esq.: and the Borough Justices. **Hours of Sitting:** Mansion House, 12 to 2; Guildhall, 10 to 4; Greenwich, 10 to 1.30; Woolwich, 2.30 to 5. All other Courts, 10 to 5.

## LONDON, POLICE OF.

### Metropolitan Police.

Established by Act of Parliament (1829), and the protection of the district by watchmen was discontinued by that statute and entirely intrusted to the then newly appointed force. The Metropolitan police area is 688<sup>31</sup>/<sub>100</sub> sq. miles, and embraces all places within a radius of fifteen miles of Charing Cross, except the City of London, which has its own police. The Metropolitan police have jurisdiction on the river Thames. The Thames police are selected from sailors, and patrol in boats and steam launches. The Metropolitan police are also employed in H.M. dockyards, and in the principal military stations of the War Department.

The strength of the force for the year ending Dec. 31st, 1903, latest returns, is 16,517, consisting of 30 superintendents, 526 inspectors, 2113 sergeants, and 13,848 constables.

The supreme government of the Metropolitan police is vested in the Commissioner appointed

by and acting under the control of the Home Secretary.

**Commissioner, E. R. Henry, Esq., C.S.I. Assistant Commissioners**—Sir A. C. Bruce, Major E. F. Wodehouse, and M. L. Macnaghten, Esq.; and five Chief Constables.

The Metropolitan Police Force is divided into two groups. The uniform branch is responsible for the general policing of the Metropolis, the preservation of order, and the prevention of crime. The Criminal Investigation Department is more immediately responsible for the detection of crime.

The staff of the latter is distributed between a central office at New Scotland Yard and the divisions, where the work is carried on under the charge of a local inspector immediately responsible to the divisional superintendent.

The **Convict Supervision Office** registers the names and particulars of discharged convicts on licence, and other criminals under police supervision in England, and retains photographs and marks of these persons, under the provisions of the Prevention of Crimes Act of '71. This office is in a position to do much practical good by assisting, in co-operation with various recognised private organisations, for the benefit of discharged prisoners who are desirous of leading an honest life.

The **Criminal Identification Department** maintains registers, available to all police forces, containing information as to the antecedents of all the more troublesome criminals released from prison. The means of identification adopted is the Finger Print system, which in July 1902 superseded the less accurate Bertillon method of identifying by corporal measurements. The Finger Print system of identification has answered every expectation, and it is being rapidly adopted on the Continent, in America, and in the Colonies.

Among other departments of the Metropolitan police are the **Executive Branch**, and the **Public Carriage and Lost Property Branch**.

The financial administration is under the control of the **Receiver for the Metropolitan Police District**, A. R. Pennefather, Esq., C.B., who is appointed by the Crown, and has the direction of contracts of every description, the management of all police buildings, buys the sites of and erects new buildings, and all the property of the police force is vested in him. He is also the receiver for the Metropolitan police courts, and the police court buildings are vested in him. The income of the force for the year 1903-4 was £2,176,836, and of the pension fund £256,274.

The rateable value of the Metropolitan area for 1903-4 was £48,570,769. The police rate is now fixed at 9d. in the £, of which 4d. in the £ is payable out of the Local Taxation Account under the Local Government Act of '88. The pay of the Metropolitan Police force for 1903-4 was £1,461,140.

### **City of London Police.**

This force is under the control of a Commissioner, who is appointed by the Mayor, Aldermen and Common Council, subject to the approval of His Majesty the King. The total strength of the force now (1904), is 1056, consisting of 1 Assistant-Commissioner, 1 superintendent Executive Department, 1 superintendent Detective Department, 3 chief inspectors of districts, 1 chief detective inspector, 15 district inspectors, 20 station in-

spectors, 9 detective inspectors, 74 sergeants, 12 detective sergeants, and 865 constables.

The **detective department** consists of 1 superintendent, 1 chief inspector, 9 inspectors, 12 sergeants, 33 constables, and 24 plain-clothes patrols. In addition to the above, 50 constables and 1 sergeant are employed on private service duty at the expense of persons engaging their services, the charge being at the rate of £135 per annum for each man. The force has also a surgeon, receiver, chief clerk, and several assistant clerks.

The **Police area** is divided into three districts, each containing two divisions (exclusive of the chief and detective offices) and under the immediate charge of a chief inspector, assisted by five district inspectors and six station inspectors.

The total cost of the force is about £155,000 per annum, one-fourth of which is paid from the City's cash, the remainder by a rate of 6d. on the assessable rental of the City. The City Police, unlike the Metropolitan Police Force, is supported entirely by the citizens, without Imperial aid. The pay of the force is considerably in advance of any other similar body in the United Kingdom.

**Chief Clerk and Superintendent, Mr. Frank Francis.**

**Headquarters, Old Jewry, Cheapside.**

### **LONDON, PORT OF.**

In moving (on April 6th, 1903, in the House of Commons) "that leave be given to bring in a bill to establish a Commission for the administration of the Port of London, and for transferring to the Commission the undertakings of certain dock companies, and certain powers and duties of the Conservators of the River Thames and the Watermen's Company, and for other purposes connected therewith," Mr. Gerald Balfour explained that the measure was the outcome of the valuable and comprehensive report presented by the **Royal Commission** appointed in 1900 to inquire into the administration of the Port of London (see p. 375, ed. 1904). In its main outlines the bill followed the recommendations of the Commission, though with some not altogether unimportant exceptions, the nature of which he indicated in detail. Trinity House was not included in the scope of the operation of the measure, and it was left open to the new authority to retain or dispose of the dock companies' warehouses as they thought fit; the municipal financial guarantee was to be given by the London County Council alone, and the constitution of the new port authority differed very materially from that proposed by the Commission. The scheme of the bill proposed a body of 40, constituted as follows:—

#### **Appointed Commissioners:**

London County Council . . . . .	8
City Corporation . . . . .	2
Admiralty . . . . .	1
Board of Trade . . . . .	1
Trinity House . . . . .	1
Railway Companies . . . . .	1

#### **Elected Commissioners:**

Payers of dues on goods . . . . .	10
Payers of dues on ships . . . . .	10
Wharfingers . . . . .	4
Owners of river craft . . . . .	2

Total . . . . . 40

With a view to the protection of the ratepayers, it was provided that if at any time the revenues of the port are insufficient to meet its obligations and the interest upon the port stock, and recourse has to be had to that guarantee, the London County Council should then be entitled to move the Board of Trade, and the Board of Trade should have power to make an order upon the dock authority fixing the dues upon goods and ships at such a rate as will make good any deficiency that may have arisen.

Mr. Sydney Buxton did not agree with the proposed constitution of the new authority. He hoped that the House would insist that the London County Council should have fair representation on this body, and they could then leave it to the representatives of the Council to see that the interests of the ratepayers were properly conserved. The bill was then brought in and read a first time.

On the second reading (May 13th, 1903), the rejection of the measure was moved by Sir J. Dixon-Hartland, chairman of the Thames Conservancy Board, and seconded by Mr. D. Morgan, chairman of the Surrey Commercial Docks Co. The amendment was eventually withdrawn, and the second reading agreed to, the bill being then referred to a joint committee of the two Houses.

This committee met late in June, 1903, to proceed with what was necessarily to be a prolonged inquiry, having regard to the magnitude and variety of the interests involved. Viscount Cross was chosen chairman. The committee ultimately decided that the Commission should be constituted as follows:—

#### Appointed Commissioners:

London County Council . . . . .	9
City Corporation . . . . .	1
Admiralty . . . . .	1
Board of Trade . . . . .	1
Trinity House . . . . .	1
Railway Companies . . . . .	1

#### Elected Commissioners:

Payers of dues on ships trading to the docks . . . . .	7
Payers of dues on ships trading to the river . . . . .	3
By traders . . . . .	8
Waterside manufacturers . . . . .	2
Wharfingers . . . . .	4
Owners of river craft . . . . .	2

Total . . . . . 40

Sir J. Banbury, M.P., a trustee and manager of the Stock Exchange, urged on behalf of the promoters the payment of the dock companies in stock instead of cash, but the committee accepted an amendment of the London County Council enabling the Council to pay the companies in cash instead of stock. It was also settled that when the arbitrators—who were to be Lord Allerton, Sir Francis Mowatt, G.C.B., and Mr. A. T. Lawrence, K.C. (now Sir A. T. Lawrence)—should have found the full value of the stock, they were not to make any allowance for compulsory sale. The provisions as to arbitration were stated to be almost identical with those settled in the Water Act of last year. A clause was added providing that, in the event of any part of the interest on the guaranteed stock having to be met by the London County Council during three successive years, the number of Commissioners to be appointed by the Council should be increased

to eighteen. It was also arranged that there should be a statutory Warehouse Committee, a third of the representation of which would be given to the wharfingers.

After thirteen sittings the Committee reported the bill as amended on July 13th. But the measure had still to be considered in Committee of the whole House, and as many points were to be brought forward therein the Prime Minister eventually proposed a resolution, which was agreed to, under which the further proceedings on the measure stood suspended until the 1904 Session. During that Session nothing was done, but it is probable that some progress will be made during the 1905 Session.

#### The London County Council Bill.

The London County Council resolved, on Nov. 8th, 1904, to promote a Bill during the 1905 Session, "for and relative to the transfer to a public authority to be constituted by the Bill of the undertakings of the London and India Docks Company, the Surrey Commercial Dock Company, and the Millwall Dock Company, and of the powers, rights, duties, property and liabilities, or some of them, of the Conservators of the River Thames, and of the Master Wardens and Commonalty of Watermen and Lightermen of the River Thames, commonly called the Watermen's Company, and of the Court of Master Wardens and Assistants of the Watermen's Company, and for conferring on such public authority various rights and powers for the management of the undertakings proposed to be transferred, and of the Port and Docks of London and any other matters proposed to be transferred or vested in such public authority under the Bill, and for making the necessary financial provisions in connection therewith, and for defining the Port of London for the purposes of the Bill."

The Bill proposes to establish a Port Commission consisting of 40 members, 24 to be appointed by the Council, 4 by the City Corporation and Government departments, and 12 by trade and shipping interests.

**London Reform Union.** Inaugurated Oct. '92 A non-party organisation having branches in many of the Metropolitan parliamentary constituencies. Its object is to improve the municipal government of London, the administration of its public affairs, and the collective organisation of its civic life. The Union is in general agreement with the progressive policy of the London County Council. It has instituted an annual "Citizen Sunday" in London, and does much educational work. The Chairman of the Union is Mr. E. A. Cornwall, J.P., L.C.C., the Treasurer Mr. Sydney Buxton, M.P., and the Secretary Mr. F. W. Galton. Offices, Trafalgar Buildings, Northumberland Avenue, Charing Cross, W.C.

**London Salvage Corps.** This corps was first established in 1866 by the Fire Insurance Companies on the transfer of the London Fire Establishment to the Metropolitan Board of Works, when the Metropolitan Fire Brigade was organised. The Corps is maintained by contributions from the principal Insurance Companies. There are five stations, all in connection by telephone, and also in communication with the Fire Brigade, in various parts of the Metropolis, and the men and plant are highly efficient. The number of fires attended by the Corps during 1903 was as

follows: Inside the Metropolitan area, 2575; outside, 145; total, 2720. At nearly all of these, services of a valuable character were rendered on behalf of the Offices interested. The staff of the Corps consists of 1 chief officer, 5 superintendents, 11 foremen, 20 1st-class men, 21 2nd-class men, 50 3rd-class men, and 8 coachmen. Only men of the Royal Navy are taken. The following is a list of the stations: Commercial Road, E., Supt. Adams; Southwark Bridge Road, S.E., Supt. Blyth; Shaftesbury Avenue, W., Supt. Allen; Upper Street, Islington, Supt. Morgan; and Watling Street, City, Supt. Paskins. The Watling Street Station is the Headquarters of the Corps, and the Commanding Officer, Lt.-Col. Fox, resides there.

**London Traffic, Royal Commission.** A Royal Commission, consisting of Sir David M. Barbour, K.C.S.I., K.C.M.G. Chairman, Earl Cawdor, Viscount Cobham, Lord Ribblesdale, Sir J. C. Dimsdale, Bart., K.C.V.O., M.P., Sir J. P. Dickson-Poynder, Bart., D.S.O., M.P., Sir R. T. Reid, G.C.M.G., M.P., Sir Francis Hopwood, K.C.B., C.M.G., Sir J. Wolfe Barry, K.C.B., F.R.S., Sir G. C. T. Bartley, K.C.B., M.P., Charles S. Murdoch, Esq., C.B., Felix Schuster, Esq., and George Gibb, Esq., with Mr. L. L. Macassey, B.A., B.Sc., as Secretary, was appointed in February 1903 to inquire into the means of locomotion and transport in London, and to report (a) As to the measures which they deem most effectual for the improvement of the same by the development and inter-connection of railways and tramways on or below the surface, by increasing the facilities for other forms of mechanical locomotion, by better provision for the organisation and regulation of vehicular and pedestrian traffic, or otherwise; and (b) As to the desirability of establishing some authority or tribunal to which all schemes of railway or tramway construction of a local character should be referred, and the powers which it would be advisable to confer upon such a body.

### LONDON WATER SUPPLY.

The Metropolitan Water Area covers a district of 620 square miles in extent, which comprises the whole of London and parts of Middlesex, Herts, Essex, Surrey, and Kent.

The population supplied by the Metropolitan water companies on Dec. 31st, 1903, numbered 6,509,817, and the total quantity of water supplied during the year 1903 was 77,200,000,000 gallons; of this amount nearly 56 per cent. was drawn from the Thames, 22 per cent. from the Lea, and 22 per cent. from springs and wells. The average daily supply was 33 gallons per person and 218 gallons per house. The total authorised capital of the Companies was in 1903 £23,987,503, of which £20,746,232 had been issued. Of this £10,323,093 was ordinary stock, and £10,423,139 preference and debenture stock. In 1903 the income of the Companies amounted to £2,589,152, and the working expenses to £1,209,575, the net profit for the year being £1,036,438.

### Metropolitan Water Board.

The Metropolitan Water Act, 1902, constituted a Water Board, called the "Metropolitan Water Board," for the purpose of purchasing and carrying on the undertakings of the eight Metropolitan water companies—viz., the New River, East London, Southwark and Vauxhall,

West Middlesex, Lambeth, Chelsea, Grand Junction, and Kent.

The Water Board consists of 66 members appointed by the county councils and other authorities within the water area, as follows: London County Council, 14; City of London, 2; Westminster, 2; the other Metropolitan boroughs (27), one each; West Ham, 2; the county councils of Essex, Herts, Kent, Middlesex and Surrey, 1 each; the urban districts of East Ham, Leyton, and Walthamstow, 1 each; the combined urban districts of Buckhurst Hill, Chingford, Loughton, Waltham Holy Cross, Wanstead and Woodford, 1; the combined urban districts of Beckenham, Bromley, Chislehurst, Penge, Bexley, Dartford, Erith, and Footscray, 1; the urban districts of Tottenham and Willesden, 1 each; the borough of Ealing and the urban districts of Acton and Chiswick, 1; the urban districts of Brentford, Hampton, Hampton Wick, Hanwell, Heston and Isleworth, Sunbury, Teddington, and Twickenham, 1; the urban districts of Edmon-ton, Enfield, and Southgate, 1; the urban districts of Hornsey and Wood Green, 1; the borough of Kingston and the urban districts of East and West Molesey, Esher and the Dittons, Ham, Surbiton, Barnes, the Maldens and Coombe, and Wimbledon, 1; the Thames Conservators and the Lea Conservancy Board, 1 each. The chairman and vice-chairman are elected by the Water Board, either from the members, or from outside the Board, and are unpaid.

The first election of the Water Board took place early in 1903, under regulations issued by the Local Government Board, and the members then elected held office till June, 1907.

Chairman, Sir R. Melvill Beachcroft.

Vice-Chairman, Mr. Glass.

Clerk, Mr. A. B. Pilling.

Comptroller, Mr. F. E. Harris.

Chief Engineer, Mr. W. B. Bryan.

District Secretaries, Mr. A. E. Pinnell (East London District), Mr. J. Wilson (Grand Junction District), Mr. T. E. Barnett (West Middlesex District), Mr. Montagu Watts (Southwark and Vauxhall District), Mr. A. Dickson, jun. (Kent District), Mr. Jas. Serle (New River District), Mr. S. H. Gill (Chelsea District), Mr. H. Wilkins (Lambeth District).

Offices, Savoy Court, Strand, W.C.

On June 24th, 1904, the undertakings of the Companies, with the exception of the New River Company, passed to and vested in the Water Board, who also took over all the debts and liabilities of the Companies, including their debenture stock.

A Court of Arbitration to decide the amount of the purchase-money and various other questions arising between the Water Board and the Companies, was appointed by the Act, and consisted of the Rt. Hon. Sir Edward Fry, Sir Hugh Owen, G.C.B., and Sir John Wolfe Barry, K.C.B. The Court commenced their sittings for hearing the claims of the Water Companies in October 1903. The Companies claimed sums amounting to about £60,000,000.

The Arbitration Committee of the Board reported, Dec. 9th, 1904, that the total of the award in cash payable to the Companies under the awards of the Court of Arbitration would amount to £30,662,323, representing, on the respective bases on which the stock had been issued, £33,564,281 in 3 per cent. water stock. The costs of the Board and the Companies'

stamp duty on vesting expenses of Court of Arbitration, of winding up not included in the awards, of the Metropolitan Water Act, 1902 and Directors' Compensation, were taken at £850,000, representing £917,266 of water stock. The total amount of water stock issued in respect of the acquisition of the undertakings would thus be as follows:

Compensation awarded to the companies	£33,564,281
Other items above referred to	917,266

Deduct Chamberlain's sinking fund	34,481,547
	200,000

£34,281,547

The awards to the several companies were:

East London	£3,900,000
New River	5,967,123
Grand Junction	3,349,500
West Middlesex	3,524,000
Lambeth	4,301,000
Southwark and Vauxhall	3,603,000
Chelsea	3,305,700
Kent	2,712,000
Staines Reservoirs Joint Committee	—

£30,662,323

The following statement represents the approximate annual saving to the ratepayers, consequent on the acquisition of the water undertakings:—

Profits of the water companies in the year 1903-4	£1,079,078
Add payments to Chamberlain's Sinking Fund in the same year	40,652
Add directors' fees	32,538
	£1,152,268

Annual charges to be met by the Board:

Interest on £34,281,547 of water stock	£1,028,446
Annual cost of composition for stamp duty on and management of the stock	29,000
	1,057,446

Approximate annual saving . . . £94,822

It must further be noted that the awards of the Court of Arbitration had been based on anticipations of future additional profits, and that if those expectations were realised the profit which would accrue to the ratepayers would proportionately increase. Substantial economies resulting from amalgamation might also be anticipated.

**Lord Chamberlain.** The Lord Chamberlain of England has the control of the establishment attached to the chapels royal; of officers and servants attached to the royal chambers, except of those of the bedchamber; and over the medical men of the Household. The royal tradesmen are appointed by him. He directs all great royal ceremonies, receives all applications to attend levees and drawing-rooms, superintends the royal wardrobe and the jewel house at the Tower, and licenses theatres and plays, his power extending to the cities of London and Westminster, and certain other parts of the Metropolis, as well as to those places within which the sovereign may reside occasionally. The power of licensing theatres

elsewhere belongs to the justices. Theatres licensed by letters patent from the Crown do not, even in the foregoing places, require the Lord Chamberlain's licence. One copy of every new play, prologue, or epilogue,—or new addition to an old play, prologue, or epilogue,—intended to be produced at any theatre in Great Britain, must be sent to the Lord Chamberlain at least seven days before it is first acted or produced. An account of the theatre where, and the time when, it is to be acted or produced, must be signed by the manager. In the event of its being disallowed by the Lord Chamberlain, either before or after the expiry of the seven days, it must not be presented. It is lawful for the Lord Chamberlain to disallow it, if he considers it fitting for him so to do, "for the preservation of good manners, decorum, or the public peace." A fine of £50 may be levied on any person who presents a piece either before it has been allowed, or subsequent to its being disallowed, while the licence of the theatre where it was presented becomes void. The Examiner of Stage Plays is Mr. George Alexander Redford.

**Lord Great Chamberlain.** A State office of great antiquity entirely distinct from that of Lord Chamberlain of the Household. The Lord Great Chamberlain assists, with the Earl Marshal, at the ceremony of the introduction of new peers; he issues tickets for the opening and prorogation of Parliament, and orders of admission for viewing the House of Lords when Parliament is not sitting. He arranges the preparation of Westminster Hall for a coronation, the trial of a peer, or for any other ceremony taking place therein. He walks on the right of His Majesty when he opens Parliament in person. The office is hereditary, and at present is held by Lord Cholmondeley.

## LUNACY RETURNS, 1904.

The fifty-eighth report of His Majesty's Commissioners in Lunacy showed that on Jan. 1st, 1904, there were, in England and Wales, 117,199 lunatics, idiots, and persons of unsound mind under their cognisance, as compared with 113,964 on Jan. 1st, 1903, and 110,713 on Jan. 1st, 1902. The net increase for the year was 3235. The average annual increase in the total number of lunatics for the ten years to 1903 was 2513. Taking the total number of lunatics, the proportion per 10,000 of the population was 34·71 on Jan. 1st, 1904, as compared with 34·14 on Jan. 1st, 1903, 33·55 on Jan. 1st, 1902, and 33·27 on Jan. 1st, 1901. In '59 the proportion was 18·67 per 10,000; in '69 it was 23·93; in '79, 27·54; in '89, 29·65; in '99, 33·11. The increase in the ratio has been almost entirely due to the increase in the pauper class of lunatics. Turning to the assigned causes of insanity, hereditary influence appeared in the report as the most potent cause, but "intemperance in drink" was put down as responsible for 22·8 per cent. of the male and 9·5 per cent. of the female cases. The proportion of the cases attributed to old age was stated to be slightly on the increase.

The fifty-first report of the Inspectors for Ireland showed that on Jan. 1st, 1903, there were in Ireland 22,138 lunatics, as compared with 21,630 on Jan. 1st, 1902, and 21,169 on Jan. 2nd, 1901. There were 17,580 in district asylums, 169 in the Dundrum Central Asylum, 745 in private asylums and institutions, 3539

in workhouses, and 105 single Chancery patients in unlicensed private houses. Of the total 11,503 were males and 10,635 females. The figures showed an increase of 508 for the year. The proportion of lunatics under care per 10,000 of the population was 49·9 in 1902, as compared with 48·7 in 1901, 47·4 in 1900, 34·4 in '90, and 25 in '80. The recovery rate during 19·2 averaged 34·5 per cent. of the admissions.

The forty-fourth report of the Commissioners for Scotland showed that on Jan 1st, 1903, there were 16,658 insane persons in Scotland, as compared with 16,288 on Jan. 1st, 1902, an increase of 370. Of the total 14,191 were pauper patients, 2416 private patients, and 51 were maintained at the expense of the State. The males numbered 7994 and the females 8664. The proportion of lunatics (private and pauper) per 10,000 of the population was 35·8 on Jan. 1st, 1903, as compared with 35·3 on Jan. 1st, 1902, 30·7 in '91, and 26·3 in '81. The recovery rate in 1902 was 39·7 per cent. of the admissions.

A Royal Commission was appointed in August 1904 to consider the existing methods of dealing with idiots and epileptics, and with imbecile, feeble-minded, or defective persons not certified under the Lunacy Laws; and, in view of the hardship or danger resulting to such persons and the community from insufficient provision for their care, training, and control, to report as to the amendments in the law or other measures which should be adopted in the matter, due regard being had to the expense involved in any such proposals and to the best means of securing economy therein. The Commission consists of the Marquis of Bath (Chairman), Mr. W. P. Byrne, C.B., Mr. Charles Hobhouse, M.P., Mr. Frederick Needham, M.D., Mr. H. D. Greene, K.C., M.P., Mr. C. E. H. Chadwyck-Healey, K.C., the Rev. H. N. Burden, Mr. W. H. Dickinson, Mr. C. S. Loch, and Mrs. Pinsent.

### LUXEMBURG.

The King of the Netherlands, William III., was Grand Duke of Luxemburg until his death in Nov. 1890, when Adolph, Duke of Nassau, succeeded him. The Grand Duke was b. July 24th, 1817, and in '51 married Adelaide, Princess of Anhalt. The heir-presumptive is Prince Wilhelm, b. April 22nd, '52, who married in '93 Marie Anne, daughter of the Duke of Braganza. By the Treaty of London, '67, Luxemburg is declared neutral territory, and since '73 forms a Catholic Bishopric. For commercial purposes the Grand Duchy is included in the German Zollverein. The Chamber of Deputies consists of 45 members, elected directly by the cantons for six

years (half retiring every three years). Area, 998 sq. m.; pop. 236,543, with the exception of about 3500 individuals all Roman Catholic. Capital, Luxemburg, pop. 21,000. Revenue, 1902, £525,645. 1903, £520,300; expenditure, 1902, £524,980, 1903, £509,346; public debt, 1903, £446,640, 1904, £443,256; industries, chiefly mining (iron and steel) and agriculture. There is also a province of Luxemburg, belonging to Belgium, of which it forms the south-eastern corner; capital, Arlon.

Minister of State, P. Eyschen.

British Minister, Sir Henry Howard, K.C.M.G., C.B. (residing at the British Legation at The Hague, Netherlands).

**Luzzatti, Signor**, Italian Minister of the Treasury since Nov. 2nd, 1903, is a politician who has long held a prominent position in the Italian Parliament. He was Minister of the Treasury in 1891 in the first Rudini Cabinet, and again in '06. He is an admirer of the English school in economics, and has written largely on economic subjects in the Italian press; while his contributions to the reviews have made his name known far and wide as an authority on financial and economic subjects. He was the founder in '66 of the "People's Bank of Milan," which originated that great movement in Italy (see p. 47). Signor Luzzatti is a member of the Right. See ITALY.

**Lyttelton, Lt.-Gen., the Hon. Sir Neville Gerald, K.C.B.**, Chief of the General Staff and First Military Member of the Army Council, was b. in 1845, educated at Eton, entered the Rifle Brigade in '65, and served with it in the repulse of the Fenian raid on Canada in '66, in the Jowaki campaign in India, and in the Egyptian campaign of '82. He was A.D.C. to Lord Spencer in Ireland, '68-73; Military Secretary to Sir J. Adye at Gibraltar, and to Lord Reay at Bombay, '83-90; Assistant Adjutant-Gen., '95-7, and Assistant Military Secretary at the War Office, '97-8. He commanded the 2nd British Brigade in the Soudan campaign of '98, and was promoted to the rank of major-general for his distinguished service. After a short interval at Aldershot, he went out to South Africa, and took a prominent part in the operations in Natal, first as brigadier and subsequently as General commanding a Division. In February and March 1901 he organised the pursuit of De Wet in Cape Colony and the Orange River Colony, and then took over the command of the forces in Natal and South-Eastern Transvaal. When Lord Kitchener left South Africa on the conclusion of peace he was appointed to succeed him, and in Feb. 1904 he was given his present appointment.

## M

**MacDonald, Sir Claude M.**, G.C.M.G., the British Minister to Japan, is the son of Major-General J. O. Macdonald, and was b. in 1832. He was ed. at Uppingham and Sandhurst. Entering the 74th Highlanders in '72, he served through the Egyptian campaign of '82, and in the Soudan of '84, attaining the rank of major. His first active diplomatic work was done at

Zanzibar as Agent and Consul-General there in '87. In '88 he was appointed H.M. Commissioner on the West Coast of Africa, and afterwards became Commissioner and Consul-General in the Oil Rivers Protectorate. He was made a K.C.M.G. in '92. In Jan. '96 he was appointed H.M. Envoy Extraordinary and Minister Plenipotentiary at Peking, and in

1900 had to undergo a terrible siege during the Boxer outbreak, after which he was transferred to Japan.

**Mackenzie, Sir Alexander Campbell**, Mus.D. St. Andrews, Cambridge and Edinburgh, LL.D. Glasgow, and D.C.L. MacGill Univ. Canada, was b. at Edinburgh 1847. He studied as violinist in Germany from '57 to '62, and then became King's Scholar at the Royal Academy of Music, London. His compositions are numerous, and include many orchestral works, rhapsodies, and overtures, besides works for the violin. Of these latter perhaps the best known are his "Pibroch," composed for Sarasate, his "Benedictus," a set of Scottish pieces entitled "From the North," and a violin concerto, brought out and very favourably received at the Birmingham festival of '85. Among his other compositions may be mentioned three operas, "Colomba," "The Troubadour," and "His Majesty," the two former produced at Drury Lane by Mr. Carl Rosa, and the latter at the Savoy Theatre by Mr. D'Oyley Carte; "The Story of Sayid," a cantata produced at the Leeds festival in '86; "Jason," a cantata for Bristol; "The Dream of Jubal," first heard at Liverpool; "The Rose of Sharon," an oratorio written for the Norwich festival; "Veni, Creator Spiritus," first given at Birmingham in '91; the oratorio "Bethlehem," written for the Chicago Exhibition and first heard in England at the Albert Hall in '94; a "Scottish Concerto" for the pianoforte, and the music to "Ravenswood," "Coriolanus," and "The Little Minister," performed at the Lyceum and the Haymarket. His latest works are, "The Cricket on the Hearth," an opera; "London Day by Day," an orchestral suite for the Norwich Festival of 1902, and the "Coronation March." Sir A. C. Mackenzie was elected Principal of the Royal Academy of Music in Feb. '88, and in '92 was appointed conductor of the Philharmonic Society's concerts. Knighted '95. Clubs: Athenæum, Garrick, Arts. Address: R.A.M., 4, Tenterden St., Hanover Square, W.

**Maclaren, Ian** (Rev. J. Watson, M.A., D.D.). B. in 1850 at Manningtree, Essex, of Scottish parents, who removed to Perthshire four years later. Ed. at Edinburgh University, where he graduated '70. Studied theology at New College (Edin.) and Tübingen. Ordained minister of the Free Church, Logiealmond, Perthshire, in '75. Called to Free St. Matthew's, Glasgow, in '77. Translated in '80 to Sefton Park Church, Liverpool, one of the most important congregations of the Presbyterian Church of England. Received Hon. D.D. in '95 from St. Andrews University, and a similar degree in '07 from Yale University, where he was Lyman Beecher lecturer in '06. Till '93 Dr. Watson was known as a popular preacher and able minister; but in that year he acquired additional distinction and wider fame by writing a series of Scottish idylls for the *British Weekly*. When collected and published in book form under the title of "Beside the Bonnie Brier Bush," they became widely popular, and have now reached a circulation of 200,000 in Great Britain and a much larger figure in America. The *nom de plume* "Ian Maclaren" did not long conceal Dr. Watson's identity, and the Drumtochty of his idylls was soon identified with Logiealmond, his first charge. "The Days of Auld Lang Syne," a second series of idylls, followed in '95, "Kate Carnegie" in '96, "A

Doctor of the Old School" in '97, "Afterwards, and other Stories" in '98, "Young Barbarians" in 1901, and "His Majesty Baby" in 1902. Dr. Watson's religious publications include "The Upper Room," "The Mind of the Master," '96, "The Cure of Souls" and "The Potter's Wheel," '97, "Companions of the Sorrowful Way" in '98, "Church Folk," "The Doctrines of Grace" in 1900, "The Life of the Master" in 1902, and "Homely Virtues" in 1903. Clubs: Savile, London, Athenæum. Liverpool, and Royal Liverpool Golf Club. Address: 17, Croxteth Road, Sefton Park, Liverpool.

**Maeterlinck, Maurice**, the Belgian author, was b. in 1862. The following is a list of his works, some of which have been translated into English and have attracted considerable attention in this country:—"La Princesse Maleine," published in '92; "Pelléas et Mélisande" (which has been dramatised and represented in London), '94; "Alladine et Palomides," '94; "Aglavaine et Selysette," '97; "Douze Chansons," '96; "Le Tresor des Humbles," '97; "La Mort de Tintagiles"; "La Intruse," and "La Sagesse et la Destinée" (all '98). M. Maeterlinck has published translations of other authors' works and written prefaces to them. He is also the author of the dramas "Ariane and Barbebleue" and "Sœur Béatrice," published in German in '90, "Monna Vanna" (prohibited in 1902, but the London Maeterlinck Society gave private performances of it), and of "Joyzele," produced at Paris in 1903.

**Manchester College**, founded in Manchester 1786, now at Oxford, "exists for the purpose of promoting the study of Philosophy, Theology, and Religion, without insisting upon the adoption of particular doctrines." No subscription or doctrinal statement is required either of trustees, professors, or students. Exhibitions and free admission to lectures and classes are given to students for the ministry, without restriction as to the sect in which they will minister. The lectures are open to all members of Oxford University without payment of fees. The new buildings at Oxford, which have cost £55,000 in all, were opened by the President, Mr. H. R. Greg, in Oct. '93. Principal, Rev. James Drummond, M.A. (Oxon.), LL.D., D.Litt. (Dublin).

**Marconi, William**, the electrical engineer and pioneer of wireless telegraphy, was b. at Griffone, near Bologna, in '74. His father was an Italian, his mother an Irishwoman. He was ed. at Leghorn and Bologna Univ. It was at Bologna that his system of wireless telegraphy first attracted attention. In '96 he visited England, became acquainted with Sir William Preece, and with his invention sent messages across the channel from Penarth, near Cardiff, to Weston-super-Mare. The Italian Minister of Marine then interested himself in Mr. Marconi, who at Spezia and elsewhere succeeded in sending messages from the shore to an ironclad ten miles out at sea. He afterwards set up installations of wireless telegraphy between the South Foreland and the East Goodwin light-vessel, the South Foreland and Wimereux in France, Harwich and Chelmsford. The system was made use of for the Naval Manœuvres in '99, and definitely adopted by the Admiralty in 1900. The value of the system has since been amply demonstrated, and its use is continuously extending. In Dec. 1901 Mr. Marconi succeeded in com-

municating across the Atlantic Ocean, receiving at St. John's, Newfoundland, wireless messages despatched from Poldhu, Cornwall. In 1902 he set up a station at Glace Bay, Nova Scotia, and on Dec. 21st succeeded in sending through messages to King Edward VII., the King of Italy, and the *Times*. He received the Cross of the Italian Order of the Crown from the King of Italy in Sept. 1902, the thanks of the Italian Chamber of Deputies in Jan. 1903, and the freedom of the City of Rome in the following May. Inaugurated regular daily news service on board ship by wireless telegraphy June 1904. Hon. D.Sc. Oxford 1904. See SCIENCE.

## MARRIAGE LAW AND REGULATIONS.

To make a marriage valid, it must not be bigamous; nor may the parties be within the prohibited degrees of relationship. Their genuine consent is necessary; and likewise absence of insanity and of incurable impotence. The due formalities in connection with the ceremony have also to be observed. On either of these grounds the Court may nullify a marriage, if application is made within a reasonable time. If either party is a minor, the consent of a parent or guardian is, by English Law, required as a preliminary; but a marriage would not be nullified simply because such consent had not been obtained. A marriage with a foreigner, valid in this country, may prove invalid in his own country if not in accordance with its law.

### *Marriage Regulations.*

In Great Britain marriage can be had in four ways—by special licence, by common licence, by publication of banns, and before a registrar or some other "authorised person." In the case of a licence, one of the parties must have resided at least fifteen days in the parish or district where the ceremony is to be performed.

(1) The common licence can be obtained at the registry office of the bishop of the diocese, or from any surrogate of such bishop, or at the Faculty Office, or the Vicar-General's Office, Doctors' Commons, London, E.C. One of the parties must personally apply for the licence, and make affidavit that there is no legal impediment to the marriage. The fees amount to from £2 2s. 6d. to £3 3s. The common licence fixes the time and place of the ceremony.

(2) The special licence can only be obtained by one of the parties attending at the Faculty Office, Doctors' Commons. The granting of special licences rests solely with the Archbishop of Canterbury, who considers each application on its merits. On an average about 40 per annum are issued. The fees amount to about £30, and the licence empowers the parties to be married at any time, in any place, and without previous residence in that place.

(3) In the case of banns, they must be published in the church of the parish in which both parties or each of them reside for three separate Sundays, and the ceremony must be performed within three months of the final publication in one of the two churches, a certificate of the publication in the other church being given to the minister performing the ceremony. After three months the banns become useless. Marriages can also be solemnised in church within three months of the

issue of a registrar's certificate, as explained below.

(4) If the marriage is to be before a registrar, or some other authorised person, one of the parties must give notice to the registrar of the district, in which he must have dwelt for seven days. If the parties are in two districts, notice must be given to the registrar of each district. Notice will then be placed on the notice board of the office for twenty-one days, after which the certificate issues and the marriage may be celebrated (a) at the superintendent registrar's office without a religious ceremony, or (b) in any building registered for marriage in presence of the district registrar. The fees for the marriage are 2s. to the superintendent registrar, and 5s. to the registrar before whom the marriage is solemnised, and 2s. 7d. is charged for each certificate of marriage. If desired, the presence of the registrar may be dispensed with in registered buildings, other than Church of England churches, certified to the Registrar-General as places of religious worship, and for him may be substituted any "authorised person." In such a case a fee of 4s. is to be paid to the superintendent registrar on the issue of a certificate for a marriage, or if the marriage is by licence an additional fee of 6s. 6d. The registrar may also issue a licence which dispenses with some of the above formalities. The fees are, for the licence, £2 4s. 6d. to the superintendent registrar, and 10s. to the registrar.

All marriages, except those by special licence, must be performed between the hours of 8 a.m. and 3 p.m. All marriages must be registered, if performed by a clergyman of the Church of England, by the clergyman, who transmits a copy to the superintendent registrar; in other cases by the district registrar, or the registering officer of the Friends, or the secretary of the synagogue among the Jews.

In Scotland the regulations for a Regular Marriage are very much the same as in England. Banns are proclaimed in the parish church (Established) or the Episcopal church, and the certificate of such proclamation being produced is sufficient authority to a minister to celebrate the marriage. Application to a registrar can also be made, and a certificate of publication of notice of marriage is equivalent to a certificate of banns. The verbal or written expression, in the presence of two witnesses, of mutual consent to take each other for husband and wife also constitutes marriage, if one of the parties has been resident in Scotland for 21 days immediately preceding.

A marriage between British subjects may legally be solemnised on an English man-of-war at a foreign station by a clergyman of the Established Church, though no banns be published, or any licence or certificate obtained. The Foreign Marriage Act, 1892, provides that all marriages abroad, where a British Embassy, Legation, or Consulate exists, between parties one of whom is a British subject, solemnised in the way prescribed by the Act, shall be valid. Marriages in England between British and Foreign subjects may be declared invalid abroad, although valid in England, unless all the legal requirements of the foreign country have been complied with, and inquiry as to these should be made of a consul of the country in question.

## Statistics, 1894-1903.

Year.	Marriages.		Year.	Marriages.	
	Number Registered.	Rate per 1000.		Number Registered.	Rate per 1000.
1894	226,449	15·0	1899	262,334	16·5

1898	255,379	16·2	1903	260,710	15·6

Marriage with a Deceased Wife's  
a Sister.

Before 1533 marriages of consanguinity and affinity were wholly governed by Canon Law. Such marriages were voidable (1533—1835). In the latter year Lord Lyndhurst's Act made past marriages of affinity valid, future marriages void. The House of Commons rejected the prohibitory clause as regards marriage with a deceased wife's sister, but afterwards were persuaded to accept it temporarily. In 1847 a Royal Commission was appointed to examine the marriage laws, and from '49 up to the present day, a period of more than fifty years, attempts have been made, both in the Lords and the Commons, to carry the Bill making marriage with a deceased wife's sister legal, but eventually they have always failed. As a rule, the Commons have carried the Bill by a large majority, but it has been thrown out in the Lords. In '96, however, the Bill was carried by the House of Lords, but went no further. The Colonial Bill, often passed in the House of Commons and in the House of Lords, to make marriages of this class legally contracted in the colonies legal also in England, and the Scotch Bill, having a similar object, have also never been carried, though there are not wanting high authorities who pronounce such marriages legal in Scotland even now, without any special permissive legislation. It may be added that marriage with a deceased wife's sister has been specially legalised under the sanction of the Crown in all the Australian colonies, in Canada, Barbados, Ceylon, Mauritius, New Zealand, South Africa, Orange River, Natal, and Jersey. In every Christian country in the world, except the United Kingdom, it is legal. Mr. Reid, Prime Minister of the Commonwealth of Australia, wrote to the Imperial Government on Nov. 4th, 1904, expressing his strong views that it was unjust to Australian citizens that the full recognition accorded to their marriage and its consequences in Australia should be taken from them when they removed to another part of the empire; and urging that an Act should be passed providing that "marriages between persons of British race which are valid according to the laws of that part of the empire in which they are celebrated should be considered equally valid in the United Kingdom."

The headquarters of those opposed to the existing law are the offices of the **Marriage Reform Association** (Secretary, Mr. T. Paynter Allen), 2, Dean's Yard, Westminster.

Defending the law as it stands is the **Marriage Law Defence Union** (Secretary, Mr. E. H. Blackett-Ord), Church House, Westminster.

## Husband and Wife.

"Husband and wife are one, and that one the husband" is a quaint generalisation which, if never literally applicable, does approximately describe the effect of the Common Law as unmodified by Equity and, later, by legislation. For the old law—which is still in force as regards those who are not affected by the Married Women's Property Acts, see 1902 ed.

The **Married Women's Property Act, 1882** (which does not extend to Scotland) applies, for the most part, to women (a) married on or after Jan. 1st, '83, or (b) married before, but coming into possession of property, or rights to property, after that date. The general effect of this Act (as amended by the Act of '93) is that a married woman has become capable of acquiring, holding, and disposing of, by will or otherwise, any property as if she were unmarried. She can make contracts in respect of and to the extent of her separate property, present or future; and may sue or be sued thereon accordingly. Every contract entered into by her, otherwise than as an agent, is deemed to be binding upon her separate property, whether she has or has not any such property at the time of contracting. On the same principle, she may sue or be sued for wrongs, either alone, or jointly with her husband. To the extent of her separate property, she is also liable for her antenuptial debts and wrongs; and in this matter her husband is no longer liable beyond the value of any property which he may have acquired or become entitled to through her. And again, should her husband become unable to maintain himself and the children, and (if necessary) the grandchildren, her separate property must be utilised for this purpose.

The only portion of her property which a married woman cannot bind and cannot dispose of is that which she is restrained from anticipating. The income of any such property, which is actually in her possession, can be attached under a judgment of the Court, but not future income. But no restraint against anticipation in a settlement made by a woman herself is valid against her debts contracted before marriage; and no settlement by a woman is more valid against her creditors than a like settlement by a man—that is, it will be worthless if based on fraud whether actual or implied. Likewise, any investment by a husband in his wife's name is invalid against creditors, if it is proved to be fraudulent. And a gift or assignment by a husband to, his wife of property which still continues in his disposition, or in his reputed ownership, would also be void against creditors, quite apart from fraud, unless registered as a Bill of Sale. But even since these Acts, husband and wife are treated as one person, with reference to any claim to exemption from Income Tax. In estimating the total amount, their separate incomes must be added together, unless that of the wife is actually earned by her, and, at the same time, their joint income does not exceed £500.

Marriage does not necessarily make the wife an agent of her husband for the purpose of entering into contracts, even though she has no separate property. He is only bound when he has given her authority, express or implied, to pledge his credit. If they are living together the husband is obliged to pay his wife's debts incurred for "necessaries" (things suitable to

her position as his wife and required at the time of purchase) unless he proves that he has already sufficiently provided for her maintenance. If they are living separate, the burden of proof is on the creditors to show that the husband remains liable—as he would do if his wife, having left him with his consent or for some reasonable cause, receives no adequate allowance; always supposing that her right to it has not been forfeited by unchastity which he has neither connived at nor condoned.

The father is, as a rule, entitled to the **custody and control of the children.** But on the application of the mother the court has power to arrange for the custody of any child, having regard to the welfare of the child and the wishes and conduct of both parents. After the father's death the mother becomes guardian of the children, either alone or jointly with any guardian appointed by the father.

As regards the disposition of property after death of husband or wife, see 1902 ed.

### **Restitution of Conjugal Rights.**

A suit may be brought for this purpose by either husband or wife, not being themselves guilty of a matrimonial offence. It must be preceded by a request to the respondent to resume cohabitation, couched in conciliatory terms. A decree for restitution results in monetary advantages to the petitioner, the respondent being compelled to settle portions of his or her property on the petitioner, but neither party can be compelled to live with the other. A failure to comply with the decree is legal desertion and ground for a judicial separation, or, coupled with adultery, for divorce.

### **Judicial Separation.**

A decree for judicial separation may be obtained either by the husband or by the wife on the ground of adultery or cruelty, or desertion without cause for two years or upwards, or non-compliance with an order for the restitution of conjugal rights. The Court has power to order such alimony for the wife, and to make such provision for the custody of the children as it may think proper. The separation may be ended at any moment by the deliberate consent of the parties separated to a renewal of cohabitation. What is equivalent to a judicial separation can now in many cases be granted to a wife by magistrates in petty sessions or other court of summary jurisdiction, or in case of conviction on indictment, by the convicting court, by virtue of the Summary Jurisdiction (Married Women) Act, '95. The relief may be granted to any married woman whose husband shall have been convicted summarily of an aggravated assault upon her, or whose husband shall have been convicted of an assault upon her and sentenced to pay a fine of more than £5 or to a term of imprisonment exceeding two months, or whose husband shall have deserted her, or having been guilty of persistent cruelty to her, or wilful neglect to provide reasonable maintenance for her or her infant children, shall by such cruelty or neglect have caused her to leave and live separately from him. By sect. 5 of the Licensing Act, 1902 the above Act is to extend to cases of habitual drunkenness; and not only the wife, but the husband, can apply summarily for a judicial separation on that ground.

### **Divorce.**

Till 1858 complete dissolution of marriage, or divorce, could only be obtained by Act of Parliament (as in Ireland now). The Matrimonial Causes Act, '57 established the Divorce Court, since incorporated in the High Court of Justice (Probate, Divorce, and Admiralty Division); and this Court has power to grant a divorce at the suit of the husband on proof of the wife's adultery, and at the suit of the wife on proof of the husband's adultery, coupled with cruelty or desertion without reasonable cause for upwards of two years, or non-compliance with an order for restitution of conjugal rights, also for certain aggravated forms of adultery, including bigamy and incestuous adultery. The House of Lords has held "cruelty" to include injury or the reasonable apprehension of injury to life, limb, or health (bodily or mental). A charge of cruelty must be supported by evidence other than the petitioner's. Desertion may be either actual or implied. Adultery is inferred from circumstantial evidence. A divorce cannot be obtained if the petitioner has connived at or condoned the offence, or if the petition is presented in collusion with the other side. The Court has a discretion where the petitioner is guilty of cruelty, acts conducing to the misconduct alleged, desertion, adultery, or unreasonable delay. The Court, in granting a divorce, has absolute discretion as regards custody of children, costs, or maintenance. The decree pronounced in the suit is called a decree nisi, and has no legal effect till it is made absolute, six months later; and during this period the King's Proctor can, and often does, intervene to show cause why the divorce should not be made absolute, on the ground of collusion between the parties, or of some material fact having been kept back from the knowledge of the Court.

**Master and Servant, Law as to.** In the case of domestic servants the hiring is subject to a month's notice (from any date), or the payment of an extra month's wages (not board wages). A governess or tutor is usually entitled to three months' notice. It may generally be taken that if a servant is paid by the day, week, or month, he is entitled to a day's, week's, or month's notice. A servant may, however, be dismissed without notice or compensation for (1) being absent without leave, (2) utter incompetency, (3) wilful disobedience to reasonable orders, or (4) gross moral misconduct. The death of the master puts an end to the hiring. A master is not bound to give a character to a servant, but if given it must be truthful, and if given *bonâ fide* it is privileged, and not actionable. A master is liable for the acts of his servant, as, for instance, where a coachman, through careless driving, causes damage to another person or their property, though he would not be liable if the servant were acting without his knowledge or authority. Apart from special arrangement, a servant cannot be compelled to pay for accidental breakages. A master is not liable for any medical attendance unless he actually authorises it.

**Matsugata, Count,** Japanese statesman, was b. in 1835, and springs from the Satsuma clan. After the revolution of '68 he was appointed Governor of the province of Tosa, and then became Assistant Minister of Finance. He

was appointed as the representative of Japan at the Paris Exhibition of '78, and on his return home took successively the portfolios of Home Affairs and Finance ('81). He at once entered on the arduous task of restoring the currency of the country to a healthy condition. Paper currency to an enormous amount was in circulation at a discount of over 80 per cent. as compared with the silver currency; but his vigorous measures saved the situation, and in three years the paper currency was reduced in quantity and put on a par with silver. He has twice been Prime Minister, and visited England in 1902.

**Maxim, Sir Hiram S.**, who was knighted on Jan. 1st, 1901, is the well-known chief engineer and director of Messrs. Vickers, Sons & Maxim, Ltd. He was born at Sangersville, Maine, U.S.A., in 1840, and educated at the ordinary public schools there, but principally by himself all through his strenuous and successful career. He was early employed in machine works, and became a draughtsman at Boston and New York. His inventions in regard to electric lighting and machinery are numerous, but his fame rests chiefly on the automatic system of firearms which bear his name. He has also largely interested himself in the production of smokeless powder; and some few years back his attempts to solve the problem of aerial navigation attracted much attention. Address: Thurlow Park, Norwood Road, West Norwood.

### MEDICAL SCHOOLS (LONDON).

The following list comprises most of the Medical Schools in London. Particulars will be found of the number of beds, in. and out-patients treated at the hospitals to which the schools are attached, together with the length of term, fees payable, and some interesting special features.

**Charing Cross**, Chandos Street, W.C.: beds 300, in-patients 2000, out-patients 20,000; fees, 115 guineas for general students, 55 guineas for dental students, and by instalments 126 guineas and 61 guineas respectively; term, 5 years.—**Special Features.** Winter and summer lectures on anatomy, bacteriology, biology, dental surgery, medicine, ophthalmology, etc. **Secretary:** J. F. Pink.

**Guy's**, London Bridge, S.E.: beds 602, in-patients 8191, out-patients 128,051; fee, 30 guineas per annum; and an entrance fee of 20 guineas to first-year students, 10 guineas to third-year students; term, 5 years.—**Special features.** Special classes held for students preparing for examinations of the University of London and other higher examinations. Prizes and scholarships awarded to students in their various years. **School Secretary:** S. H. Croucher.

**King's College Hospital**, Lincoln's Inn Fields, W.C. Beds, 220. Students have all the facilities of the extensive laboratories of King's College. In addition to the regular complete courses for the M.B. degree of the various Universities and for the diploma of the Conjoint Board, special classes are devoted to preparation for the primary and final F.R.C.S. examinations. Particulars as to scholarships, fees, courses of study, etc., on application to the Secretary, King's College, Strand, W.C.

**London Hospital**, Whitechapel Road, E.: 820 beds, 13,120 in-patients, 182,905 out-patients; major operations, 2796; fee, 120 guineas; term, 5 years.—**Special features.** The scheme of

education at this hospital differs from that of others in that it introduces all the students, without special payment as a matter of course, to the advantages afforded by the valuable appointments, medical and surgical. In connection with the department for diseases of the skin there is now established and in regular working order a department for phototherapy. All resident officers are provided with free board and rooms. **Secretary:** Munro Scott.

**London (Royal Free Hospital) School of Medicine for Women**, 8, Hunter Street, Brunswick Square, W.C.: beds (at the Royal Free Hospital, Gray's Inn Road, W.C.), 165; in-patients, 2640; out-patients, 39,776; maternity cases, 132; attendances, 120,151. Fees for University of London students: Preliminary Science, £25; Medical course (4 years), £135 in one sum or £145 in four instalments. Fees for other students, £140 in one sum or £150 in four instalments.—**Special features.** The above school is the only school of medicine for women in London, and has about 200 students. The practice of the Royal Free Hospital is reserved for the students of the school, and senior students can also hold posts at the New Hospital for Women. Resident and other appointments at the hospital are open to students after qualification. **School Secretary:** Miss Douie, M.B.

**London School of Tropical Medicine:** is connected with the Seamen's Hospital, Royal Albert Docks, is under Government auspices, and has done splendid work on its special lines. **Secretary,** P. Michelli.

**Middlesex Hospital**, Berners Street, Oxford Street, W.: beds, 340. The composition fee is 135 guineas. There are 2 entrance scholarships of £100 and £60, and one of £60 open to students of Oxford and Cambridge Universities, the examinations for which are held in September. A Residential College in Cleveland Street, W., accommodates 30 students.—**Special Features.** A new wing containing 40 beds and special research laboratories are entirely devoted to patients suffering from cancer. There are 18 resident appointments open to competition annually. **Dean:** J. Murray, F.R.C.S.

**St. Bartholomew's**, Smithfield, E.C.: 744 beds, 7264 in-patients, 137,305 out-patients. Fees, 30 guineas entrance, and 30 guineas annually for five years.—**Special features.** Of the 744 beds, 231 are allotted to medical cases, 335 surgical, 25 diseases of the eye, 32 diseases of women, 51 to general and isolation cases, while 70 are at the Convalescent Home at Swanley. Ten house physicians and ten house surgeons are appointed annually as medical officers of the hospital. The senior medical officers are provided with rooms by the hospital authorities, and receive a salary of £80 a year. The total number of clinical appointments open to students is: to qualified men 34, and to students not having a diploma 1072. No fee is now required for any appointment whatever. The total value of the scholarships and prizes awarded annually is £900. **Warden:** Mr. W. D. Harmer, M.C. Cantab.

**St. Mary's**, Paddington, W.: beds 281, in-patients 4023, out-patients 22,619, attendances 42,311; fees, £140; University students, £63.—**Special features.** All resident medical officers appointed by competitive examination. All clerkships and dresserships are of four months' duration, instead of the usual three months, in order to afford each student a maximum of clinical work. Special clinical demonstrations

Mutual Assurance with Moderate Premiums.

# Scottish Provident

ESTABLISHED  
1837.

## Institution.

INCORPORATED  
1848.

Head Office: 6, ST. ANDREW SQUARE, EDINBURGH.

THE PREMIUMS are so moderate that, at usual ages for Assurance, £1,200 or thereby may generally be secured from the first for the yearly payment which would elsewhere assure (with profits) £1,000 only—the difference being equivalent to an immediate and certain Bonus of 20 per cent.

Examples of Premiums for £100 at Death—with Profits.

Age next Birthday	25	30*	35†	40	45	50
During Life ..	£1 17 5	£2 2 4	£2 8 6	£2 16 6	£3 8 2	£4 3 2
25 Payments ..	2 9 8	2 13 11	2 19 3	3 5 11	3 15 11	4 8 8
15 Payments ..	3 7 5	3 13 2	3 19 11	4 7 11	4 18 6	5 11 2

\* A Person aged 30 next birthday may secure £1000 at death by a yearly payment, during life, of £21 3s. 4d. Or he may secure £1000 by 25 payments of £26 19s. 2d., being thus free of payment before age 55.

† At age 35 next birthday the Premium ceasing before age 60 is, for £1000, £29 12s. 6d., being about the same as many offices require during life. To Professional Men and others whose income depends on health, the limited payment system is recommended.

THE WHOLE SURPLUS goes to the Policy-holders, on a system at once safe and equitable—no share being given to those by whose early death there is a loss to the common fund.

The Surplus at the latest Investigation was £1,581,000.

Over 60 per cent. of the Members who died during the last Septennium were entitled to Bonuses which, notwithstanding that the Premiums do not as a rule exceed the non-profit rates of other Offices, were, on the average, equal to an addition of over 50 per cent. to the Original Assurances.

ACCUMULATED FUNDS exceed £13,000,000.

Endowment Assurances, with profits—Special Class.

*Prospectus with full information on application.*

Branch Offices in Glasgow, Aberdeen, Dundee, Birmingham, Bristol, Cardiff, Leeds, Liverpool, Manchester, Newcastle, Nottingham, Belfast, and Dublin.

by members of the hospital staff, two weekly during the session. **Secretary:** B. E. Matthews, B.A.

**St. Thomas', Albert Embankment, S.E.:** beds 602, in-patients 6299, out-patients 21,372, attendances 99,265; annual composition fee, 30 guineas; term 5 years.—**Special features.** Separate wards for the treatment of infectious cases, of diseases peculiar to women, of diseases of the eye, and of children under six years of age. New operating theatres equipped in the most modern way, and supplied by the Plenum system with filtered air. A rearranged and enlarged out-patient department for casualty cases. A Röntgen ray department, with separate rooms for the application of the Finsen light treatment of lupus. A clinical laboratory and a laboratory of pathology. Commodious school buildings, which provide accommodation completely fulfilling modern requirements. **Secretary:** G. Rendle, M.R.C.S.

**University College, Gower Street, W.C.:** beds 188, in-patients 2695, out-patients 42,569, attendances 148,992; fees, 150 guineas; term, 5 years.—**Special features.** The faculty of medicine is part of the organisation of University College, London, and is on a university basis. One of the chief characteristics is the strength and completeness of the scientific training. Clinical instruction is given in University College Hospital. Qualified medical men are admitted for short terms in order to prosecute special studies. The annual value of entrance scholarships, exhibitions, and prizes awarded in connection with the examinations of the faculty is about £900. **Principal:** T. Gregory Foster, Ph.D. **Dean of the Faculty of Medicine:** Prof. Sidney Martin, M.D., F.R.S.

### MEDICAL SOCIETIES.

**General Medical Council.** The Council deals with all matters affecting the profession. There are separate Registrars for England—H. E. Allen, LL.B.; Scotland—J. Robertson, 54, George Square, Edinburgh; and Ireland—R. J. Roe, 35, Dawson Street, Dublin. **President,** Sir W. Turner, K.C.B., M.B., F.R.S. **Office,** 299, Oxford Street, W.

**British Medical Association.** The Association numbers about 19,000 members, and expends upwards of £1500 a year in scientific investigation, scholarships, and committees,—such as examination of the action of chloroform; and a committee on therapeutics, which recently issued a valuable report. The Association in the United Kingdom is divided into 7 branches, and there are also 26 Colonial branches, the Association extending its influence throughout Greater Britain. The annual subscription is 25s. per annum. The organ of the Association is the *British Medical Journal*. **General Secretary,** Guy Elliston. **Offices,** 429, Strand, London, W.C.

**Royal College of Physicians, Pall Mall East.** confers the F.R.C.P., M.R.C.P. and L.R.C.P. The President is Sir Wm. S. Church, Bart., K.C.B., M.D.; and the Treasurer, Sir Dyce Duckworth, M.D. **Registrar,** E. Liveing, M.D. **Secretary,** W. Fleming.

**Royal College of Surgeons of England.** The Royal College of Surgeons in London was established in the year 1800. By a charter granted in '43 the name of the College was altered to that which it now bears. The

nucleus of the present Museum was the celebrated Hunterian collection; this was purchased by the Government after John Hunter's death, and, under certain conditions, handed over to the College. The Library (**Librarian,** V. G. Plarr), which is kept up for the use of Fellows and members of the College, contains about 54,000 volumes. The examination for the L.R.C.P. and M.R.C.S. is held conjointly with the Royal College of Physicians at the Examination Hall, on the Victoria Embankment. That for the F.R.C.S. is held by the College of Surgeons in the same building. Full particulars of all the examinations will be found in the College Calendar. **Secretary,** S. Forrest Cowell, 40, Lincoln's Inn Fields, London, W.C.

See pp. 151-2 as to the medical training of women.

### MEDICAL SUMMARY, 1904.

#### Cancer.

In March 1902 the Royal College of Physicians and Royal College of Surgeons issued a scheme for cancer research to be carried out systematically, and an appeal for funds to carry out the project was issued under distinguished auspices. Similar projects have also been started in Germany and the United States. The scheme embraces the provision and equipment of laboratories to be devoted exclusively to cancer research, and the collection of statistical, dietetic and topographical information. H.R.H. the Prince of Wales became President of the Cancer Research Fund, and five Trustees were appointed, with Mr. Henry Morris, F.R.C.S., as Hon. Treasurer. Dr. E. F. Bashford is Superintendent of Cancer Research and Director of the Central Laboratory. The General Secretary is Mr. F. G. Hallett. Donations to the Fund can be sent to the office, Examination Hall, Victoria Embankment.

Fresh interest was added to the cancer problem by a paper read before the Royal Society on Dec. 10th, 1903, by Prof. Farmer, F.R.S., and Messrs. Moore and Walker (*Brit. Med. Journ.*, Dec. 26th, 1903). "The conclusion at which they arrived is that the malignancy of tumours is intimately connected with the reduction of the normal (somatic) cells of the body into reproductive tissue." It is matter of common knowledge that the tissues of the body are built up of units termed cells. Each cell is provided with a nucleus, which in its turn is a structure of much complexity. The multiplication of the cells is accomplished by the division of each individual into two fresh cells, the process being characterised by a series of remarkable changes in the nucleus. This body may at this period of its activity be compared to a spindle with two poles and an equatorial plane. In this plane are arranged a number of delicate thread-like bodies, often of a V-shape, and with their apices directed to the axis of the spindle. They are termed **chromosomes**, and are observed each to split lengthwise into two similar filaments, the halves of each chromosome being drawn to the poles of the spindle—one to each. Thus two daughter-nuclei are formed, each possessing a number of chromosomes equal to that of the original nucleus. This is the usual process of nuclear division in the cells of the ordinary tissues of the body. But in the reproductive cells the process is very

different. In these cells the chromosomes of the nuclei are arranged longitudinally to the axis of the spindle, and divide transversely. "Further, it is seen that these chromosomes are present in only half the number proper to the species. This is a most remarkable fact, and is constant throughout the higher animals and plants." In their investigations into the minute anatomy of malignant growths, the authors found "a series of nuclear and cellular changes which presented a very remarkable similarity to the changes which take place during the production of normal reproductive tissue." The causes which produce these changes must, the authors believe, be sought among those stimuli, some of which are known to favour the development of malignant growths—*e.g.* continual irritation.

In a paper read before the Royal Society on Jan. 21st, Drs. Bashford and Murray gave an account of their researches in the Laboratory of the Cancer Research Fund. They examined a large number of malignant growths taken from the following animals: the cow, heifer, dog, horse, mare, sheep, pig, mouse, cat, hen, parakeet, salamander, cod, gurnard, and trout. They point out that the transmission of cancer from man to animals, or from one animal to another of a different species, has never been successfully performed. But successful transplantation experiments have been made from animals suffering from malignant new growths to others of the same species, notably in the case of the mouse. In this animal the new growth may attain a weight equal to that of the animal itself. These observations, they state, "show that malignant new growths are always local in origin, and of themselves produce no evident constitutional symptoms whatsoever. These facts are in full accord with accumulated clinical experience in man. The wide zoological distribution of malignant new growths indicates that the cause of cancer is to be sought in a disturbance of those phenomena of reproduction and cell-life which are common to the forms in which it occurs."

The first report of the Cancer Research Fund (*Brit. Med. Journ.*, April 30th, 1904) confirms the observations of Farmer, Moore, and Walker; but exception is taken to the view "that the cancer process consists in a transformation of the normal adult tissues into modified reproduction or 'gametoid' tissue possessing the features of malignancy." Certain nuclear figures which have been seen in some of the cancers examined are considered to support the view that a species of conjugation occurs among the cells. "If this be so, a new cycle would be started thereby, and the independent growth of malignant tumours would be explained."

The third meeting of the General Committee of the Imperial Cancer Research Fund was held in July at Marlborough House, under the chairmanship of H.R.H. the Prince of Wales, President of the Fund. The report embodies the statements given above, and points out that "certain well-known characters stamp malignant new growths as independent organisms; and that, should further observations confirm those already made, the general establishment of cell-conjugation in malignant new growths may afford a harmonious explanation of all the features, and at the same time explain the initiation of the cancer cycle. The report further draws attention to the fact that the

lesser recorded cancer mortality in Ireland is largely due to the relative infrequency of post-mortem examinations and the less favourable opportunities for investigation in that country than in London and in England generally.

In a vigorous address on the Treatment of Cancer by Mr. Mayo Robson to the Royal College of Surgeons, he concluded with words which cannot be too widely read: "My purpose will have been served if I have been able in some small degree to convince those who have the chance of seeing patients in the early stages of their illness, that in many cases cancer can be prevented by treatment in the pre-cancerous stage; that even when cancer has developed, if it be seen early and thoroughly removed, it is frequently a curable disease; and lastly, that even in the later stages much may be done by surgical treatment to give real relief. Is it too much to hope that some of the views I have enunciated may filter through the profession to the public, and serve to convince them that, until a true prophylactic for cancer is discovered, they will be consulting their own interests best by seeking medical advice earlier, since to trifle with their ailments in the early stages is to lose the favourable moment, and ultimately to hear the verdict—alas! too often pronounced—too late?" (*Brit. Med. Journ.*, Dec. 3rd, 1904).

It is too early yet to state what importance should be attached to the results of Dr. Doyen, of Paris, who has elaborated a serum treatment of cancer, based on the supposed discovery of a causative microbe. All statements of such a nature require to be received with the greatest caution.

### **Tuberculosis.**

On June 1st was published an *ad-interim* report of the Royal Commission appointed to inquire into the relation of human and bovine tuberculosis; the appointment of the Commission having been made in consequence of Professor Koch's assertion at the International Congress on Tuberculosis, held in London in 1901, of the specific difference of these diseases. As the result of experiments on bovine animals, made by feeding or inoculation with tuberculous material derived from human beings and containing living tubercle bacilli, the Commissioners report that, on comparing the effects with those produced by infecting other animals of the same species with tubercular material derived from bovine sources, the disease set up in the one case was both in its broad general features and in its finer, microscopical details identical with the other. They state that the fact "that tubercle of human origin can give rise in the bovine animal to tuberculosis identical with ordinary bovine tuberculosis seems to them to show quite clearly that it would be most unwise to frame or modify legislative measures in accordance with the view that human and bovine tubercle bacilli are specifically different from each other, and that the disease caused by the one is a wholly different thing from the disease caused by the other" (*Brit. Med. Journ.*, June 4th, 1904).

### **Plague.**

Though Plague has nearly lost its pandemic character, it still retains its hold on India. In that country at the beginning of 1904 the death-roll from the disease averaged about 18,000

weekly, and the distribution was wider than at any previous period. For the week ending March 19th the deaths rose to 40,527, figures above any previous record. The districts chiefly affected were those of Bombay, Bengal, the North-West Provinces, and the Punjab, which between them contributed 33,500 of the total 40,527. The disease has been found to diminish as the temperature rises; and as this gradually rises from south to north of India, the annual subsidence of Plague follows the climatological change (*vide Brit. Med. Journ.*, April 9th). For the week ending April 9th the mortality figures reached the highest recorded point of 47,599, and for the following week fell only about a thousand below (46,812); maintaining this high level till the middle of May, they then dropped from 35,413 on May 14th to 20,484 on May 28th—the disease having diminished satisfactorily everywhere except in the Punjab. By the middle of June the mortality had dropped to 6000, and on July 9th was only 1910, a rapid decrease having taken place in the Punjab. From the end of July the figures rose slowly but steadily till on Sept. 3rd they reached 9914; in the week ending Oct. 29th the deaths numbered 15,994, as against 17,583 in the corresponding week of the previous year. Towards the end of the year the death total had declined to 15,197 (Nov. 12th).

A few cases occurred in Cape Colony during the year. A telegram from Johannesburg on March 20th announced that Plague had broken out in the coolie quarters, with 8 deaths. The total of proved and suspected cases up to the middle of June from the beginning of the outbreak amounted to 145, of which 27 were whites. The epidemic after this rapidly declined, the latest cases being notified in the week ending July 9th. At the end of August the Government of the Transvaal announced the disappearance of Plague in the Colony. In Mauritius, although the Plague nearly disappeared at the beginning of the year, yet cases continued to occur; 24 new cases being notified in the week ending Oct. 27th, and 18 deaths. In Hong Kong the disease was epidemic through the first half of the year, but in September it was announced that clean bills of health had been resumed. In November fresh cases were again occurring. A few cases occurred in Egypt; and a limited outbreak at Lima, in Peru, was reported in April. At Aden 3 cases were reported in May. In Formosa, between January and May, 2600 cases of Plague occurred.

#### "Leishman-Donovan Bodies."

The advance in our knowledge of the diseases of "tropical" countries, which has been so marked of recent years, still continues. In the course of 1900 Major Leishman, of the Royal Army Medical College, discovered in the blood taken after death from the spleen of a private invalided from India certain microscopic bodies which he was inclined at first to regard as degenerated "trypanosomes" (see MEDICAL SUMMARY, ed. 1904). The man came from Dum-dum, a station noted for the prevalence of a severe form of cachexia, which had been generally assumed to be of malarial origin. Major Leishman published his observations in the *Brit. Med. Journal* of May 30th, 1903. About the same time Capt. Donovan, I.M.S., drew attention to the occurrence of

similar bodies in blood from the spleen not only of dead but of living patients (*Brit. Med. Journ.*, July 11th, 1903). The attention of Laveran, Ross, and others was attracted to the subject, and the provisional name of *Leishmania Donovan* was proposed for the new parasite. It was suggested by Major Ronald Ross that there might be some causal connection between this body and the disease Kala-Azar, very prevalent in Assam, which is characterised by chronic pyrexia and enlargement of the spleen. In Jan. 1904 Major Ross learned by telegram from Dr. C. Bentley, of Assam, that the latter had discovered Leishman bodies in cases of Kala-Azan, by puncture of the spleen during life. The observations of the original discoverers were confirmed by Sir Patrick Manson in the case of a patient in the tropical ward of the Seamen's Hospital (*Brit. Med. Journ.*, Jan. 23rd). The occurrence of the parasite was reported from Tunis by Dr. Laveran in Nov. 1903, and from Omdurman by Dr. Neave in May 1904 (*Brit. Med. Journ.*, May 28th).

In June, 1904, Capt. Rogers, I.M.S., of Calcutta, reported that he had found "Trypanosomes developed in cultures of Leishman bodies"; and Dr. Bentley found trypanosomes in a species of mud-fish in the ponds of a village in Assam, attacked by Kala-azar, whilst fish in other districts were entirely free from the parasites. Further Ross suggested that the bodies found by Wright in a case of Delhi boil were in reality Leishman-Donovan bodies. A full and interesting discussion, in which both Leishman and Donovan shared, took place at the meeting of the British Medical Association at Oxford, to the report of which in the *Brit. Med. Journal* for Sept. 17th, and to a paper by Major Donovan in the *Lancet* of Sept. 10th, the reader may be referred.

#### Visit of French Medical Men.

One of the most interesting events of the medical year was the visit of a large party of French medical men to London. The visitors arrived on Monday, Oct. 10th, and three busy days were spent in visiting the various hospitals, laboratories, and museums of the Metropolis. A brilliant series of social functions was closed by a banquet at the Hotel Cecil on Wednesday, Oct. 12th, Sir William Broadbent being in the chair, and the proceedings marked by much good feeling on both sides. As fitly summing up the impressions of the visitors, the eloquent words of M. Poirier may perhaps be quoted here: "Je puis citer les choses qui nous ont frappés particulièrement: d'abord le caractère si parfaitement pratique de vos institutions qui s'allient à leur grandeur et à leurs buts élevés. Les résultats grandioses de l'initiative individuelle et collective excitent notre admiration. Mais c'est surtout cette entente passionnée qui vous caractérise alliée au respect profond pour la religion et la tradition. Lorsque nous pénétrons dans vos salles remplies de malheureux, embellies par les fleurs et par les silhouettes charmantes de vos nurses si gracieuses, il nous semble de pénétrer dans des salles enchantées." (*Lancet* and *Brit. Med. Journ.*, Oct. 15th).

#### Other Events.

On July 6th the King laid the foundation stone of the new wing of St. Bartholomew's Hospital, it having been finally decided that

this ancient foundation shall remain on its historic site. On the other hand, King's College Hospital received Parliamentary sanction for its removal to Camberwell.

The acceptance by Professor Osler, of Baltimore, of the Regius Professorship of Medicine at Oxford was an event of more than merely academic interest. A Canadian by birth and training, and one of the very foremost of living physicians, he resigned his Chair in an American university of the first rank for one in the oldest university of the English-speaking race.

By the death of Professor Finsen, of Copenhagen, on Sept. 24th, at the early age of 43, the world has lost a benefactor whose name will always be connected with the treatment of lupus by means of the electric light. The success of this method may be considered as established, but the value of radium as a curative agent in the treatment of malignant disease is still a matter of doubt.

The so-called Bladder or N-rays, in addition to other remarkable properties, were credited with the power of increasing the acuity of vision. British physicists have been singularly unfortunate in being unable to verify the claims made for these "rays."

### Physical Deterioration.

The Inter-Departmental Committee on Physical Deterioration reported their conclusion that general progressive deterioration does not exist, but is practically confined to the lowest and poorest state of the people. The importance of a proper milk supply is emphasised, and the appointment suggested of an Advisory Council to advise the Government on all legislative and administrative points concerning public health in which State interference might be advisable (*Brit. Med. Journ.*, Aug. 6th). The Committee further suggest the organisation of a permanent Anthropometric Survey, having for its object the collection of data bearing on the physical condition of the population. The desirability is urged of a register of sickness not confined to infectious diseases; and a drastic treatment of overcrowding is recommended; the establishment of milk depots is also advised.

The question was discussed at the Cambridge meeting of the British Association, Mr. Balfour taking part in the debate. Adopting the views of a previous speaker, he spoke of the "de-Germanisation" of the race, an idea based partly on the relative proportion of the light and dark varieties of colour type in the country and urban districts respectively. He drew a distinction between temporary or removable and the permanent, insidious, and irremovable causes, pointing out that after removing the former by legislative means, "we shall not have altered the permanent causes upon which depend, not merely the well-being of this or the next generation, but the actual quality of the race looked at from a natural history point of view. I fear that no legislative machinery which we can command is likely permanently to modify these causes."

In connection with this subject attention should be drawn to the diminishing birth-rate. The grave fact stands out that the "unfit" tend to and do increase at a greater rate than the "fit." Many causes, no doubt, contribute

to this result, but the gravest is that to which the following extract from the *British Medical Journal* of Sept. 24th, 1904, refers, and which we quite agree with the writer is "an evil which should receive wide publicity":—"The decline has been greatest in the classes from whom the replenishment of the population is most desirable. The position is one which demands sound teaching, not only by the medical and clerical professions, but by all who have the continual welfare of the community at heart. We leave for separate consideration the question as to whether a portion of the declining birth-rate may not be due to other causes than the production of artificial sterility. In the British Isles these other causes only account for a relatively small proportion of the total decline in the birth-rate."

The Corporation of Bradford have established a municipal depot for the supply of modified and sterilised milk.

Now that the practice of "sterilising" milk for infant consumption is so much resorted to, attention should be drawn to the fact that there are certain risks incidental to it, notably that of causing scurvy: see a paper by Dr. Ashley in the *Brit. Med. Journ.* of Feb. 27th, 1904. As an article in this paper well puts it, "Clean milk—this is really the alpha and omega of the whole matter."

In view of the great importance of brandy as a medicinal agent, much interest attaches to Mr. Fordham's decision "that after the spirit obtained by the distillation of wine had been so highly rectified as to have lost the properties peculiar to spirits so obtained, he did not think it was still spirit obtained by the distillation of wine so as the fulfil the definition of brandy" (*Lancet*, June 4th).

### "Precipitins."

The impossibility of distinguishing between the blood of different mammals has long been a recognised stumbling-block in forensic medicine. Owing to the progress made in recent years in our knowledge of the blood, this difficulty appears to be in process of removal. The existence of certain substances named "precipitins" which may be obtained from blood has been established, which possess the following property: "An animal, generally a rabbit, is repeatedly inoculated with small doses of a particular serum. The animal is subsequently killed, and its serum is collected. This serum is now called an "anti-serum," and possesses the specific property of causing a precipitate when added to a sample of the same serum as that with which the rabbit was inoculated. But when the anti-serum is added to serum from another type of animal, no precipitation—or, at most, a much smaller amount of precipitation—is produced." It was found that dried blood from articles preserved at Scotland Yard could still be tested by means of "precipitins" (*Brit. Med. Journ.*, April 16th).

### Congresses, etc.

The Congress of the Royal Sanitary Institute was opened on July 25th, at Glasgow, by Lord Blythswood. A resolution was passed in favour of adding phthisis to the list of diseases that may be optionally made notifiable.

The Royal Institute of Public Health held its Congress at Folkestone on July 21st, under the presidency of Lord Radnor. The following resolution was carried: "That as the hospital isolation of scarlet fever has now been tried on a large scale for many years, and as some doubt exists as to whether the results obtained are commensurate with the cost, it is desirable in the public interest that a full and authoritative inquiry should be made."

The British Medical Association held its annual meeting at Oxford from July 26th to 29th, under the presidency of William Collier, Esq., M.D.

That typhoid may be spread otherwise than by polluted drinking-water is well illustrated by the report of an epidemic in the New Haven (U.S.A.) County Gaol. Flies carried the typhoid bacilli from dwelling-houses in a street skirting the gaol, where there were several cases of fever at the time. The flies entered the open gaol windows and deposited the bacilli on the food in the kitchen. Of twenty-one patients who contracted typhoid in the gaol, seven died (*Brit. Med. Journ.*, March 5th, 1904).

### Beri-Beri.

Considerable apprehension was caused by an outbreak of Beri-beri among the Chinese coolies on the Rand; one transport having arrived at Durban with forty cases on board (*Lancet*, July 2nd). By the end of the year it had caused 34 deaths.

This disease has been known from the most ancient times. It is said to be mentioned in the oldest extant medical work, attributed to Hwang-ti (B.C. 2697). The disease appears to have made its appearance in Japan about the middle of the eighteenth century, and it is to this day very prevalent in that country, where it is known as "kakke." It occurs in China, in the Dutch East Indies, and in the Malay Peninsula. In the latter country it causes great loss of life among the Chinese coolies. Common some years ago in India, it is now comparatively rare. Such being the distribution of the disease, it is evident that its occurrence as a frequent disease on board ship is easily explained. The importance of this fact was well emphasised by Sir Patrick Manson a few years ago (*Times*, June 24th, 1904), cases being often, as he pointed out, brought to the Port of London. An outbreak occurred a few years ago in an overcrowded asylum in Dublin. The cause of the disease is not known. As to its nature, it may be described as a specific form of "peripheral neuritis," with a special tendency to implicate the pneumogastric nerve, thus accounting for a natural tendency to failure of the heart. The disease is unfavourably influenced by bad conditions of ventilation and dirt. Its cause has been variously attributed to a rice diet and to deficiency of nitrogenous food, but, it appears, without sufficient evidence. It is certain, however, that since the introduction of a more liberal diet it has practically disappeared in the Japanese Navy, which 20 years ago was affected to the extent of 25 per cent. of its strength.

**Melba, Madame.** Operatic vocalist, b. in Australia, May 10th, 1865. At six sang ballads to her own accompaniment at a charitable concert. Studying under Madame Marchesi in Paris, she

made her stage *début* Oct. 15th, '87, in "Rigoletto," at the Théâtre de la Monnaie, Brussels. Next year appeared as Lucia at Covent Garden. In '89 played Ophelia at Paris Grand Opera," and Juliet in London. For her Bemberg specially wrote "Elaine," produced in London in '92. She sang in "Pagliacci" at Covent Garden '93, and in the Handel Festival '94, while she has taken a prominent part in recent opera seasons. Her private name is Mrs. Armstrong, and she resides at Paris.

**Méline, Félix Jules**, was b. at Remiremont, in the Vosges, 1838. After completing his studies he joined the Paris bar, and entered the Chamber in '72, being appointed Under Secretary of State for Justice in '76. He took office under M. Jules Ferry in '83 as Minister of Agriculture, and became President of the Chamber in '88. After that he was chosen chairman of the Tariff Commission, on which his strong protective opinions had great weight. He is a member of the Moderate Republican party, and after the fall of M. Bourgeois successfully undertook the task of forming a "Conciliation Cabinet" (April 28th, '96), which held together for more than two years, but fell in '98. He was an unsuccessful candidate for the Presidency on the death of President Faure in Feb. '99, and has since become the chief leader of the Opposition in the Chamber.

**Meredith, George**, poet and novelist, is a native of Hampshire, and was b. 1828. After studying for some time in Germany he commenced his literary career with the publication of a volume of poems in '51. This was followed by the "Shaving of Shagpat, an Arabian Entertainment" ('55), "Farina, a Legend of Cologne" ('57), "The Ordeal of Richard Feveril" ('59), "Modern Love: Poems and Ballads" ('62), "Emilia in England" ('64), "Rhoda Fleming" ('65), "Vittoria" ('66), "The Adventures of Harry Richmond" ('71), "The Egoist" ('79), "The Tragic Comedians" ('81), "Poems and Lyrics of the Joy of Earth" ('83), "Diana of the Crossways" ('85), "One of our Conquerors" ('91), "Lord Ormont and his Aminta" ('94), "The Amazing Marriage" and a volume of short stories ('95). A selection from his poems was published in '97, and "Odes in Commemoration of the History of France" ('98). His difficult style has greatly militated against Mr. Meredith's chances of popularity, and for many years it prevented him from being even noticed. But in later years his genius has received more of the appreciation which it deserves. Address: Boxhill, Surrey.

**Merry del Val, Raphael**, Pontifical Secretary of State, was born in London of Spanish parents on Oct. 10th, 1865, and educated in England, where he has resided for some length of time at different periods in his career. He was at first attached to the diocese of Westminster, acted for many years as Cameriere Partecipante of Pope Leo XIII., and was appointed President of the Accademia Pontificia in '99, and Italian Archbishop of Nicosia in 1900. He visited England as Papal Envoy on the occasions of Queen Victoria's Jubilee and King Edward's Coronation, and was sent to Canada on an educational mission. In July 1903, on the death of Leo XIII., he was nominated Consistorial Secretary, and in October succeeded Cardinal Rampolla as Secretary of State, being afterwards created a Cardinal.

# MERCANTILE MARINE OF THE WORLD.

THE WORLD'S STEAMSHIPS AND SAILING SHIPS.  
 THE WORLD'S SHIPBUILDING.  
 BRITISH SHIPPING IN THE HOME AND FOREIGN TRADE.  
 THE BIGGEST AND FASTEST MERCHANT SHIPS.  
 OCEAN SPEED RECORDS.  
 SHIPS LAUNCHED AND NEW ROUTES 1904.  
 THE USE OF TURBINES.

[Much of the following information has been obtained from the Register Book and the annual Shipbuilding and Wreck Returns published by the Committee of Lloyd's Register of British and Foreign Shipping.]

The total number of steamships and sailing-vessels in the world, of 100 tons register and upwards, in 1903, was 29,290, and their estimated tonnage 34,789,189.

The number of steamships in the world was 18,467, having a gross tonnage of 28,632,684.

The number of sailing-vessels of all countries was 10,823, with a net tonnage of 6,156,505.

\* Of the mercantile tonnage of the U.S.A., a considerable portion (51 steamers in 1903, or a tonnage of 170,601) is built for service on the Great Lakes.

Of these world's totals it will be seen that the merchant ships (steam and sail) account for 1650 ships, with a gross tonnage of 2,145,631. They may be summarised thus:—

	British.		Foreign.	
	No.	Tons.	No.	Tons.
Steam Ships . . . . .	669	1,189,660	512	774,048
Sailing „ . . . . .	101	35,648	368	146,275
Total Merchant Ships . . . . .	770	1,225,308	880	920,323
War Ships . . . . .	41	151,890	78	239,210
<b>Total . . . . .</b>	<b>811</b>	<b>1,377,198</b>	<b>958</b>	<b>1,159,533</b>
Grand Totals—Merchant Vessels . . . . .				
		No.	Tons.	
„ „ War „ . . . . .		1,650	2,145,631	
		119	391,100	
		<b>1,769</b>	<b>2,536,731</b>	

During 1903 41 war-ships of 151,890 tons, and 669 merchant vessels of 1,190,618 tons gross (viz., 632 steamers of 1,165,503 tons, and 65 sailing vessels of 25,115 tons) were launched in the United Kingdom. Respecting the materials of their construction, 99·8 per cent. of the tonnage launched has been built of steel, and nearly 98 per cent. consists of steam tonnage.

The total output of the United Kingdom for 1903 was therefore 738 ships of 1,342,508 tons.

The output of mercantile tonnage in the United Kingdom during 1903 showed a decrease of 237,000 tons from 1902, and was the lowest since '97. Of the total mercantile output 936,776 steam tons and 13,800 sailing tons, or 950,576 tons in all (80 per cent.), belonged to ports in the United Kingdom. It may be noted in this connection that the losses of United Kingdom ships during twelve months average 258,200 tons (202,700 steam and 55,500 sail).

Sales of Ships to foreign and colonial owners for the twelve months ended Nov. 1903 reached

352,000 tons (294,000 steam and 58,000 sail). On the contrary, purchases from foreign and colonial owners during the same period amounted to 65,000 tons (57,000 steam and 8,000 sail). The sailing tonnage of the United Kingdom thus decreased by about 92,000, while the steam tonnage increased by 497,000. The net increase of United Kingdom tonnage during 1903 was therefore about 405,000. In recent years the estimated increases were as follows: '99, 313,000 tons; 1900, 220,000 tons; 1901, 543,000 tons; and 1902, 643,000 tons.

In 1903 18 per cent. of the total output was constructed to the order of foreign and colonial shipowners, as compared with 18 per cent. in 1902, 23 per cent. in both 1901 and 1900, 19 per cent. in '99, 22 per cent. in '98, and 25 per cent. in '97. The British Colonies provided the largest amount of work for British shipbuilders—viz., 30 vessels of 33,793 tons. Germany follows, with 9 vessels of 26,598 tons. Next came Norway with 25,813 tons, and Holland with 18,153 tons.

The largest steamers launched during 1903 were the following:—

	Tons gross.		Tons gross.
Baltic . . . . .	23,763	Kenilworth Castle	13,150
" . . . . .	16,780	Armada	12,800
" . . . . .	16,780	Macedonia . . .	10,523
Republic . . . . .	15,378	Marmora . . . .	10,523

The largest sailing vessel launched in the United Kingdom in 1903 was the *Mneme*, of 2456 tons.

The following table shows the ships launched in the principal shipbuilding districts of the United Kingdom during 1903:—

District.	Merchant and other Vessels (Not War-ships).			
	Steam.		Sail.	
	No.	Tons gross.	No.	Tons gross.
Aberdeen . . . . .	28	5683	...	...
Barrow, Maryport & Workington . . . .	7	16,893	...	...
Belfast . . . . .	20	156,859	...	...
Dundee . . . . .	19	18,320	...	...
Glasgow . . . . .	131	226,315	40	13,632
Greenock . . . . .	45	115,287	6	9072
Hartlepool & Whitby.	28	80,808	...	...
Hull & Grimsby . . .	79	25,166	1	140
Leith . . . . .	21	14,701	1	131
Liverpool . . . . .	10	2,261	1	169
London . . . . .	8	1,302	1	36
Middlesbro' & Stockton	39	91,675	...	...
Newcastle . . . . .	124	210,060	...	...
Sunderland . . . . .	58	188,980	2	520

Lloyd's Register Wreck Returns estimate the mercantile tonnage totally lost, broken

up, etc., in 12 months at about 744,000 tons (419,000 steam, 325,000 sail). The net increase of the world's mercantile tonnage in 1903 was thus about 1,402,000 tons, sailing tonnage being reduced about 143,000 tons, and steam tonnage increased 1,545,000 tons.

Compared with the net increase for the world, the net increase of the United Kingdom (405,000 tons) amounted to nearly 29 per cent.

The United Kingdom's net increase of steam tonnage was over 32 per cent. of the world's net increase of steam tonnage.

Of the tonnage launched during 1903, the United Kingdom acquired over 44 per cent., and of the new steam tonnage the United Kingdom acquired nearly 48 per cent.

#### Shipbuilding Returns, 1904.

At the close of the quarter ended Sept. 30th, 1904, there were 393 vessels of 1,046,308 tons gross under construction in the United Kingdom, and 67 war-ships of 342,930 tons displacement. The details were:—

Steam, 353 ships; tonnage, 1,029,842.
Sail, 40 " " " 16,466.
War, 67 " " " 342,930.

Of the steamships 272 with 821,151 tonnage were British; of the sailing-ships 23 with 11,660 tonnage were British; of the war-ships 58 with 308,410 tonnage were British.

#### Shipping and the Foreign Trade of the United Kingdom.

A Board of Trade Return was issued in August 1904 [294, price *od.*] containing tables showing the progress of merchant shipping in the United Kingdom and the principal foreign countries in recent years.

The tonnage of sailing and steam vessels of different nationalities entered and cleared in the foreign trade at United Kingdom ports, with cargoes and in ballast, was:—

	1860.	1870.	1880.	1890.	1903.
	Tons.	Tons.	Tons.	Tons.	Tons.
British Ships . . . . .	13,914,923	25,072,180	41,348,984	53,973,112	69,211,973
Foreign Ships . . . . .	10,774,369	11,568,002	17,387,079	20,310,757	36,407,371

Proportion per cent. of British to Total Tonnage . . . . .	56'4	68'4	70'4	72'7	65'5
The similar figures for steam vessels only were:—					
British Ships . . . . .	4,186,620	13,341,058	30,976,037	49,023,775	67,917,105
Foreign Ships . . . . .	780,853	1,731,273	6,237,905	12,661,234	32,105,584
Total British and Foreign. .	4,967,473	15,072,331	37,213,942	61,685,009	100,082,689
Proportion per cent. of British to Total Tonnage . . . . .	84'3	88'5	83'2	79'5	67'9

**British Shipping and Foreign Trade.**

From the tables giving the tonnage of sailing and steam vessels entered and cleared, with cargoes and in ballast, in the foreign trade of the undermentioned countries, we take the following figures, giving for the year named the total tonnage entered and cleared, and the proportion per cent. to the total of national, British, and other shipping.

	Other Shipping.		Proportion per cent. to Total.		
	Year.	Total Tonnage.	National. British. Other.		
		Tons.	%	%	%
Russia (European) . . . . .	1903	22,280,000	7'9	92'1*	
Norway . . . . .	1902	6,490,786	23'0	66'1	10'9
Sweden . . . . .	1901	16,566,699	45'7	8'9	45'4
Denmark . . . . .	1902	12,021,815	53'0	47'0	
Germany . . . . .	1902	30,882,531	49'9	28'3	21'8
Holland . . . . .	1902	18,936,046	29'5	34'8	35'7
Belgium . . . . .	1903	21,844,937	12'5	44'8	42'7
France . . . . .	1902	38,644,015	26'6	37'4	36'0
Portugal . . . . .	1902	23,413,373	3'7	51'3	45
Spain . . . . .	1902	30,091,799	48'3	24'8	26'9
Italy . . . . .	1902	46,208,739	48'6	20'4	31
United States . . . . .	1903	49,520,856	15'8	50'6	33'6
Chili . . . . .	1902	7,030,712	8'7	51'2	40'1
Argentina . . . . .	1902	17,195,713	42'3	23'0	34'7
Japan . . . . .	1903	27,155,468	38'5	35	26'5
Canada . . . . .	1903	13,841,175	62'1	British and Colonial.	
Newfoundland . . . . .	1903	1,785,049	64'6	Foreign.

Australia . . . . .	1902	26,791,360	84'7		

\* In 1901—British, 37'3 per cent.; Other, 53'1 per cent.

**Ships Lost, Condemned, etc., in 1903.**

Steam and sailing vessels totally lost, condemned, etc., during 1903, of 100 tons register and upwards.

Flag.	Total.	
	No.	Tons.
British { United Kingdom . . . . .	155	193,200
Colonies . . . . .	41	18,192
America, United States of . . . . .	100	66,797
Austro-Hungarian . . . . .	8	14,544
Danish . . . . .	19	7,415
Dutch . . . . .	13	9,054
French . . . . .	36	34,779
German . . . . .	39	32,520
Italian . . . . .	27	16,412
Norwegian . . . . .	125	86,736
Russian . . . . .	22	8,312
Spanish . . . . .	11	9,349
Swedish . . . . .	66	27,437
Other European Countries . . . . .	17	8,731
Central and South America . . . . .	14	10,469
Asia . . . . .	42	13,433
Other Countries . . . . .	—	—
	735	557,380

Of the 735 ships lost, 58 were abandoned at sea; 43 were broken up and condemned; 24 were burnt; 68 foundered; 5 were lost; 86 were missing; 75 were lost by collision; and 376 were wrecked.

**Numbers of Seamen.**

The number of persons employed in vessels (registered under Part I. of the Merchant Shipping Act, 1804) belonging to the United Kingdom, which were returned as employed in the home and foreign shipping trade, exclusive of vessels employed on rivers and in inland navigation, was:—

	1890.	1900.	1903.
British . . . . .	186,147	174,532	176,520
Lascars and Asiatics . . . . .	22,734	36,023	41,021
Foreigners . . . . .	27,227	36,893	40,396
Total . . . . .	236,108	247,448	257,937

The number employed in registered sailing vessels under 300 tons was in 1890, 42,721; in 1900, 25,056; and in 1903, 21,452.

During the last ten years the number of British seamen employed in British ships has seriously diminished. Their maximum number was reached in '93 with 186,628 men.

**The World's Big Merchant Steamers.**

The following table, compiled from the Appendix to Lloyd's Register Book, gives a good idea of the great increase which has taken

place during recent years in the size of large steamers. Here again steamers flying the British flag are in a great majority, comprising nearly 60 per cent. of the total number of ocean-going vessels of 5000 tons and above.

Flag.	20,000 and above.	15,000 to 19,999	10,000 to 14,999	7000 to 9999	5000 to 6999	Grand Total.
British .	3	3	38	119	299	462
French .	—	—	2	5	45	52
German .	—	2	23	23	92	140
American (U.S.) .	1	—	10	9	20	40
Other Flags .	—	—	7	4	72	83
Total	4	5	80	160	528	777

The names, gross tonnages, and flags of the largest steamers are as follows:—

Name.	Tonnage.	Flag.
Baltic . . .	23,876	British
Cedric . . .	21,035	British
Celtic . . .	20,904	British
Minnesota .	20,718	American (U.S.)
Kaiser Wilhelm II.	19,361	German

In addition to the above vessels there were under construction at the end of Oct. 1904, several other steamers of 20,000 tons and above.

#### Fast Merchant Steamers.

From the Appendix to the 1904-5 edition of Lloyd's Register Book, where detailed particulars are given of all steamers of 12 knots and above, it appears that 38 British and 26 foreign merchant steamers are capable of maintaining at sea a speed of 20 knots and above, 14 of which are of 10,000 tons gross and upwards.

From the following table, which only takes into account ocean-going steamers of 4000 tons and above, the great superiority of the United Kingdom as regards fast merchant steamers is well shown.

COUNTRY.	NUMBER OF OCEAN-GOING STEAMERS OF			
	20 knots and above.	18 knots and under 20.	16 knots and under 18.	Grand Total.
United Kingdom .	7	9	55	71
France . . .	2	2	19	23
Germany . .	5	4	7	16
America (U.S. of) .	4	3	16	23
Other Countries .	0	4	10	14
Total .	18	22	107	147

The following list of the fastest merchant steamers at present engaged in the passenger service on the North Atlantic, is compiled from the second part of the List of Fast Merchant steamers:—

Name of Steamer.	Flag.	Gross Tonnage.	Speed.
Deutschland . .	German	16,502	23½
Kaiser Wilhelm II.	German	19,361	23½
Kronprinz Wilhelm	German	14,908	23
Kaiser Wilhelm der Grosse . . .	German	14,349	22½
Lucania . . .	British	12,952	22
Campania . . .	British	12,950	22
Oceanic . . .	British	17,274	21
La Savoie . . .	French	11,884	21
La Lorraine . .	French	11,869	21

#### Ocean Speed Records.

The most noteworthy speed records are those between Queenstown and New York, Southampton and Plymouth and New York, and Havre and New York. The record passages across the Atlantic, which are on the first-named route, were made by the *Lucania* and *Campania*, of the Cunard Company. The fastest voyage made by the *Lucania* was at the rate of 22'01 knots per hour throughout her passage, early in '95. The *Campania* made the fastest eastward voyage, in 5 days 9 hrs. 18 min. One day's run of 562 knots was made by the *Lucania*.

On the Southampton and Plymouth route to New York the *Deutschland* of the Hamburg American Line in September 1900 was propelled from New York in 5 days 7 hrs. 38 min., giving a rate of 23'36 knots an hour. In July 1901 she was driven from New York to Plymouth over the long course, a distance of 3082 knots, in 5 days 11 hours 5 min., at the average rate of 23'51 knots per hour. The North German Lloyd's liner *Kronprinz Wilhelm* ran between New York and Plymouth from Oct. 20th to Nov. 3rd, 1901, at the average speed of 23'21 knots per hour, and made an average speed on her eastern voyage in June 1902 of 23'47 knots per hour. The same line's *Kaiser Wilhelm II.* ran in June 1904 from New York to Plymouth, the route taken covering 3112 miles, in 5 days 11 hrs. 58 min., the average speed being 23'59 knots per hour, thus beating the *Deutschland*.

On the Havre route the best record made up to Sept. 1903 was by *La Savoie*, of the General Transatlantic Line, which in Sept. 1901 was driven from Havre to New York at an average speed of 20'59 knots an hour. At the latter date *La Lorraine* of the same line ran from New York to Havre in 153 hours at an average speed of 20'75 knots per hour. This was the only ocean steamer which broke a speed record on any one of the leading routes mentioned in 1903.

No records in speed have been made by any ships for several years to or from India, China, or Australasia. The shortest time in which the voyage has been made to Australia is, including all detentions, 33 days 4 hours from London to Adelaide, by the *Victoria* of the P. and O. Line, in '88. She did not call at Plymouth, but the time is equivalent from Plymouth to Adelaide in 32 days 12 hrs. 45 min. In October '87 the *Ormus* of the Orient Line was propelled from Plymouth to Adelaide in 33 days 2 hrs. 11 min.

On the Cape route the *Scot* of the Union Line was driven in '94 from Southampton to Cape Town in 14 days 11 hrs., and from Cape Town to Plymouth in 13 days 23 hrs. These voyages are the shortest made on the Cape route. The

*Carisbrook Castle* of the Union-Castle Line, in her voyage from the Cape to Southampton in '99, occupied 14 days 11 hrs. 13 min., being the fastest voyage for that line, and only 13 minutes longer than the *Scot*.

Some very rapid arrivals of mails in India, China, and Australia have been made *via* Brindisi by the *Peninsular and Oriental Steam Navigation Company's* liners. The homeward Indian mail record is held by the *Caledonia*, which left Bombay at 2.25 p.m. on March 23rd, '95, and arrived at Brindisi at 3.23 p.m. on April 2nd, and the mails arrived in London on the evening of the 4th of that month; so that only 12½ days were taken for the conveyance of the mails from Bombay to London. Mail matter despatched from London on April 7th, '93, at 8 p.m., arrived in Adelaide (Australia) by the *Australia* on May 4th in 26 days 17 hrs. This time was shortened during May and June, as the London mails were delivered in Adelaide in 26 days 7 hrs. by the *Himalaya*. In Oct. '87 the *Ormuz* of the Orient Line delivered London mails at this Australian port in 26 days 18 hrs.

### New Ships Launched, etc., 1904.

The *Cunard Co.* launched the twin-screw steamer *Caronia*, 21,000 tons gross, during 1904, and has building the triple-screw turbine steamer *Carmania*, 21,000 tons gross, which is to be ready for service in July 1905, and two 25-knot turbine steamers. On June 6th, 1904, the *Cunard Daily Bulletin* was inaugurated. It is a daily newspaper published on all the *Cunard* mail steamers, supplied with news by the Marconi system.

The *P. & O. Co.* launched and put into their Eastern mail services during 1904 four new twin-screw steamers, each 10,000 tons gross—*Moldavia*, *Mongolia*, *Marmora*, and *Macedonia*. The *Poonah*, 10,000 tons, was launched Dec. 24th, 1904. Four more mail steamers of 8000 to 10,000 tons are building, and two cargo steamers.

The Company's contract with H.M. Government for the conveyance of mails to India, China, and Australia, which came into operation on Feb. 1st, 1893, for a period of 7 years, was in 1904 extended for a further period of 3 years, and provides for an acceleration of 1 day in the mail transits to Bombay, Shanghai, and Adelaide. The mails will now be due in Bombay within 13½ days of their despatch from London.

The *Ocean Steamship Co., Ltd.*, launched the *Priam*, *Telamon*, and *Laertes* of 4500 tons.

The *Royal Mail Steam Packet Co.* launched in 1904 six new steamers—*Parana*, *Pardo*, *Polaro*, *Conway*, *Catalina*, and *Caroni*. A new mail steamer, the *Aragon*, of about 10,000 tons, is to be completed in 1905. The Crown granted a new Supplementary Charter in which clauses were inserted whereby it is to be regarded as a cardinal principle that the Company is to be and remain under British control, and accordingly it is provided that no foreigner shall be qualified to hold office as a director, or be employed as one of the principal officers of the Company. Regulations have also been made governing the allotment and transfer of shares, so as to prevent the acquisition of shares by foreigners or foreign corporations. These provisions and regulations have the cordial approval of the Court of Directors.

The *Allan Line* launched two turbine triple-screw steamers—the *Victorian* and *Virginian*—

both of 12,000 tons gross, with a speed of 18 knots. They are the first turbine steamers built for the North Atlantic trade.

The *Union-Castle Mail Steamship Co.* received delivery of the following new steamers: *Dunluce Castle*, *Dover Castle*, *Kenilworth Castle*, and *Durham Castle*.

The *White Star Line* despatched the *Baltic*, the largest vessel in the world, from Liverpool on her maiden voyage to New York (June 29th, 1904).

The *Dominion Line* announce that in 1905 the *White Star* liner *Germanic*, after being overhauled and improved as to her passenger accommodation, will be re-christened the *Ottawa*, and enter the Liverpool-Quebec and Montreal service of the *Dominion Line*.

The *Hamburg-American Line* launched the *Polynesia* for the west coast of South America, and the *Meteor* for pleasure travel exclusively. The *America*, of 22,500 tons register, and *Kaiserin Auguste Victoria*, of 25,000 tons register, which are in construction for the Company's New York service, will embody many new features, and no 1st-class state-room will have "upper berths." Besides this, each vessel will have a restaurant with a capacity for about 120 passengers, under the management of the *Ritz Hotel Co.* as well as several other new features. Thirteen other new liners are being built for the Company, with a tonnage of about 70,000 tons.

The *Messageries Maritimes* launched the *Longsor*, 7500 tons, and have in process of construction three similar ships—*El Kantara*, *Gange*, and *Euphrate*—all chiefly for cargo service.

### New Routes, 1904.

The *Cunard Co.* opened up a Hungarian-American service, the four twin-screw steamers *Pannonia*, *Slavonia*, *Carpathia*, and *Ullonia*, maintaining a fortnightly service between Trieste, Fiume, Naples, Palermo, and New York.

The *Royal Mail Steam Packet Co.*—Glasgow and Manchester to Venezuelan ports; Hull and London to River Plate direct; London to Trinidad and Demerara; Newport (Mon.) and Swansea to Brazilian ports and River Plate.

The *White Star Line* began a direct cargo service from Liverpool to New Zealand, and a passenger and cargo service from New York to Mediterranean ports, *via* Azores (in addition to the Boston and Mediterranean service).

The *P. & O. Co.* organised a series of yachting cruises, and specially fitted the *Vectis*, of 6000 tons, for this purpose.

### Steam Motor Turbines for Ships.

These turbines are now in use on river steamers in the Clyde and on cross-Channel and ocean-going ships, and are all working well. In 1903 the following steamers fitted with turbines were launched: viz., H.M.S. *Amethyst*, 3000 tons; H.M.S. *Eden*, 565 tons; the yacht *Lorena*, 1303 tons; and the Channel steamers *The Queen*, 1676 tons, and *Brighton*, 1129 tons.

A committee of experts, consisting of Rear-Admiral Oram, Deputy Engineer-in-Chief of the Navy; Lieut.-Engineer Wood; Mr. J. T. Milton, Engineering Surveyor of Lloyd's Registry; Mr. H. Brook, of Messrs. Denny, shipbuilders; Mr. Andrew Laing, Wallend

Engineering Works; Mr. T. Bell, Engineering Manager of Messrs. John Brown & Co., Clydebank; and Mr. James Bain, General Superintendent of the Cunard Co., was appointed at the instance of the Cunard Co. to consider whether the turbine type of engines is suitable for such large and fast ships as the two which the Cunard Co. had agreed with H.M. Government to build. (See SESSION, sect. 34.) At the 27th annual meeting of the Cunard Co. (April 7th, 1904) Lord Inverclyde said that the directors had received the committee's report, and in consequence had decided, with the cordial consent of the Admiralty, to adopt the turbine system upon the new steamers. Accordingly two 25-knot turbine steamers are being built, one at Messrs. John Brown & Co.'s yard at Clydebank, and the other at Messrs. Swan, Hunter, Wigham Richardson & Co.'s yard. The Cunard Co. are also applying the turbine system to the triple screw steamer *Carmania*, 21,000 tons gross.

On August 25th, 1904, the *Victorian*, the first of two turbine-driven ships ordered by the Allan Line, was launched from Messrs. Workman, Clark & Co.'s yard at Belfast. The *Victorian* is the pioneer turbine vessel for the Atlantic service, and is a 12,000-ton ship. A high-pressure and two low-pressure Parsons turbines drive the three propellers of the ships, which revolve at from 270 to 300 revolutions per minute. The central one, arranged as in a single-screw vessel, is worked by the high-pressure turbine. The others, which are arranged as in a twin-screw ship, are worked by the low-pressure turbines. The two latter have each a reversing arrangement which enables them to be driven full speed astern either together or independently. The steam to drive the turbines is generated by eight large boilers of the usual type. The length of the *Victorian* is 540 ft.; her breadth, 60 ft.; her depth, 40 ft. 6 in. The sister ship the *Virginian* was launched on Dec. 22nd, 1904, from the yard of Messrs. Alex. Stephen & Sons, Ltd., on the Clyde. She has a similar turbine equipment.

*Engineering* for Nov. 10th, 1904, gave the results of a comparison between a British cruiser, the *Amethyst*, fitted with Parsons turbines, and three similar cruisers with the ordinary system of reciprocating machinery. The *Amethyst* with the same boiler power easily steamed 23·63 knots per hour, compared with 22·34 knots, the best the other cruisers could do. This was done with easier steaming, with no vibration of the ship, and with quite 10 per cent. less coal consumption.

The *Londonderry* and *Manxman*, two of four steamers built for the M.R. service between Heysham and the Isle of Man and Ireland, are fitted with turbines.

#### Societies, etc.

The Baltic Mercantile and Shipping Exchange. This building was opened in April 1903. It is an amalgamation of the old Baltic in Threadneedle Street and the Shipping Exchange in Billiter Street, and consists of nearly 2500 members. Chairman, Mr. W. Bridges Webb; Secretary, Mr. J. A. Findlay; Offices, St. Mary Axe, E.C.

The Chamber of Shipping of the United Kingdom. This consists of thirty Shipowners' Associations in London and the chief ports

of the United Kingdom. Its work is largely parliamentary, but it also communicates with the chief Government Departments on all matters affecting the interests of British Merchant Shipping. The affairs of the Chamber are managed by an executive council, to which each affiliated association elects one member. This Council is presided over by a president and vice-president, elected annually at a meeting held in London in February. President, Mr. W. F. G. Anderson, Glasgow; Vice-President, F. S. Watts, London; Secretary, Mr. W. H. Cooke, B.A., Barrister-at-law. Offices, 5, Whitlington Avenue, Leadenhall Street, E.C.

#### METEOROLOGICAL OFFICE.

The Meteorological Office was established in 1867 under the control of a committee appointed by the Royal Society, at the instance of the Board of Trade, the Admiralty, and the Treasury, to take over the duties of the Meteorological Department of the Board of Trade, which had been established in 1854. The office was charged with the duty of collecting meteorological reports by telegraph from stations in the British Isles and their immediate neighbourhood, with a view to the issue of storm warnings and forecasts of weather; of collecting for public use statistics about the weather from land stations in the British Isles and elsewhere, as well as from ships of the Royal Navy and the merchant service; and of promoting the practical applications of the science of meteorology by special researches. A Parliamentary grant was assigned for the maintenance of the office, and the control is vested in a body of directors appointed by the Royal Society.

A Committee under the Rt. Hon. Sir H. E. Maxwell, Bart., M.P., as Chairman, and with Mr. G. L. Barstow, of the Treasury, as Secretary, was appointed (Dec. 14th, 1902) to inquire and report whether any changes in the apportionment of the existing annual grant of £15,300 are desirable in the interests of meteorological science. The Committee reported in a blue book [Cd. 2123], issued in June 1904. They recommended that the office should be reconstructed as a department under the control of the Board of Agriculture and Fisheries, with a Director of Meteorology responsible to the Board for the administration of the office; that the Post Office should arrange at the 27 reporting stations in the United Kingdom to transmit daily telegraphic reports one hour earlier than the present hour (8.15 to 8.30 a.m.), and that storm warnings should, if practicable, have priority over all private messages at all hours; that wireless telegraphy should be tested as to its efficacy in providing advance news of the weather in the Atlantic; and that other and more suitable and adequate premises should be provided.

Daily Weather Reports, including forecasts of the weather for the next 24 hours, are issued, and can be had on payment of a subscription of £1 per annum, or £2 if delivered to the subscribers by hand. Information by telegraph as to the weather in various parts of the United Kingdom or the Continent, and forecasts for one day in advance, can be supplied by the office. Harvest Forecasts are issued daily at 3.30 p.m. from June 1st to Sept. 30th, and can be sent by telegraph on prepayment of the cost. The Storm Warnings are

notified by the hoisting at the station warned of a black canvas cone, or three lanterns on a triangular frame. There are also issued **Weekly Weather Reports**, published on Thursdays, giving, for the week ended the previous Saturday, a summary of temperature, rainfall, and duration of bright sunshine in the United Kingdom, for agricultural and sanitary purposes; and other publications.

The **Secretary** is Mr. W. Napier Shaw, Sc.D., F.R.S. The Office is at 63, Victoria Street, London, S.W., and is open for general inquiries from 10 a.m. to 4 p.m. on weekdays (Saturdays 1 p.m.), and for telegraphic inquiries from 8.30 a.m. to 8 p.m. on weekdays, and 6 to 8 p.m. on Sundays.

**Metric System, The.** The compulsory adoption throughout the British Empire of the Metric Weights and Measures is advocated by the **Decimal Association**. At present the **Weights and Measures Act, '97**, declares that, "notwithstanding anything in the **Weights and Measures Act, '78**, the use in trade of a weight or measure of the metric system shall be lawful, and nothing in sect. 19 of that Act shall make void any contract, bargain, sale, or dealing, by reason only of its being made or had according to weights or measures of the metric system; and a person using or having in his possession a weight or measure of the metric system shall not by reason thereof be liable to any fine." The movement has warm support in the Colonies and amongst British Consuls abroad, and a similar movement in the United States has made great progress. There are 266 M.P.'s who have expressed their approval of the aims of the Association. At the Colonial Conference in 1902 a resolution in favour of the adoption of the metric weights and measures throughout the British Empire was carried. The Montreal Congress of the Chambers of Commerce of the Empire carried a resolution in Aug. 1903 urging the British Government to make the use of metric weights and measures compulsory, and the Australian Commonwealth and Cape Parliament resolved during 1903 in favour of the Imperial Parliament legislating to this effect. A Parliamentary paper [Cd. 1940] was published in Feb. 1904 summarising the replies received from the Colonial governors to a circular sent from the Colonial Office in Dec. 1902, asking what action was likely to be taken in the various Colonies with regard to the Colonial Conference resolution in favour of the metric system. The system is already used in Mauritius and Seychelles, and the great majority of the replies were favourable to the adoption of the system. **Secretary of the Decimal Association**, Mr. Edward Johnson. Offices, Oxford Court, Cannon Street, E.C.—The **British Weights and Measures Association** opposes the introduction of the system, urging that it cannot be applied to sea measures, that the English standards of measurement for textile manufactures, and for the draught, displacement, and tonnage of shipping, are practically universal, and that the foot, inch, ounce, and pint are in general use in all countries. See **SESSION**, sect. 97, for **Weights and Measures Act, 1904**.

**Metropolitan Public Gardens Association.** The acquisition and laying-out of open spaces, disused burial grounds, churchyards, squares, and other vacant sites, the provision of seats and the planting of trees both in gardens and

thoroughfares, the formation of public gymnasia and children's playgrounds, opposing threatened encroachments upon commons, open spaces, etc., are part of the work of this society. Funds are urgently needed at the present time, as there are many schemes on hand which the Association desires to carry out, at an estimated cost of £4300. Income in 1903, £3400; expenditure £3400. Over 100 gardens and playgrounds (total area 137 acres), at a cost of over £41,000, have been laid out since the Association was formed, in '83. Entirely supported by voluntary contributions. **Chairman** and **Hon. Treasurer**, The Earl of Meath; **Secretary**, Basil Holmes, 83, Lancaster Gate, W.

## MEXICO.

Mexico is a country forming the southern extremity of North America, and stretching into Central America. Bounded on the north by the United States; on the south by Guatemala and British Honduras. The country, by the constitution of 1857 with subsequent modifications, is divided into twenty-seven states, two territories, and the Federal district, and governed as a Republic by a **President**, elected by the people for a term of four years. There is a **Senate** of 56 members, each state electing two members, and a **House of Representatives** elected for two years by universal suffrage, one member for every 40,000 inhabitants. Each state has its own popularly elected governor and legislature, and manages its own local affairs. There is a small fleet, which is being strengthened.

The Mexican army consists in peace time of 3500 officers, 31,000 men, and 11,000 horses or mules. It was proposed to introduce personal or obligatory service, but the plan has been postponed, and the army is recruited by voluntary engagement of 3, 4, and 5 years, with special levies drawn by lot. The passage of the forces to a war footing has been defined by law, and provision is made for mobilising the first and second reserve, including the rural and urban police, the national guard and other forces. The following is the strength: Regular army, 2700 officers, 61,000 men; Reserves, 1000 officers, 125,000 men: total, 3700 officers, 186,000 men, with 32,000 horses and 12,000 mules.

Prevailing religion Roman Catholic; but there is no State establishment, and all sects are tolerated. Primary education free and compulsory, but the country is very backward in this respect, though progress is now being made. Industries comprise mining and smelting of silver and other metals (which employs about 100,000), agriculture, cotton factories, and cattle-herding. The mineral wealth is great, comprising gold, silver, mercury, iron, tin, zinc, lead, antimony, arsenic, and sodic carbonate. Mexico is one of the two largest silver-producing countries in the world. The other chief products are cereals, fibres, and cocoa; coffee and tobacco are now cultivated to some extent. There were in 1903 about 11,378 miles of railway. A Bill for the reform of the currency laws was passed (Nov. 29th, 1904). The dollar contains 24'4388 grammes of fine silver and 2'6342 grammes of copper, equivalent to 75 centigrammes of fine gold. The coinage and issue of money are reserved to the Government. The new law authorises the Government to prevent, or

impose a tax on, the importation of Mexican dollars.

**Area**, 767,060 sq. m.; **pop.** (1901) 13,604,923, of whom about 38 per cent. are Indians and about 43 per cent. of mixed race, only 19 per cent. being white. There are about 2,000,000 educated whites. **Capital**, Mexico, pop. 400,000. **Revenue**, 1901-2, (\$ at 2s.), £6,614,700; 1902-3, £7,602,341; **expenditure**, 1901-2, £6,308,150; 1902-3, £6,822,252; **imports**, 1902-3, £15,180,350; **exports**, £19,772,897; **public debt**, 1903, £22,546,600 (gold debt), £16,051,200 (silver debt), £126,983 (floating debt). Of the imports the United States sent £8,102,909, the United Kingdom £2,123,069, Germany £1,914,802, and France £1,307,885. Of the exports £14,377,110 went to the United States, £2,687,857 to the United Kingdom, £666,005 to Germany, and £365,418 to France.

**President**. General D. Porfirio Diaz is a modern instance of the benefits of a benevolent despotism. He was b. in 1828, and has governed the country ever since '75, when he assumed office as a military dictator. Since '76 he has been the legally elected President, except for the period '80-84. The original constitution of '57 laid it down that the President should be elected for only four years, so during that period a nominee of his was President; but he was elected again in '84, and in '87 an amendment *ad hoc* provided that the President might be elected for consecutive terms. His sixth term of office expired Nov. 30th, 1904, but he was again elected. His powers of organisation are shown by the wonderful advance made by the country under his rule, although that rule is decidedly autocratic. He has been greatly aided by the financial ability of Señor Limantour, who is spoken of as his probable successor.

**Vice-President**, Don Ramon Corral.

**Ministry**: *Foreign Affairs*, Don Ignacio Mariscal.—*Interior*, Don Ramon Corral.—*Justice and Public Instruction*, Don Justino Fernandez.—*Finance*, Don José Ives Limantour.—*Posts and Telegraphs*, General Leandro Fernandez.—*Army and Navy*, General Francisco Z. Menta.—*Public Works*, General Manuel Cosío.

**Minister Plenipotentiary in London**, Monsieur Gallardo, 87, Cromwell Road, S.W.—*First Secretary*, Señor D. Miguel de Beistegui.

**Consul in London**, Don Adolfo Bülle, Broad Street House, E.C.

**Financial Agency**: *Agent*, Don Luis Camacho.—*Secretary*, Don E. Camacho-Guisasola, 9, New Broad Street.

**British Minister at Mexico**, Mr. George Greville C.M.G.—*Secretary*, A. C. Grant Duff.

**British Consuls**: L. Jerome (Mexico), F. P. Leay (Vera Cruz).

**Midwives Act, 1902**. This Act enacts that any woman who, after April 1st, 1905, not being certified under this Act, uses the name or title of midwife (either alone or in combination with any other word or words), or any name, title, addition, or description implying that she is certified under this Act, or is a person specially qualified to practise midwifery, or is recognised by law as a midwife, shall be liable on summary conviction to a fine not exceeding £5; that after April 1st, 1910, no woman shall habitually and for gain attend women in childbirth otherwise than under the direction of a qualified medical practitioner, unless she be certified under this Act, and that any woman so acting shall be liable on summary conviction to a fine not

exceeding £10. The section, however, does not apply to legally qualified medical practitioners, or to any one rendering assistance in a case of emergency. The certificate under this Act does not confer upon any woman any right or title to be registered under the Medical Acts or to assume any name, title, or designation implying that she is by law recognised as a medical practitioner. The Board has to appoint examiners, grant certificates, and publish annually a roll of midwives who have been duly certified under the Act. The council of a county or county borough in England and Wales becomes the local supervising authority over midwives within the area of the county or county borough, and is empowered to exercise general supervision over all midwives practising within its area, investigate charges of malpractices, etc., and to suspend any midwife from practice if her suspension appears necessary in order to prevent the spread of infection. Power is conferred on a county council to delegate any of its duties under this Act to a district council. The Act, which does not extend to Scotland or Ireland, came into operation on April 1st, 1903.

**Miniature Painters**. The years 1896 and '97 witnessed an important revival of the art of miniature painting, and the foundation of two societies devoted to the Art. The Royal Society of Miniature Painters is composed wholly of artists, Sir William B. Richmond, K.C.B., R.A., being its President, Mr. Quinell its Hon. Sec., and Mr. Edward Freeman its Secretary. Its exhibitions are held (in May) at the Modern Gallery, 175, Bond Street, W., where also it has a permanent collection of members' miniatures always on view. The Society of Miniaturists has its offices at the Galleries of the Royal Institute of Painters in Water Colours, Piccadilly, and holds its exhibitions concurrently with that body throughout the spring and summer. Its President is Alfred Praga, Esq., and its Secretary Mr. Edgar Blackmore. It differs from its sister society in possessing on its council certain experts, collectors, and art critics who have given special attention to miniatures. It also occasionally unites with its exhibitions a show of old miniatures, and aims at training the modern worker by a study of the work of the old masters.

**Mint, The Royal**. The existence of a mint in this country is of very ancient date, regulations concerning it having been made as early as 928, by Athelstan. The present building was erected between 1806 and 1810, at a cost of over £250,000. It was somewhat injured by fire in '15, but repaired. By an Act passed April 4th, '70, the mastership of the Mint was absorbed in the office of Chancellor of the Exchequer, and the duties were devolved upon the Deputy Master of the Mint. There are branches of the Royal Mint at Sydney, Melbourne, and Perth. The last report shows that the gold issued in 1903 amounted to £10,144,000, the silver to £557,247, and the bronze to £113,895. In 1903 the nominal value of the light gold coin withdrawn was £1,800,000, of light silver £276,830, and of light bronze £113,895. The total number of pieces struck in 1903 was 114,697,720, of which the Colonies took 50,072,415. The Medal Department was actively employed, the total struck being 210,462, of which 102,594 were struck under contract outside the Mint. The present Deputy Master is the Rt. Hon. W. Ellison-Macartney.

# MINES AND QUARRIES OF THE WORLD AND THEIR PRODUCE.

## Coal Areas of the World.

Mr. Ed. Loze, the author of one of the latest contributions on the coal question, in his book "Les Charbons Britanniques et leur Epuisement," has published a table giving an estimate of the coal areas of the world, which is mentioned below:—

	sq. miles.
China .. .. .	over 250,000
United States .. .. .	200,000
Canada (East of Rocky Mountains)	65,000
British India .. .. .	35,488
New South Wales .. .. .	24,000
European Russia .. .. .	20,000
United Kingdom .. .. .	12,352
Spain .. .. .	5,498
Japan .. .. .	4,718
France .. .. .	2,079
Austria-Hungary .. .. .	1,789
Germany .. .. .	1,769
Belgium .. .. .	509

No mention is here made of the coalfields of New Zealand, Victoria, South Africa, or Tasmania, but it is estimated that the colonies could supply us with coal for many hundreds of years.

## Coal Production of the World.

The world's supply of coal in 1903, or in the latest year for which the figures are available, was:—

Country.	Year.	Production in Tons.
United Kingdom ..	1903	230,334,469
Australasia:		
New South Wales ..	1903	6,355,000
New Zealand .. ..	1902	1,363,000
Queensland .. ..	1903	508,000
Tasmania .. ..	1902	50,000
Victoria .. ..	1902	225,000
Western Australia ..	1903	133,000
Austria, Coal .. ..	1903	11,498,000
" Lignite .. ..	1903	22,158,000
Hungary, Coal .. ..	1902	1,163,000
" Lignite .. ..	1902	5,132,000
Belgium .. ..	1903	23,912,000
Borneo .. ..	1901	21,194
Bosnia .. ..	1901	445,007
Canada .. ..	1903	7,140,000
Cape Colony .. ..	1902	166,000
Chili .. ..	1901	226
China .. ..	1900	500,000
France .. ..	1903	34,318,000
Germany, Coal .. ..	1903	116,638,000
" Lignite .. ..	1903	45,674,000
Greece .. ..	1900	13,191
Holland .. ..	1901	312,717
India .. ..	1902	7,424,000
Italy, Lignite .. ..	1902	404,000
Japan .. ..	1902	9,702,000
Natal .. ..	1903	714,000
Peru .. ..	1900	47,500
Portugal, Anthracite ..	1901	16,000
Roumania, Lignite ..	1901	105,000
Russia .. ..	1903	15,000,000
Servia .. ..	1901	170,041
Spain .. ..	1903	2,701,000
Sumatra .. ..	1901	196,207
Transvaal .. ..	1903	2,016,000
Turkey .. ..	1901	200,000
United States .. ..	1903	320,983,000

The total annual production of coal in the world is now estimated at about 800,000,000 tons, of which the United Kingdom produces rather less and the United States rather more than one-third. The value is estimated at more than £270,000,000.

## Consumption of Coal.

The consumption of coal in the chief consuming countries in 1903 was:—

	Tons.	Per Head.
United States ..	316,029,000	3'93†
United Kingdom ..	166,532,000	3'93†
Germany .. ..	103,114,000	1'75†
France .. ..	46,560,000	1'19†
Russia .. ..	18,374,000	0'13‡
Belgium .. ..	21,432,000	3'07‡
Austria-Hungary ..	17,595,000*	0'38‡

\* 1902.

† Tons of 2240 lb.

‡ Metric tons of 2204 lb.

## Coal Resources of Great Britain.

In '65 Prof. Jevons estimated the available supply of coal in the British coal-fields at 83,000,000,000 tons, and stated that if the rate of increase of coal production which then existed were maintained, our coal mines would be practically exhausted by about 1970. This question was investigated by a Royal Commission in '66, and their exhaustive report, was published in '71. The Commissioners estimated that the quantity of available coal within the workable limit of 4000 feet of depth contained in seams of not less than 12 inches thick, with proper allowance made for waste and necessary losses in the getting, was 90,206,000,000 tons within the borders of the exposed coal-fields, with an additional 56,248,000,000 tons estimated to be under the Permian and other formations, or a grand total of 146,454,000,000 tons. In the 31 years, 1870-1900, the aggregate output of the coal mines of the United Kingdom amounted to 5,025,000,000 tons, or to no less than one-eighteenth of the visible supply that existed in '70. The Royal Commission, by including the hidden reserve of coal estimated to be under the Permian and newer formations, were able to fix 360 years from '70 as the limit during which our coal mines would last. Already in 30 years the rate of exhaustion assumed by them has been much exceeded. In 30 years our coal output has more than doubled. If this rate of increase should be kept up for the next 100 years, then the twentieth century would witness the complete exhaustion of our visible supply of coal, namely, the 85,000,000,000 tons remaining in the exposed coal-fields of the United Kingdom.

## Coal Production of the United Kingdom, 1903.

The output of coal in Great Britain and Ireland in 1903 was 230,334,469 tons, being an increase of 3,239,000 tons on the output of 1902.

The value of the output at the mines and

quarries was £88,227,547 as against £93,521,407 in 1902.

The average price of the coal raised in 1903 at the mines and quarries was 7s. 8d. per ton, as against 8s. 2½d. in the preceding year.

### Imports and Exports of Coal.

The following statement gives particulars of the excess of exports of coal over imports in 1903 in the case of the United Kingdom, German Empire, and the United States, the three principal exporting countries:—

	Imports.	Exports.	Excess of Exports.
	Tons.	Tons.	Tons.
United Kingdom..	3,000	63,805,000	63,802,000
German Empire ..	7,284,000	20,808,000	13,524,000
United States ..	3,358,000	8,312,000	4,954,000

The figures for the United Kingdom include coal shipped for the use of steamers engaged in the country's foreign trade—viz., 16,799,848 tons in 1903.

### Output of Minerals other than Coal.

In the "Colonial and Foreign Statistics of Mines and Quarries for 1902," latest returns, the quantities of certain minerals and metals raised in the world are stated in a summary of the output of such materials, and also for Great Britain and Ireland. These minerals, exclusive of coal, are copper, fine gold, iron, lead, petroleum, salt, fine silver, tin, and zinc.

It may be stated that of the total world's supply the British Empire produces rather less than one-third of the coal, one-eleventh of the copper, one-half of the gold, one-eighth of the iron, one-twentieth of the lead, one-seventieth of the petroleum, one-quarter of the salt, one-tenth of the silver, five-eighths of the tin, one-fiftieth of the zinc.

### Copper.

The total quantity of copper raised in the world amounted to 571,852 metric tons, which includes 52,208 tons from the British Empire and 519,644 tons from foreign countries.

The main sources of supply were:—

British Empire:	Metric tons.
United Kingdom	490
Australia*	25,128
Canada	17,767
Cape Colony*	6,120
Newfoundland	2,703
Foreign Countries:	
United States	299,151
Spain*	52,417
Mexico*	43,312
German Empire	30,578
Chili and Bolivia*	30,200
Japan (1901)	27,440
Peru (1901)	7,700
Russia	8,258
Portugal	6,477
Italy*	4,685
Norway*	4,996

### Gold.

The output of fine gold in the world was 447,644 kilos, of which 232,507 were raised in

\* Estimated.

the British Empire and 215,137 in foreign countries.

The main sources of supply were:—

British Empire:	Kilos.
Great Britain and Ireland	116
Australia*	108,459
Canada	31,206
India	14,426
New Zealand*	14,288
Transvaal	53,464
Rhodesia	5,154
British Guiana	2,790
Foreign Countries:	
United States	120,371
Russia (1900)	38,796
Mexico*	10,462
China (1901)	13,680
Brazil*	3,917
Korea	3,732
Austria-Hungary	3,407
French Guiana*	3,674
Japan	2,480

### Iron.

The output for the world of metric tons of iron was 42,669,478, of which 5,184,647 tons were raised in the British Empire and 37,484,831 were raised in foreign countries. The quantities are those which are considered obtainable from the ores raised in the various countries. See also IRON AND STEEL TRADE.

The main sources of supply were:—

British Empire:	
Great Britain and Ireland	4,470,420
Newfoundland*	370,207
Canada*	259,560
India (1900)	34,460
Foreign Countries:	
United States	18,107,470
German Empire*	4,620,063
Spain*	3,853,000
Russia (1900)	2,907,299
Sweden*	1,795,902
Luxemburg*	1,846,825
France*	1,622,380
Austria-Hungary*	1,427,231

### Lead.

The output of lead in the world amounted to 802,947 tons, of which 43,112 tons were raised in the British Empire and 759,835 in foreign countries.

The main sources of supply were:—

	Metric tons.
Great Britain and Ireland	17,988
Australia*	114,691
Canada	10,433
Foreign Countries:	
United States	244,942
Spain*	187,446
German Empire	140,331
Mexico*	98,422
Italy*	22,012
Austria-Hungary*	13,541

### Petroleum.

Of the 22,868,860 tons of petroleum raised in the world the British Empire produced 298,726 tons and foreign countries 22,568,134.

\* Estimated.

## From the British Empire.

	Metric tons.
India . . . . .	227,374
Canada* . . . . .	71,327

## Foreign Countries.

	Metric tons.
United States (1901) . . . . .	11,209,817
Russia (1900) . . . . .	9,827,822
Austria-Hungary . . . . .	525,194
Roumania (1901) . . . . .	320,000
Dutch East Indies* . . . . .	490,913

**Salt.**

Of the salt produced in the world, which was 13,279,032 tons, the main supplies were as follows:—

## British Empire.

	Metric tons.
Great Britain and Ireland . . . . .	1,924,273
India . . . . .	1,057,135
Aden . . . . .	59,899
Canada . . . . .	57,203
Turks and Caicos Islands . . . . .	51,011
Australia . . . . .	42,166

## Foreign Countries.

United States . . . . .	3,029,022
Russia . . . . .	1,736,094
German Empire . . . . .	1,583,258
France . . . . .	863,927
Japan . . . . .	690,896
Austria-Hungary . . . . .	522,486
Italy . . . . .	458,497
Spain . . . . .	426,434
Turkey (1894) . . . . .	203,128
Roumania . . . . .	90,000

**Silver.**

The quantity of fine silver obtained in the world was 4,753,451 kilos, of which the British Empire produced 464,620 kilos, and foreign countries 4,288,831 kilos. The main sources of supply were:—

## British Empire.

	Kilos.
Australia* . . . . .	303,975
Canada . . . . .	136,015
New Zealand . . . . .	20,970

## Foreign Countries.

United States . . . . .	1,726,244
Mexico* . . . . .	1,453,900
Bolivia . . . . .	293,751
Peru (1901) . . . . .	200,081
Chili . . . . .	54,281
German Empire . . . . .	178,408
Spain . . . . .	101,054
Austria-Hungary . . . . .	62,564
Japan . . . . .	54,839
Colombia* . . . . .	58,537

**Tin.**

The tin raised in the world only amounted to 93,441 metric tons, of which 55,958 was produced in the British Empire and 37,483 in foreign countries. The following figures indicate the main quantities produced in each place, viz.:—

## British Empire.

	Metric tons.
Great Britain and Ireland . . . . .	4,462
Federated Malay States . . . . .	47,226
Australia* . . . . .	4,225

## Foreign Countries.

Dutch East Indies . . . . .	15,484
Bolivia* . . . . .	17,222
Spain* . . . . .	4,000

\* Estimated.

**Zinc.**

The tonnage of zinc produced in the world was 503,241 metric tons, of which 9,851 were produced in the British Empire and 493,397 in foreign countries.

The British Empire produced as follows:—

	Metric tons.
Great Britain and Ireland . . . . .	9,275
Australia* . . . . .	576

## Foreign Countries.

German Empire . . . . .	174,927
United States . . . . .	142,303
Italy* . . . . .	52,488
Spain* . . . . .	33,995
France . . . . .	18,844
Sweden* . . . . .	17,925
Algeria . . . . .	14,913
Austria-Hungary* . . . . .	8,309
Greece . . . . .	7,208
Tunis* . . . . .	6,440
Russia . . . . .	5,903

**Mineral Produce of United Kingdom.**

The mineral produce of the United Kingdom and of the Isle of Man both as regards quantity and value in 1903 was as follows:—

Description of Mineral.	Quantity.	Value at the Mines and Quarries.
	Tons.	£
Alum Shale . . . . .	3,284	410
Arsenic . . . . .	902	6,533
Arsenical Pyrites . . . . .	57	57
Barytes . . . . .	24,271	22,320
Bauxite . . . . .	6,128	1,516
Bog Ore . . . . .	4,090	1,022
Chalk . . . . .	4,469,974	192,527
Chert and Flint . . . . .	73,181	15,036
Clay . . . . .	16,198,021	1,767,981
Coal . . . . .	230,334,469	88,227,547
Copper Ore . . . . .	6,428	18,055
Copper Precipitate . . . . .	439	3,721
Fluor Spar . . . . .	11,911	8,538
Gold Ore . . . . .	28,600	16,995
Gravel and Sand . . . . .	2,245,757	171,556
Gypsum . . . . .	219,897	69,422
Igneous Rocks . . . . .	5,425,538	1,308,054
Iron Ore . . . . .	13,715,645	3,229,937
Iron Pyrites . . . . .	9,639	4,816
Lead Ore . . . . .	26,567	202,492
Limestone (other than Chalk). . . . .	12,222,971	1,367,733
Manganese Ore . . . . .	818	656
Mica . . . . .	13,197	5,578
Natural Gas . . . . .	c. ft. 972,460	194
Ochre, Umber, etc. . . . .	14,150	17,045
Oil Shale . . . . .	2,009,602	477,312
Phosphate of Lime . . . . .	70	87
Salt . . . . .	1,886,992	610,633
Sandstone . . . . .	5,409,502	1,795,428
Silver Ore . . . . .	58	1,872
Slate . . . . .	531,612	1,581,477
Sulphate of Strontia . . . . .	22,842	22,842
Tin Ore (dressed). . . . .	7,382	532,450
Uranium Ore . . . . .	6	234
Wolfram . . . . .	272	12,864
Zinc Ore . . . . .	24,888	112,864
Total Value . . . . .	—	101,808,404

\* Estimated.

### Royal Commission on Coal Supplies of the United Kingdom.

In Dec. 1901 this Commission was constituted, with Lord Allerton as Chairman, Mr. W. Russell, 1, King's Bench Walk, Temple, Secretary, and Mr. J. S. Bradbury, of the Treasury, Assistant Secretary. The terms of reference are: "To inquire into the extent and available resources of the coal-fields of the United Kingdom; the rate of exhaustion which may be anticipated, having regard to possible economies in use, by the substitution of other fuel or the adoption of other kinds of power; the effect of our exports of coal on the home supply, and the time for which that supply, especially of the more valuable kinds of coal, will probably be available to British consumers, including the Royal Navy, at a cost which would not be detrimental to the general welfare; the possibility of a reduction in that cost, by cheaper transport, or by the avoidance of unnecessary waste in working, through the adoption of better methods and improved appliances, or through a change in the customary term and provisions of mineral leases; and whether the mining industry of this country, under existing conditions, is maintaining its competitive power with the coal-fields of other countries." A first Report of the Commission [Cd. 1724], together with two Blue-books containing evidence, plans, etc. [Cd. 1725 and 1726], were issued in Aug. 1903. The Commissioners reported that their inquiry was progressing satisfactorily, and presented valuable evidence on (1) the limit of depth in mining, (2) the minimum thickness of workable seams of coal, and (3) waste in working.

### Number of Persons employed at Mines, Quarries, etc.

#### In the World.

The total number of persons employed in these industries in the world has been estimated in 1902 at 4,738,393, of whom 1,592,050 were so engaged in the British Empire, and 3,146,343 in foreign countries.

Great Britain and Ireland . . . . .	952,711
Germany . . . . .	761,922
United States (coal miners and only ore miners of Michigan, Missouri, and Montana) . . . . .	557,407
Russia (1900) . . . . .	376,541
France . . . . .	315,281
Austria-Hungary . . . . .	231,035
Federated Malay States . . . . .	179,951
Belgium . . . . .	172,218
India . . . . .	156,755
Japan (1901) . . . . .	156,398
Italy . . . . .	124,952
Australia . . . . .	105,959
Peru (1900) . . . . .	105,000
Mexico (1901) . . . . .	98,196
Ceylon . . . . .	59,269
Transvaal (for six months only) . . . . .	42,816
Canada . . . . .	33,295
Cape Colony . . . . .	16,262

More than half of the total number were employed in getting coal.

#### In the United Kingdom.

The total number of persons employed in and about all the mines of the United Kingdom in 1903 was:—

	3449 Coal mines.	673 Metalli- ferous Mines.	Quarries.
Persons employed . . . . .	842,066	29,823	98,155
Below ground . . . . .	676,746	17,571	62,921*
Surface workers . . . . .	159,940	11,984	35,234†
(females) . . . . .	5,380	268	—
Young persons under 16 below ground . . . . .	45,234	—	—
Young persons under 16 above ground . . . . .	15,555	—	—

\* Inside.

† Outside.

### MONACO.

Monaco is a principality, surrounded on all sides by the French department of Alpes Maritimes, except to the south, where it borders on the sea. Area, 3 sq. m.; pop. 15,180. Consists mainly of the towns of Monte Carlo, pop. 3794; Monaco, 3292; and Condamine, 6218. Italian in language and traditions, but virtually under French control. The present ruler of the principality is Prince Albert of Monaco, b. Nov. 13th, 1848. He has a son by his first wife, Lady Mary Douglas Hamilton, Prince Louis, b. July 12th, '70. There is a Governor-General and a Council of State. The Roman Catholic is the only Church allowed in the Principality. The first stone of the Casino at Monte Carlo was laid in '58. The Société Anonyme des Bains de Mer et du Cercle des Etrangers de Monaco, whose capital is £1,200,000 in 60,000 shares, holds a contract which will expire at the end of 1947. It has practically to bear the cost of spiritual and temporal government for the Principality, and in addition pays £50,000 annually to the Prince for the concession. From 1907 the amount is to be £70,000, increasing every ten years by £10,000.

Consul-General in London, Mr. T. Lumley, 37, Conduit Street, W.

### MONEY-LENDING AND BILLS OF SALE.

#### 1. Money-Lending.

The Money-Lenders Act, 1900, came into operation on Nov. 1st, 1900. Its chief enactments are that where proceedings are taken in any court by a money-lender for the recovery of any money lent after the commencement of this Act, or the enforcement of any agreement or security made or taken after the commencement of this Act, in respect of money lent either before or after the commencement of this Act, and there is evidence which satisfies the court that the interest charged in respect of the sum actually lent is excessive, or that the amounts charged for expenses, inquiries, fines, bonus, premium, renewals, or any other charges are excessive, and that, in either case, the transaction is harsh and unconscionable, or is otherwise such that a court of equity would give relief, the court may reopen the transaction and take an account between the money-lender and the person sued, and may, notwithstanding any statement or settlement of account, or any agreement purporting to close previous dealings and create a new obligation, reopen any account already taken between them, and relieve the person sued from payment of any sum in

excess of the sum adjudged by the court to be fairly due in respect of such principal interest and charges, as the court, having regard to the risk and all the circumstances, may judge to be reasonable; and if any such excess has been paid, or allowed in account by the debtor, may order the creditor to repay it; and may set aside, either wholly or in part, or revise, or alter, any security given or agreement made in respect of money lent by the money-lender; and if the money-lender has parted with the security may order him to indemnify the borrower or other person sued. The Act laid down stringent rules as to registration of money-lenders under their own usual trade names and addresses, and imposed heavy penalties for breaches of the rules.

**Loans for Betting.**—Money lent for paying ordinary bets is recoverable, though there are exceptions as regards money knowingly lent for special forms of gaming and wagering. But one who actually pays bets of any kind, as an agent, clearly cannot recover from his principal the sum thus advanced. This subject depends upon the interpretation of various statutes and cases too technical for fuller treatment here.

**Loans to "Infants."**—Generally, any contract for a loan entered into by an "infant" (person under 21) is absolutely void, and so is any agreement to pay such void loan or interest made after coming of age; and likewise any instrument, negotiable or otherwise, given in connection with the same. But a loan to an infant is recoverable if made for the purpose of paying debts already incurred for "necessaries" (things suitable to his position in life and requisite at the time); and, probably, is recoverable if for the purchase of "necessaries," or if incidental to a contract for the infant's benefit, such as one obtaining him fit employment. A person is guilty of a criminal offence if, for profit, he sends any circular or other document to an infant inviting him to borrow money, or to apply anywhere for information as to borrowing; or if he solicits an infant to make an affidavit or statutory declaration in connection with any loan. And if it is proved that the person to whom any document, as above mentioned, has been sent is an infant, the sender is deemed to have known that such person was an infant unless he proves that he had reasonable ground for believing him to be of full age.

## 2. Bills of Sale.

The Bills of Sale Acts, '78 and '82, apply to documents which transfer the property in goods or chattels, while not giving actual possession. Usually, a bill of sale on goods answers to a mortgage of real estate. Every bill of sale given by way of security for the payment of money is void unless made in accordance with the form in the schedule of the Act of '82. It must be duly attested by one or more credible witnesses not being a party or parties thereto. It must be registered within seven days after making, and the registration must be renewed once every five years. When first registered, a copy of the bill, together with an affidavit of the time of such bill being given, of its due attestation, and of the residence and occupation of the person giving the same, and of every attesting witness, must be presented to the registrar and filed by him. If the bill of sale be given subject to any defeasance, condition, or declaration of trust, such defeasance, condition, or declara-

tion must appear, if not in the body of the bill, at least on the same paper, and must be set forth in the copy filed. A transfer or assignment of a registered bill of sale need not be registered. Bills of sale comprising, in whole or in part, the same chattels, take priority in order of registration. Delays, omissions, or mistakes in the registration of bills of sale may be rectified by the order of any judge of the High Court. A bill of sale executed within seven days after the execution of an unregistered bill of sale will be held void, in so far as it affects the same chattels, unless it is proved not to have been executed for the purpose of evading the law. Any bill of sale not complying with the conditions of attestation and registration, is void as against the giver's trustee in bankruptcy, etc. A bill of sale given in consideration of a sum less than £30 is void. A bill of sale is void except as against the grantor with respect to any personal chattels acquired by him after its execution. But this provision does not apply to growing crops or fixtures or machinery subsequently acquired in substitution for fixtures or machinery specified in the bill. Chattels assigned under a bill of sale are not liable to be seized by the grantee unless (1) the grantor make default in paying the money thereby secured, or in fulfilling any condition necessary to the security; (2) the grantor become a bankrupt, or allow the goods comprised in the bill to be distrained for rent, rates or taxes; (3) the grantor fraudulently remove, or suffer to be removed, from his premises the goods comprised in the bill; (4) the grantor refuse, without reasonable excuse, to produce to the grantee his last receipts for rent, rates, and taxes; (5) execution has been levied on the grantor's goods under any judgment. The Bills of Sale Acts '90 and '91 exempt letters hypothecating or declaring trusts of imported goods during the interval between the discharge of the goods from the ship in which they are imported and their deposit in a warehouse or reshipment for export, or delivery to a purchaser, from the Bills of Sale Act '82.

See LAW CASES, 1904.

**Monod, Gabriel**, French writer and politician, was b. at Havre, March 7th, 1844. He followed the usual French University course, but has also made some important studies in Italy and Germany. He served in the war of '70-71 on the ambulance staff. He was one of the principal defenders of Dreyfus. In '82 he founded the *Cercle St. Simon*, a society for the study of history, and was one of the founders of the *Ecole Alsacienne*. In '76 he established the important *Revue Historique*, which he still conducts. He is a member of the French Institut, and of the Academy of Munich. His first publication was "*Allemands et Français*" ('71); it was followed by "*Les Maîtres de l'Histoire*" (Renan, Taine, Michelet), and by "*Grégoire de Tours*." His most recent publication is "*Les Annales Cartésiennes*." Having married a daughter of Alexander Herzen, he is in contact with the Russian Reformers.

## MONTENEGRO.

Montenegro is a principality, lying between Northern Albania on the south and Herzegovina on the north, under the rule of H.R.H. Prince Nicholas I. (who in Dec. 1900 assumed the title of Royal Highness), b. Oct. 7th, 1841. After an educational course at Trieste and Paris.

he succeeded his uncle, who had been assassinated, Aug. '60. He married, in the same year, Princess Milena, the daughter of the Vice-President of the Council of State, and has three sons and six daughters. The heir-apparent is Prince Danilo, b. June 29th, '71, who married the Duchess Jutta of Mecklenburg-Strelitz in July '99. During '96 the bicentenary of the foundation of the dynasty was celebrated. Queen Victoria gave the Prince the Grand Cross of the Royal Victorian Order in March '97. His daughter, Princess Helena, is married to King Victor Emmanuel III. of Italy.

The Prince's rule is practically absolute, though nominally it is shared with a State Council of eight, half elected by the inhabitants capable of bearing arms, and half nominated by the Prince. The country is divided into a number of districts governed by prefects who are called "captains," but whose powers are not at all defined. All the inhabitants are trained as soldiers, and the effective fighting strength is put at about 37,000. For 400 years the principality maintained its independence against Turkey, and in '78 this independence was recognised by the Treaty of Berlin. The waters of Montenegro are by the Treaty closed to the ships of war of all nations, Austria administering the maritime and sanitary police on the Montenegrin coast. Russian financial help is given in regard to military and educational matters, and Austria makes an annual subvention towards the maintenance of the roads. The Montenegrins belong to the Servian branch of the Slav race. Prevailing religion, Greek Church. Education compulsory and free. A large portion of the principality is uncultivable, consisting of forest and mountain pasture, and bare limestone. Large herds of cattle are reared, and some small crops are grown.

**Area** (including town and district of Dulcigno, ceded by Turkey in 1880), 3630 sq.m.; pop. 230,000. **Capital**, Cetinje (pop. 4000). **Revenue and expenditure**, 1903, about £100,000; **public debt**, 1903, £120,000. **Imports**, 1903, £220,000; **exports**, £120,000.

**Council of State: President and Minister of Interior**, Bojo Petrovic.—**Finance**, L. Miouchekovitch.—**Foreign Affairs**, Gavro Vukovic.—**War**, E. Plamenatz.

**British Minister Resident**, R. J. Kennedy, C.M.G.

**Morant, R. L.**, C.B., Secretary to the Board of Education, is the only son of the late Robert Morant, and was born April 7th, 1863, and ed. at Winchester College and New College, Oxon. For some years he did various kinds of educational work in England and in Siam. He entered the Education Department, Whitehall, in '95, and attained to the rank of Senior Examiner at South Kensington. He was Private Secretary to Sir John Gorst, M.P., and to the Duke of Devonshire, and during the progress of the Education Bill, 1902, rendered invaluable aid to Mr. Balfour while the Bill was passing through the House of Commons. He received his C.B. as a Coronation honour. Mr. Morant was appointed Acting Secretary to the Board of Education on Nov. 1st, 1902, and Permanent Secretary on April 1st, 1903. Address: 15, Queen Anne's Gate, Westminster.

**Morgan, J. Pierpont**, was b. at Hartford, Conn., on April 17th, 1837; ed. at the English High School, Boston, and at Göttingen Uni-

versity. His father was a banker in New York and London, and Mr. Morgan is a member of the great banking firms of J. S. Morgan & Co., London, T. P. Morgan & Co., New York (which he established in '95), and other firms. His financial genius has brought and kept his name before the public of both continents for years past, particularly since the formation of the great Steel Trust and the Atlantic Shipping Combine. He is interested in American railroads, and is said to control lines representing more than £600,000,000 of share capital, in banks and other financial corporations representing about £40,000,000 more, and in all kinds of industrial enterprises in this country and in America. He is a yachtsman, and an art connoisseur with a magnificent collection of great paintings, books, etc. His benefactions have been generous. Address in London: 13, Prince's Gate, S.W.; in New York, Madison Avenue.

**Mormons.** Consult "The Story of the Mormons," by W. A. Linn. (Macmillan, 17s. net).

## MOROCCO.

Morocco is the westernmost of the Barbary States, occupying the N.W. corner of Africa. An empire consisting of the kingdoms of Fez and Morocco, and the territories of Sus, Draha, and Taflet. There are three capitals: Fez (pop. 140,000), Morocco (pop. 50,000), Mequinez (pop. 56,000). **Chief ports** are Mogador and Tangier, on the Atlantic; Tetuan (Port Marteen) and some smaller places on the Mediterranean. Tangier has a pop. of about 30,000. Taflet is the point of arrival and departure for the caravans through the Sahara.

Morocco is ruled by a Sultan, Mulai Abdul Aziz, usually styled "Emperor" by Europeans. He was b. Feb. 24th, '78, and succeeded his father, Mulai Hassan, on June 7th, '94. A rising in favour of his elder brother, Mulai Mohammed, was suppressed, and in a few months the Sultan made his position secure. A son, Prince Hassan, was b. in July '99. The Sultan began with strong progressive tendencies, but at the end of 1904 he had relapsed into the worst barbarities of former times. He is absolute, but the tribes beyond the mountains scarcely acknowledge his authority, which over a large part of his dominions is that of a titular chief rather than that of a ruler. The Sultan is head of religion (the Malekite sect of the Sunnite Mahomedans) as well as of the state. He has six ministers, from whom he receives advice, and through whom he carries on the executive. An insurrection against his authority headed by Omar Zarahuni, otherwise called "Bu Hamara," broke out in Oct. 1902, and latterly the country has been in a state of passive revolt.

The Sultan's forces comprise about 30,000 excellent men of all arms, lately under command for training of Kaid Sir Harry Maclean. The infantry arm is the Martini.

## The Anglo-French Agreement.

By the Anglo-French Agreement, April 8th, 1904, the French Government declared that they had no intention of altering the political status of Morocco, and the British Government recognised that it appertained to France, as a Power whose dominions are conterminous for a great

distance with those of Morocco, to preserve order in that country, and to provide assistance for the purpose of all administrative, economic, financial, and military reforms which it may require. The British Government declared that they would not obstruct the action taken by France for this purpose, provided that the treaty rights of Great Britain, including the right of coasting trade between the ports of Morocco enjoyed by British vessels since 1901, were left intact; and that British commerce, including goods in transit through French territory and destined for the Moorish market, were treated on a footing of absolute equality with that of France. In order to secure the free passage of the Straits of Gibraltar, the two Governments agreed not to permit, nor to undertake, the construction of fortifications on the Moorish coast between Melilla and the River Lebon, excepting the places occupied by Spain. The two Governments took into special consideration the interests of Spain in Morocco, and the French Government undertook to come to an understanding with the Spanish Government in regard to them, and to communicate such agreement to the British Government. The Agreement was made binding for 30 years, with provision for the extension of the period for 5 years at a time.

It was reported in Oct. 1904 that an Agreement between France and Spain as to Morocco had been arrived at. The limits of the Spanish sphere of influence were modified, and were made to include Tetuan, Tangier, and the whole of the Riff littoral, subject to a stipulation that the agreement should not come into force for 15 years. The agreement also secured the neutralisation of the North African coast between Melilla and the river Sebu, as well as of Ceuta and the positions opposite Gibraltar. Spain gave her adhesion to the terms of the Anglo-French Agreement, and therefore to the maintenance of the territorial integrity of Morocco, and recognised the right of France to give the Sultan the military, economic, or financial assistance which he might need.

### Statistics and Diplomatic.

Trade is carried on chiefly with Great Britain, France, and Germany, and, though increasing, is much hampered by the political situation. Morocco is a fine wheat-growing country, ridged with many ranges of mountains, and rich in minerals; but the barbarous form of government prevents the development of the country's resources. The chief exports are cereals, eggs, skins, almonds, olive oil, wool, cattle, etc.

Area estimated at about 220,000 sq. miles. Population now estimated at about 8,000,000, including Berbers, Tuaregs, and Arabs. Imperial revenue about £400,000 per annum. Imports, 1902, £2,140,626; exports, £1,559,823. Great Britain sent 55·3 per cent. of the imports in 1901, and 57·7 per cent. in 1902.

Ministry: *Grand Visier*, Sid Fadhoul Gharnit; *Foreign Affairs*, Ben Sliman; *War*, Sid Mohammed Guebbs; *Commerce*, Abdurrahman Tazee; *Finance*, El Mokri.

British Minister at Tangier, and Consul-General for Morocco, Mr. Gerard A. Lowther, C.B.

British Consuls, H. E. White (Tangier), A. Maclean (Dar-el-Baida).

French Minister for Morocco, M. St. René-Taillandier.

### History, 1904.

An American citizen, Mr. Perdicaris, and his stepson, Mr. Varley, a British subject, were carried off by the brigand Raisuli from the suburbs of Tangier (May 18th). The release of the prisoners was offered on condition that the Sultan should disband his forces near Tangier, and accede to other demands of Raisuli, including dismissal of the Governor of Tangier, the payment of £11,000 ransom, and the release of all Raisuli's tribesmen in prison. The Sultan having agreed to Raisuli's demands, the Governor of Tangier was dismissed by Imperial edict (June 8th) and the captives were released (24th).

The French Government arranged with the Sultan for the appointment of a Frenchman as Financial Adviser, with agents, to undertake the control of the Customs on behalf of the French Banks, which had advanced a loan of £2,000,000 to the Sultan. It was also arranged that Algerian police should be introduced into Tangier, where life and property had become insecure. The ex-Minister of War, Sid Mehdi El Menebhi, G.C.M.G., who had been on good terms with the Sultan when he resigned his post in August, suddenly found his property throughout the kingdom confiscated by the Sultan's orders. As he was a British protected subject, the British Government protested against this injustice, and demanded the restoration of his property. The *Times* correspondent at Tangier was attacked, and on the request of the British representative abandoned his house outside the city (Dec. 2nd). At the end of December a demand from the Sultan for the recall of the French military mission at Fez led to a threatening situation for a few days; but the obvious determination of the French Government to carry through their policy, and to establish order and security in the country, led the Sultan to repeal his decision as to the military mission.

Morrison, George E., M.D., the famous *Times* correspondent at Peking, was b. at Geelong, Victoria, where his father was principal of the College, in 1862. After two years at Melbourne University, in '82 he shipped as an ordinary seaman to the South Sea Islands to study the Kanaka labour question, and his articles in the *Melbourne Age* on the subject had a marked effect in improving the conditions of the traffic. Then he walked across Australia, from Normanston in the north to Geelong, a distance of 2043 miles, in 123 days. He was wounded and left for dead in a pioneer expedition which he led to New Guinea, but recovered, and in '87 he took the M.B. and C.M. degrees at Edinburgh University. After more wanderings in America, the West Indies, Spain, and Morocco (where he was Court physician for a time), he returned to Australia and became resident surgeon of the hospital at Ballarat '90-2. Then he went to the East, and walked across China from Shanghai to the Burmese frontier, afterwards writing an account of his amazing feat in "An Australian in China." In '95 he went as *Times* correspondent to Siam, and in '97 he was appointed as resident correspondent at Peking. His great successes there, and "his intelligent anticipation of events" have been universally acknowledged. To crown his strange and adventurous career, he was believed to have perished with all the other Europeans in Peking,

in the falsely reported massacre of 1900, and the *Times* published an obituary notice of him.

**Mosely Commissions.** A Commission of Inquiry into the educational system of the United States and its bearing on national commerce and industry, projected by Mr. Alfred Mosely, C.M.G., left Southampton on Oct. 3rd, 1903. The Commission was composed of representatives of the various educational interests in England, including educational experts, administrators, professors, members of educational bodies, as well as leading men in the departments of commercial and industrial life. Most of the educational centres in the United States were visited. The report of the Commission was issued in 1904. The report of the similar Labour Commission taken by Mr. Moseley to America in 1902 was published during 1903. Copies of both Reports may be obtained from the Co-operative Printing Society, Ltd., 118, Corporation Street, Manchester.

### MOTOR VEHICLES AND MOTOR BOATS,

In the 1900 ed. a short survey was given of the progress of automobilism in the United Kingdom since legal charter was given to this form of road locomotion by the Locomotives on Highways Act, 1896, and this information has been brought up to date in subsequent editions. The following article sets out the present position, and also deals with the advent of the motor boat—a form of automobilism which first came prominently before the general public in 1904.

#### *Motor Vehicles Registered.*

The year 1904 witnessed greater strides in all forms of automobilism than any preceding twelve months. In the last issue the number of motor vehicles running in the United Kingdom was estimated at about 10,000. The registration returns now compiled by the Home Office point to the existence of nearly double that number of four-wheeled cars at the present time, and about the same number (viz. 20,000) motor cycles with two or three wheels, and the numbers of both classes are being added to week by week. The exact numbers registered up to April 1st, 1904, were 14,887 motor cars and 16,534 motor cycles—a total of 31,421. The number of drivers registered to the same date was—for motor cycles 5152, for cars 35,508, making a total of 40,660.

It is satisfactory to find that British manufacturers—of whom there are now at least 130—are not only increasing their hold upon the home trade, but are exporting to a substantial extent. Whilst the value of cars exported for the first nine months of 1904 remained about the same as for the corresponding period of 1903, the exports of automobiles in parts showed a considerable increase. This is accounted for by the fact that it is possible to evade the severity of foreign tariffs by dismounting machines and shipping them as "general machinery" instead of as motor carriages. The larger number of the motor cycles in use in the United Kingdom are of domestic manufacture.

The demand for delivery vans, lorries and other heavy vehicles is increasing under the encouragement of concessions made by the Local Government Board as to tare in pursuance of clause 12 of the Motor Car Act of 1903. Several of the

railway companies are employing this class of vehicle as feeders to their lines. Motor omnibuses and char-a-bancs have also been put into service by several of the railways, notably the Great Western, with encouraging results; and the War Office and the Post Office continue to pay close attention to the utility of motor vehicles. The London omnibuses companies in 1904 ran trial services with greater success than in 1903, and it was announced on Jan. 3rd, 1905, that the London Road Car Co. had ordered 50 motor 'buses for use, part petrol motors and part steam, in Metropolitan traffic. In several important provincial towns, notably seaside places, whose amenities are of special value, the authorities have preferred to introduce motor 'buses rather than electric trams—e.g. at Eastbourne, Hastings and Torquay.

The application of the principle of automobilism to railway work has also been an important feature of the last two years, and the Great Western has now about 50 steam rail-motors running on or on order, whilst the North-Eastern is trying the petrol-electric system and the Great Northern is experimenting with a direct-driven petrol rail-car.

#### *Motor Car Act, 1903.*

The Motor Car Act 1903, which came into force on Jan. 1st, 1904, made some important changes in the law as to motor traction on roads. It set up a system of registration for motor cars, with a view to the more easy identification of the cars and their owners. It requires drivers to possess licences, and provides for penalties in cases where cars are driven by unlicensed persons, or by persons whose licences have been suspended for offences against the law. It repealed the existing maximum speed limit, and substituted a limit of 20 miles an hour, while at the same time defining and strengthening those provisions of former laws which were aimed at the prevention of reckless and negligent driving, and of indulgence in a rate of speed which, although within the legal limit, might be dangerous under the particular circumstances. It also provided for the issue by the Local Government Board of regulations in special cases having for their object a reduction in particular localities of the maximum speed limit to ten miles an hour, or the prohibition or restriction of the driving of motor cars on specified highways of a narrow or other special character. Altogether, the effect of the Act is that the driver of a motor car is under considerably more statutory restraint than before, and that he incurs a much more serious liability if he fails to observe the conditions imposed upon him.

The working of the Act has been, on the whole, satisfactory. There have been fewer summonses for breaches of the law, and a more general tendency on the part of drivers to respect the convenience of other sections of the public. The dust nuisance remains the most serious cause of offence; but the Automobile Club and the Roads Improvement Association have been going thoroughly into the matter of treating public roads with a view to the better consolidation of the surface. In many places the application of "Westrumite," crude oil, or gasworks tar has been tried with encouraging success, both as regards the elimination of dust and the better preservation of the roads. Expense, however,

is a serious matter, as it is stated that the application of gasworks tar costs about £64 per mile for a road 21 ft. wide. It is claimed that the cost of applying these remedies is counterbalanced by the greater durability of the road and the less frequent need of repair, while the hygienic benefits and the increased comfort of the owners and users of property adjacent to roads treated in this manner are considerable.

### **Motor-Car Feats.**

1904 has seen many notable feats performed by motor cars. A British-made car was driven up the Snowdon railway to the summit of that mountain by Mr. Harvey du Cros, jun. An American "runabout" car repeated the feat a week later, reaching the summit in about 61 minutes. A distance of considerably over 2000 miles has been accomplished upon British and Scottish roads by a single car without once stopping the engine. This is good evidence of the efficiency and reliability to which manufacturers have brought these vehicles. Mr. Chas. Glidden, an American, drove a British Napier car through Sweden to a point within the Arctic Circle, thus establishing a record. Shortly afterwards the same gentleman commenced an automobile trip round the world, and covered some 1700 miles upon the track of the Canadian Pacific Railway to Vancouver; the wheels of the car being specially fitted with flanged steel rims so that they might run upon the permanent way.

### **Second Annual Exhibition.**

In February 1904 the second annual exhibition of the Society of Motor Manufacturers and Traders was held at the Crystal Palace. This important Show was well attended; it has, however, been decided that the 1905 Exhibition shall take place at Olympia, on account of the greater accessibility of the latter building. The above exhibitions are chiefly devoted to motor cars, motor cycles being almost exclusively shown at the Stanley Cycle and Motor Show held in November. In February Side-slip Trials were held in France with a view to the perfection of the apparatus to eliminate the danger resulting from cars skidding bodily owing to greasy road surface. These were followed in March by Side-slip trials organised by the Automobile Club. Much useful information was obtained, and the French "L'Empereur" device obtained the highest award in each trial.

### **Motor-Car Trials.**

In May the British Eliminating Trials for the Gordon-Bennett race were held in the Isle of Man, and a team of three gentlemen (Messrs. Edge, Girling and Jarrott) was selected to carry the British colours in the more important fixture over the Taunus course at Homburg. The latter race took place on June 17th, 1904, entries having been received from the French, British, German, Belgian, Italian and Austrian Automobile Clubs, America being the only notable absentee. M. Théry (France), driving an 80-h.p. Richard-Brasier car, proved to be the winner, being closely followed 11 minutes later by Herr Jenatzy (Germany), the holder of the Cup, on a 60-h.p. Mercedes car. There was no serious accident, in spite of the fact that speeds of

over 80 miles per hour were often attained, the winner's average being over 60 miles per hour (350 miles in 5 hours 50 minutes). That this average speed could be maintained on a circular route of give-and-take roads, and that some 18 competitors were distributed round upon the course (measuring 87 miles), proves the remarkable ease and certainty with which even racing automobiles may be handled. Herr Jenatzy's average speed in the previous Gordon-Bennett race in Ireland was 49½ miles per hour. In the team race in connection with the above the lowest and winning marks were scored by Germany, whose cars took second and third places.

The fastest speed ever made by an automobile was attained by M. Barras on a 100-h.p. Darracq car at Ostend, on Nov. 15th, 1904, when the remarkable speed of 104¾ miles an hour was maintained over 1 kilometre, which was covered in 21⅔ secs. The British speed record was made by Mr. Clifford Earp, at Blackpool, in October 1904, with a speed of 84·68 miles per hour.

In August the Reliability Trials for Small Cars were held under the auspices of the Automobile Club; this was a successful fixture, some 38 vehicles taking part in the competition. The results proved that the light car is as reliable in its sphere in all respects as its more highly-powered rival. It is believed that the result has promoted the popularity of small cars in a very great degree. It is noteworthy that 65 per cent. of the cars entered were of British manufacture, and the results were about evenly divided between British and foreign makers. Prices of these cars varied from £125 to £200, and all used petroleum spirit as motive power.

The most important winter fixture is the Paris Automobile Salon, held in the Grand Palais des Champs Elysées in December. This is the largest and most representative collection of motor cars, appliances and allied industries ever brought together. Both at the 1903 and 1904 shows a marked improvement was shown in points of detail in construction, but on the whole there were but few radical changes in general design. A noteworthy and important feature was the tendency towards standardisation of models and principal parts, this tending to cheapen cost of production, and so bring the motor car within the reach of a larger section of the public, thereby increasing the field for business.

### **Construction Improvements.**

The construction of automobiles has undergone but little change during the year, most of the improvements being confined to matters of detail. The employment of magneto-electric ignition is gradually increasing, and mechanically operated inlet valves now take the place, on the majority of cars, of the atmospherically actuated type employed until recently. Multi-cylinder engines are, except in very light cheap cars, coming more into fashion as they become cheaper to manufacture—the four-cylinder variety being the most favoured on account of its more perfect balancing and consequent lessening of vibration and noise. There is a marked tendency to employ separate cylinders in preference to those cast in pairs, so that more efficient cooling may be obtained. Remarkable progress has been made in rendering motor vehicles more silent than heretofore,

some makes being particularly quiet when running. **Gear transmission** is very slowly superseding the chain-driven types. The usual Panhard type of gear-box, providing three or four speeds and reverse, is still to be found on the large majority of cars. A practical change-speed gear providing electromagnetic clutches and operated by a small hand switch on the steering column, hails from France. This does away with the sliding gear and its operating levers, and also with the main leather-faced clutch between the engine and gear-box, and marks another step in advance in construction of road cars. The **expiration of the Dunlop pneumatic tyre patents** has caused a considerable drop in the cost of pneumatic tyres and a corresponding diminution of the expenses of motoring. Steam vehicles are barely holding their own in the automobile world, except in the case of heavy public service and road transport waggons. Of the latter there are several makes on the market capable of carrying a load of 5 tons and drawing a trailer with a load of 2 tons at a speed of about 5 miles an hour on the level. These vehicles cost between £600 and £800. A large number of experiments have been made with varying success with internal combustion or "explosion" engines designed to burn **paraffin as fuel**, in place of petrol spirit. Paraffin (or heavy oil) is roughly about one-third the price of petrol spirit; hence a great economy may be expected from its successful adoption. It is also less dangerous to use, on account of its low flash point; for marine purposes this is a particularly desirable advantage.

#### **Motors for Heavy Traffic.**

With regard to motor vehicles for heavy traffic a departmental committee was appointed in Jan. 1904, by the President of the Local Government Board, to inquire and report on the question of increasing the maximum tare allowable. The Committee reported that they were fully satisfied that the development of the heavier kinds of motor-car traffic was at present unduly restricted by the maximum unladen weights prescribed by the Locomotives on Highways Act, 1896. They accordingly recommended that the maximum weights should be increased from 3 tons and 4 tons to 5 tons and 6½ tons respectively, but that the total gross weight on any one axle of a motor car, when laden, should not exceed 8 tons. They also made a number of recommendations as to marking of the vehicles with their weights unladen and laden, the width of metal tyres, their maximum speed, etc. This report resulted in the concessions to the manufacturers of motor cars for heavy traffic referred to on p. 390, and the **Heavy Motor Car Regulations** are to come into force on March 1st, 1905.

#### **Marine Motoring.**

As already stated, a great development has taken place during 1904 in marine motoring. It is urged in some quarters that this branch of automobilism has a nearer connection with marine engineering than with matters which pertain to mechanically propelled vehicles. The marine automobile movement, however, was initiated entirely by the builders of motor cars, and it has been due to their enterprise and skill that the motor boat has been so rapidly brought to the state of perfection which

is now claimed for it. This new movement has attracted the attention of the Admiralty; and motor boats were used on the south coast and in the lower reaches of the Thames during the recent naval and military manœuvres, when they proved themselves to be reliable and useful as messengers, and in other ways. Fast motor boats, owing to their small size and high speed, should prove useful for scouting and for any naval work which requires boats that offer a small mark to an enemy's gunners and attain higher speeds than any existing cruiser or battleship. During the past twelve months motor-boat racing has taken place on a large scale in England and on the Continent. Nearly all the famous automobile manufacturers have been equipping specially constructed hulls with powerful engines up to 150 h.p. Some remarkable records have been made, more especially in the high speeds obtained in comparison with the shortness and small displacement of the hulls of these craft. Perhaps the most noteworthy of these performances was that of a small French boat, *La Rapée III*. This boat, which is only 25 ft. long, attained the astonishing speed of 22'66 knots or 26'08 miles per hour. **Motor boats for pleasure purposes** have found a ready sale in England, and 1904 has seen a large increase in the number of these small craft on our inland waterways. It is possible to purchase a well-built and reliable motor boat, capable of seating eight persons comfortably and of a speed of six to eight knots per hour, for £100. Motor boating costs less than driving a road vehicle, and repairs are less frequently needed and more cheaply effected, so that this new pastime may be expected to develop considerably.

#### **The International Cup.**

On July 30th the **British International Cup for Motor Boats** was raced for by British, American and French craft; and in the final Mr. Edge's *Napier Minor* beat Richard Brasier's *Trefle à Quatre*. The owners of the latter entered a protest on a technical point, which was later upheld by the races committee, although the British boat had proved herself the faster, and the race was given to the French boat. Motor boat fixtures were held at different places in England and on the Continent in 1904, but were mostly confined to speed contests. More important than these were the Reliability Trials for motor boats held in August, which were most thoroughly carried out, and resulted in the acquisition of much useful information. Gold and silver medals were presented to successful competitors.

One of the most notable marine events of the year was the race from **Calais to Dover**, which was won by the most powerful 40-ft. racing boat ever built, *Mercedes IV*. This boat afterwards won the Gaston Menier Cup at Deauville, and is at present considered the fastest craft in the world under 40 ft. in length. In the Calais-Dover race *Mercedes IV*, easily left behind the crack cross-Channel turbine boat *The Queen* (which had been specially chartered to follow the race), arriving at Dover some ten minutes in advance of the latter.

#### **Clubs and Societies.**

The Automobile Club (119, Piccadilly, London) has shown a particularly enterprising spirit

throughout the year both in the social side and the promotion of races, tests, and trials of all kinds; also lectures bearing upon the theory and practice of automobile manufacturing and kindred subjects bearing upon the progress of automobilism. This society organises from time to time tours and excursions; it provides a club house, library, and bedrooms for members; a club garage and special rates in provincial garages; a Club Journal is issued to members; an Automobile Handbook giving information as to hotels, repairers, etc.; services of a club engineer, apparatus for weighing cars and for testing brake horse-power of motors; it gives instruction in driving, and issues driving certificates which will be accepted by the authorities abroad. Subscription: £5 5s. (entrance fee).

**The Motor Union** (16, Down Street, Piccadilly, London) has an organisation which exists to advance the automobile movement in the United Kingdom, and to encourage and facilitate touring by means of mechanically propelled vehicles. The subscription is £1 rs. per annum, and the advantages of membership include the consideration of any claim against members and advice in respect of actions at law, either civil or criminal, in connection with the use of motor vehicles; the protection of rights and privileges of automobilists, including legislative questions; free information as regards home and foreign routes, maps, guides, customs, formalities and driving regulations in foreign countries; also information as to hotel and garage accommodation, fuel supplies, and addresses of competent repairers. The Union issues a badge to members. Ladies or gentlemen may become members upon payment of subscription, without election, subject to the right of the committee to cancel the enrolment of the member at the end of the year. Members of the Automobile Club and affiliated clubs are *ipso facto* members of the Union without further payment. Life members pay a subscription of £10 10s.

**The Society of Motor Manufacturers and Traders** is increasing in importance; this is essentially a trade society. It organises the principal and most representative of the Shows that are held annually.

**The Auto-Cycle Club**, 18, Downing Street, Piccadilly (F. Straight, Secretary), acts as a society of encouragement, and deals with social and racing matters in connection with motor cycling. It organises tests and trials both on the track and on the road; deals with legal and legislative matters; safeguards the rights and privileges of members, and takes action where advisable in cases where general principles affecting the rights of motor cyclists as a whole are involved. Membership of the Auto-Cycle Club carries with it full membership of the Motor Union. Subscription, £1 rs.; entrance fee, 5s.

**Murray, Major-Gen. Sir James Wolfe**, K.C.B., fourth Military Member of the Army Council and Master-General of the Ordnance, was b. in '53, and entered the Royal Artillery '72. He served in the Ashanti campaign in '95, and in the South African war '99-1901. On the conclusion of the war he was appointed to the command of a 2nd-class district in India, and in 1903 was appointed Quartermaster-General of the Forces there. He was given his present appointment on Feb. 13th, 1904.

## MUSIC, 1904.

Virtually the musical year was made up of festivals, operatic performances, and the feats of child-violinists. No very ambitious work by a British composer kindled the curiosity manifested in 1903 in Elgar's "The Apostles," and few surprises were forthcoming. But whilst the younger generation failed to greatly advance upon preceding productions, there was evidence of the good likely to be accomplished by the generosity of Mr. S. Ernest Palmer in founding the **Royal College of Music Patron's Fund** for the performance in public of works by promising British students.

Public appreciation of the artistic gifts of **Sir Edward Elgar** was displayed in an unprecedented manner. A festival was organised in March at Covent Garden Opera-house, where as many works from his pen as could be brought into three evening performances were performed under the direction of Dr. Richter. For the occasion Elgar composed a concert overture, "**In the South (Allassio)**," which met with immediate favour.

The important autumn provincial festivals were, taking them in order of occurrence, those at Gloucester (Three Choirs), Cardiff (held a year earlier than usual in order to avoid clashing with Bristol), and Leeds. At each several novelties were submitted. In the Yorkshire centre Dr. Walford Davies distinguished himself with an impressive setting in cantata form of the old morality play "**Everyman**," whilst Sir A. C. Mackenzie was complimented upon "**The Witch's Daughter**," the text of which was a poem by J. G. Whittier. A successful novelty in quite a different line was Dr. Cowen's treatment at Cardiff of "**John Gilpin**."

Three distinct opera seasons on an extensive scale, besides visits from the Carl Rosa troupe, resulted in interesting revivals and the introduction of works new to this country. At Covent Garden in the summer Madame Melba was seen in Saint-Saëns' short poetic work "**Helene**," and to Madame Calvé was due the production of Massenet's "**Salomé**," long known on the Continent as "**Herodiade**." The revivals were Verdi's melodious "**Un Ballo in Maschera**" (for Signor Caruso, the celebrated tenor, whose return afforded great satisfaction) and "**La Navarraise**." To test the genuineness of the demand for "National English Opera," Mr. Charles Manners, whilst the Covent Garden season was in progress, opened **Drury Lane** for a three-months' series of representations in English. Amalgamating his companies, he gave many familiar works, and restored to the London stage Halevy's "**The Jewess**," and Wagner's "**The Flying Dutchman**." In October Messrs. Rendle and Forsyth, through Mr. Henry Russell, induced the **San Carlo (Naples) Opera Company**, together with Signor Caruso, to enter upon a six weeks' season at Covent Garden, these performances being, of course, in Italian. Their novelty was Cilea's two-year-old "**Adriana Lecouvreur**," which was very favourably received.

Mr. Henry J. Wood's new regulations in connection with the Queen's Hall orchestra were followed by the formation of an independent body which, under the title of the **London Symphony orchestra**, gave concerts on its own account under various conductors, native and foreign. With his reconstituted force Mr. Wood presided over symphony concerts, over

the Queen's Hall promenade concerts, and over the Sunday Concert Society's afternoon programmes.

The appearance in the provinces as composer and orchestral conductor of a little boy named **Max Darewski** paved the way for several talented children, the majority of whom were violinists. With credentials from Dr. Joachim and other eminent professors **Franz von Vecsey**, from Buda-Pesth, was so successful in his exposition of classic as well as modern masters that he drew crowded audiences until the end of the season. **Florizel von Reuter**, by adding composition and conducting to violin playing, was also well supported. The craze for "prodigies" extended, the supply being fully equal to the demand.

In May advantage was taken of the presence of **Dr. Joachim** with his quartet party to celebrate the diamond jubilee of the virtuoso's appearance in England, when at the age of thirteen he played Beethoven's violin concerto under Mendelssohn at a Philharmonic concert. At a reception at Queen's Hall (May 16th) his portrait painted by Sargent was presented to the veteran by the Prime Minister (Mr. Arthur J. Balfour). During the accompanying concert **Dr. Joachim** played the Beethoven concerto, with which his name will always be identified, and conducted his own "King Henry IV." overture.

As the **Monday and Saturday Popular Concerts** at St. James's Hall were not resumed in the autumn, chamber music during the greater part of the year was left to independent organisations such as the London Trio and the Joachim, Wessely, Kneisel, Bohemian, and Cathie quartet bodies. Among the foreign virtuosi who visited us were Sarasate (warmly greeted in November), Ysaye, Kubelik, Kreisler, Kocian, Busoni, D'Albert, and Pachmann.

Both in the quality of its performances and the judgment governing the selection of works, the **Royal Choral Society** under Sir F. Bridge at the Albert Hall maintained its prestige. The **London Choral Society**, conducted by Mr. Arthur Fagge, strengthened its position by careful rendering of modern compositions. The **Chappell Ballads**, the **London Ballads**, and the **Broadwood Concerts** were well patronised.

### *Opera in London.*

At Covent Garden, as cycles of "**Der Ring des Nibelungen**" were announced at Munich as well as at Bayreuth, it was decided not to give any section of the tetralogy, but in lieu thereof to begin the season with a series of special performances of four works by Wagner ("**Lohengrin**," "**Tristan**," "**Tannhäuser**," and "**Die Meistersinger**"), and two works by Mozart ("**Don Giovanni**," and "**Le Nozze di Figaro**"), conducted by Dr. Richter. These inaugural representations, which evoked considerable interest, started on May 2nd, and comprised in the solo department Mesdames Ternina, Knupfer-Egli, Kirkby Lunn, Destinus, Suzanne Adams, Alice Nielsen, Hertzner Deppe, and Plaichinger, MM. Van Dyck, Burrian, Van Rooy, Herold, Renaud and Journet. For operas of other schools MM. Mancinelli, Lohse, and Messager were the conductors. In all twenty works were performed, and the revived interest in purely Italian works was shown by a total of 37 representations, against 24<sup>1</sup>/<sub>2</sub> and 20 of

French and German respectively. Particularly in favour was **Verdi**, who a few years ago was under a cloud. From him came "**Rigoletto**," "**Aida**," "**La Traviata**," and "**Un Ballo in Maschera**." The other operas performed during the season were "**Faust**," "**Carmen**," "**La Bohème**," "**Philémon et Baucis**," "**Pagliacci**," "**Roméo et Juliette**," "**La Navarraise**," "**Cavalleria Rusticana**," "**Hélène**" (first performance June 20th, with Melba, Parkina, Lunn, and Dalmores as principals), and "**Salomé**" (first performance July 6th, with Calvé, Lunn, Dalmores, Renaud, and Plançon). Each of the two novelties was given twice. Artists not already mentioned who were conspicuous during the season were Frl. Russ, MM. Caruso, Dani, Scotti, Gilbert, and Reiss.

The **San Carlo Opera Company's** season at Covent Garden, from Oct. 17th to Nov. 26th, comprised thirteen works. There were three operas by Puccini ("**Manon Lescaut**," "**La Tosca**," and "**La Bohème**"), who superintended their production, though Signor Campanini wielded the bâton. In "**Adriana Lecouvreur**" (Nov. 1st) Mme. Giachetti (an able dramatic soprano), Mme. de Cisneros, MM. Anselmi and Sammarco were the principals. "**Aida**," "**Carmen**," "**Un Ballo in Maschera**," "**Rigoletto**," "**Cavalleria Rusticana**," "**Pagliacci**," "**Faust**," "**Lohengrin**," and Verdi's "**Otello**," were also performed. In the last-named Maurel resumed his original impersonation of Iago, and M. Duc was the Moor. At a special representation, attended by the King and Queen of Portugal, on Nov. 25th, there were excerpts from "**La Bohème**," "**La Tosca**," and "**Otello**."

The **Moody-Manners season in English** at Drury Lane commenced on May 21st, with "**Faust**" (Mr. and Mrs. Manners and Mr. Joseph O'Mara as principals). In rapid succession came "**The Jewess**" (May 25th, Misses De Vere and Ada Davies, Messrs. O'Mara, Manners, and F. MacLennan), "**The Bohemian Girl**," "**The Daughter of the Regiment**," "**Il Trovatore**," "**Mignon**," "**Lohengrin**," "**Martha**," "**The Flying Dutchman**," and "**Taunhausen**," (with Madame Ella Russell as Elizabeth). Herr Richard Eckhold was conductor-in-chief, and prior to every performance a lecture on the work to be given was delivered.

"**Ib and Little Christina**" (Basil Hood and Franco Leoni), Jan. 11th, revived at Daly's; Ben Davies and Susan Strong.

"**Le Domino Noir**" (Auber), March 23rd, Guildhall School of Music pupils, G. Jacobi conducting.

"**The King's Prize**" (S. R. and Alick Maclean), April 29th, Royalty. London Music School.

"**The King's Diamond**" (Charles Harbury and Meredith Ball), May 30th, Kennington.

"**Alceste**" (Gluck), Dec. 2nd, English version. Royal College students under Stanford. Title part, N. Tout. His Majesty's.

### *Principal Festivals.*

**Elgar Festival at Covent Garden**, Richter conducting. "**The Dream of Gerontius**," March 14th (Kirkby Lunn, J. Coates, Ffrangcon-Davies), "**The Apostles**" (first time in London), March 15th (A. Nicholls, Lunn, F. Davies, Coates, K. Rumford, A. Black). New concert overture "**In the South** (Alassio)," etc., March 16th (Clara Butt, S. Adams, L. Chandos, C. Clark).

**Prof. Kruse's Queen's Hall Festival** of seven concerts, April 9th to 20th, Weingartner conducting. Symphonies by Beethoven, Mozart, Brahms, Schubert, Haydn, and Tchaikovsky; Wagner excerpts; "The Dream of Gerontius," etc. Dr. Henry Coward's Sheffield chorus.

**Gloucester (Three Choirs) Festival** novelties were a Magnificat and Nunc Dimittis in G, by Ivor A. Atkins, and "A Song of Zion," by John E. West, both given on Sept. 4th; "A Festival Hymn," unaccompanied motet by C. Lee Williams, Sept. 6th; a short oratorio, "The Love that Casteth out Fear," by Hubert Parry, for two choirs and two soloists (Muriel Foster and Plunket Greene), Sept. 7th; "The Holy Innocents," oratorio by Herbert Brewer, Sept. 8th (Albani. M. Foster, Coates, F. Davies, and Dalton Baker). Brewer conductor-in-chief.

**Cardiff Festival**, presided over by Cowen, brought forward a "Welsh Rhapsody" for orchestra, by Edward German, Sept. 21st; "In the East," tone-poem by Arthur Hervey, Sept. 22nd; "John Gilpin," choral ballad by Cowen, Sept. 23rd; and "The Victory of St. Garmon," cantata by Harry Evans, Sept. 24th. Massenet's cantata "Eve," introduced to Great Britain, Sept. 22nd; (Blanvelt, Ben Davies, F. Davies).

**Leeds Festival**, under Stanford, offered seven new works: "The Witch's Daughter," cantata by Mackenzie, was produced on Oct. 5th, (Sobrinio and F. Davies); Walford Davies' "Every Man," (Gleeson-White, M. Foster, Coates, and Lane Wilson); and Joseph Holbrooke's poem for orchestra and chorus "Queen Mab," both Oct. 6th; Charles Wood's cantata "A Ballad of Dundee" (soloist Plunket Greene), Stanford's new violin concerto in D major (Fritz Kreisler), and same composer's setting of "Five Songs of the Sea," by Newbolt (P. Greene), Oct. 7th. The programmes of the remaining day included Beethoven's Mass in D and Sullivan's "Golden Legend."

### **Orchestral and Choral.**

"**War and Peace**" (Hubert Parry), Jan. 28th, given by Royal Choral Society at Albert Hall. Bridge's "Callirhoë" followed.

"**The Atonement**" (Coleridge Taylor), Feb. 17th, introduced to London by Royal Choral Society at Albert Hall.

"**Mazeppa**" (Liszt's symphonic poem), March 1st, Richter concert, Queen's Hall.

"**Manfred**" (A. von Ahn Carse's symphonic prelude to), March 2nd, first Philharmonic concert of 92nd year, Queen's Hall, Cowen conducting.

"**Dante**" (Liszt's symphonic poem), March 12th, Queen's Hall Orchestra, Queen's Hall, under Wood.

"**The Apostles**" (Elgar), April 21st, performed by Royal Choral Society, Albert Hall.

"**King Olaf**" (Elgar), April 25th, given by London Choral Society, Queen's Hall, under Fagge.

**Franz von Vecsey's** début, May 3rd, St. James's Hall. He played Wieniawski's violin concerto

in D minor, Paganini's "Hexentanz," an air by Bach, and Hubay's Fantasia on "Carmen."

"**Jephtha**," May 10th, performed by Handel Society at St. James's Hall.

**Miss May Harrison**, youthful violinist, May 31st, appeared with Queen's Hall Orchestra at St. James's Hall.

**Stanford's Concerto for Clarinet** (C. Draper), and orchestra, June 2nd, Philharmonic Concert, Queen's Hall.

**Crystal Palace Jubilee Concert**, June 11th, "Hymn of Praise" (Albani, Agnes Nicholls, Ben Davies, and Handel Festival Choir), and miscellaneous selection. In the latter Santley and Muriel Foster joined. Manns conducted.

**Florizel von Reuter's** début, June 29th, Queen's Hall: played Vieuxtemps' violin concerto in E major, Bruch's "Scottish Fantaisie," and pieces by Sarasate and Bazzini; also conducted orchestra in his own "Symphony Royale."

**Promenade Concerts** at Queen's Hall under Wood from Aug. 6th to Oct. 21st. Novelties included Stewart Macpherson's Concerto (alla Fantasia) in G minor for violin (Aug. 9th); Charles Macpherson's orchestral suite "Halloween" (Aug. 27th); Paul Juon's Symphony in A, (Sept. 6th); Norman O'Neill's ballade for contralto (Miss Grainger Kerr) and orchestra, "Death on the Hills" (Sept. 8th); and Cyril Scott's orchestral Rhapsody, Op. 32 (Sept. 10th).

**The "Kilties,"** Scottish Canadian band, commenced English tour Sept. 24th, Albert Hall.

**Evangeline Anthony**, violinist, Nov. 5th, first appeared in London, St. James's Hall; gave Bach's violin concerto in A minor, the Mendelssohn concerto, and the Paganini-Wilhelmj concerto in D.

**Nikisch**, Nov. 17th, conducted London Symphony Orchestra, Queen's Hall.

"**Ulalume**" (Joseph Holbrooke's symphonic poem), Nov. 26th, Queen's Hall Orchestra, Queen's Hall.

"**Everyman**" (W. Davies), Dec. 5th, performed Queen's Hall, London Choral Society.

**Fritz Steinbach** conducted London Symphony orchestra, Dec. 15th, Queen's Hall.

### **Miscellaneous.**

**Stanford's String Quintet** in F major, Op. 85, Jan. 11th, St. James's Hall; the Kruse quartet and E. Tomlinson.

**Melba's Concert** for Queen Charlotte's Hospital, May 5th, Queen's Hall.

**Patron's Fund**, Royal College of Music, first orchestral concert, May 20th, St. James's Hall.

**Giulia Ravogli's** performance in concert form of "Orfeo," for St. Bartholomew's Hospital, June 3rd, Queen's Hall. The Leeds Choral Union under A. Benton.

**Annual Brass Band Contest**, at Crystal Palace, Oct. 1st. 156 bands took part. National Challenge Trophy; Hebburn Colliery 1st, Wingates Temperance 2nd, Irwell Springs 3rd.

# N

**Napoleon, Victor**, son of the late Prince Napoleon and Princess Clotilde, was b. 1862. When his father, after the death of the Prince Imperial in '79, took the position of head of the house of Bonaparte, the claim was disputed by M. Paul de Cassagnac and several other Imperialists, who put forward the young Prince Victor as his father's rival, a position he definitely assumed even before his father's death in '91. By the Expulsion Bill of '86 the Prince was exiled from France, and took up his residence at Brussels. His younger brother, Prince Louis Napoleon, is an officer in the Russian Imperial Guard, and for personal reasons is preferred before Prince Victor by many Bonapartists as a candidate for the French throne. In Dec. '99 he published a clever appeal to the people, in which he posed as the natural chief of the democracy, but also laid stress on his supposedly transmitted dynastic rights.

**National Association for Employment of Reserve and Discharged Soldiers.** The object of this association is to introduce to employers of labour and others ex-soldiers of good character only, who have returned to civil life on completion of their service with the colours, as clerks, poor-law officers, indoor servants and valets, grooms and coachmen, attendants (asylum and hospital), messengers, caretakers, drill and gymnastic instructors, night-watchmen, hall and light porters, porters, labourers, carmen and horsekeepers, mechanics and handymen, etc., etc. There are 96 branches throughout the United Kingdom and South Africa. No fees are charged either to employers or employed. **Secretary:** Capt. H. F. Wilkinson. **Office:** 119, Victoria Street, Westminster, S.W. **Telephone:** 367, Westminster. **Telegrams:** Employers, London.

**National Canine Defence League. Sec.,** G. J. Knight. **Office:** 151, Strand, London, W.C.

**National Cyclists' Union.** The Union devotes itself to the interests of all classes of cyclists, and its organisation, through its various centres and affiliated clubs, covers the whole country. It has fought considerably over 1000 cases in the interests of cyclists, secured the erection of warning boards on dangerous hills, made the roads safer, and obtained concessions from the railway and steamship companies. Arrangements have been made with France and other foreign countries for touring members to take their cycles into such countries free of Customs' duties. **General Secretary,** S. R. Noble, 27, Chancery Lane, W.C.

**National Gallery.** (For earlier history see ed. '88 and later editions.) The Director is Sir Edward J. Poynter, Bart., P.R.A.; the Keeper and Secretary is Mr. Hawes Turner; the Chief Clerk being Mr. George E. Ambrose. The Gallery is open to the public on Mondays, Tuesdays, Wednesdays, and Saturdays, and on payment of a fee of sixpence on the students' days, Thursdays and Fridays. The Gallery is also open free on Sunday afternoons from April to October inclusive. Much information, compiled independently of the National Gallery authorities, may be found in Mr. E. T. Cook's "Guide to the National

Gallery," while official details appear in an *Annual Report* issued by the Director.

**National Gallery of British Art, The,** Grosvenor Road, S.W., was presented to the nation by Sir Henry Tate, Bart., and opened July 21st, 1897. The Government has undertaken the maintenance through the Trustees of the National Gallery. It is closed on Christmas Eve, Christmas Day and Good Friday. The Keeper is Sir Charles Holroyd.

**National Home-Reading Union.** This Society completed the fifteenth year of its existence in August 1904. **President,** H.R.H. the Princess Louise, Duchess of Argyll. **Chairman of the Council,** Rt. Rev. the Lord Bishop of Hereford; **Chairman of Executive Committee,** Dr. Hill, Master of Downing College, Cambridge; **Hon. Secretary,** Rev. Dr. Paton, of Nottingham; **Secretary,** Miss Mondy. **Office,** Surrey House, Victoria Embankment, London, W.C.

**National Incorporated Association for the Reclamation of Destitute Waif Children,** otherwise known as **Dr. Barnardo's Homes.** The work of this Association was begun in the year 1866 by Dr. Barnardo, at that time a young medical student attached to the London Hospital. Year by year the Homes have since extended, and from the first the central principle of the Institutions has been: No destitute child, boy or girl, ever refused admission, irrespective of age, creed, nationality, or physical defects. At present the Homes comprise 4 Mission Branches, and 140 distinct Homes. Four of these are situated in Canada, one in Jersey, 99 in the English counties, and the remainder in London. Industrial training is imparted to the older boys and girls in the Homes, 20 different trades being taught in the shops at Stepney Causeway and elsewhere. An Emigration agency furnishes an important adjunct to the work; 16,160 trained boys and girls have so far been emigrated; 56,252 young people, of all ages, from infancy to the threshold of adult age, have passed through the Homes. The daily expenses of maintenance and food alone amount to at least £240. The Homes were incorporated in April '99. **Head Offices,** 18 to 26, Stepney Causeway, London, E. **Hon. Secretary,** George Code, Esq.

**National Portrait Gallery.** Founded in 1856, "for the exhibition of portraits of eminent British historical characters." The new building at the back of the National Gallery, in St. Martin's Place, was opened to the public on April 4th, '96. The collection now comprises nearly 1400 portraits. The gallery is open to the public free, from 10 a.m. to 4, 5, or 6 p.m., on Monday, Tuesday, Wednesday, and Saturday; and on Thursday and Friday (students' days), when an entrance fee of 6d. is charged, from 10 a.m. to 4 or 5 p.m. **Director, Keeper, and Secretary,** Mr. Lionel Cust, M.V.O., F.S.A.; **Clerk and Acting Assistant Keeper,** Mr. J. D. Milner.

**National Refuges for Homeless and Destitute Children.** (Incorporated 1904.) This Institution was founded in the year 1843 by the late Mr. William Williams, and is supported by voluntary contributions. It now has under its care the two well-known training-ships *Arethusa* and *Chichester*, lying off Greenhithe,

Kent, where boys, of good character only, are trained for the Navy, Merchant Service, or Army Marines; it also wholly maintains eight Homes on shore for boys and girls. In these Homes and ships there is accommodation for 1000 children. No votes are necessary, but applicants for admission are seen every morning, except Sunday, at 11 o'clock, at the London Home and Offices. The age for admission to the Homes is from 10 to 12, but boys for the ships must be between 14 and 16, and physically fit. As many as 14,620 boys and 2740 girls have been received and sent out into the world since the establishment of the Society. From the *Arethusa* and *Chichester* training-ships 5467 boys have joined merchant ships, 1150 the Royal Navy, and 140 Army and Marines. An Emigration Agency and Working Boys' Home form an important part of the work. Receipts in 1903 amounted to £23,687. Joint Secretaries, H. Bristow Wallen and Henry G. Copeland. Head Offices, 164, Shaftesbury Avenue, W.C.

### NATIONAL RIFLE ASSOCIATION.

This Association was founded in 1860 (incorporated by Royal Charter '90) to give permanence to Volunteer Corps and to encourage rifle shooting throughout the King's dominions. The Secretary is Lieut.-Col. C. R. Crosse. The offices of the Association are at the Bisley Camp Ground. It should be noted that Rifle Clubs consisting of not less than twenty members can be formed in affiliation with this Association. Rifles and ammunition are issued to such affiliated clubs at special rates. Application should be made for full information to the Secretary N.R.A.

The following are the chief results of the 1904 meeting:—

**Humphry Cup** (15 shots at 800, 900, and 1000 yards): Cambridge University, 801; Oxford University, 784.

**Ashburton Shield** (7 shots at 200 and 500 yards): Winchester, 476.

**Spencer Cup** (7 shots at 500 yards): Corporal Cripps, Marlborough, 34.

**Cadets' Challenge Trophy** (7 shots at 200 and 500 yards): St. Paul's.

**Public Schools Veterans' Cup**: Cheltenham, 231.

**Mackinnon Challenge Cup** (10 shots at 800, 900, and 1000 yards): England, 1435; Scotland, 1424; New Zealand, 1387; Wales, 1383; Natal, 1372; Canada, 1362.

**Kolapore Cup** (7 shots at 200, 500, and 600 yards): New Zealand, 719; Mother Country, 716; Canada, 712; Guernsey, 704; Natal, 697.

**Elcho Shield** (15 shots at 800, 900, and 1000 yards): England, 1570; Ireland, 1532; Scotland, 1527.

**United Service Cup** (7 shots at 200, 500 and 600 yards): Regular Army, 745; Royal Marines, 735; Volunteers, 731; Royal Navy, 729; Militia, 682; Imperial Yeomanry, 679.

**King's Prize**: 1st stage (7 shots at 200, 500 and 600 yards), Sergt. Joseph Walker, 3rd V.B. Northumberland Fus., 101—bronze medal; 2nd stage (20 shots at 600 yards), Chaplain C. J. Ferguson Davie, Punjab L.H., 102—silver medal; 3rd stage (10 shots at 800, 900, and 1000 yards), Private S. J. Perry, Canada, 321—gold badge and £250; Private J. Pownall, 2nd King's, Liverpool, 319—N.R.A. badge and £80; Private R. R. McGowan, 3rd L2nark, 318—N.R.A. badge and £40.

**St. George's Challenge Vase** (7 shots at 500

and 600 yards and 15 at 900 yards), Major J. Howard, 4th London I.Y., 133—vase, dragon cup, gold cross, and £30.

**National Challenge Trophy**: Scotland, 1910; Wales, 1879; England, 1876.

**Revolver Gold Badge**: W. O. Raven, 331.

**Whitehead Challenge Cup**: Royal Navy, 1064; Army, 1054; Royal Marines, 965; All Comers, 963; Volunteers, 923.

**National Service League**. The object of the League is to promote the legislative adoption of compulsory naval and military training for National Defence. It is independent of party politics. President, The Duke of Wellington, K.G.; Secretary, George F. Shee, M.A. Offices, Dacre House, Victoria Street, S.W.

**National Society for the Prevention of Cruelty to Children**. The (Incorporated by Royal Charter), has for its object that no child in the United Kingdom shall live an unendurable life. This object is sought by (1) warnings; (2) enforcement of laws; (3) promotion of any new law that may be necessary. Patrons, The King and Queen. Director and Secretary, Rev. Benjamin Waugh. Assistant Secretary, Robert J. Parr. Organ, *The Child's Guardian*; editor, Rev. B. Waugh. The League of Pity is the Children's Section of the Society. Its object is to interest happy children in the welfare of the unhappy. Central Office, Leicester Square, London.

**National Trust** (for Places of Historic Interest or Natural Beauty). Secretary, Mr. Nigel Bond, B.A. Office, 25, Victoria Street, S.W.

**National Vigilance Association**, for the suppression of the "white slave traffic." At the instance of the Association national committees have been formed in every country in Europe to co-operate in dealing with the evil in question. Secretary, W. A. Coote. Office, 319, High Holborn, W.C.

**Naturalisation Laws**. Naturalisation by certificate of the Secretary of State was introduced by the Act of 1844 (7 & 8 Vict. c. 66) and amended by the 1870 Act, by which residence for five years in the United Kingdom, or service under the Crown for that period, is required as a condition of naturalisation, with intention so to continue to reside or serve. The certificate costs £5, and careful inquiries are made as to the character of the applicant before the certificate is granted. Application should be made to the Home Office. The naturalisation of aliens in the Colonies is now effected under authority of the Naturalisation Acts of 1870, which empower the Legislature of every colony to confer on aliens by law all or any of the privileges of Naturalisation within such colony. See ed. 1902 for the report of an Inter-Departmental Committee upon the amendments found to be desirable in the Naturalisation Laws of the Empire.

**Naval Architects, Institution of**, 5, Adelphi Terrace, W.C. Sec., R. W. Dana, M.A.

**Navy League**, The, was founded in 1895, and is a strictly non-party organisation formed to urge upon Government and the electorate the paramount importance of an adequate navy as the best guarantee of peace. The League, which has branches throughout the world, carries on its work by the distribution of literature, public meetings, the delivery of lectures, and by educational propaganda in public and other schools. President, R. A. Yerburch, Esq., M.P.; Secretary, Commr. W. C. Crutchley, R.N.R. Offices, 13, Victoria Street, Westminster.

† Including one partially protected. ‡ Including two partially protected.

§ It is not certain whether all these have been actually commenced.

2. *Cost.*

The naval expenditure of the United Kingdom, France, Russia, Germany, and America for the years named below was as follows:—

Year.	Great Britain.		France.	Russia.	Germany.	America.
	Estimated.	Expended.				
1880 . . . .	£ 10,702,935	£ 10,513,469	Information not obtainable.			
1890 . . . .	19,415,682†	17,042,182†		8,125,929	4,268,208	3,938,869
1900 . . . .	32,570,014†	32,131,062†		12,511,054	10,962,801*	7,472,656
1901 . . . .	33,824,515†	33,726,491†		13,107,701	11,659,766*	9,624,956
1902 . . . .	35,062,904†	34,201,994†		12,271,048	10,667,988	10,029,063
1903 . . . .	39,134,887†	39,060,887†	12,538,861	12,349,567	10,252,014	16,824,058
		(Estimated)				

\* Includes one-fifth of a sum of £11,500,000 which was a special grant sanctioned in 1897 for new construction to be spread over a period of five years. The details of this expenditure have not been published.

† These figures include sums provided under the Naval Defence Act of 1889 and the Naval Works Acts, 1895—1903, inclusive. The figures relating to the years 1901-3 also include the annuities in repayment of capital expenditure under the Naval Works Acts: namely, 1901, £122,255; 1902, £297,895; 1903, £502,010.

The figures for France, Russia, Germany, and America are taken from the estimates of the respective countries, information as to actual expenditure not being available. The estimated expenditure for Great Britain is therefore given, to enable a comparison to be made.

## II. BRITISH NAVY.

## 1. ADMINISTRATION.

## 1. Administration.

## (a) The Admiralty Departments.

First Lord, the Earl of Selborne.

First Naval Lord, Admiral Sir John Fisher.

Second Naval Lord, Vice-Admiral Sir Charles Drury.

Third Naval Lord and Comptroller, Rear-Admiral W. H. May. (To be succeeded in 1905 by Captain Henry Jackson.)

Junior Naval Lord, Capt. F. S. Inglefield, R.N.

Civil Lord, Arthur Lee, Esq.

Parliamentary Secretary, E. G. Pretymann, Esq.

Permanent Secretary, Sir Evan Macgregor.

Hydrographer, Capt. A. M. Field, R.N.

Director of Naval Intelligence, Capt. C. L. Ottley, M.V.O.

Director of Naval Construction, Philip Watts, Esq.  
Engineer-in-Chief of the Navy, Eng. Rear-Admiral Sir A. J. Durston.

Director of Dockyards, Sir James Williamson.

Director of Stores, F. W. Black, Esq.

Director of Naval Ordnance and Torpedoes, Capt. J. Rushworth Jellicoe, C.B.

Accountant-General of the Navy, Gordon Miller, Esq.

Director of Victualling, Sir Henry Yorke.

Director of Transports, Rear-Admiral G. T. Boyes.

Director-General Medical Department, Inspector-General H. M. Ellis.

Director of Works, Colonel E. Raban, R.E.

Director of Contracts, W. C. B. Hall, Esq.

Chaplain of the Fleet, The Ven. Archdeacon W. Stuart Harris, D.D.

Director of Naval Education, Prof. J. A. Ewing, LL.D., F.R.S.

Admiral Commanding Coastguard and Reserves, Vice-Admiral Ernest Rice.

Deputy Adjutant-General of Marines, Lieut.-Gen. W. P. Wright.

## (b) Naval.

Unlike the other great departments of the Government, the Navy is not presided over by a Secretary of State. This is due to the circumstance that the constitutional ruler of the Navy is a Lord High Admiral, but the office has been continuously in commission since 1708, except during the period when it was filled by the Duke of Clarence, afterwards William IV. The Commissioners are generally styled "the Lords of the Admiralty" or "the Board." The First Lord is the Minister immediately responsible for the general efficiency of the Navy. Under the First Lord the direction of affairs rests in the hands of four Naval Lords, a Civil Parliamentary Lord, and the Financial or Parliamentary Secretary. The Senior Naval Lord, who is always an Admiral

of high rank and general experience, practically fills the position of Commander-in-Chief of the Navy. He is the chief naval adviser of the First Lord, and is especially responsible for the *personnel*, condition, and general movements of the fleet. The Naval Lords each share the responsibility of maintaining the efficiency of the branches of the service under their immediate supervision.

The **Controller of the Navy** is the Naval Lord charged with the supervision of the whole of the materiel of the Navy, including the construction, repair, armament, general equipment and upkeep of every ship in the service. He is also responsible for the administration of the dockyards, and for the construction of ships and machinery by contractors.

Under the Naval Lords and other members of the Board the several branches of administration are conducted by permanent officers, who, under the title of **Directors**, deal with naval construction, engineering, ordnance, hydrography, dockyards, stores, victualling works, hygiene, and contracts. Formerly the Navy was dependent upon the War Department for armaments and ammunition, but the responsibility for this provision has now been transferred to the Admiralty.

The **Director of Transports**, on the other hand, is an Admiralty officer, but the responsibility for the expenditure rests with the War Office.

The **Works Department** of the Admiralty is presided over by officers of the Royal Engineers, its supervision resting with the Civil Lord.

The **Department of Naval Intelligence** is a recent addition to the establishment of the Admiralty, but one of the most important.

The headquarters of the Marine forces are at the Admiralty, where its affairs are administered by the **Deputy Adjutant-General**.

The secretariat of the Admiralty is divided into two sections, the executive and the financial. The first-named section is under the direction of the **Permanent Secretary** of the Admiralty, who acts as mouthpiece of the Board. The **Financial Secretary**, being a Minister of the Crown, vacates office with the Administration of which he is a member. The **Accountant-General** of the Navy, who is a permanent financial officer of the Admiralty, fills the position of Assistant Financial Secretary. At one time the departments of the Admiralty were scattered in many buildings. The new Admiralty, at Whitehall, has now afforded accommodation for many of the outlying departments, and when the other wing is completed, all will be concentrated under one roof.

## (c) Marines.

This corps is a military body especially organised and trained for service in the fleet as well as on shore. It constitutes an important part of the naval forces of the country, and is supported by funds taken in naval Votes. Whenever an emergency arises and there is an opportunity for active service, the Marines are the first force drawn upon; and in all the naval and military operations in which this country has been recently engaged they have taken a prominent part. Their motto, "Per mare, per terram," aptly describes the nature of their duties. The Royal Marines are divided into two corps—the **Royal Marine Artillery** (Blue Marines) and the **Royal Marine Light Infantry** (Red Marines). The former have their headquarters at Eastney, near Portsmouth; the

latter at Chatham, Forton (near Gosport), and Plymouth. There is also at Walmer, near Deal, a recruit depot, where all newly raised men for both branches are sent to receive preliminary instruction. The Royal Marines are recruited under the long-service system, and there is never any lack of applicants to this *corps d'élite*. The accepted candidates, whether officers or privates, are picked men, far above the average standard of the Army. The recruiting office for London is at 22, Spring Gardens; but men are also entered at Bristol, Birmingham, Cambridge, Derby, Edinburgh, Exeter, Gloucester, Hull, Greenock, Wakefield, Liverpool, Reading, Salisbury, and Taunton. As a rule, one-half of the force is embarked for duty in his Majesty's ships, the remainder being at headquarters, revising drills, recruits, etc. Recently, however, the increased number of ships in commission has obliged a larger proportion to serve afloat, and a difficulty has even been experienced in finding proper relief. It is from the men in the depôts that battalions of Marines have been formed for co-operating with land forces abroad.

## 2. Finance.

The Naval Estimates for 1904-5 totalled £36,889,500, being an increase of £2,432,000 over the estimates for the previous financial year. This is the sum actually estimated as the cost of the Navy, including the non-effective services, but excluding other charges which fall under the Civil Service Estimates. The provision made for new construction in 1904-5 is £11,654,176, which is £1,517,746 more than the sum voted in 1903-4.

### Navy Estimates, 1904-5.

I. Effective Services.		£
1. Wages, etc., of Officers, Seamen, Boys, Coastguard, and Marines		6,691,000
2. Victualling and Clothing for Navy		2,428,000
3. Medical Establishments and Services		293,000
4. Martial Law		15,500
5. Educational Services		154,000
6. Scientific Services		72,600
7. Royal Naval Reserves		404,500
8. Shipbuilding, Repairs, Maintenance, etc. :—		
Sect. I.— <i>Personnel</i>		3,044,200
Sect. II.— <i>Matériel</i>		5,062,800
Sect. III.—Contract Work		10,314,000
9. Naval Armaments		3,646,000
10. Works, Buildings, and Repairs at home and abroad		1,634,200
11. Miscellaneous Effective Services		444,000
12. Admiralty Office		327,400
Total Effective Services		£34,531,200
II. Non-Effective Services.		
13. Half-Pay, Reserved and Retired Pay		796,200
14. Naval and Marine Pensions, Gratuities, and Compassionate Allowances		1,208,800
15. Civil Pensions and Gratuities		353,300
Total Non-Effective Services		£2,358,300
Grand Total		£36,889,500

## 3. Personnel.

The number of officers, seamen, boys, and marines provided for sea and other services for the year 1904-5 amounts to 131,100, being an increase of 4000 on the previous year. The strength of the Royal Marines on Jan. 1st, 1903, was 19,579.

The passing of the Naval Forces Act during the year 1903 served to strengthen the Naval Reserve by increasing its numbers, and by authorising short-service system in the Navy, on condition that those accepting such employment shall complete a term of seven years in the Reserve. The Royal Naval Volunteers authorised by the Act of 1902 have been actively recruiting and drilling throughout the year, and Divisions have been formed at London, Glasgow, Bristol, Liverpool, and in Sussex. Each division has a Commander and a Commander-Instructor attached to it. The officers of the Royal Naval Volunteers number 63. The Naval Volunteers are subject to all regulations made with regard to them by the authority of the Admiralty. Whenever the Admiralty call out the Naval Volunteers, or any of them, for actual service they will be liable to serve either ashore or afloat, as may be directed by the Admiralty, and anywhere the Admiralty may have need of their services, with the understanding that those services shall, as much as practicable, be confined to Home Waters and the Mediterranean.

## 4. Matériel.

The strength of the British Navy in ships built, building, and projected on Nov. 30th was :—

Built.		
Battleships, 1st class		54
"    2nd class		4
"    3rd class		2
Coast defence ships		1
Armoured cruisers		29
Protected cruisers, 1st class		21
"    2nd class		50
"    3rd class		34
Unprotected cruisers		8
Torpedo vessels		32
Torpedo-boat destroyers		131
Torpedo boats		87
Submarines		8
Building.		
Battleships, 1st class		5
Armoured cruisers		12
Protected cruisers, 2nd class		1
"    3rd class		2
Scouts		8
Torpedo-boat destroyers		15
Torpedo boats		4
Submarines		11
Projected.		
Battleships, 1st class		2
Armoured cruisers		4
Torpedo-boat destroyers		14
Submarines		10

NOTE.—The battleships projected are the *Lord Nelson* and *Agamemnon*, which will be built by contract. The armoured cruisers belong to the *Minotaur* class, and will be built in the dockyards.

### 5. Dockyards.

The public dockyards in Great Britain are situated as follows:—

**Portsmouth.**—Six docks take any ship; three take armoured cruisers, 10,000 tons and smaller.

**Devonport.**—Two docks take battleships; two smaller.

**Keyham.**—One dock take small battleships; three smaller.

**Chatham.**—Six docks take battleships (four small ones only); four smaller.

**Sheerness.**—Five small docks.

**Pembroke.**—One dock takes small battleships.

**Haulbowline.**—Two docks take any ship.

### 6. Distribution and Mobilisation of the Fleet.

On Dec. 6th, 1904, Lord Selborne issued a memorandum and circular letter dealing with the distribution and mobilisation of the fleet. By this, existing arrangements were cancelled, and the effective War Fleet was divided into two categories—the Fleet in commission at Sea and the Fleet in commission in Reserve.

The Fleet in commission at Sea will be divided between two strategic centres, the European and the Eastern, with a connecting link in the Cape of Good Hope Squadron. The old Home Fleet is to be known in future as the **Channel Fleet**, the force which formerly bore that name becoming the Atlantic Fleet. These two, with the Mediterranean Fleet and four Cruiser Squadrons, make up the European strategic centre, the Eastern being composed of the China, East Indies, and Australasian Squadrons. The new Channel Fleet is to be composed of 12 battleships divided into three divisions—one heavy and two light—and the fleet will be based on the Home ports. The First Division of the Cruiser Squadron will be attached to the Channel Fleet. The Atlantic Fleet will consist of 8 battalions, and the Second Division of the Cruiser Squadron will be attached to it. The base will be Gibraltar. The Mediterranean Fleet will consist of 8 battleships and the Third Division of the Cruiser Squadron, being based as heretofore on Malta. Of the four **Cruiser Squadrons**, three are allocated as stated. The Fourth Cruiser Squadron will be known as the **Particular Service Squadron**, and will consist of the vessels in the training service and of the more effective vessels of the old North America and West Indies Squadron. This force will be based on Devonport. By the new regulations also it is arranged that there shall never be more than 2 battleships of the Channel or 1 each of the Atlantic and Mediterranean Fleets undergoing repairs or refit at the same time.

The vessels of the Fleet in commission in Reserve include all the effective fighting ships which are not at sea, and will be available either for reliefs or for reinforcement. They will only be supplied with nucleus crews, consisting of the captain, the second in command, and a proportion of other officers, including engineer, gunnery, navigating and torpedo officers, and two-fifths of the remainder of the complement, including all the more expert ratings. A rear-admiral is appointed to each port to command the ships in reserve there. Each division in reserve will go to sea periodically for exercises, the engine-room staffs being augmented for the occasion. These are the salient features of a reform which is comple-

mentary to, and a natural outcome of, the training and education scheme of 1902.

See SESSION, sects. 72 and 64.

### 7. Progress.

Among commands afloat the following changes took place in 1904.—**Home Fleet.** Rear-Admiral C. J. Barlow succeeded Rear-Admiral E. S. Poë as second in command on May 9th.

**Channel Fleet.** Rear-Admiral F. C. B. Bridgeman succeeded Rear-Admiral the Hon. Hedworth Lambton as second in command on June 25th.

**Mediterranean Fleet.** Rear-Admiral H. T. Grenfell succeeded Vice-Admiral R. N. Custance as Senior Rear-Admiral of the Fleet, Rear-Admiral Hon. Hedworth Lambton succeeded Rear-Admiral Sir Baldwin Wake Walker in command of the Cruiser Division, and Rear-Admiral Sir Richard Poore succeeded Rear-Admiral W. des V. Hamilton as Junior Rear-Admiral of the Fleet.

**Cruiser Squadron.** Rear-Admiral E. S. Poë succeeded Rear-Admiral Sir Wilmot Fawkes in command in November. This squadron has been strengthened by the addition of four more armoured cruisers of the "County" class, and has been made into two divisions. H.S.H. Prince Louis of Battenberg was appointed to the command of the Second Cruiser Squadron in December 1904.

**Coastguard and Reserves.** Rear-Admiral Reginald F. H. Henderson succeeded Admiral E. Rice.

**North America and West Indies.** Vice-Admiral D. H. Bosanquet succeeded Vice-Admiral Sir A. Douglas in command on Oct. 8th.

At Devonport, Vice-Admiral Sir Lewis Beaumont succeeded Admiral Sir E. H. Seymour, appointed Admiral of the Fleet to fill the vacancy caused by the retirement of Sir Nowell Salmon, V.C., announced for Feb. 1905.

At Portsmouth, Vice-Admiral Sir Archibald Douglas succeeded Admiral Sir John Fisher, who returned to the Admiralty on Oct. 21st. Rear-Admiral H. D. Barry succeeded Rear-Admiral R. F. H. Henderson as Admiral Superintendent of Portsmouth Dockyard.

At Gibraltar, Rear-Admiral Sir E. Chichester succeeded Vice-Admiral Sir W. Dyke-Acland on July 9th.

At Hong Kong, Commodore C. G. Dicken succeeded Commodore C. G. Robinson on Feb. 16th.

The following were the principal launches of British war-ships during 1904:—**Battleships.** *New Zealand*, at Portsmouth, on Feb. 4th; *Britannia*, at Portsmouth, on Dec. 10th.—**Armoured Cruisers.** *Roxburgh*, by the London & Glasgow Company, on Jan. 19th; *Argyll*, on March 3rd, at Greenock; *Devonshire*, on April 30th, at Chatham; *Duke of Edinburgh*, on June 14th, at Pembroke; *Black Prince*, on Nov. 8th, at Blackwall.—**Protected Cruisers.** *Diamond*, on Jan. 6th, at Birkenhead; *Sapphire*, on March 17th, at Jarrow.—**Scouts.** *Sentinel*, on April 10th, at Barrow; *Pathfinder*, on July 16th, at Birkenhead; *Forward*, on August 27th, at Fairfield; *Adventure*, on Sept. 8th, at Newcastle; *Fore-sight*, on Oct. 8th, at Fairfield; *Patrol*, on Oct. 12th, at Birkenhead.

The following new vessels were completed and put into commission during the year:—**Battleships.** *Cornwallis*, on Feb. 9th, at Chatham, for the Mediterranean; *Queen*, on April 7th, at Devonport, and *Prince of Wales*, on

May 18th, at Chatham, also for the Mediterranean; *Triumph* and *Swiftsure* (ex *Libertad* and *Constitucion*), both on June 21st, at Chatham, for the Home Fleet.—**Armoured Cruisers.** *Euryalus*, on Jan. 5th, at Devonport, for the Australian Station; *Essex*, on March 22nd, at Devonport, for the Home Fleet; *Lancaster*, on April 5th, at Chatham, and *Suffolk*, on May 21st, at Devonport, both for the Mediterranean.—**Small Craft.** Several new destroyers and torpedo boats were put in commission temporarily for the Manœuvres, but many of the new "river" destroyers have gone to the Mediterranean.

On January 1st the **New Regulations** for organisation of the **Destroyer Flotillas** in Home waters came into force. The headquarters of the flotillas are now at Portland, Devonport, and Felixstowe. The post of "inspecting captain of destroyers" has been abolished, and a captain (D) attached to the Channel (formerly Home) Fleet for special service in connection with destroyers.

On March 18th *Submarine A1*, while manœuvring in the waters round the Isle of Wight, was struck by a liner, and sank. Her crew of ten were drowned. Owing to the heavy weather it was impossible to raise the vessel for nearly a month. She is being repaired.

On June 19th the destroyer *Sparrowhawk* was stranded on the rocks at the mouth of the Yang-tze. No lives were lost, and the vessel was subsequently towed off.

A circular letter was issued on July 2nd, having reference to the training of naval signalmen.

The *Buzzard* drill ship for the London division of the Royal Naval Volunteers was brought into the Thames, and moored by Blackfriars Bridge on June 28th. On July 2nd the division was inspected by the Lord Mayor and Sheriffs of the City of London.

During July a visit was paid by the German Active Fleet to Plymouth and various other ports in the United Kingdom.

A circular letter on the subject of the study of foreign languages by naval officers was issued in July. Twenty officers are allowed to study abroad on full pay, and special arrangements are made for officers to learn Japanese.

The naval manœuvres of 1904 were carried out in August. Those in which the Channel and Home Fleets participated were secret, but the torpedo manœuvres in the Irish Channel were attended by newspaper correspondents. They commenced on August 8th, and lasted a week. The object of the Blue Side, under Sir Arthur Wilson, was to keep the sea clear between Land's End and the Mull of Galloway for the passage of his fleet, represented by four battleships and two cruisers. The Red Side, under Rear-Admiral C. G. Robinson, had to attempt the destruction of this fleet. The Blues succeeded in carrying out their task, with the "loss" of a large number of their destroyers. The "losses" on the Red Side were also considerable. One serious accident occurred, the *Decoy* being sunk by the *Arin* on the night of August 13th. During the Fleet manœuvres also the *Endymion* collided with a merchantman, inflicting considerable damage.

A circular letter affecting the promotion to commissioned rank of chief and other artificer engineers, and the retirement of lieutenants raised from warrant rank, was issued in September.

On Sept. 7th a disaster occurred on board the *Comet*, one of the gunboats attached for instructional purposes to the *Excellent* gunners' school. Four men were killed.

The *Chamois* torpedo-boat destroyer sank in the Gulf of Patras at the end of September while running a full-speed trial.

On Oct. 1st a circular letter dealing with changes in the regulations governing the training of warrant officers of the military branch was issued.

On the night of Oct. 21st a fishing fleet on the Dogger Bank was fired on by vessels of the Russian Second Pacific Squadron on its way to the Far East. See RUSSO-JAPANESE WAR for details.

## NETHERLANDS, THE.

The Constitution of 1848, revised in '87, vests the executive in the sovereign, and the legislative authority in the Sovereign and the States-General, the latter sitting in two chambers: the first, consisting of 50 members, elected for nine years (one-third retiring every three years) by the provincial States from among the most highly assessed inhabitants and from among a number of specified officials; the second, of 100 members, elected for 4 years by all male citizens of 25 years or more who pay a direct tax to the State, or are householders or own boats of not less than 24 tons, or receive a minimum wage or salary of about £23, or give other evidence of their ability to support themselves and their families. The Government and the second chamber alone possess the initiative in legislation; the upper house having the right of approval or rejection, but not of amendment. Alterations in constitution are made by a two-thirds vote of both houses, followed by a general election, and confirmation by a similar vote of the new States-General. Members of the second chamber are paid £166 per annum and travelling expenses.

## The Army.

There is at present no standing army, but a cadre of officers and non-commissioned officers (establishment about 2200) for training the forces embodied.

The Landwehr, which has replaced the old Schütterij, received its first contingent recently, and the country has been divided into 48 Landwehr districts. The corresponding battalions cannot however be formed before 1909. The Landwehr and Landsturm to which men are to be transferred will have a peace strength of about 20,000, and a volunteer establishment in time of war, the Militia to be increased to 12,300, to be permanently embodied, with 5200 more to be called up for short periods; and the reorganisation is being proceeded with. The total armed strength is estimated at 60,000.

The Army of the Dutch East Indies numbers about 40,000 officers and men, recruited voluntarily, of whom about 1400 officers and 16,000 men are Europeans. The feudatory chiefs are under obligations to supply auxiliary troops, and there is a territorial militia of small value. A plan of mobilisation for war has recently been adopted.

## The Navy.

The constitutional head of the Navy is the Sovereign, but the administrative duties are intrusted to a Minister of Marine, who is assisted by chiefs of the various departments.

The Naval Budget for 1903 amounted to £1,376,068. The total of officers and men enlisted for the Navy reaches 11,000, but this figure includes the marine infantry. The executive officers are divided as follows: 1 vice-admiral, 3 rear-admirals, 25 captains, 40 commanders, 400 lieutenants and sub-lieutenants, and 200 midshipmen.

The strength in ships built, building, and projected on Nov. 30th was—

Built.	
Battleships, 3rd class . . . . .	2
Coast defence ships . . . . .	5
Unprotected cruisers . . . . .	6
Torpedo vessels . . . . .	12
Torpedo boats . . . . .	29
Building.	
Battleships, 3rd class . . . . .	2
Coast defence ships . . . . .	2
Torpedo boats . . . . .	5
Projected.	
Battleship, 3rd class . . . . .	1
Coast defence ships . . . . .	6
Torpedo vessels . . . . .	7
Torpedo boats . . . . .	2
Submarine (to be purchased) . . . . .	1

#### Local Government, Education, etc.

The principal dockyards are situated as follows:—

**Helder.** Two docks take cruisers.

**Hellevoetsluis.** One dock, takes small battleships.

**Amsterdam.** Two floating docks take cruisers.

**Rotterdam.** Three floating docks take small cruisers.

For local government the country is divided into 11 provinces and 1123 communes, each province having its own representative body, which has the power of making ordinances subject to the approval of the Sovereign; and each commune having its council elected for 6 years, with a mayor and aldermen. Entire liberty and social equality granted to all religions. The majority belong to the Dutch Reformed Church, but there are over 1,800,000 Roman Catholics, and the State pays certain fixed allowances to the different Churches. Education is compulsory for children from 6 to 13 years of age, and is well organised, and practically free as to the primary schools. Great importance is attached to the teaching of modern languages and to technical and scientific education. The judicial system includes 106 cantonal courts, 23 district tribunals, 5 Courts of Appeal, and the High Court. Trial by jury does not exist. Length of railways 1772 miles. Length of canals about 2000 miles, and of other navigable waterways about 3000 miles. The chief newspapers are the *Liberal Algemeen Handelsblad*, the *Nieuwe Rotterdamse Courant*, and the *Standaard*, of which Dr. Kuyper was formerly editor, and which is the Ministerial organ.

The chief imports are cereals and flour, iron and steel, textiles, and raw materials and food products generally. The chief exports are food products, drugs, iron, steel, textiles, sugar, etc. The few duties that are levied are not for purposes of protection. Practically free trade prevails. The chief towns are Amsterdam (pop. 538,815), Rotterdam (348,474), and The Hague (222,477). At the last-named city the Permanent Court of Arbitration, which was the outcome of the Peace Conference of '99, is established (see INTERNATIONAL ARBITRATION).

#### Statistics and Diplomatic.

Area, 12,648 sq. m.; pop. 5,430,981. Revenue, 1902, £13,428,534; expenditure, £13,512,954; debt, £95,032,537; imports, 1903, £189,810,364; exports, £162,579,775.

**Ministry.** *Premier and Minister of Interior.* A. Kuyper, D.D.—*Foreign Affairs*, R. Baron Melvil van Lynden, D.L.—*Finance*, J. J. J. Harte van Tecklenburg, D.L.—*Justice*, J. A. Loeff, D.L.—*Marine*, Rear-Admiral A. G. Ellis.—*War*, Major-Gen. J. W. Bergansius.—*Waterstaat, Commerce and Industry*, J. C. de Marez Oyens, D.L.—*Colonies*, A. W. F. Idenburg. **Minister in London**, Baron Gericke van Herwijnen, 8, Grosvenor Gardens, S.W.—*Secretary of Legation*, D. Baron van Asbeck.—*Consul-General*, H. S. J. Maas, K.N.L., 4, Coleman Street, E.C.

**British Minister at The Hague**, Sir Henry Howard, K.C.M.G., C.B.—*First Secretary*, Arthur F. G. Leveson-Gower.—*Third Secretary*, George A. Mounsey.—*Attaché*, Frank Rattigan.

**British Consuls.** *Rotterdam*, H. Turing; *Amsterdam*, W. C. Robinson.

#### Colonies.

**East Indies.** The Dutch possessions in the Asiatic Archipelago include (1) Java, with Madura, and (2) what are called the Outposts, viz., Sumatra, part of Borneo, Celebes, the Moluccas, part of New Guinea, and the Sunda and other islands. The administrative and executive authority for the whole of Dutch East India is in the hands of a **Governor-General**, assisted by a **Council** of five members. Under him the administration is carried on by Residents and subordinate officers. The army, which is purely colonial, numbers about 14,500 Europeans and 23,000 natives. The cost of the navy is borne partly by the colony and partly by the Government of the Netherlands. There is complete religious liberty, and education is well looked after. There are 1348 miles of railroad opened for traffic. The chief exports are sugar, coffee, tea, indigo, and tobacco. The total area is estimated at 736,500 sq. m.; and the pop. at about 36,000,000. **Estimated revenue**, '99, £11,105,000; **expenditure**, £12,087,600; **average imports**, £15,000,000; **average exports**, £17,000,000.

**Governor-General**, W. Rooseboom (appointed June 1st, 1899).

**Java** is the chief seat of Dutch power in the East Indies. Capital, **Batavia**, 149,006. Other chief towns, Samarang (pop. 89,286) and Sourabaya (pop. 146,944). **Exports**: coffee, sugar, tea, rice, indigo, pepper, tobacco, cinchona bark, etc. **Imports**: cotton and woollen goods, yarns, provisions and manures. Divided, with the adjacent island of Madura, into 17 Residencies, each administered by a Resident and his subordinates under the Governor-General of the Dutch East Indies. Land is Government property, except in the west, and is let on hereditary lease to individuals, or to villages in the case of communal holdings. Most of the coffee plantations are directly under Government management, the natives cultivating coffee instead of paying taxes. The authorities take the whole of the produce at the fixed price of 15 florins (£1 5s.) for every picul (133½ lb.). This system still obtains in part, but a poll tax of one florin was

in '82 substituted for the performance of enforced services. A railway connects Kalisaat, Sourabaya and Banjoewanjie. **Area** of Java and Madura 50,554 sq. m.; **pop.** about 29,000,000, of whom about 63,000 are Europeans.

**British Consul** at Batavia, D. D. Fraser.

**The Outposts**, which have an estimated **area** of about 680,000 sq. m., and an estimated **population** of about 9,000,000, are administered by Governors, Residents, etc., according to their status.

**Borneo.** Of the estimated total **area** of 300,000 sq. m., estimated **pop.** 1,846,000, Holland claims as a possession 203,714 sq. m. of territory on the south, east, and west of the island, with a population of about 1,250,000. In reality this immense tract is parcelled out into various native states. Those on the coast are more or less under Dutch influence. Of the interior little is even known. The principal Dutch settlements are at Sambas, Pontiana, Banjarmasin, and Koti.

**Celebes** has an **area** of 72,000 sq. m.; **pop.** about 2,000,000. Besides the towns of Menado, Port Rotterdam, and Vlaardingen or Macassar, there are a number of native states, which, however, recognise the authority of the Dutch.

**Dutch New Guinea**, lying to the west of the British possessions in New Guinea, covers an **area** of 151,790 sq. m., and has a **population** of about 200,000. It is administered by a Resident at Ternate, Molucca Islands, who is responsible to the Governor-General.

**West Indies.**—Curaçao, an island in the Caribbean Sea off the coast of Venezuela, is the chief of Holland's West Indian possessions. The colony of Curaçao includes the islands of Curaçao, Buen Ayre or Bonaire, Aruba, St. Eustache, and Saba, with part of the island of St. Martin. The total **area** is 403 sq. m., and the **pop.** about 52,000. The colony is administered by a Governor with a Council of 4 members all nominated by the sovereign, and a Colonial Council of 13 nominated members. Cattle, sheep, goats, etc., are bred for exportation.

**British Consul** at Curacao, J. Jesurun.

**Surinam**, or Dutch Guiana, is a colony on the north coast of South America, bounded on the east by French Guiana, on the west by British Guiana, and on the south by the mountains which separate it from Brazil. It is governed by a governor and council of four members, all appointed by the sovereign. There is a representative body called the Colonial States, elected for six years by the inhabitants. The capital is Paramaribo, **pop.** 31,865. The chief products are sugar, cocoa, fruits, coffee, rice, etc. Some gold mining is carried on also. **Area** 46,060 sq. miles; **pop.** 75,016. **Imports**, 1902, £515,255; **exports**, £343,058.

**British Consul** at Paramaribo, J. R. W. Pigott.

#### **Ruler.**

**Wilhelmina**, Queen of the Netherlands, was b. Aug. 31st, '80. She is the daughter of William III., of the Netherlands, by his second wife, the Princess Emma, sister of H.R.H. the Duchess of Albany, and daughter of Prince George Victor of Waldeck-Pyrmont. Queen Wilhelmina succeeded to the throne on the decease of her father, on Nov. 23rd, '90, but her mother acted as Queen-Regent till the young Queen came of age (Aug. 31st, '98), and, amidst the enthusiasm

of her people, was installed as Sovereign. Her betrothal to Duke Henry of Mecklenburg-Schwerin was announced in Oct. 1900, and the marriage took place on Feb. 7th, 1901. Duke Henry is a son of the late Duke Frederick Francis II., who held a high military command in the Franco-German war, and was born in '76. The succession to the throne is in the direct male line, or failing males, females. If there is no legal heir, Sovereign and Parliament (or if the Sovereign is dead, Parliament alone), with its numbers doubled for the occasion, designate a successor. In April 1902 the Queen was attacked by typhoid fever; while she was recovering she was prematurely confined, and for a time her condition was critical, but happily she recovered.

#### **Political Parties.**

Parties are divided into **Liberals** and **Anti-Liberals**, the latter being composed chiefly of such opposite elements as Catholics and Orthodox Protestants, who are also called **Conservatives**. The only bond apparently between these two bodies is the conviction that the supremacy of religious authority must be recognised in the government of the nation, whereas the Liberals urge that religious questions should be kept separate from the administration of the State. In 1901 a split took place through the advanced section of the Liberals demanding universal suffrage on the "one man one vote" basis. This broke up the powerful organisation of the Liberal Union, and the general election of June 12th, 1901, resulted in the return of 32 Protestant Anti-Revolutionists, 25 Catholics, and one Christian Democrat, forming the Right, 58 strong; and of 26 Liberals, 9 Radicals and 7 Socialists, forming the Left, 42 strong. Dr. Kuyper, the leader of the Anti-Revolutionists, then formed a Cabinet, in which three seats were given to the Catholics. After the July 1902 election there were 27 Liberals in the First Chamber and 23 Anti-Revolutionists. The Liberals, Radicals and Socialists are Free Traders.

#### **History, 1904.**

An Arbitration Convention with France was signed (April 6th), and a new **Commercial Treaty** with Belgium (June 23rd). After a three-days' debate (July 14th) the First Chamber, by 27 votes to 22, rejected a Bill brought in by the Government, and approved by the Second Chamber on March 24th, dealing with **Higher Education**, and granting to the holders of diplomas at private sectarian universities the same standing and rights as those granted to graduates at State universities. The whole of the members of the Left opposed the Bill on the ground that such privileges should not be granted without full guarantees against the introduction of religious dogma in the educational work of such universities. The Premier thereupon advised a dissolution of the Chamber, and the session was closed (23rd). When Parliament reassembled (Sept. 20th) the Premier announced that the Bill dealing with higher education would be again introduced. The **Budget** put the estimated revenue for 1904-5 at £13,833,333, and the estimated expenditure at £14,583,333. It was proposed to meet the deficit by an increased duty on alcoholic liquors and a further tax on the profit of certain trades.

World. . . . .	1874	Society news and literary and political notes.	6d.	—	The Yates family.

**New Guinea, or Papua.** An island lying directly N. of Australia, and after Australia the largest island in the world. It is about 1490 miles from E. to W., with a breadth at centre of 430 miles. The area is now computed to be 234,768 sq. m. The British territory comprises the south-eastern part of the island and neighbouring island groups. See BRITISH EMPIRE, p. 92. The German territory is known as Kaiser Wilhelm's Land, and lies to the north of the British territory. See GERMANY (Colonies), p. 241.—Dutch New Guinea lies to the west of the British territory. See NETHERLANDS (Colonies), p. 404.

**New Hebrides.** A long chain of volcanic islands in western Polynesia, lying W. of Fiji and N.E. of New Caledonia. Area about 3000 sq. m.; pop. about 100,000. The larger number of the natives are still cannibals. Under the Anglo-French Convention of Nov. 16th, '87, and the Agreement of June 26th, '88, they are, for the protection of life and property, placed under a joint commission of French and English naval officers on Pacific stations. There are many British and French settlers in the islands, and both Protestant and Roman Catholic missions. The French settlers are accused by the British, on the spot and in Australasia, of endeavouring to establish French predominance by purchasing land from the natives, and paying for it in arms and spirits, the British being prohibited by their own laws from importing either arms or alcohol. The Joint Commission have no

power, under the Convention and Agreement, to deal with such importations, or with the acquisition of land. Australia and the British settlers therefore demand the immediate establishment of a Land Court, to deal with all disputes about land and to keep a record of titles, the appointment of a British Resident, and the equalisation of the trading conditions as to the importation of arms, alcohol, etc. By the Anglo-French Agreement of April 8th, 1904, the two Governments agreed to draw up in concert an arrangement which, without involving any modification of the political *status quo*, should put an end to the difficulties arising from the absence of jurisdiction over the natives of the New Hebrides. They agreed to appoint a Commission to settle the disputes of their respective nationals in the said islands with regard to landed property. The competency of this Commission and its rules of procedure are to form the subject of a preliminary agreement between the two Governments. See p. 93 for High Commissioner for the Western Pacific.

## NICARAGUA.

Nicaragua is a Central American republic, bounded on the N. by Honduras, S. by Costa Rica, W. by the Pacific, and E. by the Caribbean Sea. The Constitution of '94, as amended in Dec. '96, vests the executive in a President elected for four years, and the legislative in a

Congress of one House, containing 40 members elected by universal suffrage for two years. There is religious liberty, and primary instruction is free and compulsory. **Army** about 2000, besides a reserve and militia. The culture of the land is improving, coffee, bananas, and rubber plantations showing good returns. German capital is largely invested in coffee estates. Some mining is also done by British and American companies. **Imports**: cotton and woollen goods, flour, wines and spirits, drugs, hardware, provisions, etc. **Exports**: coffee, gold, rubber, mahogany and wainut, hides, and cattle.

**Area**, 49,500 sq. m.; **pop.** 500,000, consisting mainly of Indians and mixed races, with very few Europeans. The capital is **Managua** (pop. 30,000). Leon has a population of 45,000, and Granada of 25,000. **Revenue**, 1901, about £500,000; **expenditure** about £483,500; **imports**, 1902, £254,637; **exports**, £609,365. **Foreign debt**, 1903, £264,665.

**President**, Señor Don José Santos Zelaya (re-elected 1901 for the term 1902-6).

**British Minister** (at Guatemala), *Charge d'Affaires*, H. W. Harrison, C.M.G.

**British Consuls**: at Greytown, Herbert F. Bingham; at Granada, W. J. Chambers; at Managua, C. E. Nicol.

**Minister to Great Britain**, Señor Don Crisanto Medina, 1, York Place, Portman Square, W.

**Nicoll, W. Robertson, LL.D.**, was b. Oct. 10th, 1851, at the Free Church manse, Auchindoir, Aberdeenshire. He studied first at the University of Aberdeen, graduating M.A. in '70; next at the Free Church College, Aberdeen, until '74, when he was ordained minister of the Free Church, Duftown, from which in '77 he was transferred to the Free Church, Kelso. In succession to Dr. S. Cox, he became editor of the *Expositor* in '84. In the following year ill-health compelled him to give up public speaking. In Nov. '86 he came to London, and started the *British Weekly*, which has been instrumental, to a remarkable extent, in introducing new writers to the reading world, and which took such a prominent part in the agitation over the Education Bill in 1902, and in the Passive Resistance Movement in 1903. The degree of LL.D. was conferred upon him by Aberdeen University in '90. He was married to Miss Katherine Pollard in '97. Dr. Nicoll is the author of many theological works, in addition to a "Life of James Macdonell, of the *Times*" ('89), a "Memoir of Professor Elmslie" ('90), and has been engaged for a long time on "The Victorian Era of English Literature: a Biographical and Critical History." He has projected and edited "The Expositor's Greek Testament," "The Expositor's Bible," "The Theological Educator," "The Clerical Library," "The Household Library of Exposition," etc. He is also joint editor of "Literary Anecdotes of the Nineteenth Century," of which two volumes appeared in '95 and '96, has edited an edition of Charlotte Brontë's works, and published "Letters on Life by Claudius Clear." In Oct. '91 he commenced the *Bookman*, a monthly literary journal, which was quickly recognised to be of high literary merit; in '93 the *Woman at Home*, which he had a large share in founding, began its career; in '98 he undertook the editorship of the *Christian Budget*, and in 1900 yet another publication under his auspices was issued—the *British Monthly*.

## NOBEL PRIZES.

The Nobel Foundation is based upon the will of Dr. Alfred Bernhard Nobel, the Swedish engineer and chemist, and inventor of dynamite, who died in 1896, and left part of his great fortune to constitute a fund, the interest of which he directed to be awarded annually in prizes to those persons who shall have contributed most materially to benefit mankind during the preceding year. There are five prizes, each worth about £8000, to be awarded for the most important discoveries or improvements in (1) Physics, (2) Chemistry, and (3) Physiology or Medicine; for (4) the most distinguished work of an idealistic tendency in the field of literature, and (5) for the best effort towards the fraternity of nations and the promotion of peace. The Swedish Academy of Sciences, Stockholm, awards the Physics and Chemistry Prizes; the Caroline Medical Institute, Stockholm, awards the Prize for Physiology or Medicine; the Swedish Academy in Stockholm awards the Literature Prize; and the Peace Prize (which can be granted to an institution or an association, and not only to an individual), is awarded by a committee of five persons elected by the Norwegian Storting. No consideration is paid to the nationality of the candidates, but it is essential that every candidate shall be proposed in writing by some qualified representative of science, literature, etc., in the chief countries of the civilised world, such proposals to reach the Committee before the 1st of February in each year, the awards being made on the following 10th of December. There is an **English Nobel Prize Committee**, of which Lord Avebury is chairman and Mr. G. Herbert Thring secretary. The Nobel Foundation is represented by a **Board of Control** at Stockholm, consisting of five members with a president appointed by the King of Sweden and Norway. Nobel Institutes are to be established in each of the five departments, to carry out scientific investigations as to the value of the discoveries and improvements, and to promote the other objects of the Foundation.

The prizes have been awarded thus:—

### Peace—

- 1901. MM. Dunant and Passy.
- 1902. MM. Ducommun and Gobat (Switzerland).
- 1903. Mr. W. R. Cremer, M.P.
- 1904. The Institute of International Law (g.v.).

### Medicine—

- 1901. Dr. Behring, of Marburg.
- 1902. Major Ronald Ross, of Liverpool.
- 1903. Prof. Finsen, of Copenhagen.
- 1904. M. Pavloff, of St. Petersburg.

### Chemistry—

- 1901. Prof. J. H. van't Hoff, Berlin.
- 1902. Prof. Emil Fischer, Berlin.
- 1903. Prof. Arrhenius, Stockholm.
- 1904. Sir William Ramsay, London.

### Physics—

- 1901. Prof. Röntgen.
- 1902. Profs. Lorentz and Zeeman, Holland.
- 1903. Prof. Becquerel and Zeeman and Mme. Curie.
- 1904. Lord Rayleigh.

### Literature—

- 1901. M. Sully Prudhomme.
- 1902. Prof. Mommsen.
- 1903. M. Björnson.
- 1904. M. Mistral and Don José Echegaray.

All information can be obtained from Nobelstiftelsen, Stockholm; or, as to the Peace prize,

from the Comité Nobel Norvégien, Victoria Terrasse, 7, III., Christiania.

**Nordau, Max Simon**, was b. July 29th, '49, at Buda-Pesth, but is a Prussian subject and a citizen of the German Empire. He received his university education at Buda-Pesth, Berlin, and Paris, obtained the degree of M.D., travelled all over Europe, and has been settled in Paris since '80. He was co-founder and for many years Vice-President of the Association Littéraire et Artistique Internationale, Paris; a member of the Hellenic National Academy, Athens; and first vice-president of the Zionist (see JEWS) Congresses at Bale, '97, '98, '99, 1901, 1903, and London 1900. His first book on Paris appeared in '78; and has been followed by a great many others, among which more especially two in English translation,

"Conventional Lies of the Children of Culture," '83, and "Degeneration," '93, were much criticised and led to considerable discussions. They were followed by "The Drones must die," '99. He has also published in Italian and French. His newest work is "Zeitgenössische Franzosen" (French contemporaries).

**Nurses, Royal British Association of**, is a professional organisation of trained nurses, with a membership of nearly 3000. Its objects are to improve the status of the nursing profession, to establish a Register of Trained Nurses, and to carry out benevolent schemes for the advantage of members. **Secretary**, Annie J. Hobbs. **Club Rooms**, Library, and **Offices**: 10, Orchard Street, London, W.

## OBITUARY, 1904.

The following classified list of notable persons deceased during the year will explain itself, though it may be mentioned that, wherever it has been possible to obtain them, the date of decease has been given in parentheses at the end of each paragraph, and the age in italic figures.

### ROYALTY AND RULERS.

**Anhalt**, Duke of (Jan. 24), 72  
**Cambridge**, H.R.H. George William Frederick Charles, 2nd Duke of, K.G., P.C., K.P., G.C.M.G., G.C.H., G.C.B., G.C.S.I., and C.V.O. (creat. 1801), grandson to George III. and first cousin to Queen Victoria. Field-Marshal and Commander-in-Chief till '95 (March 17), 85  
**Hanover**, Mary, Princess of, sister of the Duke of Cumberland (June 4), 53  
**Isabella II.**, Queen of Spain '33-'68 (April 9), 73  
**Korea**, Crown Princess of (Nov. 5)  
**Leiningen**, Admiral H.S.H. Prince of, G.C.B., G.C.V.O., retired in '95; 1st cousin to H.M. King Edward (April 5), 73  
**Lippe-Detmold**, Count Ernst of Lippe-Biesterfeld, Regent of (Sept. 26th), 61  
**Mecklenburg-Strelitz**, Frederick William, Grand Duke of, K.G., D.C.L. (May 30), 84

**Thorley**, George E., late Warden of Wadham College (April 21)  
**Watson**, Rev. Albert, M.A., Fellow, and formerly Principal, of Brasenose Coll. (Nov. 21)  
**Williams**, Charles, journalist and war correspondent (Feb. 9), 65

### ART, MUSIC, AND THE DRAMA.

**Archer**, James. R.S.A. (Sept. 3), 82  
**Barrett**, Wilson, the actor and dramatic author (July 22), 58  
**Campbell**, Herbert (Herbert Edward Storey), the comedian (July 19), 61  
**Chappell**, S. Arthur, founder of the Popular Concerts (Dec. 21), 78  
**Cooper**, James Davis, wood engraver (Feb. 29), 81  
**Dvorak**, Antonin, the Bohemian composer (May 1), 62  
**Farren**, Nellie (Mrs. Robert Soutar), the great burlesque actress (April 28)  
**Furse**, C. W., A.R.A. (Oct. 17), 36  
**Goodall**, F., R.A., (July 28), 82  
**Hiles**, Henry, Mus.Doc., director Virgil Clavier School (Oct. 20), 78  
**Hollingshead**, John, journalist and theatrical manager (Oct. 10), 78  
**Hunter**, Colin, A.R.A. (Sept. 24), 63  
**Nicol**, Erskine, A.R.A., R.S.A. (March 8), 78  
**Pearce**, Stephen, artist (Jan. 31), 84  
**Prinsep**, Valentine Cameron, R.A. (Nov. 11), 66  
**Sandys**, Frederick, painter (June 25), 72  
**Scott**, Clement, journalist and dramatic critic of the *Daily Telegraph* for many years (June 25), 64  
**Severn**, Walter, painter and president Dudley Gallery Art Society (Sept. 22), 74  
**Snell**, Henry Saxon, F.R.I.B.A. (Jan. 10), 74  
**Sterling**, Antoinette (Jan. 10), 53  
**Stevenson**, D. W., R.S.A., sculptor (March 18), 62  
**Watts**, George Frederick, O.M., R.A. (retired). His paintings of ideal subjects, such as "Love and Death," "Hope," "Orpheus and Eurydice," have justly given him a world-wide fame (July 1), 87

### COLONIAL AND INDIAN.

**Ackroyd**, Sir Edward J., Puisne Judge of the Supreme Court of Hong Kong '92-'95 (Feb. 5), 65  
**Allen**, Charles H., F.R.G.S., 19 years secretary British and Foreign Anti-Slavery Society (Dec. 19), 80

**Baldwin**, Rt. Rev. Maurice S., D.D., Bishop of Huron since '82 (Oct. 19), 68  
**Berry**, Sir Graham, formerly Premier of Victoria (Jan. 25), 81  
**Braddon**, Sir Edward, K.C.M.G., ex-Agent-General and ex-Premier of Tasmania (Feb. 2), 74  
**Campbell**, John, ex-Professor of Church History at Montreal Presbyterian College (Aug.) 64  
**Caven**, Dr. William, Principal Knox Presbyterian College, Toronto (Dec. 2), 74  
**Churton**, Rt. Rev. H. N., Bishop of Nassau, Bahamas (Jan. 20), 60  
**Copeland**, Hon. Henry, Agent-General New South Wales (June 22), 65  
**Darrell**, Hon. R. D., C.M.G., member Executive Council Bermuda (April 11), 77  
**Dibbs**, Sir George, ex-Premier of New South Wales (Aug. 4)  
**Douglas**, Hon. John, C.M.G., Governor of Thursday Island, Queensland (July 22), 76  
**Durbar**, Shri Khachar Ala Chela, C.S.I., Chief of the Kathiawar State of Isdan (Feb.) 71  
**Hayes**, Rt. Rev. James T., Bishop of Trinidad (Jan. 27), 56  
**Holmes**, Rt. Rev. J. Garraway, Bishop of St. Helena since '99 (Sept. 26), 64  
**Kabraji**, Kaikhosroo Nowroji, editor for 40 years of the *Rast Goftar* and dramatist and novelist (April 25), 62  
**King**, Philip, M.L.C. New South Wales (Aug. 4)  
**Machray**, Most Rev. Robert, Primate of all Canada, Prelate of the Order of St. Michael and St. George (March 9), 72  
**McLennan**, William, the Canadian poet, author of "Lays of Old Canada" (July 28), 48  
**M'Intyre**, Sir John, a Victorian politician (Jan. 18), 71  
**Ross**, Sir David Palmer, C.M.G., Surgeon-General of British Guiana (May 30), 62  
**Schermbrucker**, Colonel F., member Executive Council Cape Colony (April 27), 72  
**Tata**, Jamsetjee Nusserwanji, Bombay merchant and philanthropist (May 19), 65  
**Trutch**, Sir J.W., K.C.M.G., ex-Lieut.-Governor of British Columbia (March 2), 77  
**Whitley**, Rt. Rev. Dr. Jabez Cornelius, Bishop of Chota Nagpur (Oct. 18), 67  
**Youl**, Sir James A., K.C.M.G., formerly of Tasmania (June 5), 93

### AMERICAN AND FOREIGN.

**Bartholdi**, Auguste, the French sculptor (Oct. 4), 70  
**Bismarck**, Prince Herbert, ex-German Secretary of State for Foreign Affairs under his father (Sept. 18), 54  
**Blanc**, Baron, Italian Senator and ex-Minister for Foreign Affairs (May 31)  
**Bobrikoff**, General Nicolai, Governor-General of Finland; murdered at Helsingfors (June 16)  
**de Cassagnac**, Paul, editor of the *Autorité Bonapartist* and a supporter of General Boulanger (Nov. 4), 61  
**Celestia**, Cardinal, Archbishop of Palermo (April 14), 90  
**Curtiss**, Rev. Samuel Ives, Ph.D., D.D., Professor of O. T. Literature and Interpretation at the Theological Seminary, Chicago (Sept. 22), 60  
**Duclaux**, Emile, head of the Pasteur Institute, Paris (May 3), 64  
**Finsen**, Professor, of Denmark, the discoverer of the light treatment of lupus (Sept. 25), 43

Fischer, Dr. Franz, of the *Cologne Gazette* (June 7), 57  
 Gram, M., Norwegian statesman (July 7)  
 Hanna, Marcus Alonzo, U.S. Senator (Feb. 15), 66  
 Hearn, Lafcadio, the Japanese author, and Lecturer on English Literature at the Imperial University, Tokio (Sept. 23), 54  
 Herzl, Theodor, Austrian journalist, and leader in the Zionist movement (July 3), 46  
 Hoar, George F., Senator U.S.A. representing Massachusetts (Sept. 30), 78  
 Hohenzollern von Sigmaringen, Prince Frederick (Dec. 2), 61  
 Ivanoff, Lieut-General, Governor-General of Turkestan (June 1), 62  
 de Jaworski, Chevalier, leader of the Polish party in the Austrian Reichsrath (Oct. 23), 78  
 Jokai, Maurus, the Hungarian patriot and novelist (May 5), 79  
 Kappist, Count Peter, Russian Ambassador at Vienna (Dec. 2), 66  
 Kruger, Stephanus Johannes Paul, ex-President of the Transvaal (July 14), 78  
 von Lenbach, Professor Franz, of Munich, the great painter (May 5), 68  
 Lassen, Eduard, the German composer (Jan. 15), 74  
 Leiter, Levi Z., of Chicago, father of Lady Curzon (June 9), 70  
 Makaroff, Vice-Admiral S. O., commanding the Russian fleet at Port Arthur; drowned in the *Petropavlovsk* exploded by a mine (April 13), 55  
 Marinoni, Hippolyte, manager *Petit Journal* (Jan. 7), 80  
 Minshawi Pasha, of Egypt (Dec. 20)  
 Payne, Henry C., Postmaster-General U.S.A. since 1902 (Oct. 4), 60  
 de Plehve, M., Russian Minister of Interior, and formerly Secretary of State for Finland, assassinated (July 28), 58  
 Pleske, M., ex-Russian Minister of Finance (May 9), 52  
 Quay, Matthew S., Senator U.S.A. (May 28), 71  
 Radziwill, Prince Anton, personal aide-de-camp to the Emperor William I. (Dec. 16), 71  
 Roth, Dr., Swiss Minister in Berlin (April 7), 68  
 Siemens, Friedrich, the distinguished German engineer (May 27), 77  
 Tigrane, Pasha, Egyptian ex-Minister (July 27), 57  
 Vannovsky, General of the Russian Army (March 10), 81  
 Verestchagin, Vassili, the Russian painter, perished with the *Petropavlovsk* before Port Arthur (April 13), 61  
 Waldeck - Rousseau, Emile, French Prime Minister '99-1902 (Aug. 10), 57  
 von Waldersee, Alfred, Count, and Field-Marshal in the German Army; Commander of the allied forces in China 1900-1 (March 6), 71  
 Whitney, W. C., Secretary of the U.S. Navy in President Cleveland's first administration (Feb. 2), 62

#### MISCELLANEOUS.

Brown, J. T., the Yorkshire cricketer (Nov. 5), 55  
 Cobbe, Miss Frances Power, a former correspondent of the *Daily News*, *Standard*, etc.; women's rights advocate; and anti-vivisectionist; author of several books and philanthropist (April 5), 71  
 Emmett, Tom, cricketer (June 30), 63

Forbes, James Staats, the Chairman of the London, Chatham & Dover and other railways (April 5), 81  
 Ford, W. J., M.A., the cricketer (April 3), 51  
 Lee, James Paris, inventor of the Lee-Metford, Lee-Enfield, and other rifles (Feb. 25), 72  
 Leno, Dan, the comedian (Oct. 31), 49  
 McDonald, John Allen, chief engineer Midland Railway Co. (Dec. 18), 58  
 Moore, Sir John Voce, Lord Mayor of London '98-9 (Feb. 11), 78  
 Morton, Charles, the music-hall manager (Oct. 18th), 86  
 Stanley, Sir Henry M., G.C.B., the famous African explorer (May 10), 64  
 Starey, Samuel R., one of the founders of the Ragged School Union (Nov. 15)  
 Watson, G. L., the designer of the *Britannia* and of 4 America Cup challengers (Nov. 12), 53  
 Wilkinson, C. N., Secretary N.E.R. Co. '71-1904 (April 20), 76  
 Wright, Whitaker, by suicide after being sentenced to 7 years' penal servitude (Jan. 26)  
 Young, Ralph, sec. Northumberland Miners' Association (Dec. 17), 62

**Oku, General Baron**, was born in 1847, and has seen 34 years' service with the Japanese Army. In '77, when he had attained the rank of Major, he greatly distinguished himself at the siege of Kumamoto Castle by the Satsuma insurgents, cutting his way out and opening communication with the relieving army. When the war broke out with China in '94, he was given the command of a division in the Manchurian campaign, and received his title of nobility in recognition of his great services. His knowledge of the ground, and his capacity, marked him out for service in the war with Russia, and he commanded the Second Army, which landed on the east coast of the Liao-tung Peninsula in May 1904, and won the brilliant victory at Kinchau at the end of that month. As to his subsequent service during the war see RUSSO-JAPANESE WAR.

**Old Age Pensions.**—In the 1902 edition of the ANNUAL and previous editions, articles have appeared on this subject giving an account of what has been done in the way of inquiry by Royal Commission and otherwise in this country, and by legislation abroad. See SESSION, sects. 51 and 125 in 1904 ed. for report of Commission on and details of **Aged Pensioners Bill, 1903**. See FISCAL QUESTION (pp. 197 and 198) for references to the subject by Mr. Chamberlain in 1903.

**Oman** is an independent state in South-Eastern Arabia, whose bounds have been considerably reduced during the last hundred years. It is ruled by a Sultan, Seyyid Feysul bin Turki, Hon. G.C.I.E., whose capital is **Muscat** (pop. 40,000). He succeeded in '88, and is recognised by the British Government, which has an agent at Muscat. Over 80 per cent. of the trade is with India and the United Kingdom. Area. 82,000 sq. m. Pop. about 1,500,000.

British Consul and Political Agent at Muscat, Captain W. G. Grey.

**Omanney, Sir Montagu F.**, K.C.B., K.C.M.G., I.S.O., Permanent Under-Secretary of State for the Colonies, and Secretary of the Order of St. Michael and St. George, is the son of Mr. Francis Omanney, and was b. 1842. He was ed. at Cheltenham and Woolwich, and

entered the Royal Engineers in Jan. '64. He was employed on special duty under the War Office and Admiralty and at the Royal Military Academy '67-74, and acted as private secretary to the Earl of Carnarvon, Secretary of State for the Colonies, '74-7. In the latter year he was appointed a Crown Agent for the Colonies. He was a Commissioner of the Colonial Exhibition in '87, and a member of the Royal Commission for the Paris Exhibition 1900. In May 1900 he was appointed to succeed Sir Edward Wingfield at the Colonial Office. In '67 he married Charlotte Helen, daughter of Mr. O. Ommanney, of Bloxham, Oxfordshire.

**Ordnance Survey Office, The**, is a department under the Board of Agriculture and Fisheries for the preparation of maps and plans of the United Kingdom, which are issued on various scales. The Survey was transferred from Army Funds to Civil Votes by the Survey Act 1870. The survey has always been organised upon a military basis, and carried out under military superintendence by officers selected from the Royal Engineers. Survey sections are always held in readiness to carry out such surveys as may be needed on active service. The revision of the survey of Great Britain and Ireland is in progress. Maps can be purchased from accredited agents in the chief towns of the United Kingdom, and can be obtained through many of the post offices in smaller towns, and through any bookseller. Cheap pocket maps of many districts are available, on the scale of 1 in., and ½ in., to the mile. The offices of the **Director-General of the Ordnance Survey** are at Southampton, and there are divisional offices at Edinburgh, Dublin, etc.

**Orleans, Duc d'**. Prince Louis Philippe Robert, the head of the house of Orléans, and probably the chief claimant to the throne of France, is the eldest son of the late Comte de Paris, and was b. Feb. 6th, '69. In '90 he entered Paris, notwithstanding the Expulsion Act of '86, and claimed his right, as a Frenchman,

to undertake military service for his country. He was arrested, but shortly afterwards liberated. After the death of his father he received his supporters in London, and then removed to Brussels, as being nearer France. His sister, Princess Hélène d'Orléans, was married to the Duc d'Aosta in June '95. His marriage to the Archduchess Maria Dorothea of Austria was celebrated at Vienna, Nov. 5th, '96.

**Orphan Working School, The**, was founded in 1758. The institution includes the senior school at Maitland Park, N.W., where 350 children are provided for, and the Alexandra Orphanage for Infants, Hornsey Rise, N., where 150 little ones are educated. There is a Convalescent Home at Harold Road, Margate, containing provision for 25 children. The object of the institution is to keep and educate children of respectable parentage left fatherless and in need. The **Secretary** is Alexander Grant; **Office**, 73, Cheapside, E.C.

**Ottley, Rev. R. L.**, Canon of Christ Church and Regius Professor of Pastoral Theology in the University of Oxford, was born in 1856, and is the sixth son of the Rev. Lawrence Ottley, Canon of Ripon and Rector of Richmond, Yorks. He was educated at the King's School, Canterbury, and Pembroke College, Oxford, winning the Hertford, Craven and Derby scholarships, and the Chancellor's prize for Latin verse, and obtaining a first class in Lit. Hum. ('78). He was tutor at Christ Church ('83-6), then vice-principal of Cuddesdon, Dean of Divinity, and in '93 Fellow and tutor of Magdalen College, holding at the same time the office of head of the Pusey House. In '97 he accepted the benefice of Winterbourne Bassett, near Swindon, and in 1903 he succeeded the late Canon Moberly as Regius Professor. He has written a life of Bishop Andrewes, a study of the Doctrine of the Incarnation, the Bampton lectures of '97 on "Aspects of the Old Testament," and a "Short History of the Hebrews," besides having contributed the essay on Christian Ethics to "Lux Mundi."

## P

**Paderewski, Ignace Jan**, the famous pianist and composer, was b. on Nov. 6th, 1860, in Padolia, a province of Russian Poland. He began to play the piano at the age of three, and, when seven years old, was placed under Pierre Sovinski, a local tutor. In '72 he went to Warsaw, learning harmony and counterpoint from Roguski, and subsequently from Frederick Kiel. He toured through Russia, Siberia, and Roumania, playing only his own compositions. In '78 he became Professor of Music in Warsaw Conservatoire, still continuing to practise his art indefatigably. For a short while in '84 he was a professor at Strassburg Conservatoire, but then definitely decided to try his fortune as a virtuoso. After three years' study with Leschetizky, in Vienna, he made his *début* in '87 with instant success. He next toured through Germany, and in the autumn of '89 appeared in Paris, where he created a *furor*. His *début* in London took place under Mr. Daniel Mayer's direction, on

May 9th, '90, at St. James's Hall. In the following year he visited America, and has since repeated the tour. He has composed more than eighty vocal works, a concerto in A minor for piano and orchestra, a suite for orchestra in G, and many pieces for the piano. His "Polish Fantasia" was produced at the Norwich Festival in '93.

**Palestine Exploration Fund, The**, was founded June 22nd, 1865, for the purpose of conducting systematic and scientific research in the Holy Land. It is not a religious society—that is to say, it does not advocate or attack any form of creed or doctrine—and it is conducted on strictly scientific principles. Nevertheless its work necessarily possesses unusual interest for Bible students of all denominations, since it aims at the accurate and systematic investigation of the archaeology, topography, geology, physical geography, and the manners and customs of the Holy Land. The Society's organ is the *Quarterly Statement*, and it has a

long list of valuable publications. The city of Gezer is now being excavated, under the superintendence of Mr. Macalister. **President**, The Archbishop of Canterbury; **Hon. Secretary**, J. D. Crace, Esq.; **Acting Secretary**, Mr. George Armstrong; **Office**, 38, Conduit Street, W.

**Pali Text Society**, 22, Albemarle Street, W. (Prof. T. W. Rhys-Davids, Ph.D., LL.D.).

**Pamirs, The**, are sometimes called "The Roof of the World," and consist of a number of bleak plateaux and shallow valleys situated about 13,000 feet above the sea level. They lie between Chinese Turkestan, Russian Turkestan, and Afghanistan, and are inhabited chiefly by nomad Khirghiz bands. They command the routes to many of the territories which they overlook, and so Russia and England and the Afghans and the Chinese are all interested in them. Negotiations between the Russian and British Governments resulted during March '95 in an agreement that the spheres of influence of the two countries should be divided by a line starting from a point on Lake Victoria (Zor Zul) near to its eastern extremity, and following the crests of the mountain range running somewhat to the south of the latitude of the lake towards the Chinese frontier. For full details see ed. '96.

## PANAMA.

The Republic of Panama was constituted on Nov. 3rd, 1903. Till that date the republic was one of the nine departments (originally sovereign states) making up the Republic of Colombia. Discontent with the action of the Colombian Government had prevailed for some time amongst the inhabitants of the Isthmus of Panama, who were strongly in favour of the acquisition of the Panama Canal Concession by the United States and the construction by them of the Canal. When, after the Treaty between the United States and Columbia had been signed, the Colombian Congress refused to ratify it, discontent broke out in revolution, and the independence of the Isthmus was declared on Nov. 3rd, 1903. The United States Government at once recognised the new Republic, and concluded with it a treaty (Nov. 18th), providing for the construction and control of the Canal. By the first article the United States Government guaranteed and agreed to maintain the independence of the Republic of Panama. Under **ENGINEERING**, pp. 168-9, the Panama Canal scheme is described, together with details of the terms of the Treaty. Panama ratified the Treaty (Dec. 2nd). Great Britain, together with most of the European Powers, have formally recognised the Republic.

The Republic is divided into 7 provinces, each under an *alcalde* or governor, with other subordinate officials. The Atlantic ports are Colon, Bocas del Toro, and Puerto Bello; and the chief Pacific ports Panama and Montijo; but the British Consul in Panama reported in 1904 that the agreement with the United States delimiting the zone for the canal had left both Panama and Colon practically without a port, and had made the Americans masters of the situation so far as foreign trade was concerned, since American imports go into the zone duty free, while the American tariff applies to other imports. The railway runs from Colon to

Panama across the isthmus, a distance of 47 miles, and is worked by the Panama Railway Co., whose chief offices are at New York. At the end of 1903 the Government notified their assumption of a proportional share of the Colombian debt of about £3,000,000. The share would amount to about £200,000, but the bondholders urge that the share should be based not on the proportion of the area or population of Panama to Colombia, but on the sum of money received from the United States in respect of the Canal Concession.

**Area**, 31,580 sq. miles; **pop.** about 300,000, including a great mixture of races. **Capital**, Panama; **pop.** 20,000. **Imports**, 1903, £171,590; **exports**, £174,643.

**President**, Dr. Manuel Amador Guerrero.

**British Consul at Panama**, G. C. Mallet, C.M.G.

**Consul-General at Great Britain**, Mr. C. R. Zachrisson, 33, Chapel Walks, South Castle Street, Liverpool.

## PARAGUAY.

The Republic of Paraguay is one of the most promising states of South America, situated between the rivers Parana and Paraguay. It is governed, under a Constitution proclaimed in Nov. 1870, by a **President** elected for four years, a Congress consisting of a Senate and a Chamber of Deputies, both elected by universal suffrage, and five Ministers of State chosen by the President. The State religion is Roman Catholic, but all others are tolerated. Education is free and nominally compulsory. The army numbers about 1500 men, but every citizen between 20 and 35 is liable to military service. A railway of about 160 miles runs from Asuncion to Pirapo. There are vast supplies of timber in the forests, but the chief products are *Yerba maté*, or Paraguay tea, tobacco, hides, and timber. Cotton is now being cultivated also. A large number of cattle are reared, and minerals are to be found, but are not worked. There is an English settlement near Villa Rica, worked on a communistic, co-operative basis, called the *Cosme Colony*, and another Australian colony, both of which are succeeding. **Capital**, Asuncion, **pop.** 60,000.

**Area** about 150,000 sq. m.; **pop.**, 1902, 650,000, including about 80,000 Indians. **Revenue**, 1900, £616,829; **expenditure**, £725,181; **public debt**, 1900, £6,069,440, including interest-bearing **funded debt**—internal, £29,083; external, £989,266; non-interest-bearing **funded debt**, £4,668,496; **floating debt**, £382,595; **imports**, 1902, £466,459; 1903, £710,365; **exports**, 1902, £778,132; 1903, £850,730. Great Britain sent 32 per cent. of the imports in 1903, and Germany 14 per cent. Most of the exports go to the Argentine.

**President**, Don Juan Ezcurra (assumed office 1902).—**Vice-President**, Don Manuel Dominguez

**Minister Plenipotentiary**, M. Eusebio Machain, 62, Rue Pierre Charron, Paris.—**Secretary of Legation**, Patrocino Felada; **Attaché of Legation**, Ramon V. Caballen.

**Consul-General in London**, Alfred James, 18, Eldon Street, E.C.; **Consul**, Alexander Baillie; in *Liverpool*, William Nelson.

**British Minister in Asuncion**, W. H. D. Haggard, Esq. (resident in Buenos Ayres); **British Consul at Asuncion**, C. W. G. Gosling.

# PARLIAMENT OF GREAT BRITAIN AND IRELAND.

I. THE MINISTRY, with tables showing appointments from 1894 to 1904.

II. THE HOUSE OF LORDS, with Biographies of all Peers and Bishops.

III. THE HOUSE OF COMMONS, with

- (i) Biographies of all M.P.s;
- (ii) Pollings in all Constituencies at and since 1900; and
- (iii) An account of Political Parties since 1868.

Under the Constitution the supreme political authority in the United Kingdom is vested in the King (see EDWARD VII., p. 154) and Parliament. The Executive authority in practice is vested in the Cabinet (which is a Committee of Ministers, nominated by the Crown but responsible to Parliament), whose power rests upon the possession of a majority in the House of Commons. The Legislative authority resides in Parliament. This article deals first with the Ministry, and then with Parliament.

## I. THE MINISTRY.

From an early period the kings of England were advised on public affairs by a **Privy Council**, matters of State being discussed in the Sovereign's presence, and the result determined by vote subject to his pleasure. The selection by the Sovereign of a few of the whole number was no doubt the origin of the Cabinet Council. It was not until the Restoration, says **Macaulay**, that the interior council began to attract general notice. The sovereign cannot now constitutionally preside at a Cabinet Council.

The Chief of the Cabinet and of the Ministry is called the **Prime Minister** or **Premier**. It is he who at the summons of the sovereign forms an administration, of which he is the head. Although each member of the Cabinet administers his own department independently of his colleagues, all important departmental matters are submitted to him, the most important being brought before the whole Cabinet, and no appointment of moment is made or recommended to the Crown without his knowledge and concurrence. His own patronage is very extensive. In forming an administration, he selects all those who are to fill the various offices, though the appointments are subject to the sovereign's approval. It is upon his advice that as vacancies occur the archbishops, bishops and deans and the highest judges are appointed, and over one hundred **Crown livings** are filled; and upon his recommendation that the most envied **temporal titles and honourable distinctions**—peerages, baronetcies, and the Garter, for example—are conferred, and such high appointments as the Lord-Lieutenancy of Ireland, the Viceroyalty of India, the principal ambassadorships and colonial governorships, and the lord-lieutenancies of counties, are made by the Crown. He is the leader of the **House of Parliament** of which he is a member. Yet as **Prime Minister** he enjoys no legal precedence over his colleagues, his official existence being indeed not recognised by statute. When a **Ministry resigns** it is the function of the sovereign to call upon some statesman to form another administration. There is no restriction upon the Royal choice, but the statesman

usually selected is the leader of the opposing party in one of the two Houses.

The offices which invariably give the holder **Cabinet rank** are those of First Lord of the Treasury, Lord Chancellor, Lord President of the Council, the Secretaries of State for the Home Department, Foreign Affairs, the Colonies, for War, and for India, Chancellor of the Exchequer, and First Lord of the Admiralty. For many years the **Prime Minister** of the day took the office of First Lord of the Treasury himself, but Lord Salisbury thrice gave that position to another member of his Cabinet, and associated with himself, as Premier, the office of Foreign Secretary; while from Nov. 1900 until his retirement in July 1902 the only office he held, as apart from the position of First Minister, was that of Lord Privy Seal. As Mr. Balfour, when charged with the formation of a ministry on the retirement of Lord Salisbury was already First Lord of the Treasury, there was a return to the former usage.

The offices the holders of which may or may not be included in the Cabinet include those of Lord Privy Seal, Chancellor of the Duchy, First Commissioner of Works, Postmaster-General, Lord-Lieutenant of Ireland, Lord Chancellor of Ireland, Chief Secretary for Ireland, Secretary for Scotland, President of the Board of Trade, President of the Board of Agriculture, President of the Local Government Board. **Appointments** to all these offices, and to many others, a full list of which appears on pp. 453-5, are made by, or on the recommendation of, the new Prime Minister, and each person so appointed may hold office as long as he does. Cabinets vary in number from eleven or twelve to eighteen (as now, 1905) or twenty; their members are necessarily **Privy Counsellors**, and their deliberations are confidential. While each Minister conducts the ordinary business of his own office without reference to his colleagues, the most important business of every office is brought under the consideration of the whole Cabinet, who in Parliament are bound to act together on all executive questions. If a Cabinet Minister was in office before election there is no re-election necessary, as there is when the acceptance of office comes after a general election. Ministers holding office direct from the Crown, on going from one such office to another do not vacate their seats. There is, in effect, no limit to the duration of a **Ministry** but the confidence of the Commons; it will not now resign upon the adverse vote of the House of Lords, nor if it be defeated upon a trilling matter in the Commons, but only when it is placed in a minority there upon some question of importance. In such a case the **Prime Minister** either places his resignation in the hands of His Majesty, or asks leave to appeal to the country, and should the latter course be decided upon a general election follows.

## Ministries from 1894 to 1904.

*Notes.*—The names of Cabinet Ministers are indicated by an asterisk (\*). In column 1 the names of those forming the original administration are printed in roman type, and those who took any particular office subsequently in italics.

OFFICE AND SALARY.	Ld. Rosebery's Administration (March 94—June 95).	Ld. Salisbury's 3rd Administration (formed June 29th, '95).	Reconstructed Nov. 1900.	Mr. Balfour's 1st Administration (formed July—Aug., 1902).	Mr. Balfour's Administration (reconstructed Oct. 1903).
Prime Minister	*E. of Rosebery.	*M. of Salisbury.	*M. of Salisbury.	*Mr. Balfour.	*Mr. Balfour.
First Lord of Treasury, £5,000	*E. of Rosebery.	*Mr. Balfour.	*Mr. A. J. Balfour.	*Mr. Balfour.	*Mr. Balfour.
Lord Chancellor, £10,000	*Ld. Herschell.	*E. of Halsbury.	*E. of Halsbury.	*E. of Halsbury.	*E. of Halsbury.
Lord President of the Council, £2,000.	*E. of Rosebery (unpaid).	*D. of Devonshire (3).	*D. of Devonshire (3).	*D. of Devonshire.	*M. of Londonderry.
Lord Privy Seal, £2,000.	*Ld. Tweedmouth (unpaid).	*V Cross (4).	*M. of Salisbury.	*Mr. Balfour (unpaid).	*M. of Salisbury.
Chancellor of the Exchequer, £5,000	*Sir W. Harcourt.	*Sir M. Hicks-Beach.	*Sir M. Hicks-Beach.	*Mr. Ritchie.	*Mr. Austen Chamberlain.
Home Secretary, £5,000.	*Mr. Asquith.	*Sir M. White Ridley.	*Mr. Ritchie.	*Mr. Akers-Douglas.	*Mr. Akers-Douglas.
Foreign Secretary, £5,000	*E. of Kimberley.	*M. of Salisbury.	*M. of Lansdowne.	*M. of Lansdowne.	*M. of Lansdowne.
Celionial Secretary, £5,000	*M. of Ripon.	*Mr. Chamberlain.	*Mr. Chamberlain.	*Mr. Chamberlain.	*Mr. Alfred Lyttelton.
Secretary for War, £5,000	*Mr. Campbell-Bannerman.	*M. of Lansdowne.	*Mr. Brodrick.	*Mr. Brodrick.	*Mr. Arnold-Forster.
Secretary for India, £5,000	*Mr. H. H. Fowler.	*Ld. George Hamilton.	*Ld. George Hamilton.	*Ld. Geo. Hamilton.	*Mr. Brodrick.
First Ld. of the Adm., £4,500	*E. Spencer.	*Mr. Goschen.	*E. of Selborne.	*E. of Selborne.	*E. of Selbourne.
Lord-Lieut. of Ireland, £20,000	Ld. Houghton.	*E. Cadogan.	*E. Cadogan.	*E. of Dudley.	*E. of Dudley.
Ld. Chan. of Ireland, £8,000.	Mr. S. Walker.	*Ld. Ashbourne.	*Ld. Ashbourne.	*Ld. Ashbourne.	*Ld. Ashbourne.
Chief Secretary for Ireland, £4,425	*Mr. J. Morley.	Mr. Gerald Balfour.	Mr. G. Wyndham.	*Mr. G. Wyndham.	*Mr. G. Wyndham.
Secretary for Scotland, £2,000	*Sir G. Trevelyan.	*Ld. Balfour of Burleigh.	*Ld. Balfour of Burleigh.	*Ld. Balfour of Burleigh.	*Mr. Graham Murray.
Chan. of the Duchy, £2,000	*Mr. Bryce (1).	*Ld. James of Hereford.	*Ld. James of Hereford.	Sir W. Walrond.	Sir W. Walrond.
President Bd. of Trade, £2,000	*Mr. Mundella (2).	*Mr. Ritchie.	*Mr. Gerald Balfour.	*Mr. Gerald Balfour.	*Sir W. Walrond.

\* The select committee of the House of Commons on the Civil List, 1901, recommended that the following reduction and salary should be made as affecting parliamentary officers:—  
Treasurer of the Household from £904 to £700; Comptroller of the Household from £904 to £700; Vice-Chamberlain from £900 to £700; Lords-in-Waiting from seven at £700, to five at £700; Captain of the Gentlemen-at-Arms from £1,200 to £1,000; Master of the Horse from £2,500 to £2,000. The committee also recommended the discontinuance of the Mastership of the Buckhounds, and the continuance of the Mastership of the Horse. (to) Now E. Howe.

Parliament is composed of the Sovereign and the Three Estates of the Realm, which are the Lords Spiritual, the Lords Temporal, and the Commons; the Lords Spiritual and Temporal sitting together and forming the House of Lords. The Sovereign alone has the power of summoning or proroguing or dissolving Parliament, and gives the Royal Assent to measures which have passed both Houses. Unless it be dissolved by the Crown, Parliament exists seven years from the date on which it was first to meet. The demise of the Crown does not dissolve Parliament, but, on the contrary, renders an immediate assembling of the two Houses necessary; and if there be no Parliament in existence, the old Parliament must reassemble, and may sit again for six months, if it be not within that time dissolved by the new Sovereign.

The Houses of Lords and Commons differ from each other not only as to their constitution but likewise in respect of their powers and methods of procedure. It is in the House of Peers, for instance, that the Sovereign meets Parliament, and the formal ceremonies connected with the opening or proroguing of the Legislature are gone through. On these occasions, as also when the royal assent is given to public or private bills, the "faithful Commons" merely attend in their lordships' House. But, on the other hand, the House of Commons has an individuality of its own, which is yearly becoming more marked. Its powers and privileges are enormous: it is in the Lower Chamber exclusively that the national estimates are voted, and it is in the Commons that the majority of important legislative proposals are initiated. The royal assent to bills, which alone can convert them into Acts of Parliament, is always given in the House of Lords, more frequently by commission than otherwise; and it is a curious circumstance that the French language is still employed in connection therewith. When a public bill is approved, the clerk says, "*Le roy (or, la reine) le veut.*" If the measure be a private one, he says, "*Soit fait comme il est désiré.*" Should the bill have subsidies for its object, the official says, "*Le roi (or, la reine) remercie ses loyaux sujets, accepte leur b n volence, et aussi le veut.*" If the Sovereign thinks fit to refuse approval to a measure, the clerk then says, "*Le roi (or, la reine) s'avisera.*" This power of rejection, it may be noted, was last exercised by Queen Anne, in the year 1707.

The Clerk of the Parliaments is an officer of the House of Lords, by whom, in conjunction with the Clerk Assistant and the Reading Clerk, are performed such duties as making minutes of the proceedings, swearing peers and witnesses, and signifying the royal assent to bills which have passed both Houses. The office of Clerk of the Parliaments is held by Sir Henry J. L. Graham, K.C.B.

## II. THE HOUSE OF LORDS.

Peers are created by the Sovereign, and, with an exception to be noticed presently, the titles are hereditary, though they may be lost by attainder for high treason. Before the union of the three kingdoms, England, Scotland, and Ireland had each a peerage of its own containing the five temporal ranks or degrees, and precedence in each degree depended upon the date of the creation of the

title. Thus in each country the dukes came first, and took precedence of each other in order of date of title; then came the marquises, earls, viscounts, and barons, precedence in each rank being similarly governed by priority of date. At the union with Scotland, in 1707, it was arranged that the Scotch peerages should rank after the English peerages then in existence, according to degree, and the Scotch dukedoms were accordingly placed in order of date after all the English dukedoms, and so on through the other ranks. The Act of Union also provided that the Scotch peers should be represented in the House of Lords by a portion of their number only; and as it made no provision for the creation of any new Scotch peers, the peerage of North Britain consists exclusively of those whose titles date from before the year 1707. From that time until the Union with Ireland the peerages created were either Irish or of Great Britain, the latter alone giving seats in the House of Lords, and taking precedence according to degree next after the English and Scotch peerages. The Act of Union with Ireland provided that peers of that kingdom should take precedence next after peers of Great Britain according to rank, and that Ireland should be represented in the House of Lords by a portion of her peers only. It was further enacted that one new Irish peerage might be created on the extinction of three existing Irish peerages, and that when the number should be reduced to one hundred, if one peerage became extinct one other might be created. The peerages of the United Kingdom and of Ireland created since the Union take precedence according to rank and date of patent next after those of Ireland which were in existence at the Union, but of the two classes only the peerages of the United Kingdom give of themselves a seat in the House of Lords. There is no limit to the increase of these but the pleasure of the Sovereign.

The peerage collectively may thus be classified as consisting of peers of England, of Scotland, of Great Britain, of Ireland, and of the United Kingdom, but of the Scotch and Irish peers only a portion are peers of Parliament. Irish peers who have not been elected to represent their order in the House of Lords may be returned and may sit for any borough or county constituency in Great Britain. The petition of every claimant to a title of nobility is referred to the Committee for Privileges of the House of Lords, a body which is composed of the Lord Chancellor, the ex-Lord Chancellors, and the Lords of Appeal, or some of them, the President being the Chairman of Committees. Counsel and witnesses may be heard, and the case is decided by the majority of the members of the committee present.

### The Lords Spiritual.

The House of Lords is composed of two of the estates of the realm, the lords spiritual and temporal. The first consists of the Archbishops of Canterbury and York, and twenty-four bishops of the Church of England, the number not having been increased with the successive creation of new bishoprics. The Archbishops and the Bishops of London, Durham, and Winchester are always entitled to sit; the other bishops only receive a writ of summons when the voidance of a see decreases

the total number of lords spiritual to less than twenty-six, and then in order of seniority of appointment. The Bishop of Sodor and Man is not included in this rotation, and has no vote in Parliament. A bishop ceases to be a lord of Parliament on resigning his see.

### *The Lords Temporal.*

The temporal lords may be divided into peers whose right to sit and vote in the House is hereditary, representative peers of Scotland and Ireland, and lords of appeal in ordinary. By the Act of Union between England and Scotland the Scottish peers send sixteen representatives to the House of Lords, who are elected immediately after every general election, and sit until Parliament is dissolved. The Irish peers elect twenty-eight representatives for life.

The Lords of Appeal, of whom there may not be more than four appointed, enjoy the dignity of a baron for life. By the Act of '76 they were to lose the right to sit and vote on resigning office; but by the Appellate Jurisdiction Act of '87 any retired lord of appeal may sit and vote as a member of the House of Lords during his life. And it was directed, '98, that the children of legal life peers and of legal life peers deceased should in future have the courtesy title of "Honourable," together with the rank and precedence next to and immediately after the younger children of all hereditary barons now created or hereafter to be created, and immediately before all baronets.

The lords temporal are divided into dukes, marquises, earls, viscounts, and barons, these titles taking precedence in the order given. But it should be borne in mind that a peer may hold a superior Scotch or Irish title (and by which he may be generally known) to that under which he sits as a peer of the United Kingdom. Thus the Duke of Buccleuch sits as Earl of Doncaster. The lords spiritual and temporal have each an equal vote in the house, whatever may be their rank. As in the House of Commons, each peer must be present to record his vote, the practice of peers giving proxies having been discontinued. A newly created peer, or one elevated to a higher title, is introduced by two other peers of his own degree, who are accompanied by the Earl Marshal (the hereditary office of the Duke of Norfolk), the Lord Great Chamberlain, all in their parliamentary robes, attended by Garter King of Arms (Sir Alfred Scott Scott-Gatty, F.S.A.) or his deputy, and Black Rod (Admiral Sir Henry F. Stephenson, G.C.V.O., K.C.B.). The procession enters the house at the bar, and bows three times on the way to the woolsack, where the peer kneeling presents his patent and writ to the Lord Chancellor. Both these documents are read by the clerk, and the oath is administered to the peer at the table, and he subscribes the roll. He is then with further formalities conducted to one of the benches of the house, the position chosen varying with the rank of the new peer, where he and his introducers bow thrice to the Lord Chancellor, by whom he is afterwards congratulated. Peers are robed on these occasions, and at the opening of Parliament by His Majesty, but wear their ordinary dress when the House is sitting for business. A bishop is introduced by two other bishops, but without

many of the formalities described above; representative peers simply present their writs, and are sworn like peers succeeding to a title.

The peers place themselves somewhat differently to the Commons. There are in this House, as in that, rows of benches running down each side from the throne to the bar; but in the Lords there are, near the bar, a few seats known as the cross benches, the occupants of which face the woolsack. In this quarter of the House sit the Royal dukes, who take no side in politics, and a few noble lords who give a rigid adhesion to neither great party. The lords spiritual sit on the upper benches to the right of the throne, and retain these places no matter which party may be in power. The other lords range themselves pretty much as the Commons do,—the Leader of the House and his colleagues in the Ministry on the front bench to the right of the woolsack, his supporters taking their places on the benches behind him, and the Leader of the Opposition in that House and the ex-Ministers on the left front bench, behind them their adherents. There is no arrangement of peers according to rank, the different degrees sitting together indiscriminately if of the same political complexion.

The House of Lords has both legislative and judicial powers. It is the highest appellate court of the United Kingdom: it may in certain cases try members of its own body; it tries any person who may be impeached by the House of Commons, and it also decides claims to the peerage. The Appellate Court is constituted of the Lord Chancellor and of other legal lords of high standing, such as ex-lord chancellors, and the lords of appeal in ordinary. It may sit during a parliamentary recess, and its hours of business are from 10.30 a.m. to 4 p.m. See p. 313.

The following is the present composition of the House of Lords: Peers of the Blood Royal, 3; Archbishops, 2; Dukes, 22; Marquises, 23; Earls, 124; Viscounts, 35; Bishops, 24; Barons, 316; Scotch Representative Peers, 16; Irish Representative Peers, 28: total, 593.

### *Lord High Chancellor.*

The Lord High Chancellor, who is appointed by mere delivery of the Great Seal to him by the sovereign, is principal legal adviser of the Crown, is by prescription Speaker of the House of Lords, and may act in that capacity even though he be not a peer; he is by virtue of his office a privy councillor, and as the first existing great officer of State he takes precedence of all but royal dukes and the Archbishop of Canterbury. He presides, if present, when the House of Lords is sitting as an appellate court. He is president of the Chancery Division of the High Court and of the Court of Appeal, and is one of the Judicial Committee of the Privy Council. In the absence of the sovereign he reads the King's Speech at the opening and prorogation of Parliament, and he is always one of the Commission for giving the royal assent to bills. He is visitor of all hospitals of royal foundation, the general guardian of all infants, idiots, and lunatics, and has the general supervision of all charitable trusts. His patronage is very extensive. He nominates the puisne judges and county court judges; and, except for Lancashire, he appoints the county magistrates, generally accepting the

nominations of the lords-lieutenant and the borough justices. He is the patron of twelve canonries and a large number of livings. On retiring from office he receives a pension of £5000 a year, but in such case he commonly assists the Lord Chancellor and the Lords of Appeal in Ordinary in the transaction of the judicial business of the House of Lords. Any one who has filled the office of Lord Chancellor may also, at the request of the Lord Chancellor, sit in the Court of Appeal, but he shall not be required to sit and act in the Court unless upon request he consents so to do. The holder of the office may not be a Roman Catholic. The present Lord Chancellor is Lord Halsbury.

The **Chairman of Committees** in the House of Lords is appointed at the commencement of every session. The holders of the office have been the late Lord Redesdale, '51-86; the late Duke of Buckingham and Chandos, '86-9; and the Earl of Morley since '89. The **Chairman of Committees** and several other peers are authorised by commission to act as deputy Speaker in the absence of the Lord Chancellor; and should none of these be present any lord may be chosen to act.

The **Serjeant-at-Arms** of the House of Lords attends the Lord Chancellor with the mace; but the duty of maintaining order in certain parts of the chamber is one of the functions of Black Rod. The **Gentleman Usher** of the Black Rod is an officer of the House of Lords appointed by the Crown who assists at the introduction of Peers.

### Principal Officers of House of Lords.

*Clerk of the Parliaments*, Sir Henry J. L. Graham, K.C.B.

### Alphabetical and Biographical List of Peers and Bishops.

(Revised to Dec. 31st, 1904.)

The following list contains in alphabetical order the names of all peers of whatever classification, whether they be English, Scotch, Irish, of Great Britain, or of the United Kingdom, those who are not entitled to a seat in the House of Lords having an \* prefixed.

It also includes the bishops, whether they be lords of Parliament or not, the distinction between these being indicated in the same manner.

The initials S.P. and I.P. and S.R.P. and I.R.P. are used to signify that the lord is a Scotch or Irish peer, or a Scotch or Irish representative peer.

The abbreviations *n.*, *s.*, *bro.*, *un.*, *h.b.*, and *g.s.* will be readily understood to mean nephew, son, brother, uncle, half-brother, and grandson. P.C. is used where the peer is a Privy Councillor, and L.L. stands for Lord Lieutenant.

**Abercorn**, James, 2nd D. of (cr. 1868). Sits as M. of Abercorn (1790). Surname Hamilton. B. 1838, s. 1885. P.C.; K.G.; C.B.; L.L. Co. Donegal; M.P. Co. Devonshire, Spencer Compton, 8th D. of (cr. 1694). Surname Cavendish. B. 1833, s. 1891. P.C.; K.G. He is *e. s.* of the late Duke of Devonshire. E. at Trin. Coll., Camb., where he graduated M.A. '54. The Duke was long familiar to the world by the title of the

Marquis of Hartington, which he bore previous to his succession to the dukedom. He was returned for North Lancashire as a Liberal in '57, and in '59 moved the vote of want of confidence which resulted in the defeat of Lord Derby. In March '63 he was appointed a Lord of the Admiralty, and in April of the same year Under-Secretary of State for War in Lord Russell's administration. In Feb. '66 he obtained Cabinet rank as Secretary for War. At the general election of '68 he was defeated in North Lancashire, but was returned for the Radnor Boroughs. He was appointed Postmaster-General in Mr. Gladstone's first administration, and retained that office till '71, when he succeeded Mr. Chichester Fortescue as Chief Secretary for Ireland. On the retirement of Mr. Gladstone after his defeat in '74, Lord Hartington was unanimously chosen as leader of the Liberal party at a meeting held at the Reform Club under the presidency of Mr. John Bright. In '79 he was elected Lord Rector of the University of Edinburgh, which office he held till '91. At the general election of '80 he was elected M.P. for North-East Lancashire, and was sent for by the late Queen on the defeat and resignation of Lord Beaconsfield. He declined, however, to form an administration, being content to serve again under Mr. Gladstone. He became Secretary for India, but returned to the War Office in '82. At the general election in '85 he was returned by an enormous majority for the Rossendale Division of Lancashire. When Mr. Gladstone formulated his policy of Home Rule Lord Hartington disagreed with him, and became the recognised leader of the Liberal Unionist party. Recognising his commanding influence with the Unionists of both parties, Lord Salisbury first offered to serve under him if he would accept the premiership, and after the secession of Lord Randolph Churchill, again endeavoured to induce him to join his Cabinet. \*But, on the ground that he could best serve the Unionist cause without taking office, he declined both offers. Subsequent events only served to emphasise his antagonism to Mr. Gladstone's Home Rule policy. He was Chairman of the Royal Commission on Labour. The Duke, as he became at the end of '91, was "inaugurated" as Chancellor of Cambridge University in Jan. '92, and "installed" in June, in succession to his father. In August he was married at Christ Church, Mayfair, to Louise, Duchess of Manchester, a daughter of the late Count von Alton of Hanover, and widow of the 7th Duke of Manchester, who had died in '90. She was born in '32. During the same month his Grace was invested with the Order of the Garter. He was appointed Lord President of the Council in the Coalition Cabinet '95, and from 1900 to 1902 was also First President of the new Board of Education. Was President of the Cabinet Committee of National and Imperial Defence. On the retirement of Lord Salisbury, July 1902, he became Leader of the House of Peers, at the request of the new Prime Minister, Mr. Balfour, but resigned office in the Ministry in Oct. 1903, in consequence of the developments arising out of Mr. Chamberlain's Fiscal proposals and his devotion to the principles of Free Trade, (See FISCAL QUESTION p. 200). Lord-Lieut.

- of Derbyshire and Co. Waterford. Elected Mayor of Eastbourne '97. *Heir*, Victor Cavendish, M.P., n. 78, *Piccadilly, W.*

**James of Hereford**, Henry, 1st L. (cr. 1895). Surname James. B. Hereford 1828. E. Cheltenham Coll.; Lecturer's Prizeman at

the Inner Temple '50-51; called to Bar, Middle Temple, '52; nominated to the ancient office of "postman" of Court of Exchequer '67; appointed Q.C. '69; M.P. Taunton '69-85; Bury, Lanc., '85-95; was Solicitor-General '73, and Attorney-General '73-4 and '80-85. During the latter period he introduced and carried through Parliament the Corrupt Practices (Parliamentary Elections) Act. Sir Henry James, as he then was, refused to join Mr. Gladstone's '86 Administration, though offered the Lord Chancellorship, because of the views which he held upon the Home Rule question. Was subsequently one of the active leaders of the Liberal Unionist party. He was one of the counsel for the *Times* in the action of O'Donnell *v.* Walter, and as one of the leading counsel for that organ in the Parnell Commission delivered an able address, which formed quite a retrospect of the history of Ireland. He took a prominent part in the discussion of the Home Rule Bill during the '93 session, and succeeded in getting several of his amendments adopted. Was one of the Chairmen of Standing Committees. On the formation of Lord Salisbury's coalition Cabinet ('95) he was offered, and accepted, the office of Chancellor of the Duchy of Lancaster, with a peerage, holding the office until 1902, when the Ministry was reconstituted under Mr. Balfour; P.C., LL.D.; G.C.V.O.; appointed ('96) a member of the Judicial Committee of the P.C. Was Chairman of the Royal Commission on Accidents to Railway Servants and is Chairman of the Royal Commission on Alien Immigration. Opposed Mr. Chamberlain's Fiscal proposals. L.U. 41, *Cadogan Square, S.W. Brooks's.*

Villiers, s. C. *Middleton Park, Bicester; Osterley Park, Isleworth.*

**Kelvin**, William, 1st L. (cr. 1892). Surname Thomson. B. at Belfast 1824. E. at Glasgow Univ. and Cambridge, where he graduated ('45) as second wrangler, and 1st Smith's prizeman, and was elected to a fellowship. Prof. of Natural Philosophy in the Univ. of Glasgow '46-99. His jubilee as Professor was celebrated in '96, when he received the hon. degree of LL.D. He is also LL.D. of Dublin, Cambridge, Edinburgh, Montreal, Toronto, Princeton, Yale and Bologna Universities; D.C.L. Oxford; M.D. Heidelberg; Matt.D. Christiania; D.Sc. Victoria University, and of London University, University of Wales and University of Leeds, Chancellor of the University of Glasgow. Editor of the *Cambridge and Dublin Mathematical Journal* '46, in which he contributed valuable additions to the mathematical theory of electricity. It is, however, in connection with submarine telegraphy that Lord Kelvin's labours in electrical science are best known. His electrical measuring instruments are largely used in electrical engineering, and his compass and sounding machine have been found most useful by navigators. He has also made important additions to the sciences

of electricity and magnetism. His mathematical insight is seen to the greatest advantage in his investigation of the nature of heat. Pres. of the British Association '71. Knighted in '66. Created Grand Officer of the Légion d'Honneur in '89; is also a knight of the order "Pour le Mérite" of Germany, a commander of the order of Prince Leopold of Belgium, a foreign associate of the French Academy, and has the Order of the First Class of the Sacred Treasure of Japan. He is joint author with Professor Tait of the well-known treatise on "Natural Philosophy." Was President of the Royal Society '90-5; three times President of the Royal Society of Edinburgh; P.C.; O.M.; G.C.V.O.; F.R.S., P.R.S.E., D.L. of Glasgow; Hon. Col. of the Corps of Electrical Engineers; Hon. Member of the Inst. of Civil Engineers, and of the Inst. of Electrical Engineers. m. 1st, in '52, Margaret, d. of Walter Crum, Esq., who died in '70; 2nd, in '74, Frances A., d. of Charles R. Blandy, of Madeira. In June 1902 appointed a member of the new Order of Merit. *Netherhall, Largs, Ayrshire; 15, Eaton Place, S.W. Athenæum, Reform, Whitehall, R.Y. Squadron, Savile.*

**Kitchener** of Khartoum and of the Vaal, Horatio Herbert, 1st L. (cr. 1898); 1st Visct. (cr. 1902). Surname Kitchener. He is the eldest son of the late Lieut.-Col. H. H. Kitchener, and was b. in 1850. G.C.B.; G.C.M.G.; O.M. Educated at the Royal Military Academy, Woolwich, he joined the Royal Engineers, and was employed for some time in and after '74 on the Palestine and Cyprus Surveys. He served, having volunteered, as a major of cavalry in the Egyptian Army in '82, with the Nile Expedition in '84, and became Governor of Suakin '86. For his bravery in the action of Handub in '88, when he led the Egyptian troops against Osman Digna, he was made A.D.C. to the late Queen, and in the subsequent fighting he was mentioned in despatches and made a C.B. From '88 till '92 he held the rank of Adj.-Gen. in the Egyptian Army, and in the latter year was appointed Sirdar. After the taking of Dongola, in '96, he was made K.C.B., and subsequently organised the final irresistible advance against the Khalifa, which resulted in his utter defeat at Omdurman in Sept. '98. For this he was awarded a peerage, as Baron Kitchener of Khartoum and of Aspell, in the county of Suffolk. On his return to England he was

given an enthusiastic reception, and was presented with the freedom of the City of London and a sword of honour. Appointed Grand Master of English Freemasons in Egypt and the Soudan '99. D.C.L. Oxford '99. Received, June '99, the thanks of both Houses of Parliament and a grant of £30,000 as an acknowledgment of his eminent services in planning and conducting the campaign on the Nile in '96-8 which culminated in the battle of Omdurman, the capture of Khartoum, and the overthrow of the power of the Khalifa. Appointed Chief of the Staff in the South African campaign in Dec. '99, and went out at once with Lord Roberts, rendering invaluable aid during the progress of the war, especially in connection with the transport, and being appointed to the supreme command on the return of Lord Roberts in Jan. 1901. At the termination of the war was raised a step in the peerage, being created Visct. Kitchener of Khartoum and of the Vaal; received a grant of £50,000 in recognition of his great services during the campaign. His conduct of the negotiations with the Boer generals leading up to the peace settlement was widely extolled as statesmanlike and tactful. In June 1902 his lordship received the new Order of Merit, and after a visit to this country, in course of which he received through the Lord Mayor a sword of honour from the Corporation of Cape Town and an illuminated address and plate from the Corporation of London, he left England to assume the position of Com.-in-Chief of the Indian Army, and to be present at the Delhi Durbar 1903. *Heir-pres.*, Col. Henry E. C. Kitchener, *bro.* *United Service, Bachelors*'.

He took a 1st class in Classics, and is an Hon. Fellow of New Coll., Oxford. He was admitted to the Bar, Inner Temp., '81, and for some years was engaged in journalistic work, being for a time on the staff of the *Pall Mall Gazette*. In '85 he fought the Harrow D., and became private sec. to Mr. Goschen, then Chan. of the Exchequer, '87-9. He was Under-Sec. for Finance in Egypt '89-92, and the knowledge and experience thus gained enabled him to write "England in Egypt," the best book that has yet been published on the position of England in Egypt. In '92 he came back to England, having been appointed Chairman of the Board of Inland Revenue, and that post he filled till '97, when he was chosen by Mr. Chamberlain to succeed Lord Rosmead at the Cape. There a very difficult task confronted him, but he set himself to accomplish it by all the means in his power. He met Mr. Kruger in conference at Bloemfontein, in June '99, to try and arrive at a settlement of the Uitlanders' grievances and other difficulties between the Transvaal and British Government, but the conference failed, and war afterwards broke out. In 1901 he was, on visiting England, elevated to the peerage, and in further recognition of his public services in South Africa, especially in connection with the peace settlement with the Boer leaders, he was, in 1902, raised to the degree of a viscount. He has been High Commissioner for S. Africa since '97, and Governor of the Transvaal and Orange River Colonies since 1900. In 1903 he visited England and Europe on vacation, and in September received an invitation to join the Cabinet, but declined. *Government House, Parktown, Johannesburg; 47, Duke Street, St. James, S.W. Athenæum and United University.*

Athenæum.*

**Robertes** (see Clifden).

**Roberts of Kandahar and Pretoria, Frederick Sleigh, 1st E. (cr. 1901).** Surname Roberts. He is the son of Sir Abraham Roberts, G.C.B. B. 1832. E. at Eton and Addiscombe. Appointed Lieut. in the Bengal Artillery '51; Capt. and Brevet-Major '60; served with distinction in the Indian Mutiny, and received the Victoria Cross Took part in the Abyssinian war ('68) as Assistant Quartermaster-General, and obtained the brevet rank of Lieut.-Colonel. In '72 he was made C.B. for his services in the Looshai Expeditionary Force. He became Quartermaster-General in India in '75, with the local rank of Major-General; and in the Afghan war of '78 commanded the column sent to operate through the Kuram Valley, and, surmounting the difficulties of the Peiwar Pass, gained a brilliant victory at Charasiab and entered Cabul. On the investiture of Candahar by Ayoub Khan, after the disaster at Maiwand, he rapidly performed the march from Cabul to Candahar, one of the most brilliant military feats of modern times, which has earned him undying fame, and utterly defeated the Pretender. He was created a baronet in '81, and given the distinctions of G.C.B. and C.I.E. In '81 he was despatched to take command of the forces against the Boers in South Africa, but was recalled in consequence of peace being made. He succeeded Sir Donald Stewart in the command of the Indian Army '85, and was created a Peer in Jan. '92. In April '93 he left India for England, having resigned his command. He was given a brilliant farewell and an equally brilliant reception here. Hon. LL.D. Dublin '80; Hon. D.C.L. Oxon '81. Cambridge University made him an hon. LL.D. in June, and he was made a G.C.S.I. in May '93; D.L. Edin. '93; D. Lit. Dublin (hon.) 1901; LL.D. Durham 1902; app. Field-Marshal and Com.-in-Chief of Forces in Ireland in '95. P.C. '95; K.P. '97. At the end of '99 Lord Roberts left England to take command of the forces in the South African campaign, where he changed the aspect of affairs by a series of brilliant successes, amongst them being the relief of Kimberley, the capture of Cronje, and the annexation of the two Republics. Even before his return to England

he was amid general acclamation appointed to the supreme command of the British Army, being made Commr.-in-Chief in succession to Lord Wolseley. The campaign was saddened by the death of his only son, who won his V.C., and met his death at the battle of Colenso. In recognition of his services in South Africa his lordship was in 1901 created an Earl, and a grant of £100,000 was voted by Parliament; and in the same year he received that much coveted honour the Garter, and had conferred upon him the Order of the Black Eagle, the highest decoration in the German Army. Elected an hon. member of the Savage Club 1901. In 1902 Earl Roberts was appointed one of the members of the new Order of Merit. Retired from active service, and relinquished office of Commr.-in-Chief, which was abolished Feb. 1904. Visited S. Africa 1904. *Heiress-pres., Lady Aileen Mary, d. Athenæum, Marlborough, United Service.*

**Rosebery, Archibald Philip**, 5th E. of (cr. 1703). P.C., K.G., K.T. Sits as Ld. Rosebery (1828). Surname Primrose. B. 1847, s. 1868. E. at Eton and Christ Ch., Oxford; m. '78, Hannah, d. of the late Baron Mayer de Rothschild, M.P. She died in Nov. '90. Lord Rosebery succeeded his grandfather in '68; appointed a commissioner to inquire into endowments in Scotland '72; Under-Secretary of State, Home Office, '81-3; elected Rector of the University of Edinburgh '80; Lord Rector of Glasgow Univ. '99; was Lord Privy Seal, and First Commissioner of Works '85. On the accession to power of Mr. Gladstone in the beginning of '86, Lord Rosebery was appointed Secretary for Foreign Affairs and cast in his fortunes fully with Mr. Gladstone, entirely agreeing with his Home Rule policy. Elected for the City division to the London County Council Jan. 17th, '89, and on Feb. 12th appointed Chairman, but resigned in June '90. His monograph on William Pitt the Younger was issued in Nov. '91. In Jan. '92 he again became Chairman of the London County Council, and held the position for some months, till the approach of the general election compelled him to resign it. When Mr. Gladstone succeeded to power Lord Rosebery became Secretary for Foreign Affairs, and in October he was made a Knight of the Garter. On the resignation of Mr. Gladstone in March '94 the Queen offered the post of Prime Minister to Lord Rosebery, and he carried on the government with no little success till July '95. During '96 his attitude upon the Armenian Question differed from that of Mr. Gladstone, and finally he decided upon resigning the leadership of the party in order to leave himself an absolutely free hand upon this question. His view was that Great Britain should not be hurried into an intervention in the Armenian Question, which would lead to the risk of a European war. In '98 Lord Rosebery, from his place in the House of Peers, paid a noble and eloquent tribute to the life and public services of Mr. Gladstone, and later on spoke in the country in support of the attitude taken up by Lord Salisbury on the Fashoda situation. He urged the country to support the Government in its prosecution of the Transvaal war during '99, and made many notable speeches on public and political affairs during the year. Nevertheless, in a letter to Capt. Lambton, Liberal candidate for Newcastle, he in Sept. 1900 condemned the general conduct of affairs by the Govt., and in speeches in the House of Lords during the Session he urged the necessity of army reform. Lord Rosebery delivered a number of important speeches during 1901, not the least interesting of them being in connection with the unveiling of the colossal bronze statue erected at Winchester to commemorate the millenary of Alfred the

Great. In consenting to address a meeting of Derbyshire Liberals, Lord Rosebery, writing in November, 1901, remarked that he felt that, at a crisis in the fortunes of the country which he was persuaded was grave and daily increasing in gravity, he should put his views into the common stock. In the same month his lordship said he should like to see constituted for a year a Government composed entirely of business men. Lord Rosebery's return to public and political life may be said to date from this time. In December 1901 he delivered to a large assemblage of Liberals the historic Chesterfield speech, in which he declared that the Liberal party were free from the Irish alliance. In October 1902 his lordship unveiled a statue of Mr. Gladstone at Glasgow, and in 1903 and 1904 he was the most conspicuous opponent of Mr. Chamberlain's Fiscal proposals and of the Government, while he drew appreciably nearer the official Liberal party. Lord Rosebery is a Captain of the Royal Co. of Archers (the King's Bodyguard for Scotland. Pres. of the Throat Hospital, Golden Square. Lord Rosebery won the Derby both in '94 and '95. App. High Steward of Kingston-on-Thames 1901; and Chancellor of Lond. Univ. 1902. *Heir*, Lord Dalmeny, s.: came of age Jan. 1903. L. *Mentmore, Leighton Buzzard*; *Dalmeny Park, Edinburgh. Brooks's*.

- Salisbury**, John, 93rd Bp. of. (See founded 1042.) Surname Wordsworth. B. 1843. s. of the late Bishop of Lincoln, and *g.n.* of the poet Wordsworth. *E. at Ipswich, Winchester, and New Coll., Oxon, graduating in '65. Ordained deacon in '67 and priest in '69. His clerical life until he was ordained Bishop was passed in academical and cathedral appointments. He was Fellow and College Tutor of Brasenose, Proctor, Grinfield Lecturer, Select Preacher, Bampton Lecturer, Examiner for Classical Moderations and in the Theological Schools, and Examining Chaplain to his father. In '83 he was appointed Canon of Rochester and Oriel Professor of Interpretation of Scripture, and Bishop of Salisbury '85. Dr. Wordsworth is a moderate High Churchman, and has written several theological and classical works, the best known of which are "Fragments and Specimens of Early Latin," the Bampton Lectures for '81, "The One Religion," a comparison of Christianity with other religions as satisfying the desire of mankind for a revelation of truth, holiness, and peace; and his critical edition of the Vulgate New Testament (in partnership with the Rev. H. J. White), of which the first volume, containing the Gospels, was published in '98. His Visitation Addresses on the Holy Communion reached a second edition in '92. His "Considerations on Public Worship and on the Ministry of Penitence," addressed to the clergy, with a "Pastoral Letter to the Laity of the Diocese" ('98), and "Further Considerations on Public Worship" (1901), etc., have been much read and commented on. In '99 he published a "Memoir of the Episcopate of Charles Wordsworth, Bishop of St. Andrews 1853-1892," with particular reference to his share in the Eucharistic Controversy and the movement for Reunion with Presbyterians. His volume entitled "The Ministry of Grace" published in 1901 is now in a 2nd ed. In Jan. and Feb. '98 he executed a commission from Archbishop Temple to visit the Patriarchs and Chief Prelates of the East, at Alexandria, Nicosia (Cyprus), Damascus, Jerusalem, and Constantinople, and to present the resolutions of the Lambeth Conference of '97 on Union among Christians. He consecrated the Anglican Church of St. George at Jerusalem, Oct. 18th, '93. His "Teaching of the Church of England on some points of Religion" (S.P.C.K. 1900-1901), has been widely*
- circulated in Greece and the Levant in a Greek translation made by Dr. John Genadius. It has also been translated into Russian and Arabic. The Bishop was chairman of a joint committee of the two Convocations which published an important report (April 1902) on "The Position of the Laity" (Nat. Soc. and S.P.C.K.), which has been much discussed. The Bishop is President of the Anglican and Foreign Church Society, of the Church Historical Society, and of the Central Society for Sacred Study, and Chairman of the Jerusalem and the East Mission Fund, and a Chaplain of the Order of St. John of Jerusalem. Palace, Salisbury; West Lutworth, Wareham; Lollards' Tower, S.E. Salisbury, James E. H., P.C., C.B., 4th M. of (cr. 1879). Surname Gascoyne-Cecil. B. 1861, s. 1903. *E. Eton and Univ. As lieutenant-col. he served in the China war of '60; and as colonel in Canada from '62-70, in which last year he commanded the Red River Expedition. As major-general he commanded the troops in the Ashantee War in '73-4; and as lieutenant-general he held the command of the troops in the South African War in '79. Commanded the army in the Egyptian War of '82, and was raised to the peerage after the victory of Tel-el-Kebir. He also commanded in the Soudan campaigns of '84-5, and was made a Viscount and K.P. Lord Wolseley received £25,000 for his services in Ashantee, and £20,000 for his Egyptian campaign. He has held many staff appointments, and has been High Commissioner to Natal and to Cyprus. Appointed Adjutant-General '82. Published his "Story of a Soldier's Life," 1903; of his "Soldier's Pocket-book" several editions have appeared. Appointed ('88) Ranger of Greenwich Park. In Oct. '90 he took up new duties as Commander-in-Chief of the army in Ireland, and in Nov. '95 was made Commander-in-Chief in place of the Duke of Cambridge, which position he resigned in Nov. 1900 in favour of Lord Roberts. App. Field Marshal '94, in which year he also published a fine biography of the Duke of Marlborough. Was one of the Ambassadors appointed to announce the death of her late Majesty and King Edward's accession to the throne. In June 1902 was appointed one of the members of the new Order of Merit. *Heiress* (to the Viscounty by special remainder), Hon. Frances G. Wolseley, d. *Farm House, Glynde, Sussex. United Service, Athenæum*.
- Wolverton**, Frederic, 4th L. (cr. 1869). Surname Glyn. B. 1864, s. 1888. Partner in banking house of Glyn, Mills, Currie & Co.; J.P. Dorset; app. a Lord-in-Waiting '92, resigned '93; Memb. L.C.C. since '93; Hon. Sec. of the League of Mercy. Acted as Press Censor in the S. African campaign; app. Vice-Chamberlain of the Household 1902, and represents the Board of Trade in the House of Peers. *Heir*, Hon. George E. D. Carr-Glyn, s. *Brooks's*.
- Worcester**, Huyshe Wolcott, 105th Bp. of. (See founded 679). Surname Yeatman-Biggs. Appointed 1904. B. 1845, s. of Mr. H. F. Yeatman, J.P., of Stockton House, Wilts. E. at Winchester, and Emmanuel Coll., Camb.; Curate of St. Edmund's, Salisbury; Vicar of Netherbury, Wilts, '77; and of St. Bartholomew's, Sydenham, '79; Suffragan Bishop of Southwark '91; appointed to the see

of Worcester 1904. *m.* Lady Barbara, *d.* 4th E. of Dartmouth.

Worlingham (see Gosford).

**Wrottesley**, Arthur, 3rd L. (cr. 1838). Surname Wrottesley. B. 1824, s. 1867. B.A. Oxford, 1846. A Lord-in-Waiting '69-74, '80-85; L.L. Staffordshire, resigned '87. *Heir*, Hon. Victor Alexander Wrottesley, s. L. 8, *Herbert Crescent, Sloane Square, Brooks's, Travellers'*.

**Wynford**, Philip George, 6th L. (cr. 1829). Surname Best. B. 1871, s. 1904. Capt. R.H.A. C. *Heir*, Hon. Samuel J. Best, *bro.* Charlton House, Ludwell, Salisbury.

**Yarborough**, Charles Alfred Worsley, 4th E. of (cr. 1837). Surname Anderson-Pelham. B. 1859, s. 1875. *m.* '86, Hon. Marcia Amelia Mary Lane-Fox (Baroness Fauconberg and Conyers in her own right—see Conyers and Fauconberg). P.C.; Vice-Adm. Co. Lincoln; Capt. Corps of Gent.-at-Arms '90-92. *Heir*, Lord Worsley, s. C. Carlton, Brocklesby Park Lines.

**York, Duke of.** See WALES.

**York, William Dalrymple**, 88th Archbp. of. Surname MacLagan. B. 1826. Primate of England, and Metropolitan, and member of the Privy Council. Prelate of the Order of St. John of Jerusalem. (The see dates from 625, and has an income of £10,000.) His Grace is the s. of Dr. David MacLagan, who served with distinction in the Peninsular War. *E.* Peterhouse, Camb.; graduated B.A., Junior Opt. '56; M.A. '60; D.D., *jure dig.*, '78; Hon. Fellow of Peterhouse '89. Ordained deacon '56, and priest '57. Consecrated Lord Bishop of Lichfield '78. Held curacies at St. Saviour, Paddington, '56-8, and St. Stephen, Marylebone, '58-60; curate in charge of Enfield '65-9; rector of Newington '69-75; vicar of Kensington '75-8; Prebendary of St. Paul's Cathedral '78; Chaplain-in-Ordinary to the Queen. In '70 his lordship edited "The Church and the Age," and is the author of "Pastoral Letters and Synodal Charges"; "Parochial Papers"; "The Church and the People; an Inquiry into the Neglect of Public Worship" ('82), etc. He was appointed to succeed the late Dr. Magee as Archbishop of York in May, and was enthroned on Sept. 15th, '91. He gave up £500 of his endowments for six years (March '93) to assist the poorer clergy in his diocese. His lordship's hospitable invitation to 150 Nonconformist ministers to visit him at Lichfield Palace on Michaelmas Day '90 occasioned much interest. In Aug. '95 similar hospitality was shown by the Archbishop to the Nonconformist ministers resident in the diocese of York. Visited Russia in '97. *Bishopthorpe, York. Athenæum.*

**Zetland**, Lawrence, 1st M. of (cr. 1892). Surname Dundas. B. 1844, s. as E. 1873. K.T.; P.C.; M.P. Richmond '72-3; a Lord-in-Waiting '80; formerly in Royal Horse Guards; Viceroy of Ireland Aug. '89 to Aug. '92; Mayor of Richmond (Yorks) '95-6. *Heir*, E. of Ronaldshay, s. C. Turf.

**Zouche of Haryngworth**, Robert Nathaniel Cecil George, 15th L. (cr. 1308). Surname Curzon. B. 1851, s. 1873. Capt. 2nd Vol. Batt. Roy. Sussex Regt. A lieutenant in Imp. Yeo. during the campaign in S. Africa 1900-1. This barony was for many years in abeyance prior to 1829. *Heiress-presumptive*, Hon. Darea Curzon, sis. C. Parham, Pulborough, Sussex. Carlton.

### III. HOUSE OF COMMONS.

I. ALPHABETICAL AND BIOGRAPHICAL LIST OF MEMBERS.

II. ALPHABETICAL LIST OF CONSTITUENCIES, with Registered Electors and Pollings, 1900-1904.

III. POLITICAL PARTIES 1868 TO 1904.

With certain exceptions any male of full age may be elected to represent a constituency in the House of Commons. English and Scotch peers are entirely disqualified, but Irish peers (with the exception of the 23 Representative Peers) may be returned for any constituency in Great Britain. All English, Scotch, and Irish judges; clergymen of the Established Church of either of the two kingdoms; Roman Catholic priests; the holders of various offices specially excluded by statute (including revenue officers); persons who have been convicted of certain offences; aliens (unless a certificate of naturalisation has been granted to them by the Secretary of State, and they have taken the oath of allegiance); imbeciles; Government contractors (except contractors for Government loans); and sheriffs and returning officers within the constituencies for which they act,—all these are disqualified. No candidate requires any property qualification, and no member receives any payment or allowance whatsoever from the country for his service in the House or on any committee thereof.

The Speaker is the first to take the oath and subscribe the roll in a new House of Commons, and is followed by the other members, who come to the table without any ceremony, and are presented to him by the clerk. Members returned after a general election are introduced by two other members. The form of oath taken is as follows: "I, ———, do swear that I will be faithful and bear true allegiance to His Majesty King Edward, his heirs and successors, according to law. So help me God." Quakers, Moravians, Separatists, and others are permitted to make an affirmation to the same effect as the oath; and by 51 & 52 Vict., ch. 46, every person upon objecting to being sworn, and stating, as the ground of such objection, either that he has no religious belief, or that the taking of an oath is contrary to his religious belief, shall be permitted to make an affirmation instead of taking an oath in all places and for all purposes where an oath is and shall be required by law.

Succession to a peerage of England, or of Great Britain, or of the United Kingdom, disables the person so succeeding from being elected to, or from sitting or voting in, the Commons. A seat in the House is vacated by death, or on acceptance of any office of profit under the Crown; and there are also certain disabilities attached to bankruptcy. All the principal members of the Government, on accepting office, vacate their seats, and are eligible for re-election; but the vacating rule does not apply to such officers as Secretary to the Treasury or other similar appointments which are not held direct from the Crown. A change from one office held direct from the Crown to another does not involve going again to the constituency.

No member of the House of Commons can, as a matter of fact, resign his seat, but this end is attained by his acceptance of the "Childern Hundreds." No office having emolument

attached can be conferred on a member of the House of Commons without his vacating his seat; and therefore by obtaining "the stewardship of His Majesty's Chiltern Hundreds, the stewardship of the Manor of Poynings, of East Hendred and Northstead, or the Escheatorship of Munster," a member may rid himself of his duties.

When a seat becomes vacant during a session, a new writ is moved for at the commencement of an ordinary sitting, generally by one of the whips of the party to which the late member belonged. Provision is also made for the issue of writs during the recess without the intervention of the House, it being enacted that the Speaker may, on the production of a certificate signed by two members that a member has died, or accepted an office held direct from the Crown, or has been called to the House of Lords, or that the seat has become vacant by the bankruptcy of a member, order a writ to be issued for a fresh election to fill the vacancy thus caused. But a writ may not be issued during the recess on the acceptance of the Chiltern Hundreds or of the like offices. The Lunacy (Vacating of Seats) Act, 1886, provides a procedure by which the seat of any member who may have been received into a lunatic asylum shall be declared vacant.

The Act of Union with Ireland increased the number of members of the House of Commons to 658, and though it stood nominally at this figure until the end of the Parliament of '80-85, the disfranchisement of 4 constituencies returning 6 members, and the suspension of 12 writs in 7 cities and boroughs, had reduced the total of members to 640. The **Redistribution Act** did not alter the apportionment of members to Ireland or Wales, but increased the number returnable by Scotland from 60 to 72, and these 12 new seats being added to the nominal number of the House brought it up to 670.

### **Parliamentary Registration.**

The right to vote in the election of a member of Parliament is confined to those adult males whose names appear on the register of voters in force for some county or borough. No man can be registered who has within the twelve months preceding July 15th received parochial assistance other than medical relief, or who is an alien, unless naturalised.

In counties the qualifications are as follow: Freehold of inheritance or by purchase of the clear annual value of 40s. and upwards. Freehold for life must be of the clear annual value of £5, unless the same comes by descent, marriage, devise, or promotion to any benefits or office, in all which cases 40s. clear annual value is sufficient. **Freeholders** by purchase are required to be six months in possession previous to July 15th; by descent, etc., no length of possession is necessary. **Copyhold** of the clear annual value of £5 or upwards. **Copyholders** are subject to the same terms of possession as freeholders. **Leasehold**, if created originally for a term of not less than sixty years, of the clear annual value of £5 or upwards; if for a term of more than twenty, but less than sixty years, the clear annual value must be £30. **Leaseholders** by purchase are required to be twelve months in possession previous to July 15th; by descent, etc., no length of possession is necessary. Persons qualified in respect of any of the foregoing

qualifications must send in their claims to the overseers on or before the 20th of July.

**Counties and Boroughs:** **Occupation** as owner or tenant of any land or tenement of a clear yearly value of not less than £10. **Occupation as owner or tenant** of any dwelling-house. The term "dwelling-house" includes part of a house in which the landlord or superior tenant does not reside. When he does reside, his under-tenants are held to be lodgers. **Occupation** by virtue of any office, service or employment, of any dwelling-house which is not inhabited by a person under whom such office, service or employment is held. In the above three classes of occupiers the occupation need not be of the same premises, but may be of different premises, occupied in immediate and unbroken succession in the same constituency. **Occupation as lodger** of any lodgings of a clear yearly value, if let unfurnished, of £10. Successive occupation is also allowed in the case of lodgings, but it must be from one part to another part of the same house. In all cases of occupation, whether as owner or tenant, servant or lodger, twelve months' occupation is required up to the 15th day of July in any year. Occupiers need not send in claims unless they find that their names are omitted from the list published by the overseers on the 1st of August, or that in the entry on such list there be a misdescription of some essential particular or particulars, and in case of such omission or misdescription they must send in their names to the overseers on or before the 20th of August. **Lodgers** must claim every year, and when claiming for the first time must send in their claims to the overseers on or before the 20th of August. The revised register comes into operation on the 1st of January in each year.

Any person whose name appears on a list of electors may object to the name of any other person appearing therein. Written notice of such objection must be given both to the overseers and to the person objected to. On a given date the overseers publish a list of the names of all persons who have sent in claims or have been objected to. Copies of all the lists that have been published are then forwarded by the overseers to the clerk of the peace of the county, or (in the case of municipal boroughs) to the town clerk. He prepares an abstract of such lists of claims and objections, and transmits it to the revising barrister for his district. **Revising barristers** are appointed every year, for London and Middlesex by the Lord Chief Justice, and for other places by the senior judge of assize. The barrister so appointed makes a circuit and holds open court for the revision of the list in each borough and at or near every polling place in the county. The clerk of the peace, or town clerk, and the overseers, must attend. The revising barrister has power to examine witnesses on oath, to hear claims and objections, and to insert or omit names as he finds just. An appeal lies from his decision to the Queen's Bench Division of the High Court, but no further appeal is possible without its express sanction. The list of voters as settled and signed by the revising barrister is sent, in the case of a county to the clerk of the peace, who must have it printed in a book and delivered to the sheriff; in the case of a borough to the town clerk, who must have it printed in a book and delivered to the returning officer.

The clerk of the peace or town clerk must keep printed copies of the register for sale at a fixed price. The register is conclusive evidence that the persons therein named have the qualifications annexed to their respective names. (For further information on the subject see "Rogers on Registration.") In the case of any person not having his name on any list of voters, or in case of his receiving a notice of objection, he should apply to the **registration agent** for his district of the political party to which he belongs. Such agents are appointed and paid by the various party organisations in most constituencies, and make it their business to know the intricacies of the law on the subject.

### ***Election of a Member of Parliament.***

Under the provisions of the Ballot Act, the returning officer is required, in the case of a county election within two days after the day on which he receives the writ, and in the case of a borough election on the day on which he receives the writ or the following day, to give notice of election. The day of nomination is to be fixed as follows: in the case of an election for a county or district borough, not later than the ninth day after the day on which he receives the writ, with an interval of not less than three clear days between the day on which he gives the notice and the day of nomination; and in the case of an election for any borough other than a district borough, not later than the fourth day after the day on which he receives the writ, with an interval of not less than two clear days between the day on which he gives the notice and the day of nomination.

The candidate is nominated in writing, subscribed by two registered electors as proposer and seconder, and by eight other electors, who must also be registered in the same constituency. If at the expiration of one hour after the time appointed for the election not more candidates stand nominated than there are vacancies to be filled up, the returning officer is to forthwith declare the candidate nominated to be elected; but if at the end of one hour more candidates stand nominated than there are seats to be filled up, the returning officer is to adjourn the election and take a poll.

The poll is to take place on such day as the returning officer may appoint, not being, in the case of an election for a county or district borough, less than two or more than six clear days, and not being, in the case of an election for a borough other than a district borough, more than three clear days after the day fixed for the nomination. Sundays, Christmas Day, Good Friday, and any day set apart for a public fast or thanksgiving, are not counted. There is a special allowance of time in the case of the constituency of Orkney and Shetland.

Where an equality of votes is found to exist between any candidates at an election for a county or borough, and the addition of a vote would entitle any of such candidates to be declared elected, the returning officer, if a registered elector of such county or borough, may give such additional vote, but shall not in any other case be entitled to vote at an election for which he is returning officer. But the returning officer may, if qualified, decline to give the casting vote; and if he be not qualified, or if he decline to act, the names of the two candidates are

endorsed on the writ and a double return made. Neither candidate returned may vote until the right to the seat has been determined.

A petition may be presented by a person qualified to vote, a person claiming to have the right to be returned, and by a person alleging himself to have been the candidate; the petition may be presented on various grounds, and it may allege bribery and corruption. Thus, where there has been an equality of votes, and the casting vote has been given by the returning officer, or where a double return has been made, the seat may be claimed on petition. The voting papers would then be scrutinised by the Court, and some deductions would probably be made on the ground of spoiled papers, disqualification of the voter, etc., which would reduce one party's number more than it would the figure of the other. All election petitions are tried by two judges, who determine and report to the Speaker whether the member petitioned against, or what other person, if any, was duly elected, or whether the election was void; and when corrupt practices have been alleged, the judges report also whether any such practices have been committed, and, if so, whether it was with the knowledge or consent of any candidate, and the nature thereof; the names of the persons proved to have been guilty of such corrupt practices; and whether during the election there was an extensive prevalence of corrupt practices. When such a report as the latter is made to the House, it is usual to appoint a **Royal Commission**, on whose report, if it disclose a serious state of things, the writs for a fresh election may be suspended, so that the constituency remains temporarily unrepresented.

Any member returned for two or more places in any part of the United Kingdom is to make his selection for which of the places he will serve within one week after it shall appear that there is no question upon the return for that place.

### ***Parliamentary Procedure.***

The most striking feature in the procedure of the **House of Commons** is the great power vested in the **Speaker**. The Speaker must abstain from debating, unless in committee of the whole House; and even there he rarely takes advantage of his right. The member of the House who is elected to the office of Speaker usually acts quite independently of party considerations. He never votes, save when the numbers happen to be equal, in which case he gives the casting vote. The chief duty of the Speaker undoubtedly is the preservation of order, with respect to which the rules of the House of Commons are very stringent. The Speaker may hold office until a dissolution. Should the office become vacant during a session, the new Speaker then elected is presented for the royal approbation, but does not claim the privileges of the House. He has a residence in the Palace of Westminster, and receives a salary of £5,000 per annum; he ranks as first Commoner, and is usually awarded upon retirement a pension of £4,000 and a peerage. There was no contested election for Speaker from 1839 to '95. The following have been Speakers since the meeting of the first reformed Parliament: Sir C. Manners-Sutton (first elected '17), '33-5; Mr. J. Abercromby, '35-9; Mr. C. Shaw-Lefevre

(the late Viscount Eversley), '39-57; Mr. J. E. Denison (afterwards Viscount Ossington, and since deceased), '57-72; Sir H. Brand (the late Viscount Hampden), '72-84; Mr. A. W. Peel, now Viscount Peel, '84-95; Mr. W. C. Gully since April '95.

#### Chairman of Committee.

The **Chairman of Committee of Ways and Means** is a member of the House of Commons who is elected when the House goes into Committee of Ways and Means, or Supply, for the first time in a new parliament, and holds office until the dissolution of that parliament. He is nominated by the Government, but is regarded as an officer of the House. The salary of the office is £2500 a year. The Chairman of Ways and Means usually presides when the House is in committee, whether on financial business or on a bill, but he may request one of several temporary or deputy chairmen nominated by the Speaker at the commencement of each session to act for him. His place is not in the chair of the Speaker, but at the table where the Clerk, who retires with the Speaker, has sat. When the House is informed of the unavoidable absence of the Speaker, the Chairman of Ways and Means performs his duties, and exercises his authority in relation to all proceedings of the House as Deputy Speaker until the next meeting of the House, and so on from day to day on the like information being given to the House. He may also take the chair as **Deputy Speaker**, when requested to do so by the Speaker, without any formal communication to the House. The recent holders of the office include the late Mr. Raikes, '74-80; Sir Lyon (afterwards Lord) Playfair, '80-83; Sir A. Otway, '83-5; Mr. Leonard Courtney, '85-92; Mr. Mellor, '93-5; and Mr. James William Lowther, the present chairman, who was elected in '95.

#### The Serjeant-at-Arms.

The **Serjeant-at-Arms of the House of Commons** carries the mace when the Speaker enters and leaves the House, places it on the table when the Speaker takes the chair, and under the table when the House goes into committee. He, by the messengers, notifies committees when the House is going to prayers. He or his deputy sits within the House, near to the door, and executes any directions of the Speaker for the maintenance of order, even should they extend to the removal of a member who has been ordered to withdraw and has refused to obey the ruling of the chair. Certain of the galleries, corridors, etc., are under his charge. Mr. H. D. Erskine, C.V.O., is the present Serjeant-at-Arms.

#### The House in Committee.

The business of both Houses of Parliament, but more especially of the House of Commons, is transacted very largely "in committee." When the whole House is in committee the Speaker vacates the chair, the Mace is placed under the table, and the Chairman of Ways and Means or another member of the House presides. Proceedings relating to the expenditure of public money take place in Committee of Supply, while in Committee of Ways and Means resolutions having reference to the funds by which such expenditure is to be sustained, are passed. There are also grand

committees, **Select Committees** chosen for specific purposes, and committees for the consideration of private bills.

#### Committee of Supply.

The sums necessary to defray the charge for the Army, Navy, Civil Services, Customs, Post Office, etc., are voted annually by the House of Commons in Committee of Supply. The sums required are granted for the financial year ending on March 31st; and although a vote or votes on account are sometimes granted during the session for a part of the year, the whole sum voted during the session or in a case like that of '95 in the two consecutive sessions, for any service is for the full period of twelve months. The Estimates, framed by the respective departments and approved by the Treasury, are laid upon the table soon after the commencement of each session, and any items which may be subsequently found insufficient, or any unforeseen charges, are provided by the **Supplementary Estimates**. Votes of credit for military and naval expenditure of an urgent character are also voted in Committee of Supply. On the resolution embodying the vote for the number of men for the army is founded the **Army (Annual) Bill**, which provides, during twelve months and no more, for the discipline and regulation of that force. The system of granting supplies for only twelve months involves a meeting of Parliament every year, and provides at once a safeguard against the permanence of the military establishment and a means of continuing it periodically in such strength as the House itself may deem to be necessary. A new rule for discussions in Committee of Supply was adopted in the Session of '96, and was again adopted in '97 and '98. Supply is made the first order of the day on Friday, unless the House order otherwise, directly the Committee of Supply is appointed. Twenty-three days are allotted for the business of Supply, and if these have all been given and occupied by Aug. 5th, all outstanding Votes are put forthwith by the Chairman on the morning of the twenty-second day, and on the twenty-third day the Speaker puts all the outstanding reports of Supply. The great merit of the scheme is that it gives private members an opportunity during the effective parliamentary months of bringing important questions forward and having them discussed. See FINANCE OF THE UNITED KINGDOM.

#### Committee of Ways and Means.

The Committee of Ways and Means (1) considers any proposals relative to old or new taxes and duties submitted to it by the Chancellor of the Exchequer, and (2) votes sums of money from the Consolidated Fund sufficient in amount to make good the supplies granted for the maintenance of the services of the year. Resolutions relative to taxation may be acted upon by the proper officers as soon as passed. At the end of the session a measure which on the one hand applies out of the Consolidated Fund the whole sum granted to His Majesty for the service of the financial year, and on the other hand appropriates the supplies in accordance with the votes already passed in Committee of Supply, is passed, and is known as the **Appropriation Bill**.

**New Procedure Rules.**

New Procedure Rules were proposed, and to some extent adopted, in the 1902 Session. The subjoined paragraphs show the principal changes made.

**Sittings of the House.**

Under the then existing practice the House met on Mondays, Tuesdays, Thursdays, and Fridays at 3, and on Wednesdays at 12. When the House met at 3 it sat, subject to an undefined interval during which the Speaker took refreshment, until midnight, though subject to certain exceptions, or to the suspension of the rule, opposed business could be taken after that hour. On Wednesdays opposed business was suspended at 5.30. Mr. Balfour proposed that the House should sit on Mondays, Tuesdays, Wednesdays, and Thursdays from 2 until 8, and from 9 until midnight; and on Fridays as on Wednesdays, thus making Fridays instead of Wednesdays the day for the consideration of bills submitted by unofficial members, and giving a "week-end" of from 5.30 or 6 on Friday until 2 o'clock on Monday. The proposed transference of Wednesday's business until Friday was opposed from both sides, though it was eventually carried, and the dinner interval on the first four days was finally fixed at from 7.30 until 9. This amended standing order with other changes was brought into operation on May 2nd, 1902.

The course of business is now pretty much as follows:—On Mondays, Tuesdays, Wednesdays, and Thursdays the House meets at 2 o'clock for an afternoon sitting, and, after prayers, first proceeds with petitions, motions for unopposed returns, and leave of absence to members, giving notice of motions, and unopposed private business. All opposed private bills (measures relating to the construction of railways, town improvements, etc., etc.) are, and all other private business not disposed of at 2.15 is, taken at an evening sitting. Questions are commenced at 2.15, and no question is to be taken after 2.55, except questions which have not been answered in consequence of the absence of the minister to whom they are addressed; and questions which have not appeared on the paper, but which are of an urgent character, and relate either to matters of public importance or to the arrangement of business. Any member desiring an oral answer to his question may distinguish it by an asterisk, and if he do not so distinguish it the answer is printed and circulated with the votes. This arrangement as to questions generally worked, upon the whole, excellently well. No motion for the adjournment of the House may be made until all the questions asked at the commencement of business at the afternoon sitting (and questions may not be asked at any other time) have been disposed of, and if leave to make such motion be given, or forty members rise in their places to support it, the debate upon it stands over until the evening sitting. After questions bills may be brought in and committees nominated, and a member may now, after notice, present a bill without an order for its introduction, and when a bill is so presented its title is read by the Clerk, and the bill is then deemed to have been read a first time and is sent to be printed. Government business has precedence at every sitting except the evening sittings on Tuesday and Wednesday,

and the sitting on Friday; but after Easter Government business instead of that of unofficial members has precedence also at the evening sittings of Tuesday, and after Whitsuntide until Michaelmas Government business has precedence at all evening sittings, and at all Friday sittings, except the sittings on the third and fourth Fridays after Whit Sunday. The other Fridays are reserved to the consideration of bills in charge of unofficial members, and on that day of the week the House meets at noon as it formerly did on Wednesdays. The afternoon or 2 o'clock sittings end at 7.30, or as soon thereafter as any division then in progress may be concluded, and the House resumes for an evening sitting at 9, but the House is not to be counted until 10 o'clock, though if on a division taken on any business after 9 and before that hour, it appears that forty members are not present, the business stands over until the next sitting, and the next business is to be taken.

**Supply.**

Thursday instead of Friday is now the weekly Supply day. As before twenty days are allotted for the actual consideration of the votes, with a power of adding three more, apart from estimates supplementary to those of a previous session, or any vote of credit or supplementary or additional votes for war expenditure. Of the days so allotted not more than one shall be allotted to any vote on account, and not more than one sitting to the report of that vote. At 10 o'clock on the last day but one of the allotted days the outstanding votes are to be put in classes of the Civil Service Estimates, and in totals so far as the Estimates for the Navy, Army, and the Revenue Departments are concerned, and a similar procedure is to be observed on the last allotted day in regard to the reports of the outstanding votes. This plan follows that first adopted in '91.

**Deputy Chairman.**

The House made provision in 1902 for the appointment of a deputy chairman, who, in the unavoidable absence of the Chairman of Ways and Means, is entitled to exercise all the powers vested in the Chairman of Ways and Means, including his powers as Deputy Speaker; Mr. Jeffreys, M.P. for North Hants, being (Feb. 14th, 1902) appointed to the position on the motion of Mr. Balfour, and fulfilling its duties for some time during the absence through indisposition of Mr. J. W. Lowther. A rule was also made under which, in the case of grave disorder arising in the House, the Speaker may, if he think it necessary to do so, adjourn the House without question put, or suspend any sitting for a time to be named by him.

**Principal Officers of House of Commons.**

*Clerk of the House*, Sir Courtenay Peregrine Ilbert, K.C.S.I., C.I.E.

*Clerk Assistant*, Arthur W. Nicholson, Esq.

undertakings; J.P., Alderman C.C., Gloucestershire, and Lord of the Manor of Cheltenham. Mr. Agg-Gardner sat for this constit. '74-80, and again '85-95, when he retired; he also unsuccessfully contested it in '68 and '80. Evesham House, Cheltenham. *Carlton.*

**Agnew, Sir Andrew Noel, 9th Bart. (L.U.)**, elected for Edinburgh, South D., 1900; unsuccessfully contested Dumfries Burghs '92; *b.* '50; *E.* Harrow and Trin. Coll., Camb. (LL.B.); *g. s.* of the 1st E. of Gainsborough; called to the Bar, Inner Temple '74; Capt. 1st Ayrshire and Galloway Vol. Artillery; J.P., D.L. and Vice-Lieut. Wigtownshire; seconded Address 1901. Lochnaw Castle, Stranraer, Wigtownshire, and 21, Abingdon Street, London, S.W.

**Ainsworth, John Stirling (L.)**, elected for Argyllshire, Aug. 28th, 1903; *b.* '44; *s.* of the late Mr. Thos. Ainsworth, of "The Floss," Cleator, Cumberland; *m.* '79, a *d.* of Mr. Robert Reid Macredie; is a magistrate for Argyllshire and Cumberland, and was Sheriff in '91; commanded the 3rd Vol. Battn. Border Regt. '98-1902. His return gained a seat for the Liberals.

\***Aird, Sir John, Bart. (C.)**, has sat for Paddington, North, since '87; is the *s.* of Mr. J. Aird, contractor, and member of the firms of John Aird & Co. and John Aird & Sons; *b.* '33; H.M. Lieutenant for City of London; Lieutenant-Colonel Engineers and Railway Volunteer Staff Corps. Sir John is now carrying out a large and important scheme on the Nile in connection with irrigation works in Egypt. Appointed first Mayor of the new borough of Paddington, 1900; created a baronet 1901. 14, Hyde Park Terrace, W.

\***Akers-Douglas, Right Hon. A. (C.)**, has sat for Kent, St. Augustine's D., since '85; and had previously sat for Kent, East, '80-85; *s.* of the late Rev. A. Akers, of Malling Abbey, Kent; *b.* '51; *E.* Eton and University College, Oxford; Inner Temple '75; assumed name of Douglas '75; Patronage Secretary of Treasury '85, '86-92; First Commissioner of Works '95-1902, when he was appointed Home Secretary; P.C. '91; Ecclesiastical Commissioner for England; J.P. and D.L. for Kent and Dumfries, and J.P. for Edinburgh. Chilton Park, Maidstone, and 113, Mount Street, W. *Carlton and Junior Carlton.*

**Allen, Charles Peter (L.)**, elected for Gloucestershire, Stroud D., 1900, which division he unsuccessfully contested at the '95 General Election; *s.* of Mr. Peter Allen, one of the proprietors of the *Manchester Guardian*; *b.* '61; *E.* Rugby and Oxford; is a newspaper proprietor; was called to the Bar, Inner Temple, '88; and is a well-known football player who played in the Oxford University team against Cambridge for three years, and for Wales against England in '85.

\***Allhusen, A. Henry Eden (C.)**, who was returned for Central Hackney in 1900, had previously sat for Salisbury from Jan. '97; *b.* '67; is *s.* of the late H. C. Allhusen and *g. s.* of the late C. Allhusen, J.P., D.L., of Stoke Court, Bucks (formerly owner of Newcastle Chemical Works); J.P., D.L. for Bucks; *m.* '96 Dorothy Stanley, *d.* of Lady Jeune and her first husband, the Hon. J. C. Stanley. Stoke Court, Stoke Poges, Bucks.

\***Allsopp, Hon. Geo. H. (C.)**, has sat for Worcester since '85; 3rd *s.* of the first Lord Hindlip; *b.* '46; *E.* Eton and Trinity College,

Camb. (M.A. '71); J.P. and D.L. for Derbyshire and Staffordshire; twice Mayor of Burton and once Chairman of the Burton School Board; *m.* '95 the Lady Mildred, *d.* of the 3rd E. of Shaftesbury, and has a daughter, Winifred Violet, *b.* May 6th, '96, also a son, Anthony Victor George, *b.* '99. 8, Hereford Gardens, Park Lane, W. *Carlton and Junior Carlton.*

\***Ambrose**, Dr. Robert (N.), has sat for Mayo West since '93; *b.* '56; *E.* Queen's College, Cork, and Edinburgh University (L.R.C.P. and L.R.C.S.); B.A. Queen's University, Ireland; for past ten years has been practising in London; cousin of Dr. D. Ambrose, formerly M.P. for South Louth. 1, Mount Place, E.

\***Anson**, Sir William R., Bart. (L. U.), was first returned for Oxford University '99; unsuccessfully contested West Staffordshire '80; *s.* of the late Sir John W. H. Anson, who was killed by a railway accident in '73; *b.* '43; *E.* Eton and Balliol College, Oxford; author of several books on Law; J.P. for Oxfordshire, and has been Chairman of Quarter Sessions since '94; Warden of All Souls' College since '81, and appointed '99 Chancellor of the Diocese of Oxford. In 1902, on the reorganisation of the Ministry under Mr. Balfour, Sir William was appointed Parliamentary Secretary to the Board of Education. Appointed, 1902, one of the First Fellows of the Council of the British Academy. All Souls' College, Oxford, and Pusey House, Faringdon. *Athenæum, Brooks's, Travellers', and St. James's.*

**Arkwright**, John Stanhope (C.), elected for Hereford 1900; *b.* '72; *E.* Eton and Christ Church, Oxford (Newdigate Prizeman '95); D.L., J.P., Herefordshire, barrister, and assistant private secretary to Right Hon. Gerald Balfour. Hampton Court, Leominster, and 7, King's Bench Walk, Temple, E.C.

\***Arnold-Forster**, Right Hon. H. O. (L. U.), has sat for Belfast, West, since '92; 2nd *s.* of the late Mr. W. D. Arnold, Director of Public Instruction in the Punjab, and adopted son of the late Right Hon. W. E. Forster; *b.* '55; *E.* Rugby and University College, Oxford (B.A. 1st class in History); Lincoln's Inn '79; North-Eastern Circuit; Director of Cassell & Co., Ltd. Mr. Arnold-Forster, who is an expert in naval and military matters, was President of the Land Settlement Commission in South Africa; appointed Sec. to the Admiralty in Nov. 1900; Sec. of State for War 1903; propounded his new proposals for the organisation of the Army in 1904. See ARMY, and SESSION. Author of "In a Conning Tower," "Our Home Army," "Army Letters," etc. 9, Evelyn Gardens, S.W.

\***Arrol**, Sir William (L. U.), has sat for Ayrshire, South, since '95; *s.* of Mr. Thomas Arrol, of Glasgow; *b.* '39; when only eight years old was a piecer in a cotton mill; afterwards apprenticed as a blacksmith; now partner in the firm of Sir William Arrol & Co., Ltd., contractors and engineers, the contractors of the new Tay Bridge and Forth Bridge; created a knight at the opening of the latter, '90; J.P. for Ayrshire, and Hon. LL.D. Glasgow. Seafield, Ayr.

\***Asher**, A. (L.), has sat for Elgin Burghs since '81; 2nd *s.* of the late Rev. W. Asher, D.D., Inveravon, Banffshire; *b.* '35; *E.* Elgin Academy and Aberdeen and Edinburgh Uni-

versities; called to the Scotch Bar '61; Advocate Depute '69-74; Q.C. '81; Solicitor-General for Scotland '81-5, '86, and Aug. '92—March '94; D.L. for Edinburgh City and County; LL.D. for Aberdeen and Edinburgh Universities; Dean of the Faculty of Advocates of Scotland '95. Heriot Row, Edinburgh. *Brooks's, Reform, and Devonshire.*

\***Ashton**, T. G. (L.), has sat for Bedfordshire, South or Luton D., since '95; M.P. for Cheshire, Hyde D., '85-6; *e.s.* of the late Mr. Thomas Ashton, J.P., D.L., of Hyde, and Ford Bank, Lancs.; *b.* '55; *E.* Rugby and University College, Oxford (M.A. '82); J.P. for Lancashire, Cheshire, and Sussex. Hyde, Cheshire; Vinehall, Robertsbridge, Sussex; and 39, Prince's Gardens, S.W. *Brooks's, Reform, and New University.*

\***Asquith**, Right Hon. H. H. (L.), has sat for Fife, East, since '86; *b.* '52; *E.* City of London School and Balliol College, Oxford, where he graduated B.A. '74, 1st class Classics, Craven University Scholar, and Fellow of Balliol; called to the bar, Lincoln's Inn, '76. His maiden speech in Parliament attracted much attention. He was engaged with Sir C. Russell on behalf of Mr. Parnell at the Parnell Commission, K.C. He appeared also in the "Baccarat" trial, '01. In '92 appointed Home Secretary in Mr. Gladstone's Government, and sworn of the Privy Council. He scored several successes in the course of the Home Rule debates, and rose rapidly to the first rank in the House. During the frequent labour disputes of '93, his firm and consistent attitude commanded the approval of the House and the country generally. He was entrusted with the conduct of the Disestablishment of the Church of Wales Bill, which he introduced during the '94 session. His marriage with Miss Margot Tennant, daughter of Sir Charles Tennant, took place on May 10th, '94, and was a most brilliant ceremony. Mr. Gladstone and most of Mr. Asquith's Ministerial colleagues were present. Mr. Asquith of course left office with his colleagues on the defeat of the Rosebery Ministry in June '95, and he has since resumed practice at the bar. In a speech which Lord Rosebery made at Edinburgh in '96, after resigning the leadership of the party, he specially designated Mr. Asquith as destined to high office in the future. When the Boer War broke out he dissociated himself from the favouring attitude towards the Boers assumed by certain gentlemen on his own side of the House; and, in heartily supporting at the Reform Club meeting of Liberals in 1901 the vote of confidence in Sir H. Campbell-Bannerman as Leader of the party, claimed for himself and others full liberty on the South African question from time to time to express and to act upon their honestly entertained convictions without any imputation of party disloyalty. He supported Lord Rosebery when the Liberal League was formed in 1902, and became a Vice-President. He was one of the most effective speakers on the Liberal side during 1903 on the Education question and the War Commission's report, and especially distinguished himself by his speeches during 1903 and 1904 in opposition to Mr. Chamberlain's fiscal policy; Hon. D.C.L. Oxford 1904. *Brooks's, Athenæum, and National Liberal.*

- \***Atherley-Jones, L. (L.)**, has sat for Durham, North-West, since '85; 3rd s. of the late Ernest Jones, Chartist; *b.* '51; *E.* Manchester Grammar School and Brasenose College, Oxford (B.A. '74); called to the Bar, Inner Temple, '75; North-Eastern Circuit; K.C. 25, Pembroke Road, Kensington, and 4, Paper Buildings, E.C. *Devonshire, Savage.*
- \***Atkinson, Right Hon. J., P.C. (C.)**, has sat for Londonderry, North, since '95; *b.* '44; called to the Irish Bar, King's Inns, Dublin, '65, and English Bar, Inner Temple, '90; K.C.; Bench of King's Inns '85; Solicitor-General for Ireland '89; Attorney-General and Privy Councillor for Ireland '92; reappointed Attorney-General for Ireland '95, and has held office ever since. 68, Fitzwilliam Square, Dublin.
- \***Austin, Sir John, Bart. (L.)**, has sat for Yorkshire, West Riding, East or Osgoldcross D., since '86; s. of the late Mr. John Austin, of Kippax, Yorks; *E.* Kippax Grammar School; J.P. for West Riding, Yorks; Chairman of Visiting Committee of County Justices for York Castle; formerly Chairman of the Castleford School Board. In the last Session of '99 Sir John resigned his seat, owing to a vote of censure being passed upon him (by a majority of one) by the Osgoldcross Liberal Association, at a meeting convened to consider his action in voting against the Scotch Local Veto Bill and the Church Discipline Bill; he, however, stood for re-election, and came out head of the poll by 2925 votes. Red Hill House, Castleford, Normanton.
- \***Bagot, Josceline (C.)**, has sat for Westmorland, Kendal D., since '92; *e.* s. of the late Colonel C. Bagot; *b.* '54; entered the Grenadier Guards '74; *m.* '85 Theodosia, dau. of Sir John Leslie, Bart., who is a Lady of Grace St. John of Jerusalem and Royal Red Cross; retired Captain '86; J.P., D.L., and C.C. for Westmorland; Lieut.-Col. Westmorland and Cumberland Imperial Yeomanry; formerly aide-de-camp to Marquis of Lorne when Governor-General of Canada '82-3, and to Lord Stanley of Preston '88-9; moved Address '99; Parliamentary private secretary to Financial Secretary to Treasury '97-8, and to Home Secretary '99; served as chief military censor in the South African campaign; mentioned in despatches. Levens Hall, Milnthorpe, Westmorland. *Carlton, Guards', and Marlborough.*
- \***Bailey, J. (C.)**, has sat for Walworth since May '95; s. of Mr. William Bailey, of Mattishall, Norfolk; *b.* '40; a founder of the Constitutional Club; D.L. Norfolk, J.P. Essex. 1, Prince's Gate, S.W.; Lofts Hall, Saffron Walden. *Carlton, Junior Carlton, and Constitutional.*
- Bain, Colonel James Robert (C.)**, elected for Cumberland, Egremont D., 1900; s. of the late Sir James Bain, M.P.; *b.* '51. Colonel Bain is interested in the Cumberland coal and iron industries; late Colonel 3rd Battalion (Militia) of the Border Regiment; J.P., D.L. Cumberland. Bolton Hall, Gosforth, Cumberland. *Carlton, Junior Carlton.*
- \***Baird, J. G. A. (C.)**, has sat for Glasgow, Central, since '86; *b.* '54; *E.* Eton and Oxford; served in the 16th Lancers; D.L. for Ayrshire; Lieut.-Col. Ayrshire Yeomanry. Wellwood, Muirkirk, Ayrshire, and 89, Eaton Square, S.W. *Carlton.*
- \***Balcarres, David Lindsay, Lord (C.)**, has sat for the Chorley D. of Lancashire since June '95; *e.* s. of J. Ludovic, 26th Earl of Crawford and 9th of Balcarres; *b.* '71; *E.* Eton and Oxford; B.A., F.S.A., A.R.I.B.A. (hon.); was President of the Oxford Union Society; is Captain in the 1st Volunteer Battalion Manchester Regiment; Trustee of the National Portrait Gallery; Hon. Sec. Society for Protection of Ancient Buildings; Junior Lord of the Treasury Oct. 1903; *m.* 1900, Constance, *d.* of the late Sir Henry Pelly, Bart., M.P. Haigh Hall, Wigan; Balcarres, Colinsburgh, Fife; and 74, Brook Street, W.
- \***Baldwin, A. (C.)**, has sat for Worcestershire, Bewdley D., since '92; s. of Mr. G. Baldwin, of Stourport; *b.* '41; Chairman of Baldwin's, Ltd., Wilden; D.L. Worcester, and J.P. for Worcestershire and Staffordshire. Wilden House, Stourport, and Kensington Palace Mansions, W. *Carlton and Athenæum.*
- \***Balfour, Right Hon. A. J. (C.)**, has sat for Manchester, East, since '85, having previously represented Hertford from '74; *b.* '48; *e.* s. of Mr. James Maitland Balfour, of Whittingehame (*d.* '56), and Lady Blanche Gascoigne Cecil, 2nd dau. of 2nd Marquis of Salisbury. *E.* Eton and Trinity College, Camb. (M.A. '73, Hon. Fellow 1902); was private secretary to Lord Salisbury when Secretary of State for Foreign Affairs '78-80, and was employed on the special mission of Lords Salisbury and Beaconsfield to Berlin '78. In the early portion of his parliamentary career he acted for a time with the so-called "Fourth Party"; President of the Local Government Board in Lord Salisbury's first Administration '85-6; Secretary for Scotland, with a seat in the Cabinet, and Vice-President of the Committee of Council on Education for Scotland, '86-7; Chief Secretary for Ireland '87-91, and carried the Crimes Act through Parliament; member of the Gold and Silver Commission '87-8; created the Congested Districts Board for Ireland '90; First Lord of the Treasury and Leader of the House on the death of Mr. W. H. Smith '91; Leader of the Opposition on the Conservatives going out of office in '92; First Lord of the Treasury and Leader of the House June '95 to 1900, and again after the General Election, Sept. 1900. For a short time during '98 he had charge of Foreign Affairs while Lord Salisbury was abroad through ill-health. In July, 1902, on the retirement of Lord Salisbury, Mr Balfour became Prime Minister and Lord Privy Seal, retaining the office of First Lord of the Treasury, and, of course, the position of Leader of the House of Commons. He introduced the Education Act, 1902, and was its most prominent supporter all through the prolonged discussions upon it. In 1903 he committed himself to an expression of disapproval of the action of the Licensing Justices as amounting almost to injustice and the confiscation of property; and his dictum that the balance of criminality lay rather with the revolutionary bands of Macedonia than with the Turkish troops gave rise to strong dissent. The Fiscal issue raised by Mr. Chamberlain led to a number of very interesting situations during 1903 and 1904; Mr. Balfour expressed agreement with Mr. Chamberlain's proposals, but, holding that the

country was not ripe for the taxation of food, he committed himself and the Government only to a policy of Retaliation. In 1904 he displayed great skill in dealing with an admittedly delicate Parliamentary situation, and survived many debates on the Fiscal question, though the opinion was freely expressed early in the year that the Government were bound to be defeated. He spoke strongly on behalf of the Licensing Act, which was the most important measure carried. In the autumn at Edinburgh he declared that, if he were returned to power, he would call an Imperial Conference to determine what was the attitude of the Colonies on the Fiscal question, and whether terms could be arranged with them. He, however, repudiated the title of Protectionist. During the year he presided at the meetings of the British Association at Cambridge. Author of "A Defence of Philosophic Doubt" ('79), "Essays and Addresses" ('93), enlarged edition 1904, and "The Foundations of Belief, being Notes Introductory to the Study of Theology" ('95, cheap edition 1901). D.L. for East Lothian; late Captain East Lothian Yeomanry; P.C. '85; F.R.S. '88; Hon. LL.D. Edinburgh '81, St. Andrews University '85, Cambridge '88, Dublin and Glasgow '91; Hon. D.C.L. Oxford '91; Lord Rector of St. Andrews '86, Glasgow '90; became Chancellor of Edinburgh University '91; member of the Senate of London University '88; President British Association 1904; Captain of the Royal and Ancient Golf Club of St. Andrews '94-5; President of the National Cyclists' Union '96. Whittingehame, Prestonkirk, East Lothian, and 10, Downing Street, Whitehall, S.W. *Carlton Travellers', Athenæum, New Club (Edinburgh)*, and many others.

**Balfour**, Charles Barrington (C.), elected for Middlesex, Hornsey D., 1900; *b.* '62; *E.* at Eton and Sandhurst; *g. s.* of the 6th Visct. Barrington; joined Scots Guards '81; served in the Egyptian Campaign '82, and was at Tel-el-Kebir with his battalion; retired '90; Capt. of the 2nd Vol. Batt. of the King's Own Scottish Borderers '91-95; Capt. Roy. Guards Reserve Regt., 1900; J.P. Roxburghshire; J.P., D.L., C.C. Berwickshire. Capt. Balfour unsuccessfully contested Roxburghshire '85, Berwickshire '92, '94, and '95, and Southport '99; *m.* '88, Lady Nina McDonnell, *d.* of the 5th Earl of Antrim, and has issue. Newton, Don, Kelso, and Balgonie, Markinch, Fife.

**\*Balfour**, Right Hon. Gerald W. (C.), has sat for Leeds, Central, since '85; 4th s. of the late Mr. J. Maitland Balfour; *b.* '53; *E.* Eton and Trinity College, Camb. (1st class Classical Tripos '74, Assistant Tutor, Fellow, M.A. '78); formerly private secretary to Right Hon. A. J. Balfour, his brother; member of the Labour Commission '91; Chief Secretary for Ireland '95-1900; P.C. '95; P.C. Great Britain and President of the Board of Trade, 1900. As Chief Secretary for Ireland he had charge of some very important legislation, including in '98 the measure introducing Local Government for Ireland, on lines very similar to those of the Acts already passed for England and Scotland. 3, Whitehall Court, S.W.

**Balfour**, Kenneth Robert (C.), elected for Hants, Christchurch D., 1900; *b.* '63; Lieut.

1st Dragoons '85; Capt. '92; Adjutant of the Portsmouth Yeo. Brigade '93-'98; has been on active service in the S. African Campaign as second in command of the 11th Batt. with the temporary rank of Major; J.P. Dorset. Stagden House, Bournemouth; 18, Lowndes Street, S.W.

**\*Banbury**, Sir F. G., Bart. (C.), first returned for Camberwell, Peckham D., '92; *e. s.* of the late Mr. F. Banbury, of Shirley House, Surrey; *b.* '50; *E.* Winchester; member of the firm of F. Banbury & Sons, stockbrokers; cr. a baronet 1902; *m.* '73 Elizabeth Rosa, 2nd daughter of the late T. B. Beale, Esq., of Brettenham Park, Suffolk. Warneford Place, Highworth, Wilts, and 41, Lowndes Street, S.W.

**\*Banes**, Major G. E. (C.), has sat for West Ham, South, since '95; M.P. for same const. '86-92; *b.* Feb. 2nd, '28; s. of Mr. George Dann Banes, of Chatham Dockyard; wharfinger and bonded warehouse-keeper, Colonial and Granite Wharves, Wapping. City office 37, Mark Lane; founded the 3rd Essex Artillery Volunteers '59; retired Major '76; J.P. for West Ham, and member of School Board from '74. The Red House, Upton, Essex.

**\*Barlow**, John Emmott (L.), has sat for the Frome Division of Somerset '92-5 and since June '96; *e. s.* of the late Mr. Thomas Barlow, of Torkington Lodge, near Stockport; *b.* '57; is a barrister, but does not practise, being a partner in the firms of Thomas Barlow & Brother, Manchester and London, and Barlow & Co., Calcutta, Shanghai and Singapore; a J.P. for Cheshire and Somerset, and C.C. Cheshire; *m.* '95 Anna, sister of the 3rd Baron Denman. Torkington Lodge, near Stockport, Cheshire.

**Barran**, Rowland Hirst (L.), elected for Leeds, North D., 1902; *y. s.* of Sir John Barran, of Chapel Allerton Hall, near Leeds, who represented Leeds '76-83, and West Riding, Otley D., '86-95; *b.* '58; director of John Barran & Sons, Ltd., merchants, of Leeds; member of the Leeds City Council 1901-4, and for some time served on the School Board of that city; member of the Court of Leeds University; Gov. Leeds Grammar School. Beechwood, Roundhay, near Leeds. *Reform, Ranelagh.*

**\*Barry**, E. (N.), has sat for Cork, South, since '92; s. of Mr. Garratt Barry, of New Mill, Rosscarbery, R.S.O., co. Cork; *b.* '52; *E.* St. Vincent's College, Dublin, and Dr. Knight's, Cork; a farmer; J.P.; Chairman of the Clonakilty Board of Guardians. 10, Vincent Square, S.W.

**\*Barry**, Sir Francis T., Bart. (C.), has sat for Windsor since '90; *e. s.* of the late Mr. C. Barry, of the Priory, Orpington, Kent; *b.* '25; J.P. Berks, and J.P. and D.L. for Caithness-shire; formerly in the British Consular service; a Baron of the Kingdom of Portugal; created a Bart. '99. St. Leonard's Hill, Windsor; Keiss Castle, Caithness; and 1, South Audley Street, W. *Carlton.*

**\*Bartley**, Sir George C. T. (C.), has sat for Islington, North, since '85; s. of the late Robert Bartley, of Hackney; *b.* '42; *E.* University College School, London; Civil Service, Science and Art Department, South Kensington, '59-80; *m.* 3rd d. of the late Sir H. Cole, K.C.B.; founder of the National Penny Bank, and writer on thrift and education amongst the poor; J.P. for London and

Middlesex; a member of the Civil List Committee 1901; K.C.B. 1902. St. Margaret's House, Victoria Street, S.W. *Athenæum and Constitutional*.

James (L.), has sat for Aberdeen, South, since '85, and was M.P. for Tower Hamlets 80-85; *b.* '38; *E.* Glasgow University and Trinity College, Oxford, obtaining several University honours, in addition to the Craven and Vinerian Scholarships; Fellow of Oriel '62; Hon. Fellow of Trinity College; D.C.L., LL.D., F.R.S.; D.L. City of Aberdeen; Corresponding Member of the Institute of France and of the Royal Academies of Turin and Brussels; P.C.; called to the Bar, Lincoln's Inn, '67, and was appointed three years later Regius Professor of Civil Law at Oxford University. This chair, however, he resigned in June '93. Under-Secretary for Foreign Affairs for five months in '86; Chancellor of the Duchy of Lancaster, with a seat in the Cabinet, in Mr. Gladstone's Government of '92-4; and in Lord Rosebery's Cabinet, Chancellor of the Duchy, March to May '94, when he was appointed President of the Board of Trade, retaining the office until the change of ministry, June '95. He has always taken a deep interest in Irish questions, in the extension of rural local government, in the reconstruction of the second chamber, in the development of secondary education, and in

the condition of the Eastern Christians and their emancipation from Turkish misrule. He strongly opposed the war in South Africa, and the Education Act. His works, which have gained for him a great reputation, include "The Holy Roman Empire," Transcaucasia and Ararat," "The American Commonwealth" ('89), and "Impressions of South Africa" ('98), "Studies in History and Jurisprudence" ('1901), "Studies in Contemporary Biography" ('1903). Chairman of the Royal Commission on Secondary Education '94-5; Vice-President of the British Economic Association; ex-President of the Alpine Club; and one of the first members of the Council of the British Academy. 54, Portland Place, W. *Athenæum and National Liberal.*

Brymer, of Ilslington, Dorchester; *b.* '40; *E.* Harrow and Trinity College, Camb. (M.A. '64); J.P. for Dorsetshire (High Sheriff '87); late Col. Dorset Yeomanry Cavalry. Ilslington House, Puddletown, Dorchester, and 8, St. James's Street, S.W.

\***Buchanan, Thos. Ryburn (L.)**, elected for East Perthshire 1903; has also sat for Edinburgh, City D., '81-5, West '85-92, Aberdeenshire, East, '92-1900; *b.* '46; *E.* High School, Glasgow, Sherborne School, Dorset, and Balliol College, Oxford (double 1st Moderations '67, B.A. 1st class '70, gained Stanhope (history) prize '68, Fellow of All Souls' '71); called to the Bar, Inner Temple, '73; was opposed to Mr. Gladstone's Irish policy '86, but has since been in favour of Home Rule.

**Bull, William James (C.)**, elected for Hammersmith 1900; *b.* '63; *E.* S. Mary's Academy; *m.* Lilian, d. of Mrs. Brandon, of Oakbrook, Ravenscourt Park, and Heene, Worthing. A solicitor. Was a member of the L.C.C. from '92 to 1901, and was Vice-Chairman of the General Purposes and Parks Committees. Chairman of J. W. Singer & Sons, Bronze Founders, of Frome and London; Director of John Thornycroft & Co., of Chiswick, Basingstoke, and Southampton. Vencourt, Hammersmith; Trustee and on the Council of Royal Humane Society; member Council Birkbeck College; Parliamentary Sec. to Mr. Walter Long, President of Local Government Board. 414, Uxbridge Road, W. *Carlton, Constitutional, United, and Automobile.*

\***Burdett-Coutts, W. L. A. B. (C.)**, has sat for Westminster since '85; s. of the late Mr. E. Bartlett, of Plymouth, Mass., U.S.; *b.* '51; *E.* Keble College, Oxford (M.A. '80); Special Commissioner in Turkey for Baroness Burdett-Coutts' Turkish Compassionate Fund '77; Order of Medjidie '78; *m.* Baroness Burdett-Coutts '81, and assumed her name. Came into special prominence in Session of 1900 by reason of his published letters respecting alleged defects in administration of war hospitals in South Africa, which were afterwards inquired into by a Royal Commission. After the publication of its report the Government promised a "drastic reform" of the Army Medical Service (Session 1901), and appointed a committee for that purpose, presided over by the Secretary of State for War, the Scheme of Reform being issued in 1902. Was opposed on the hospitals question by an independent Conservative at the General Election of 1900, with the result that Mr.

Burdett-Coutts was elected by 2715 to 439 votes. 1, Stratton Street, W. *Carlton.*

\***Burns, J. (Labour)**, has sat for Battersea since '92; s. of Mr. Alexander Burns, engineer, formerly of Ayrshire. He was *b.* in very humble circumstances in '58 at Vauxhall, and attended Christ Church school at Battersea till he was ten years of age, when he went to work at a local candle factory. He then became a rivet boy in an engineer's workshop at Vauxhall, and later apprenticed himself to an engineer at Millbank, and served till he was twenty-one. Throughout youth he was an omnivorous reader, and during his apprenticeship got into trouble with his employers because of an open-air address which he delivered. He imbibed his Socialistic theories from a fellow-workman in an engineering shop, this man, a Frenchman, being a refugee from Paris after the Commune. He worked as foreman engineer for twelve months on the Niger (West Africa), and on his return spent his savings in a six-months' tour through Europe. He first attracted public attention by his speeches on Socialism at an Industrial Remuneration Conference in London, and since then has constantly addressed working-class audiences. He became prominent in his own trade society (the Amalgamated Engineers), and at the General Election in '85 he stood as a Socialist candidate for the western division of Nottingham, but obtained only 598 votes. He played a leading part in the unemployed agitation of '86, and was one of the heads of the crowd which on Feb. 8th, '87, broke from the control of its leaders and caused a riot in the West End. He contested the right of public meeting in Trafalgar Square, and suffered six weeks' imprisonment for resisting the police ('87). He was one of those who organised and won the great victory of the Dock Labourers in '89. In all matters relating to labour he is an authority, respected by both employers and employed, and he is constantly being appealed to by workmen and their organisations for help and advice. He has six times been elected a member of the London County Council for the Battersea Division, on which body he has been the author of direct employment, and had much to do with its labour, steamboats, and tramways policy; and has been thrice chosen to represent the constituency in the House of Commons. There he very soon made his mark. 108, Lavender Hill, S.W.

\***Burt, Thomas (L.)**, has sat for Morpeth since '74; s. of Mr. Peter Burt, miner; *b.* '37; Secretary to the Northumberland Miners' Union '65; member of the Labour and Mining Royalities Commission '91; President of the Trades Union Congress '91; Parliamentary Secretary to the Board of Trade Aug. '92—July '95. 20, Burdon Terrace, Newcastle-on-Tyne. *Reform.*

(Bell Scholarship, 8th classic and 8th Wrangler '74, and Fellow; Lincoln's Inn '78; barrister-at-law; K.C.; Bench of Lincoln's Inn. Riccall Hall, Yorks; 32, Elvaston Place, S.W.

\***Buxton, Sydney (L.)**, has sat for Tower Hamlets, Poplar D., since '86, and was M.P. for Peterborough '83-5; s. of the late C. Buxton, M.P.; *b.* '53; *E.* Clifton College

- and Trinity College, Camb.; member of the London School Board '76-82; author of "Handbook to Political Questions," "Finance and Politics," "Mr. Gladstone as Chancellor of the Exchequer," "Shooting and Fishing," and other works; Under Colonial Secretary Aug. '92—July '95. 7, Grosvenor Crescent, W. *Athenæum* and *Brooks's*.
- \***Caldwell, James (L.)**, has sat for Lanarkshire, Mid, since '94; was M.P. for Glasgow, St. Rollox, '86-92; s. of Mr. Findley Caldwell, of Glasgow; b. at Kilmarnock '39; E. at the Universities of Glasgow and Edinburgh; admitted to the Faculty of Procurators in Glasgow '64; practised many years; was also lecturer on law at the Mechanics' Institute; afterwards became calico printer (now retired). 12, Grosvenor Terrace, Glasgow, and 107, Holland Road, W.
- \***Cameron, Robert (L.)**, has sat for Durham, Houghton-le-Spring D., since '95; e. s. of the late Rev. Duncan Cameron, of Perthshire; b. '25; E. Fortingall Parish School and Normal College, London; teacher and writer and lecturer on literature, science, etc.; J.P. for Sunderland, member of the Town Council and Board of Guardians for 25 years, and was for many years Chairman of the School Board. 26, Queen's Mansions, Victoria Street, Westminster.
- \***Campbell-Bannerman, Right Hon. Sir H., G.C.B. (L.)**, first elected for Stirling Burghs '68; s. of the late Sir J. Campbell, but in '72 assumed additional surname of Bannerman under the will of his maternal uncle, the late H. Bannerman; b. '36; E. Glasgow University and Trinity College, Camb. (B.A. honours '58, M.A. '61); P.C.; Financial Secretary of War Office '71-4 and '80-82; Secretary of Admiralty '82-4; Chief Secretary for Ireland '84-5; Secretary for War '86 and '92-5; J.P. and D.L. for Kent; J.P. for Lanarkshire and Perthshire; Hon. LL.D. of Glasgow University. Was chosen Leader of the Liberal Opposition in succession to Sir William Harcourt, at a meeting of Liberal members held at the Reform Club, under the presidency of Sir Wilfrid Lawson, on the eve of the opening of Parliament, Feb. '99. Notwithstanding the differences between Liberal Imperialists and other Liberals over the Boer War, a unanimous vote of confidence in his leadership was carried at a meeting of the Liberal party held at the Reform Club, July 1901. In 1902 a passage of words took place between him and Lord Rosebery over the doctrine of the "clean slate" in regard to the Irish question and other public questions, and the Liberal League was formed. Sir Henry, however, again received the solid support of the Liberal party in the House in 1903 and 1904 in opposing the Education and Licensing Acts and Mr. Chamberlain's Fiscal policy. Belmont Castle, Meigle, Perthshire, and 20, Belgrave Square, S.W. *Brooks's* and *Reform*.
- \***Campbell, Right Hon. J. A. (C.)**, has sat for Glasgow and Aberdeen Universities since '80; e. s. of the late Sir J. Campbell, of Glasgow; b. '25; E. High School, Glasgow University (Hon. LL.D.); J.P. and D.L. for Lanarkshire and Forfarshire; P.C. '98. Stracathro, Brechin, Forfarshire, and 2, Princes Gardens, S.W. *Carlton*.
- Campbell, James Henry Mussen (C.)**, elected for Dublin University 1903; also sat for St. Stephen's Green D. of Dublin '98-1900; b. '51; E. Dublin University (Senior Moderator and gold medallist in classics, history, law, and political economy, and Vice-Chancellor's gold medallist, and auditor and gold medallist in oratory and history, College Historical Society); called to Irish Bar '78, took silk '90; bencher King's Inn, '94; called to English Bar '98; bencher Gray's Inn, 1901, being appointed Solicitor-General for Ireland in the same year. 30, Upper Pembroke Street, Dublin. *University (Dublin)*.
- Campbell, J. (N.)**, elected for Armagh, South D., 1900; E. St. Patrick's Coll., Armagh, and French Coll., Blackrock; called to the English Bar, Middle Temple, '96, LL.B. at London University '99 (first in Honours). 1, Elm Court, Temple, E.C.
- \***Carlike, W. W. (C.)**, has sat for Buckinghamshire, North or Buckingham D., since '95; s. of Mr. J. W. Carlike, J.P., D.L., of Ponsbourne Park, Herts; b. '62; E. Harrow and Clare College, Camb.; J.P. and D.L. for Bucks. Gayhurst, Newport Pagnell, Bucks. *Carlton* and *Junior Carlton*.
- \***Carson, Right Hon. Sir Edward (C.)**, has sat for Dublin University since '92; 2nd s. of the late Mr. E. H. Carson, C.E.; b. '54; E. Dublin University (M.A.); LL.D. *hon. causa*; called to the Irish Bar '77, English Bar '93; K.C. Ireland and England; Solicitor-General for Ireland '92; Bencher of King's Inn, Dublin, and of the Middle Temple; P.C. Ireland '96; appointed Solicitor-General for England 1900, when he received the customary knighthood. 5, Eaton Place, S.W., and Northgate, Rottingdean. *Carlton, Garrick, Bachelors', and University, Dublin*.
- \***Carvill, P. G. Hamilton (N.)**, has sat for Newry since '92; s. of the late Mr. Francis Carvill, of Newry and Rostrevor; b. '39; E. London University; called to the English Bar, Middle Temple, '88; Northern Circuit; J.P. for cos. Down and Armagh (High Sheriff '78). 29, Morpeth Mansions, S.W.; Ballyvourney, co. Cork. *Reform*; *Ranelagh*.
- \***Causton, R. K. (L.)**, has sat for Southwark, West, since '88; M.P. for Colchester '80-85; 2nd s. of the late Sir Joseph Causton; b. '43; Director of Sir Joseph Causton & Sons, Ltd.; Commissioner of Lieutenancy for London; Master Skinners' Co. ('77-8); member of the Executive Committee of the London Chamber of Commerce; a Junior Lord of the Treasury Aug. '92—June '95. 12, Devonshire Place, W. *Reform, Devonshire, City Liberal, National Liberal, and Gresham*.
- Cautley, Henry Strother (C.)**, elected for Leeds, East D., 1900; b. '63; E. Charterhouse and King's College, Cambridge (1st Class Mat. Tripos '84; B.A.); called to the Bar, Middle Temple; joined the North-Eastern Circuit, and is in practice in London and Yorkshire; President of the Bramley Conservative Club; contested Dewsbury in '92 and '95; m. 1902 Alice Bohun, d. of B. N. C. Fox, Esq., J.P., of Maplewell, Leicestershire. 33, Montagu Square, W.; Burton Pidsea, near Hull.
- \***Cavendish, R. F. (L.U.)**, has sat for North Lancashire, North Lonsdale D., '95; 2nd s. of the late Lord Edward Cavendish, M.P.; b. '71; E. Trinity College, Camb. (B.A. '92); nephew of the Duke of Devonshire.
- \***Cavendish, Victor C. W. (L.U.)**, has sat for Derbyshire, West, since '91; e. s. of the late

Lord Edward Cavendish, M.P., and heir-presumptive to his uncle, the Duke of Devonshire; *b.* '68; *E.* Trinity College, Camb.; Lieutenant Derbyshire Yeomanry Cavalry. Appointed Treasurer of the Household 1900, and Financial Secretary to the Treasury 1903. 37, Park Lane, W.

\***Cawley**, Frederick (L.), has sat for Lancashire, South-East (Prestwich D.), since '95; *s.* of the late Mr. Thomas Cawley, of Priestland, Tarpole; *b.* '50; *E.* Aldersey Grammar School; bleacher and calico printer; J.P. for Lancashire. Brooklands, Prestwich; Berrington Hall, Leominster. *Reform and National Liberal.*

\***Cayzer**, Sir Charles W., Bart. (C.), has sat for Barrow-in-Furness since '92; *b.* '43; *e. s.* of Charles Cayzer, Esq., of Hatherleigh, Devon; *m.* '68, Agnes, *e. d.* of William Trickey, Esq., of Clifton; head of the firm of Cayzer, Irvine, & Co., steamship owners, Glasgow, Liverpool, Manchester, and London. Knighted 97; bart. 1904; J.P. for cos. Stirling, Renfrew, and Dumbarton; Hon. Col. 1st Lanarkshire Volunteer Artillery. 27, Belgrave Square, S.W.; Gartmore, Perthshire; Newtyle, Forfarshire; and Ralston, Renfrewshire. *Carlton, and City of London.*

\***Cecil**, Evelyn (C.), who was returned for Aston Manor 1900, sat for Herts (East D.) '98-1900; *e. s.* of Lord Eustace H. B. G. Cecil, and nephew of the late Marquis of Salisbury; *b.* '65; *E.* Eton and New Coll., Oxon; called to the Bar, Inner Temple, '89; Assistant Private Sec. to his uncle, when Premier, '91-2, and '95-1902; a member of the London School Board '94-9. Chairman Select Committee on Effect of Foreign Steamship Subsidies on British Trade 1901-2; Chairman Eastern Mail Service Committee 1903. Mr. Cecil married in '98 the Hon. Alicia Margaret, a daughter of Lord Amherst of Hackney. 10, Eaton Place, S.W.

\***Cecil**, Lord Hugh (C.), has sat for Greenwich since '95; *s.* of Marquis of Salisbury, K.G., ex-Prime Minister and Foreign Secretary; *b.* '69; *E.* Eton and University College, Oxford (B.A. '91); Fellow of Hertford College, Oxford, '91 (M.A. '94). He has made a high place for himself in the House as a powerful debater, and his speeches in opposition to Mr. Chamberlain's Fiscal policy in 1903 and 1904 were amongst the ablest and most effective criticisms of them. He is a High Churchman. 20, Arlington Street, S.W.

\***Chamberlain**, Right Hon. Joseph (L.U.), has sat for Birmingham, West, since '85, and was M.P. for Birmingham from '76. He was *b.* in London, July '36; *E.* University College. In '54 his father joined the firm of Nettlefold, the well-known screw makers of Birmingham. He also joined the firm, and for many years devoted himself almost exclusively to business. In '70 he was one of the leaders of the defeated unsectarian candidates for the School Board of Birmingham, but in '73 he was elected chairman. During this period he was also a member of the Town Council, of which he became Mayor ('73). On the death of his father he retired from the firm, in order to devote all his energies to public life. To him was due the transfer of the gas and water works to the borough authorities, and he was the author of the improvement scheme which has entirely transformed

the face of central Birmingham. He was re-elected Mayor in '74, and again in '75. In '74 he opposed Mr. Roebuck in Sheffield, but was defeated by a large majority. In '76 he was elected for Birmingham without opposition, and has represented the town ever since. He took his seat below the gangway, among the Home Rulers, with whose aspirations he was supposed to have some sympathy. When the Liberals returned to power in '80 Mr. Chamberlain became President of the Board of Trade, with Cabinet rank. He passed a Patents Bill and a Bankruptcy Bill, and after his exit from office ('85) he increased his reputation as a political leader considerably more than during the three previous years, his freedom from office giving him greater latitude. He attacked Conservatives and Whigs with almost equal bitterness. After the general election of '85 Mr. Chamberlain held the office of President of the Local Government Board until his divergence of views on the Irish policy of Mr. Gladstone caused his resignation (March 27th, '86). He was appointed Chief Commissioner to the Conference at Washington for the settlement of the dispute between the United States and Canada on the Fisheries Question. Revisited United States on the occasion of his marriage with Miss Endicott (Nov. 15th, '88). During the general election of '92 he spoke and worked with great effect, and his influence in the Midlands was very marked. His influence in the House throughout the Home Rule debates was just as great, and he made himself a tireless leader of all the assaults on the Bill, but took practically no part in the Disestablishment debate in '94. In the autumn he showed an inclination to outline a policy of social reform for the joint Unionist party, and made the significant statement that the gulf between him and the Liberal party could not now be bridged over. On the formation of the Coalition Ministry in June '95 Mr. Chamberlain took office under Lord Salisbury as Colonial Secretary. In '96 he had to deal with the Ashanti and Transvaal difficulties, and showed considerable energy in his efforts to develop commercial intercourse between Great Britain and her colonies. The Workmen's Compensation Act, '97, was greatly indebted to his advocacy during its passage through the House, and he was again prominent by his vigorous handling of Colonial matters. In '98 he made the famous "long spoon" speech in reference to foreign affairs, and declared himself strongly in favour of an alliance with the United States. The negotiations with the Transvaal, which ended in war, occupied him fully during '99, and his South African policy was one of the main controversial features of the General Election of 1900 and during 1901. He had charge in 1900 of the measure for the constitution of the Australian Commonwealth. On Feb. 14th, 1902, he was presented with an address by the City of London Corporation expressing high appreciation of his public services, and was given a splendid reception on his way to the Guildhall. He presided over the Colonial Conference (*q.v.*) in July and August. In November he visited South Africa with the object of considering the state of affairs in the new colonies on the spot for himself. Returning to England (March 14th, 1903) he

received an address from the Lord Mayor and Corporation of London (March 20th) in recognition of his services to the Empire. In May 1903 he launched, at Birmingham, his great scheme for the revision of the Fiscal Policy of the country and the adoption of a policy of Preferential Tariffs; and in September, believing that policy to be at that time unacceptable to the majority in the constituencies, he resigned, in order to be free to devote himself to explaining and popularising his proposals. He began his campaign for this purpose at Glasgow on Oct. 6th, and has since delivered a number of speeches, which have naturally evoked much criticism, but the splendid ability and energy of which have been praised on all hands. Lord Rector of Glasgow University '97-9; LL.D. Camb. '92; D.C.L. Oxford '96; LL.D. Dublin '99; Chancellor of the new University of Birmingham. Highbury, Moor-green, Birmingham, and 40, Prince's Gardens, S.W. *Athenæum* and *Devonshire*.

\*Chamberlain, Right Hon. J. Austen (L.U.), who has sat for Worcestershire, East, since '92, is *e. s.* of the Right Hon. J. Chamberlain, M.P.; *b.* '63; *E. Rugby* and Trinity College, Camb. (M.A. '89), also studied at Paris and Berlin; Civil Lord of the Admiralty July '95—Nov. 1900, when he was appointed Financial Secretary to the Treasury. Mr. Chamberlain held this position until 1902, when, on the reorganisation of the Ministry under Mr. Balfour, he was appointed Postmaster-General and made a P.C.; Chancellor of the Exchequer Oct. 1903. Highbury, Moorgreen, Birmingham, and 11, Downing Street, S.W.

Chamberlayne, Tankerville (C.), elected for Southampton 1900, and had represented that constituency from '92-5; unseated on petition after the General Election of '95; *b.* '43; *E. Eton* and Magdalen Coll., Oxford (B.A.); Hon. Lieut. Royal Naval Reserve, and very much interested in all matters connected with yachting, being vice-commander of the Royal Southampton Yacht Club and a member of nine Royal Yacht Clubs. Mr. Chamberlayne is also a contributor to various newspapers, reviews, and magazines. Cranbury Park, Winchester; Weston Grove, Southampton; and Baddesley Manor, Romsey. *Carlton, Junior Carlton, St. Stephen's, Royal Thames Yacht*.

\*Channing, F. A. (L.), has sat for Northamptonshire, East, since '85; *s.* of the Rev. W. H. Channing; *E. Liverpool* and Oxford; Fellow and Lecturer in Philosophy, and Tutor University College; Chancellor English Essay Prize; Arnold History Essay Prize; Classical and Mathematical Honours; called to the Bar, Lincoln's Inn, '82; J.P. for Northants; interested in railway servants' hours of labour and in land tenure, education, and agricultural reforms, and has strongly opposed the South African war and the financial and fiscal policy of the Unionist Government; member of Agricultural Commission '93; Chairman of Central Chamber of Agriculture '94. 40, Eaton Place, S.W. *Reform, Oxford* and *Cambridge, New University, and National Liberal*.

\*Chaplin, Right Hon. Henry (C.), has sat for Lincolnshire, Sleaford D., since '85, and was M.P. for Lincolnshire, Mid, '68-85; *s.* of the late Rev. H. Chaplin, vicar of Ryhall,

Rutland; *b.* '40; *E. Harrow* and Christ Church, Oxford; Chancellor of the Duchy of Lancaster '85-6; first President of the Board of Agriculture Sept. '89-92; J.P. and D.L. for Lincolnshire; Lord of the Manor, Blankney; P.C. '85; member of the Agricultural Commission '93; was President of the Local Government Board June '95—Nov. 1900, and as such conducted the Agricultural Rates Act through the House in '96, the Vaccination Act in '98, and the Housing Bill in 1900. He led a strong agitation on the part of the agricultural interest against the dropping of the Corn Tax in 1903, and welcomed Mr. Chamberlain's fiscal proposals. Blankney Hall, Sleaford, and Stafford House, St. James's, S.W. *Carlton, White's, etc.*

Chapman, Edward (C.), elected for Cheshire, Hyde D., 1900; *b.* '39; *E. Merton College, Oxford* (M.A.), with a first class in the public examination in Natural Science). Mr. Chapman is a Fellow of Magdalen College and was for some time a Public Examiner at Oxford; since '94 has been deputy chairman of the Great Central Railway; he is also a director of the South-Eastern, and London, Chatham, and Dover Railway; member of the York House of Laymen; Lord of the Manor of Hattersley, a freeman of the Turners' Co.; J.P. Lancashire, J.P. and D.L. Cheshire; and a Fellow of the Linnean Society. Magdalen College, Oxford; Hill End, Mottram-in-Longdendale, Cheshire; and Queen Anne's Mansions, S.W. *Carlton, Constitutional, and Conservative*.

Churchill, Winston Leonard Spencer (L.), elected for Oldham 1900; *e. s.* of the late Lord Randolph Churchill, who was 3rd s. of the 7th Duke of Marlborough; *b.* '74; *E. Harrow* and Sandhurst. Mr. Churchill has served as a Lieutenant in the 4th Hussars; he was with the Spanish forces in Cuba in '95, and was awarded the first class of the Spanish Order of Military Merit; with the Malakand Field Force, when he took part in the operations in Bajaur, obtaining mention in despatches and the medal and clasp; with the Tirah Expeditionary Force, obtaining the clasp; and with the Nile Expeditionary Force, when he took part in the battle of Khartoum, receiving the medal and clasp; served with the South African Light Horse, and was special war correspondent for the *Morning Post* during the South African campaign, writing for that journal a series of brilliant letters, while his remarkable escape from Pretoria, after his capture by the Boers, aroused great public interest. He has medal and four clasps. "The River War," "London to Ladysmith *viâ* Pretoria," and "Ian Hamilton's March" record his impressions of the Egyptian and South African campaigns. Is a captain in the Oxfordshire Imperial Yeomanry. He opposed the Sugar Convention Bill, criticised Mr. Brodrick's Army proposals, and was one of the strongest opponents of Mr. Chamberlain's Fiscal proposals in 1903 and 1904. In the latter year he was definitely ranked as a member of the Liberal party. 105, Mount Street, W.

\*Clancy, J. J. (N.), has sat for Dublin, North, since '85; *e. s.* of Mr. W. Clancy, of Claregalway, co. Galway; *b.* '47; *E. College of the Immaculate Conception, Athlone, Queen's College, Galway, and Royal University, Ireland* (M.A. with honours); formerly Classical

- Master of the Holy Cross Seminary, Tralee; acting editor of the *Nation* '80-85; called to the Irish Bar '87. 1, Breffni Terrace, Sandy Cove Road, Dublin.
- \***Clare, O. Leigh (C.)**, has sat for Lancashire, South-East or Eccles D., since '95; s. of Mr. William Clare, of Liverpool; b. '41; E. Rossall School and St. John's College, Camb.; called to the Bar, Inner Temple, '66; a Bench of the Inner Temple. East Sheen, Surrey. *Carlton, New University, and St. Stephens.*
- Clive, Percy Archer (L.U.)**, elected for Herefordshire, South (Ross) D., 1900; g. s. of the seventh Earl of Denbigh; b. '73; entered Grenadier Guards '91; Lieutenant '96; employed with the West African Frontier Force '97-9, in which year he was gazetted Captain; on special service in South Africa '99-1901; J.P., D.L., Herefordshire. Whitfield, Herefordshire. 21, Chester Street, S.W.
- Coates, Major Edward Feetham (U.)**, elected for Lewisham, Dec. 15th, 1903; e.s. of Mr. James Coates, J.P., D.L., of Helderby Hall, York; b. '53. Member of the firm of Messrs. Coates, Son, & Co., stockbrokers, London; Major late 3rd (Militia) Battalion W. Riding Regiment; and is one of His Majesty's Lieutenants for the City of London; J.P. for Surrey and the N. Riding of Yorkshire; contested the Elland Div. of Yorkshire in the Unionist interest in 1900; and Vice-chairman Surrey County Council. Married in '78, Edith, daughter of Captain P. Woolley, of Gravenhurst, Sussex. *Carlton, Junior United Service, Wellington, Union, Brighton, Yorkshire, York.*

(C.), has sat for Wiltshire, Chippenham D., since '92; *s.* of Rear-Admiral Dickson; *b.* '66; *E.* Harrow; assumed name of his maternal grandfather as heir to his mother's estate; inherited baronetcy from his uncle, Captain Sir Alexander Collingwood Dickson-R.N.; *m.* '96, Ann Beaulerk Dundas, *g.d.* of Lord Napier of Magdala; member of the L.C.C. for St. George's, Hanover Square, since '98; J.P. for Wilts; Captain Wilts Yeomanry; High Sheriff for Wilts '90; in 1900 went on active service in South Africa with the Imperial Yeomanry, and acted as A.D.C. to General Lord Methuen. Hartham Park, Corsham, and Hilmarton; 8, Chesterfield Gardens, Mayfair. *Carlton, Turf, and Marlborough.*

\***Dilke**, Right Hon. Sir C. W. (L.), has sat for Gloucestershire, Forest of Dean D., since '92, and was M.P. for Chelsea '68-86; *e.* *s.* of the late Sir C. W. Dilke, M.P.; *b.* '43; *E.* Trinity Hall, Camb.; called to the Bar, Middle Temple, '66; P.C. He began his career after leaving college by a tour round the world, to which he owed it that he was able to write his book on "Greater Britain," a standard work on our empire beyond the seas, '68. After his return he was elected to Parliament ('68), and lectured in '71 at Newcastle on "The Cost of the Crown" in a most uncompromisingly Radical fashion, which provoked universal attention. He married in '72, but his wife died in Sept. '74. He was appointed Under-Secretary of State for Foreign Affairs in '80, and President of the Local Government Board (with a seat in the Cabinet '82) '80 to '85. In '86 the case of *Crawford v. Crawford* and Dilke came on, and was twice tried. In the first trial, just before which he married Mrs. Mark Pattison, a divorce was granted; but Sir Charles Dilke was dismissed from the case and given his costs. On his application the Queen's Proctor subsequently intervened, and a second trial followed; but Sir Charles Dilke's application to be made a party in the second trial was refused by the Court and by the Court of Appeal. Sir Charles had been elected for Chelsea at the '85 election, but was defeated in '86. At the general election of '92 he was returned to the House of Commons for the Forest of Dean, after an absence of six years, and has been twice re-elected for that constituency. He is proprietor of the *Athenaum* and of *Notes and Queries*. Besides "Greater Britain," Sir C. Dilke's chief works are "The

Fall of Prince Florestan," "The Present Position of European Politics," '87, "The British Army," '88, "Problems of Greater Britain," '91, and, with Mr. Spenser Wilkinson, "Imperial Defence," '92. Lady Dilke died Oct. 24th, 1904. 76, Sloane Street, S.W.

\***Dillon**, J. (N.), has sat for Mayo, East, since '85; M.P. for Tipperary '80-83; *s.* of the late Mr. John Dillon, M.P., of '48 celebrity; *b.* '51; *E.* Catholic University, Dublin, and became a L.R.C.S.I., afterwards making politics his vocation. Returned for Tipperary, '80, as a supporter of Mr. Parnell, having in the previous year assisted in the formation of the Irish Land League. Mr. Dillon was closely identified with the Plan of Campaign; and in Nov. '86, while carrying that plan into operation at Loughrea by receiving the rents of the tenants, was arrested by the police. He was subsequently tried for the offence, but not convicted. At the Mell petty sessions, Drogheda, on May 11th, '88, for "having on April 8th, at Tullyallen, co. Louth, taken part in the criminal conspiracy known as the Plan of Campaign," he was sentenced to six months' imprisonment. The sentence was confirmed on appeal on June 21st. He was sent to Dundalk prison, but was liberated Sept. '88. He returned in '90 from a tour of the Australian Colonies, where he collected large contributions in aid of the Irish Nationalist party. Was arrested (September) and tried on a political charge, but escaped with Mr. W. O'Brien, M.P., to Cherbourg, when out on bail. He afterwards visited the United States, and in Feb. '91 surrendered himself, and was imprisoned in Ireland. Released from Galway gaol on July 30th, and delivered a speech, repudiating Mr. Parnell's leadership, at Mallow. Mr. Dillon is one of the most earnest of the Irish party, and his speeches, both in the House and out of it, always carry weight. Elected Chairman of the Irish party, in succession to Mr. Justin McCarthy, '96, '97 and '98; *m.* '95, Elizabeth, *d.* of Lord Justice Mathew, *g-n.* of Father Mathew, the apostle of Temperance. North Great George's Street, Dublin.

**Dimsdale**, Right Hon. Sir Joseph Cookfield, Bart., K.C.V.O. (C.), elected for City of London 1900; *b.* '49; *E.* Eton; Sheriff of London '93-4; a member of the L.C.C. until 1900; Lieutenant of the City of London; J.P. Essex; a Freemason who has been Past Grand Treasurer of the Freemasons of England; Hon. Treasurer of the City of London Conservative Association; Lord Mayor of London 1901-2; *m.* '73, Beatrice E. Bower, *d.* of R. H. Holdsworth, Esq., of Gloucester Gardens. P.C. '02. Goldsmiths, Langdon Hill, Essex, and 29, Sussex Square, Hyde Park. *Carlton, City Carlton, and Albemarle.*

\***Morley**, C. (L.), elected for Brecknockshire '95; s. of the late Mr. Samuel Morley, M.P.; b. '47; E. Trinity College, Camb. (M.A. '74); Hon. Secretary to the Royal College of Music; elected Chairman National Education Association '98; J.P. Berks and Somerset. Shockerwick House, Bath, and 46, Bryanston Square, W. *Reform, Athenæum, Brooks's, and Travellers'.*

\***Morley**, Right Hon. John (L.), elected for Montrose Burghs '96; b. at Blackburn '38; E. Cheltenham and Lincoln College, Oxford; called to the Bar, Lincoln's Inn, '73, but eventually took to literature rather than the law. For some time he edited the *Literary Gazette*, and from '67 to '83 he conducted the *Fortnightly*. He edited the *Pall Mall Gazette* '80-83, and *Macmillan's Magazine* '83-5. His literary career was then in part abandoned for politics. In '83 he was elected for Newcastle-on-Tyne, and when Mr. Gladstone propounded his Home Rule scheme he found in Mr. Morley, whom he made Chief Secretary for Ireland, one of his ablest and most enthusiastic supporters. He fought hard then and during the tenure of power by the Conservative Government, and in '92 he was

re-appointed Chief Secretary. His Irish administration ('92-5) was most successful; but at the General Election of '95 he was defeated at Newcastle, which seat he had held for 12 years. On the retirement of Mr. Shiress Will, he was, in Feb. '96, returned for the Montrose Burghs, and was thus enabled to resume his parliamentary career. He was one of the strongest opponents of the Government's action with regard to the Transvaal during '99. Mr. Morley's literary works include a number of books on the French philosophers of the eighteenth century, an essay on *Compromise*; *Lives of Cobden*, of Edmund Burke, of Walpole, and of Cromwell, and a Romanes lecture on Machiavelli '97; he is the writer of the authoritative *Life of Mr. Gladstone*, published in '03; Hon. LL.D. of Glasgow, Cambridge, McGill, and Toronto Universities; Hon. D.C.L. of Oxford; is Trustee of the British Museum, a Bencher of Lincoln's Inn, hon. Fellow of All Souls' College, Oxford; hon. Professor in the Royal Academy of Arts; and F.R.S.; P.C. On the eve of the General Election of 1900, Mr. Morley expressed his views of the political situation in a long written address to his constituents, and was re-elected in his absence by a majority of 1570. Appointed a member of the Order of Merit June 1902. He received from Mr. Carnegie the Acton Library in 1902, and gave it to Cambridge University. Member of Royal Commission on Historical MSS. Aug. 1904; visited Canada and the States in 1904. Flowermead, Wimbledon Park, S.W.

**Morpeth**, Viscount (L.U.), elected for Birmingham, South D., Feb. 26, '04; *e. s.* of the Earl of Carlisle and the Hon. Rosalind Stanley, *y. d.* of the 2nd Lord Stanley of Alderley; *b.* Mar. 8, '67; *E.* at Rugby and Balliol College, Oxford; *m.* '94, Rhoda, *d.* of Col. Paget W. L'Estrange, R.A.; elected '94 a Progressive member of the London School Board, and appointed chairman Works Committee; resigned to serve with his Militia Battalion in South Africa; contested unsuccessfully the Chester-le-Street D. of Durham '95, the Hexham D. of Northumberland 1900, and Gateshead 1904; J.P. co. Cumberland. Dacre, Penrith. *Brooks's*.

**Morrell**, G. H. (C.), has sat for Oxfordshire, Mid or Woodstock D., since '95; also represented same constit. '91-2; *e. s.* of the late Rev. G. K. Morrell, D.C.L.; *b.* '45; *E.* Rugby and Exeter College, Oxford, M.A., B.C.L.; called to the Bar, Inner Temple, '71; J.P., D.L., and County Alderman for Oxfordshire; High Sheriff '85; J.P. for Berkshire; Lieut.-Colonel and Hon. Colonel (V.D. '95) 1st Volunteer Battalion (University) Oxfordshire Light Infantry '79-98, when he retired. Headington Hill Hall, near Oxford, and Strealey House, on Thames, Berks. *Carlton, Junior Carlton, and New University*.

**Morrison**, James Archibald (C.), elected for Wilts (South D.) 1900; a Lieutenant in the Grenadier Guards, and at the time of his election was just invalided home from South Africa. Fonthill, Wilts.

**Morton**, Arthur Henry Aylmer (C.), elected for Deptford '97; *s.* of the late Mr. Edw. Morton, of Hyde Park Gate, S.W.; *b.* '36; *E.* Eton and King's Coll., Camb., of which College he was a Fellow and Senior Dean and Bursar; played in the Eton and Cambridge

cricket and football elevens; *m.* 1903 Evelyn, 3rd *d.* of Sir W. R. Wilson-Todd, Bart., M.P.; is a Governor of St. Olave's School, Greycoat Hospital, and Regent Street Polytechnic; was for some years member of the County Council, Vice-Chairman of the Housing of the Working Classes Committee, and a member of the Technical Education Board; Ecclesiastical Commissioner for England and Wales 1904; unsuccessfully contested East Leeds '92, and North Manchester '95. 80, Eaton Place, S.W. *Carlton, Athenæum, St. Stephen's, Ranelagh*.

**Moss**, S. (L.), has sat for Denbighshire, East D., since Sept. '97, being re-elected unopposed in 1900; *b.* '58; *E.* Oxford; for three years a classical master in the south of France; member of the Bar (Chester and North Wales Circuit), with chambers at Chester and in London; Assistant Boundary Commissioner '87; and formerly member of the Denbighshire C.C., and has been Vice-Chairman and Chairman; member of the Chester Town Council; author of "English Land Laws." 50, Hough Green, Chester, and 3, (North) King's Bench Walk, Temple. *National Liberal*.

## 2. Alphabetical List of Constituencies with number of Registered Electors 1904, and Pollings, 1900—1904

The following table shows the total number of registered electors, with other details, in the United Kingdom in 1904:—

	England and Wales.	Scotland.	Ireland.
Population 1901 . . . . .	32,527,843	4,472,103	4,458,775
Inhabited Houses 1901 . . . . .	6,260,852	926,914	858,158
<b>County Electors:</b>			
Owners . . . . .	496,069	57,332	9,227
Occupiers . . . . .	2,675,998	336,555	570,336
Lodgers . . . . .	43,418	8,747	3,127
Total County . . . . .	3,215,485	402,634	582,690
<b>Borough Electors:</b>			
Occupiers . . . . .	2,276,899	259,020	106,211
Lodgers . . . . .	107,181	12,302	2,099
Freemen, etc. . . . .	25,371	30,041	3,009
Total Borough . . . . .	2,409,451	301,363	111,319
University Electors . . . . .	18,234	20,823	4,703
Grand Total 1904 . . . . .	5,643,170	724,820	698,712
Total for United Kingdom . . . . .		7,066,702	

The following is an alphabetical list of the Parliamentary constituencies of the United Kingdom, with the names of the member or members returned by each, and, where there was a contest, the figures declared to have been polled by the candidates at the General Election of 1900, or at any bye-elections since that date up to Dec. 31st, 1904. The great majority of the old constituencies were by the last Redistribution Act split up into divisions each returning one member, and the names of these divisions are given in parentheses after the name of the county or borough; thus, the Luton or South Division of Bedfordshire appears as Beds (S. or Luton). Therefore, in seeking for the figures with regard to any special division of a county or borough, the county or borough should be turned to in its proper alphabetical place, and the local division will be readily found. The few places which, like the City of London, Leicester, etc., were not broken up into single-member divisions, and still return two members, are distinguished in the alphabetical list of constituencies by a figure thus (2). The figures in brackets, e.g. [5280], show the number of electors on the register revised according to the latest returns.

<b>Aberdeen (N.)</b> [10,340]. D. V. Pirie (L) - - - 4238 R. Williams (C) - - - 2251	<b>Argyllshire</b> [10,996]. D. Ninian Nicol (C) - - - 3834 J. S. ### 3. Political Parties of the United Kingdom, 1868 to 1904.

In the first years of the Parliament of 1868 only two parties were known to the House of Commons—(1) Conservatives, and (2) Liberals, the latter being subdivided into Whigs and Radicals. Irish members who were not Conservative were classed as Liberal, though they occasionally asserted their independence. The Home Rule movement was started in Dublin by the late Mr. Butt in '70, and soon gained considerable support. At the general election of '74, 56 Home Rulers were returned by Irish constituencies, and in '80 the number rose to 63. After the general election of '85 Mr. Parnell led a party numbering in all 86. In the spring of '86 Mr. Gladstone declared himself in favour of Irish Home Rule, and united his forces, or so many of them as he could carry with him in his new departure, with those of the Irish Nationalists led by Mr. Parnell. A considerable minority of Liberals, resenting Mr. Gladstone's action, declined to continue their support, and combined with the Conservatives to form that Unionist majority which succeeded in defeating the Home Rule Bill. An appeal to the country followed, and in Aug. '86 a new Parliament met, consisting of 85 (afterwards 86) Nationalists or Parnellites, 192 Gladstonians, 77 Liberal Unionists, and 316 Conservatives. The Conservatives then carried on the government of the country for six years. The Liberal Unionists, although cordially working with and supporting the Conservative Government, retained their independence, and formed themselves, indeed, into a separate party, with a separate organisation, separate leaders, and separate whips. The only Unionist to take office was Mr. Goschen, who, at the greatest crisis in the history of Lord Salisbury's Government, accepted the post (which Lord R. Churchill had resigned) of Chancellor of the Exchequer. Attempts were made to compose the difference between the Gladstonians and Unionists, notably at the famous Round Table Conference, but all failed. In opposition the relations between Mr. Gladstone and the Nationalists were, after he had accepted Home Rule, most cordial. The even course of events was however, naturally disturbed by the decree made in the Divorce Court proceedings instituted against Mr. Parnell. The result of the memorable discussions in "No. 15" was that 54 Nationalists revolted against his leadership, and 30 remained faithful to him as the exponent of a Home Rule scheme more advanced or complete than, according to his declarations, Mr. Gladstone was prepared to propose. Mr. Parnell died in '91, and Mr. John Redmond became the exponent of his policy and the leader of his following.

#### 1892 to 1895.

The General Election in '92 resulted in the return of 72 Nationalists, 9 Parnellites, 275 Gladstonian Liberals, 46 Liberal Unionists, and 268 Conservatives. From the point of view of party combination the Ministerialists found upon the whole little to complain of during the famous and protracted Home Rule Bill session of '93. Contrary to the expectation of some members of the Opposition, the Liberal and Nationalist alliance held together wonderfully well. In '94 Mr. Gladstone resigned, and Lord Rosebery

succeeded to the Premiership. Mr. Labouchere, however, and a number of Radicals acting with him, strongly objected to the appointment of a peer as Premier, and urged the claims of Sir William Harcourt to the position. The effect of their opposition, though not noticeable at the time, was seen later. On June 21st the Government were defeated on the ammunition question in committee on Army Estimates; and on the 22nd Lord Rosebery resigned, and Lord Salisbury formed an administration. His Cabinet, as ultimately constituted, consisted of no less than nineteen members, of whom fifteen were Conservative, including Mr. Goschen (who in '93 was announced to be a member of the Carlton) and four Unionists. The latter wing of the Coalition Party also received such a share of the minor appointments as caused no little heart-burning in many Conservative breasts. The dissolution of '95 which followed was notable for one thing, in that it marked the disappearance of Mr. Gladstone from Parliamentary life.

#### 1895 to 1899.

The General Election of '95 resulted in giving the Unionist coalition a majority of 152, the biggest majority of modern times, instead of a minority of 28. There were 340 Conservatives, 71 Liberal Unionists, 177 Liberals, 70 Nationalists and 12 Parnellites returned. The reverses of the general election left Lord Rosebery leader of the Liberal party, and leader of the Opposition in the House of Lords, Sir William Harcourt being leader of the Opposition in the Commons; and these positions they respectively continued to fill during the session of '96. Very little of note occurred in the House of Lords, but Sir William Harcourt led the Liberal Opposition in the Commons with especial brilliancy and success in the debates on the Education Bill and the Agricultural Rates Act. On Oct. 6th, '96, in the midst of the agitation arising out of the Armenian atrocities, Lord Rosebery resigned the leadership of the party. Political antagonism was allowed to fall into abeyance during the outburst of patriotic feeling evoked by the Diamond Jubilee in '97; and in '98 the criticism of the Government, which is supposed to be the prerogative, if not the duty, of the Opposition, was performed very largely by the Government's own supporters, notably in the press. The course of affairs, in China in particular, provoked the disapprobation of many Conservatives. Later in the year, however, the Government were somewhat rehabilitated by the firm stand which they made on the Fashoda question. In Dec. '98 Sir William Harcourt resigned the leadership of the Liberal party in the House of Commons, and Mr. Morley associated himself with him. Eventually Sir H. Campbell-Bannerman was chosen to succeed him, and led the party throughout the '99 session. Lord Kimberley led the Liberals in the House of Lords. Sir William Harcourt and Mr. Morley both took an active part in the work of the session; but in regard to foreign and imperial policy a distinct difference was to be noted between their attitude and that of the official Liberal party.

#### The General Election of 1900.

When the Boer War commenced in '99, the attitude of the main body of the Liberal

Opposition was one of criticism of the method of the negotiations of the Government with the Transvaal, but of hearty support of the measures deemed necessary by the Government for an effective and rapid prosecution of the war. There was always a section of the party, however, conspicuous amongst which were Mr. Labouchere, Sir Wilfrid Lawson, and Mr. Lloyd-George, which denounced the war "as a crime and a blunder committed at the instigation of irresponsible capitalists," protested against a constantly increasing expenditure on armaments, which made political reform and social improvement impossible, and recognised the supreme importance of a policy of peace. The views of this section were represented by the **League of Liberals against Aggression and Militarism**. In March 1900 the **Imperial Liberal Council** was formed "as an association of Liberals who are desirous of promoting the large and efficient development of the British Commonwealth on Liberal lines, both within and outside these Islands, and who accordingly, while adhering to the traditional principles of their party, and being in full sympathy with an advanced policy of social reform on broad and generous lines, are impressed with the duty of maintaining our free, unaggressive and tolerant Empire abroad." The **General Election of Oct. 1900** was hailed with delight by the Ministerialists, but the Opposition generally complained strongly of the course taken by the Government, urging that the election was forced on an exhausted register solely in order to exploit the patriotic fervour which then animated the whole nation. Mr. Balfour and Mr. Chamberlain, in their addresses to the electors, made the issue turn solely on the question of war, whether it had been just and inevitable or the reverse, and whether the Government's policy as to the settlement should be upheld. The result of the election was that in the English constituencies party losses and gains balanced each other; the Opposition gained 4 seats in Wales, and the Government won 7 seats in Scotland. The Government therefore made a net gain of 3 seats, the **Ministerialists** returned numbering 402, **Liberals** 186, and **Nationalists** 82, giving the Government a majority of 134, as against their majority of 152 in '95.

#### The Irish Party.

The long-divided **Irish Parliamentary Party** was reunited at a meeting held in Committee Room No. 16, on Jan. 30th, 1900, when a resolution declaring at an end the divisions in the party, and constituting the members one united party in accordance with the principles and under the constitution of the **Irish Parliamentary Party** from '85 to '90, was carried. Mr. John Redmond was afterwards elected Chairman, and in a manifesto to the Irish people declared that while Home Rule still stood first, the land question, the taxation of Ireland, and the University education question, pressed for settlement. During the year the growing power of the **United Irish League**, formed by Mr. W. O'Brien and Mr. Davitt, was made increasingly manifest, and at the General Election its organisation came into sharp conflict with the Healyite members of the party. The League candidates furnished an overwhelming majority of the members elected. The party as a whole were bitterly opposed to the Boer

War, and took every opportunity of attacking the Government's policy with regard to it.

#### Events of 1901 and 1902.

During 1901 the differences between the Liberal Imperialists and other Liberals became acute at times, though a general meeting of the party on July 9th, 1901, expressed confidence in Sir H. Campbell-Bannerman. The Imperial Liberal Council became the **Liberal Imperialist League**, and Lord Rosebery made his great **Chesterfield Speech** on Dec. 16th, 1901, outlining a policy of efficiency in regard to the Parliamentary and military machines, advocating legislation in regard to Education, the Housing Question, and Temperance Reform, and, with reference to the war, pronouncing for a receptive attitude as to overtures of peace, and as large and liberal an amnesty as possible when the Boers accepted the arbitrament of the sword and acknowledged that their independence was gone for ever. He said the Liberal party was now free from the Irish alliance, and must "clean its slate." The speech was received with very general approval, and Sir H. Campbell-Bannerman said, at St. James's Hall (Jan. 13th, 1902), that he could find no substantial difference between his own views and those expressed by Lord Rosebery, though he criticised the policy of the "clean slate." Lord Rosebery spoke again, at **Liverpool** (Feb. 14th), and referred to the "clean slate." He said he was not prepared at any time or under any circumstances to grant an independent Parliament in Dublin, but looked for the solution of the Irish question through "some scheme of Imperial federation which should allow of local subordinate legislatures." Sir H. Campbell-Bannerman, speaking at **Leicester** (Feb. 19th), referred to the advice Lord Rosebery had offered the Liberal party, and said he did not know whether Lord Rosebery spoke "from the interior of our political tabernacle or from some vantage-ground outside." He added that he did not think it was quite fair to him for that question not to be answered. He (Sir Henry) was no believer in the doctrine of the "clean slate," and he reaffirmed his belief in Home Rule. Lord Rosebery's reply to this was a letter to the *Times* (Feb. 21st), in which he said: "Speaking pontifically within his tabernacle, he (Sir Henry) anathematised my declarations on the 'clean slate' and Home Rule. It is obvious that our views on the war and its methods are not less discordant. I remain, therefore, outside his tabernacle, but not, I think, in solitude." The **Liberal League** was then formed (Feb. 26th) to promote the policy of the Chesterfield speech, and the **Liberal Imperialist League** thereupon dissolved, many of the members joining the Liberal League.

The chief event of 1902, so far as the Unionist party were concerned, was the resignation of Lord Salisbury on July 11th, after nearly 14 years' tenure of office as Premier, and the acceptance of the post of Prime Minister by Mr. A. J. Balfour on July 12th, after consultation with Mr. Chamberlain, who assured Mr. Balfour of his entire and cordial support. The bye-elections of the year showed some remarkable reductions in the Unionist vote—as, for instance, at North Leeds and Sevenoaks—and this was generally attributed to hostility to the Education Act. The Irish party showed signs of dissension during the year, and some of the members grouped themselves round Mr. Healy; while the Education Bill also led to differences of opinion.

\* The figures here show a Gladstonian majority of 42, but this had immediately before the General Election of '95 dwindled to 28.

† Including six Parnellite members for boroughs and six for counties.

§ The changes in the balance of parties since the General Election are as follow: The Unionists won Liberal seats at Devonport and N.E. Lanark in 1901, but both were recaptured by the Liberals in 1904. The Liberals gained seats at Bury, N. Leeds, Orkney and Shetland, Cambs. (Newmarket), Woolwich, Sussex (Rye), Argyllshire, St. Andrews Burghs, Ayr Burghs, Norwich, East Dorset, Mid-Herts, Shropshire (Oswestry). The Nationalists won a seat at Galway City, and one Nationalist became a Government supporter. Eleven former Government supporters were counted as Liberals in 1904. The Government majority, therefore, which was 134 after the 1900 General Election, was at the end of 1904 reduced to 86. At the time of going to press there are vacancies at North Dorset, North Kildare, Stalybridge, and Tower Hamlets (Mile End). See OCCURRENCES.

### The Fiscal Question.

The year 1903 (and, though not to the same extent, the year 1904) was completely overshadowed by the Fiscal issue, first publicly raised by Mr. Chamberlain in May. Under the heading FISCAL QUESTION (pp. 196—206) the attitude of the various political parties to the question is discussed at some length, and a list of the associations formed to promote or combat the proposals is given on p. 212. The Education and Licensing questions are dealt with in the articles on those subjects. One of the most notable events in 1904 was the announcement of the retirement of Sir W. Harcourt, followed later in the year by his death.

### Chief Liberal Organisations.

The chief Liberal organisations are:—

**Eighty Club**, 3, Hare Court, Temple, London, E.C. Formed in 1880 to promote Liberal Education and stimulate Liberal organisation. The members lecture on political subjects and speak at Liberal Associations and meetings throughout the country. Secretary, R. C. Hawkin.

**League of Liberals against Aggression and Militarism**, 8, Serjeant's Inn, E.C. Chairman, R. C. Lehmann; Secretary, A. M. Scott.

**League of Young Liberals**. President, L. Vernon Harcourt, M.P.; Hon. Secretary, Aubrey Rees, New Reform Club, Adelphi Terrace, W.C.

**Liberal Central Association**, 41, Parliament Street, Westminster.

**Liberal Labour League**. Has as its object the concentration of the forces of Progress and Democracy, the unity of Liberalism and Labour in electoral campaigns, the democratising of the Liberal party, the direct representation of Labour in all constituencies where Labour is a dominant factor, etc. Its organ is the *Liberal Labour Journal* (monthly 1d.). President, G. J. Holyoake; Chairman Executive Council, H. A. Sykes-Bickers; Hon. Secretary, A. L. Cox. Office, Jessel Chambers, 88, Chancery Lane, W.C.

**Liberal League**, The, formed in 1902 to promote the policy of Lord Rosebery's Chesterfield speech, acting on the lines of that policy, but co-operating cordially with the rest of the Liberal Opposition. President, Lord Rosebery; Vice-Presidents, Mr. Asquith, Sir Henry Fowler, and Sir Edward Grey; Secretary, Mr. W. Allard. Editor of Literature Department, Mr. Percy L. Parker. Office, 34, Victoria Street, Westminster.

**Liberal Publication Department**, The, has offices at 42, Parliament Street, S.W. Mr. Augustine Birrell, K.C., is the Chairman of the Department, and its organ is the *Liberal Magazine*, issued monthly. Pamphlets and leaflets on current politics are issued at frequent intervals.

**London Liberal Federation**, 41, Parliament Street, Westminster. Chairman, W. H. Dickinson, L.C.C.; Hon. Secretary, H. W. Carr-Gomm.

**National Liberal Federation (Home Counties Division)**, 42, Parliament Street, Westminster. Hon. Secretary, Noel Buxton; Secretary, W. M. Crook.

**National Liberal Federation**, The (for history see ed. '88). It consists of a union for national purposes of all the Liberal Associations throughout England and Wales. The *Liberal Central Association* is charged with the official care of the Parliamentary interests of the party,

while the Federation chiefly represents and expresses the outside opinions of the rank and file of the party. The headquarters of the Federation are at 42, Parliament Street, Westminster, S.W. President, Mr. Augustine Birrell, K.C.; Chairman of Committee, Mr. Edward Evans, jun.; Secretary, Mr. Robert A. Hudson; Assistant Secretary, Mr. Frank Barter.

**National Reform Union**, The, was formed in 1864 by members of the Committee of the Anti-Corn-Law League, who took up the question of Parliamentary Reform after the defeat of Protection. Its first Chairman was George Wilson, who had been Chairman of the League. Its declared objects are: (1) The dissemination of political knowledge and the furtherance of Liberal organisation, especially in the county constituencies; (2) The promotion and agitation of any leading question which an important section of the Liberal party may from time to time place before the nation, and in regard to which it may be thought desirable to move and instruct public opinion. It has 419 affiliated and subscribing branches, and sends out lecturers all over the country. The officers are: President, Hon. P. Stanhope, M.P.; Hon. Secretary, Mr. H. J. Ogden; Treasurer, Mr. George Rhodes. Chairman of Executive, Mr. R. Barlow; Secretary, Mr. A. G. Symonds, M.A.; and the offices are at 50, Haworth's Buildings, 5, Cross Street, Manchester, and at 8, Victoria Street, Westminster.

**Scottish Liberal Association**. President, Rt. Hon. Sir H. Campbell-Bannerman, G.C.B., M.P.; Hon. Treasurer, Captain Sinclair, M.P. Eastern Section: Secretary, A. D. Wood, 95, Princes Street, Edinburgh. Western Section: Secretary, William Webster, 7, West George Street, Glasgow.

**Scottish Women's Liberal Federation**, 3, Dundas Street, Glasgow. Secretary, Miss Alice Younger.

**Women's Liberal Federation**, 124, Victoria Street, S.W. Affiliated branches, 494; approximate aggregate membership, 67,600. President, The Countess of Aberdeen; Hon. Secretaries, Mrs. Broadley Reid and Lady Trevelyan; Hon. Treasurer, Mrs. Eva McLaren; Secretary, Miss Margaret Bunney.

**Women's National Liberal Association**, 138, Palace Chambers, Westminster, S.W. Chairman of Executive, Mrs. Bryce; Secretary, Miss G. Leake Griffin.

### Chief Unionist Organisations.

The chief Conservative organisations are:—**Association of Conservative Clubs**, St. Stephen's Chambers, S.W. Secretary, Hugh Bryan.

**Conservative Central Office**, St. Stephen's Chambers, Bridge Street, Westminster, S.W. Telephone 3163 Gerrard. Telegrams, "Conservative, London." Principal Agent, Captain L. de L. Wells, R.N.; Secretary, C. G. Hennings.

**National Conservative League**. Grand Secretary, F. H. Relton, 9, Broughton Road, Thornton Heath, Surrey.

**National Union of Conservative and Constitutional Associations**, England, St. Stephen's Chambers, S.W. President, Earl of Derby, K.G.; Chairman of Council, W. F. Lowe, M.P.; Secretary, A. E. Southall.

**National Union of Conservative Associations**, Scotland, 110A, George Street, Edinburgh. President, J. G. A. Baird, M.P.; Secretary, A. Douglas Farmer (acting).

**Primrose League.** A league founded in 1883, which supports three principles—the maintenance of Religion, the Estates of the Realm and the Imperial Ascendency of the British Empire. On the anniversary of Lord Beaconsfield's death every member wears a bunch of primroses. The members, who include both sexes, are styled **Knights, Dames, and Associates**, and their branches are called "**Habitations.**" **Chairman of Grand Council**, Mr. Gerald Loder, M.P. **President Ladies' Grand Council**, Miss Balfour. Members enrolled up to Oct. 1904 number, including Scotland, 1,686,387, divided among 2448 Habitations. **Vice-Chancellor**, Mr. George Lane-Fox; **Registrar**, F. Willis. **Head Offices**: 64, Victoria Street, S.W. **Official Organ**, *The Primrose League Gazette* (monthly), 3d.

The Liberal Unionists have a separate organization called the

**Liberal Unionist Association**, formed to resist the Home Rule policy adopted by Mr. Gladstone in 1886. The Association has upwards of 250 branches in England and Wales, besides those in Scotland and Ireland. For the purposes of consultation a representative body known as the **Liberal-Unionist Council** has been called into being, and consists of 120 members, the majority of whom are elected by the branch associations in all parts of the United Kingdom. **President of the Association**, the Duke of Devonshire, K.G. **Offices**, 6, Great George Street, Westminster, S.W. **Secretary**, John Boraston.

**Pastel Society, The.** This Society was founded in 1898 to revive public interest in the art of pastel painting, and includes among its members most of the well-known English and foreign pastellists. The annual exhibition, which is limited to the works of members, is held at the Royal Institute Galleries, Piccadilly. **Hon. Secretary**, Miss Marion Gemmell; **Acting Secretary**, Mr. Edgar Blackmore.

## PATENTS AND THE PATENT OFFICE.

Patents for the United Kingdom are issued by the **Comptroller-General of Patents** at the **Patent Office**, 25, Southampton Buildings, London, W.C.

The law relating to patents is embodied in the **Patents Acts** of 1883, 1885, 1886, 1888, 1901, and 1902. The procedure to be observed in applying for a patent is regulated by the **Patents Rules**. The Acts, Rules, and other official publications are on sale at the **Patent Office**, and can be obtained through the post. A circular containing a large amount of useful information can also be obtained free on application at the **Patent Office**. The **Official Journal**, published weekly, and containing illustrated abridgments of recently patented inventions, can be consulted at many public libraries. The **Library of the Patent Office**, which is free to all comers, and provides excellent facilities for readers, contains all the official publications, the specifications of all patents granted in the United Kingdom, and in the United States, France, Germany, and other foreign states, and an extensive collection of technological journals and textbooks, both British and foreign.

Patents are usually, though not necessarily, taken out through professional patent agents. A list of **Registered Patent Agents** may be obtained from Messrs. Eyre & Spottiswoode, or through any bookseller.

The official fees to be paid, before a patent

is sealed, amount to £5, of which £1 is paid on application, £3 on the filing of a complete specification, and £1 on sealing. A patent is granted for a term of fourteen years from the date of application, subject to the payment, before the end of the fourth and each succeeding year, of the prescribed renewal fees, all or any of which may be paid in advance. The renewal fees are £5 in respect of the fifth year, £6 in respect of the sixth year, and so on to £14 in respect of the fourteenth year, the total fees amounting to £100 for the fourteen years. Under exceptional circumstances the patent may be prolonged for a further period not exceeding fourteen years.

An application for a patent must be accompanied by either a provisional specification or a complete specification. If a provisional specification is filed in the first instance, a complete specification must be filed within a period of six months (formerly nine months) from the date of application. Patents may be obtained for inventions communicated from abroad. Inventions which have already been patented in certain foreign and colonial states, may be patented in the United Kingdom as of the date of the first foreign application, provided that the British application is made in company with a complete specification within twelve months from the date of the first foreign application. The complete specification, in this case, whether accepted or not, becomes open to public inspection on the expiry of the twelve months. By an **International Convention** similar rights are accorded in the same foreign and colonial states to British patentees. During 1903 Germany and Mexico acceded to this Convention.

Applications for patents and the accompanying specifications are examined in the **Patent Office**, to see that they comply with the **Patents Acts**. Amendment may be required. After acceptance, and before the patent is sealed, there is an interval, during which the patent is liable to outside opposition, on the ground that the invention has already been patented or on certain other grounds.

The **Patents Act, 1902**, amended the law relating to the examination of applications for patents, and also that relating to compulsory licences. **Sec. 1**, which by an order of the **Board of Trade** takes effect from Jan. 1st, 1905, provides for an official investigation in respect of each application for a patent, in connection with which a complete specification has been filed, as to whether the invention claimed has been wholly or in part claimed or described in any complete specification published before the date of the application, the investigation being limited to the specifications of British patents dating back not more than fifty years from the date of the application. The applicant is to be informed of the result of the investigation, and an opportunity given to him to amend his specification if necessary. Failing satisfactory amendment, the **Comptroller-General** may amend the specification by inserting references to prior specifications by way of notice to the public. This new procedure, though intended to secure to the applicant a valid patent and to prevent the re-patenting of old inventions, is not to be held in any way to guarantee the validity of any patent.

**Sec. 2** provides that a patent granted under **sect. 1** shall not be held to be invalidated by reason only of the publication of the invention

in a specification deposited pursuant to an application made more than fifty years before the date of the patent. Sect. 3, which has been in force since the passing of the Act, enables any person to petition the Board of Trade, alleging that the reasonable requirements of the public with respect to a patented invention have not been satisfied, and praying for the grant of a compulsory licence, or, in the alternative, for the revocation of the patent. If the parties do not come to an arrangement, the Board of Trade, if satisfied that a *prima-facie* case has been made out, are to refer the petition to the Judicial Committee of the Privy Council, which may either order the patentee to grant licences or revoke the patent, though no order of revocation is to be made before the expiration of three years from the date of the patent, or if the patentee gives satisfactory reasons for his default.

**Supplementary Patents Rules**, taking effect from Jan. 1st, 1905, have been issued. They include new rules as regards claims and as to what will be regarded as one invention, rules regulating the procedure under sect. 1 of the Patents Act of 1902, a rule prescribing an additional fee of £1 on the sealing of a patent, and some slightly modified rules as regards the preparation of specifications and drawings. An applicant is to be allowed two months to amend his specification, after being informed that his invention has been wholly or in part claimed in a previous specification; and, in the event of his failing to amend within that period, he may obtain a hearing before the Comptroller.

In the year 1903 there were 28,832 applications for patents; 22,198 provisional specifications, and 15,821 complete specifications, were filed; 15,718 patents were sealed. The receipts from patents fees were £223,504; the total receipts were £248,924; the surplus was £124,869.

**Patti, Madame Adelina Maria Juana.** was b. at Madrid in 1843. Was trained professionally under Ettore Barili, her step-brother, and made her first appearance on the stage at New York in '59. She first appeared in London in '61, as Amina in "La Sonnambula" at Covent Garden, and at once became the favourite *prima donna* of the day. In '70 she received from the Emperor of Russia the Order of Merit, and the appointment of First Singer at the Imperial Court. She married in '68 M. Roger de Cahuzac, Marquis de Caux, from whom she was divorced in '83; Signor Nicolini, who died in '98; and Baron Olaf Rudolph Cederström in Jan. '99. Madame Patti has undertaken several very successful tours abroad, in the Argentine Republic and in the States. In '95 she reappeared at Covent Garden after a ten years' absence. She rarely appears now except at concerts. Address: Craig-y-Nos Castle, Breconshire.

## PERSIA.

An independent Asiatic state lying between Turkey and Afghanistan, three times as large as France. The Shah of Persia is Muzaffer-ed-Din, K.G., Hon. G.C.M.G., a son of Nasr-ed-Din, the late Shah, and was b. March 25th, 1853. He was nominated by his father for the succession in spite of his being the second, and not the eldest son, the Shah having the power always to appoint his successor. He held the post of Governor-General of the Azerbaijan province, his elder brother, Zil-es-Sultan, being

Governor of Ispahan. On the death of his father by an assassin's hand, Muzaffer-ed-Din quietly succeeded to the throne (May 1st, '96), and was enthroned at Teheran (June 8th). He visited Germany and England in 1902, and afterwards went on to France and Russia. The heir apparent is his son Mohammed Ali Mirza, b. in '72. The Shah, officially called the "Shahinshah" or king of kings, is the autocrat of the realm, subject only to the precepts of the Mahometan religion, and carries on his government through a cabinet of responsible ministers.

The country is divided into 33 provinces under governors-general, generally called Hakim, who, with the Sheikhs-el-Islam, or chief judges of the cities, administer justice and superintend the collection of the revenue. The provinces are subdivided into districts, which are placed under lieut.-governors, and every town and village has its administrative officer. The chiefs of the nomad tribes exercise authority over them and collect the revenues from them. The nomads consist chiefly of Arabs, Turks, Kurds and Leks, and altogether number nearly 2,000,000. The army numbers about 105,000, of whom about one-fourth are kept in active service. The troops are very largely trained by Russian officers. The priests have great power in the country. Many colleges exist for instruction in religion, which is of the Shia sect, and in Persian literature. The chief cities are Teheran (pop. 250,000), Tabriz (180,000), Ispahan (80,000), Meshed, and Shiraz.

## The Persian Gulf.

The principal ports are Bunder Abbas, Lingah, and Bushire, on the Persian Gulf, and Enzeli, Meshed-i-Sar, and Bender-i-Gez on the Caspian. Belgian officials administer the Customs Department. The trade and shipping of the Persian Gulf ports are very largely in British hands. Lord Curzon, Viceroy of India, made a tour in the Gulf in 1903, and received a deputation of the British Indian traders at Bandar Abbas. He assured them that British influence must and would remain supreme in the Gulf. The chief products of the country are silk, cotton, fruits, gums, opium, carpets, and tobacco. Dried fruits are exported in large quantities as food for the Russian peasants, and Russian money is being used to stimulate the culture of cotton. Wool is exported to Bombay and Baghdad. There are considerable mineral deposits, but they are very little worked.

## Khorasan and Seistan.

The Persian provinces of Khorasan and Seistan lie on the western border of Afghanistan, and of late years Russian influence has been actively at work in them, mainly through commercial agents. A branch of the Transcaspian Railway is proposed, to run from Ashkhabad to Meshed. The river Halmand forms part of the boundary between Seistan and Afghanistan, or rather between Persian Seistan and Afghan Seistan, and as the river is constantly shifting its bed disputes have arisen, and in 1902 a British Commission was appointed to investigate the matter. The work was commenced under Col. McMahon in 1903. A direct trade route from Quetta to Seistan has been opened up by the Indian Government, running along the Baluch side of the Afghan border, but the experiment has not been attended with considerable success.

**Statistics, Finance, and Trade.**

Area, 628,000 sq. m.; pop. about 9,000,000. Revenue, 1900, about £1,500,000. The Government obtained from the (British) Imperial Bank of Persia in '92 a loan of £500,000, repayable in eighty half-yearly instalments, but arrangements were made in 1900 to repay this in favour of a Russian loan. The Persian Loan Bank, most of the shares of which are held by the Russian State Bank, by Imperial command, undertook to advance a 5-per-cent. loan of 22,500,000 roubles guaranteed by all the Customs duties of Persia except those of Farsistan and the ports of the Persian Gulf. It was stipulated that Persia should pay off all other and previous pecuniary obligations, that is, the £500,000 7-per-cent. Anglo-Persian loan of '92, and this was shortly afterwards done. In April 1902 another 4 per cent. gold loan of 10,000,000 roubles, to be redeemed within a period of 75 years, was advanced, with the approval of the Russian Government, by the Discount and Loan Bank of Persia, which received from the Persian Government a concession for the construction and control of a road from the Caucasian frontier to Kazvin, *via* Tabriz. Besides her financial and commercial holds upon the country, Russia has an overwhelming influence through her advantageous position along the northern boundary of the country, her control of the Persian troops, who are mainly under Russian officers, and her political agents throughout the country. The imports and exports of 1900 were estimated to amount to about £8,600,000. About 56 per cent. of this was trade with Russia, and 24 per cent. with Great Britain. The imports only were £4,256,000 in 1900-1, and £5,584,000 in 1901-2, of which Great Britain sent about 38 per cent. and Russia about 41 per cent. The exports in 1901-2 were £2,800,000. In 1902-3 the imports were £5,000,000 and the exports £3,300,000. For the year ended March 20th, 1904, the imports were £7,000,000 and the exports £4,633,000. Total trade, £11,633,000. Of this total the trade with Russia amounted to £6,186,000, imports being £3,359,000 and exports £2,827,000. British trade amounted to £2,718,000, imports £2,334,000 and exports £384,000. The trade with other countries was: Turkey, £840,000; France, £746,000; Austria-Hungary, £220,000; Afghanistan, £186,000; Italy, £146,000; United States, £128,000; Germany, £111,000; other countries, £352,000.

In Feb. 1903 a Commercial Agreement with Russia was concluded, and although the most-favoured-nation treatment was expressly reserved for those countries then enjoying it, as Great Britain was under the '57 Commercial Treaty, there were strong complaints that Russian trade was given substantial advantages by the new tariff set up, and British trade penalised. A Commercial Convention with Great Britain was ratified in May 1903, continuing the most-favoured-nation treatment, and setting out a new tariff in detail. See also **Persian Roads and Railways under ENGINEERING.**

**Diplomatic.**

**Ministry:** *Prime Minister*, H.R.H. Ain-ed-Dowleh.—*War*, H.H. Amir Khan Sardar.—*Foreign Affairs*, H.E. Mushir-ed-Dowleh.—*Interior*, H.I.H. Ain-ed-Dowleh.—*Finance*, H.E. Vazir-Daftar.—*Mines*, H.E. Mohandes-

ul-Mamalik.—*Instruction and Telegraphs*, H.E. Moukhber-al-Dowleh.—*Postal*, H.E. Monsieur Naus, who is also Director of Customs.—*Minister of Press*, H.E. Nadim-es-Sultan.

Persian Legation in London, Cornwall House, Cornwall Gardens, S.W.—*Envoy in London*, General Mirza Mohamed Ali Khan.

British Minister Plenipotentiary and Consul-General at Teheran, Sir Arthur H. Hardinge, K.C.M.G., K.C.B. Secretary, E. M. Grant Duff.

Political Resident for the Persian Gulf, Lieut.-Col. C. A. Kemball, C.I.E., Bushire.

British Consuls:—*Consuls-General*: Major P. Z. Cox, C.I.E. (Bushire); J. R. Preece, C.M.G. (Ispahan); Lieut.-Col. C. F. Minchin, D.S.O. (Meshed); A. C. Wratistlaw, C.M.G. (Tabriz). *Consuls*: Major P. M. Sykes, C.M.G. (Kerman); Major R. A. Benn (Seistan); T. G. Graham (Shiraz); Captain C. B. Winter (Turbat-i-Haidari).

**PERU.**

A republic on the W. coast of S. America. The disastrous war with Chile, which broke out in 1875, and resulted in the cession to Chile of Tarapaca (absolutely) and of Arica and Tacna (provisionally), completely shattered the power of Peru. It was agreed that Arica and Tacna should be subject to Chile for ten years from '84, and that a plebiscite should then decide whether or no they should revert to Peru; but that plebiscite has never taken place, partly because of revolutionary outbreaks in Peru; and now Chile has consolidated her position in the two provinces there. An arbitration treaty as to the Bolivian boundary was signed (Jan. 2nd, 1903), appointing the Argentine Government as arbitrator. A dispute with Brazil arose respecting the Acre territory in 1904, and the situation looked threatening for a time, but eventually it was agreed to settle the matter by amicable negotiation or arbitration. For details see BRAZIL and map, pp. 50 and 51.

The Constitution of '56, revised in '60, is modelled on that of the United States, the legislative power being vested in a House of Representatives (108) elected by the provinces, one member for every 30,000 inhabitants, and a Senate (48) elected by the 18 departments and the province of Callao. One-third of the members of both Houses retire every two years. Congress meets annually on July 28th. Executive in the hands of a President elected for four years.

Absolute political but not religious freedom allowed, the constitution prohibiting the public exercise of any but the Roman Catholic religion, although some degree of toleration exists. Education is nominally compulsory and free in the elementary schools, but is badly neglected. More than half the population are Indians, the rest including those of Spanish descent and mixed races. Army about 3000 strong in time of peace, and a small navy of 4 vessels. There are vast stretches of rich agricultural and pastoral lands, besides profitable mining fields and immense forests. The climate is very good, and the country is admirably suited for European immigrants. There are about 1050 miles of railways belonging to the State, but ceded to the bondholders in '90 for a term of 66 years. Chief products are silver, copper, gold, sugar, wool, cotton, coffee and guano. In the comparative freedom

from internal dissensions since '99 a decided improvement in commercial, mining, and railway development has been noticeable. The mineral output in 1901 was valued at £4,472,000, of which nearly half was copper. The chief cities are the capital, Lima (pop. 100,000), Arequipa (35,000), Cuzco (20,000), and Callao (16,000).

**Area**, 713,674 sq. m.; **pop.** estimated at 3,500,000. **Revenue** (mainly derived from customs), 1904, £2,107,894; **expenditure**, £2,191,703. **Imports**, 1902, £3,428,283; 1903, £3,783,380; **exports**, 1902, £3,703,971; 1903, £3,857,753. **Internal debt**, £3,500,000. See also BOLIVIA.

**President**, Señor Don José Pardo (assumed office Sept. 24th, 1904).

**Vice-President**, Señor José S. Caverio.

**Ministry: Premier and Minister for Finance**, Señor Auguste B. Leguía.—*Foreign Affairs*, Señor Javier Prado y Ugarteche.—*Interior*, Señor Eulogio Romero.—*War and Marine*, Colonel Pedro E. Muñiz.—*Public Works*, Señor José Balta.—*Justice*, Señor J. Polar.

**Minister in London**, Señor Don Carlos G. Candamo, 104, Victoria Street, S.W.—*Charge d'Affaires*, Señor Don Eduardo Lembecke.—*Secretary*, Dr. Alberto Rey de Castro.—*Attachés*, Dr. P. E. Caballero, R. E. Lembecke.

**British Minister in Lima**, Mr. W. N. Beauchlerk.

**British Consul-General in Callao**, Mr. Alfred St. John, C.M.G.; **Consul at Iquitos**, D. Cazes.

**Phillips, Stephen**, is a son of the Rev. Stephen Phillips, D.D., Precentor of Peterborough Cathedral, and was b. near Oxford, ed. at Stratford and Peterborough Grammar Schools, and afterwards went on the stage, playing in Benson's company. He then became an Army tutor, and after a time devoted himself to literature. His publications include "Christ in Hades," "Poems" (crowned by the *Academy*), "Paolo and Francesca," "Herod," and "Ulysses," the last three of which have been produced with great success upon the stage, and "The Sin of David." Address: Woodthorpe Road, Ashford, Middlesex.

### PHOTOGRAPHY, 1904.

In reviewing what was done by photographers during 1904 it is impossible not to recognise that, in addition to the distinct technical progress achieved, the public have shown a keener and more intelligent interest both in its scientific attainments and applications and in its artistic aspirations. Early in the year the various photographic exhibits brought together by invitation, to the number of nearly a thousand, were despatched to the **International Exhibition at St. Louis, U.S.A.**, where it was generally admitted that, in point of size and interest, the British collection far surpassed the photographic section of any other country. This was, no doubt, largely due to the well-known enthusiasm of Sir Benjamin Stone, M.P., who was a member of the Royal Commission for St. Louis, with whom, as Chairman of the Photographic Committee, was associated Sir W. de W. Abney, K.C.B., F.R.S. The invitation of photographic exhibits in the Pictorial or Artistic Section was entrusted to Messrs. G. Davison, Reginald Craigie, and A. Horsley Hinton, the last-named being sent to St. Louis to superintend personally the hanging and arranging of the works. The technical and scientific photographs were

brought together by Sir W. Abney himself, with the assistance of Mr. A. W. W. Bartlett (Secretary of the Royal Photographic Society), Sir Benjamin Stone contributing some 300 of his own unique photographs of obsolete or rapidly disappearing customs and festivals.

The increase in the number of photographic societies and exhibitions throughout the country was associated with a steadily increasing demand for the ordinary materials and appliances required for photographic practice. Many of the principal manufacturers have had to considerably increase their premises and plant. This increased consumption of plates, printing papers and kindred materials is chiefly amongst those amateurs who with more or less success are striving to employ photography as a means of personal artistic expression; and pictorial photography, as practised by the average amateur, has become the most distinguishing character of photography generally.

### Photography in Colours.

With this modern development of amateur work must be coupled, as characterising photographic activity during 1904, the almost feverish endeavour to realise the **dream of photography in colour**. Despite the many interesting processes of producing photographic representations in colours approximating to those of nature, and the trichromatic or three-colour superposition methods, a process whereby the original object is automatically produced in colours still remains to be discovered. In an admirable review of the present position of photography, which appears in the "Photographic Almanack," Mr. Thomas Bedding says: "I am frequently told that the one thing needed to give the trade a fillip is the discovery of colour photography. Precisely what is meant by colour photography in this particular connection is not always clearly understood by those who desiderate it. There is at present little hope that the one really true system of colour photography—the **Lippmann process**—is capable of such simplification that it will respond to the requirements of the average photographer, to whom also trichromatics, whether on glass or paper, present greater difficulties than he is qualified to surmount. There are one or two interesting processes by Messrs. Lumière, Dr. Koenig, and others, about to be introduced to the public; but I do not seek to prejudice them in saying that they hardly rise to the aspirations of those who yearn for some easily worked system of colour photography which shall effect such a remunerative revolution in photographic procedure as the gelatine plate or celluloid film." This is a fair and dispassionate view of the situation:

### Photography and the Press.

The great daily newspapers, and a host of provincial weekly papers, now devote a regular column to photographic news and practical hints, written by experts. In addition there is an abundant supply of literature for the student. The weekly and monthly periodicals are on the increase. Of the former class there are now five published in Great Britain—the *Amateur Photographer*, the *British Journal of Photography*, the *Photographic News*, *Photography*, and *Focus*; the monthly magazines are the *Photogram*, the *Practical Photographer*, *Camera Notes*, and the *Photographic Dealer*, the

*Photographic Trades Gazette* being published quarterly. The Royal Photographic Society, the Yorkshire Union of Photographic Societies, the Northumberland and Durham Federation, and the Scottish Federation, each provide lectures illustrated by lantern slides for loan amongst the societies respectively included in these organisations. Various manufacturing firms have also in circulation illustrated lectures of a similar kind.

#### **Exhibitions in 1904.**

The organisers of the two chief London photographic exhibitions each report that their undertakings have proved entirely satisfactory. The **Royal Photographic Society's Exhibition** was held in the New Gallery during October, and the **Photographic Salon** from Sept. 15th to Nov. 5th in the Dudley Gallery. Early in the spring the second of the series of **Northern Photographic Exhibitions**, which it was arranged should be held in rotation by the Manchester Amateur Photographic Society, the Liverpool Amateur Photographic Association, and the Leeds Camera Club, was held in the Walker Art Gallery, Liverpool, the Corporation of that city giving its practical support. The **Cartwright Memorial Exhibition** at Bradford, which was opened in May by the Prince and Princess of Wales, and continued until the end of October, included a notable collection of modern pictorial photographs brought together by the invitation of Mr. Alexander Keighley, supported by an international committee. The federation of Photographic Societies in Scotland were also successful in holding their first **Scottish Photographic Salon**.

There seems some indication that a better appreciation of the desirability of proper technical teaching is not far off. The London County Council still maintain their school for instruction in photomechanical processes or photographic engraving. Photography is also now included in the curriculum of the Leeds Technical Schools, and systematic courses of lectures and practice evenings are arranged for at some of the institutions supported by such corporations as the Goldsmiths' Co., the Cripple-gate Foundation, the Borough Polytechnic, at all of which, as well as at the Y.M.C.A. School of Photography at the Polytechnic in Regent Street, London, it is clearly demonstrated that such instruction is required. The **Camera Club**, Charing Cross Road, London, continues to form an important centre of photographic activity.

#### **Discoveries and Improvements.**

In the realm of scientific discovery and invention no very sensational event marked the year. Radium, the connection of which with photography is not very intimate, was brought prominently before many photographic audiences, whilst certain improvements in the construction of photographic lenses were made, the purpose of which was to facilitate the making of very rapid exposures. The multiplication of different brands of sensitive plates and printing papers continued even more vigorously than ever, the competition between contemporary manufacturers resulting in the production of a high quality never before attained. The increased use of both roll and flat films for negative making has in no way diminished the use of glass plates; and in both films and plates public recognition of the

advantage of orthochromatic methods has become more general. Nearly all the plate-makers now include in their series of plates one or more brands of orthochromatic character, and an increase in sensitiveness or speed has to a great extent removed the objection to the use of coloured screens or light filters; and as a consequence a general improvement in the rendering of relative colour values has become noticeable in all large collections of photographs.

#### **Printing Processes.**

With regard to printing processes, the use of excessively glossy surfaces seems to be rather on the decrease. Amongst a certain section of pictorial workers, the **Gum Bichromate process** is increasingly favoured. Several successive printings, either in the same or in different colours, have led to strikingly suggestive results, which seem to hint at the wider possibilities of such a procedure. A process of photographic printing in oil colours was demonstrated at the Camera Club by Mr. G. E. H. Rawlins, and immediately found enthusiastic devotees. The principle involved is that which is familiar to all collotype workers, oil paint or lithographers' ink being first applied to a gelatine surface previously sensitised and exposed under a negative, the surplus colour being then removed by rolling or brushing. Another process for printing in pigment, which is equally under personal control, was introduced in December by the Autotype Co. under the name of **Auto-Pastel**, and is somewhat allied to the gum-bichromate process, except that the whole of the pigmented film exposed to light action is thereby rendered insoluble, development being performed by very delicate abrasion, and is therefore entirely at the disposal of the operator. Such processes as these indicate a growing tendency to aid the artistically inclined to wield a semi-mechanical process in such a manner that the product may be a personal expression of an individual impression.

So far as the condition of the photographic trades can be gauged from external evidence, the general commercial depression would seem to have affected it less than many allied businesses. Combinations of British firms have been productive of mutual strength to meet foreign competition, whilst the remarkable increase in the registration of patents during recent years has been consistently maintained. Everything goes to show that photography, from whatever aspect viewed, is at the end of 1904 more firmly established, more universally employed and valued, and more certain of future advance and expansion, than at any previous time.

**Phrenological Society, British**, founded 1886, incorporated '99, has for its objects the scientific study of phrenology, including the anatomy and physiology of the brain and skull, the consideration of phrenology as a system of mental and moral philosophy, and the practical application of phrenology to the analysis of the mind and the delineation of individual character. It holds examinations and grants certificates. **Hon. Sec., Mr. F. R. Warren.** Office, 63, Chancery Lane, W.C.

**Pinero, Arthur Wing**, dramatic author, was b. in London in 1855. Commencing a legal career, he afterwards became connected with the stage, and acted at the Lyceum and Haymarket Theatres. Devoting himself to play-

writing he produced his first piece, which was entitled "Two can Play at that Game," at the Lyceum. Other plays from his pen include "£200 a Year" ('77), "The Money Spinner" ('80), "The Squire" ('81), "Lords and Commons," "The Rocket" ('83), "The Magistrate" ('85), "Sweet Lavender," "The Profligate," "In Chancery," "Lady Bountiful," "The Times," "The Second Mrs. Tanqueray" ('93), "The Notorious Mrs. Ebbsmith" and "The Benefit of the Doubt," both produced in '95, "The Princess and the Butterfly," at St. James's Theatre, March '97, "Trelawny of the Wells," Court Theatre, Jan. '98, "The Gay Lord Quex," Globe Theatre, April 8th, '99, "Iris," Garrick Theatre, Sept. 21st, 1901, "Letty," Duke of York's Theatre, Oct. 8th, 1903, and "A Wife without a Smile," Wyndham's Theatre, Oct. 12th, 1904. He also collaborated with Sir Arthur Sullivan and Mr. Comyns Carr in "The Beauty Stone," a romantic musical drama produced at the Savoy Theatre in May '98. Address: 14, Hanover Square, W.

**Pius X.** His Holiness **Pius X.**, the 258th Roman Pontiff, succeeded to the Pontificate on Aug. 4th, 1903. His name is Giuseppe (*Anglicè* Joseph) Sarto, and he was born June 2nd, 1835, at Riese, in the diocese of Treviso, his father being a minor municipal official. His relatives are still shopkeepers and people of humble position. He was educated at Castelfranco and the diocesan seminary of Padua, and ordained priest Sept. 18th, 1858. He officiated nine years as curate at Tombolo, nine years as parish priest of Salzano; and in recognition of his services was made Canon and Chancellor of the diocese of Treviso in '75, the Bishop also appointing him spiritual director and religious instructor in the diocesan seminary. In '84 he was appointed Bishop of Mantua, and his conspicuous ability attracted the attention of Leo XIII., who made him a Cardinal and Patriarch of Venice in 1893. His charity and tact in the discharge of the duties of his high position brought him unbounded popularity, and he was more than once instrumental in settling serious strikes and labour disputes. When the foundation stone of the new Campanile was laid in April 1903 he performed the ceremony of benediction, and made special reference in his speech on the occasion to the historic glories of the House of Savoy. He also came into direct personal contact with the King and Queen of Italy while he was Cardinal, but he is credited with an inflexible resolve to maintain the rights and liberty of the Church. On the death of Leo XIII., July 20th, 1903, the Conclave met July 31st, and on Aug. 4th, at the seventh scrutiny, after a session of less than three days, elected Cardinal Sarto as Pope, and he chose to be known as Pope Pius X. His career, it will be seen, has been spent in the pastoral and episcopal service of the Church rather than in the paths of diplomatic and official service. He is described as possessing a fine physique, and being a man of personal fascination and splendid presence. He has always shown deep interest in social questions and the betterment of the life of the poor. His charity at Venice was proverbial, and "more than once," according to the *Dublin Review*, "the episcopal ring of the chief pastor of Venice was in pawn, in order that the cry of the indigent poor should not be left unheeded." It is said that the average annual expenses of the Vatican are about £286,400. Cf

this sum £20,000 are at the Pope's disposal, £28,000 go to the cardinals, £18,400 to poor bishops, £72,000 for administration of apostolic palaces, £40,000 for diplomatic expenses, £60,000 for employes, £48,000 for schools and charities.

**Plumer, Major-Gen. H. C. O., C.B.**, Third Military Member of the Army Council and Quartermaster-General to the Forces, entered the York and Lancaster Regiment '76, and attained his majority '93. He served in the Soudan in '84 and in South Africa '96, when he raised and commanded a force of mounted rifles in the Matabele rebellion. In '99 he went to Rhodesia to organise a force to protect the southern frontier, and after the relief of Mafeking he commanded a column, and took part in the operations against De Wet. For his services he was promoted Major-General, and in 1903 was appointed to the command of the 10th Division and 10th Brigade, Fourth Army Corps. He was given his present appointment on Feb. 12th, 1904.

**Pobiedonostzeff, Constantine**, Procurator of the Holy Synod of Russia, was b. at Moscow, 1827. He was Professor of Civil Law at Moscow, '59 to '65, and tutor to the Czar Alexander III. In '68 he was created a senator, and in '72 elected a member of the Imperial Council, and after the accession of Alexander III. in '81, he was appointed to the office he now holds. His influence with his Imperial master then increased, and with the late M. Katkoff he became his most intimate adviser. Opposed to all liberal reforms, he endeavoured to strengthen the influence of Greek orthodoxy on the Russian policy. In '68 he published "Cours de Droit Civile," and a manual of Civil Procedure. He has also translated "De Imitatione Christi" from the Latin of Thomas à Kempis. A volume of essays from his pen, translated into French, German, and English, and entitled "Reflections of a Russian Statesman," was published in England in '98. The general thesis of these essays is that since men want to be governed autocracy is the only really suitable form of government. Among the most fallacious of political principles is, he holds, that of the sovereignty of the people, out of it springing Parliamentary government, which he contends is the highest expression of egoism. See RUSSIA.

**Poet Laureate.** An office in the household of the sovereigns of Great Britain, the appellation having its origin in a custom of the English Universities, which continued to 1512, of presenting a laurel leaf to graduates in rhetoric and versification, the king's "laureate" being a graduated rhetorician in the service of the king. The first appointment of a poet laureate dates from the reign of Edward IV., the first patent being granted in 1630. It was formerly the duty of the poet laureate to write an ode on the birthday of the monarch, but this custom has been discontinued since the reign of George III. Amongst those who have held this office may be mentioned Dryden, Southey, Wordsworth, and Tennyson. Mr. Alfred Austin (*q.v.*) is the present holder of the office.

**Political Parties.** The article on parties in the United Kingdom will be found under PARLIAMENT p. 542. In the case of the chief foreign countries, particulars of the leading political parties will be found in the articles on those countries given under their proper alphabetical headings.

**Polytechnic, Regent Street.** With the view of further developing the movement on behalf of young men to whom the late Mr. Quintin Hogg had shown such generosity, he purchased in '80 the old **Polytechnic**, in Regent Street, for £50,000, and converted it into a great technical and recreative school. The curriculum embraces over 500 classes weekly in upwards of 80 different subjects, including carpentering, plumbing, metal work, engineering, pottery work, photography, furniture, decorative art, electricity, etc. A **Young Women's Institute** has also been founded in premises adjoining the Polytechnic, and promises to be as successful as the latter. The Marlborough Rooms, acquired in '92, have been converted into one of the most commodious schools of art in London. Mr. J. E. K. Studd is Vice-President, Mr. R. Mitchell Director of Education, and the Secretary is Mr. Leonard H. Harris. Continental tours are also a feature of the Institute, over 6000 persons making use of them every year. They include cruises to Norway, visits to the Polytechnic chalets in Switzerland, where a considerable freehold has been purchased, and trips all over the Continent, Baltic, Madeira, etc.

### PORTUGAL.

Portugal is a kingdom in the Peninsula in S.W. Europe, under Carlos I. of the House of Braganza. Area (including the Azores and Madeira, which are regarded as an integral part of the kingdom), 35,490 sq. m.; pop. about 5,423,132.

The Azores, a group of islands in the North Atlantic; area, 922 sq. m.; pop. 256,291. Capital, Ponta Delgada, on San Miguel Island; but the Governor usually resides at Angra, in the island of Terceira. They are governed as a province of Portugal.

The Madeira Islands lie off the N.W. African coast. Area, 314 sq. m.; pop. 150,574. Capital and port, Funchal, a fine town of 20,000 inhabitants.

### Legislature, etc.

The Constitution of 1826 (amended in '52, '85, and '95) gives a special moderating power to the king. There are two legislative chambers, the Peers and the Deputies, collectively called the **Cortes**. In case of a disagreement between the two legislative chambers, a committee of both decides, and if the committee disagree, the king decides. The Chamber of Peers consists of 90 members nominated for life, in addition to the princes of the blood and the twelve bishops of the continental dioceses. The nominated peers may be selected without limitation as to class, but certain restrictions and disqualifications are imposed. The second Chamber, is composed of members elected under a system of universal suffrage every four years, to the number of 155, of whom 7 are elected by Portuguese colonies. The king has no veto on a law that has been twice passed by both houses.

### The Army and Navy.

The army was reorganised on Oct. 1st, '99. The peace footing is 62,427, including 33,420 militia. The infantry of the line are 18,000, the cavalry 3032, the dragoons 1804, the light troops 1212, the field artillery 3375, and the horse artillery 479. The total number of guns

is 448. The war footing is 100,264, including 52,675 militia.

By a new law introduced in Sept. '95, the service is three years with the colours, five with the first reserve and four with the second. There is in addition a colonial army of 9000. The rules of exemption are most liberal, a sum of money paid to the Government being accepted as an equivalent. There are 4 military districts—Lisbon, Vizeu, Oporto, and Evora, with garrisons at the Azores and Madeira. The forces are disposed thus: 4 divisions of the active army; cavalry, artillery, and engineers, independent of the divisions, the garrison of Madeira and the Azores, and the troops of the reserve.

The number of men in the navy is about 5000, and, in addition, there are 2 vice-admirals, 5 rear-admirals, 16 captains, 25 commanders, 25 lieutenant-commanders, 80 lieutenants, 110 sub-lieutenants, 37 midshipmen, and 96 cadets. The age for retirement of a vice-admiral is 70 years, rear-admiral 66 years, and other officers 64 years. The strength in ships built and building on Nov. 30th was:—

Built.	
Battleship . . . . .	1
Unprotected cruisers . . . . .	7
Torpedo vessels . . . . .	16
Torpedo boats . . . . .	11

### Projected.

Coast defence vessels . . . . . 2  
These two vessels are to be of 2500 tons displacement, and will steam 15 knots. There are four small docks at Lisbon.

### Religion, Education, etc.

For the administration of justice there are courts of first instance in all the chief towns, appeal courts at Lisbon, Oporto, and Ponta Delgada in the Azores, and a Supreme Court at Lisbon. The State religion is Roman Catholic, but all others are tolerated. Education, though nominally compulsory, is in a very backward state. The capital, Lisbon, has a pop. of 357,000; and Oporto has a pop. of 172,421. Three-fifths of the people are engaged in agriculture, and about one-fifth in industrial occupations. Chief exports: wine, cork, cattle, sardines, fruit, and copper. There are valuable minerals, but they are very little worked. There are 1477 miles of railway, of which 531 belong to the State.

### Statistics and Diplomatic.

Revenue (estimated), 1902-3, £12,203,000; expenditure, £12,415,000; imports, 1902, £12,019,532; exports, £7,350,936. Public debt, 1901, £175,723,502.

Ministry: *Premier*, Senhor Luciano Castro.—*Interior*, Senhor Pereira Miranda.—*Finance*, Senhor Espregueira.—*Foreign Affairs*, Senhor Villaca.—*Justice*, Senhor Alpoim.—*Marine*, Senhor Moreira, jun.—*War*, General Sebastiao Telles.—*Public Works*, Senhor Eduardo Coelho. *British Minister* at Lisbon, Sir Martin le Marchand Hadsley Gosselin, G. C. V. O., K. C. M. G., C. B.—*First Secretary*, Fairfax L. Cartwright, M. V. O.—*Second Secretary*, Arthur R. Peel.—*Military Attaché*, Col. Hon. Stuart Wortley.—*Commercial Attaché*, Herbert B. Harrison.

*British Consuls*: F. H. Cowper, I. S. O. (Lisbon), J. B. Spence (Madeira), R. A. Becker (Marmagoa), H. Grant (Oporto), W. Read (St. Michael's).

Minister in London, Marquis de Soveral, 12, Gloucester Place, W.—*First Secretary*, J. da Camara Manoel.—*Second Secretary*, E. Moreira Marques.

### **Sovereign.**

**Carlos I., King of Portugal**, is the son of King Louis I., and was b. Sept. 28th, 1863. Prior to his accession to the throne he was known as the Duke of Braganza. In May '86 he married Marie Amélie, daughter of the Comte de Paris. He succeeded his father as King of Portugal Oct. 19th, '89. The heir to the throne is Luiz Philippe, Duke of Braganza, born March 21st, '87, who was in 1902 made a Knight of the Garter by King Edward VII. During the financial difficulties of '92 the King and the royal family renounced 20 per cent. of the endowments paid them by the nation, a sacrifice of £23,000 a year. His Majesty visited King Edward VII. at Windsor in Nov. 1902, and afterwards visited the Duke of Marlborough, Lord Amherst, and others.

### **History, 1904.**

A Cabinet crisis arose (Oct. 17th) on the refusal of the King to adjourn Parliament, as the Premier wished, in order that the Government might consider the question of sending an expedition to Portuguese South Africa to punish the natives for a rising there, which had resulted in considerable loss of life to a Portuguese force. The Cabinet resigned, and **Senhor Castro** became Premier, and formed an Administration (19th). A treaty with China was signed (Nov. 11th) on the lines of those concluded with China by Great Britain, the United States and Japan, and having reference also to the relations of Macao with the Kwang-tung province. China was given improved facilities for preventing the contraband opium trade, and Macao's rights as to the navigation of the West River and the rice trade with the mainland were recognised. A contract was also signed for the construction by a Chino-Japanese syndicate of a railway from Macao to Sung-shui.

The King and Queen left Lisbon (Nov. 12th) en route for England. They arrived at Windsor Castle (15th), having been welcomed at Portsmouth by the Prince of Wales. Shooting, a state banquet in St. George's Hall (16th), and a visit to the city with luncheon in the Guildhall (17th), were the main incidents of the visit, and their Royal Highnesses left Windsor (21st) on a private visit to the Duke and Duchess of Devonshire at Chatsworth. Other visits were paid to the Duke of Orleans and the Duke of Portland, and the visit terminated on Dec. 10th. During their Majesties' stay at Windsor an Arbitration Treaty with Great Britain on the usual lines was signed (Nov. 16th). A similar treaty between the United States and Portugal was signed (23rd).

### **Colonies.**

**Angola** is the name given to Portuguese South-West Africa, or Lower Guinea. It is bounded on the north and east by the Congo State and Rhodesia, on the south by German South-West Africa, and on the west by the Atlantic Ocean. It was arranged in 1903 that the boundary between Angola and the Barotse region of Rhodesia should be submitted to the arbitration of the King of Italy. Its coast line is broken by a stretch of 20 miles at the mouth of the

Congo, where the Congo Free State has an outlet to the sea. Estimated area, 517,000 sq. m.; pop. estimated officially at 19,400,000, but probably not more than 5,000,000. Capital, **St. Paul de Loanda**. Divided into six districts: Congo, Loanda, Benguela, Lunda, Huila, and Mossamedes. The greater part of the country is in the hands of the native owners under their tribal chiefs, the Bantus numbering several millions. There are 244 miles of railway in operation, the line running from the coast to Lucalla. A line from Benguela to the interior has been approved, and in Nov. 1902 it was announced that Mr. Robert Williams had secured the right to construct it within eight years, and to carry it to the eastern frontier of the colony. The preliminary arrangements were completed in 1903, and the construction of the line has begun. The chief products are coffee, rubber, sugar, oils, and ivory, and the trade is chiefly carried on by bartering with the natives, but there are great agricultural and mining possibilities. A company working in Mossamedes has a concession for mining, cattle-rearing, and fish-curing, and minerals, including gold, are known to exist in paying quantities. There are several other companies at work in the colony. Imports, 1903, £962,218; exports, £890,951 (milreis at 38. 6d.).

**British Consul**, A. Nightingale (Loanda).

**Cape Verde Islands** lie 350 miles from Cape Verde, the westernmost point of Africa. Belong to Portugal. Capital, **Praia**. Coaling station, **St. Vincent**. Area, 1480 sq. m.; pop. 147,424. Chief products coffee, tamarinds and millet. The people are Portuguese and Negro.

**British Consul**, W. Rice (St. Vincent).

**Portuguese East Africa** comprises the two districts of Lorenzo Marques and Mozambique, which are separated from one another by the Zambesi, and the other smaller districts of Zambesia, Inhambane, Gaza, and Tete. Its coast-line extends southwards from Cape Delgado, the southern extremity of the coast-line of German East Africa, to Kosi Bay, just below Delagoa Bay, at a point separating British from Portuguese territory, as fixed by the Anglo-Portuguese Agreement of '91. The colony is administered by a Royal Commissioner appointed for three years. There is a military force of about 5000 men. The Manica and Sofala region, where gold exists, is placed under the Mozambique Company, which has a royal charter. The Nyasa Company, which also has a royal charter, administers the region between the Rovuma, Lake Nyasa, and the Lurio. Other companies are working in Zambesia and other parts of the country. The two principal railways of this region are the Delagoa Bay, which has a length of 57 miles in the colony, and the Beira Railway, which runs from the river Pungwé on the east coast, a point 12 miles from the mouth of the river, to New Umtali on the frontier, a distance of 203 miles, and is then continued by the Mashonaland Railway to Salisbury, the capital of Rhodesia, about 170 miles farther on. Beira is also connected by telegraph with Salisbury. The chief ports are Mozambique, Quilimane, Beira, and Lorenzo Marques. The principal exports are ores, sugar, rubber, ivory, and wax. Area, about 300,000 sq. m.; pop. about 3,000,000.

**British Consul-General**, Major J. Grey Baldwin (at Lorenzo Marques).

**British Consul**, R. C. F. Greville (Beira).

**Guinea** lies on the west coast of Africa, and is surrounded on the land side by French possessions. It includes the Bissagos Islands, off the coast opposite the mouth of the Rio Grande, and the island of Bolama. **Area**, 4,400 sq. m.; **pop.** 820,000. **Capital**, Bolama. **Chief port**, Bissao. **Principal products**, rubber, wax, oil, and ivory.

**British Consul**, Captain C. F. Cromie (resides at Dakar, Senegal).

**St. Thomé and Príncipe Islands**, in the Gulf of Guinea, are ruled by a Governor. They are very fertile, and yield cocoa, coffee, and cinchona. **Area**, 454 sq. m.; **pop.** 42,103. **Imports**, 1900, £356,641; **exports**, 1901, £764,830.

**Goa** is a port-town and territory between the boundaries of Madras and Bombay, India. Once the seat of great trade, now decayed and ruinous. Belongs to Portugal, with Damão, on the coast 100 miles north of Bombay, and Diu, a small island 140 miles off Damão. The capital is Panjin, in Goa. There are a number of salt works in Goa. **Area** of Portuguese India, 1,638 sq. m.; **pop.** 531,800.

**Macao** is an island at the mouth of the Canton River, in China, forming with small islands adjacent a Portuguese dependency. **Area**, 5 sq. m.; **pop.** 80,000.

**Timor** is an island in the Malay Archipelago. The eastern portion of it, with the island of Pulo Cambing, is Portuguese. **Chief products**, coffee and wax. **Area**, 7,790 sq. m.; **pop.** 300,000.

## POST OFFICE REPORT AND STATISTICS, 1904.

The number of postal packets delivered in the United Kingdom during the year ended March 31st, 1904, was estimated as follows:—

	Number.	Increase per cent.	Average Number to each Person.
Letters . . . .	2,597,600,000	7	61'2
Post-cards . . .	613,700,000	25'5	14'5
Halfpenny packets . . .	820,400,000	1'3	19'3
Newspapers . . .	174,800,000	3	4'1
Parcels (actual number) . . . .	94,400,000	4'5	2'2
Total . . . .	4,300,900,000	3'8	101'3

The use of pictorial postcards accounted both for the slight increase in the number of letters and the enormous increase in the number of postcards.

The number of letters registered in the United Kingdom was 19,029,114. The total number of express services was 1,290,800, and in London 1,312,300 articles were delivered by express messenger. The numbers of undelivered postal packets were: Letters, 11,148,281, and postcards, 2,245,327; book packets, etc., 12,427,681; newspapers, 633,179; and parcels, 253,515. There were 319,497 registered letters and letters containing property posted with insufficient addresses. They contained £20,910 in cash and notes, and £613,618 in bills, cheques, money orders, etc. Postal packets to the number of 379,426 were posted without any

address at all, and 4190 of them contained £10,030 in various forms. **Inland money orders** by post and telegraph, and foreign and colonial orders numbered 11,261,745, reaching a value of £35,430,349. **Postal orders** numbered 90,571,000, representing a value of £34,301,000. In the **Savings Bank** £40,857,206 was deposited and £42,786,025 withdrawn, the total sum standing to the credit of 9,403,852 depositors at the end of 1903 being £146,135,147. The number of telegrams sent was 89,997,000, including foreign telegrams 7,932,000. There were 22,850 post offices open on March 31st, 1904, with a staff of 188,031, including 9976 which are also telegraph offices, and 396 post offices open for trunk telephone business. There were 13,467,975 trunk-line conversations during the year. The **postal revenue** was £15,824,394, and the **expenditure** £11,180,087, giving a net profit of £4,644,307. The telegraph revenue was £3,736,115, and the expenditure £4,719,796, a deficit of £938,681.

See TELEPHONES.

## Wireless Telegraphy.

An arrangement came into force on Jan. 1st, 1905, whereby telegrams for transmission from wireless stations on the coast to ships at sea can be accepted at postal telegraph offices in the United Kingdom. The Post Office was thus linked up with the Marconi system. The charge is 6d. a word, with a minimum of 6s. 6d. for each telegram.

## The C.O.D. System.

The "cash-on-delivery" system was the subject of considerable discussion during 1904. Under this system, which is widely in operation in India and nearly all foreign countries, the postal authorities, railway companies, or other carriers of goods undertake also to act as intermediaries between the vendors and purchasers of such goods by collecting from the latter on delivery the sale price of the same. The efforts of the advocates of the system have been mainly directed towards inducing the Post Office to put it into force, and they urged that the want of it placed British traders at a disadvantage in international business. A very strong opposition has been manifested, however, by the smaller retail traders in various parts of the country, whose contention is, that the adoption of the proposed measure would have the effect of constituting the Government the agents of manufacturers and wholesale dealers, who, with such aid to their existing advantages, in the shape of expensive and widespread advertising, would be enabled to swamp the smaller retail tradesmen of provincial towns and country districts.

Lord Stanley, in his report on the Post Office for the year ended March 31st, 1904, dealt with the question. He said that on one point he found the advocates and opponents of the system to be agreed—viz., that it would certainly be largely used by the public; that the latter had not supported their contention that it would act adversely upon the smaller traders, by evidence derived from actual experience in other countries; and that, as a result of careful inquiry, he was by no means satisfied that such apprehensions as had been expressed rested upon any such foundation as could justify the withholding from the community of a measure which it seemed clear would be beneficial.

Upon this report being made public, in August 1904, representations were made by various organisations of traders to Lord Stanley urging that no action be taken until the matter could be brought under the notice of Parliament or public opinion more fully ascertained. Ultimately a **deputation**, representing upwards of thirty associations of traders from all parts of the country, was received by the **Postmaster-General** on Oct. 31st. It was introduced by Sir John Rolleston.

Lord Stanley, in reply, said that he would be justified in putting the system into operation this autumn; but he did not desire to take any action in opposition to the will of the people of the country. He read extracts from **Lord Cromer's report** to show that the Egyptian Post Office returns revealed a large increase in the trade between Egypt and those countries—Austria-Hungary, France, Germany, and Italy—with which she had a “cash-on-delivery” system. In view of this fact, they must ask themselves whether the adoption of the system at home was a necessary or a desirable addition to our postal facilities. One speaker said that in France the whole of the demand for the system came from the big shopkeepers. What he should like to ask was whether, since it had been in force, any opposition had been raised to it by the small tradespeople. He believed, on the contrary, that it would be found that the system was used more by the small shopkeepers than by the large ones. It was not his intention to put the “cash-on-delivery” system into operation in this country; but he hoped to assist in the establishment of some method which would help in the exchange of commodities between this country and our Colonies. He personally believed in the “cash-on-delivery” system—that it would be an advantage to the mass of the community or to some portion of it. He did not believe that it would be a disadvantage to those represented by the deputation—at least, to the extent that they thought it would be. He felt certain that, sooner or later, they would have to face it. He felt equally certain that, if it came now, when the trade of the country was not collected into such big hands as it undoubtedly was rapidly getting to be, it would be of greater value to the small shopkeeper, especially in the way of preventing the accumulation of unpaid accounts, than would be the case later.

The “cash-on-delivery” system in connection with the postal service is now in operation in Austria-Hungary, Belgium, France, Egypt, Germany, Holland, Italy, Japan, Switzerland, New South Wales, and India. In Germany its success has been very striking, no fewer than 16,500,000 of such value-packages having been carried during the last financial year. As regards India, where it has actually been in force since 1877, the number of packages so carried has risen from 7400 in that year to 3,300,000 in 1902-3. Several Governments—those of France and Germany amongst the number—are, it appears, anxious to enter into arrangements for an extension of the system to this country.

**Pound, John, J.P.**, Lord Mayor of London, was b. at 81, Leadenhall Street, E.C., in 1829. Ed. at Christ's Hospital, and then entered his father's firm—Messrs. John Pound & Co., India House, Leadenhall Street, E.C.—of which he is now the head. After serving as overseer

and guardian in his parish, he became Common Councilman for Aldgate Ward in '69. He had a great deal to do with the preservation of Epping Forest as Chairman of the Coal, Corn and Finance Committee, and he also served as Chairman of the City of London School Committee. Made Alderman of Aldgate Ward in '92, he was appointed Senior Sheriff in '95, and in 1904 was chosen to succeed Sir J. Ritchie as Lord Mayor for the year 1904-5. He is a Past Master of the Leathersellers', Fanmakers' and Fruiterers' Companies. Since '79 he has been Chairman of the General Omnibus Co., Ltd. In '56 he married Harriet, daughter of Mr. Thomas Latham. He is a Conservative and a Churchman. Stanmore, Highbury New Park, N.

**Poynter, Sir E. J., Bart.**, was b. in Paris in 1836, and is the son of Mr. Ambrose Poynter, an architect. He was ed. at Westminster School and Ipswich Grammar School, and studied art in English schools, and at Paris under Gleyre '56-9. He was elected an Associate of the Royal Academy in '69, and an Academician in '76. In '71 a member of the Belgian Water Colour Society, and in '71 and again in '73 Slade Professor of Art at University College, London. He was Director for Art and Principal of the National Art Training School at South Kensington for some years, and in '94 was appointed Director of the National Gallery. In '96, on the death of Sir John Millais, he was elected to the Presidency of the Royal Academy. His best known pictures are “Israel in Egypt” '67, “Perseus and Andromeda” ('72), “Atalanta's Race” ('76), “A Visit to Æsculapius” ('80—now in the National Gallery of British Art), “The Meeting of Solomon and the Queen of Sheba” ('91), “Helen and Hermia” (1900), “The Storm Nymphs” (1903). Knighted '97; baronet 1902.

**Preceptors, College of.** Established 1846, incorporated by royal charter, '49, “for the purpose of promoting sound learning and of advancing the interests of education, especially among the middle classes, by affording facilities to the teacher for acquiring a knowledge of his profession, and by providing for the periodical session of a competent Board of Examiners to ascertain and give certificates of the acquirements and fitness for their office of persons engaged or desiring to be engaged in the education of youth.” Under the powers conferred by the charter, the Council have established schemes of examination. (1) For teachers, to ascertain their qualifications and fitness to take part in the work of instruction; (2) for pupils, to test their progress, and to afford at once to the teacher and to the public a satisfactory criterion of the value of the instruction they receive. The diplomas granted by the College to teachers are of three grades—Associate, Licentiate, and Fellow; and a distinctive feature of the examinations is, that in all cases the theory and practice of education is an obligatory subject for each grade. Visiting examiners are appointed by the College for the inspection and examination of public and private schools. In '73 the Council of the College instituted a Professorship (the first established in this country) of the Science and Art of Education; and regular courses of lectures for teachers are delivered in the College lecture-hall. Offices, Bloomsbury Square. Organ, *Educational Times*. Secretary, C. R. Hodgson, B.A.

## H.M. MOST HONOURABLE PRIVY COUNCIL.

The Privy Council is a body of persons who are nominated by the sovereign without any patent or grant, and who, upon taking the oath of office, are at once qualified members. A privy councillor must be a natural-born or naturalised British subject, and as he is created by the sovereign, so he can be removed from the list at his pleasure. It is customary to include in the body the royal princes and the archbishops; several of the principal officers of State and of the Household become privy councillors by virtue of their office; the principal Secretaries of State are of course sworn of the Council before they can take part in the deliberations of the select number of the body which we know as the Cabinet Council; and the rank is bestowed upon Ambassadors and the principal Colonial Governors, and frequently upon respected politicians who may never have been in office, as an honorary distinction. Occasionally in recent years a Colonial statesman of eminence has been appointed, and in '97 all the Premiers of the self-governing colonies, who by invitation officially attended the celebration in London of the Diamond Jubilee of H.M. the late Queen Victoria, were added. Any privy councillor may act as a justice of the peace.

### Meetings of the Council.

The Lord President of the Council is appointed by letters patent under the great seal; his duty is to manage the debates in council, to propose matters from the sovereign at the council table, and to report to His Majesty the resolutions taken thereon. It is only on rare occasions that the whole body of members assembles, one of those instances being at the demise of the Crown, when it is the duty of the Privy Council to meet and proclaim the new sovereign. For the ordinary business of the Council only those who are summoned attend, and the number thus called upon is usually very small, and consists generally of members of the party in power. Among other important functions of the Council are the granting of charters of incorporation to public and private bodies, and the bringing into operation by means of orders in council of the provisions of many statutes which Parliament leaves to the executive to enforce, temporarily or permanently, at such time or times as it may deem necessary and desirable. Royal proclamations, summoning or proroguing or dissolving Parliament, and for many other purposes, are made by and with the advice of the P.C. before being issued.

### Committees of the Council.

Several public departments have grown out of or are even now committees of the Council. The Board of Trade, although it is now an entirely separate department, is still officially entitled the Committee of Council for Trade. The Board of Education was a Committee of the Privy Council; and there are still a Universities Committee, which reviews the statutes made under the Oxford and Cambridge Act, a Scottish Universities Committee, and a Judicial Committee for appellate business. It is provided by statute that certain of the colonial judges, acting or retired, who may have been appointed

members of the Privy Council, shall be members of this last Committee. Included among the powers and duties of the Board of Agriculture and Fisheries (see AGRICULTURE) are many which were formerly discharged by the Agricultural Department of the Privy Council.

### The Privy Council in Ireland.

The Privy Council in Ireland, a smaller body than that in England, advises the Lord-Lieutenant, and exercises some of the powers possessed by the Council in Great Britain, but in relation to Irish affairs only.

As the Privy Council in Great Britain and the Privy Council in Ireland are distinct bodies, though it will be noticed that some persons are members of both, a separate list of each is set out, corrected to Dec. 31st, 1904. The word "Peer" is intended to signify that some particulars regarding the public life of the noble lord referred to are given in "Peerage" under the heading PARLIAMENT; and "M.P." is meant to refer the reader to the biographical list of the House of Commons also under PARLIAMENT. All Privy Councillors should be addressed as "Right Honourable."

### I. THE PRIVY COUNCIL IN GREAT BRITAIN.

*Lord President*—Marquis of Londonderry.

- Aberdeen, Earl of. (Feb. '86.) Peer.  
 Acland-Hood, Sir Alexander F., Bart. (Nov. 1904.) M.P.  
 Acland, A. H. Dyke. (Aug. '92.) Is 2nd s. of the late Right Hon. Sir Thomas Dyke Acland, Bart. B. '47; E. Rugby, and Christ Church, Oxford, and is a Fellow of Balliol College; sat in the Liberal interest for Yorks, West Riding (Rotherham D.), from '85 to '99, when he resigned in consequence of ill-health; Vice-President of the Committee of Council on Education '92-5; author of a "Handbook on English Political History," and of "Working Men Co-operators," Westholme, Scarborough; 28, Cheyne Walk. S.W. Reform, Athenæum, Cobden.  
 Akers-Douglas, Aretas. (June '91.) M.P.  
 Allerton, Lord. (June '90.) Peer.  
 Alverstone, Lord. (May 1900.) Peer.  
 Ancester, Earl of. (Mar. '80.) Peer.  
 Argyll, Duke of. (Mar. '75.) Peer.  
 Arnold-Forster, Hugh Oakeley. (Oct. 1903.) M.P.  
 Ashbourne, Lord. (June '85.) Peer.  
 Ashcombe, Lord. (Mar. '80.) Peer.  
 Ashley, Hon. Anthony Evelyn Melbourne. (June '91.) B. '36; s. 7th E. Shaftesbury. Called bar Lincoln's Inn '63; Private Sec. Ld. Palmerston '58 and '59-65; Parliamentary Sec. to Bd. of Trade '80-82; Under Col. Sec. '82-5; M.P. Poole '74-80, I. of Wight '80-85.  
 Asquith, Herbert Henry. (Aug. '92.) M.P.  
 Aubeury, Lord. (Feb. '90.) Peer.  
 Balfour, A. J. (June '85.) M.P.  
 Balfour, Gerald. (Nov. 1900.) M.P.  
 Balfour of Burleigh, Lord. (June '92.) Peer.  
 Barton, Sir Edmund. (Jan. 1901.) See special biography.  
 Belper, Lord. (July '95.) Peer.  
 Bertie, Hon. Sir Francis Leveson, G.C.V.O., K.C.B. (Mar. 1903.)

- Bond, Sir Robert.** (Aug. 1902.) B. '37. Premier and Colonial Sec. of Newfoundland since 1900. K.C.M.G.
- Bonser, Sir John Winfield.** (Nov. 1901.) B. '47. *E.* at Ashby-de-la-Zouche, Loughborough, Halifax Grammar School, and Christ's Coll., Camb. Called to the bar '72; was Att.-Gen. Straits Settlements '83-94, when he was app. Chief Justice, and in the same year Chief Justice of Ceylon.
- Booth, Charles.** (June 1904.) See special biography.
- Brackenbury, General Sir Henry, G.C.B., K.C.S.I., R.A.** (Feb. 1904.) B. '37; *E.* at Eton and Woolwich; served in India '57-8; Franco-German war '70-1; Ashanti war '73-4; Zulu war '79-80; and Egypt '84-5; President Ordnance Committee '96-9. 23, Hanover Square, W.
- Brampton, Lord.** (Mar. '99.) Peer.
- Breadalbane, Marq. of.** (May '80.) Peer.
- Brodrick, William St. John Fremantle.** (Jan. '97.) M.P.
- Brownlow, Earl.** (July '87.) Peer.
- Bruce, Sir Gainsford.** (June 1904.)
- Bryce, James.** (Aug. '92.) M.P.
- Buccleuch, Duke of.** (Dec. 1901.) Peer.
- Burghelere, Lord.** (Aug. '92.) Peer.
- Cadogan, Earl.** (June '85.) Peer.
- Campbell, J. A.** (July '98.) M.P.
- Campbell-Bannerman, Sir Henry.** (Nov. '84.) M.P.
- Canterbury, Randall Thomas, Archbishop of, K.C.V.O.** (Feb. 1903.) See p. 465.
- Carrington, Earl.** (July '81.) Peer.
- Cartwright, Hon. Sir Richard John.** (Nov. 1902.) B. '35; *E.* Trinity Coll., Dublin. Was Finance Minister of the Canadian Government '73-8; and has been Minister of Trade and Commerce since '96. G.C.M.G.
- Cassell, Sir Ernest.** (Aug. 1902.) B. '52; *E.* at Cologne. A merchant of London who received the honour of Knight Commander of St. Michael and St. George for services rendered in connection with Egypt. Is also K.C.V.O. Gave £200,000 for charitable purposes, which the King applied to the foundation of sanatoria for persons suffering from tuberculosis.
- Chamberlain, Joseph.** (May '80.) M.P.
- Chamberlain, Joseph Austen.** (Aug. 1902.) M.P.
- Chaplin, H.** (June '85.) M.P.
- Charles, Sir Arthur.** (July 1903.)
- Chesham, Lord.** (July 1901.) Peer.
- Chesterfield, Earl of.** (Apr. '94.) Peer.
- Cholmondeley, Marquis of.** (July 1901.) Peer.
- Christian, H.R.H. Prince Frederick Christian Charles Augustus of Schleswig-Holstein, K.G.** (Aug. '94.) B. '31; *m.*, '66, H.R.H. Princess Helena; is a general in the army; High Steward of Windsor; created "Royal Highness" by English warrant.
- Clarendon, Earl of.** (Nov. 1900.) Peer.
- Colling, Sir Richard Henn.** (Nov. '97.) B. '42, being a son of Stephens Collins, Q.C., of Dublin. Called bar Mid. Temple '67; Q.C. '83; was joint ed. of "Smith's Leading Cases"; Judge Q.B. Division '91-7; a Lord Justice of Appeal, '97-1901, when he was app. Master of the Rolls; was an arbitrator on the Venezuelan Boundary Question; Chm. of the War Funds Committee of Inquiry 1900. 2, Bramham Gardens, S.W. *Athenæum*.
- Collings, Jesse.** (Aug. '92.) M.P.
- Connaught, H.R.H. Duke of.** (May '71.) See special biography.
- Connemara, Lord.** (April '80.) Peer.
- Couch, Sir Richard.** (Nov. '75.) B. '17. Bar. Midd. Temp. '41 (Bencher '81); Judge High Court of Bombay '62-6; Chief Justice of High Court of Calcutta '70-75; Memb. Judicial Committee Privy Council since '81.
- Courtney, L. H.** (Jan. '89.) See special biography.
- Coventry, Earl of.** (Aug. '77.) Peer.
- Cowper, Earl.** (May '71.) Peer.
- Covens-Hardy, Sir Herbert H.** (Nov. 1901.) Lord Justice, Court of Appeal, 1901. B. '38; took silk '82; High Court '99. Liberal M.P. North Norfolk '85-99.
- Crabrook, Earl of.** (July '66.) Peer.
- Crew, Earl of.** (Aug. '92.) Peer.
- Cromer, Earl of.** (Sept. 1900.) Peer.
- Cross, Viscount.** (Feb. '74.) Peer.
- Crossley, Sir Savile Brinton.** (Dec. 1902.) M.P.
- Currie, Lord.** (Jan. '94.) Peer.
- Curzon of Kedleston, Lord.** (June '95.) Peer.
- Dartmouth, Earl of.** (June '85.) Peer.
- Davey, Lord.** (Nov. '93.) Peer.
- Day, Sir John Charles.** (March 1902.) B. '26; *E.* at St. Gregory's, Downside, and London Univ.; called to the bar '49; Q.C. '72; bencher '73. App. a judge Queen's Bench Div. '82; was Pres. of the Belfast Commn. '86, and a member of the Parnell Commn. '88-9.
- Derby, Earl of.** (April '78.) Peer.
- Devonshire, Duke of.** (Feb. '66.) Peer.
- Dickson, Charles Scott.** (Oct. 1903.) M.P.
- Dilke, Sir Charles Wentworth, Bart.** (Dec. '82.) M.P.
- Dimsdale, Sir Joseph Cockfield.** (Dec. 1902.) M.P.
- Dorington, Sir John Edward.** (Aug. 1902.) M.P.
- Ducie, Earl of.** (July '59.) Peer.
- Dudley, Earl of.** (Aug. 1902.) Peer.
- Durand, Sir Henry Mortimer.** (Feb. 1901.) B. '50. *E.* Blackheath School; called to the bar Lincoln's Inn '72; entered Bengal Civil Service '73; was Political Sec. to Earl Roberts during Kabul campaign '79, Sec. Foreign Dept. '85-94, Min. and Consul-Gen. at Teheran '94-1900, Amb. at Madrid, 1900-3, when he was app. Amb. at Washington. G.C.M.G., K.C.S.I., K.C.I.E.
- Dyke, Sir W. H., Bart.** (April '80.) M.P.
- Edwards, Sir Fleetwood, K.C.B.** (Oct. '95.) B. '42. Entered R.E. '63; Maj. '83, Lieut.-Col. '90; A.D.C. to Gov. of Bermuda '67-9; attached to the special Embassy during the Berlin Congress '78; Assist. Keeper Privy Purse, and Assist. Private Sec. to her late Majesty, '78-95; Keeper of the Privy Purse, '95-1900. G.C.V.O.
- Egerton, Sir Edwin H., G.C.M.G., K.C.B.** (Jan. 1904.) Ambassador to Italy.
- Elgin, Earl of.** (Feb. '86.) Peer.
- Elliot, Hon. Sir Henry George.** (June 67.) B. '17; 2nd son of 2nd E. Minto. Was many years in dip. service; was Min. at Copenhagen '58-9, Naples '59-62, Greece '62-3, Italy '63-6, Turkey '66-77, Vienna '77-84; retired '84; G.C.B.
- Fergusson, Sir James, Bart.** (Nov. '68.) M.P.
- Field, Lord.** (Mar. '90.) Peer.
- Fife, Duke of.** (May '80.) Peer.
- Finch, George H.** (Dec. 1902.) M.P.
- Fitz-Gibbon, Gerald.** (Nov. 1900, and of the Irish Privy Council since '79.) B. '37. Irish bar '60, English bar '61; Q.C. '72, Sol.-Gen. Ireland '77-8; a Lord Justice of Appeal, Ireland, since '78.
- Fletcher, Sir Henry Aubrey.** (Dec. 1901.) M.P.

- Foljambe**, Francis John Savile. (Nov. '95.) B. '30. M.P. East Retford '57-85; Lord High Steward of East Retford.
- Forrest**, Sir John. (July '97.) See special biography.
- Fowler**, Sir Henry H. (June '86.) M.P.
- Fry**, Sir Edward. (April '83.) B. '27. Called to bar '54; Q.C. '69; Judge of High Court '77; Lord Justice of Appeal '83-92; was '97-8 Chm. of the Royal Comm. of Inquiry into the Procedure and Practice of the Irish Land Commn.
- Fry**, Lewis. (Jan. 1901.) B. '32. A solicitor '54, and was senior member of the firm of Fry, Abbot, & Co., Bristol; M.P. for Bristol '78-85, N. Bristol '85-92 and '95-1900; Chm. of the Parliamentary Committee on Town Holdings '86-92; Chm. of the Bristol School Board '71-80.
- Gladstone**, Herbert J. (Mar. '94.) M.P.
- Goldie**, Sir George Dashwood Taubman. (July '98.) B. '46, being a son of Col. Goldie-Taubman, Speaker of the House of Keys, Isle of Man. Received a military education and is Lieut. R.E.; travelled much in Africa; founded and was Deputy-Governor of the Royal Niger Co. '86-95; Governor '95-9, resigning upon the administration of the territory being taken over by the Government. K.C.M.G. 11, Queen's Gate Gardens. Naval and Military.
- Gorst**, Sir J. E. (Feb. '90.) M.P.
- Goschen**, Viscount. (Nov. '65.) Peer.
- Grant-Duff**, Sir Mountstuart Elphinstone. (May '80.) B. '29. (L.) M.P. Elgin Dist. '57-81. Under-Sec. India '68-74; Under-Sec. Colonies '80-81; Gov. Madras '81-6; Ld. Rector Aberdeen Univ. '66-72; G.C.S.I., F.R.G.S.
- Grey**, Sir Edward. (Aug. 1902.) M.P.
- Griffith**, Sir Samuel Walker. (Jan. 1901.) B. '45. E. Sydney Univ.; called Queensland bar '67, and is also a member of the bars of Victoria and N.S. Wales; member L.A. of Queensland '72, Q.C. '76, Att.-Gen. '74-8 and '90-3; Premier of Queensland '83-8 and '90-3; Chief Justice since '93, and Lieut.-Gov. also since '99; President Col. Conf. of Australasia in '88 and other years. Appointed Chief Justice of the Supreme Court of Australia in 1903. G.C.M.G.
- Gully**, William Court. (May '95.) M.P.
- Haldane**, Richard Burdon. (Aug. 1902.) M.P.
- Halsbury**, the Earl of. (June '85.) Peer.
- Halsey**, Thos. F. (Jan. 1901.) M.P.
- Hamilton**, Lord G. (April '78.) M.P.
- Hardinge**, Sir Charles, G.C.M.G., K.C.V.O., C.B. (Mar. 1904.) See special biography.
- Hay**, Sir John Charles Dalrymple, Bart. (Mar. '74.) B. '21. Served in navy '34-78, when he became admiral on retired list, having seen much active service in Crimean campaign and elsewhere, and received three war medals. M.P. (C.) Wakefield '62-5, Stamford '66-80, Wigtown Dist. '80-85; a Lord of the Admiralty '66-8; G.C.B.
- Hayter**, Sir Arthur, Bart. (June '94.) M.P.
- Heneage**, Lord. (Feb. '86.) Peer.
- Hertford**, Marquis of. (Feb. '79.) Peer.
- Hibbert**, Sir John. (Feb. '86.) B. '24; M.P. for Oldham '62-74, '77-86, '92-5; called to bar Inner Temple '49; J.P. and D.L. Lancashire; Chm. Lancaster C.C.; Sec. Loc. Gov. Board '72-4 and '80-3; Under Sec. State, Home Department '83-4; Sec. Admiralty in the Gladstone Ministry of '86; Fin. Sec. Treasury '84-5 and '92-5; K.C.B.
- Hicks-Beach**, Sir M. (Mar. '74.) M.P.
- Hill**, Alexander Staveley. (Nov. '92.) B. '25; son of the late Mr. H. Hill, J.P.; E. King Edward VI.'s School, Birmingham, and St. John's Coll., Oxon; D.C.L. '55; called to the Bar, Inner Temp., '51; Q.C. '68; Benchet '68; Treasurer '86; Recorder for Banbury '66; Judge Advocate of Fleet and Counsel to the Admiralty '75; Dep. High Steward, Oxford Univ., '74; Examiner in Law and Modern Hist., Oxford, '58; Hon. LL.D. Toronto Univ.; J.P. and D.L. Staffs. Oxley Manor, near Wolverhampton; 4, Queen's Gate, S.W.

Thurlow, Lord. (April '86.) Peer.  
 Trevelyan, Sir G. O., Bart. (June '82.) B. '38;  
*E. Harrow and Trinity Coll., Camb.* Sat in  
 the House of Commons for Tynemouth '65-8,  
 Hawick Dist. '68-86, Glasgow, Bridge-  
 ton Div., '87-97. Commenced his official  
 parliamentary career in '69 as a Lord of the  
 Admiralty; and, in Mr. Gladstone's ministry,  
 became Sec. to the Admiralty ('80-2). After  
 holding the office of Chief Sec. for Ireland,  
 Sir George was app. Chan. of the Duchy of  
 Lancaster (with a seat in the Cabinet) in '84,  
 and held the office of Sec. for Scotland for a  
 month in '86, but being unable to agree with  
 Mr. Gladstone's Irish policy, he resigned his  
 position in the Government (March '86). On  
 the conclusion of the Round Table Confer-  
 ence, at which he represented the Unionist  
 party, he announced that his opposition to  
 the points of disagreement with regard to  
 the Home Rule movement had been over-  
 come, and he rejoined his colleagues on the  
 Front Opposition bench, re-entering the  
 House, after defeat at his old constituency of  
 Hawick Dist., as member for the Bridgeton  
 Div. of Glasgow (Aug. '87). He was Sec. for  
 Scotland again from '92 until '95. Sir George  
 has gained an enviable distinction in the  
 world of letters by his "Life of Lord  
 Macaulay," his uncle. He is also the author  
 of some humorous political verses entitled  
 "The Ladies in Parliament." Wallington,  
 Cambo, Northumberland. *Reform and  
 Athenæum.*

- Wrench, Frederick Stringer. (1903.)
- Wyndham, George. (1900.) M.P.
- Young, John. ('86.) B. '26; son of W. Young, of Galgorm, M.D. M.A. Trin. Coll. Dublin; J.P. and D.L. co. Antrim; High Sheriff '63. Residence, Galgorm Castle, Ballymena, co. Antrim.
- Assist. Under-Sec. to the Lord-Lieut. and Clerk of the Council*, Sir James B. Dougherty, C.V.O., C.B., Dublin Castle.

**Provident Medical Association, Metropolitan.** Established for the purpose of securing the supply of medical attendance and medicine during sickness to the families of the wage-earning classes throughout London by the payment of a weekly sum, regulated by the number in each family. Twenty-two branches already established. **Chairman**, Mr. W. Bousfield, J.P.; **Secretary**, Chas. H. Warren, 5, Lamb's Conduit St., Bloomsbury, W.C.

**Provis. Sir Samuel Butler, K.C.B.,** Permanent Secretary of the Local Government Board since '98, is the son of Mr. Samuel Provis. B. at Warminster, Feb. '45; ed. at Queens' College, Cambridge; called to the Bar (Middle Temple) '66. Became junior Legal Assistant to the Local Government Board '72; Assistant Secretary '82; created a C.B. '87.

**Psychical Research, The Incorporated Society for.** Founded 1882, for the purpose of making an organised attempt to investigate that large group of debatable phenomena designated by such terms as mesmeric, psychical, and spiritualistic. An important branch of the Society's work has hitherto been the examination of telepathy. Reports of a number of varied and careful experiments in induced telepathic communication are published in the "Proceedings," and a large collection of spontaneous cases has been published in a book entitled "Phantasms of the Living." For a general review of the Society's work, and its bearing on philosophical problems, see Mr. F. W. H. Myers's "Human Personality." The Society has about 900 members and associates; also a branch in the United States of over 500 members and associates. **President**, Prof. Ch. Richet. **Hon. Secretaries**, Mr. J. G. Piddington and the Hon. Everard Feilding. **Offices and Library**, 20, Hanover Square, London, W.

### PUBLIC SCHOOLS.

**Bedford Grammar School.** Founded 1566; reorganised 1873. Annual income, £3500. Eight leaving exhibitions of £70 and £60 for four years. Two fall vacant annually. Exhibitions tenable in the school from £60 to £10. **Pupils** 870. The school is divided into six sections: (1) Classical, (2) Civil and Military, (3) Intermediate, with Latin but no Greek, (4) Engineering, (5) Junior Department, (6) Preparatory Department. There are regular Woolwich and Sandhurst classes. There are also workshops with steam-engine, gas-engine, two dynamos, accumulators, moulding- and casting-room, carpenters' shop, machine-drawing room, forges, lathes, etc., and an Engineering Corps. Physical and Chemical Laboratories were remodelled and enlarged in '99. **Head Master**, J. E. King, M.A., School House, Bedford.

**Birmingham, King Edward's School,** comprises a high school for boys, a high school for girls, three grammar schools for boys and four grammar schools for girls. Founded 1552, reorganised 1878. In 1900, the Birmingham (King Edward VI.) Schools Act liberated the Foundation from all control by the Charity Commissioners. Income, £48,000. Numerous scholarships and exhibitions both for boys and girls. The pupils number over 2,700; 450 in high school for boys. **Head Master**, R. Cary Gilson, M.A. **Motto**, *Domine, Salvum fac Regem.*

**Brighton College, Brighton.** Founded 1847. Governed by a Council of twelve, the Earl of Chichester being the patron. It has classical and modern sides, with a junior school for young boys. The classical side is mainly intended for boys proceeding in due course to the Universities, the modern side for candidates for the Army or boys intended for business life. There are two leaving scholarships of the annual value of £60, and three of £30, tenable at Oxford or Cambridge. Entrance scholarships are awarded every year, at least three of the annual value of £70 or £50, and some smaller exhibitions. **Pupils**, 150. **Head Master**, Rev. A. F. Titherington, M.A. **Secretary**, L. F. Duckworth, B.A.

**Charterhouse School, Godalming.** Founded 1611, and until 1872 situated near Smithfield, London, on ground that once belonged to the Carthusian Monastery. One of the nine great public schools of the Public Schools Commission. Sixty scholarships are tenable in the school, and there are ten or more vacancies annually. Twenty or more exhibitions to the Universities, each of the annual value of £80, tenable for four years. **Chairman**, Archbishop of Canterbury. **Pupils**, 560. **Head Master**, Rev. G. H. Rendall, M.A., Litt.D. **Motto**, *Deo dante dedi.*

**Cheltenham College, Gloucestershire.** Founded 1841, mainly through the efforts of George Simon Harcourt, Esq., and Captain James Shrubbs Iredell. Incorporated by Act of Parliament in '94; is governed by a President and twenty members of Council. There are three departments—the classical, the military and civil, and the junior. Numerous scholarships are attached to the College. The pupils number 600. **Principal**, the Rev. R. Waterfield, M.A. **Head Master of the Military and Civil Dept.**, W. M. Baker, M.A. **Bursar**, A. A. Hunter, Esq.

**Christ's Hospital (Blue Coat School), West Horsham.** Founded 1552. The new scheme of the Charity Commissioners came into force in Jan. '91. It provided that the boys' boarding school should contain 700 pupils, the preparatory school 120 juniors, and the girls' school 350 scholars, these three establishments being known as Hospital schools. With relation to two-thirds of the scholars at the Hospital schools, fees ranging from £10 to £20 may be charged if the Council of Almoners consider "that the parents or next friends are in a position to contribute substantially towards the child's education and maintenance." The system by which entrance to the Hospital schools is gained under the new scheme is by presentation or by competition. Presentation to about 425 places lies in the hands of the President, certain City companies, and donation governors. One hundred scholars may be nominated by the Council of Almoners (which numbers forty-three members), and about 100 scholars, nominated by donation governors, may compete for places. From Metropolitan schools of a public elementary nature come 179 successful competitors; various parishes supply 12 scholars; and the residue of the places are at the disposal of boys and girls nominated by the governors of endowed schools at which they have attended for the period of two years. In July '96 the scheme of '90 was modified in certain particulars, so as to admit to the Royal Mathematical School the sons of naval officers as formerly, and also to allow of the admission of more children by direct presentation on the

part of donation governors rather than as the result of competition. Further modifications, principally as to the ages of admission, have also been made by recent amending schemes. There are numerous exhibitions and prizes which have existed in the past still remain as inducements. Hospital exhibition funds provide exhibitions to universities, including the *Times* scholarship, and the "Montefiore," "Rowed," and "Pitt Club" exhibitions. Under the new scheme the boys' boarding schools have been removed to a new site near Horsham. At the end of 1904 the Boys' Schools (including Preparatory) numbered 775 boys. **Head Master**, Rev. A. W. Upcott, M.A., Exeter College, Oxford. **Head Mistress**, Miss M. E. Robertson, Newnham College, Cambridge.

**City of London School**, Thames Embankment. Established by the Corporation of London in 1834. Tenable at the Universities or other places of higher education are 26 scholarships varying from £80 to £20; and about 50 others tenable at the school. Pupils admitted between the ages of 7 and 15. The average number in 1902-3 was 630. **Head Master**, Mr. A. T. Pollard, M.A.

**Clifton College**, Bristol. Opened 1862, received charter '77. It is under a Council of fifteen, the Earl of Ducie being President, and the Bishop of Hereford Chairman of the Council. It has classical, modern, and military sides, and Junior and Preparatory Schools; and prepares pupils specially for Woolwich, Sandhurst, and Cooper's Hill, also for the Royal Navy. Three exhibitions, of £25, which may be increased to £50 a year, tenable at the Universities, and at least eleven scholarships, varying in value from £25 to £80 and admitting of augmentation to £100 a year, tenable at the College, offered annually. Pupils, 600. **Head Master**, Rev. Michael George Glazebrook, D.D. **Secretary**, W. D. L. Macpherson. **Motto**, *Spiritus intus alit*.

**Dulwich College** (Alleyn's "College of God's Gift" at Dulwich) was founded A.D. 1619, by **Edward Alleyn**, the Actor, under Letters Patent of King James I., by which a licence was granted to Alleyn to establish a College "to endure and remain for ever," and to be called "The College of God's Gift in Dulwich, in the County of Surrey." Reconstituted '58, and removed to new site and new building '70. **Present numbers** in the school, 710. No boy may enter the school before the age of 10, or remain after the age of 19. Endowment about £5000 per annum. £1000 may be annually allotted among "boys proceeding to a place of higher education," and £1500 also may be paid annually in scholarships to boys either already in the school or about to enter it. Such scholarships are awarded as the result of open examination. **Head Master**, A. H. Gilkes, M.A.; **School Secretary**, Gilbert B. Stretton, M.A.; **Motto**, *Detur Gloria Soli Deo*.

**Eton College**. Founded 1440. Endowment exceeds £20,000 per annum. **Pupils** consist of **King's scholars** or "Collegers" (of whom there are 70, and who enter college between twelve and fourteen years of age), and of **Oppidans**, who enter between ten and fourteen years of age. Exhibitions and scholarships to both Universities, ranging from £50 for four years downwards. **Motto**, *Floreat Etona*. Among its alumni occur the names of Horace Walpole; Bolingbroke; Porson; Hallam; Gray, the poet; Shelley; Wellington; Pitt; Canning; Fox;

Lord North; Lord Camden; Dean Milman; W. E. Gladstone; Dr. Pusey; Lord Iddesleigh; Lord Avebury; Goldwin Smith; Lord Salisbury; Lord Rosebery; Lord Coleridge; Mr. A. J. Balfour; Lord Justice Cotton; Justices Chitty, Kekewich, Kennedy; the Bishops of Chichester, Bath and Wells, and Winchester; Field-Marshal Lord Roberts, V.C.; General Sir Redvers Buller, V.C. **Head Master**, Rev. Edmond Warre, D.D., but his resignation is to take place in 1905. A mission is supported by by past and present Etonians at Hackney Wick. **Consult the College Calendar**.

**Felsted School**. Founded in 1564. It has about 250 pupils. **Head Master**, Rev. H. A. Dalton.

**Fettes College**, Edinburgh. Founded in 1870. Has about 230 scholars. **Head Master**, Rev. W. A. Heard.

**Glenalmond**. Founded with the name Trinity College, Glenalmond, in 1841 by the initiative mainly of Mr. W. E. Gladstone, with the purpose of raising in Scotland a public school of the English type. It stands on the river Almond, in the Grampians, near Perth. There are about 140 boys. The first Warden was Charles Wordsworth, afterwards Bishop of St. Andrews, friend and tutor of Mr. Gladstone. **Warden**, Rev. A. R. F. Hyslop.

**Haileybury College**, Herts. Founded 1862, received Royal Charter '64. Entrance scholarships. Exhibitions to Oxford and Cambridge five annually (£60, £50, £50, £40, and £20) for three years. **Pupils** 500. **Head Master**, Hon. and Rev. Edward Lyttelton, M.A., Hon. Canon of St. Albans.

**Harrow School**. Founded 1571, by John Lyon, a yeoman, b. at Preston, near Harrow. Age of admission from 12 to 14. Ten or eleven entrance scholarships, of the value of £100, £80, £60, and £35 a year, are offered every Easter to boys (not members of the school) over 12 and under 14 years of age on the previous 1st of January. The governors can, at their discretion, add £20 a year to any scholarship, if the circumstances of the scholar appear to make it desirable. To one of these scholarships, and to one only, is added, at intervals, the Edward Stanhope Scholarship of £50, so that its value is increased by that amount. The Bowen Scholarship of £120 a year is given for proficiency in mathematics, French, history, geography, literature, and Latin. In years when it is not vacant a scholarship of less value is offered on the same terms. There are also two scholarships, each of £25, for two years, open to boys in the fifth form, and awarded for proficiency in such subjects as are common to both sides (classical and modern) of the school. There are numerous Scholarships, from £100 downwards, to the Universities. **Pupils**, nearly 600. **Head Master**, Rev. Joseph Wood, D.D. **Motto**, *Stet fortuna domus*. Some distinguished alumni: Butler, afterwards head master, Sir R. Peel, Cardinal Manning, Sheridan, Earl of Aberdeen, Sir William Jones, Byron, Barry Cornwall, Archbishop Trench, Trollope the novelist, Sir George Trevelyan, Lord Shaftesbury, Dr. Parr, Lord Palmerston, Rodney, Theodore Hook, Rt. Hon. E. Stanhope, M.P., Rt. Hon. Lord Knutsford, Rt. Hon. H. Chaplin, M.P., Rt. Hon. Lord George Hamilton, M.P., Rt. Hon. Sir W. Hart Dyke, Bart., M.P., Earl Spencer, K.G., the present Master of Trinity College, Cambridge, Right Hon.

Walter H. Long, M.P., the Bishop of Worcester, the Bishop of Peterborough, and the Archbishop of Canterbury.

**Lancing College, Sussex.** Founded 1848. Pupils 120. **Head Master**, Rev. A. J. Wilson, D.D.

**Leys School, The, Cambridge**, was founded in '75 especially to afford an opportunity of high-class public school education under religious influences, but free from the ecclesiastical bias of the older public schools. It was incorporated July 16th, '78. The founders were chiefly members of the Methodist Church, but it draws pupils and masters from the Anglican and other Protestant Churches. Special scientific, mercantile, and other courses are provided, in addition to the ordinary Classical and Modern sides. There are admirable laboratories, and a dozen acres of well-appointed playing-fields. Boys are received from ten years of age upwards. Entrance scholarships, varying in value from £40 to £60 per annum, are offered for competition at the end of each term. A mission is supported by the old students in London. A "Moulton" Scholarship of not less than £75 is offered every two years. The school motto is "*In fide fiducia*." **Head Master**, Rev. W. T. A. Barber, D.D. **Bursar**, J. C. Isard, M.A.

**Loretto School, Musselburgh**, now contains about 135 boys. The **Head Master** is H. B. Tristram, M.A.

**Malvern College, Worcestershire.** Founded 1865. Exhibitions at the Universities, one of £40 for three years, offered annually, and one of £27 for one year; also one of £40 for three years, tenable at B.N.C., Oxford. Entrance scholarships annually filled, one or more of £87, four or more of £50, six or more of £30. Pupils, 480. **Head Master**, Rev. Sydney R. James, M.A. **Secretary**, E. B. Scallon, M.A.

**Manchester Grammar School.** Founded in 1515 by Hugh Oldham, Bishop of Exeter, and others. The school consists of 160 foundationers (free) and about 650 capitation scholars, and has three main branches—classical, modern, and scientific. It is governed by a Board of Governors, under a scheme of the Charity Commissioners. The school has a number of close scholarships at Wadham and Brasenose College, Oxford, and St. John's College, Cambridge, ranging in annual value from £50 to £80. There are 23 scholarships for classics, mathematics or physical science, tenable at the Universities, ranging in value from £17 to £50 each per annum; also 29 scholarships, tenable at the school, ranging in value from £14 to £25 each per annum, together with numerous prizes. **High Master**, J. L. Paton, M.A., late Fellow of St. John's College, Cambridge; **Receiver**, Owen W. Cox. **Motto**, *Sapere aude*.

**Marlborough College, Wiltshire.** Founded 1843, incorporated by royal charter '45, received additional charter '53. Exhibitions to Universities, one each of £50, £40, and £30 for three years, offered annually, and every three years the "Old Marlburian," £50, the Council Exhibition £30, and Leaf Exhibition £22 10s., fall vacant alternately. Also 2 Modern School Exhibitions of £25 and £20 each, offered annually. Scholarships filled annually: 15 or 16 "Foundation," for sons of clergy, £30; 4 "Senior," £30; 6 "Junior," £30; 1 or 2 "House," £80, all open; Minor Scholarships for Modern Languages, etc. Pupils, 600. **Master**, Frank Fletcher, M.A.

**Merchant Taylors' School, London.** Founded (1561) by Sir Thomas White (founder of St. John's College, Oxford), and the court of the Merchant Taylors' Company. The Company remains the governing body of the school, which has always continued a day school. Forty-two scholarships at the school, and exhibitions of £86 and £100 for five and seven years, to St. John's College, Oxford; others, ranging from £90, to Cambridge. Pupils 450; on entrance must be over 9 and under 14. The playing grounds are at Bellingham, near Catford. **Head Master**, the Rev. J. Arbutnot Nairn, M.A., sometime Fellow of Trinity College, Cambridge. **Secretary**, C. Waters, M.A. **Motto**, *Homo plantat, homo irrigat, sed Deus dat incrementum*.

**Mill Hill School (London, N.W.).** Founded 1807 as Protestant Dissenters' Grammar School, reconstituted under direction of the Court of Chancery '69 on a broader basis. Awards the three "Wills" Scholarships of £70 each, the "Bousfield" of about £50, the "Scrutton" of about £30, and four other leaving scholarships each tenable for three years. Also several Ministerial Exhibitions (about £45 a year) and Entrance Scholarships (£30 to £90). Number of boys 226. **Motto**, *Et virtutem, et musas*. The "Old Mill-Hillians Club" numbers over 600 members. **Head Master**, J. D. McClure, M.A., LL.D., B.Mus.

**Radley College, Abingdon, Berks.** Founded 1847. Has about 200 scholars. **Head Master**, Rev. T. Field, D.D.

**Repton School, Derbyshire.** Founded 1557; reorganised 1874. Pupils, 306. Twenty assistant masters. **Head Master**, Rev. Lionel Ford, M.A.

**Rossall School, Fleetwood, Lancashire.** Founded 1844. Royal Charter granted Nov. '90. Two Exhibitions, one of £50 and one of £30 at Oxford or Cambridge, each for three years, offered every year; and the Phillips memorial exhibition for mathematics, of £40 for one year at Oxford or Cambridge. Besides this there are about 14 Scholarships tenable at the school, offered each year by examination held about the end of March—Foundation, Senior and Junior. **Head Master**, Rev. J. P. Way, D.D.

**Rugby School.** Founded by Lawrence Sheriff, a native of Rugby (1567), and originally entrusted to two trustees, in place of which twelve gentlemen of Warwickshire were appointed by Commissioners under the Great Seal in 1602. The boys are divided into foundationers and non-foundationers. Has, every July, 10 or 12 entrance and other scholarships of £100 to £20, and 7 leaving exhibitions tenable at the Universities for 4 years, 3 of £60 and 4 of £30 annual value. Pupils, 570; admission at the age of 12. **Head Master**, Rev. H. A. James, M.A., D.D. (*q.v.*). **Motto**, *Orando laborando*. Some distinguished alumni: Sir Ralph Abercromby; Cave, Dr. Johnson's friend, and originator of *The Gentleman's Magazine*; Macready, the celebrated actor; Dr. S. Butler, afterwards Master of Shrewsbury School; Walter Savage Landor; T. Hughes; Lord Derby; Dean Stanley; Arthur H. Clough; Matthew Arnold; Lord Bowen; Professor T. H. Green; F. C. Selous; Viscount Goschen; Sir H. Drummond Wolff; Lord Davey; Dean Bradley; Dean Vaughan; C. L. Dodgson ("Lewis Carroll"); Viscount Cross; Rt. Hon. J. Austen Chamberlain; Rt. Hon. H. O. Arnold-Forster; and Lord Brassey. In '89 it was decided to establish a Home Mission,

in addition to the Fox Memorial Mastership in India, in connection with the School. Consult *Rugby School Register*.

**St. Paul's School**, London. Founded A.D. 1509 by John Colet, D.D., Dean of St. Paul's. Is governed under the provisions of a scheme of the Charity Commissioners, dated June 16th, 1900. The school consists of 153 foundation scholars, elected by competitive examination, and of so many capitation scholars as the governors may from time to time decide. The capitation scholars pay a tuition fee of £24 9s. a year. The foundation scholars are exempt from fees. There are now about 530 boys in the school, and 33 masters. The governors give annually nine exhibitions for four years, varying in value from £70 to £30, to the scholars proceeding to Oxford and Cambridge, and one exhibition of £50 for two years for a boy proceeding to the Royal Academy, Woolwich. *Motto*, *Fide et literis*. **Head Master**, F. W. Walker, M.A. **Bursar**, S. Bewsher.

**Sherborne School**, Dorsetshire. Refounded by Edward VI. (the earliest school founded by that monarch), 1550, reorganised 1870. Accommodation for 280 pupils. An Exhibition to either Univ. of £40 for four years falls vacant every year; pupils may also compete for **Huish Exhibitions** of £50 for four years; this privilege is allowed to three other public schools only. There are also numerous Foundation, House, and other Scholarships and Prizes. **Head Master**, Rev. F. B. Westcott, M.A., late Fellow Trin. Coll. Camb. **Clerk to Governors**, Mr. James Douglas. *Motto* (royal arms of Ed. VI.), *Honi soit qui mal y pense*.

**Shrewsbury School**. Founded by King Edward VI. in 1551, augmented by Queen Elizabeth in 1571. One of the seven schools reorganised by the Public Schools Act in '68. The school was moved to a new site (covering an area of 58 acres) in '82. Since '82 its numbers have increased from 170 to 300. **Head Master**, Rev. H. Whitehead Moss, M.A. *Motto*, *Intus si recte, ne labora*.

**Stonyhurst College**, near Blackburn. Directed by the Jesuit Fathers. First founded in 1592 at St. Omers in Flanders; transferred to Stonyhurst in 1794. **Rector**, the Rev. J. Browne, S.J. The course of studies includes classics, mathematics, science, philosophy, modern languages, preparation for the Oxford and Cambridge Certificate Examinations, the London University degrees, and for the Army. The Observatory attached to the College turns out excellent solar and other work. Preparatory school for 60 boys at Hodder.

**Tonbridge School** was founded 1553, and was reorganised 1880. **Governors**: Master, Warden, and Court of the Company of Skinners. Four exhibitions of £75 for four years fall vacant annually, and are tenable at any place of higher education that the Governors approve of; four others of £30 a year for four years, one vacant each year, are tenable only at Oxford or Cambridge. **Pupils**, 380. **Head Master**, Rev. Charles C. Tancock, D.D., Oxon. *Motto*, *Deus dat incrementum*.

**University College School**, Gower Street, London, established 1832, is completely unsectarian—a modern school with special departments for classics, engineering, and higher commercial instruction. Prepares for University College and London matriculation, as well as for Universities, Woolwich, etc. **Pupils**, 386. *Motto*, *Paulatim sed firmiter*. **Head Master**, H. J.

Spenser, M.A., LL.D. **Principal**, T. Gregory Foster, B.A., Ph.D. **School Registrar**, Arthur C. Hull.

**Uppingham School**. **Archdeacon Johnson's School**, founded 1584; reorganised 1875. Three leaving exhibitions of £60, £50 and £40 offered every year, and 16 of about £22 each to Cambridge. Entrance scholarships, two of £70, two of £50, two of £30 annually. There are 415 boys in the School and 31 masters, and 6 assistant music masters. There is also a Lower School. **Head Master**, Rev. E. C. Selwyn, D.D.

**Wellington College** (Berks) was founded in 1856, in memory of the great Duke of Wellington. The foundation consists of ninety nominations for the sons of deceased officers, who are educated for £10 a year. Boys are received at a charge of £110 if boarded in the principal building, of £132 if boarded in a master's house. There are, as a rule, ten open scholarships annually, and a limited number of officers' sons are educated at £95 a year. There is a classical school, in which boys are prepared for the Universities, etc., and a modern side where boys are educated for the army, etc. Average number of pupils, 470. *Motto*, "*Heroum filii*." **Chairman of Governors**, H.R.H. the Duke of Connaught. **Master**, Rev. Bertram Pollock, D.D., M.V.O. **Bursar**, M. S. Forster, B.C.L., M.A., B.Sc.

**Westminster School**, or the Royal College of St. Peter's, Westminster. Refounded 1560, reorganised 1868. Founders, 60; about 12 annual vacancies. The Westminster Play, an annual representation of a Latin comedy by the scholars, is of some celebrity. There are a number of close scholarships and exhibitions to Christ Church, Oxford, and of exhibitions to Trinity College, Cambridge. **Head Master**, Rev. James Gow, M.A., Litt.D. *Motto*, *Dat Deus incrementum*. **Bursar**, J. Tyson, B.A.

**Winchester College**, the oldest of the public schools, was founded (1387) by William of Wykeham, as a nursery for the "New College" he had recently founded at Oxford. It is certain, however, that some years before that date Wykeham was maintaining and educating poor scholars, and the actual date of the opening of the College was March 26th, 1393. About a dozen vacancies yearly occur for founders, who are elected by the governors after open competition. His Majesty gives two gold and two silver medals to be competed for. Tenable at the Universities are four exhibitions of £50 for four years, and at New College, Oxford, six scholarships. The quinquenary of the College, its 500th anniversary, was observed on "Domum Day," July 25th, '93. **Head Master**, Rev. H. M. Burge, D.D. *Motto*, *Manners makyth man*.

**Public Works Loan Commissioners** are an unpaid body who are empowered to grant loans to local authorities for baths and washhouses, burial grounds, conservancy and improvement of rivers, main drainage, docks, harbours, piers, improvement of towns, labourers' dwellings, lighthouses, lunatic asylums, police stations in counties and boroughs, public libraries and museums, schoolhouses, waterworks, and other sanitary and local purposes. During 1903-4 the Commissioners made 1897 advances for sums amounting to £5,838,227, as compared with 2063 advances for £5,740,538 in 1902-3. The rates of interest varied from 2½ per cent. to 4½ per cent. Office, Old Jewry, London, E.C.

Q

**Queen Margaret College** is the women's department of Glasgow University. See article EDUCATION, V. p. 151.

**Queen Victoria Memorial.** An influential Committee appointed during 1901 to consider the question of a National Memorial to H.M. Queen Victoria submitted through Lord Esher (hon. sec. to the Committee) a recommendation that a Memorial should be erected in the neighbourhood of the Abbey and Palace of Westminster, or of Buckingham Palace, and that it should include as its most prominent feature a statue of the Queen. **The Buckingham Palace site** was decided upon, with the entire approval of H.M. King Edward VII., who himself gave one thousand guineas to the **Memorial Fund**. An American branch of the Fund was formed to enable Americans to participate in the Memorial. **An Executive Committee**, consisting of Sir E. J. Poynter, P.R.A., Sir L. Alma Tadema, R.A., Lord

Windsor, Viscount Esher, Sir Arthur Ellis, Mr. H. B. Mitford, and Mr. Sidney Colvin, was then appointed, and recommended that **Mr. Thomas Brock's design** for the Memorial should be accepted; and that **Mr. (now Sir) Aston Webb's plan** for the general treatment of the space in front of Buckingham Palace be accepted, with certain modifications. The General Committee accepted these recommendations, which contemplate a monument 60 ft. high, rising from a platform elevated 8 ft. above the ground, and 100 ft. in diameter, flanked by basins into which water will run. In the centre will rise a pyramidal structure, with seated groups leading up to a great winged figure of Victory on the summit. Figures emblematic of Constancy, Courage, Justice, Truth, and Love surround Victory; and below, facing the Mall, will be the seated figure of H.M. Queen Victoria. Mr. Webb's designs include important alterations of the roadways and space in front of the Palace.

R

RAILWAYS.

- I.—RAILWAYS OF THE WORLD.
- II.—RAILWAYS OF THE UNITED KINGDOM.
- III.—BRITISH RAILWAYS IN 1904.
- IV.—LIGHT RAILWAYS.

[For a general survey of matters relating to railways see eds. '95 and '96. In the subsequent editions more recent developments have been dealt with, and the following article shows the present position.]

I. RAILWAYS OF THE WORLD.

The most recent statistics of the world's railway mileage show a grand total of 520,955 miles at the end of the year 1902, made up as follows:—

Continent.	Miles.
Europe . . . . .	183,997
Asia . . . . .	44,358
Africa . . . . .	14,554
North America . . . . .	233,186
South America . . . . .	28,822
Australia . . . . .	16,038

Total . 520,955

The following table shows the relative density of the railway mileage of the leading countries to area and number of inhabitants.

Country.	Miles of Railway.	
	Per 100 square miles.	Per 10,000 inhabitants.
Belgium . . . . .	22'0	6'03
United Kingdom . . . . .	11'3	5'28
Germany . . . . .	10'85	6'4
Prussia . . . . .	10'49	6
Switzerland . . . . .	9'4	7'33
Holland and Luxemburg . . . . .	9'1	3'79
France . . . . .	8'8	7'46
United States . . . . .	6'64	25'52
Austria-Hungary . . . . .	5'2	4'66

It will be seen that North America has no less than 44½ per cent. of the whole railway mileage of the world, and that the United States have between three and four times as much length of railway in relation to population as any other country. These figures, of course, are all "route mileage." If "track mileage" could be compared, the United Kingdom would make a better showing, as a larger proportion of our railways have two or more tracks than is the case elsewhere. (See Sect. II. for track mileage of the railways of the United Kingdom.)

In addition to the "home" lines, Great Britain, through its colonies, owns nearly twice as much railway mileage in America as any other people except the United States. We also own three-fifths of the Asiatic railways, and most of the railways in Africa. Of the 520,955 miles of railway in the world, 270,881 miles are in the English-speaking countries—viz., the United States and Great Britain and her colonies. During the seven years 1896–1902 an average of 12,233 miles per year was added to the world's railway system.

The capital invested in the world's railways is estimated at about £7,000,000,000, rather more than half of which has been spent on the 184,000 miles in Europe. It follows from this that the European railways have been about twice as costly as the 337,000 estimated to have been constructed in the rest of the world. The average costs work out at £22,952 per mile for the European lines, and £11,402 for the lines in the other continents. The most heavily capitalised railways are, of course, those of Great Britain, which are estimated to have cost on the average £51,368 per mile, or more than double the European average, and more than four times that of the rest of the world. But, again, a comparison based on track mileage instead of route mileage would considerably reduce the figures. The Belgian railways most nearly approach the British in costliness, but at a very considerable distance, their average capitalisation being about £30,000 per mile. The United Kingdom and Belgium are the two

countries in which the density of the railways is greatest in proportion to area; whereas the United States, as will be seen above, is almost at the bottom of the list in this respect.

## II. RAILWAYS OF THE UNITED KINGDOM.

The total railway mileage open in the United Kingdom on Dec. 31st, 1903, was 22,435 miles, of which 15,501 were in England and Wales, 3,664 in Scotland, and 3,270 in Ireland. These figures denote the "route mileage"—i.e. the length of the lines irrespective of sidings or of the number of tracks composing each section. Returns showing the "track mileage" of the running lines, and also the length of sidings, reduced to single track, have been obtained by the Board of Trade from most of the companies, and exact figures under these heads are likely to be included in the "Railway Returns" for 1905. An estimate given in the 1904 "Returns" gives the total length of running track as 37,255 miles, the length of sidings reduced to single track as 13,369 miles, and the total length including sidings as 50,624 miles, or more than double the route mileage. 12,517 miles are estimated to consist of double track, 1,178 of three tracks, 958 of four, 102 of five, 49 of six, 14 of seven, and 2 miles as having eight parallel tracks. The facts that so much of the railway mileage of the United Kingdom consists of more than one track, and that the companies possess a length of sidings equal to more than half their route mileage, have hitherto been somewhat overlooked in making comparisons with the railway systems of other countries, where single-track lines predominate and where sidings are less numerous.

The number of companies working railways on Dec. 31st, 1903, was 105 in England and Wales, 8 in Scotland, and 27 in Ireland, 11 of the latter being classified as "light railways authorised under the Tramways (Ireland) Acts."

Five of the English lines are worked wholly by electrical power; four others are partly electric. One of the Irish light railways is electrically worked, and one of the Scotch lines is worked by cable.

The English and Welsh railway companies owned on the date mentioned 19,044 locomotives and 615,733 other vehicles; the Scotch 2388 locomotives and 162,918 other vehicles, and the Irish 844 locomotives and 23,275 other vehicles.

The accompanying tables show the principal railways of the United Kingdom, their mileage (both in "route" miles, and including sidings reduced to single track), capital cost, financial position, rolling-stock, the names of their general managers, and the location of their head offices. The figures given are those for 1903, the 1904 returns being not available at the time of going to press.

### Companies' Capital.

The total paid-up capital of the companies was at the close of 1903, approximately, £1,245,000,000, of which, however, 191,000,000 represent nominal additions due to the consolidation, conversion, or division of stocks. This deduction leaves a total "cash" capital of £1,054,000,000, being £46,980 per "route" mile and £20,820 per mile of single track, including sidings. Of the total capital 38 per cent. consists of "ordinary"

stock, 35 per cent. of "guaranteed and preference," and 27 per cent. of "loans and debentures." The increase in capital during 1903 was £28,000,000, of which about £2,000,000 was due to nominal additions. It has been found impossible for any of our larger railway companies to close their capital accounts, and they constantly incur this class of expenditure, not only in making extensions to their systems, but also for improvements which involve no additions to mileage. When, however, the cost per mile is worked out on a track-mileage, instead of, as usually, on a route-mileage, basis, it will be seen that the capitalisation does not appear so excessive as it is sometimes alleged to be. It is doubtful, however, whether the system of accounts adopted makes proper allowance for depreciation.

### Traffic Receipts.

The continual additions to capital have been to a large extent responded to by constantly increasing traffic, the Board of Trade returns showing an almost uninterrupted annual expansion of receipts during the past half-century. The traffic receipts of the companies for 1903, when compared with those of the previous year, showed an increase of £1,000,000 sterling, or approximately 1 per cent., the total amounting to £103·1 millions as compared with £101·1 millions in 1902. The increase from passenger traffic was slightly less than for 1902 over 1901, while from goods there was a considerable falling off in the rate of expansion. £48,000,000 of the total of £103,000,000 was derived from the former branch of the business, and £55,000,000 from the latter, whilst nearly £8,000,000 was earned from miscellaneous undertakings belonging to the companies, such as steamboats, docks, canals, and hotels, making their total income for the year £110,888,714.

### Passenger Receipts.

Analysing the passenger receipts, we find that the first-class earnings showed an actual decrease in 1903, whilst second-class increased by 1 per cent. only as compared with an increase of 6 per cent. in 1902 over 1901. On the other hand, the increase in the third-class receipts was even larger than that shown in the previous year. As the number of first-class passengers increased, though the receipts were less, and the increase in the number of second-class travellers was greater than the increase in receipts from that class, it is inferred that a considerable transfer of passengers took place from the higher classes to the third. This inference is confirmed by the fact that the increase in the number of the last-named class was exceeded by the increase in the receipts therefrom. The takings from season tickets, excess luggage, mails, etc., also increased, though at a slightly diminished rate. The total increase in the passenger department in 1903 was a little over £500,000. The increase in the number of third-class passengers carried in 1902 was very small as compared with previous years, and in 1903 this slackening in expansion was even more marked, the additional number carried being only 5·5 millions, whereas 30,000,000 or 40,000,000 used to be the normal yearly increase in this class a few years back.

Undoubtedly this change is attributable to the effect of tramway competition upon short-distance railway traffic. To some extent, however, such competition has been met by the issue of third-class season tickets, the receipts from which showed a remarkable increase in 1903. The upward tendency of this class of receipts has been a marked feature of the returns since '99.

### *Goods Traffic.*

As regards goods traffic, the increase in the receipts in 1903 was £446,000 as compared with £1,575,500 in 1902, when, as stated in last edition, the takings from each branch—mineral, merchandise, and live stock—were the largest ever recorded. The total tonnage conveyed in 1903 showed an increase of only 7,000,000 tons, or 1·6 per cent., as compared with an increase of over 20,000,000, or 5 per cent., in 1902 over 1901. Despite the increased tonnage carried, there was a decrease of 10,000,000 miles in the goods-train working in 1903, coming on the top of a decrease of 3,500,000 miles in the previous year. This remarkable result was achieved mainly by the employment of more powerful locomotives and by the greater care taken in getting fuller train- and wagon-loads. The passenger train-mileage, on the other hand, continues to increase at a rate out of proportion to the increase of passenger traffic, indicating that competition between the companies continues to enforce the running of lightly loaded trains. While the receipt per goods train-mile is increasing year by year, the receipt per passenger train-mile has receded since 1901.

### *Working Expenditure.*

Turning to the working expenditure of the companies, a continuance of the check to the growth of this outlay which has been effected since 1901 appears. There was, however, an increased expenditure in 1903 to the extent of £720,000, and the proportion of working cost to gross receipts remained the same as for 1902—viz., 62 per cent. In 1901 the proportion was 63 per cent., to which high-water mark it had attained by continual increases spread over the previous five years. Although the present figure is much higher than it used to be, it is something to have checked the rise which a few years ago made the outlook for the railway shareholder so very gloomy. A leading factor in that rise was the greatly enhanced price of locomotive coal, which reached its zenith in 1901, whereas in the two following years the companies obtained the benefit of falling prices in that department. The saving, however, was not so great in 1903 as in 1902. "Rates and Taxes" in 1903 showed an increase of £265,000, making a total increase of £1,677,000 in this one minor item of expenditure during the nine years since '94—an advance of nearly 60 per cent. The total working expenditure of the companies for 1903 amounted to £68,562,000.

### *Net Earnings.*

The net receipts of the companies in 1903 amounted to £42,327,000, as compared with £41,629,000 in the previous year. As already stated, there was an increase in the paid-up capital of about £28,250,000, and the proportion

of net earnings to capital in 1903 was slightly less than in 1902, being 3·40 per cent. as against 3·41 per cent. For 1901 it was 3·27 per cent. and for 1900 3·41 per cent., so that the profitability of railway business has been well maintained during the past four years. At the time of writing (December 1904) traffic shows a tendency to fall off on account of the general depression of trade and the lessened spending power of the travelling public, but the dividend results for the first half of 1904 were, on the whole, satisfactory, and a few companies were able to increase their rate of distribution.

## III. BRITISH RAILWAYS IN 1904.

The most striking feature of British railway development during the past year has been the conversion of the first two sections of standard surface railway from steam to electric traction for passenger service. The North-Eastern and the Lancashire and Yorkshire ran a close race for the honour of first introducing the newer form of traction on a surface line, and practically the result was a dead-heat. The North-Eastern was the first to give a public service, but its initial opening on March 29th was confined to the section of 5 miles between Newcastle and Benton, whereas the Lancashire and Yorkshire carried the public over the whole 20 miles between Liverpool and Southport on April 5th. The full North-Eastern service, which extends over 37 miles of line in the neighbourhood of Newcastle, was brought into operation on July 1st. The North-Eastern contract was carried out by the British Thomson-Houston Co., and the Lancashire and Yorkshire by Dick, Kerr & Co. In both cases the "third-rail" system of conveying the current to the motors was adopted; and a number of fatalities have occurred on both sections, both to trespassers and to workmen, through unfamiliarity with the dangers of the "live" rail. In all other respects these two important experiments have been distinctly successful, the results all pointing to the fact that electrification, with its quicker acceleration and more frequent service, attracts a larger revenue than steam. During the first three months, in spite of occasional interruptions, the Lancashire and Yorkshire carried 13,000 additional passengers on the Southport line; and in July, when the initial difficulties had been overcome, 57,000 additional passengers were carried. On the occasion of the visit of the Channel Fleet to Tynemouth, the efficiency of the North-Eastern service was very severely tested, and not a single breakdown or interruption was experienced, nor did the heavy snow in November produce any difficulties. The results as to cost of working also are regarded as favourable, though it is difficult as yet to make exact comparisons. In the case of the Mersey line the half-yearly report to June 30th, 1904, showed that the receipts had increased about 25 per cent., and that the cost per train mile had been reduced 42 per cent. by the change. As, however, nearly twice as many trains are run with electricity as with steam, the working expenses were slightly higher than under the old conditions. In Oct. 1904 the North-Eastern commenced to haul goods traffic by electric locomotives on its Quayside branch at Newcastle.

\*\* Nil on "Letterkenny" stock.

**Metropolitan and District Railways.**

Early in 1905 both the Metropolitan and District Railway Companies of London will probably have introduced electric traction on sections of their systems, the complete electrification of both of which has been steadily progressing during 1904. A small portion of the District—between Ealing and South Harrow—has been worked by electricity throughout 1904, and in March the Metropolitan gave a trial trip with the first of its new electrical corridor trains between Harrow and South Harrow, which was followed by an electrical run to Uxbridge in December. The electrical equipment has been completed from Baker Street to Uxbridge, the new line between which place and Harrow was opened on July 4th; whilst on the District the section from the Mansion House to Ealing is the most advanced. On both systems the conversion will take place piecemeal, it being impossible to take the steam trains off one night and begin electric working the next morning. The signalling arrangements of the District have been remodelled to allow of the running of a more frequent service than at present, and the company has obtained powers from Parliament to introduce zone fares and to alter its obligations as to carrying luggage, which otherwise might cause delay at the stations. On the Lancashire and Yorkshire's electric section special baggage cars are run at intervals during the day, so that the passenger trains may not be hindered by taking in and discharging heavy luggage. On all these electrified lines open cars are being used, and the division into compartments is abolished.

The electrified District Railway will form part of a system of lines, over 100 miles in length, which, though nominally divided between a number of companies, will practically be administered as a single concern by the Underground Electric Railways Co. of London, of which Mr. C. T. Yerkes is chairman, and Mr. James Young (formerly of the Glasgow Corporation tramways) general manager. This latter appointment took effect from Nov. 1st, 1904. The Yerkes system includes, besides the District, three new "tubes"—viz. the Baker Street and Waterloo, Charing Cross, Euston and Hampstead, and Great Northern, Piccadilly and Brompton—besides which the extensive system of the London United Tramways is controlled by the same interest. The Baker Street and Waterloo line is finished as between those two points, and considerable progress has been made with its extensions to the Elephant and Castle at the one end and to Paddington at the other. A portion of this line is likely to be opened early in 1905. The Great Northern, Piccadilly and Brompton is about three-parts finished, and the Charing Cross, Euston and Hampstead more than half-way towards completion. Altogether the new lines under construction by the Underground Electric Railways of London extend over 27 miles, mainly underground, and they will give London no less than 52 new stations, 30 of which are located in congested districts. Including the electrification of the District, the huge sum of £16,000,000 is being spent upon the Yerkes system; whilst the electrification of the Metropolitan must be costing that company several million pounds.

**New Routes, etc.**

Outside London the most important British railway event of 1904 has been the opening of

the Midland Company's new route to Ireland and the Isle of Man *via* Heysham (Lancashire), which took place on Sept. 1st. This has involved the construction of extensive harbour works at Heysham and the provision of four new cross-channel steamers, two of which are propelled by turbine machinery. The harbour has a quay length of 3000 ft., and landing facilities at all states of the tide. It is equipped with passenger station, goods sheds, fish stage, and electrical plant for lighting and working the cranes and lifts. There are two long breakwaters, which are over a mile apart where they leave the land, but gradually converge to a mouth 300 ft. across. Sailings take place daily between Heysham and Belfast and Heysham and Dublin, and twice weekly between Heysham and Londonderry. It was in view of the opening of this new cross-channel route that the Midland purchased the Belfast and Northern Counties Railway in 1903, and in 1904 they arranged to acquire the Donegal Railway and to join hands with the Great Northern of Ireland in constructing a new line from Convoys to Letterkenny, in order to improve the communication with the north-west of Ireland. In order to meet the new competition of the Midland, the London & North-Western and Great Northern of Ireland Companies accelerated their service from May 1st between London and Belfast *via* Holyhead and Greenore, a saving of 1 hour and 10 minutes being effected in the outward journey. The Great Western of England and the Great Southern and Western of Ireland have made considerable progress during the year with the construction of their new route to the South of Ireland *via* Fishguard and Rosslare. This scheme embraces the construction of a large and commodious harbour at Fishguard, in Pembrokeshire, connected with the system of the Great Western Railway, the running of a first-class cross-channel service, the construction of a harbour at Rosslare with a railway from that place to Waterford, and the taking over of the existing railway from Waterford to Fermoy, so as to make connection with the Great Southern and Western system and provide a new direct route to Cork and Killarney. For the purpose of carrying out these works, which are now well advanced towards completion, a new company has been formed called the Fishguard and Rosslare Railways and Harbours Co., which is practically a joint committee of the Boards of the two parent companies. Two large bridges are being built over the rivers Barrow and Suir, near Waterford. Against this scheme also the London & North-Western Co. has taken defensive measures, having formed an alliance with the Dublin, Wicklow and Wexford Railway, whose extension line to Waterford was opened on June 1st, 1904. This gives the North-Western a route to the south of Ireland independent of the Great Southern and Western, and provides a charming circular tour from Dublin to Killarney and back again, enabling the traveller on either the outward or homeward journey to pass through the hitherto little-known beauties of Wicklow county. A new turbine steamer was put on the Stranraer and Larne route between England and Ireland in June by the joint railway companies.

**New Harbours, etc.**

On July 12th, 1904, M. Cambon, the French Ambassador in England, laid the final stone of

the important harbour extension works carried out by the South-Eastern and Chatham Railway Co. at Folkestone, which include the extension of the pier for a distance of 900 ft. and the provision of a new station platform, running from end to end of the pier extension, and six new landing-stages. At Dover the Harbour Board have nearly completed the commercial pier which they have been constructing inside the new National Harbour works at that port; and from July 8th the Hamburg-American line made Dover their English port of call, thus giving that place its first connection with the Trans-Atlantic trade, a new development which should prove of considerable advantage to the South-Eastern and Chatham Railway Co. At Southampton the London & South-Western Railway Co. have completed the largest refrigerating plant in Europe, and have leased the premises, which are situated on the Test Quay, to the International Cold Storage and Lairage Co. The equipment overides for the slaughtering of cattle as well as for coldstorage of all kinds of produce, and a large business is being developed. The South-Western is also completing a new graving-dock at Southampton, which will be the second largest in the kingdom. In order to secure the full advantages of the union of management between the South-Eastern and Chatham, the managing committee of that system opened on July 1st the new loop lines constructed by them at Chislehurst and Bickley, which enable trains to be more easily, transferred from the one railway to the other and shorten the distances between London and many important points. The London, Brighton and South Coast Co. has made good progress during the year with the reconstruction and enlargement of its terminus at Victoria, London; and it is expected shortly to commence an experimental installation of electric traction in that neighbourhood.

### Train Accelerations.

A notable railway event of 1904 was the running by the Great Western Railway Co. of a new "limited express" between London and Penzance during the summer months, which performed the journey between London and Plymouth (246 miles), without any intermediate stop, in 4 hours 25 minutes. This train ran with great success from July 1st to Sept. 30th, establishing a new "world's record" in long-distance railway travelling.

In connection with the calling of the "American" line steamers at Plymouth as well as Southampton, some very fine work was done by both the Great Western and South-Western in April 1904, the former bringing the mails to London on one occasion in 3 hours 46 minutes (Millbay to Paddington). From May 1st the London & North-Western put on an accelerated service, covering the 188 miles between London and Manchester in 3½ hours, with only one intermediate stop, at Stockport, 183 miles from London. From Oct. 1st the Great Northern and North-Eastern provided a new day train from London to Newcastle, covering the 272 miles in 5 hours 12 minutes. From the same date the North-Eastern put on a very fast train from York to Edinburgh, which is timed between York and Darlington at 61·7 miles per hour, and accomplishes the 83 miles from York to Newcastle in 83 mins. From July 1st, 1904, the North-Western and Brighton Companies ran

a new through service between the north of England and the Sussex health resorts.

### Rail-Motor Cars.

For improving the short-distance "pick-up" services on our railways the use of rail-motor cars—initiated by the South-Western and Great Western in 1903—has rapidly found favour. The Great Western leads this development with some 50 "rail-motors" running or on order; and many other companies have followed suit in England, Scotland, and Ireland. All these are steam-propelled, with the exception of two put into service on the North-Eastern which are petrol-electric *i.e.* (a gasoline engine drives a dynamo which generates electricity for running the car). The Great Northern is experimenting with a direct-driven petrol car of the road-motor type. Several railway companies, notably the Great Western, have put on services of motor omnibuses during 1904 to bring undeveloped districts into connection with their systems, and the North-Eastern has entered into an agreement with a Yorkshire dairy association to provide a service of motor wagons between its railway and a dépôt provided by the Association. Steam wagons with trailers are to be employed.

### New Railway Schemes.

Two very important schemes for extending the sea-power of railway companies on the eastern side of England received the approval of Parliament in 1904. The Lancashire and Yorkshire obtained powers to work steamships between Goole and Hull and a large number of Continental ports, including Hamburg, Antwerp, Heyst, and Ghent, the scheme including the purchase of the fleet of the Goole Shipping Company by the Railway Company. The Humber Commercial Railway and Dock Act of 1904 empowers a company which is practically an offshoot of the Great Central to construct a new dock at Immingham, 5 miles up the Humber from Grimsby, with railway connection with the Great Central system. The Great Central also obtained powers in 1904 to absorb the Wrexham, Mold and Connah's Quay and Buckley Railways, and the amalgamation takes effect from Jan. 1st, 1905. In connection with the new lines which the Great Western and Great Central are constructing in the neighbourhood of London, and which will give the latter a new access to its Marylebone terminus from the North, a new agreement has been made with the Metropolitan, over whose northern extension the Great Central trains at present run. It is understood that the line between Quainton Road and Harrow, at present owned by the Metropolitan, is to become "joint" with the Great Central, who are also to become owners of the duplicate lines between Harrow and Neasden. Full terms of the agreement have not yet been published. It is understood that the running of Great Western trains over the Metropolitan will terminate when the latter is electrified, and the Great Western is promoting a new line to Shepherd's Bush with an exchange station with the Central London.

### Railway Rates.

In regard to railway rates an important new departure in 1904 was the prosecution of traders by the companies—acting in concert through the Railway Clearing House—for misdeclaration

of freight. The practice of misdescribing goods on consignment notes in order to evade the payment of higher-class rates had become very prevalent, especially amongst importers from the Continent; and the companies, at the instigation of the Birmingham Chamber of Commerce, have taken steps to suppress the practice, which is very unfair to honest traders, under the powers given to them by the Railway Clauses Act of 1845. At the time of writing the North-Western have obtained convictions in five cases and the Midland and Great Northern in one each, one prosecution by the Midland having failed. The information necessary to obtain these convictions is obtained by inspectors appointed by the Railway Clearing House, who examine the contents of consignments of goods and compare them with the description given them by the consignors. The maximum penalty is a fine of £10 for each offence. The North-Western was also successful in 1904 in obtaining the conviction for perjury of a man who made a bogus claim for £5000 in connection with a slight collision at Euston Station. A sentence of nine months' hard labour was imposed. A departmental committee of the Board of Trade has been inquiring into the alleged preference given to foreign produce in the matter of rates on British railways; whilst a Select Committee of the House of Commons has taken evidence on the subject of workmen's trains.

#### **Accidents, 1903.**

As regards railway accidents, the returns made by the Board of Trade in 1904 showed that in the previous year 1 in 47,793,320 passengers was killed and 1 in 1,540,745 injured in train accidents. These figures are exclusive of journeys by season-ticket holders. In 1902 the proportions calculated on the same basis were 1 in 108,056,545 killed and 1 in 1,623,250 injured. The rise in the proportions was due mainly to the lamentable catastrophe at St. Enoch Station, Glasgow, in 1903, in which 16 were killed and 64 injured. The total killed by accidents to trains, rolling stock, permanent way, etc., in 1903 was 34, and 919 were injured; 25 of the killed and 769 of the injured were passengers, the others being servants of the companies, or other persons. Twenty-three railway servants were killed and 506 injured whilst coupling and uncoupling vehicles, out of a total of 516,000 employed, exclusive of the clerical staff. The total number of personal accidents reported to the Board of Trade by the several railway companies was 1242 killed and 18,557 injured. More than half of the accidents which occur on railways, whether to passengers or servants, are, in the opinion of the head of the railway department of the Board of Trade, due to want of common care and caution on the part of the injured persons. The relations between the railway companies and their employees during 1904 have not been disturbed by anything of the nature of a strike. The Amalgamated Society of Railway Servants has not yet recovered from the effects of the heavy damages which it had to pay in 1903 to the Taff Vale Railway Company in connection with the strike on that line in 1900. An even more serious result of that event to the Society and to all other trade unions is the loss of the immunity from liability for the acts of their agents which they had hitherto been supposed to enjoy.

#### **IV. LIGHT RAILWAYS.**

From various causes there has been a falling off in the number of applications made to the Light Railway Commissioners during 1904. The list published in May showed 8 applications only as compared with 22 at the corresponding period of 1903. Only four of these were for powers to construct, the other four being for amending orders only. The new mileage asked for was  $4\frac{3}{4}$  miles, and the capital to be expended was estimated at £217,643. In November the number of applications was 18, of which 12 asked for powers to construct, the new mileage proposed being  $140\frac{1}{4}$  at an estimated cost of £1,180,244.

On June 27th, 1904, the **Leek and Manifold Light Railway** was formally opened by the Earl of Dartmouth, Lord Lieutenant of Staffordshire, in the presence of a large company. The line is 8 miles 8 chains in length, and is on the 2 ft. 6 in. gauge. At one end it connects with the Buxton and Ashbourne branch of the London and North-Western, and at the other it is to join the Leekbrook and Waterhouses extension of the North Staffordshire, a line of ordinary gauge now under construction. The terminal stations are Hulme End and Waterhouses, whilst there are seven intermediate stations. The line is worked by the North Staffordshire Company, who are running a motor omnibus to connect it with their system at Leek pending the completion of their extension railway. The trucks have bodies of the standard gauge, which can be transhipped directly to the main lines without unloading.

In Nov. 1904 the formal opening took place of the **Wakefield and District Light Railway Company's** system. The lines, which include one from Wakefield to join the Leeds Corporation tramways at Stourton, run along the public roads, and are driven by overhead trolley wires. They are therefore practically electric tramways, although the authority to construct the main part of the system was obtained from the Light Railway Commissioners.

**Rainy, Robert, D.D.** (Glasgow and Edin.), b. in Glasgow 1826. Ed. Glasgow University, graduated M.A. '43. Having joined the Free Church of Scotland, he studied theology at New College (Edin.) '44 to '48. Ordained minister of Free Church, Huntly, '51. Elected to Free High Church, Edinburgh, '54; Professor of Church History, New College, Edinburgh, '62; Principal, '74. Dr. Rainy takes the first place in Scotland as an ecclesiastical statesman and leader. He was elected Moderator of the Free Church '87, and First Moderator of the United Free Church of Scotland, Oct. 31st, 1900. He was extruded, with all his colleagues, from the College Buildings in virtue of the Lords' decision in the Scottish Church case, Oct. 31st, 1904. His chief works are "Three Lectures on the Church of Scotland" ('72), "The Delivery and Development of Christian Doctrine" ('74), "The Bible and Criticism" ('78), and "Epistle to the Philippians" ('92), "History of Ancient Catholic Church" (1901), "Sermons" (1902). Address: 8, Rosebery Crescent, Edinburgh.

**Rawson, Vice-Admiral Sir Harry H.,** K.C.B., Governor of New South Wales, was b. at Walton-on-Hill, Lancashire, Nov. 5th, 1843; ed. at Marlborough, and entered the

Navy in April '57, becoming Lieutenant '63, Commander '71, Captain '77, Rear-Admiral '92, and Vice-Admiral '98. He has seen service in the China War '58-61, was principal transport officer in the Egyptian War '82; while in command on the Cape of Good Hope Station organised the expeditions against the rebel chief Mbaruk '95 and Benin '97, and bombarded the Sultan of Zanzibar's Palace '96. He jumped overboard and saved a marine in the Shanghai river '61, and in '70 gained the silver medal of the Royal Humane Society. In '78 he received the thanks of the Admiralty for the arrangements made for the defence of the Suez Canal, and was a member of the International Signal Committee '92-5. From '98 to 1901 he commanded the Channel Squadron, and in Jan. 1902 was appointed Governor of New South Wales.

**Record Office, Public.** The public records and state papers are preserved in this office, which is situated between Chancery Lane and Fetter Lane. Previous to the erection of this building they were stored in the Chapter-house of Westminster Abbey, the Tower, the Rolls Chapel, the State Paper Office, the King's Mews at Charing Cross, and the Carlton Ride. Among the more interesting books at the Office is the *Domesday Book* of William the Conqueror. A *Record Commission* was established in 1800 to search the records, examine their state, and publish such of them as they thought of sufficient interest. The publications of this Commission, which expired in 1837, were 54 in number, and included transcripts in full of many of the more important records. In 1837 the Master of the Rolls was constituted *Keeper of the Public Records*, and under his direction the publication of calendars and indexes of the Records has made extensive progress, thus rendering them readily accessible to the public. There are public search rooms at the Office, where the records and state papers may be freely consulted by historians and others.

**Red Cross Council, The Central British,** was formed in Jan. 1899, with the approval of the War Office: (1) To act as the recognised medium of communication with the Red Cross organisations of other countries; (2) To be the medium of official communication between the naval and military authorities and voluntary aid societies and their branches; (3) To promote the extension and organisation of voluntary aid resources throughout the empire. The Council consists of representatives of the National Society for Aid to the Sick and Wounded in War; of the St. John Ambulance Association; of the St. Andrew's Ambulance Association; of the Army Nursing Service Reserve; of the Admiralty; and of the War Office. **President,** H.M. Queen Alexandra; **Chairman,** Viscount Knutsford, G.C.M.G.; **Hon. Treasurer,** Sir John Furley, C.B.; **Hon. Secretary,** Major T. McCulloch, M.B., Deputy Assistant Director-General A.M.S. **Office,** 68, Victoria Street, London, S.W.

**Reid, The Rt. Hon. G. H.,** in 1904 appointed Prime Minister of the Australian Commonwealth Parliament, was b. at Johnstone, Renfrewshire, 1845, and is the son of a Presbyterian minister. His parents went to Melbourne in '52, and to New South Wales in '59. Mr. Reid embarked upon a legal career, and was called to the New South Wales bar, but soon entered politics, and was elected as member for East

Sydney in '80. In '83 he was appointed Minister of Education, and rapidly advanced his influence with his party. He is an enthusiastic free trader. When Sir George Dibbs' ministry was overthrown in '94, Mr. Reid, who had been leading the Opposition since '91, was made Premier. He visited England for the Jubilee celebrations in '97, and was made a member of the Privy Council. In '98 he became K.C. After carrying the Bill through which ensured the colony's adhesion to the Federation movement, though he himself had previously been by no means enthusiastic in its support, he was defeated and resigned office in Sept. '99. He was returned to the Commonwealth Parliament in 1901, and was the leader of the Opposition till, on the defeat of the Labour Cabinet under Mr. Watson in 1904, he became Prime Minister. See AUSTRALIA.

**Réjane, Gabrielle,** the great French actress, was b. at Paris in '57, and is the daughter of an actor. Having received her professional education at the Conservatoire, she made her *début* at the Paris Vaudeville in '75. Her talent admitting a great variety of characters, she created a number of rôles on the boards of the Ambigu, the Palais Royal, the Odéon, etc. She has appeared at Brussels and in London. Her repeated visits to the English capital have made her a favourite with the British as well as the French public. Of her principal parts one may mention specially "Madame sans Gêne," "Sapho," "Lysistrata," "Divoçons." She is married to M. Désiré Paul Porel, director of the Vaudeville.

**Richter, Eugen,** a German writer and a leading politician on the Liberal side, was b. July 10th, 1838, at Düsseldorf. He pursued his university studies at Bonn, Heidelberg, and Berlin; entered the Prussian Civil Service, which he left again, and for good, in '64, settling at Berlin as a journalist. In '67 he entered on his Parliamentary career. He soon rose to be a leader of the party of progress. Endowed with great oratorical power, a strong individualist, he has ever combated, in favour of freedom, the extension of the power of the State, and persisted in a negative opposition, on the one hand to Bismarck, on the other to the Socialists. His power, once very great, and acknowledged by Bismarck himself, has of late years decreased, as have the numbers of his party. He is always strong on financial questions, public debt, etc. He has written memoirs, "Jugenderinnerungen" and "Im alten Reichstag."

**Richthofen, Baron Oswald von,** German Secretary of State for Foreign Affairs, was born Oct. 13th, 1847, at Jassy. His father was also a Prussian diplomatist. Thus he had the advantage of early travel and residence in many foreign countries. He served in the Franco-German war, and won the Iron Cross for valour. In '75 he entered the Foreign Office, and from '85 till '96 he represented Germany on the International Commission for the administration of the Egyptian Debt, and took a prominent part in the regulation of the finances of that country. In '96 he became Director of the German Colonial Department, in '97 Under Secretary of State for Foreign Affairs, and in Oct. 1900 he succeeded Count von Bülow as Foreign Secretary.

### RELIGIOUS REVIEW OF 1904.

The Education controversy, to which reference was made last year, continues to exercise a baleful influence on religious life and work in England. The actual working of the Act has neither been so helpful to the Church of England as some of those who favoured it hoped, nor so harmful to Dissent as many who opposed it feared. This result, however, has not diminished the dislike with which the Act is regarded by the majority of Nonconformist ministers, and they have been the leaders of the *Passive Resistance Movement* in refusing to pay the rates levied under the Act. As a consequence of this action there have been many breaks in the co-operation hitherto existing between the clergy and ministers in temperance and social work. It is specially noticeable that the Evangelical clergy, who have hitherto regarded Dissenters as allies, no longer regard them as such. The chief organ of the Evangelicals is the *Record*, and no High Church paper has equalled this journal in its condemnation of Passive Resistance.

The Rationalistic attack, in which the *Clarion* played a leading part during 1903, degenerated in 1904 into an attack on Christians and especially on Christian ministers. The result shows that very much of the modern objection to Christianity is not concerned with the Gospel, but with the interpretation given of it by church- and chapel-goers.

In 1904 a great advance was made in the Church of England by the first meeting of the *Representative Church Council* on July 7th in the Church House, London. The Council consisted of the two houses of Convocation and of the two houses of Laymen meeting together, and forming, for the first time, a body that might fairly claim to voice the opinion of the whole Church of England. The greater part of its session was devoted by the Council to the consideration of its own existence, dangers, advantages, and future possibilities. More attention, indeed, was given to the real dangers attending the existence of the new body than to any possible advantages it may confer on Church or realm. The lay members were quite as willing as the clergy to devise safeguards against any interference on the part of the Council with the episcopal government of the Church, and a genuine attempt was made to regulate and control any possible lay interference in matters of doctrine and discipline. This conservative temper was reassuring to many members of the Church of England, who had feared that the new Council would attempt to exercise powers which are inherent

in the episcopate only. On the other hand, the Council showed a progressive spirit in the way in which it handled social questions; and it adopted by a two-thirds majority a resolution "that the initial franchise of the electors should be extended so as not wholly to exclude women." The Council promises to add another to the existing modes of carrying on the work of the National Church upon practical lines suited to present-day needs.

The eighth quinquennial meeting of the *Pan-Presbyterian Council* was held in Liverpool on June 29th, and drew attention to the importance of Presbyterianism, its virility and growth, and its existence in many lands. Delegates were present from almost every part of the world, representing 32,260 churches, 20,000,000 to 25,000,000 people, and an annual income of £8,042,000.

The Autumn Assembly of the *Congregational Union of England and Wales*, held at Cardiff, was remarkable for the adoption of a *New Congregational Constitution*. This was the result of a movement begun two years before by the Rev. Dr. Parker, when chairman of the Union; but the reforms now adopted come far short of the extensive programme sketched by Dr. Parker. Under the new constitution the autonomy of individual congregations is not affected, and the half-yearly assemblies of the Union are to be held as formerly. The Committee of the Union, however, is to be superseded by a Council of 300 members chosen by the County Associations, and the scope of this new Council's work is much wider than that of the old Committee. It is also provided that the Council must submit departmental reports every year to the Assembly for confirmation, and that not more than one-third of its members may be pastors of congregations. One peculiar feature is found in the large number (over 600) of honorary members added to the Council *ex officio*, with the right to speak but not to vote.

The *Scottish Free Church* litigation during the year gave positive proof of the *Decay of Calvinism*, a fact of much significance in the religious life of the time. Calvinism has long been losing ground in England, but the system seemed firmly entrenched in Scotland, where it dominated the creed of all the Presbyterian Churches. It is now plain, however, that Calvinism has lost its hold on the Scottish people, and this in spite of the fact that it has recently received powerful and unexpected allies in modern scientific theories. Heredity and evolution, as these are expounded by the followers of Darwin, lend considerable support to the Calvinistic dogmas of original sin and election. The cause of the decay of Calvinism is chiefly to be found in the general acceptance of the

doctrine of the Fatherhood of God, which has displaced the Calvinistic conception of the Divine Sovereignty. This acceptance has led to the abandonment of the doctrine of Reprobation which is a necessary outcome of the Calvinistic Creed, and is thus stated in the Westminster Confession of Faith, "The rest of mankind (*i.e.* the non-elect) God was pleased to ordain to dishonour and wrath." It has also led to a modification of the doctrine of Election, which is now interpreted to mean election to service rather than to favour or honour. The modern mind is apt to regard a clear-cut logical system like Calvinism with suspicion, as being certain to express but one side of the truth. More and more our age is inclined to find truth, not in any one system, but in the union of opposites.

In the Church of England the year 1904 saw the rise of an influential movement against the use of the *Athanasian Creed*, which is prescribed by the Prayer Book to be sung or said thirteen times yearly. A large deputation of clergy waited on the Primate at Lambeth early in the year, and besought his influence to get this rule altered or relaxed. Soon after, a counter deputation, organised by the English Church Union, attended at Lambeth. In the discussions that ensued, one fact is most remarkable as compared with what occurred during a similar agitation twenty years ago. Then the movement originated with the Broad Church party, and High and Low Churchmen stood shoulder to shoulder in resisting it. Now the opposition has come entirely from High Churchmen, and the movement against the use of the Creed has been engineered by Low Churchmen. Practically, the agitation effected nothing, for no change can be made without the authority of Parliament, and in view of the strong opposition, it is unlikely that Parliament will be approached.

During 1904 an evangelistic mission on a large scale has been conducted in England by two Americans named Torrey and Alexander. These evangelists addressed numerous meetings in Dublin, Bristol, Glasgow, Liverpool, and other large towns, on the invitation of the local Evangelical clergy and ministers. The attendance was very large, and great numbers of conversions were said to have resulted. The Mission recalled former ones conducted by Messrs. Moody and Sankey, but there were certain differences worthy of special note. The present evangelists have the same theology as their predecessors, but this theology is not now accepted by all those who have invited the evangelists. The Evangelical clergy, indeed, appeared to be perfectly satisfied with Messrs. Torrey and Alexander's theology, but many Nonconformists (and especially Congregationalists) expressed dissatisfaction, and even held aloof from the Mission. Reports were fairly unanimous in testifying that the two evangelists had not reached the non-churchgoing masses, but that they had stirred up many professing

Christians who had lapsed into religious idleness.

During the year a Ritual Commission was appointed by Government, to receive evidence in regard to ceremonial excesses and defects in the Church of England. Its proceedings are conducted in private, but a full report will ultimately be laid before Parliament. Meantime an attempt has been made by the Dean of Canterbury to provide a basis on which High and Low Churchmen may unite in regard to ceremonial. He proposed that nothing shall be accepted as truly Catholic which cannot claim the general assent and observance of the Christian Church before the end of the sixth century. This proposal, in the form of a pamphlet, was sent to all the clergy, and those who agreed with it were invited to communicate with Dean Wace. Unfortunately he included in the pamphlet an article by Canon Meyrick, who applied the rule laid down by Dr. Wace, but did so in a one-sided and partisan manner. This aroused the suspicions of High Churchmen, who would otherwise have welcomed Dean Wace's proposal, and in consequence very few of them have intimated their acceptance of it.

The Centenary of the British and Foreign Bible Society was observed in March, not only in England, but throughout the world. Later in the year the Young Men's Christian Association celebrated its 60th anniversary, Sir George Williams, the founder of the Association, being present at the London meeting. By the end of the year the Wesleyan Centenary Fund reached the £1,000,000 aimed at when it was instituted.

Two incidents in the religious life of America have attracted much attention here. One was the enthusiastic reception given to the Archbishop of Canterbury as the chief representative of English Christianity, and the other the Union Movement in Canada, which is meant to unite the Presbyterians, Congregationalists, and Methodists into one fellowship. The success which has attended this movement, and the results already reached by it are most encouraging, and there seems ground for hoping that these three denominations will ere long form a United Evangelical Church in Canada.

A conference of ministers of Free Liturgical Churches was held in May at Christ Church, Westminster Bridge Road, London, with the object of forming some federation between the Countess of Huntingdon's Connexion, the Free Church of England, the Reformed Episcopal Church, and other unattached Churches which use in the main the Liturgy of the Church of England. It was stated that the conference represented 137 Free Liturgical Churches. It was resolved that in view of a closer union in Christian work and worship a committee be appointed to consider the possibility of a federating union between the Churches represented, and to take such steps as they might deem desirable to secure such union.

## THE CHURCH CRISIS IN SCOTLAND.

(See articles on United Free Church of Scotland and Free Church of Scotland, pp. 558-9, and for Legal Aspect see p. 320.)

The year 1904 witnessed in Scotland a Church crisis which is almost unparalleled in the history of Christianity. It arose through a decision

given by the House of Lords, in an appeal against a judgment of the Scottish Court of Session, which decided that the minority of the Free Church of Scotland who refused to enter into union with the United Presbyterian Church had no right to any part of the funds

or property of the Free Church. The House of Lords, by a majority of 5 to 2, reversed this judgment, and decided that the minority were entitled to all the funds and property of the Free Church of Scotland.

### **Claim of the Free Church.**

This body consists of members of the Free Church of Scotland who opposed the union effected on Oct. 31st, 1900, between the Free Church and the United Presbyterian Church, and who refused to enter into it. They numbered about 30 ministers, 100 congregations, and 50,000 members and adherents, nearly all of whom belonged to the Highlands.

For many years they had viewed with uneasiness what they regarded as the gradual abandonment by the Free Church of the principle of National religion (*i.e.* the support of an Established Church), and the adoption by a majority of its members of principles akin to those of the Liberation Society. With greater concern they had witnessed the doctrinal development of the Free Church in a direction that seemed to them at variance with the Confession of Faith (the standard of the Church), and they had protested against the passing of the Declaratory Act of 1892, which modified the Calvinistic doctrine of the Confession, if indeed it did not contradict it. They were also alarmed at the progress made in the theological colleges of the Free Church by the Higher Criticism, which seemed to them to aim at destroying faith in the Word of God as an infallible guide. When, with opinions such as these, they were asked to join with the United Presbyterian Church, which was avowedly opposed to all state establishments of religion, and which had been the first Presbyterian Church to qualify the Confession of Faith by a Declaratory Act (1879), it seemed to them that to consent to such a union was to deny the fundamental principles of the Free Church of Scotland. They therefore refused to enter into the union; and as they maintained the original principles of the Free Church from which the majority had departed, they claimed as their right to hold and control all the funds and property of the Church.

### **Claim of the United Free Church.**

The majority of the Free Church of Scotland who united with the United Presbyterian Church effected this union in accordance with the constitution of the Free Church. After years of discussion the final motion for union was carried in the supreme court of the Church (the General Assembly), by 643 votes against 27. It seemed to the majority that, as they had carried the union by constitutional means, the minority should have acquiesced in it. They claimed that by the union they had abandoned no fundamental doctrine of the Free Church. The principle of establishment they did not regard as fundamental; but even this principle was not negated in the union, but was left as an open question, on which different opinions could be held. They did not admit that they had abandoned the doctrine contained in the Confession of Faith, and maintained that the Declaratory Act of '92 was meant for the relief of conscientious scruples, and was supplementary to the Confession, but not contradictory to it. As they had always acted in accordance with the constitution of the Church and in exercise of the powers conferred on them by that constitution,

they claimed that they were the true representatives of the Free Church (from which the minority had broken away), and as such entitled to hold and control all the property of the Church. They denied the *bonâ-fide* character of the list of 100 congregations framed by the Free Church.

### **Decisions of the Scottish Courts.**

The pleas in law were first heard before Lord Low, the Lord Ordinary in the Court of Session. He delivered his judgment on Aug. 9th, 1901, and decided on all counts against the minority styled the Free Church of Scotland.

An appeal was at once lodged, and this came before the Second Division of the Court of Session on May 13th, 1902. The three judges, Lords Kingsburgh (Lord Justice Clerk), Young and Trayner, unanimously dismissed the appeal, and approved the judgment of the Lord Ordinary. From this decision the minority appealed to the House of Lords.

### **Decision of the House of Lords.**

The appeal was first heard by Lord Halsbury (Lord Chancellor) and Lords Macnaghten, Shand, Davey, Robertson and Lindley, on Nov. 26th, 1903. Before the Court could pronounce judgment Lord Shand died; and it is believed that had he lived no decision could have been given, as the Lords were equally divided. Two new judges were appointed—Lord Alverstone (Lord Chief Justice), and Lord James of Hereford, who had never before sat as a judge. The re-hearing began on June 9th, and the judgment was pronounced on Monday, Aug. 1st, 1904. Lords Halsbury, Alverstone, Robertson, Davey, and James of Hereford decided in favour of the minority, reversed the appeal, and remitted to the Court of Session to order the United Free Church to hand over to the minority all the funds and property of the Free Church of Scotland. From this judgment Lords Macnaghten and Lindley dissented.

Each of the Lords declared the reasons of his judgment, and from these it is evident that the majority regarded the case as one in which they had to decide as to whether or not there had been a breach of trust on the part of those members of the Free Church who had joined with the United Presbyterians. The original principles of the Free Church were defined in the standards of the Church and in the declarations of its founders, and its property must be administered in accordance with these principles. This could not be done by the United Free Church, for—

(1) The Establishment principle, which was an essential element of the constitution of the Free Church, was not essential to the constitution of the United Free Church, and

(2) The majority had no power to alter or modify by a Declaratory Act or in any other way the doctrine of the Free Church, and by such alteration or modification they had departed from the constitution of the Free Church, and could no longer hold the funds or property, which must be administered by those who remained faithful to its original principles.

The Lord Chancellor went further than his four colleagues, as he maintained that by the Declaratory Act the majority of the Free Church had not only modified the Calvinism of the Confession, but had contradicted it, and from being Calvinistic had become Arminian.

The two lords who dissented from the judgment did so on the following grounds:—

(1) The Establishment principle, though great importance was attached to it in 1843, was never made an article of faith in the Free Church. It was more of the nature of a pious opinion than a fundamental belief.

(2) The Free Church was not bound in perpetuity to the standards of 1843, but had the right to revise these and to modify the formulae by which her ministers received them. This right was inherent in the General Assembly of the Free Church. The United Free Church is simply the Free Church lawfully enlarged, and is therefore entitled to hold and administer all the funds and property of the Free Church.

### *Effects of the Judgment.*

All the invested funds of the Free Church, its colleges, schools, churches, and manses in Scotland, have become the property of the minority who are now declared to be the legal Free Church of Scotland. The value of this property is estimated at £5,000,000.

The claim of the Free Church to exercise all the rights of a self-governing body, and to alter or modify its doctrine, worship or discipline without the interference of the State, is, so far as it is a Trust body, declared to be illegal. The Church, as a Trust, is bound by its constitution, which it has no right to alter without the authority of Parliament.

Perhaps the word "amazement" best describes the way in which the Lords' judgment has been received by the country. There has been no suspicion of unfairness on the part of the judges, much less of incompetency; but the general feeling has been that while the decision may be according to law it is not according to equity. As the case proceeded it became apparent that most of the Lords were favourable to the plea of the minority, and it was anticipated that the minority would receive their full share of the funds and property in dispute, and that they would escape the legal expenses. This anticipation was based partly on the two decisions of the Scottish Courts, and partly on the fact that three-fourths of the money and property of the Free Church had been raised and acquired by the majority who had entered into the union. There was also the feeling that, as the minority could not possibly administer all that they claimed, they would not receive more than they were able to administer. It was also felt that in uniting with the United Presbyterian Church the majority had acted under the influence of the highest Christian motives, and from a sincere desire to promote peace and concord. Nor could it be forgotten that the Free Church was called into existence in order to escape the controlling power of the State, and that if such control were still to be exercised, the heroism and self-sacrifice of the Disruption had been all in vain.

In Scotland the announcement of the Lords' judgment was received at first with incredulity. It says much for the character of the people, and especially for their respect for law, that there has been no outcry against the judgment, and an attempt to work the situation in favour of Home Rule for Scotland met with failure. The general feeling was that the judgment must be accepted and carried out, but not so as to cause spoliation or the wreckage of the United Free Church. It is natural that the people of

Scotland should prefer the verdict of their own judges on a purely Scottish question, to the verdict of English peers, who for the most part were previously unacquainted with Scottish ecclesiastical affairs. In justification of this preference is the fact that the Scottish Establishment has a much larger measure of freedom than the Church of England and is much more self-governing, so that Scottish judges are accustomed to admit Church claims to independence which English judges have never allowed.

### *The Present Position.*

In the case of an appeal from the courts in Scotland, the judgment of the Lords does not take effect until it has been reported to the Court of Session and applied. That Court was in vacation, and did not sit until the middle of October. On Oct. 18th the judgment was made operative by decree of the Court of Session.

The United Free Church opened the Edinburgh College session in the New College buildings, as usual, in the middle of October, with about 100 students; but were shortly afterwards evicted by interdict. The University authorities courteously placed class-rooms at the disposal of the United Free Church professors. The Free Church subsequently opened their session, with 8 students.

In accordance with the judgment of the House of Lords, the General Trustees of the United Free Church denuded themselves of all the properties held by them in favour of new Trustees appointed by the Free Church. Besides invested funds, amounting to £1,052,000, these include the Assembly Hall, Church Offices, Theological Colleges in Edinburgh, Glasgow, and Aberdeen, the Normal Colleges in these three cities, and several other properties, a few church buildings, and properties at some of the mission stations abroad.

The Free Church claim a legal title to all churches held by congregational trustees for congregations of the Free Church, and are proceeding by way of interdict to acquire possession. Wherever there was a clear majority belonging to the Free Church, the United Free Church have consented too interdict, and also to its being made perpetual. In some other cases, where interim interdict has been granted, but where a clear majority of communicants belong to the United Free Church, appeal has been taken from the Lord Ordinary to the Inner House, so as to keep the matter open for the Royal Commission. About 20 cases have been mentioned in court, almost all of them in the Highlands. The adherents of the Free Church there have also taken forcible possession of several other churches. The authorities of the Free Church have also formally claimed the surrender of about 80 additional churches by the United Free Church congregations, some of these in places where no Free Church congregation has been organised.

On Nov. 15th a Convocation was held in Edinburgh, and was attended by 1420 ministers and 1320 elders, representing every congregation in the U. F. Church. The Convocation unanimously agreed to stand by the Union and to defend their rights. In addition every foreign missionary formerly connected with the Free Church declared his adherence to the United Free Church.

All attempts at compromise having failed, chiefly through the unbending attitude of the

Free Church, it was authoritatively announced in December that the Government would appoint a **Royal Commission** to deal with the case. Till the Commission begins its work, **Sir John Cheyne, K.C.**, a well-known member of the Church of Scotland, was appointed to determine without prejudice to the eventual rights of parties what should be the interim state of possession of churches, mansees, etc., but his authority is dependent upon the agreement of parties to recognise it.

The names of the Commissioners were announced (Dec. 13th) as follows: The Earl of Elgin, Lord Kinnear, and Sir Ralph Anstruther. The duty of the Commissioners is "to inquire into all the facts connected with the said funds and properties, and to report as to whether any or what action should be taken thereon by legislation or otherwise."

Up to the end of the year the legal expenses incurred by the **U. F. Church** were upwards of £30,000, and the **Emergency Fund** raised by that Church was more than £80,000.

### **How the Judgment affects other Churches.**

In view of the momentous decision of the House of Lords it is doubtful whether any Churches have the right to describe themselves as "Free." This much is certain, that their

freedom is limited, and that as soon as they possess money or property they are under the dominion of the law. Whenever such possessions come into the hands of a religious community, the law will insist that these are used in accordance with the principles of the founders of that community. If all the members save one should agree to modify these foundation principles, then that single member has the right to claim and hold all the funds and property.

Commenting upon these facts, **Bishop Gore** of Worcester wrote on Sept. 6th a letter to the *Times*, in which he pointed out the necessity and justice of allowing to every religious community the liberty of growth. Such growth will necessitate changes in authoritative standards and constitutions, and it is intolerable that the law of trusts should prevent any religious body from varying its convictions without the risk of losing legal continuity and corporate property. He concludes in words which will be endorsed by the great majority of Englishmen: "Though I do not agree in many important respects with the United Free Church of Scotland, I cannot but think it is a grave moral disaster that our law should be such as to lay a dead hand upon a process of normal intellectual and spiritual growth in an important and noble religious community."

## **THE CHURCH OF ENGLAND.**

The Church of England, properly so called, owes her foundation to **St. Augustine**, who was sent to England by Pope Gregory the Great in 596. Queen Bertha, the wife of Ethelred the King, was a Christian, and on St. Augustine landing in what is now Kent, the King gave him every facility for doing all he desired towards spreading that religion in the country—and in a very short time the King himself was converted. St. Augustine was made the first **Archbishop of Canterbury** in 597—the 1300th anniversary of which event and of the foundation of the Anglican Church was celebrated during '97.

By the Anglican Church is meant collectively that group of autonomous churches which are in communion with or have sprung from the mother Church of England. They are the following: The Church of Ireland, the Episcopal Church of Scotland, the Protestant Episcopal Church of the United States of America, the Church of Canada, the Church of Australia, the Indian Church, and the Church of South Africa, which are all autonomous bodies under the jurisdiction of their own metropolitans, and not amenable to the Ecclesiastical Courts of the Church of England, though they all look to the Archbishop of Canterbury as Patriarch. In addition to these autonomous Churches in connection with the Anglican Communion there are twelve missionary bishops, representing the English Church in various remote regions of Asia, Africa, and America; and three or four representing the Protestant Episcopal Church of America. The Reformed Episcopal Church of America and the Free Church of England are not recognised as authentic branches of the Anglican Church. The American Church possesses 82 bishops in 58 dioceses and 27 missionary jurisdictions, and 4776 other clergy. It has 644,083 communicants,

and upwards of 1,650,000 baptised members. See **Irish and Scotch Episcopal Churches** on p. 587.

India and the Colonies of the British Empire possess 68 bishops of the Anglican Church, while two are appointed for Europe. In all essential respects the doctrine and discipline of the Churches in connection with the Anglican Communion is the same, differentiations being rather in detail of development than in form or character. One important difference is the restoration of Diocesan Synods and the general Synodical action which marks the un-Established branches of the Church. The tendency of the American, South African, and Scotch Churches is towards High Churchmanship, and the same may be said in a less degree of the Indian Church; while Broad Evangelicalism is the rule in the Colonies.

The next **Lambeth Conference** will take place in 1908.

### **Government.**

The government of the Church of England in England and Wales is carried on by Bishops, of whom there are thirty-seven (two of them Archbishops), counting both the new sees of Birmingham and Southwark created in 1904, see **SESSION**, sect. 28, though only the Bishop of Birmingham was appointed. The Bishops superintend the work in each diocese, and are aided in the episcopal work of confirmations, consecration and opening of burial grounds by suffragans, of whom there are twenty-three. The Bishops are appointed by the King, in virtue of his supremacy, their appointment being ratified by the Church, by their election by the Dean and Chapter of the Cathedral of the diocese, in pursuance of a *congéd d'élire* sent to them by the Crown. The suffragans are appointed by the Bishops themselves. The

whole of England is divided into parishes of various sizes; for the inhabitants of each parish there is appointed a parish priest whose duty it is to minister to them. A certain number of parishes grouped together form a **Rural Deanery**; they in their turn added together form an **Archdeaconry**; a **Diocese**, over which the Bishop presides, is made up of two or more Archdeacons. The Archdeacon—the *oculus episcopi*—assisted by the Rural Deans, reports as to the state of the livings. There are also in the diocese laymen who hold ecclesiastical appointments to control the temporal and legal business. There are two **Vicars General**, one for each province (though Mr. C. A. Cripps, K.C., M.P., now holds both offices himself), Chancellors (usually barristers), registrars, surveyors, architects, etc. Each parish has two Churchwardens to look after the temporal affairs connected with the Church. There are in each Rural Deanery **Ruri-decanal Conferences**, composed of the clergy and leading laymen—and in each Diocese a **Diocesan Conference** in which Church questions are discussed.

The spiritual government of the Church is in the hands of the **Houses of Convocation**, but for any change in Church government which affects the temporal or legal position of the Church or its members the sanction of Parliament must be obtained. There is also a **House of Laymen** in each Province, which meets to confer on Church questions. The Cathedral in each diocese is the seat—the "*Cathedra*"—of the bishop, but he has no voice in the government of the Cathedral, which is vested in the Chapter, of which the Dean is the head. The Deans and Canons are appointed by the Crown; the Minor Canons, who sing the daily Offices, and the various officers of the Cathedral, are appointed by the Chapter. There are two Deaneries which are called **Peculiars**—Westminster and Windsor—the Abbey and St. George's Chapel being outside the jurisdiction of the bishops of the diocese in which they are severally situate. There are a few Deans in name only, such as the Dean of Battle—a survival of the title of the Abbot of Battle Abbey; there is also the Dean of the Chapels Royal (the Bishop of London), and the Dean of the Closet—but their offices are connected with the Royal Household. The dioceses, roughly speaking, are continuous with the counties of which the chief town is the See, though there are important exceptions. All the dioceses of England and Wales (except those of York, Durham, Liverpool, Newcastle, Ripon, Manchester, Carlisle, Wakefield, Chester, and Sodor and Man, which form the Province of York) are in the Province of Canterbury.

#### **Bishops and Deans.**

On the next page is a list of the territorial prelates of the Church of England, with the date of their appointment to the see, and with the annual income. The table, it will be seen, includes the Suffragans appointed for each see; and the names of the Deans. For biographies of the Bishops see under the alphabetical heading of each in **PARLIAMENT** (pp. 425–471), where also it is shown which Bishops actually sit in the House of Lords.

#### **Convocation.**

There are two Convocations, or Provincial Synods, of the clergy of the Church of

England for the two Provinces of Canterbury and York. The greater importance of the Synod of Canterbury, until recent years, has led to its being commonly spoken of as **Convocation**. It was silenced in 1717, and its meetings were, with few exceptions, merely formal until 1852, from which date it has regularly met for business, generally thrice yearly for a week at a time. It consists of two Houses. In the Upper House sit the Archbishop and Bishops of the province in their scarlet Convocation robes; in the Lower House, the Deans, Archdeacons, and Proctors elected to represent the cathedral chapters and the beneficed clergy. The members of the Lower House wear the academic dress, the doctors their scarlet gowns. With every new Parliament a new Convocation is summoned by the Archbishop in obedience to a royal writ. When the Crown desires to refer to the Convocation any question affecting the Church, **Letters of Business** are issued directing it to take that question into its consideration. If the Convocation wishes to make any alteration in the canons of the Church, it prepares draft amended canons, and submits them to the Crown, both Convocations concurring in the same proposals. If the advisers of the Crown approve, the "royal licence" is issued, and the canons are enacted and promulgated by the Convocations and bind the ecclesiastical courts. Where the law of the Church has been settled by statute—as is the case with the rubrics and services of the Prayer-Book, and many other matters—it cannot be altered without the authority of Parliament. In the absence of Letters of Business, Convocation is free to discuss all questions concerning the interests of the Church and the spiritual welfare of the nation. A **Convocations Bill** was brought in during the 1900 and 1901 Sessions, but lapsed. It provided for the reform of the Convocations, the creation of a representative lay element, and the uniting to a certain extent of the two Convocations.

**Province of Canterbury.**—*Vicar-General*: C. A. Cripps, Esq., K.C., M.P.; *Registrar*: Harry W. Lee, Esq.; *Actuary*: H. R. E. Childers, Esq.; *Apparitor-General*: Sir J. A. Hanham, Bart. *Clerk*: Mr. Arthur Ryder, Church House, Westminster.

**Province of York.** *Registrar and Notary*: H. A. Hudson, Esq., Minster Yard, York; *Treasurer*: Canon G. M. Argles, York.

#### **Laymen, Houses of.**

The first House of Laymen for the Province of Canterbury assembled with the Houses of Convocation at the opening of the Parliament of 1886. It is composed of ten representatives from the diocesan conferences of London, six each from Winchester, Rochester, Lichfield, Worcester, and four each from the remaining dioceses of the province. To the representative body so formed the Primate may add ten laymen by nomination. The House is bound to avoid discussions upon doctrine. Like Convocation, the House of Laymen is elected with every fresh Parliament.

**Province of Canterbury.**—*Chairman*, Lord Ashcombe; *Vice-Chairman*, Marquess of Salisbury; *Secretary*, Mr. Sydney W. Flamank, Church House, Westminster, S.W.

In '92 the first House of Laymen for the Province of York, containing 106 members, held its first meeting. The meetings are held at York, at least twice a year, or as often as may seem good to the Archbishop. See *Con-vocation* above.

**Province of York.**—Chairman, Viscount Cross, G.C.B.; Vice-Chairman, Sir Francis S. Powell, Bart., M.P.; Hon. Secretary, E. P. Charlewood, Esq., Beaumont Cote, Bolton-le-Sands, Carnforth; Hon. Treasurer, W. F. H. Thomson, Esq., York and East Riding Bank, York.

### Doctrines.

The doctrines are those of the Early Church, based upon Holy Scripture, appealing to the Catholic Fathers for interpretation, teaching the Creeds put forth at the first four General Councils, and referring to the Ancient Church practices and customs as the rule for the guidance and government to-day of what is the lineal descendant, through the bishops, of the Church founded by the Apostles. The Book of Common Prayer contains all the Services of the Church—they are almost entirely translations of those used in very ancient times. Besides assenting to all contained in the Prayer Book the Clergy at their ordination are required to subscribe the XXXIX Articles—though the latter are not binding on the laity. The tenets of the Anglican Church differ from those of the Roman in not acknowledging the supremacy of the Pope—in not accepting the Roman doctrine of the Mass, nor the veneration of relics and Saints, nor the worship of the Virgin Mary—all which doctrines date from the middle ages; but they agree with the Roman in acknowledging the first four Councils, and in accepting the episcopal form of government, and the necessity of valid Orders in the Church. The Church differs from the leading Nonconformist bodies in insisting on the importance of Apostolical succession, in order that its ministers may properly administer the Sacraments, and disagrees also with the Nonconformist view of the meaning of the "Catholic" Church, which by them is held to be the whole body of Christians rather than those who hold the doctrines "always, everywhere, and by all believed," which is the ancient definition of the word "Catholic."

### Statistics.

The number of clergy in England and Wales is about 30,000, of whom over 14,000 are beneficed. The funds contributed to central and diocesan societies and institutions and administered by their executives for the year ending Easter 1903 were: Home Missions (including funds for church extension), Universities and Public Schools Missions, General Home Mission Societies, Missions to Soldiers and Sailors, and Temperance work, £559,779; Foreign Missions, £767,335; educational work (including diocesan inspection and support of training colleges, and societies for the circulation of literature and other agencies), £124,737; the clergy (educational and charitable assistance), including funds for their widows and orphans, £227,172; philanthropic work, including industrial schools, penitentiaries and prevention homes, orphanages, nursing and convalescent homes, £543,101: making a total of £2,222,127. The funds locally raised and retained and ad-

ministered by the clergy for parochial purposes alone were: for the maintenance of assistant clergy, £704,301; church collections and Easter offerings to subsidise clerical incomes, £151,028; for elementary education, general maintenance of elementary schools, annual contributions, £670,324; interest on invested funds, £118,812; school buildings (new or enlarged day and Sunday), £215,610; Sunday schools, £178,743; for the maintenance of church services, etc., £1,361,397; for the support of the poor, £532,914; for any other purposes (religious or secular), £274,427; for church buildings, fabric and fittings, £1,357,491; burial grounds, £35,882; endowment of benefices, £170,386; parsonage houses, £114,386, making a total of £5,865,708. The sum, therefore, for general and parochial purposes comes to the large total of £8,107,835. The number of children attending Sunday schools is about 2,425,000.

Consult *The Official Year-Book of the Church of England* and *The Clergy Directory*.

### Church Institutions.

**Church Army.** A working man's Church mission to working men, founded in 1882, directed by a committee acting under the Council, amongst whom are three archbishops and most of the English bishops. There are upwards of 800 trained workers, men and women, constantly at work throughout the Metropolis and the provinces. Officers and branches in India, Australia, United States, Canada, and West Indies. A sum of over £176,000 is required annually. Nearly the whole of the headquarters staff are honorary workers. Headquarters, 130, Edgware Road, London, W.; Hon. Chief Secretary, Rev. W. Carlie; Hon. Treasurer, Sir Hugh Low, G.C.M.G. The Evangelistic Department (Hon. Secretary, Edward Clifford, Esq.) selects and trains working-men and working-women for spiritual work among the masses. There are several hundreds of evangelists and colporteurs locally employed, and some 300 mission nurses in parochial and rescue work. Other institutions connected with the Army are eight-days' missions to Prisons, Workhouses, and Reformatories; a magic lantern mission; 66 mission and colportage vans working all the year round in different dioceses; tent work amongst harvest-men—hay, fruit, hop, corn. A Fresh Air Fund for giving poor children a week in the country; a Bible and Prayer Union; a Juvenile Brigade, etc., etc. Various Church societies and parishes are furnished with trained evangelists and mission nurses. Suitable candidates are trained free. Evangelists' Training Home, 59, Bryanston Street, W.; Publication Department, 14, Edgware Road; Mission Nurses' Training Home, 61, Bryanston Street, W.; Printing Works, 130, Edgware Road, W., and Oxford; Training Home Mission Hall, 82, Church Street, W., and Cumberland Mews, W.; Church Army West-end Church, Upper Berkeley Street, W. The Social Department (Hon. Sec., F. Colin Campbell, Esq.) of the Church Army tries to raise the hopeless outcasts of society through labour, rescue, and lodging homes, of which there are nearly a hundred and twenty in London and the provinces. On the Emigration Test Farm and Market Garden, in Surrey, able-bodied men and youths, after being tested, receive practical instruction in farm work, and are then emi-

grated to the colonies. About 70,000 cases of men, women, and boys were dealt with in 1903; over 58 per cent. of all received turned out well. There are Boys' Homes, Girls' Homes, First Offenders' Homes, and Inebriate Homes. The Society is certified and registered by the Home Office as a Discharged Prisoners' Aid Society for the Convict Prisons. The Houseless Poor Society (founded in 1819) is now being carried on by the Church Army. New labour homes are continually being added, and extensions made to those already existing. The scheme of attaching a lodging home to every labour home is being rapidly carried forward, and is, in fact, almost complete. During the winter, and other periods of acute distress, arrangements can be immediately put into force for increasing temporarily the accommodation of the various homes, and relief works established.

**Church House.** Originated early in '86. On Feb. 23rd, '88, a charter of incorporation was granted. The plans were prepared by the late Sir Arthur Blomfield, A.R.A. The style of the building is Late Tudor, with suggestions from Hampton Court Palace. In the first part of the permanent buildings, the Great Hall block, there are spacious halls for the meetings of both Houses of Convocation, twelve rooms used as offices for Church Societies, and a great hall, capable of accommodating 1350 persons, which was opened Feb. 11th, '96. The second portion of the permanent building, the west block, is now completed, and contains the **Henry Hoare Memorial Hall** (House of Laymen) and twenty-nine other rooms available for offices and committee-rooms; and the work of the Corporation is also being conducted in the temporary premises, 9, 10, and 11, Dean's Yard. Here there are reading-rooms, library, writing-room, committee-rooms, offices, etc., for the use of members. On an average 500 meetings of Church Societies are held each year in the committee-rooms and halls. **Membership** of the Corporation (open to all members of the Church of England) may be obtained by the annual subscription of one guinea. Life membership, £10 10s. Associates of the Corporation must be recommended by a member of the Corporation, and pay an annual subscription of at least 5s. **Secretary**, Mr. Sydney W. Flamank, Dean's Yard, Westminster, S.W.

**Church Lads' Brigade, The.** Founded in 1897, in order to promote a spirit of discipline and respect among the elder lads of a parish. It combines strict discipline with systematic religious education, and aims at teaching the great lessons of voluntary submission to order, obedience, and discipline. **Secretary's address**, 13, Craven Street, Charing Cross, London, W.C.

**Church of England Sunday-School Institute** (founded 1843). The objects are to extend, improve, and develop the Sunday-school system in the Church of England, and to secure efficient teaching in Church Sunday schools. There is a central office, and all over the country branch or local Sunday-school Associations, numbering 395, are established. Free grants of Sunday-school requisites are made to Sunday schools both at home and abroad where necessary. The Institute arranges normal classes and practical lectures on the art of teaching at convenient centres throughout

the country, and conducts a yearly examination of Sunday-school teachers in England and Wales, Scotland, Ireland, and the Colonies, and awards certificates of various grades and prizes to the successful candidates. **Secretary**, Rev. H. Dawson, M.A.; **Offices**, 13, Serjeant's Inn, Fleet Street, E.C.

**Queen Anne's Bounty** was established in 1704, to augment poor livings in the Church of England, and to assist the clergy, by loans on security of the revenues of benefices, to build, etc., residences and farmhouses, etc. The fund is managed by governors appointed by Royal Charter. Applications for grants can be made at any time, but no applications received after February 1st can be considered during the current year. In 1903 the grants amounted to £28,240, in respect of 152 livings, and the benefactions received to £45,351. The capital fund, held by the Governors in money and stock for various benefices, amounted to upwards of £6,706,000. A Joint Committee of Lords and Commons sat in 1900, and again in 1901, to consider the constitution of the Board, and to report whether economy and efficiency of administration would be promoted by any change in its constitution or by its amalgamation with some other body. The suggestion was that the Board should be amalgamated with the Ecclesiastical Commissioners. **Chief Clerk**, Mr. W. R. Le Fanu; **Office**, 3A, Dean's Yard, Westminster.

**Simeon Trustees, The**, were founded early in the past century by Charles Simeon, incumbent of Holy Trinity, Cambridge, Fellow and Vice-Provost of King's, and a very prominent leader among the Evangelical Churchmen of that time, for the purpose of acquiring Church patronage and exercising it in favour of the Evangelical clergy. The Trust is still being administered, the present trustees being Canon Girdlestone, of Hampstead; Preb. Eardley Wilmot, of St. Jude's, South Kensington; Rev. John Barton; and Canon Rogers, Rector of Walcot, Bath. The trustees have a number of livings in their gift, which include those of the parish churches of Bradford (Yorkshire), and Sheffield; Bath Abbey; Walcot, Bath; and Holy Trinity, Tulse Hill.

### Church Societies.

**Church Association, The.** Instituted in 1865, to maintain the principles and doctrines established at the Reformation, and to preserve the purity of Protestant worship in the Church of England; to resist all innovations in the order of the service as prescribed by the joint authority of the Church and State, whether these innovations consist in vestments, ornaments, gestures, or practices borrowed from the Church of Rome; and especially to prevent "the idolatrous adoration of the Sacrament of the Lord's Supper"; to resist all attempts to restore the use of the confessional, and every exercise of that priestly authority which was put down at the Reformation. Colporteurs and evangelists with vans, for the dissemination of Protestant literature and for giving Gospel and Protestant addresses in the villages, now travel throughout every part of England. The Association has formed a Protestant electoral organisation in more than half the Parliamentary boroughs and divisions in England. **Organ**,

*The Church Intelligencer.* Chairman, Capt. Cobham; Secretary, Henry Miller. Offices, 13 and 14, Buckingham Street, Strand.

**Churchmen's Union.** Founded at the Bradford Church Congress, '98. Its aims are: (1) To maintain the right and duty of the Church to restate her belief from time to time as required by the progressive revelation of the Holy Spirit. (2) To uphold the historic comprehensiveness and corporate life of the Church of England, and her Christian spirit of tolerance in all things non-essential. (3) To give support to those who are honestly and loyally endeavouring to vindicate the truths of Christianity by the light of scholarship and research; and, while paying due regard to continuity, to work for such changes in the formularies and practices of the Church of England as from time to time are made necessary by the needs and knowledge of the day. (4) To assert the rights and duties of the laity as constituent members of the Body of Christ; and (5) To encourage friendly relations between the Church of England and all other Christian bodies. The membership is open to all who approve of the programme of the Society, and it embraces most of the Broad Churchmen within the Anglican Communion. **Organising Secretary,** Rev. W. Manning, M.A., S. Andrew's Vicarage, Leytonstone.

**Church Reform League, The,** was inaugurated at the Church House, Westminster, on Nov. 27th, 1895, and includes amongst its supporters most of the bishops and a considerable number of leading clergy and laity. It is concerned solely with Church reform; it is in no sense a party organisation; it is entirely non-political, and it does not deal with questions of doctrine. The League advocates various reforms concerning the position of the laity, discipline, patronage, and finance; but its foundation principle is that Church reform should be carried out by the Church herself through her own assemblies. It maintains that, saving the supremacy of the Crown according to law, and, in respect to legislation, subject to the veto of Parliament, the Church should have freedom for self-government, by means of reformed Houses of Convocation (which should be thoroughly representative, with power for the Canterbury and York Conventions to sit together if desired), together with a representative body or bodies of the laity. **General Secretary,** Alfred Holdsworth, Esq. Office, Church House, Dean's Yard, Westminster.

**English Church Union** (4000 clergy and 34,000 lay communicants). Formed in 1859, after the Protestant riots at St. George's-in-the-East, for the purpose of uniting clergy and laity "in defence of the doctrine and discipline of the Church of England, and of the rights and liberties of her faithful children." Viscount Halifax is the President, and the Vice-presidents include 31 Bishops and other distinguished Churchmen. Its main objects are to defend and maintain unimpaired the doctrine and discipline of the Church of England against Erastianism, Rationalism, and Puritanism, and to repel all attacks on the Church's Marriage Law, and on religious education in elementary schools. The Union contends for the recognition of the Church's right to settle disputes concerning

Spiritual questions in Courts of her own appointment, and refuses to acknowledge the Judicial Committee of the Privy Council, or any other court or judge appointed by Parliament alone, as possessing any authority in Spiritual matters. **Organ, The Church Union Gazette.** Secretary, H. W. Hill, Esq. Offices, 35, Wellington Street, Strand.

**Imperial Protestant Federation, The,** was founded in '96 to federate Evangelical Protestant Churches and Societies within the British Empire. It is composed of 56 Protestant organisations, and its council consists of delegates officially appointed by the united societies. In addition, the federation has the support of over 200 other Protestant bodies, and carries on its work in all parts of the Empire, principally through existing Protestant agencies. **Founder:** Mr. Walter Walsh (author of "The Secret History of the Oxford Movement"). **Chairman:** Col. T. Myles Sandys, M.P. (President of the Protestant Reformation Society). **Secretary:** Mr. Edward H. Garbett. **Organising Secretary:** Mr. James W. Walsh. **Official organ:** *The Protestant Observer.* Offices, Dudley House, 36-8, Southampton Street, Strand, London, W.C.

**Protestant Reformation Society.** Established 1827. For the maintenance of the Religious Principles of the Reformation and of Church Missions to Roman Catholics in England. **Superintendent,** Rev. Dr. C. H. H. Wright. **Secretary,** Walter A. Limbrick. Offices, 62, Berners Street, London, W.

**Society for Promoting Christian Knowledge.** This Society was founded in 1698. It is the Bible and Prayer Book Society of the Church; a Church of England Tract and Pure Literature Society; a Home Church Mission and Education Society; a Foreign and Colonial Missionary Society; and an Emigrants' Spiritual Aid Society. It has founded a training college for schoolmistresses at Tottenham, and maintains a training college for lay workers in the East of London. Upwards of £10,000 (exclusive of grants of publications) was voted last year for Home Education work. The Society has voted a portion of its funds to aid in the establishment and development of **Medical Missions** and for the training of medical missionaries, lay and clerical, in India and other parts of the world. The total amount of the money and book grants during the last financial year was £36,137. **Secretaries,** Revs. W. O. B. Allen, M.A., and E. McClure, M.A. **Organising Secs.:** (for the North) Rev. W. Robinson, 26, St. Andrew's Place, Bradford; (for the South) Rev. A. M. Peckham; (for the West) Rev. F. N. Taylor, 5, Marston Road, Knowle, Bristol. Office, Northumberland Avenue, London, W.C.

**Sons of the Clergy, Corporation of the,** was founded in 1655 with the object of relieving distressed ministers ejected from their preferments during the Rebellion, and incorporated by Royal Charter 1678, and aims at assisting necessitous clergymen, pensioning and assisting their widows and aged single daughters, and providing grants towards the education, apprenticeship and outfit of Clergy children. A donation of thirty guineas is the qualification of a Governor. An annual sum of about £25,000 has for some years past been distributed by the governors amongst the objectst

of the charity. Registrar, Sir Paget Bowman, Bart.; Office, Corporation House, Bloomsbury Place, London, W.C.

### CHURCH CONGRESS, 1904.

The forty-fourth Church Congress was held at Liverpool. The inaugural meeting was held on October 10th at St. George's Hall, when the Bishop of Liverpool delivered the Presidential Address. After referring to the creation of the Diocese of Liverpool out of the Diocese of Chester, he praised the wisdom of his predecessor's policy in delaying the Cathedral scheme till the time was ripe, and stated that £254,000 had been promised for the building. He then dealt with the Church's history, and expressed the opinion that union with Rome would indefinitely postpone the reunion of Christendom.

The first subject for discussion was *The Cathedral and its Staff*. Papers were read by Mr. Bodlev, the Bishop of St. Albans, and the Dean of Ely, the Bishop suggesting that residentiary canons should be really resident, while the Dean dealt with the relative positions of bishop and dean. The subject was discussed by the Archbishop of York, and the Dean of Norwich, who stated that his bishop had no power in the affairs of the cathedral, and explained how cathedral services were conducted at Norwich.

*Church Attendance* was the subject of the evening discussion in the Philharmonic Hall, under the presidency of the Bishop of Durham. The Rev. A. R. Buckland dealt with statistics showing an unmistakable falling-off in church attendance; and he traced this to a loss of the sense of obligation, to the increase of historical knowledge and criticism, and to the pursuit of pleasure. Mr. Masterman followed. Canon Denton Thompson advocated greater co-operation between clergy and laity, and house-to-house visitation. Sir Edward Russell pointed out the necessity for reform in preaching.

Dealing with the question of "*Sunday Observance*," the Rev. R. Caterall, vicar of St. Augustine's, Highbury, read a paper advocating a return to deeper worship; and Colonel R. Williams, M.P., who followed, advocated strong insistence on Sunday observance as a Divine command.

At the meeting in Hope Hall, presided over by the President, the subject dealt with was *Christian Evidence*. Mr. Wakeford expressed the opinion that infidelity must be faced, and proceeded to attack Haeckel and the monistic theory. The Rev. Vernon Storr, following, insisted that the teaching of the Church, if it is to gain acceptance among thinking people, must be in accordance with modern knowledge. Mr. Chesterton suggested that unbelief was not the only thing to be combated, but that credulity and the wildest forms of faith were a serious danger. Dr. Jevons argued that at bottom all religions sprang from the same question, and that the difference lay in the answers given; and Mr. Grey dealt with Eastern Religions in their relation to Christianity. Dr. Wace, Dean of Canterbury, who opened the discussion, supported Mr. Wakeford, but differed from Mr. Storr, and objected to the suggestion that the Book of Genesis should be dealt with as unhistorical. Dr. Lock, Warden of Keble, adopted a middle view, and endeavoured to harmonise the views of Mr. Storr and Dr. Wace.

The Wednesday morning meeting dealt with the subject of *New Testament Criticism*. Dr. Lock, who read the opening paper, discussed the authenticity of *St. Paul's Epistles* to the Romans, Corinthians, and Galatians, and claimed that the evidence was sufficient to confirm the authenticity of these books. Dr. Headlam dealt with the *Pastoral Epistles*, and examined objections to these epistles. Prof. Stanton followed with a paper on the *Synoptic Gospels*, and argued that the writer of St. Luke and of the "we" passages in the Acts exhibited the same style. Mr. Burkitt dealt with St. Mark's account of the birth of the Church. Prof. Lake dealt critically with the question of legendary additions to the original narrative, and cited in particular Justin Martyr's deduction of the Virgin Birth from the myth of Perseus. The Bishops of Salisbury and Derry followed, and both opposed strongly the views expressed by Prof. Lake on the subject of mythical additions to the Gospel narrative.

A meeting presided over by the Bishop of St. Davids dealt with the subject of *Intemperance*. Lady Henry Somerset spoke first, Canon Horsley pleaded for State intervention, Archdeacon Madden dealt with the reduction of licences and the closing of disorderly houses, Mr. Stileman Gibbard dealt with the evils of the tied-house system, and Canon Hicks criticised, amid some expressions of dissent, the Licensing Act of 1904. Sir William Houldsworth urged that public opinion was the only certain cure for the evil. The Bishop of St. Albans pointed out that, although he had voted against the recent measure, there was much in it that might assist the temperance movement, if only temperance reformers would unite.

A meeting presided over by the Bishop of Manchester dealt with the subject of *Education*. Canon Brooke objected to the action of the Board of Education in forbidding the taking of children to church in school hours. The Bishop of St. Asaph described the difficulties created by the Act in Wales, and suggested that each denomination should be allowed to teach its own children in every school. Professor Masterman followed, and insisted on the rights of the Church being maintained. Sir Henry F. Hibbert dealt with secondary education. Dr. James, Headmaster of Rugby, argued in favour of definite denominational teaching. The Principal of Liverpool College, Mr. Godfrey Solly, and Canon Cleworth also spoke.

The President took the chair at a meeting dealing with the *Problems of Poverty*. Alderman Willink, dealing with the Housing problem, argued in favour of the expenditure of public money in providing proper dwellings for the poor. The Rev. H. Lewis of Bermondsey showed how high proportionately the rents paid by the poor were in big cities. The Rev. F. W. Head, dealing with "casual labour," deplored the failure of the clergy as regards social work. Mr. Manson dealt with the conditions of labour in Liverpool, and Miss Helen Gladstone and the Rev. H. S. Woolcombe, Head of the Oxford House, with Settlement Work.

The supply of Candidates for the Ministry was discussed at one of the evening meetings, under the presidency of the Bishop of Salisbury. The Bishop of Durham urged the importance of home influence in the matter. Canon Randolph argued that school influence was as

important as home influence, and pointed out that the supply of candidates from the public schools was deplorably small. The Bishop of Exeter dealt with the New Universities, and was followed by Mr. Tait, the Bishop of Guiana, Mr. J. A. Kensit, and the Rev. Paul Bull.

At the **Working Men's meeting** the chief speakers were the Bishop of Liverpool, Sir Charles Warren, Mr. H. Phillips, Bishop Thornton, and the Bishop of Stepney.

The Bishop of Liverpool presided over the meeting on Thursday morning, dealing with **Church Reform**. The Bishop of Salisbury advocated the adoption of the Bishop of Rochester's Bill for meetings of Joint Convocation. Chancellor Smith also discussed the proposal for meetings of both Houses of Convocation. The Rev. Darwell Stone favoured reforms in the existing Houses of Convocation and Laymen, and pleaded for a communicant franchise. The Bishop of Cloghor dealt with the rights of laymen, and advocated more generous treatment. Lord Hugh Cecil opposed any further concession of a democratic nature and any form of State control. Dr. Barlow pleaded for the abolition of the "parson's freehold" and the traffic in livings. The discussion was taken up by the Bishop of Glasgow, Mr. H. Phillips, the Rev. H. J. Marston, Col. Churchill and Preb. Webb-Peploe, who pleaded for more consideration for laymen.

The afternoon meeting, on **Church Unity**, was presided over by the President of the Congress. The Dean of Norwich read a paper on "External Union," and advocated union with the **Protestant Sects**, and suggested that the President of the Wesleyan Conference might have a place in the episcopate. The Dean of Christ Church followed with a paper on the "Obligation of Creeds," and the Rev. Dr. Rashdall, who followed, pointed out that "new light" had always at first been regarded as dangerous. The Bishop of Chester read a paper on the **Athanasian Creed**, and urged that persons requiring its modification were entitled to respect and relief. Dr. Gairdner, who followed, supported the use of the Creed. Canon McColl, the Dean of Canterbury, the Rev. John Wakeford, Preb. Webb-Peploe, Canon Rawdon, and Mr. Austin Taylor, M.P., joined in the subsequent discussion.

The last meeting dealt with **Church Music**, and was addressed by Dr. Walford Davies, organist of the Temple Church, the Rev. C. Hylton-Stewart, ex-precentor of Chester Cathedral, Dr. Basil Harwood, and Dr. Varley Roberts, organist of Magdalen.

Oxford is suggested as the venue for the 1905 Congress.

## **EPISCOPAL CHURCH OF IRELAND.**

St. Patrick is universally recognised as the Apostle of Christianity in Ireland, and he probably went to that country as a missionary bishop A.D. 432. He planted there a native church and raised up a native priesthood, and during the sixth and seventh centuries missionaries from Ireland poured out to Britain and other European countries. Up till the twelfth century the Irish Church was independent, but it then became subject to Rome, and so remained till the Reformation. In 1800, by the Act of Union, the Church was united to the Church of England. In '69 the Irish Church Disestablish-

ment Act was passed, taking effect on Jan. 1st, '71. Since then the Church has flourished in spite of the loss of the revenues and property formerly belonging to her. The government is in the hands of a **General Synod** composed of three distinct orders—the bishops, the clergy, and the laity. The bishops form one House; and 208 of the clergy with 416 of the laity form a **Second House**—the House of Representatives. Both sit together to constitute the Synod. This latter House is elected triennially by the 21 diocesan synods throughout the country. The General Synod meets annually at Dublin on the second Tuesday after Easter. The affairs of each diocese are managed by a diocesan synod acting through a diocesan council. The financial affairs of the Church are in the hands of the **Representative Church Body**, composed of archbishops and bishops, 13 clergymen, and 26 laymen chosen by the diocesan representatives in the General Synod, with 13 co-opted members, making a total of 65 members. This body holds the property of the Church in trust. The sum handed over by the Church Temporalities Commission to this body was £8,081,075, which comprised £7,581,075, the life annuities of the bishops and clergy paid as commutation money, and £500,000 compensation for private endowments. The funds in hand on Dec. 31st, 1903, amounted to £8,414,138, and are appropriated to the following purposes. Commutation capital, £817,479; Parochial sustentation, £5,134,190; Episcopal sustentation, £561,060; Glebes capital, £348,357; Miscellaneous capital, £1,503,714; and there are besides balances due to parishes, etc., £49,336. Total, £8,414,138. The annuitants now only amount to about 170, and the interest on commutation capital more than pays these, so that in many dioceses 10 to 12 per cent. is paid to the clergy as bonus on their stipends. The number of clergy in the church is 13 bishops, 1340 incumbents, and 371 curates. The Church population in 1901 was 581,089. The incumbents are elected by **Boards of Nomination**, consisting of 1 bishop, 3 diocesan and 3 parochial members. The incumbents nominate their curates. Bishops are chosen by the members of the diocesan synods, and the Primate by the bishops from amongst themselves. The average stipend of an incumbent is £200 with house, and of a curate £120. Bishops receive from £1500 to £2000, and the Archbishops £2500 with houses free of rent. The **Secretary of the Representative Church Body** is Mr. Thos. Greene, M.A., 52, St. Stephen's Green, Dublin.

## **EPISCOPAL CHURCH OF SCOTLAND.**

The Episcopal Church of Scotland has seven bishops—viz., the **Primus**, The Most Rev. G. H. Wilkinson, D.D., Bishop of St. Andrews; Right Rev. A. J. Maclean, D.D., Bishop of Moray; The Right Rev. and Hon. A. G. Douglas, D.D., Bishop of Aberdeen; The Right Rev. J. R. A. Chinnery-Haldane, D.D., Bishop of Argyll; The Right Rev. W. J. F. Robberds, D.D., Bishop of Brechin; The Right Rev. John Dowden, D.D., Bishop of Edinburgh; The Right Rev. A. Ean Campbell, D.D., Bishop of Glasgow. There are 365 churches and mission stations, 143 parsonages, 334 clergy, and 47,948 communicant members. **Registrar**, W. Robertson, 14, Young Street, Edinburgh,

## PRESBYTERIAN CHURCHES.

Presbyterianism is church government by presbyters (or elders), and by them only. The Session of a Presbyterian Church consists of the pastor or teaching elder of the church, who always presides when present, and the ordained ruling elders. In case of a church being vacant the pastor of some other church within the bounds of the presbytery is chosen moderator *ad interim*. The Presbytery consists of the pastors of churches, and a ruling elder from each congregation within prescribed boundaries. (In the Presbyterian Church of England, congregations having more than 250 communicants are entitled to send two ruling elders to the Presbytery.) The Synod consists of presbyteries within a larger area; and the General Assembly, where the size of the church renders one necessary, takes in the whole church, and consists either of the pastors of all the churches, together with a ruling elder from each congregation, or representatives chosen from amongst both pastors and ruling elders. The standards of the Presbyterian Churches are the Westminster Confession of Faith with the Catechisms, Larger and Shorter. Some of the Churches receive these with an explanation, especially in respect to Chapter XXIII. of the "Confession." The Presbyterian Church of England has drawn up XXIV. "Articles of the Faith" as a brief statement of the fundamental doctrines of the Westminster standards.

## ESTABLISHED CHURCH OF SCOTLAND.

Christianity was introduced into Scotland in the fourth century, and the Church that resulted differed in several respects from the rest of Western Christendom. The chief distinction lay in its government. Three orders of clergy were recognised: bishops, priests, and deacons; but the bishops had no dioceses, and were in subordination to the abbots who presided over the great missionary college at Iona. St. Columba, the first of these abbots, like some of his successors, was a simple presbyter. Gradually the early Scottish Church assimilated to the Roman use, although it was not till the fifteenth century that metropolitans were appointed, with jurisdiction over the other sees. At the Reformation prelacy was abolished, and the Church of Scotland was constituted on its present basis. A long conflict ensued between the adherents of prelacy and presbytery, but in the end the latter prevailed, and the Reformation constitution was ratified by William and Mary, and in 1707 was confirmed by the British Parliament.—**Doctrine.** The standards of the Church of Scotland are the Confession of Faith and the Larger and Shorter Catechisms compiled by the Westminster Assembly of 1643. The doctrine they contain is Protestant and Evangelical, following the theological teaching of Augustine and Calvin.—**Polity.** The Church of Scotland is Presbyterian in government—*i.e.*, it recognises the equal episcopacy of all presbyters. Its congregations are ruled by a board of elders or presbyters elected for life from the Church members. This is known as the Session, and the minister of the parish is *ex-officio* president. Its duties are chiefly spiritual, the temporal affairs of the Church being committed to a deacon's court, or to a board of managers, elected for a term of years. Over the Session is the Presbytery, consisting

of the ministers and one elder from each congregation within a certain district. Over this again is the Synod, composed of representatives from the presbyteries of a province; and over all is the General Assembly, the supreme court of the Church, which meets yearly in Edinburgh in May. The Assembly is summoned by royal warrant, and the King's Commissioner is present at its sittings.—**Worship.** The Church of Scotland uses no liturgy in the conduct of public worship, but the order of service is prescribed by the Westminster Directory of Worship (1643). As this Directory has become obsolete, every minister is practically left to his own discretion in conducting the service. At present the tendency in the Church is towards greater uniformity and order, and many clergymen use the *Euchologion*, a service-book issued by the Church Service Society.—**Statistics.** Ministers, 1682; missionaries, 80; elders, 10,578; communicants, 674,293; parishes, 1391; churches, 1809; presbyteries, 84; synods, 16; income, £445,583, exclusive of seat-rents, bequests, tithes or tithes, and Government grants. There are 13 churches in England connected with the Church of Scotland, and 6 at popular places of resort on the Continent, and vigorous missions are carried on in India and Africa. Commissioned chaplains for Presbyterian troops are chosen chiefly from the Church of Scotland, but clergymen of the United Free Church of Scotland and of the Presbyterian Church in Ireland are also eligible for appointments. His Majesty has decreed that during his year of office the Moderator of the Church of Scotland should take rank in Scotland after the Lord Chancellor. His Majesty has followed the example of Queen Victoria in appointing Royal Chaplains from the Church of Scotland, and in attending worship at Crathie parish church while in Balmoral. **Moderator for 1904**, Right Rev. John M'Murtrie, D.D., Edinburgh; **Moderator nominated for 1905**, Rev. A. J. Milne, LL.D., Fyvie, Aberdeenshire; **Lord High Commissioner**, the Earl of Leven and Melville.

## UNITED FREE CHURCH OF SCOTLAND.

This Church was formed by the union of the Free Church of Scotland and the United Presbyterian Church. In 1863, on the invitation of the United Presbyterian Church, the Free Church appointed a Committee to consider if the union of the two Churches could be accomplished. A majority of the Free Church were found to favour union, but owing to the determined opposition of the Constitutional party, led by Dr. Begg, the project had to be abandoned in '73. As a compromise, a Mutual Eligibility Act was passed, permitting congregations to call ministers from either body. Again, in '94, on the initiative of the United Presbyterian Church, a fresh movement was made for union. In 1900 the United Presbyterian Synod agreed to union unanimously, and the Free Church Assembly agreed by a majority of 557 in a house of 615 members. The Union took place in Edinburgh on Wednesday, Oct. 31st, 1900.

The Free Church of Scotland originated in the claim made by a majority in the Established Church (commonly known as the Evangelical party) to be free of control by the State in

determining her own affairs. The conflict with the Civil Courts related to the right to veto a presentation to a parish when the majority of the people opposed it, and the right to admit other ministers than those of the civil parishes to sit in Church courts. On both points the courts of law decided against the Church, and the Government refused relief. The result was the **Disruption** on May 18th, 1843, when 474 ministers, headed by Dr. Chalmers, left the Establishment and formed the Free Church, surrendering all State support in order to possess "spiritual independence." The Church was speedily organised, and supplied herself with churches, manses, schools and colleges. In '76 the **Reformed Presbyterian Church**, numbering 37 ministers, united with the Free Church. This Church (popularly known as the Cameronian) traced its descent to the Covenanters, who refused to conform to the State Church because at the Revolution of 1688 the Covenant was not enforced. In '92 a **Declaratory Act** was passed by the General Assembly, declaring the sense in which the Westminster Confession expressed the faith of the Church on certain points. The United Presbyterian Church had already in '79 passed a similar Act. In consequence of this action on the part of the Free Church, 4 of her ministers and about 1000 members seceded and formed the **Free Presbyterian Church**, which has now 18 charges, with 12 ministers, three-fourths of them in the Highlands.

The **United Presbyterian Church** was constituted in '47 by the union of the Secession and the Relief Churches. The **Secession Church** owed its origin to the action of the Rev. Ebenezer Erskine, of Stirling, who in 1732, along with 3 other ministers, seceded from the Established Church in protest against its defection from Reformed principles and its suppression of their ministerial freedom. It was from the first an evangelical and missionary church, and at the time of the union in '47 it had increased to 384 congregations. The **Relief Church** was founded by the Rev. Thomas Gillespie, of Carnock, who was deposed in 1752 for refusing, at the bidding of the Assembly, to take part in the forced settlement of an obnoxious minister. More liberal in doctrine and spirit than the founders of the Secession, he kept apart, and in 1761 organised the Relief Church, which at its union with the Secession numbered 113 congregations.

Negotiations for union between the Free Church and the United Presbyterian Church began in 1863, but were suspended by the Free Church in '73, in consequence of the opposition of an influential minority. The only outcome of these negotiations was the passing of a **Mutual Eligibility Act**, permitting congregations to call ministers from either body. In '96 the Free Church resumed negotiations for union, and in Oct. 1900 the **Uniting Act** was finally passed unanimously by the United Presbyterian Church, and by a vote of 643 to 27 by the Free Church Assembly. The congregations of the former Church numbered 594, with 198,089 communicants; the Free Church had 1104 congregations, with 296,085 communicants. Principal Rainy was elected the first Moderator of the United Church.

The minority, who refused to enter into the union, claimed to represent the original Free Church, and appealed to the law to declare to that effect and to assign to it

the property vested in the Free Church. In the Scottish Courts all the judges found in favour of the United Free Church. In the House of Lords it is understood that on the first hearing the 6 judges were equally divided, but the death of Lord Shand before judgment was pronounced occasioned a re-hearing before 7 judges; and by 5 to 2 the final judgment was given in favour of the non-uniting remnant. Ultimately the decision rested on the finding that the "Establishment principle" was a fundamental principle of the original Free Church, and that the Free Church had no power in its constitution to make that principle an open question. The Free Church left the Establishment to obtain freedom from State control, but it held nevertheless the theory that it was the duty of the State to establish and support the Church. In the United Presbyterian Church the Establishment principle was an open question; but the Church was nearly unanimous in opposition to any connection between Church and State, and the same opinion had gradually become prevalent in the Free Church. The non-uniting minority is thus found in law to be the **Free Church of Scotland**, with the Establishment principle fundamental in its constitution. It is also pledged to rescind the Declaratory Act. At the time of the judgment in the House of Lords (August 1st, 1904) the Free Church possessed about 30 ministers, and claimed to have 8000 communicants in 105 charges, nine-tenths of them in the Highlands. See **CHURCH CRISIS IN SCOTLAND**, p. 577.

**Statistics.**—Synods, 12; presbyteries, 64; churches, 1675; ministers, 1768; missionaries, 302; native agents, 3441; elders, 15,926; deacons and managers, 18,663; communicants, 501,835; in foreign field, 43,844; Continental stations, 22; income, £1,162,354 18. 1d. **Moderator, 1904**, Rev. R. Gordon Balfour, D.D., Edinburgh.

### FREE CHURCH OF SCOTLAND.

A considerable number of ministers, elders, and communicants of the Free Church were opposed to union with the United Presbyterian Church. It seemed to them to involve the surrender of the principle of National religion (the United Presbyterian Church being voluntary—i.e., opposed to the principle of Establishment) and of the Confession of Faith, which was qualified in the United Free Church by two Declaratory Acts, and largely nullified by a change of formula. Holding these opinions (which were identical with those professed by the Free Church in '43), they could not consistently enter into the union. They were therefore extruded by the majority who are now in the United Free Church from the use of the Free Church buildings and funds. The extruded parties went to law, and the case was heard before Lord Low in the Court of Session. He dismissed the action, and found the defenders entitled to expenses, ruling that the pursuers were not entitled to all or any part of the funds and property of the Free Church. An appeal was taken to the Second Division of the Inner House of the Court of Session, and Lord Low's decision was practically confirmed.

The case was then taken to the House of Lords, and heard there in Nov. and Dec. 1903, but owing to the death of Lord Shand in March 1904, before judgment was pronounced, it was decided to re-hear the case. The Lord

Chancellor requested Lord James of Hereford and Lord Alverstone, Lord Chief Justice, to join the Court, which at the re-hearing consisted of the Lord Chancellor, and Lords Davey, MacNaghton, Robertson, Alverstone, Lindley, and James. The case, which commenced on June 9th, 1904, was heard at considerable length, and the judgment was pronounced on August 1st. After each Judge had given his opinion, the Lord Chancellor moved, "That the order appealed from be reversed, and that the Respondents pay to the Appellants the costs both here and below. The order of their Lordships, therefore, will be that the judgment will be reversed in both actions." See CHURCH CRISIS IN SCOTLAND, p. 577.

The Church on August 1st, 1904, consisted of 5 synods, 11 presbyteries, 32 ministers, and 105 congregations. Since then there have been added about 30 congregations more, and many more are waiting to be added. The membership cannot accurately be given. **Moderator**, Rev. Murdo MacQueen, Keltraen. **Clerk**, Rev. J. K. Cameron, Brodick. **Deputy Clerk and General Secretary**, Mr. J. Hay Thorburn, 130, George Street, Edinburgh.

#### REFORMED PRESBYTERIAN CHURCH.

Prior to the union in '76 of the Free Church with the Reformed Presbyterian Church, there were in existence two bodies bearing the title of Reformed Presbyterians, and usually distinguished as the "Majority" and "Minority," a division having arisen in the Reformed Presbyterian Church in '63. The "Minority" has stood separate from all other denominations since that date, and still holds intact the doctrines and principles of the second Reformation, such as the infallibility of the Scriptures, Confession of Faith and Catechisms, Presbyterianism, the perpetual obligation of Covenants, and dissent from the civil constitution of the country.—**Statistics for Scotland**: Presbyteries, 2; churches, 10; ministers, 8; elders, 60; communicants, 1000; income, £2237. **Moderator**, 1903, Rev. James Paterson, Thurso. **Statistics for Ireland**: Presbyteries, 4; churches, 40; ministers, 30; missionaries, 2; elders, 170; communicants, 3945; income, £4726. **Moderator**, Rev. J. McDonald, B.D., Airdrie.

#### UNITED ORIGINAL SECESSION CHURCH,

popularly known as "Auld Lights." This Church was constituted in 1842 by the union of two small bodies that had retained the original principles and practices of the Secession Church, and refused to change with the majority. The "Auld Lights" are orthodox in theology and simple in worship. They believe in the principle of a union between Church and State. They have a mission in Seoni, C. P., India.—**Statistics**. Presbyteries, 5; churches, 28; ministers, 27; elders, 148; communicants, 3611; income, £5651 2s. 3d. **Moderator**, 1904, Rev. Peter McVicar, Dundee.

#### PRESBYTERIAN CHURCH OF ENGLAND.

The revival of Presbyterianism in England in the earlier portion of the last century was due to the influence on English Presbyterianism, on the one hand of the Evangelical movement in the Established Church of Scotland which led up to the Disruption, and on the other of the

consolidation of the dissenting Presbyterianism of Scotland which led up to the formation of the United Presbyterian Synod in '47. The English section of that Synod united with the older Presbyterian body in England in '76, so forming the Presbyterian Church of England. Of the present congregations, 28 trace back their existence to the seventeenth century, 42 to the eighteenth century, while the remaining 270 have been established within the last hundred years.—**Statistics**. The Church consists of 340 fully organised congregations and 11 preaching stations, providing accommodation for 171,131 persons. Several churches are in course of rebuilding, and consequently their sittings cannot be given. A large number of fully equipped mission stations also exist in connection with town congregations, and these have an average attendance of about 12,000 persons. The number of ministers, including professors, is 360, with 25 ordained and 14 medical missionaries in the foreign field, besides 5 missionary teachers and 29 lady missionaries, 3 of whom are fully qualified doctors. There are also 23 licentiates, and about 16 theological students preparing for the ministry. The College was transferred from London to Cambridge in Oct. '99. Its new name is "Westminster College." Including the site, it cost nearly £50,000, and was opened free of debt. The property of the Church is estimated at £2,211,937, exclusive of sundry investments for the endowment of the College and scholarships, and for the Sustentation Fund and other schemes of the Church, of the College itself, and of buildings for mission work abroad. The total income of the Church in 1903 was £297,416. The backbone of the Church finance is the Sustentation Fund, which since '78 has secured for the body of ministers, excluding a limited number under special arrangements, a minimum stipend of £200. Under this scheme 99 congregations were aid-receiving in 1903 to the amount of £6578, as against 103 in '78 to the amount of £6443 7s. 6d., the average amount of aid required being at this date £66 9s. per congregation, as against £62 10s. in '78. A permanent Church Building Fund has now been established. **Offices of the Church**, 7, East India Avenue, Leadenhall Street, E.C. **Moderator** (1904-5), Rev. W. Rigby Murray, Victoria Park, Manchester. **General Secretary**, Rev. J. Thoburn McGaw, M.A., D.D.; **Financial Secretary**, Mr. John Leggat; **Foreign Missions Secretary**, Rev. William Dale; **Church Building Fund Secretary**, Rev. Robert McLean, M.A. **Publications Office**, 14, Paternoster Square, E.C., Mr. T. French Downie (Manager).

#### PRESBYTERIAN CHURCH IN IRELAND.

Presbyterianism arose in Ireland through the plantation of Ulster by Scottish settlers in the reign of James I. The colonists were at first received as members of the Established Church, which was Calvinistic in doctrine and recognised the validity of Presbyterian orders. After 1634, however, the Irish prelates endeavoured to depose all Presbyterian ministers who would not submit to episcopal ordination and follow the Anglican ritual. In self-defence the Presbyterians left the Established Church, and in 1642 they organised their first presbytery at Carrickfergus. During the protectorate of Cromwell the Presbyterians were kindly

treated, but after the Restoration the severest pains and penalties were enforced against them for their nonconformity. At the Revolution of 1688 the gallant conduct of the Presbyterians in defending Londonderry and supporting William III. gained for them the *regium donum*, an annual bounty of £1200. During the reign of Queen Anne this bounty was withdrawn and Presbyterianism was proscribed, but with the accession of George I. toleration was granted and the *regium donum* restored. During the eighteenth century many of the ministers of the Irish Presbyterian Church adopted Arian views, but in 1827, chiefly through the influence of Dr. Cooke, the Church again declared its adherence to Trinitarian doctrine, and the Arians withdrew from its communion. Side by side with the Irish Presbyterian Church there sprang up congregations representing the various dissenting churches of Scotland, the majority being connected with the Secession Church; and in 1840 the seceders joined the older Church. By the disestablishment scheme of 1871 the Church lost the *regium donum*, but the commutation granted by Government, supplemented by the gifts of the people, has more than compensated for the loss.—**Statistics.** Synods, 5; presbyteries, 36; churches, 574; ministers, 660; elders, 2050; missionaries, 50; communicants, 106,665; income, £269,050. **Moderator**, Rev. Samuel Prenter, D.D., Dublin; **Assembly Clerk**, Rev. W. J. Lowe, D.D., Londonderry. There are two theological halls, viz., Magee College, Londonderry, and the Assembly's College, Belfast. Vigorous foreign missions are conducted in India and China.

## PRESBYTERIAN CHURCH IN WALES

The Calvinistic Methodist (or Presbyterian) Church is the largest Nonconformist Church in Wales, and the only one of native origin. It began through a purely spiritual movement. In the middle of the eighteenth century a layman and two clergymen of the Established Church named Howell Harris, Daniel Rowlands, and Howell Davies, led the way in a great revival of religion in North Wales. They formed their converts into societies on Methodist lines, but as they rejected Wesley's Arminian doctrines, they leant more and more towards the practices of the Presbyterian Churches. In 1823 a Confession of Faith was adopted embodying the theological principles of the founders of the Church. Since that date the Presbyterian system has been more fully adopted, and Methodist and Congregational elements have been eliminated from the constitution of the Church. It is now a member of the Presbyterian Alliance, and is in federal union with the Presbyterian Church of England. The Welsh tongue is still used in all the courts and official transactions of the Church, and in the worship of most of the congregations, but the use of English is steadily increasing.—**Statistics** Synods, 2; presbyteries, 24; churches, 1386; chapels and preaching stations, 1599; ministers, 883; unordained preachers, 379; deacons, 5865; communicants, 165,218; hearers, 332,167; missionaries, 28, and 13 ordained native ministers; income, £353,653 8s. 3d. **Moderator**, Rev. David Lloyd Jones, M.A., Llandinana. There are two theological colleges, one at Trevecca and one at Bala, and mission work is carried on in Brittany and India.

## FREE CHURCHES OF THE UNITED KINGDOM.

### NATIONAL COUNCIL OF THE EVANGELICAL FREE CHURCHES.

This body was first definitely formed at the Fourth National Congress of the Evangelical Free Churches of England and Wales, which was held at Nottingham in March 1896. Prior to '90 there were only four local Free Church Councils in existence; but the movement rapidly spread, and by March '95 130 Councils had been formed. A year later, at the Nottingham Congress above mentioned, 209 Councils were represented, and by the end of '97 there were 7500 churches, representing, in round numbers, about a million members, associated with about 500 local Councils. The denominations represented are Congregational, Baptist, Presbyterian, Methodist of all sections, the Society of Friends, the Free Episcopal Church of England, and various unattached Evangelical Missions. The movement is not associated with any political party, and all shades of political opinion are represented on the Councils. The constitution of the Council was settled at the Nottingham meeting in March '96, and the objects are stated as being: (1) To facilitate fraternal intercourse and co-operation among the Evangelical Free Churches; (2) To assist in the organisation of local Councils; (3) To encourage devotional fellowship and mutual counsel concerning the spiritual life and religious activities of the Churches; (4) To advocate the New Testament doctrine of the Church, and to defend the rights of the associated Churches; (5) To promote the application of the law of Christ in

every relation of human life. The chief movements for which the National Council has been responsible are the Great Simultaneous Mission held at the beginning of 1901 and the campaign against the Education Acts of 1902-3. The ninth Annual Council was held at Newcastle-on-Tyne in 1904, and over 800 councils and 45 district federations were there represented. The Executive Committee consists of 15 ministers and 15 laymen elected annually by the Council by ballot, together with the President, ex-President, past Presidents, and as many Treasurers and Secretaries as the Council shall from year to year appoint. The organs of the movement are the *Free Church Chronicle* and *The Free Churchman*, both published monthly, and the *Free Church Year-Book*, published annually, in April. **President**, Rev. F. B. Meyer, B.A.; **President-elect**, Rev. R. F. Horton, B.A., D.D.; **Treasurers**, Mr. George Cadbury, Mr. R. W. Perks, M.P., Mr. Evan Spicer, J.P.; **Hon. Secretary**, Rev. J. Monro Gibson, D.D.; **General Secretary**, Rev. Thomas Law; **Office**, Memorial Hall, Farringdon Street, E.C.

### FREE CHURCH SOCIETIES, ETC.

The Metropolitan Free Church Federation exists for the united action of Evangelical Free Churches on spiritual, moral, and social questions affecting Greater London. **President**, Rev. J. H. Shakespeare, M.A.; **Treasurer**, R. W. Perks, M.P.; **Secretary**, Rev. Joseph Fletcher. **Office**, 18A, Memorial Hall, Farringdon Street, E.C.

The Three Denominations is the abbreviated designation of an association of Presbyterian, Independent, and Baptist ministers resident in or near London. The full title is "The General Body of Protestant Dissenting Ministers of the Three Denominations Resident in and about the Cities of London and Westminster." This association enjoys the privilege of direct access to the throne and the kissing of hands—a privilege of which it availed itself at the Jubilee of H.M. Queen Victoria, and again at the Diamond Jubilee. As far back as the Revolution each denomination had its own ministerial board in London, and each board by itself approached the Throne as occasion arose. On the accession of Queen Anne the three boards united in an address. In July 1727 the present association was organised. It is not a body which represents the Churches. It is composed solely of ministers, and admission must be through one or another of the three ministerial boards, which are not themselves representative either. The secretary is chosen triennially from each of the three bodies in succession. The present secretary is a Baptist (Rev. W. H. King); Mr. J. Minshall, of the Memorial Hall, is permanent clerk, and the annual meeting is held at the Memorial Hall in March. Every meeting appoints its own chairman, who in turn is chosen from the three boards.

The "Three Denominations" is often confounded with another body known as the "Dissenting Deputies." The two were originally connected, but are now distinct from each other. The "Dissenting Deputies" are laymen, and represent Churches—Presbyterian, Independent, or Baptist, in or near London—by whom they are elected. This body came into existence in November 1732, in connection with the Test and Corporation Acts, and still exists to protect the rights of Dissenters. It had not the privilege of access to the throne, but under recent arrangements will share the privileges of the "Three Denominations." The Vice-Chairman is Mr. Alderman Evan Spicer, J.P.; and the Secretary Mr. A. J. Shephard, L.C.C., 6, Finsbury Circus, E.C.

The Evangelical Alliance. Founded 1845-6, to enable Evangelical Christians of different denominations, and of all countries, to manifest their true unity in the essential doctrines of the Gospel, for the defence of religious liberty and upholding of the Evangelical faith. A Week of Universal Prayer is observed in the early part of January each year throughout the whole world. President, Lord Polwarth. Treasurer, W. H. Seagram, Esq.; Hon. Secretary, John Wood, Esq. General Secretary, Mr. H. Martyn Gooch. Office, 7, Adam Street, Strand, W.C.

The Evangelical Continental Society. Founded in 1845, as a branch of the London Missionary Society, but has long been a separate organisation. Its object is to aid existing native Evangelical Churches and Missions on the European Continent. Its spheres are in France, Belgium, Italy, Spain, Russian Poland, Bohemia, and the City of Vienna; and it is the only Congregational Society at work on the Continent. Offices: Memorial Hall, Farringdon Street, E.C. Chairman and Treasurer: John C. Bumsted, Esq.; Secretary: Rev. George H. Giddins.

The Sunday School Union. This Union was founded in 1803, and its objects are to stimulate

and encourage Sunday-school teachers, at home and abroad, to greater exertions in the promotion of religious education; by mutual communication to improve the methods of instruction; to ascertain those situations where Sunday-schools are most needed, and promote their establishment; to supply the books and stationery suited for Sunday-schools at reduced prices. The Union celebrated its centenary in 1903, and is seeking to raise £100,000 to be given to Sunday-schools for the development of educational work, new buildings, etc. President for 1904, Rev. J. Monro Gibson, LL.D. General Secretary, Rev. Carey Bonner; Hon. Secretaries, W. H. Groser, B.Sc., Frank Clements, Jas. S. Crowther, and Thomas G. Ackland, F.I.A. Treasurer, Mr. S. Hope Morley. Organ, *Sunday School Chronicle*. Head Offices, 56, Old Bailey, E.C.; (Publishing and Retail Departments), 57 and 59, Ludgate Hill.

The Young People's Society of Christian Endeavour. In 1881 the first society was established by the Rev. F. E. Clark, D.D., in the Congregational Church of which he was pastor, in Portland, Maine, U.S.A. The object of the Society is stated to be to promote an earnest Christian life among its members, to increase their mutual acquaintance, and to make them more useful in the service of God. The growth of the Society has been phenomenal. In four years there were 11,000 members, five years later 660,000. In 1904, twenty-three years after its origin, there were 68,000 societies (8000 in the United Kingdom), with a membership of 3,750,000. The Headquarters in Great Britain are at the Sunday School Union. Secretary, Rev. W. Knight Chaplin. Offices, Ludgate Hill, London, E.C.

#### WESLEYAN METHODIST CHURCHES.

Wesleyan Methodists are the followers of John and Charles Wesley. The first Society of the Methodist Church was formed in 1739. The official returns show that there are in Great Britain 2303 Wesleyan Methodist ministers and 508,835 Church members, 7440 Sunday-schools, 1,134,104 teachers and scholars, and 8633 preaching-places; in Ireland, 250 ministers and 28,806 members. There are 18,900 lay preachers, and 1944 on trial. The Foreign Missions of the Church employ 440 ministers, and number 75,107 members. The French Conference has 38 ministers and 1710 members; the South African Conference, 210 ministers and 95,428 members; the West Indian Conferences have 94 ministers and 43,820 members; and the Australasian Conferences (at the last General Conference) 948 ministers and 139,501 members.

The Wesleyan Conference was held in July 1904 in Sheffield. The President is the Rev. Silvester Whitehead, of Bradford; and the Secretary the Rev. John Hornabrook. The President-elect for the Bristol Conference of 1905 is the Rev. Charles H. Kelly, the Book Steward. (For further foreign mission statistics see *Missionary Societies*.)

The London Wesleyan Mission is the outcome of the interest aroused by "The Bitter Cry of Outcast London," issued in '85 by the Congregational Union. It has now 8 branches: East Central, West, South, South-West, Grove, Depford, Poplar, and Bow, with 23 ministers, including Revs. Peter Thompson, Mark Guy Pearce, T. Brain Castle, Joseph H. Hopkins,

J. Gregory Mantle, Henry T. Meakin, C. Ensor Walters, H. Howard May, with other well-known names. Forty buildings are in constant use on Sundays and weekdays. The congregations number over 20,000, and fully 10,000 are enrolled in Church fellowship. Over 70 "sisters," with 25 lay agents, are engaged from day to day in work amongst the people, and every possible agency is employed to "rescue the perishing." **General Secretary**, Rev. W. D. Walters, 58, Cromwell Avenue, Archway Road, London, N.

In 1797—six years after Mr. Wesley's death—the **Methodist New Connexion** was formed. Alexander Kilham had headed a movement which sought to place the governing power in the hands of the members instead of in the hands of ministers. In the heat of controversy he made statements respecting ministers which could not be sustained, and was expelled by the Conference of 1796. He was followed by 5000 seceders, who formed themselves into the new body. In numerical strength this Connexion now ranks third amongst the denominations that have sprung out of the parent body. It has 216 ministers at home and abroad, 1231 lay preachers, and 44,464 church members.

The case of the **United Methodist Free Churches** is remarkable. First, the Protestant Methodists united in '36 with the Wesleyan Association. The next year a small body in the Midlands (the Arminian Methodists) was absorbed, and in the following year the Independent Methodists of North Wales. In '57 these amalgamated bodies (with a membership of 21,000) were joined by 19,000 Reformers, and the name **United Methodist Free Churches** was adopted. The Reformers who refused to amalgamate became **The Wesleyan Reform Union**, the membership of which is now 8053; the membership of the **Independent Methodists** is 9052. With regard to the **United Methodist Free Churches**, a different denomination from the smaller body just named, it stands, with respect to numbers, next to the Primitive Methodists. At home and abroad there are 444 ministers and supernumeraries, with 3356 local preachers and 97,321 church members. The "foreign districts" are in China, East and West Africa, Jamaica, Australia, and Tasmania.

**Primitive Methodism** is sometimes referred to as a "growth" rather than a "secession," because the first "class" formed was composed of persons who had not previously belonged to any church. Mr. Hugh Bourne, who had been a local preacher amongst the Wesleyans, took charge of this class, and proceeded to form other classes. This was in Staffordshire in 1810. Two years before this, Mr. Bourne had been excluded from the Methodist body because he would not conform to the regulations of Conference respecting Camp Meetings. The Conference of 1807 had decided against Camp Meetings; but Mr. Bourne, and afterwards William Clowes, refusing to be ruled on this question were excluded. The first Conference of this body was held in '20. It is now the largest of all the bodies that have sprung from the Methodists. It has missions in Southern, Western, and Central Africa; in South Australia, New Zealand, and Queensland. It has a training college for ministers at Manchester, and colleges for youths at York and Birmingham, also an orphanage at Alresford. It has,

too, a training school for native evangelists in South Africa. **Latest statistics:** Members, 201,211; ministers, 1115; local preachers, 16,041; class leaders, 10,713; places of worship and rented rooms, etc., 5109; hearers, 589,784; value of Connexional property, £4,360,419; debt upon Connexional property, £1,016,410; Sabbath schools, 4167; teachers, 60,183; scholars, 466,997. **President of Conference**, Rev. Robert Harrison; **Secretary**, Rev. W. A. Hammond; **Missionary Secretary**, Rev. J. Pickett; **General Connexional Secretary**, Rev. J. Welford; **General Book Steward**, Rev. R. Bryant; **General Sunday School Secretary**, Rev. S. S. Henshaw; **Editor of the Monthly Magazines**, Rev. H. Yooll; **Principal of the Theological Institute**, Rev. W. Johnson; **Editor of the Quarterly Review**, Rev. H. B. Kendall, B.A.

**The Bible Christians** ("Bryanites") arose in 1815. William O'Bryan was a Cornish local preacher who threw himself into evangelistic work in such thoroughgoing fashion that he was declared to be "irregular." Upon this the new denomination was formed. The preachers at first did not take the title of "Reverend." They, however (like the Primitive Methodists), license women to preach as well as men. In England the denomination is strongest in Cornwall and in the Western counties. It has 201 ministers, 1495 lay preachers, and 29,720 members, ranking, in this particular, fourth amongst the minor bodies of Methodists. **The Protestant Methodists** were organised in '29, when more than 1000 members separated from the Leeds societies, through the organ controversy at Brunswick Chapel.

**Attempts at reunion** have been numerous, and not without success. The suggestions that the Old Connexion should be absorbed into the Church of England have not led to the result desired, nor has the wish—often expressed—that the denominations which have sprung from the Old Body should reunite, been realised. In September '81, however, an Ecumenical Methodist Conference—intended to be the first of a series—was held in Wesley's Chapel, City Road, London. The Methodist Episcopal Church of the United States had made the suggestion. There were 400 delegates, representing 28 branches of Methodism and 5,000,000 Church members. Ten years later a second Conference was held in America, and in 1901 a third was held in Wesley's Chapel, City Road.

**Attempts are being made to carry the union of churches still further by the amalgamation of several of the smaller Methodist churches.** In Australasia the **United Methodist Free Churches** have joined with other branches of the Methodist family to form one church, with 948 ministers, 12,307 lay preachers, 139,501 members, 233,598 Sunday scholars, and 5716 churches. They are all at one with each other, and with the parent body, in doctrine. The differences refer almost entirely to the position of the ministers, and their relation to the laity in church government. In the old Wesleyan body the "Legal Conference" is supreme, and this "Hundred" must be composed of ministers. Its position was not altered by the admission of laymen in '77 to the Representative Conference. The Primitive Methodists, on the other hand, place power in a Conference in which there are two laymen to one minister. The New Connexion and the

Bible Christians take a middle course—one layman to one minister—whilst the United Methodist Free Churches are unfettered in their choice of representatives. Another distinguishing feature in the government of the last-named Churches is their Circuit Independence. Their annual assembly has no power to revise the decisions of Circuit Courts in circuit matters. It is claimed for this denomination that its churches enjoy the freedom of Congregationalism whilst the whole body has the cohesion of Methodism.

The greatest development of Methodism has been in the **United States of America**, where it is now the leading denomination, numerically and financially. The Methodist Episcopal Church of the Northern States has a membership of 3,029,560, and 18,208 ministers. The Methodist Episcopal Church South has 1,518,854 members and 6247 ministers. Other Methodist bodies in America are the African Methodist Episcopal Church, with 728,354 members and 6429 ministers; the African Methodist Episcopal Zion Church, 542,422 members and 3310 ministers; the Methodist Protestant Church, 184,097 members and 1647 ministers; the Coloured Methodist Episcopal Church, 204,972 members and 2061 ministers; the Free Methodist Church, 28,038 members and 1001 ministers; and some few smaller churches with about 200,000 more members. In **Canada** the Methodist Church has 299,873 members and 2082 ministers. These figures being added to the number of Methodists in the United Kingdom and in the Colonies, give a total of 7,895,418 members, from which it is computed that the total number of persons attending Methodist churches throughout the world is about 30,000,000. Methodism has 6,567,789 Sunday scholars and 812,459 officers and teachers, 49,364 ministers, 106,418 lay preachers, and 89,798 preaching-places.

### THE BAPTIST UNION.

The Baptists hold that the only Scriptural mode of baptism is by immersion, and that the proper subjects are "believers"—persons of an age to exercise belief. Any other baptism they consider to be contrary to the original institution, contrary to the example of Christ, and also opposed to the spiritual design of the ordinance. Historians, themselves not Baptists, have shown that through many centuries these views have been held amongst the Waldenses, the Albigenses, the Vaudois, the Lollards and Wycliffites. Formerly, on the Continent and in England, they were opprobriously called **Anabaptists**. In 1537 Henry VIII. issued a proclamation against their heresy, as persons who rebaptised themselves. As early as 1611, many Baptists, because of persecution, fled to America, and the feeble remnant in London published a **Confession of Faith** (1611) to vindicate their orthodoxy. In 1620 they memorialised the king for liberty of worship. **Confessions of Faith** they published again in 1644 and 1646. In 1680 a **General Assembly** of Baptists in London published a **Confession** in thirty-two articles, and a **Baptist Catechism**, after the model of the Assembly's Catechism. The latest returns give, in the United Kingdom, 2875 churches, 3977 chapels, with 1,368,666 sittings, 217 pastors, 5851 local preachers, 388,357 Church members, 557,635 Sunday scholars, 54,630 teachers. The colleges for training the rising ministry are: Bristol, founded 1770; Midland,

1797; Rawdon, 1804; Regent's Park, 1810; Pastors', 1856; Manchester (Brighton Grove), 1866; Cardiff, 1807; North Wales, 1862; Scotland, Theological College, 1894; Ireland, Training Institute, 1892. The Baptist Foreign Mission was originated in 1792 (see **Missionary Societies**, p. 635). Baptist churches are congregational in government, holding to the order of pastors (bishops) and deacons. The interests of different counties are cared for by local associations and unions; and the wider affairs of the denomination are attended to by the **Baptist Union of Great Britain and Ireland**, formed in 1812—which Union, while it has no legislative authority, is adapted to secure united action throughout the whole country. In connection with the Union, the General Expenses, Literature, Home Mission, Annuity, Augmentation, and Education Funds have been established. These societies represent the distribution of nearly £13,000 per annum by the Council of the Union, under one executive. The recent effort to raise £250,000 for church extension and other denominational objects by means of a Twentieth Century Fund has been crowned with success by more than the full amount having been paid. Outside the Baptist Union there are the **Scotch Baptists**, with a plural eldership. In England there are some 300 **Hyper-Calvinistic** churches. It is computed that in the world at large there are 58,029 Baptist churches, 41,870 pastors and missionaries, and 5,454,699 Church members. The election of a Vice-President for the Baptist Union takes place at the Spring Assembly of the Union. There is no nomination, and in the ballot a majority of the total votes given is necessary to election. The Vice-President for one year becomes in the ordinary course President during the next year. **President of the Baptist Union for 1904-5**, Rev. John Wilson; **Vice-President**, His Honour Judge W. Willis, K.C.; **Treasurer**, Mr. Herbert Marnham; **Secretary**, Rev. J. H. Shakespeare, M.A. **Offices of the Baptist Union**, Baptist Church House, Southampton Row, London, W.C. Consult *The Baptist Hand-Book*.

### THE CONGREGATIONAL UNION.

It is claimed for the Congregational system of church government that it is apostolic; that each congregation of believers gathered by the apostles was in itself a complete church; that each church was free from the control of other churches and of the State; and that every member of the church had the right to take part in its management. The first Congregational church in England, of which there is any record, was formed in London about the year 1571. Robert Fitz was the minister, and his "True Marks of Christes Church" is the first document relating to English Congregationalism known to be in existence. The most prominent name in connection with Congregationalism at this time was that of the Rev. Robert Browne, who left the Established Church, and, in conjunction with the Rev. Robert Harrison, formed a Congregational church at Norwich in 1580. One of the most famous of the early churches in England was formed at Scrooby, in Lincolnshire. It met in the house of William Brewster, under the pastoral care, for a time, of Richard Clyffton (who had relinquished a living near Worksop). The famous John Robinson, M.A., succeeded him. To escape persecution, members of this

church fled to Holland, from whence, after twelve years, they crossed the Atlantic and landed at New Plymouth—the Pilgrim Fathers of the *Mayflower*. At this time the Congregationalists were sometimes called "Brownists" (after the Rev. Robert Browne), sometimes "Separatists" (because they would keep the Church separate from the world), and sometimes "Independents." This last designation Congregationalists themselves soon adopted, and have ever since retained, because it signifies that they hold "all particular churches of Christ to be of equal authority, and none to have jurisdiction over another." At the time of Cromwell's death a general council of Congregationalists was meeting in the Savoy. This council issued a "Declaration of Faith and Order." Of course the "Declaration" was not binding upon any particular church; at the same time it is almost as important in the history of Congregationalism as the Westminster Confession is in the history of Presbyterianism. The Restoration placed Congregationalism in a very different position from that which it enjoyed under the Protectorate, nevertheless the denomination was greatly and permanently strengthened by the Act of Uniformity (Aug. 24th, 1662), which drove 2000 ministers and many thousands of laymen out of the Established Church. Under the later Stuarts Congregationalists had their full share of persecution. After the passing of the Act of Toleration (May 24th, 1689) they took an active part in the extension of civil and religious liberty. They were chief amongst the founders of the London Missionary Society (1795), and the first tract for the Religious Tract Society was written by Dr. Bogue in 1799. In 1831 the Congregational Union of England and Wales was formed.

The Congregational Union of England and Wales was reconstituted by a scheme adopted in 1904, which aimed at uniting Congregational churches more closely in regard to co-ordination of county unions with the Union, church aid, church extension, evangelisation, lay preaching, the securing of a common standard of admission to denominational privileges, and the safeguarding of Congregational trust property. Under the scheme the Union is a federation of those Congregational churches only that are associated with a county union, and consists of an Assembly, a Council and a Chairman. The Assembly includes all ministers and representatives of all qualified churches, with all the members of the Council. The Council consists of 300 members elected by the county unions on a proportional basis, with committees created for departments of administration. The Council presents an annual report to the Assembly for confirmation.

From what has been said above it will be seen that Congregational polity is based upon three ideas: the right of each individual to take part in the government of the community; the autonomy of the local church; and its independence of all external ecclesiastical authority. Usually each church has one minister or pastor, who is chosen by the free suffrages of the membership; but there is nothing to prevent there being more than one, and in fact such cases are not uncommon. In addition to the pastor or pastors, home missionaries and evangelists are sometimes appointed, whose work is distinct from, though subject to the supervision of, the regular pastorate. There are two orders of church officers only: bishops, elders, or

pastors, who are the presidents or administrative rulers in the spiritual department of church life; and deacons, who have charge of its secular affairs.

There are in the **British Isles** 4827 Congregational churches, branch churches and mission stations, with 3130 ministers, 1,746,058 sittings, 448,263 church members, 701,146 Sunday scholars (mission stations in Scotland not included), 66,460 teachers, 233 evangelists and lay pastors, and 5316 lay preachers. There are twelve colleges belonging to the denomination in the three kingdoms, with 54 professors and lecturers (beside three in the Colonies), in which 410 students are being trained for the regular ministry. The British Congregational churches raise for the support of religious worship, and for philanthropic purposes, in connection with their own organisations, upwards of £1,000,000 per annum. County or district associations exist for the purpose of upholding and extending evangelical religion, of promoting the spiritual intercommunion of the churches, strengthening their fraternal relations, facilitating co-operation in everything affecting their common interest, aiding weak churches, and carrying on mission work within their respective areas. The **Congregational Church Aid and Home Missionary Society** supports mission work through the county unions. For foreign missions see **London Missionary Society**, p. 601. Congregationalism is also a prominent form of church life in the **United States of America**, throughout the British dependencies, and in other parts of the world. **Offices of the Congregational Union of England and Wales**, Memorial Hall, Farringdon Street, E.C. **Secretary**, Rev. J. A. Mitchell, B.A.; **Chief Clerk**, Mr. C. Standcliff; **Chairman**, 1904, Rev. Albert Goodrich, D.D.

**London Congregational Union.** This, the only society representing the interests of London Congregationalists, was formed in March 1873. The limits of its operations are comprised within the area known as Greater London, including the whole of Middlesex, and such portions of Surrey, Kent, Essex and Herts as are within twelve miles of Charing Cross, these being divided into ten districts. The objects of the Union are to promote the spiritual intercommunion of the Congregational churches of the Metropolis, to aid such of them as are weak, to advance their common religious and social interests, and further to promote church extension. An annual average of about £2000 is expended in aiding churches to support their ministers and in extending and consolidating mission work. In addition, grants are made in aid of **Chapel Building**, and **Free Loans** are granted for a term of years from a fund amounting to £11,050. About £55,000 has been raised during the last twenty years for **children's breakfasts** and other **philanthropic work**. Upward of 250,000 garments have been distributed. The membership of the Union consists of the representatives of affiliated churches and of ministerial, personal and honorary members. The Council consists of sixty members, thirty ministerial and thirty non-ministerial, elected by the Districts; and not more than twenty co-opted by the Council, together with the Chairman, ex-Chairmen, vice-Chairman, Treasurers, and Secretary. Each District Committee is entitled to nominate for the Council in the proportion of one member for every seven affiliated churches in

the district. **Offices**, Memorial Hall, Farringdon Street, E.C. **Secretary**, Rev. A. Mearns.

**Mansfield College, Oxford**, was established for the education of men for the Nonconformist ministry, but its classes are open to all persons possessed of the requisite academic qualifications. It is purely theological, and its students must, before entering on its distinctive studies, be graduates of some recognised university. It has two kinds of **Scholarships**: (1) Arts, value £60 a year, tenable by undergraduates, at any of the older colleges in Oxford. The men who hold these are scholars, but not students, of the College. They become the latter only after they have taken their degree. (2) Theological, value £60 a year, with tuition free, tenable during the course at Mansfield, which extends over three years. These can be held only by graduates in honours who have distinguished themselves in the entrance examination. The College buildings were opened on Oct. 15th, '89. **A Settlement** in connection with the College has been formed at Canning Town, E., and is called "**Mansfield House**." The staff of the College consists of: **Principal**, Rev. A. M. Fairbairn, D.D.; **Professors**, Revs. J. V. Bartlet, M.A., D.D., G. B. Gray, M.A., D.D., and Mr. A. Souter, M.A.; **Tutors**, Revs. G. W. Thatcher, M.A., B.D., and F. Lenwood, M.A.; **Bursar**, Rev. N. H. Smith, M.A.

#### COUNTESS OF HUNTINGDON'S CONNEXION.

The Countess of Huntingdon's Connexion owes its existence to the religious revivals in the eighteenth century, with which Whitefield and the Wesleys are so prominently identified. The Countess of Huntingdon (d. 1791) had been a member of the Established Church, but finding that the parochial system interfered with her intense desire to have the gospel preached in every place in England, she cast in her lot with the Nonconformists. The **liturgy** formed part of the religious worship in her chapels, and it is still used in some of them. During life her control was absolute. At her decease in 1805 her work devolved on her devisees, who carried it on under two Trust Deeds dated 1807 and 1831 until Jan. 1st, 1899, when the **present Trust Deed**, sanctioned by the Court of Chancery, came into operation. This deed curtailed the absolute power of the Trustees in favour of a limited control by the congregations. At the present time the **Trust** comprises 40 churches and mission stations, superintended by 27 ordained pastors, with about 2400 communicants. The **funds raised** by these churches for Church purposes in 1903 amounted to £8915. The **endowment of the Trust** produces about £1500 a year, which is devoted to four purposes: Grants in aid of the ministry, annuities to ministers over sixty years of age who have given more than twenty years' continuous service in the connexion, or to their widows, at the sole discretion of the Trustees. Grants for the maintenance or extension of the existing buildings vested in the Trust. Grants to assist in purchasing chapels or chapel sites. In addition to these grants from the annual income, the Trustees may grant loans for the encouragement of new progressive work from a loan fund of about £8000. There are many churches with similar Trusts, but outside the control of the central Trust. **Oheshunt College**, of which the Rev. O. C.

**Whitehouse, M.A., D.D.**, is the Principal, has been rebuilt. **New Spa Fields Church** has been erected. The Connexion chapels generally have been entirely rebuilt or adapted to the religious requirements of the age, and the Trustees have faithfully endeavoured to maintain an evangelical ministry in every chapel of the Connexion. All its ministers have to subscribe to the "**Fifteen Doctrinal Articles**" of the Connexion, as do the professors of Cheshunt College and the students, with a view of carrying out the Countess's idea—the continuance of an earnest evangelical ministry. **Secretary** Mr. Samuel Smith, 38, Eldon Street House, London, E.C.

#### FREE CHURCH OF ENGLAND.

A Protestant episcopal organisation, originated in 1844 (enrolled in Chancery 1863) as a counter-acting movement to the Oxford Tractarianism. Being free from State control, the Free Church claims the liberty to enter a parish where ritualistic practices prevail, and establish a liturgical service on the basis of the Evangelical party in the National Church, with which section it is in ritual practically identical. It is governed by Convocation and bishops, consecrated in the line of the Canterbury succession by the Rt. Rev. Bishop Cummins, of the American Protestant Episcopal Church, whose bishops were consecrated at Lambeth Palace 1787. The churches, although not numerous, are widely spread. **Convocation** held yearly (June).

**Bishop Primus**, Bishop Troughton, 13, Calton Terrace, Morecambe.

**Missionary Bishop**, Bishop Brook Lander, Christ Church House, Teddington.

**Treasurer**, Thos. Hoghton, Esq., Ridley House, Agnew Street, Lytham, Lancs.

**Registrar**, E. M. Dence, Esq., Fairhaven, Park Road, Teddington.

**Secretaries**: **General**, Rev. J. W. Hodgkinson, 227, Onslow Drive, Dennistoun, Glasgow; **Finance**, Joseph Calvert, Esq., 189, Manchester Road, Hollinwood, Lancs.

**Missionary Secretary**, Rev. George Slater, Exeter.

#### REFORMED EPISCOPAL CHURCH.

This Church was organised in the City of New York, in the year 1873, as a protest against the sacerdotal ritualism and exclusiveness manifested in the old Protestant Episcopal Church of America. Its first bishop was the Right Rev. George David Cummins, D.D., Assistant Bishop of Kentucky, through whom the episcopal succession from the See of Canterbury has been handed down to the new Church. The movement was introduced into England in '77, and organised as an independent General Synod, with the right of self-government, in '78. The Church is governed by the said General Synod, which at present meets annually, and consists of all the bishops and presbyters, together with two lay representatives, or synodsmen, from each organised congregation. The **officers of the Synod** are, the President, who is also Presiding Bishop, Registrar, Treasurer, and Secretary, and various standing committees. The Book of Common Prayer, revised, is used in public worship, and the laws and customs of the Church of England, as evangelically understood, are generally observed. The Church is intended to afford a

refuge to distressed churchpeople in ritualistic parishes, or where an evangelical church service does not exist. There are some twenty organised congregations in different parts of England, while in America and Canada the churches are numerous. **Presiding Bishop in Great Britain**, Right Rev. Philip X. Eldridge, Upper Tooting, S.W. **General Secretary**, Rev. T. Heath, Christ Church Parsonage, Hemel Hempstead, Herts.

### THE MORAVIAN CHURCH.

The Moravian Church is a body of Christians formed from among the followers of **Hus**; organised in 1457 as the "**Unitas Fratrum**," or "The Unity of the Brethren"; repressed in the beginning of the Thirty Years' War, 1621. Descendants of the Church survived in Moravia, and settled in 1722 at **Herrnhut** in Saxony, on the estate of Count Zinzendorf. In 1735, the Orders of the Moravian Church were resumed. It spread into Holland, Denmark, England, and America; developed extensive mission work in the colonies, and engaged in wide educational activity at home and abroad. The Church is composed of three "provinces," Germany, England, and America, each independent within its own sphere, and all constituting "The Unity of the Brethren." In constitution, ritual, and doctrine, the Church is one; foreign missions, leper mission at Jerusalem, mission in Bohemia and Moravia, are the joint responsibility of all. There is a **London Association in aid of Moravian Missions**. **Secretary**, Rev. W. Wetton Cox. **Office**, 7, New Court, Lincoln's Inn, W.C. **Elected General Synods** held every ten years, representative of all the provinces and foreign missions. **Governing Board of the Unity** elected at these synods. Each province appoints its own executive at its provincial synods. See "A Short History of the Moravian Church," by J. E. Hutton, M.A. (price 2s. 10d., post free). **Publication Office**, 32, Fetter Lane, London, E.C. **Total constituency** in 1903, including the so-called "Diaspora" on the continent of Europe, about 210,000. **Pupils** in day-schools and boarding-schools about 29,000; in Sunday-schools nearly 39,000.

### THE SOCIETY OF FRIENDS.

The Society of Friends, commonly called Quakers, was founded in the middle of the 17th century by George Fox. "Friends" are distinguished from other Christian bodies by the special stress they lay on the immediate teaching and guidance of the Holy Spirit, and their belief that no one should be paid or appointed by human authority for the exercise of the gift of the ministry. In obedience to this belief they hold their meetings without any prearranged service or sermon, and sometimes in total silence. The Friends believe that the sacraments of Baptism and the Lord's Supper are to be taken spiritually, and not in an outward form. Their protests against the use of oaths and against the exaction of tithes and church rates cost them much suffering and frequent imprisonment during the first fifty years of their existence. The simple form of dress maintained by Friends for two hundred years had, in the first half of the 19th century, become a matter of very grave importance. It has, however, now

been generally given up, as have the "testimony" against music and singing in its rigid application, and the peculiarities of speech, such as the use of "thee" and "thou" instead of "you" (though many Friends still retain this custom amongst themselves), and the avoidance of all flattering titles. Of late years there has been a very decided evangelical movement among Friends, under the influence of which the old quietism is dying out. As a result of this change the influence of the Society beyond its own borders, through home and foreign missions and adult **First Day (Sunday) Schools**, has developed to a remarkable extent. In this country Friends have recently been increasing in numbers. The latest statistics of the Society (1903) are as follows: meetings in Great Britain, 377; members, 18,221; meetings in Ireland, 38; members, 2511. **Total membership**, 20,146. "**Recorded Ministers**" in Great Britain, 384; in Ireland, 40. **Attendees of meetings** in Great Britain and Ireland not in membership, 8642; **First-Day scholars**—Adults, 39,972; Juniors, 22,713. There are probably about 93,000 in the United States and Canada, besides small numbers in other countries. There is also in America a numerous body of Friends called "**Hicksites**" (from their founder, Elias Hicks), who about seventy years ago separated from the orthodox community, and hold latitudinarian views. The Wilburite section are conspicuous in Pennsylvania by their adherence to the old-fashioned dress and the "plain language." Large numbers of persons who do not appear in the statistical returns attend the Mission meetings of the Society of Friends, and very large numbers come under the influence of their missionaries (about 103 in number) in the foreign mission field. **Secretary of the Society** in Great Britain, Isaac Sharp. **Headquarters** in Great Britain: Devonshire House, 12, Bishopsgate Without, London, E.C.; in Ireland, 6, Eustace Street, Dublin.

### THE SALVATION ARMY.

The Salvation Army is a home and foreign missionary society with a semi-military organisation, having its General, Chief of the staff, commissioners, colonels, brigadiers, majors, and other officers, both commissioned and non-commissioned, with large contingents of soldiers, after the model of the British army, scattered throughout the world. Originated in the year 1865 by the Rev. William Booth, previously a Methodist minister, the movement was called the Christian Mission until, in '78, the present name was adopted. Its objects are to reach, by means of adaptation, the great masses of the people, both at home and abroad, who are either too degraded or too indifferent to be reached by ordinary religious agencies. Its own supported and separated officers now number 16,059, and these proclaim the Gospel in no less than 31 different languages and dialects. There are also some 45,339 voluntary officials specially selected and appointed to take definite work. The Army publishes in the several countries, in the vernacular, 63 illustrated newspapers and magazines, with a total annual circulation of about 50,000,000, the sale of which is mostly entrusted to its own members. The above summary conveys a brief idea of one side of the Army's work. Another side is the **Darkest England Social Scheme** formulated by General Booth, which

has for its object the immediate alleviation of the present misery of the outcast poor and their actual rescue from destitution, keeping always prominently in view likewise that reformation in character which, undoubtedly, is the true secret of permanent improvement. In this branch of the work the Salvation Army goes to the slums, and ministers to the workless, the homeless, the tramps, the starving, the waifs and stray children of the streets; and amongst the outcasts of society in every land, irrespective of creed or colour. For the accommodation of these this department has, in different parts of the world, 644 shelters, homes, labour factories, and other institutions in full operation, under the guidance of 2002 officers, men and women. An **International Congress** was held in London in 1904. The **International Headquarters** are at 101, Queen Victoria Street, London, E.C. The **Training Homes** are in Clapton, N.E. The **International Trading and Publishing Headquarters and Book Room** are at 79-81, Fortress Road, Kentish Town, N.W.; **Printing Works** at St. Albans. The **offices of the City Colony of the Social Scheme** are at 20 and 22, Whitechapel Road, E. The **British Farm Colony** is at Hadleigh-on-Thames, Essex.

### THE UNITARIAN ASSOCIATION.

Unitarians is the name commonly given to Christians who do not accept the doctrine of the Trinity, the Deity of Christ, the infallibility of the Bible, and other "orthodox" doctrines. **Congregations and mission stations** number about 287 in England, 33 in Wales, 7 in Scotland, and 39 in Ireland, making 367 in all. The number of ministers and lay workers is 371; number of Sunday-schools 326. The **British and Foreign Unitarian Association** is not directly representative of the churches, but consists of independent subscribers desirous of promoting "the principles of Unitarian Christianity." The writings of Dr. W. E. Channing, Theodore Parker, Dr. James Martineau, and others, have made Unitarian thought familiar to many outside the limits of the denomination. The only technically Unitarian College is the **Unitarian Home Missionary College in Manchester**. At **Manchester College (q.v.)**, Oxford, many leading Unitarian ministers are trained. There is a triennial Conference of non-subscribing congregations, which consists almost entirely of Unitarians. An **International Council of Unitarian and other Liberal Religious Thinkers and Workers**, attended by representatives from Europe, America, Australia, India, and Japan, was held in London in 1901, and in Amsterdam in 1903; it will hold its next meeting at Geneva in 1905. The professedly Unitarian congregations of the **United States** number 350; of these 232 are in New England, many of them being old Puritan foundations. The *Inquirer* and the *Christian Life* are both Unitarian weekly newspapers. **Secretary**, Rev. W. Copeland Bowie. **Treasurer**, Mr. Oswald Nettlefold. **Office and Book Rooms** of the Unitarian Association, Essex Hall, Essex Street, Strand, W.C.

The **Sunday School Association**, founded in 1833, exists in connection with the Unitarian and Free Christian Churches. Its objects are the publication of suitable books for Sunday-schools, and the promotion generally of Sunday-school education. **Hon. Secretary**, Mr. Ion

Pritchard; **Business Manager**, Mr. B. C. Hare. **Office**, Essex Hall, Essex Street, Strand, W.C.

### NEW JERUSALEM CHURCH.

The New Church whose members are commonly called "Swedenborgians," because they accept the system of Scriptural interpretation contained in the writings of Emanuel Swedenborg (b. 1688; d. 1772), by whose instrumentality they believe the Lord has effected His Second Coming by unfolding the internal or spiritual sense of the Divine Word. The doctrines of this sense, together with the science of correspondences—which constitutes the key by which that sense may be unlocked—are set forth in Swedenborg's theological writings. The fundamental doctrines taught are, that the Lord Jesus Christ, in His glorified humanity, is the only God of heaven and earth, and that in Him is the Trinity of Father, Son and Holy Spirit, answering to the trinity in man of soul, body, and their operation together; and that in order to be saved it is necessary to believe in Him, and to keep the commandments by shunning the evils therein forbidden, as sins against Him. Swedenborg's writings were first extensively made known in this country by a clergyman of the Church of England, the Rev. John Clowes, rector of St. John's, Manchester, who translated a great number of them, including his greatest work, the "*Arcaena Coelestia*" (13 vols.). Another clergyman, the Rev. William Hill, translated the work second only in importance to it, the "*Apocalypse Explained*" (6 vols.). The Rev. Thomas Hartley, rector of Winwick, translated "*Heaven and Hell*." Very early, some drawn from the ranks of the Methodist preachers and other students of Swedenborg, formed a separate organisation for worship (1788), which has continued and increased. There are existing 76 societies, with 6589 registered members and 833 junior members. They have Sunday-schools with 7770 children, and day schools with 3931 scholars. There are 10 societies in London and its neighbourhood. Their statistics, however, fail to tell the number of their receivers, who have always consisted of separatists and non-separatists—the latter sometimes from their isolation, but sometimes from principle, worshipping in the Established Church or with some of the other religious bodies. In America the number of the societies of the New Jerusalem Church is much greater; and in every foreign country, both in Europe and elsewhere, they possess zealous, if not numerous, adherents. The body in Great Britain is governed by a Conference, which meets annually, and consists of all the ministers and of from one to three representatives from each society, according to the number of its members. The **Swedenborg Society**, 1, Bloomsbury St., was founded 1810 for translating, printing and circulating Swedenborg's works, which may be had in sixteen languages. The Church also possesses its own orphanage, its college for training candidates for the ministry, its National Missionary Institution, Missionary Ministry Fund, and other associations formed to forward its propaganda.

### THE PECULIAR PEOPLE.

This body of Christians was founded, in 1838, by James Banyard, a native of Rochford, Essex,

and a Methodist local preacher. One of the tenets of the Society is that "the Church and the Elders are the most suitable persons for God to heal the sick by, and Sisters in cases of childbirth." The Society hold that God "can and does heal diseases, in answer to the prayer of faith, without the aid of doctors or physic." The religion of the Peculiar People regulates dress and other matters which are considered of indifference by the great majority of Christians. The title "Peculiar People" is self-chosen, and was suggested by such texts as, "The Lord hath

chosen thee to be a peculiar people unto Himself" (Deut. xiv. 2). The government of the body is conducted by a committee, consisting of district representatives, three of whom are Bishops, viz., Bishops Heddle, Benton, and Chignell, and a council comprising elders from the churches. The bishops, elders, and deacons receive no salary or pay. At public worship the women sit on one side of the preacher and the men on the other. The denomination is strong in South Essex, and in some parts of Kent. **Chairman**, Bishop Heddle, Redland, Victoria Avenue, Southend.

## ROMAN CATHOLIC CHURCH.

The Roman Catholic Church is the name of that community of Christians who profess the same faith, partake of the same sacraments and sacrifice, and are united under one head, the Pope or Bishop of Rome and successor of St. Peter, and under the bishops subject to him. Its essential parts are the Pope, bishops, pastors—so far as they are priests—and laity. A distinctive characteristic of the Roman Catholic Church is the supremacy of the Papacy. Its doctrines, like those of the rest of Christendom, are chiefly found in the articles of the Nicene Creed. After the Council of Trent Pope Pius IV. added to the formal Profession of Faith the articles on transubstantiation, invocation of saints, and others which chiefly distinguish the Roman from other Christian communities. The Immaculate Conception of the Virgin Mary and Papal Infallibility were defined as articles of faith in 1854 and '70 respectively. One great and central object of faith and worship is the Mass, which is the mystical sacrifice of the body and blood of Christ, instituted by Himself at the Last Supper, and is essentially the same as the Sacrifice of the Cross. Scripture and tradition are appealed to in support of this and other doctrines—as the Seven Sacraments, the honour due to the Blessed Virgin, Purgatory, Invocation of Angels and Saints, etc. There is a great distinction between what is of doctrine and what of discipline; the former belonging to the deposit of faith taught by Christ and the Apostles, which is invariable, whilst the latter, founded on the decisions and canons of councils and the decrees of popes, is the Church's external policy as to government, and may vary according to times and circumstances.

The Sacred College of Cardinals—70 in number, after the 70 disciples—are the supreme council or senate of the Church and the advisers of the sovereign pontiff, and at the death of a pope they elect his successor. They are also the chief members of the Sacred Congregations, or permanent ecclesiastical commissions (about twenty in number), to which much of the business of the Holy See is entrusted. Among the best known of these congregations are the Propaganda, the Index, the Inquisition or Holy Office, and the Congregation of Rites. The number of cardinals is hardly ever complete; in December 1904 there were 62. Including 55 of the cardinals, the patriarchs, archbishops, and bishops, at the beginning of 1904 numbered 1345. There are 10 patriarchates with 14 patriarchal sees, and 198 archiepiscopal and 791 episcopal sees which are termed *residential*. Besides these, there are a number of *titular*

sees, most of which are assigned to archbishops and bishops appointed, either to apostolic delegations, vicariates, or prefectures, or to the office of coadjutor, auxiliary, or administrator of a diocese. There are 10 apostolic delegations, 130 vicariates, and 57 prefectures. See PIUS X. for a biography of the present Pontiff; and BOURNE, MOST REV. F., for a biography of the Archbishop of Westminster.

**Statistics.**—The total number of Roman Catholics throughout the world, ruled by about 1200 archbishops and bishops, is estimated at 264,500,000. There are in Great Britain and Ireland about 5,500,000 (*i.e.*, about 3,310,000 in Ireland, and the remainder in Great Britain); and in the whole of Europe about 177,600,000. Ireland is divided into 4 ecclesiastical provinces, subdivided into 27 dioceses, ruled by 4 archbishops and 23 bishops (*v. infra*). The number of priests in Ireland is about 3550, serving 2420 churches and chapels, situated in 1099 parishes. The 24 archbishops and bishops of Great Britain (*v. infra*) consist of: 1st, for England, 1 archbishop (of Westminster), with 14 suffragans, 2 auxiliaries, and a suffragan bishop for Wales; 2ndly, for Scotland, 2 archbishops (one of St. Andrews and Edinburgh, and one of Glasgow), with 4 suffragans. The number of priests in England and Wales (Dec. 1904) is 3273, with 1637 churches, chapels, and stations; in Scotland 521, with 371 churches, chapels, and stations. The United States has about 12,000,000 Roman Catholics, 13 archbishops and 86 bishops, about 13,300 priests, about 11,200 churches and chapels, and 1,000,000 pupils in Catholic schools. In the British possessions of North America there are about 2,600,000 Roman Catholics, 39 archbishops and bishops, about 3500 priests, 2800 churches, chapels and stations. From statistics like these, which can be approximated to in all the other parts of the world by the bishops presiding over the different dioceses or vicariates, and are published occasionally, may be inferred how complete is the organisation of this Church, and how vigorously she exercises the forces at her command for the extension of the Roman Catholic faith. Westminster Cathedral, a vast edifice in the Byzantine style, of which the exterior is now nearly completed, was permanently opened for Divine service in December 1903. But many years must pass before the completion of the interior, for which large funds will be needed. Internally, the length is 342 ft., the width across nave and aisles and side chapels 150 ft., the width of nave 60 ft., and its height 112 ft.

**Roman Catholic Bishops.**—The following is a list of the bishops in the United Kingdom, with their respective sees:—

### ENGLAND AND WALES.

#### Province of Westminster.

NAME.	DIOCES.
Most Rev. Francis Bourne (Archbishop) . . . . .	Westminster.
Rt. Rev. P. Fenton (Auxil.) . . . . .	
" " Edward Ilsley . . . . .	Birmingham.
" " George A. Burton . . . . .	Clifton.
" " Thos. W. Wilkinson . . . . .	Hexham and Newcastle.
" " R. Preston (Auxil.) . . . . .	
" " William Gordon . . . . .	Leeds.
" " Thomas Whiteside . . . . .	Liverpool.
" " Richard Lacy . . . . .	Middlesbrough.

" " Thomas O'Dea . . . . .	Achonry.
" " John Clancy . . . . .	Clonfert.
" " Francis MacCormack . . . . .	Elphin.
" " John Conmy . . . . .	Galway and Kilmacduagh.
	Killala.

## MISSIONARY SOCIETIES.

The earliest missionary operations in modern times were carried on by the Jesuits in Japan, where great progress was made; but their work was overthrown, and the missionaries expelled before the sixteenth century. They also carried on operations in China and India. The Society for the Propagation of the Gospel in Foreign Parts, was established by Act of Parliament in 1647, and work commenced amongst the North American Indians. Frederick IV. of Denmark founded a mission on the coast of Coromandel in the beginning of the eighteenth century. The Moravian Church was the first to begin missionary operations in its corporate character by establishing mission stations at the Cape of Good Hope, in the West Indies, Labrador, Greenland, and in many other parts of

the world. The Baptist Missionary Society was founded in 1792, the London Missionary Society in 1795, the Church Missionary Society at the commencement of the last century, and the Wesleyan-Methodist Missionary Society in 1814. The following details are extracted from the last published reports of each society.

The Church Missionary Society, which celebrated its centenary in April 99, labours in West Africa (Sierra Leone, Lagos and Yoruba country, and the Niger); in Eastern Equatorial Africa (Mombasa, Taita, Taveta, Usagara, Usukuma, etc., and Uganda). Palestine (Jerusalem, Nazareth, Salt, Nablus, Jaffa, Gaza, and Hauran). In India it has six missions, having headquarters in Calcutta, Allahabad, Bombay, Madras, Amritsur, Travancore, and Cochin. Besides these, mission

work is carried on in Egypt, Persia, Ceylon, the Mauritius, China, Japan, New Zealand, North-west America, and the North Pacific. The summary of the work shows the following results: Stations, 549; Missionaries, etc., including European, Eurasian, and native clergymen, female teachers, and native Christian unordained teachers, 9167; native adherents baptised, 289,958; catechumens, 28,160; native communicants, 84,723; schools, 2546; scholars, 133,012. **Mission House**, Salisbury Square, Fleet Street, London, E.C.

The **London Missionary Society** was established in 1795. It is now maintained chiefly by Congregationalists. Income received in year 1903-4, £175,348. Mission operations carried on in China, at Hong Kong, Canton, Amoy, Chiang Chiu, Shanghai, Hankow, Wu Chang, Hiau Kan, Tsao Shih, Heng Chou, Chung King, Tientsin, Tsang Chou, Chi Chou, Peking, and Tung An. In India, at Calcutta, Berhampore, Jaganj, Benares, Mangari, Mirzapore, Dudhi, Kachwa, and Almora, in the north; and at Bellary, Anantapur, Gooty, Jammulamadugu, Cuddapah, Kadiri, Chik Ballapur, Bangalore, Tripatoor, Salem, Coimbatore, Madras, and Vizagapatam. Also at Nagercoil, Tittuvelai, Neyoor, Pareychaley, Trevandrum, Attingal, and Quilon, in the state of Travancore, in Southern India. In Madagascar 13 principal stations are sustained. In South Africa there are 12 and in Central Africa 4 stations. Mission work is also carried on from 16 centres in Polynesia and from 10 head stations in New Guinea. A general summary shows that the Society has 279 European missionaries and 6751 native agents; 74,786 Church members and 225,431 native adherents, while they conduct 2060 native schools, with 88,000 scholars. The amount advised as raised and appropriated at mission stations was £30,817, which is included in the total income given above. **Mission House**, 16, New Bridge Street, E.C.

**Presbyterian Church of England Foreign Missions.** Founded '47. Total income, 1903 (including £3500 raised on the mission field) £39,690; expenditure, £33,362. In China operations are carried on in the districts around Amoy, Chinchew, Changpoo, Swatow, Suabue, Chaochowfu and the Hakka country, and amongst the Chinese and more or less civilised Malay aborigines in the island of Formosa, now a province of Japan. Work is also carried on at Singapore, and at Rampore Boalia, in India, and (a mission to the Jews) at Aleppo, in Syria. Forty-six European missionaries are engaged, of whom 14 are medical and 5 are teachers. There are also 29 lady missionaries, including 3 fully qualified lay doctors, besides 37 native pastors, 305 native evangelists, and 151 native students. There were 8473 communicants at the end of 1903, being an increase of 621 during the year; and there were 5150 baptised children.

**Baptist Missionary Society.** Received on behalf of the Society during 1903-4, £90,120 8s. 4d. In India operations are carried on in Bengal, Orissa, and the North-West Provinces; there are 145 stations and sub-stations, 71 European missionaries, 60 missionaries' wives and lady helpers, 33 assistant missionaries, and 246 native evangelists. In the island of Ceylon there are 71 stations and sub-stations, 3 European missionaries, and 20 evangelists.

Missionaries' wives and lady helpers, 3. In China work is carried on in the provinces of Shantung, Shansi, and Shensi; there are 315 stations and sub-stations, 31 European missionaries, and 74 native evangelists. Missionaries' wives and lady helpers, 20. In Palestine the chief station is at Nablous, and there are 6 sub-stations and 1 missionary. Missionaries' wives and lady helpers, 1. Africa has 113 stations on the Lower and Upper Congo. There are 36 European missionaries at work, and 100 native evangelists. Missionaries' wives and lady helpers, 24. Mission work is also carried on in Jamaica (Calabar College, Kingston, for training a Native Ministry, etc.), and in Brittany and Italy, there being 5 missionaries and 7 missionaries' wives and lady helpers. The statistics for 1903-4 summarised, excluding Jamaica and the West Indies, now independent of the Society, show the following results: missionaries, 148; missionaries' wives and lady helpers, 115; stations and sub-stations, 699; evangelists, 439; baptised, 1167; number of members, 15,388; day-school teachers, 777; Sabbath-school teachers, 850; day-scholars, 18,259; Sabbath-scholars, 12,871. **Mission House**, 19, Fuminal Street, Holborn, E.C. **Secretary**, A. H. Baynes.

**Primitive Methodist Missionary Society.** The total receipts of this Society for the year ending Dec. 31st, 1903, were as follows: General Fund, £13,423; African Fund, £5634, making a total of £19,057. **Secretary**, Rev. James Pickett, 18, Ridge Road, Hornsey, N.

The "S.P.G." (Society for Propagation of the Gospel in Foreign Parts) is the oldest Missionary Society connected with the Church of England, being incorporated by royal charter in 1701. On the Society's list there are 768 ordained missionaries, including 9 bishops; and of these 266 are labouring in Asia, 206 in Africa, 47 in Australasia and the Pacific, 143 in North America, 70 in the West Indies and South America, and 36 (chaplains) in Europe—the number of languages in which the Gospel is preached being 54. In the Society's colleges there are about 3200 students; and 3000 lay teachers are employed in the various Missions; 40,000 children are receiving instruction in the Mission schools in Asia and Africa. The income for 1903 was £158,642. **Office**, 19, Delahay St., Westminster. **Secretary**, Right Rev. H. H. Montgomery, D.D.

**Universities' Mission to Central Africa.** Founded by David Livingstone, and commenced in 1861 by Bishop Mackenzie; now consists of 113 English members and 265 trained native teachers. There are four chief centres of work—at Zanzibar, Usambara, Rovuma, and on Lake Nyasa. **Secretary's Office**, 9, Dartmouth Street, Westminster.

**Wesleyan Methodist Missionary Society.** The total sum received in 1903 from the Home districts amounted to £111,940 12s. 6d., Ireland £4119 1s., Foreign districts £13,729 15s. 11d., Mission House receipts £4641 os. 6d., and miscellaneous receipts £20,743 16s. 5d., together making a total of £155,174 os. 4d. The expenditure was £156,545 19s. 9d., showing a deficiency on current account of £4193 18s. 11d. at close of 1903. The Foreign Missions of the Society fall under three heads: (1) Missions originated by the Society, but now entirely independent

and under the direction of Colonial Conferences in Canada, Australia, New Zealand, and the South Sea Islands; (2) Missions now under the immediate direction of local conferences, but still aided by the Society, in Ireland, France, and South Africa; (3) Missions still under the immediate direction of the British Conference in Europe, Ceylon, India, China, South and West Africa, the West Indies,

Honduras, and the Bahamas. The summary of the year (not including affiliated Conferences) gives the following results: Circuits, 310; chapels and preaching-places, 2710; missionaries, 440; other paid agents, 3529; unpaid agents, 6667; full Church members, 56,541; on trial for Church membership, 18,566; scholars, 104,689. Centenary Hall, 17, Bishopsgate Street Within, E.C.

## OTHER ORGANISATIONS.

### POSITIVISM.

The philosophical and religious system of Auguste Comte (1798—1857). The chief principles of the former side of the system are: (1) The classification of the sciences in hierarchical order, proceeding from the simpler to the more complex, as follows: mathematics, astronomy, physics, chemistry, biology, sociology, morals; and (2) The doctrine of the "three stages" through which the human mind has to pass in the investigation of phenomena: the theological or personifying, the metaphysical or abstract, and the positive or scientific. The religious side of Positivism consists in the *cultus* of Humanity considered as a corporate being in its past, present, and future. The "positive philosophy" is its theoretical or doctrinal basis, corresponding to the theology of the supernatural religions; but besides this it consists in a worship requiring for its full development an organised priesthood, temples, etc. Under the "life" or *régime* of positive religion Comte would include the political and social side of his system. The former involves the establishment of an international republic, consisting of the five great nations of Western Europe, which is ultimately destined to lead the whole world; the latter the reorganisation of society on the basis of a double direction—that of the temporal or material authority, and that of the spiritual or educating body. Positivism as a religion has achieved some success since Comte's death. In Paris it possesses a periodical, the *Revue Occidentale*, and Comte's apartments, at 10, Rue Monsieur le Prince, are kept as a place of meeting. Other groups exist in other cities of France, of the Continent, of America, both North and South, and in five or six cities in England. In London the principal places of meeting are Newton Hall, Fetter Lane, E.C.; and Chapel Street, W.C. The *Positivist Review*, edited by Prof. Beesly, is issued monthly.

### THEOSOPHY.

The chief agent in founding the Theosophical Society was Mme. H. P. Blavatsky, who, with Col. H. S. Olcott and others, established it in New York in 1875, the headquarters being in 1879 transferred to Madras. There are now over 400 branches in Europe, India, America, and the Colonies, and a large literature. The Society has three declared objects—viz.: (1) To form a nucleus of the universal brotherhood of humanity, without distinction of race, creed, sex, caste, or colour; (2) to encourage the study of comparative religion, philosophy, and science; (3) to investigate unexplained laws of nature, and the powers latent in man. Some of the more important teachings of Theosophy will be found summarised in eds. '95 and '96. The chief books on Theosophy are: "The

Secret Doctrine," "Isis Unveiled," "The Key to Theosophy," by H. P. Blavatsky; "Esoteric Buddhism," "The Occult World," and "The Growth of the Soul," by A. P. Sinnett; "Theosophical Manuals" Nos. I., II., III., IV., and VII., "The Ancient Wisdom," "The Self and its Sheaths," "The Building of the Kosmos," "The Birth and Evolution of the Soul," "A Study in Consciousness," and "Esoteric Christianity," by Annie Besant; "Theosophical Manuals" (Nos. V. and VI.), "The Christian Creed," and "An Outline of Theosophy," by C. W. Leadbeater. Information may be obtained in England from the Secretary, 28, Albemarle Street, W.; in America from the Secretary, 7, West Eighth Street, New York City, U.S.A.; in India from the Secretary, Benares, N.W.P.; in Australia from the Secretary, 42, Margaret Street, Sydney, N.S.W.; in New Zealand from the Secretary, His Majesty's Arcade, Queen Street, Auckland.

### CHRISTIAN SCIENCE.

Christian Science, or the Science of Divine Metaphysical Healing, was founded by Mrs. Mary Baker Eddy, an American lady, in 1867. She claims that her discovery of "the science of mind-healing" was a Divine revelation, though not in a mystical or supernatural sense. Her search therefor was prompted by her own recovery, in Feb. 1866, from an internal injury, the recovery having taken place, as she believes, "in perfect scientific accord with Divine law." In '75, after much study and searching of the Scriptures, she published "Science and Health, with Key to the Scriptures," which is the text-book of Christian Science, and which gives Mrs. Eddy's interpretation of the Bible. In it appears the following "brief exposition of the important points or religious tenets of Christian Science"—1. As adherents of Truth, we take the Scriptures for our guide to eternal life. 2. We acknowledge and adore one Supreme and Infinite God. We acknowledge one Christ—His Son Christ Jesus, the Holy Ghost or the Divine Comforter, and man His Divine image and likeness. 3. We acknowledge God's forgiveness of sins, in the destruction of sin, and the understanding that evil and sin are unreal, and hence not eternal. 4. We acknowledge Christ's atonement as the evidence of Divine and efficacious love, unfolding man's unity with God, through Jesus Christ the Way-shower. 5. We acknowledge that man is saved through Christ—through Divine Truth, Life and Love, as demonstrated by the Galilean prophet, in the healing of the sick and overcoming sin and death. Also, that the crucifixion of Jesus and His resurrection were designed to elevate human faith and understanding to the spiritual perception of

the eternal existence of the good and the real in man. 6. We solemnly promise to strive watch, and pray for that Mind to be in us which was also in Christ Jesus, to love one another, and to be meek, merciful, just, and pure." The scientific element of the cult is indicated in the following passages from "Science and Health," by Mrs. Eddy: "The Science of Mind shows conclusively how it is that matter seemeth to be, but is not. Divine Science, rising above physical theories, excludes matter, resolves things into thoughts, and replaces the objects of material sense with spiritual ideas. . . . Christian Science sustains with immortal proof the impossibility of any material sense, and defines those so-called senses as mortal beliefs, whose testimony can neither be true of man nor his Maker." It follows that disease and pain are merely "mortal beliefs," sensations without reality. Understanding of the allness of "immortal Truth" or Spirit, which is God, leads to the disappearance of pain and disease, and this is what Christian Science claims to accomplish.

Beginning with the first Christian Science organisation, formed at Boston in 1876, and made a church in '79, the movement has spread till, on Dec. 31st, 1903, there were 596 Branch Churches, mostly in the United States, and 236 Societies. There are several churches in Canada, and churches also exist in London, Edinburgh, and Manchester, while services are held at Cambridge. "Practitioners" authorised by the parent church teach and practise Christian Science, and of these there are between 3000 and 4000; while the number of full members of The First or Mother Church is 28,374, excluding those who merely attend the services. In Nov. 1902 Mrs. Eddy gave instructions that until public thought was better acquainted with Christian Science, Christian Scientists should decline to doctor infectious and contagious diseases. There is a magazine, the *Christian Science Journal*, a weekly paper, *Christian Science Sentinel*, and much literature is distributed by the Christian Science Publishing Society. Office of Publication Committee: Huntington Chambers, Boston, Mass., U.S.A.

### RHODES SCHOLARSHIPS.

The will of Mr. Cecil Rhodes directed his Trustees (Lord Rosebery, Earl Grey, Viscount Milner, Mr. Alfred Beit, Dr. L. S. Jameson, Mr. L. N. Michell, and Mr. B. F. Hawksley) to establish a number of Colonial, American, and German scholarships.

The reasons given by him for this bequest were thus stated in the will. He considered "that the education of young colonists at one of the Universities in the United Kingdom is of great advantage to them for giving breadth to their views, for their instruction in life and manners and for instilling into their minds the advantage to the Colonies as well as to the United Kingdom of the retention of the unity of the Empire."

He also desired "to encourage and foster an appreciation of the advantages which I implicitly believe will result from the union of the English-speaking peoples throughout the world, and to encourage in the students from the United States of North America, who will benefit from the American Scholarships to be established for the reason above given at the University of Oxford under this my will, an attachment to the country from which they

have sprung, but without, I hope, withdrawing them or their sympathies from the land of their adoption or birth."

He further held that "a good understanding between England, Germany, and the United States will secure the peace of the world, and educational relations form the strongest tie."

In appointing a student to the Scholarships he directed that regard should be had to "(1) his literary and scholastic attainments; (2) his fondness of and success in manly outdoor sports, such as cricket, football, and the like; (3) his qualities of manhood, truth, courage, devotion to duty, sympathy for the protection of the weak, kindness, unselfishness, and fellowship; and (4) his exhibition during school days of moral force of character, and of instincts to lead and to take an interest in his schoolmates, for those latter attributes will be likely in after life to guide him to esteem the performance of public duties as his highest aim." No student should be qualified or disqualified on account of his race or religious opinions; and the scholars should be distributed amongst the colleges of the University of Oxford, and not resort in undue numbers to one or more colleges only.

He directed his Trustees to establish for male students 60 Colonial Scholarships, each of the yearly value of £300, tenable at any college in the University of Oxford for three consecutive academical years, allotted as follows: 9 to Rhodesia, 12 to Cape Colony, 3 to Natal, 18 to Australia, 3 to New Zealand, 6 to Canada, 3 to Newfoundland, 3 to Bermuda, and 3 to Jamaica; also a number of similar American Scholarships, 2 to each State and territory of the United States, tenable for 3 years; and 5 German Scholarships, each of £250, tenable at Oxford for 3 years, the holders to be nominated by the German Emperor.

The Trustees appointed Mr. G. R. Parkin, C.M.G., LL.D., to draw up a scheme for giving effect to the Scholarship provisions affecting the Colonies and the United States. Candidates to be eligible must furnish proof that they can pass Responsions, though students of colleges of accepted standing in the States and of the leading Universities in the Colonies are exempt from this requirement. Where possible, and throughout the States, the men sent as scholars are selected from Colleges or Universities rather than from Secondary Schools, the limits of eligible age being 19 and 25. The only exceptions to the requirement of two years' work at a recognised degree-granting College or University are made in the case of Queensland and West Australia, Natal, Rhodesia, Newfoundland, Bermuda, and Jamaica. The final selection of the Scholars is in the hands of carefully appointed local committees of selection and of the leading Universities, who have to consider the results of the qualifying examination and the other points named by Mr. Rhodes. Office of the Trust, 40, Elvaston Place, London, S.W.

Roads Improvement Association, The, was formed in '86 and incorporated in '98, to secure reform in the system of administering highways of the United Kingdom, and to obtain better, wider, and more numerous roads and footways. Its aggregate membership exceeds 125,000. In August 1902 the Association invited the Government to appoint a Committee of inquiry into the existing system. Attached to the letter was a list of 107 Members of

Parliament who had declared themselves in favour of the proposed inquiry. A **Departmental Committee** was in consequence appointed by the Government to inquire into the subject of Highway Authorities and Administration in England and Wales. The Report of that Committee (Cd. 1793) embodied many of the recommendations of the Association. They recommended that trunk roads for long distances through traffic should be selected and maintained as **National Roads** by the State by means of a Central Department, which might be a department of the Local Government Board. As to local road traffic the Committee recommended the abolition of many of the smaller district councils as highway authorities and the transference of their duties and powers to the county councils. The better plan, in the Committee's opinion, would be to form a **Highway Board** in each county, charged with the direct control of all the principal roads in the county, the Board being representative of all the authorities at present having rights and powers with regard to main roads. The law as to highways should be consolidated. During 1904 the Association gave evidence in favour of the construction of new roads out of London before the Royal Commission on London Traffic. The Cyclists' Touring Club, the Automobile Club, the National Cyclists' Union, the National Traction Engine Owners' and Users' Association, and other organisations are represented upon the Council of the Roads Improvement Association. The annual subscription for individuals is 5s. **Hon. Secretary**, W. Rees Jeffreys. **Offices**: 16, Down Street, Piccadilly, W.

**Robinson, Very Rev. Joseph Armitage**, M.A., D.D., Dean of Westminster, was ed. at Christ's Coll., Cambridge (4th classic '81), ordained deacon at Ely in '81, priest in '82, was domestic chaplain to the Bishop of Durham '83-4, curate of Great St. Mary, Cambridge, '85-6, vicar of All Saints', Cambridge, '88-92, Prebendary of Wells Cathedral '94-9, Rector of St. Margaret's, Westminster, '99-1900, and Canon of Westminster '99-1902, being then appointed to the Deanery of Westminster. He was a Fellow of Christ's Coll., Camb. '81-99, Dean '84-90, Cambridge Whitehall Preacher '86-8, Norrisian Professor of Divinity at Cambridge '93-9, Select Preacher at Oxford '99, and Chaplain-in-Ordinary to the King, 1902. He holds the degrees, besides those above mentioned, of Hon. Ph.D. (Göttingen), Hon. D.Theol. (Halle), and is a Fellow of the British Academy. He has written several works: "The Philocalia of Origen," "Unity in Christ," "Commentary on the Epistle to the Ephesians," etc.

### ROUMANIA.

Moldavia and Wallachia, formerly autonomous provinces of the Ottoman empire, with Dobrogea, have since Dec. 23rd, 1861, formed an independent kingdom, now under the rule of Charles I. of Hohenzollern-Sigmaringen, in whom, with a Cabinet of eight and the Prime Minister, resides the executive power. The legislature is composed of a **Senate** of 120 members, indirectly elected for eight years by two colleges representing the propertied electors, and a **Chamber** of 183 members elected for four years by three electoral colleges or classes of voters. These three colleges consist of (1) electors possessed

of property insuring an annual income of not less than £50; (2) those paying direct taxes of not less than 20 francs annually, or following a profession; and (3) all Roumanian subjects of full age, most of whom vote indirectly by choosing delegates who vote with the direct electors of the other colleges. The members of both houses are paid. The King has a veto on all measures passed by the two chambers.

The armed forces of Roumania consist of the **Regular Army**, the **Militia**, and the **Opolitchénie**. In peace time there only exist cadres for the regular army, which is divided into permanent and territorial troops. The period of service for the permanent troops is three years, and for the territorial troops five years for the infantry and four for the cavalry, but in this latter force the soldier at first only puts in three months of continuous service; he is then sent to his home and called up, in his turn, for one week each month. The effective of the army in war is as follows. **Infantry**: 8 rifle battalions; 34 infantry regiments (102 battalions; altogether 2250 officers, 126,000 men, and 4700 horses). **Cavalry**: 6 *Roshiori* regiments (24 squadrons, forming an independent division); 11 *Calarashi* regiments (44 squadrons): total, 530 officers, 13,200 men, 12,100 horses. **Artillery**: 12 regiments (75 batteries, 450 guns; 40 ammunition columns; 2 fortress artillery regiments: total, 930 officers, 26,900 men, 22,800 horses). **Engineers**: 12 sapper companies, 4 telegraph, 4 pontoon, and 4 railway companies: total, 140 officers, 6200 men, 1500 horses. **Grand total**, 2850 officers, 169,800 men, and 41,400 horses. If to these are added the transport, auxiliary troops, 32 militia regiments, etc., the numbers will amount to 7500 officers, 314,000 men, and 65,000 horses.

For local government purposes the country is divided into 32 districts, each under a prefect, a receiver of taxes, and a civil tribunal. Education is free and compulsory, but still in a backward condition. The prevailing religion is that of the orthodox Greek Church. During 1902 Mr. Hay, U.S. Secretary of State, in a note to the Powers, protested against the treatment of the Jews in the country by the Government. He estimated their number at about 400,000, and pointed out that by the alien laws passed by the Government since '79 they were excluded from the public service and the learned professions, prohibited from owning land or even cultivating it, debarred from residing in the rural districts, and compelled to dwell as artisans or hired labourers in the towns, although under the Berlin Treaty of '78 it was provided that there should be no discrimination against any resident of Roumania on account of religious belief. Many Roumanians are to be found in neighbouring countries, particularly in Hungary and Transylvania, where they have given some trouble.

Cereals, wines, and timber are the chief products, the large majority of the population being engaged in agricultural pursuits. Minerals are said to abound, but only coal and petroleum are worked. There are very large and valuable State forests, and salt-mining is a State monopoly. In 1901 the United Kingdom sent £2,257,040, and in 1902 £2,117,600 of the exports and took £977,540 in 1901, and £1,655,220 in 1902 of the exports; but Germany has secured the greatest share of the trade. There were 229 miles of State railways in 1902. The capital is Bucharest (pop. 282,071), and the chief port is Braila, Kustendjie, and Sulina.

Area, 50,720 sq. m.; population, 1903, 6,151,628. Revenue, 1902 3, £9,938,223; expenditure, £8,645,198; imports, 1902, £4,333,782; exports, £14,992,768; debt, 1903, £55,755,585.

Ministry: Premier and Minister of the Interior, M. George Cantacuzene.—War, General Mano.—Finance, M. Take Janesco.—Foreign Affairs, General Lahovary.—Agriculture, Commerce and Industry, and Crown Lands, M. John Lahovary.—Public Works, M. John Gradisteano.—Justice, M. Badarau.—Public Instruction, M. Nadesco.

Minister in London, M. Alex. Catargi, 6r, Warwick Square, S.W.—Attaché, M. Boeresco.—Consul-General in London, Count Reginald Ward, 68, Basinghall Street.

British Minister at Bucharest, Sir John G. Kennedy, K.C.M.G.

British Consul-General, Lt.-Col. H. Trotter, C.B. (Galatz).

### Sovereign.

King Charles I. is a son of the late Prince Karl of Hohenzollern-Sigmaringen, and was b. April 20th, '39. He ascended the throne after Prince Alexander John had been expelled ('66). In '81 the Roumanian representatives unanimously proclaimed him King instead of Prince of Roumania. In '69 he married the Princess Pauline Attilie Louise of Wied, who is known in literary circles under the *nom de plume* of "Carmen Sylva." In Jan. '93 the Crown Prince Ferdinand, nephew of the King, and son of Prince Leopold of Hohenzollern-Sigmaringen (b. Aug. 24th, '65), was married to the Princess Marie of Edinburgh, and two sons, Carol and Nicholas, and two daughters have been born to them.

### Political Parties.

Questions of finance have more than anything else determined the fate of parties in recent years. During the years of prosperity which the country experienced from '59 to '99 the loan indebtedness of the country mounted rapidly. In spite of surpluses in many years there were deficits in others, and a large extraordinary expenditure was accounted for by public works and military outlay. In '99 the harvest, on which the country relies, failed, a commercial crisis naturally followed, and there was a heavy deficit amounting to about 35,500,000 lei. In the spring of '99, before the financial crisis occurred, M. Sturdza's administration was defeated, and M. Cantacuzene, the leader of the old Conservatives, formed a Cabinet. His Finance Minister, M. Jonesco, proposed to meet the situation by economies, new taxation, and the alienation of some of the State property; but his proposals met with much opposition, and eventually the old Conservative and the young Conservative or "Junimist" parties coalesced, M. Carp, the Junimist leader, becoming Premier and Finance Minister in July 1900. His proposals, particularly those imposing additional direct taxation, provoked the hostility of the old Conservatives, and he eventually resigned Feb. 8th, 1901. The differences between the two Conservative parties proving to be irreconcilable, M. Sturdza was called upon by the King to form a Liberal administration, and succeeded on Feb. 27th, 1901. He at once set about a policy of severe retrenchment, and by his unflinching courage in carrying out a great scheme of economics he

restored the country to its financial independence, receiving the expression of the King's gratitude in a special rescript issued by his Majesty in March 1903. But see History below.

### History, 1904.

A new tariff, drawn up with the view of protecting and establishing factories in Roumania, was in contemplation during the year. A new commercial treaty with Germany was signed at Bukharest (Oct. 8th), but the terms were not published. The success of the financial and economic policy of M. Sturdza's administration considerably alleviated the distress amongst the peasantry; but the officials, whose incomes had been reduced under the scheme of retrenchment, were hostile to the Ministry, and internal dissensions led first to resignations of individual ministers and finally (Jan. 4th, 1905) to the resignation of the Cabinet and the formation of a Conservative Administration under M. Cantacuzene.

### ROYAL ACADEMY.

The Royal Academy, at Burlington House, Piccadilly, was founded in 1768 by George III., who gave it rooms in Somerset House. Thence it was removed to Trafalgar Square (1834), and to its present abode, the site of which it occupies rent-free (1869). The principal objects of the Royal Academy are (1) the establishment of a well-regulated school or academy of design for the gratuitous instruction of students, and (2) the holding of an annual exhibition open to artists of distinguished merit, where they may offer their performances to public inspection, and acquire that degree of reputation and encouragement which they may be deemed to deserve. The Royal Academy is "a private society," supporting a school from its own resources without any grant of public money. The members are under the superintendence and control of the Sovereign, who confirms all appointments and bye-laws; and the Society itself consists of 40 Royal Academicians, and at least 30 Associates; there may also be not more than four engravers, of whom not more than two may be Academicians. The first president was Sir Joshua Reynolds, and the present occupant of the office is Sir E. J. Poynter (*q.v.*), elected Nov. 4th, '96. There is a council of 10 members, who succeed by rotation, five retiring every year, the President, the Keeper, and the Treasurer being *ex-officio* members.

(to whom all communications should be addressed).

The premises of the Royal Academy at Burlington House comprise a grand gallery or range of thirteen halls, besides a central octagon for sculpture, a theatre, and a large room in which the annual banquet is held—the latter always an event of much interest to the artistic world. The basement is devoted to schools of art for male and female students. The total cost of the buildings was nearly £150,000, the whole of which was defrayed out of the funds of the Academy. The Royal Academy derives the whole of its funds from the holding of its annual exhibition of the pictures of living artists, which opens on the first Monday in May and continues until the first Monday in August. No works which have previously been exhibited are accepted, and the Council has the right to reject any picture it may please. The Winter Exhibition of art treasures in connection with the Royal Academy was established in 1869, paintings being liberally lent by private individuals. The exhibition remains open from the first Monday in January for a period of ten weeks. The fine library and books of prints belonging to the Academy are open to students and the general public at certain hours. The Diploma and Gibson Galleries, reached by a staircase to the right of the entrance hall, contain the works presented by each member as a specimen of his ability on his election as a Royal Academician; the works of J. Gibson, R.A., bequeathed by him; several interesting pictures of old masters, and some fine pieces of sculpture.

**Royal Academy of Music.** Established in 1822, chiefly owing to the exertions of Lord Burghersh, afterwards Earl of Westmorland, the R. A. M. was incorporated by charter in 1830. Students of all branches of music are catered for, and find ample stimulus to exertion in the large number of scholarships and prizes which are offered for competition. Associates are entitled to the use of the initials **A.R.A.M.** Fellows (the number is limited to 100) are elected by the Directors after leaving the Academy. They are solely entitled to use the initials **F.R.A.M.** Honorary members are entitled to the initials **R.A.M.** with the prefix **Hon.** Musical composers, performers, and teachers, who have not studied at the Academy, can become Licentiates of the Institution by passing a qualifying examination held twice a year—viz., in September and in the Christmas vacation—successful candidates at which are entitled to the use of the initials **L.R.A.M.** Principal, Sir A. C. Mackenzie, Mus. D. LL.D.; Secretary, F. W. Renaut. The Academy is situated in Tenterden Street, Hanover Square.

**Royal Asiatic Society**, 22, Albemarle St., W. (Hon. Sec. Prof. T. W. Rhys-Davids, LL.D., Ph.D.).

**Royal College of Music, The**, Prince Consort Road, South Kensington, was founded in 1883. The College was opened in May '83, for the reception of pupils. The pupils are of both sexes, and consist of scholars, exhibitioners and students. The **Open Free Scholarships** are 54 in number; they are gained by competition, and entitle the holder to a thorough and systematic free education at the College in theoretical and practical music. There are also twelve **Close Free Scholarships**, for the benefit of persons residing in certain specified localities, as well as various **Exhibitions and Prizes**. Students (or paying pupils) are admitted on payment of a fee of £12 12s. per term. Associates need not necessarily be pupils or ex-pupils of the College; they have to pass a qualifying examination, which entitles them to use the initials **A.R.C.M.** (fee £5 5s.). A Junior Department has been opened for students under 16 years of age whose time is also occupied by the necessities of their general education. Fee, £66s. per term. The teaching staff includes a large number of musicians of the highest eminence; amongst others the following gentlemen (who constitute the Board of Professors):—Sir J. F. Bridge, Mr. E. Dannreuther, Señor E. Fernandez-Arbo, Sir Walter Parratt, Mr. A. Randegger, Mr. A. Rivarde, Prof. C. Villiers Stanford, Mr. Franklin Taylor, Mr. A. Visetti. Patron, H.M. the King; President, H.R.H. the Prince of Wales, K.G.; Director, Sir C. H. H. Parry, Bart.; Hon. Secretary, Mr. Charles Morley, M.P.; Registrar, Mr. Frank Pownall, to whom all communications relating to admission, etc., should be addressed.

**Royal Colonial Institute, The**, was founded in 1868, and incorporated by royal charter in '82. The objects are thus officially set forth:—"To provide a place of meeting for all gentlemen connected with the Colonies and British India and others taking an interest in Colonial and Indian affairs; to establish a reading-room and library, in which recent and authentic intelligence upon Colonial and Indian subjects may be constantly available, and a museum for the collection and exhibition of Colonial and Indian productions; to facilitate interchange of experiences amongst persons representing all the Dependencies of Great Britain; to afford opportunities for the reading of papers and for holding discussions upon Colonial and Indian subjects generally; and to undertake scientific, literary and statistical investigations in connection with the British Empire. But no paper shall be read, nor any discussion be permitted to take place, tending to give the Institute a party character." Evening meetings are, as a rule, held on the second Tuesday in each month, from November to June, and afternoon meetings are also held from time to time. The monthly *Journal* and *Proceedings* give the papers read during the year, which are always of a valuable and very interesting description. On Nov. 4th, 1904, there were 1499 resident and 3030 non-resident Fellows. The Library contains over 56,000 volumes and pamphlets relating to the Colonies and India. Office, Northumberland Avenue. Secretary, J. S. O'Halloran, C.M.G.; Librarian, James R. Boosé; Chief Clerk, William Chamberlain.

**Royal Historical Society**, 3, Old Serjeant's Inn, Chancery Lane, W.C. Hon. Sec., H. E. Malden, M.A.

**Royal Humane Society**, The. Secretary, Major A. F. C. Cloughton, 4, Trafalgar Square, W.C.

**Royal Indian Engineering College**, The. Coopers Hill, has been primarily maintained under the orders of the Secretary of State for India in Council, to educate candidates for Government service in the Indian Public Works, in the Accounts, Indian State Railway, Telegraph and Forest Departments. About 50 students have been admitted yearly to the College, but in 1904 orders were issued for its closure in 1906, and no more candidates are being admitted. President, Col. Sir John W. Otley, K.C.I.E.

**Royal Institute of Painters in Water Colours**. This Society was founded in 1831, and formerly held its exhibitions in Pall Mall, but in the spring of '83 moved to more commodious galleries at 191, Piccadilly. There is an annual exhibition of water-colour paintings, commencing the second week in March. The walls are open to artists whose works are approved, and members are elected according to the merit which their productions display. President, E. J. Gregory, R.A.; Vice-President, Yeend King; Secretary, W. T. Blackmore. Office, 191, Piccadilly, W.

**Royal Institute of Public Health**, The. Founded in 1886 to provide the means for the association of those engaged in the teaching of the various branches of preventive medicine, and all others engaged or actively interested in the progress of the public health, with the object of promoting, by intercourse and otherwise, the development and settlement of questions having for their object the benefit of the health of the community; to aid the theoretical and practical investigation and study of all branches of public health medicine; to examine candidates, either alone or in conjunction with one or more kindred bodies, and to grant certificates of their having passed an examination as sanitary inspectors. The official organ of the Institute is the *Journal of State Medicine*, published monthly. President, Prof. W. R. Smith, M.D., D.Sc., F.R.S. Edin.; Hon. Sec., James Cantlie, M.A., M.B., F.R.C.S. Secretary, F. Drew Harris, M.P., D.P.H. Office, 37, Russell Square, W.C.

**Royal Irish Academy**. A scientific and literary society, meeting in Dublin, incorporated by royal charter of George III., 1786, and having 400 members. The Academy publishes "Transactions" and "Proceedings," containing papers on Science and Polite Literature and Antiquities. President, Robert Atkinson, LL.D., D.Litt.; Treasurer, Rev. W. R. W. Roberts, B.D.; Secretary, C. J. Joly, Sc.D. Secretary of Council, L. C. Purser, Litt.D.; Librarian, G. A. J. Cole, F.G.S.; Secretary of Foreign Correspondence, R. F. Scharff, Ph.D. Resident Secretary, R. Macalister, LL.D. Academy House, 19, Dawson Street, Dublin.

**Royal Literary Fund**. The principle of the Fund is to administer assistance to authors of genius and learning, reduced to distress by unavoidable calamities, or deprived, by enfeebled faculties or declining life, of the power of literary exertion; and this assistance is extended at the death of an author to his widow and children, or mother, or sister.

The Fund has £57,769 invested, producing an income of £1,737, besides rents and other receipts. Patron, H.M. the King; President, the Earl of Crewe; Secretary, A. L. Roberts, Esq., B.A.

**Royal Military Academy**, Woolwich, is for candidates for commissions in the Royal Artillery and Royal Engineers. Admission is by open competitive examinations held each year in June and November. Some commissions in the Royal Marine Artillery are also usually offered on the results of these examinations. Three trials are allowed. The age for admission is between 16 and 19. Candidates must be within these limits on Dec. 1st for the winter examination, and on July 1st for the summer examination. A candidate pays £150 per annum while at the Academy. Reductions are, however, made in the case of sons of officers, etc. The charge for uniform, books, etc., on first joining is £35, and each candidate receives a mess allowance of 3s. per day. Medical examination takes place after the competitive examination. A candidate for a commission must be in good mental and bodily health, and free from any physical defect likely to interfere with the efficient performance of military duty. The Governor and Commandant is Major-Gen. R. H. Jelf, C.M.G., Royal Engineers (retired); Assistant Commandant and Secretary, Col. A. M. Murray, R.A.

**Royal Military College**, Sandhurst, is maintained for the purpose of affording a special military education to candidates for commissions in the Cavalry, Infantry, and West Indian Regiments. Admission is by open competitive examinations held in June and November. Some commissions in the Royal Marine Light Infantry are also usually offered on the result of these examinations. Three trials are allowed. The age for admission is between 18 and 19½. Candidates must be within these limits on Dec. 1st for the winter examination, and on July 1st for the summer examination. Candidates for commissions in the West Indian Regiment may be admitted up to the age of 21. The son of a civilian pays £150 per annum while at the College, but reductions are made in the case of officers' sons. The charge for uniform on first joining is £35. Each candidate receives a mess allowance of 3s. per day. The medical examination follows the competitive examination for admission. King's Cadets, honorary King's Cadets, Indian Cadets, and Pages of Honour are admitted after a qualifying examination. The length of a course of instruction is two years divided into four terms. A candidate for a commission must be in good mental and bodily health, and free from any physical defect likely to interfere with the efficient performance of military duty. The Governor and Commandant of the College is Colonel Kitson.

**Royal Normal College and Academy of Music for the Blind**, Upper Norwood, London. Established March 1st, 1872. Patrons, Their Most Gracious Majesties the King and Queen. The College embraces a Preparatory School, a Grammar and High School, a Technical School, and an Academy of Music. The work is carried on by voluntary subscriptions, and is in need of increased support, especially in the shape of annual subscriptions. Donations and subscriptions can be paid to the Principal at the College, or to the Bankers, Messrs. Barclay & Co., Ltd., 1, Pall Mall East, S.W. Treasurer,

Rt. Hon. Lord Stalbridge; Principal, F. J. Campbell, Esq., LL.D. Lady Superintendent, Mrs. F. J. Campbell.

### ROYAL OBSERVATORY, EDINBURGH.

The Observatory was built by an association of scientific gentlemen, who founded in 1811 the Astronomical Institution of Edinburgh. Amongst the first members were Prof. Playfair, Prof. Leslie, and Sir David Brewster. They were assisted by the Town Council of Edinburgh, who put them in possession of an old Gothic tower and adjacent grounds on the Calton Hill. The erection of the Observatory was approaching completion when George IV. visited Scotland in 1822, and, in response to an address presented by the President and members, His Majesty granted them the title "Royal Observatory of King George IV." In 1834 the Observatory was made over to the Crown, and in the same year the first Astronomer Royal for Scotland was appointed in the person of Thomas Henderson. He was succeeded in '45 by Charles Piazzi Smyth, who retained the post till his retirement in '88.

In '89 the whole equipment of Lord Crawford's Observatory at Dunecht, Aberdeenshire, became the property of the Crown by the gift of the owner, and was added to the existing Royal Observatory, larger buildings and a new site at Blackford Hill being provided by H.M. Government. The new Observatory was formally opened in '96. It consists of a T-shaped building, the principal portion of which, running east and west, is surmounted at each end by a copper dome, the larger of which, at the east end, covers a 15-inch equatorial refractor. The smaller one covers a Newtonian, with a mirror of 24 inches aperture. The meridian house farther west in the same line is provided with a transit circle having a telescope of 8½ inches aperture.

To the south of the main buildings is the library, containing the whole of the valuable collection of astronomical books and manuscripts brought together by Lord Crawford at Dunecht, the library of the late Charles Babbage, the Comet library, which is specially rich, and the collection of old books and manuscripts of historic interest. The optical room, 60 feet long, is provided with a Foucault siderostat, with mirror 18 inches in diameter. Besides the chief instruments already mentioned, the Observatory has a 12-inch Browning reflector, a Zollner's photometer, three 6-inch refractors, and the physical apparatus—the latter including a very powerful electro-magnet.

The Observatory is under the official control of the Scottish Office, to the chief of which Department, the Secretary for Scotland, a report on the work of the Observatory is presented annually by the Astronomer Royal for Scotland.

The scientific staff of the Observatory consists of the Director, Ralph Copeland, Ph.D., Astronomer Royal for Scotland, and three assistants.

### ROYAL OBSERVATORY, GREENWICH.

The great increase in British maritime trade in the 17th century rendered the determination of longitude at sea a pressing necessity. The subject was brought to the notice of King Charles II., who, on understanding that the first requisite was a more accurate knowledge of the positions of the moon and principal stars,

founded the Royal Observatory at Greenwich in 1675, on the hill which was formerly the site of a castle built in 1437 by Humphrey, Duke of Gloucester. The first observation was made on Sept. 19th, 1675. The Observatory is under the official control of the Admiralty, and the Director is styled the Astronomer Royal, who receives his appointment directly from the Prime Minister, and holds office by warrant under the Royal sign manual. It has been the good fortune of the Observatory to have at its head such men as Flamsteed, Halley, Bradley, Maskelyne, Pond, and Airy. The present Director is Sir W. H. M. Christie, K.C.B., D.Sc., F.R.S. (g.v.).

The meridian observations of sun, moon, planets and stars, which constitute the fundamental work, are made with a fine transit-circle of 8 inches aperture. An altazimuth on a new principle with telescope of 8 inches aperture has been constructed to supplement the observations with the transit circle. The largest instrument is a 28-inch refractor. Another fine instrument is the astrophotographic equatorial designed for work in connection with the "Photographic Chart of the Heavens." It consists of two telescope tubes rigidly connected and parallel, one carrying a 10-inch telescope lens, the other a 13-inch photographic lens by which the star images are imprinted on the photographic plate. The Thompson equatorial, presented to the Observatory by the late Sir Henry Thompson, has on one side of the declination axis a telescope with a lens corrected for photographic rays of 26 inches aperture, and on the other side a telescope with a mirror of 30 inches diameter. A photographic spectroscope is mounted on the reflector. There are several smaller refractors used for observing comets, occultations of stars by the moon, Jupiter's satellites, etc. Photographs of the sun are taken on every available day, and after being measured are carefully stored for reference. Magnetic and meteorological observations, made continuously, form an important branch of the work. The chronometers used in the Navy are purchased after "trial" at the Observatory. The average number being tested daily is about 600. Hourly and daily time-signals are sent out from the Observatory through the Post Office telegraphs, giving Greenwich time to all parts of the country.

By the influence of Sir Isaac Newton a Board of Visitors was instituted in 1710 to visit the Observatory and receive the Astronomer Royal's report of the work of the past year. This Board, which is recruited from our leading scientists, meets at the Observatory each year on the 1st Saturday in June. Persons desirous of visiting the Observatory must satisfy the Astronomer Royal that they are interested in astronomy. Secretary, H. Outhwaite. Office hours 9 to 4.30.

**Royal Opera House, Covent Garden**  
The building was taken over by new owners in March 1899, and upwards of £10,000 has been spent on electrical improvements, and over £25,000 in structural alterations and stage equipment. The stage has been recently reconstructed on modern principles, with large electrical lifts and other similar appliances. Owners, The Grand Opera Syndicate, Ltd. Directors, Earl de Grey, Viscount Esher, H. V. Higgins. Musical Director, André Messager. Secretary, Neil Forsyth.

**Royal Patriotic Fund.** The Royal Patriotic Fund Reorganisation Act, 1903, dissolved the Patriotic Fund Commission, and transferred its property, rights, duties, and liabilities to the **Royal Patriotic Fund Corporation**. The property of this Corporation is, subject to any special trust relating to any part thereof, to be administered by the Corporation for the benefit of the widows, children, and dependants of officers and men of the naval and military forces of the Crown. It was stated by Mr. Pretyma, in introducing the bill, that the Patriotic Fund Committee had accumulated £1,250,000 of invested funds and also valuable landed property. The members of the **Royal Patriotic Fund Corporation** are: H.R.H. The Duke of Connaught, K.G. (President); Lieut.-Col. Lord Edmund Talbot, D.S.O., M.P.; Sir James Bell, Bart.; Sir F. Mowatt, G.C.B.; Lieut.-Gen. Sir T. Kelly-Kenny, K.C.B.; Sir R. D. Awdry, K.C.B.; Col. Sir James Gildea, C.V.O., C.B.; F. T. Marzials, Esq., C.B.; W. Hayes Fisher, Esq., M.P.; H. E. Kearley, Esq., M.P.; D. J. Shackleton, Esq., M.P.; C. H. R. Stansfield, Esq.

**Royal Sanitary Institute, The**, was founded in 1876 and incorporated in '88. The objects of the Institute are "to promote the advancement of Sanitary Science in all or any of its branches, and to diffuse knowledge relating thereto." Examinations are held, and certificates of competency in sanitary knowledge granted in London and also in provincial centres, the Commonwealth of Australia, and the Dominion of Canada, and as at present arranged are adapted for inspectors of nuisances and for meat inspectors. Examinations are also held in Practical Sanitary Science and in Practical Hygiene for School Teachers. The **Journal** of the Institute is published quarterly. The **Parkes Museum**, which is maintained by the Institute, and is open daily from 10 a.m. to 6 p.m., and on Mondays to 8 p.m., contains a great variety of the most approved forms of apparatus and appliances relating to health and domestic comfort. There is a large library of sanitary literature. Officers: President, The Duke of Northumberland, K.G.; Registrar, A. Wynter Blyth, M.R.C.S., F.I.C., F.C.S.; Chairman of Council, W. Whitaker, B.A., F.R.S., F.G.S.; Secretary, E. White Wallis, F.S.S. Offices, 72, Margaret Street, London, W.

**Royal Scottish Academy**, instituted in 1826, incorporated in '38, consists of Academicians, Associates, honorary members and honorary retired members. A supplementary charter was granted in '91, by which the Academicians were empowered to add to the number of Associates, certain privileges being also granted the latter class. Each member is entitled to exhibit in the annual exhibition three works. President, Sir James Guthrie; Secretary, George Hay; Treasurer, John Hutchison; Librarian, W. D. McKay; Clerk, James Hastings.

**Royal Scottish Arboricultural Society**, instituted 1854. Any person interested in forestry and desirous of promoting the objects of the Society is eligible for election as a member. Secretary and Treasurer, Mr. Robert Galloway, S.S.C., 19, Castle Street, Edinburgh. Offices, 5, St. Andrew Square, Edinburgh.

**Royal Society of Painter-Etchers and Engravers, The**, was founded in 1881 by Sir Francis Seymour Haden. Annual Exhibitions of the work of members only are held by the Society at the Gallery, 5A, Pall Mall East, in the early spring of each year. All forms of

engraving on metal, whether by the burin, the etching needle, by mezzotint or aquatint, or by whatever other process, are eligible for exhibition. Secretary, Harold Child, B.A. Offices of the Society, 5A, Pall Mall East, S.W.

**Royal Society of Painters in Water Colours.** The older of the two Water Colour Societies was founded in 1804, and has held exhibitions annually since that date. The Summer Exhibition is opened to the public towards the end of April, and the Winter Exhibition, which chiefly comprises sketches and studies, opens on the first Monday in December. The number of members is forty, while the number of associate exhibitors is unlimited. The exhibitions of the Society, which are held at their galleries, 5A, Pall Mall East, S.W., are confined to the works of members and associates. President, E. A. Waterlow, R.W.S.; Secretary, R. Hayward Butt. Attached to the Society is an "E.W.S. Art Club," established '84, for the purpose of holding a series of *Conversazioni* to which members are invited to send works of art for exhibition. President, H. M. Marshall, R.W.S.; Secretary, Harold Child, B.A., 5A, Pall Mall East, S.W. Office, 5A, Pall Mall East.

**Royal Statistical Society**, was founded in 1834, and incorporated by royal charter in '87. It has accumulated an extensive library (amounting at the present time to upwards of forty thousand volumes), bearing on statistical and economic subjects. Throughout the session papers on statistical subjects are read and discussed at its monthly meetings. Two medals, the Guy and the Howard, are annually offered for competition. The *Quarterly Journal*, now in its sixty-fifth year of publication, contains a valuable record of the progress of statistical science, to whose development, both at home and abroad, the Society has so greatly contributed. President, Sir Francis Sharp Powell, Bart., M.P. Hon. Secretaries, Noel A. Humphries, I.S.O., J. A. Baines, C.S.I., and R. H. Rew. Office, 9, Adelphi Terrace, W.C.

**Royal United Service Institution**, Whitehall, S.W., was established in 1831, for the promotion of naval and military art, science, and literature. The **Museum**, which occupies the old Banqueting House of the once famous Palace of Whitehall, contains, besides Rubens' celebrated ceiling, the famous models of Trafalgar and Waterloo, interesting naval and military relics and trophies, models of ancient and modern war-vessels, ordnance, and small arms. Admission 6d. daily: April to September, 11 to 6; October to March, 11 to 4. President, H.R.H. the Duke of Connaught. Chairman of the Council, H.S.H. Prince Louis of Battenberg. Secretary, Lieut.-Col. A. Leatham.

**Rural Labourers' League, The**, was established in May '88. Its President is the Right Hon. Jesse Collings, M.P. The objects of the **League** are: To assist in putting into operation the Allotment Acts of '82, '87, and '90; Small Holdings Act, '92; and other measures for the benefit of the rural population. To assist every practical effort to secure a more direct connection of the agricultural population with the soil. To assist in the promotion of a practical scheme, either by old-age pensions or some other means, by which the agricultural labourer may be relieved of the necessity of ending his days in the workhouse, and may have secured to him a condition of reasonable comfort in

old age. **Secretary**, Mr. J. L. Green. **Offices**, 110, 111, Strand, London, W.C.

**Ruskin College, Oxford (Incorporated)**, was founded in 1899 in St. Giles'. The College, which is situated at the corner of Worcester Place and Walton Street, is intended for working men who are desirous of taking part in public and social work, and the subjects taught bear principally upon social and industrial questions—viz., political economy, industrial history, history of social movements, citizenship, local government, sociology, and logic. The work is carried on in two ways—(1) by residence at the College, and (2) by means of a Correspondence School, which enables those who cannot leave their work to learn the same subjects through the post. The fees for residence at Ruskin College are £1 per week, including board, lodging, and tuition. The fees for membership of the Correspondence School are 1s. entrance fee and 1s. per month. The movement is under the control of a Council. **Principal**, Dennis Hird, M.A.; **Vice-Principal**, H. B. Lees Smith, M.A.; **General Secretary**, Bertram Wilson.

## RUSSIA.

Russia is one of the largest of the military powers of the world. It has a European area of 2,095,616 sq. miles, with a population of about 106,265,000, and the total area of the Empire, including the Asiatic possessions, is 8,660,395 sq. miles. The total population in 1903 was estimated at 141,000,000. The fifty governments of **European Russia**, excluding Poland and Finland, contain 94,215,415 people, the Vistula Province (Poland) 9,455,943, and Finland 2,750,000. The governments and provinces in **Asiatic Russia** contain 22,697,469 people, including the Caucasus 9,248,695, Siberia 5,727,090, and Central Asian possessions 7,721,684. The Slavs, including the Poles, constitute about 73 per cent. of the population, Turco-Tartars about 9 per cent., Finns about 5 per cent., and Jews about 4 per cent.; the rest of the population being made up of Lithuanians, Germans, Armenians, and a variety of Asiatic peoples. The population of the capital, **St. Petersburg**, was (1903) 1,534,000. **Moscow** has 1,173,427 inhabitants, **Warsaw** 771,382 (1904) and **Odessa** 405,000. In Asiatic Russia the largest towns are **Tiflis** (pop. 160,000), and **Baku** (pop. 112,250) in the Caucasus; **Tashkend** (pop. 156,500) in Turkestan; **Tomsk** (pop. 52,500), and **Irkutsk** (pop. 51,500) in Siberia.

### Councils of Government.

The Government is an autocracy, the Czar being the supreme ruler and legislator, and the only source of power in the body politic. He must belong to the Orthodox Greek Church, and his consent is necessary to the marriage of any prince or princess of the Imperial family. He, however, entrusts the administration of the empire to four chief Councils, known respectively as (1) the **Council of State**, a consultative body, the members of which he appoints, and which is divided into four departments, viz. Legislation, Civil and Church Administration, Finance and Industry, Sciences and Commerce, each under its own president, though there is a president of the whole council nominated by the Emperor every year; its chief function is to examine all projects of laws brought before it by the Ministers, and the

annual estimates of expenditure; (2) the **Ruling Senate**, which is a partly deliberative and partly executive body, and promulgates all laws; it also supervises the general administration of the empire, superintends courts of law, and is the high court of justice for the empire; (3) the **Holy Synod**, which is composed of the Metropolitan Bishops of St. Petersburg, Moscow, and Kieff, the Archbishop of the Caucasus and other bishops, and which superintends religious matters; and (4) the **Committee of Ministers**, consisting of 14 Ministers, with 3 Grand Dukes and other functionaries.

### The Army.

The war has drawn great attention to the huge Russian army, but in its varied composition and little-known developments it is very difficult to describe. The men, taken from every part of the empire, are necessarily of very various qualities, but in sturdy endurance in hardship, and on the defence, they are mostly excellent. The officers are of two classes—those taken from the military schools, some of whom are keen soldiers, but the majority with little soldierly instinct, and those who come from the Yunker schools, who are of lower social standing, and whose training is very imperfect. In time of peace the Russian army may be said to consist of several armies: the **European**, the **Caucasian**, the **Turkestan**, and the **Amur** force; the first of these organised like other European armies, and the constitution of the others varying in conformity with local requirements. Moreover, the strength of each has varied according to the necessities of the situation, the troops being on the ordinary peace footing, on the higher peace establishment as in the frontier districts, or on the war footing as in Asiatic Russia. There are 13 greater Military Districts, the **Transcasian District**, and the territorial region of the **Don Cossacks**. There were 25 army corps in **Europe** and the **Caucasus** and 2 cavalry corps, 2 in **Turkestan**, and 3 in the **Amur** district. Large bodies of troops are usually massed on the western frontier, they are rather thinly dispersed in Middle Russia, and they have had great strength in **Turkestan** and **Eastern Siberia**.

The peace strength has been given as follows:

	Europe and the Caucasus.	Asiatic Russia.
Infantry . . .	627,000 men.	83,000 men.
Cavalry . . .	116,000 "	14,000 "
Artillery . . .	138,000 "	15,000 "
Engineers . . .	34,000 "	8,000 "
Army Services . . .	34,000 "	5,000 "

Total . . . 949,000      124,000  
Of these forces the active army numbered 731,000 in Europe and the Caucasus, and 87,000 in Asiatic Russia. Baron von Tettau, in a volume on the Russian Army (1902), gives the peace strength, including Cossacks and Frontier Guards, as 1,100,000.

The peace distribution and organisation have been profoundly changed by the war. New army corps have been created in Siberia from reserve formations and drafts from Europe, and many corps have been sent from European Russia, where others are being mobilised. From the enormous bulk of the Russian army it was assumed at the beginning of the war that Kuropatkin would have had a greatly preponderating force under his command, but

the difficulties of transport, and the enormous losses suffered in the great battles have never given him the strength that was anticipated. An official return stated that, on Nov. 30th (old style), the Manchurian army would comprise 385,000 troops of all arms, with 15,000 military train; but not all were in Manchuria, and probably 250,000 at the most would be nearer the mark. This force was said to comprise 302 battalions, 1180 squadrons or sotnias, 1252 guns, and 47 mixed companies with machine guns, and to be composed of 6 Siberian army corps, and the 1st, 8th, 10th, and 17th corps from Europe. The forces are divided into the 1st Manchurian army under General Linevitch, the 2nd under General Gripenberg, and the 3rd under General Baron Kaulbars, the latter not expected to be completed until March 1905. Troops were moved secretly, in view of the apprehended difficulty with Japan, and very various statements have been made as to the force actually available in the Far East, but the foregoing estimate is probably correct. It is assumed that the Trans-Siberian Railway is now equal to the strain of transporting 25,000 men per month with all necessary stores.

In European Russia and the Caucasus before the war there were 836 infantry and 68 rifle battalions, 19 cavalry divisions, and various Cossack and other formations, making a total of 384 squadrons and 242 sotnias, 52 brigades of foot artillery, several special formations, 20 horse batteries, 16 Cossack batteries, and an independent mountain battery. The Russian field force in Eastern Siberia, upon a war footing, had been described as consisting of: Cavalry, 38 squadrons; Artillery, 17 batteries; Infantry, 37 battalions. There were in addition 5 battalions of garrison infantry and 7 companies of garrison artillery, together with engineers and a submarine mining corps, for the local defence of Vladivostok. Exclusive of an infantry battalion and a company of garrison artillery quartered at Nikolaviesk at the mouth of the Amur, large numbers were at Port Arthur and in the Kwang Tung peninsula. In the neighbourhood of Vladivostok, on the adjacent frontier, and at Grafskaya, Iman, and Khabarovka on the railway, there were about: Cavalry, 10 squadrons; Artillery, 13 batteries (including 2 6-in. mortar batteries); Infantry, 18 battalions. At Verkhni Udinsk, in the extreme west, and echeloned along the Shilka river, there were: Cavalry, 18 squadrons; Artillery, 2 batteries; Infantry, 17 battalions. Along the northern frontier, at the important port of Blagovestchensk, on the Amur, and at Ekaterino-Nikolskaya there were 2 battalions, 6 squadrons, and 3 squadrons respectively. Important movements of troops have, however, been made, and new corps have been created, as is indicated above. The forces in Turkestan have also latterly been increased, and there has been a considerable concentration of troops on the borders of Afghanistan.

The Cossack forces have a special constitution. Every Cossack becomes liable to serve as soon as he has completed his eighteenth year. For the first three years, which are looked on as "preparatory," his service is, however, purely local; but for the next twelve years he is considered as belonging to the "front" category. This category consists of three bans, the first of which is formed of men actually serving, and the two others of men who have been granted

unlimited leave. The last five years are spent in the Reserve category. There is, however, a still further category, for which no limit of age is fixed: this comprises all able-bodied Cossacks not otherwise classified. These have to supply and maintain their own horses, besides providing their own clothing and equipment. The peace effective of the Cossacks is stated to be 65,930, with 52,400 horses, but it is probable that not more than 58,000 are permanently with the colours. The war strength is given as 182,065, including 4275 officers, and there are 173,150 horses. This gives a percentage of 13·2 to the male population liable to Cossack service. Either owing to defective handling, or a decline of efficiency in the force, which has been neglected, the Cossacks have played but a small part in the war. Of the Cossack formations Gen. Rennenkampff has 4 Trans-Baikal divisions, Gen. Samsonoff 4 Siberian regiments, Gen. Grekoff 4 Orenburg regiments, and Gen. Telescheff 6 regiments of the Don.

In the Russian Empire considerably over a million men annually attain the age for joining the army. In 1902 the number liable to serve was 1,122,000, and 315,832 were embodied in the standing army, these figures approximating to the average rate. Seventy per cent. of the men so entered are illiterates. About 5000 enlist annually as volunteers, and 16,000 join the Cossacks. The period of liability to personal service lasts from the twenty-first to the forty-third year of age. Those who join the Standing Army spend five years with the colours (four in the Infantry), thirteen in the Reserve, and the remainder in the Opoltschenie, or Militia. In some instances, however, the War Minister has power to retain men for a longer period with the colours; whilst, on the other hand, this period is shortened by one, two, three, or four years for those possessing a superior education. The Opoltschenie, which has been developed from a simple militia into a first reserve formation, now embraces two different classes: (1) Men between 21 and 43 years of age, who have never served; (2) men who have completed 5 years' service with the colours and 13 years in the Reserve. The ages of the men vary between 39 and 43 years.

The Finnish Military Service Law, whereby the Finnish army has lost the independence guaranteed by treaty, was promulgated on Aug. 1st, 1901. The offices of Finnish Commander-in-chief and staff have been abolished.

The war strength of the Russian forces consists of about 56,500 officers and 2,855,000 men, including 1,792,000 Infantry and 196,000 Cavalry. These form the Active Army of all classes, but are not available in any one part of the empire. To these figures must be added the available Reserve, estimated at 1,064,000; Frontier battalions, 41,000; Cossacks, 142,000. There are besides these the Territorial Reserve, some 2,000,000 men, and the Opoltschenie, 1,300,000. General Redigers, a well-known authority, estimates the trained reserve to be 2,700,000. A recent high English authority gives the following figures: Peace footing, 1,000,000; Reserves, 2,900,000; Militias, 1,200,000; other Services, 100,000; total, 5,400,000. It was expected that under new organisation the Opoltschenie, or Militia, in time of war would form 40 Infantry divisions, 640 battalions; 20 regiments of Cavalry, 80

squadrons; 80 batteries of Artillery, and 20 battalions of Sappers; but owing to the vast distances to be covered, and the want of railway accommodation, the mobilisation of this great force would be neither easy nor rapid. It has, however, contributed a large force to Manchuria. In regard to the embodiment of the reserve force in the event of war great advances have been made by the establishment of brigade commands and the organisation of reserve brigades.

### The Navy.

As in the case of Germany, the Emperor is in supreme command of the naval forces. But he exercises his authority through the **General Admiral** or **Commander-in-Chief** of the Navy, an official who is almost invariably a member of the Imperial family. Under the supervision of the General Admiral, an officer selected by the Emperor from the list of vice-admirals acts as **Minister of Marine**, and exercises a control over the twelve departments charged with the business of naval administration. These departments or boards are the Admiralty Council, the Naval Headquarters Staff, the Supreme Naval Court, the Legal Board, the Hydrographer's Office, the Department of Construction, the Committee of Technical Advice, the Admiralty Regulations Office, the Medical Authority, the Record Office, the Pension Office and the Printing Office. The duties and business of these offices severally are explained by their titles. In almost every case each department has as its president a vice-admiral, who is assisted by naval officers or civilians as is required by the nature of the office. The **Admiralty Council**, which is responsible for the Estimates, consists of the General Admiral, the Minister of Marine and ten flag-officers. Assisted by the Technical Committee and the other departments, this Council decides upon the allocation of the total sum provided for the Navy over the various items in the Estimates. The head of the **Naval Headquarters Staff** is responsible for the training, organisation and efficiency of the personnel, and assigns the various ships which compose the fleets and squadrons. This is the executive branch of his department. The other branch deals with Naval Intelligence, the collection and codification of information concerning foreign navies, the preparation of schemes of mobilisation and of proposed plans of action in case of war. Similarly the **Department of Construction** and the **Technical Committee** deal with the matériel, the former being responsible for the execution of the shipbuilding programme and the maintenance of a proper supply of stores, while the latter marks the improvements made in ships, machinery and engines of war, and suggests plans and specifications for new ships, etc. By an edict of the Emperor in 1874 military service was rendered obligatory for all classes, and the number of men annually needed for the Navy is fixed by law. The men are recruited by conscription, and while on the active list are not allowed to marry.

The Admiralty is thus constituted:—

**President**, H.I.H. Grand Duke Alexis (General Admiral).

**Vice-President**, Vice-Admiral F. Avellan (Minister of Marine).

**Members**.—Admirals of the Fleet, K. Pilkin, Ul. Schmidt, N. Kaznakoff; Vice-Admirals,

Ul. Verhovsky, J. Dikoff; Lieutenants-General, A. Kolokoltzoff, Soulieff.

The original estimates for 1904 came to a total of £11,835,668 (113,622,426 roubles), but owing to the war these estimates have been considerably modified. It is difficult to know what sums have been expended on the Navy, and in the late autumn of 1904 the announcement was made that a very large number of battle-ships and armoured cruisers were about to be commenced.

There are 2200 officers on the effective list of the Russian Navy, exclusive of naval cadets, and the number of all ranks as projected for 1904 was 65,054. The strength of the Reserve was fixed at 30,000.

The executive officers were divided as follows: 1 commander-in-chief (general admiral), 14 admirals, 22 vice-admirals, 35 rear-admirals, 102 captains, 349 commanders, 990 lieutenants, and 777 sub-lieutenants and midshipmen.

The strength of the Russian Navy in ships built, building and projected, on Nov. 30th was (no allowance being made for the losses in the Russo-Japanese war recorded below):—

#### Built.

Battleships, 1st class . . . . .	17
do. 2nd class . . . . .	4
do. 3rd class . . . . .	1
Coast defence ships . . . . .	14
Armoured cruisers . . . . .	7
Protected cruisers, 1st class . . . . .	6
do. do. 2nd class . . . . .	3
do. do. 3rd class . . . . .	3
Unprotected cruisers . . . . .	3
Torpedo vessels . . . . .	9
Torpedo-boat destroyers . . . . .	47
Torpedo boats . . . . .	167
Submarines . . . . .	1

#### Building.

Battleships, 1st class . . . . .	6
Protected cruisers, 1st class . . . . .	2
Torpedo-boat destroyers . . . . .	40
Torpedo boats . . . . .	24
Submarines . . . . .	13

Note.—It is not certain how many of the sub-marines have been actually commenced.

The principal Russian dockyards are situated as follows:—

**Kronstadt.** One dock takes any ship; three smaller.

**Libau.** Two docks take any ship.

**Sevastopol.** Two docks take any ship.

The composition of the Russian Fleet in the Far East, forming the First Pacific Squadron, at the outbreak of war, was:

- 7 battleships.
- 4 armoured cruisers.
- 8 protected cruisers.
- 7 gunboats.
- 25 torpedo-boat destroyers.
- 24 torpedo boats.

During the fighting around Port Arthur and off the coasts of Japan all these vessels were rendered ineffective. Four battleships, the *Retvisan*, *Pobieda*, *Peresviet* and *Pollava*, were sunk by shell-fire at Port Arthur; the *Sevastopol* was torpedoed by the Japanese in the roadstead, and afterwards destroyed by the Russians; the *Petropavlovsk* was blown up by a mine outside the port, and the *Tsarevitch* is interned at Kiaochau. The armoured cruiser *Rurik* was sunk in the Straits of Tshushima by Kamimura's squadron, and the *Bayan* was sunk by shell-fire at Port Arthur; while the

*Gromoboi* and *Rossia* returned to Vladivostok, after an encounter with Kamimura's squadron, in a damaged condition. Of the protected cruisers, two—the *Diana* and *Askold*—are interned at Saigon and Shanghai respectively; the *Novik* was driven ashore at Korsakoff, the *Boyarin* and *Yenesei* were blown up by mines at Dalny, the *Pallada* and *Amur* were sunk by shell-fire at Port Arthur, and the *Variag* at Chemulpo. The losses in the torpedo craft and gunboats are distributed around the coasts of the Yellow Sea.

The **Second Pacific Squadron**, which started from the Baltic in October under the orders of Admiral Rozhdestvensky, with Admiral Fölkersahm as his second in command, was composed of two divisions, one of which proceeded by way of the Cape of Good Hope, the other passing through the Suez Canal. A third division, under Admiral Botrovsky, which started in November, effected a junction with the second division in the Red Sea at the end of December.

The Squadron is made up of:

**7 battleships**—the *Kniaz Suvaroff*, *Imperator Alexander III.*, *Borodino*, *Orel*, *Ostrobria*, *Sissoi Veliky*, and the *Navarin*.

**3 armoured cruisers**—*Admiral Nakhimoff*, *Dmitri Donskoi*, and *Aurora*.

**8 protected cruisers**—the *Sviellana*, *Jemtchug*, *Almaz*, *Oleg*, *Izumrud*, *Rion* (ex *Peterburg*), *Dnieper* (ex *Smolensk*), and *Terek*.

There are a number of attendant auxiliary vessels, with 7 destroyers and 8 torpedo boats.

The **Third Pacific Squadron**, the preparation of which was begun in December 1904, consists of old coast-defence vessels, with the exception of the *Slava*, sister ship to the *Kniaz Suvaroff*, at the end of the year still uncompleted.

The other battleships fitting out (December 1904) for service under Admiral Birleff are the *Imperator Nicolai I.*, *Admiral Ushakoff*, *General Admiral Apraxine*, *Admiral Senyavine*, and the armoured cruiser *Vladimir Monomakh*; and there is a proportion of auxiliaries (armed merchantmen) and torpedo craft.

It was announced at the beginning of 1905 that the Czar had sanctioned the expenditure of £160,000,000 for rebuilding the Navy, the period of construction to be 10 years.

### Provincial and Local Government.

For purposes of local government the empire is divided into the nine General Governments of Finland, Poland, Wilna, Kieff, Moscow, the Caucasus, Turkestan, the Steppes, and Irkutsk, each under a Governor-General with full civil and military powers. In Siberia the Governors-General are assisted by deliberative Councils. The Trans-Baikal, Amur, and Maritime provinces and the Kwang-Tung territory (see p. 617) were in 1903 made a special Viceroyalty under Admiral Alexieff. There are subdivisions of the General Governments into 78 Governments (49 in European Russia, 10 in Poland, 8 in Finland, 7 in the Caucasus, and 4 in Siberia), each under a Civil Governor with a Council; and into 17 Provinces (11 in European Russia, 4 in the Caucasus, 9 in Central Asia, 4 in Siberia, and the Kwang-Tung province in China, each under a Military Governor). The Governments are divided into districts, with their own administrative institutions, and special Governors are placed over the large towns. In European Russia the country is divided into communes, groups of which are united to form cantons. Communal

and cantonal affairs are decided by communal and cantonal assemblies. The administration of the districts is to some extent, and in some governments, entrusted to elective district assemblies, called *Zemstvos*, in which the land-owning nobles have great power. These assemblies were founded in 1864 by Alexander II., and are of two kinds, the smaller being elected to deal with the affairs of a single district, while the larger are elected by the *Zemstvos* of all the districts in a Province or Government, and form Provincial *Zemstvos* to deal with the affairs common to the districts in that Government. The reactionary party have in recent years done their best to curtail the powers of the *Zemstvos*. There are also elective administrative bodies in most towns and cities. Russian institutions and the Russian language have been introduced into parts of the empire which previously enjoyed some measure of independence and self-government—e.g., into Poland and Finland (see p. 617).

### Religion and Education.

The State religion is Græco-Russian, called the Orthodox Catholic Faith. The Emperor is the head of the Church, but the Holy Synod is the board of government, and the Procurator has very large powers. The orthodox number over 87,000,000; Dissenters about 2,000,000, Roman Catholics 11,500,000, Protestants and other Christians 5,030,000, Jews 5,000,000, Mahometans 138,900,000. All religions are professedly tolerated, but the Jews are generally and severely oppressed, and some other dissenters have at times suffered greatly. In educational matters Russia is perhaps the most backward country in Europe. There were 78,700 primary schools in '98, with about 4,200,000 pupils, though the lack of official information on the subject may make matters seem worse than they are. There are also secondary, technical and special schools, and about 17,500 students in the Universities. The administration of justice, though nominally reformed in '64, is still much in need of reform and reorganisation.

### Newspapers.

There are few Russian papers of repute, on account of the restrictions of the laws against the press and the poverty of the people. The principal daily published in St. Petersburg is the *Novoe Vremya* (London correspondent, Mr. G. Wesseltzky), which is hostile to England, and possesses pronounced Pan Slavistic tendencies. The *St. Petersburg Viedomosti* was at one time more important than at present, because of the fact that it is edited by Prince Ukhtomsky, who accompanied the present Czar on his tour round the world before he succeeded to the crown. The *Russ* and the *Russian Viedomosti*, both published at Moscow, have Liberal tendencies. Other papers are the *Svet* and the *Journal de St. Pétersbourg*. The Government organs are the *Official Messenger* and the *Financial Messenger*.

### Industries, Railways, etc.

The great majority of the population are engaged in agriculture. Grain, eggs, butter, and other agricultural products, timber, mineral oils, flax, linseed, and hemp are among the chief products of the country. There are immense forest areas, the State owning the largest part of them, and timber is largely exported. Coal,

iron, and other minerals exist in large quantities, and the mining industry is increasing. There is a rapidly growing petroleum industry in the Baku district. In a report to the Czar on the Budget Estimates for 1900 M. Witte remarked on the extraordinary growth of Russia's industries, which increased in value from 541,000,000 roubles in '77 to 1,816,000,000 roubles in '97. Recently, however, the manufacturing industries have been in a depressed and stagnant condition. The railways of the Empire have a total length (1903) of 40,836 miles, and most of them belong to the State. There are in European Russia, exclusive of Finland, 50,000 miles of navigable rivers, canals, and lakes. Over 50 towns and cities are lighted by electricity, and electric tramways are numerous, while projects for the use of electric motive power are under way, and all the machine-works in the country have adopted it. By an Imperial Ukase, issued Nov. 26th, '97, the currency was established on a gold basis, and the relative value of silver and paper roubles in gold was permanently fixed.

### Statistics and Diplomatic.

**Revenue**, 1902, £213,136,000; **expenditure**, £197,838,000; **exports**, 1902, £92,068,917; **imports**, £65,667,705; **public debt**, 1902, £690,107,000, including about £250,000,000 incurred in respect of railways. In 1902 the United Kingdom exported goods to the value of £10,551,368 to Russia, and imported from Russia goods to the value of £20,057,343, cereals amounting to nearly £10,000,000.

**Principal Ministers of State: Imperial Household**, Gen. Baron Fréedericks.—**War**, Gen. Sakharoff.—**Marine**, Vice-Admiral Avelane.—**Foreign Affairs**, Count Lamsdorff.—**Interior**, Prince Sviatopolk-Mirski.—**Public Instruction**, General Glasoff.—**Public Works and Railways**, Prince Khilkoff.—**Finance**, M. Kokovzov.—**Agriculture and Domains**, M. Yermoloff.—**Justice**, M. Muravieff.—**Comptroller of the Empire**, Gen. Lobko.—**President of the Council of the Empire**, Grand Duke Michael Nicolaievitch.—**Procurator of the Holy Synod**, M. Pobiedonostzeff.—**H.M. the Emperor's Private Chancery**, M. Tanéieff (*Directing*).—**Director of the Emperor's Private Chancery for the Institutions of the Empress Marie**, Gen. Count Protassow.—**Bakhmetiev**.—**Governor-General of Warsaw**, Gen. Chertkoff.—**Governor-General of Finland**, Lieut.-Gen. Prince Obolensky.

**Committee of Ministers: President**, M. Witte.—**Members of the Council of the Empire**, Grand Duke Michael Alexandrovitch, Grand Duke Vladimir Alexandrovitch, Grand Duke Alexander Mikolailovitch, Grand Duke Alexis Alexandrovitch, Grand Duke Michael Nicolaievitch, Count Solsky, Mons. de Frisch, M. Pobiedonostzeff, Count Worontzoff-Daschkoff, Vice-Admiral Tyrtoff, M. Philippoff, Count Protassow Bakhmetiev, M. de Witte, M. Ostrowsky, M. Yermoloff, M. Mouravieff, Prince Khilkoff, Baron Budberg, General Richter, Lieut.-Gen. Wahl, M. Pleske.

**Ambassador in London**, Count Benckendorff, Chesham House, Chesham Place, S.W.—**Consul-General**, Baron R. U. Sternberg, 17, Great Winchester Street, E.C.

**British Ambassador**, St. Petersburg, Rt. Hon. Sir Charles Hardinge, G.C.M.G., K.C.V.O., C.B.—**Secretary of Embassy**, C. A. Spring Rice, Esq.

**British Commercial Agent**: H. A. Cooke, 17, Malaia Dimitrovka, Moscow.

**British Consuls. Consuls-General**: O. Wardrop (St. Petersburg), C. S. Smith (Odessa), A. P. Murray (Warsaw). **Consuls**: P. Stevens (Batoûm), H. M. Grove (Moscow), A. Woodhouse (Riga), A. F. Medhurst (Rostov), H. P. Smith (Kieff).

### Sovereign.

**Nicholas II.**, who on Nov. 1st, '94, succeeded Alexander III. as "Emperor of All the Russias," was b. at St. Petersburg on May 18th, '68, his mother being the Princess Dagmar, a daughter of King Christian IX. of Denmark, and sister to Queen Alexandra, the Duchess of Cumberland, and the King of Greece. He enjoys the revenue from the Russian Crown domains, covering over 1,000,000 sq. m., including gold and other mines in Siberia. He is gifted with the linguistic facility of most of his countrymen, and fluently speaks French, German, Italian, and especially English, of whose literature he has a thorough knowledge. During the famine of '91 he was, at his own request, made President of the Committee of Succour, and worked hard in the organisation of relief. As Czarevitch he held several military commands in his own country—in the famous Préobrajensky regiment among others—and in England he had conferred upon him in '93 the Order of the Garter. He married the Princess Alix of Hesse-Darmstadt in Nov. '94, and a son and four daughters have since been born to them. The four daughters came first, but a son was born on August 12th, 1904, and was named Alexis. The coronation of the Czar took place with impressive ceremonial at Moscow in May '96, and in August of the same year he commenced a tour which included visits to the Emperor of Austria and Germany, to the King of Denmark, to Queen Victoria, and to the President of France. The visit to Paris was taken advantage of to accentuate the friendly understanding or alliance, as it may now be called, between France and Russia. This alliance was definitely announced on the occasion of the visit of President Faure to St. Petersburg in '97. The famous peace proposals which he made to the Powers during '98 led to the Peace Conference at The Hague in '99, and the establishment of the Permanent Court of Arbitration there.

A striking article was contributed to the *Quarterly Review* in July 1904, it was said, by a high Russian official, contending that the Czar is really as well as nominally responsible for the government of the country, including those acts in regard to domestic and foreign policy which have generally been condemned as mistakes. The Grand Dukes, however, have considerable influence over him.

### History, 1904.

The early history of the year in Russia is the history of the war, and this is dealt with in the separate article on the RUSSO-JAPANESE WAR, pp. 610-31.

A Commercial Treaty with Germany was signed (July 28th), and an Arbitration Treaty with Belgium (Nov. 3rd).

The state of affairs in the Empire in January was unsatisfactory in the extreme. The labour disturbances in the Caucasus in 1903, and the irritation amongst the Armenians caused by

the confiscation of Armenian church property, together with the arbitrary and oppressive measures of the Minister for the Interior, the late M. de Plehve, had led to a condition little removed in some districts from revolutionary violence. The outbreak of the war further worsened trade conditions, and anti-Government demonstrations broke out even in St. Petersburg. Whole districts of the Caucasus were reported to be seething with revolutionary propaganda, and extraordinary measures were taken by means of domiciliary visits and Government spies to trace and stamp it out. In February there were serious riots at Rostov. In St. Petersburg, Moscow, and other cities, the "Committee of Self-Protection and Salutory Reforms" issued papers charging the Government with having dragged the country into a senseless war, declaring the demands of Japan to be absolutely legitimate, and exhorting those called up for mobilisation to refuse to leave for the front, and to promote popular risings as a protest against the action of the Government. Such protests were actually organised at Warsaw, where the crowd sang revolutionary songs and cheered for the independence of Poland; and at Lodz, the great Polish industrial centre, hundreds of arrests were made. Special and most rigorous precautions were taken by the authorities to guard against the diffusion of revolutionary literature and sentiments in the Army, and soldiers were forbidden to receive letters written in Polish, Hebrew, and other non-Russian languages; while the officers were ordered to search at night in the clothes and baggage of the rank and file for forbidden literature.

In March a number of Socialist and Social Democratic Committees published a secret manifesto denouncing the war and adding: "For our own good, and for the benefit of the Russian people themselves, we hope that Japan will be victorious and defeat the Czar. . . At present, and while the external troubles continue, we must endeavour to augment the internal foes of the Government, thus adding to its difficulties." Another manifesto by the Central Committee of the Social Democratic Party went a great deal further. It roundly stated: "The wealth of the Russian *bourgeoisie* is created by the impoverishment and ruin of Russian workmen, and to increase this wealth the workmen must now shed their blood in order that the Russian *bourgeoisie* may be able to oppress and exploit the Chinese and Korean workmen without let or hindrance!" Having thus condemned "this criminal war," it cried "Down with the autocracy!" and demanded the calling of a Constituent National Assembly. The Socialist Revolutionary Party took much the same line, urging that instead of aiding the Government to carry on the struggle against the Japanese, with whom there was no cause of quarrel, every effort should be made to overthrow the Government.

At the same time there was at first undoubtedly a strong and genuine feeling of patriotism in the nation, and a widespread determination to persevere with the war till the many defeats had been wiped out by the success of the Russian arms. As time went on, however, and the people had their illusions shattered one after another, public opinion changed and the war became most unpopular. People cursed it under their breath, seeing clearly that it could bring them neither prestige

nor profit; and desiring nothing more ardently than the quickest possible escape from it. The *Temps* sent a representative through Russia to study and report upon the state of public opinion, and this was his deliberate report. Of the commercial classes he said that they saw the war would ruin them. The press and the official classes, the two mouthpieces of opinion most open to influence and pressure, were optimistic in the extreme at the commencement of the war, but even they modified their tone considerably as the months went by and the Russian defeats continued. The delusion that Russia was invincibly strong from a military and naval point of view was shattered, and there was a general recognition of the fact that great administrative reforms would be needed to put matters right. The Russian reverses were even welcomed by many thoughtful people, from this point of view, as bringing the execution of these much-needed reforms nearer.

In Poland, where trade and industry were hit very hard by the war, the Polish Separatist Revolutionary Party tried to raise the standard of revolt, but the plot was discovered in April, and many of the ringleaders were removed. Still feeling ran so high, that in June a Socialist procession marched openly through the streets of Warsaw carrying red flags with the inscription "War against war" on one side and "Down with Czarism" on the other. Later in the year the reservists were mobilised in nineteen districts of Poland, and it was stated by a *Times* correspondent that some of the reservists started for the front with shouts of "Vive Kuroki." Large numbers deserted and crossed the frontier to escape military service, and on Sept. 13th a serious riot, in which many were killed and injured, broke out in Warsaw in consequence of the popular discontent with the Government and the war.

The crippling of trade by the war, the closing down or limitation of the output of the factories, and the shrinkage of traffic on the railways, and consequent discharge of thousands of employees, all aggravated the situation. On the railway lines in European Russia it was computed that 60,000 men had been discharged during the four months ending in June 1904, while the number of artisans and labourers thrown out of work during the same period was estimated at between 300,000 and 400,000.

Overt expression of some of the bitterness and hatred fermenting in the midst of the nation was not wanting in its worst form. The Vice-Governor of the Elizabetpol Government was assassinated at Agdshakent on July 17th. M. de Plehve, the Minister of the Interior, was murdered by the throwing of a bomb at his carriage in St. Petersburg on July 28th. The assassin was severely injured by the explosion, but recovered, and later in the year was sentenced to penal servitude for life. The Central Committee of the Russian Revolutionary Socialist Party claimed that the assassination was a righteous act, and took the responsibility upon itself. Lieut.-Col. Boguslavsky, Chief Administrator of the Surmalin district in the Caucasus, was murdered at Igdir (Aug. 1st). The murder of General Bobrikoff, Governor-General of Finland, on June 16th, by Eugen Schauman, son of Lieut.-Gen. Schauman, Senator and Privy Councillor till 1900, is not quite in the same category, but it was a significant sign of the times. Eugen

Schauman killed himself immediately after shooting General Bobrikoff.

An indication of the condition of the country was given by the publication in the *Times* (April 13th) of some particulars taken from a confidential report drawn up by M. Muravieff, Minister of Justice for the Council of State, in order to assist that body in preparing a scheme for the improvement of the method of procedure against political prisoners. The statistics given in the report cover the ten years from 1894 to 1903. What are described as political prosecutions, formally registered at the Ministry of Justice, increased from 158 in 1894 to 1,988 in 1903. The number of persons actually arrested for supposed political offences was 919 in 1894 and 5,590 in 1903. The next highest figures were 3,744 in 1902 and 1,884 in 1899. The number of prosecutions authorised by personal order of the Czar was 56 in 1894 and increased each year up to 250 in 1901, 347 in 1902, and 1,522 in 1903. The number of persons prosecuted or arrested in this connection was 559 in 1894, and increased steadily up to the enormous total of 6,405 in 1903. Proceedings collapsed or were abandoned in a certain number of cases, which affected 429 defendants in 1903. The report further recorded "the number of punishments inflicted on persons arrested by direct order from his Majesty." The orders for simple deportation to Siberia issued by the Czar rose from 21 in 1894 to 910 in 1903, and to the further districts of Siberia the increase was from 34 to 592. Persons placed under the surveillance of the police increased from 244 in 1894 to 1,268 in 1903, and those who were imprisoned from 185 to 1,177. M. Muravieff attributed the increase in the number of cases during the period in question to the revolutionary and Socialist propaganda.

Prince Sviatopolk Mirski, who was appointed to succeed M. de Plehve as Minister of the Interior, was credited with holding very liberal views and contemplating a number of necessary reforms, including the grant of some amount of liberty to the press and to different religious bodies. He was reported to have declared that he was on the side of the Zemstvos and not of the bureaucracy.

The Zemstvos of the country sent up delegations to a meeting at St. Petersburg, which was understood to be summoned by desire of the Czar. The Government permitted the meeting, but the proceedings were private. The correspondent of the Paris edition of the *New York Herald* stated (Nov. 25th) that by a large majority the meeting agreed to report to the Czar that the Government was completely out of touch with the Russian people and their wants; that the Government had shown too much distrust of anything like self-government; that the bureaucratic and centralised methods of administration had to a great extent alienated the people from the throne; that absolute freedom of conscience, religion, speech, and press should be granted, with equal civil and political rights; and that two Legislative Houses should be constituted, the Lower consisting of members of the Zemstvos, and the Upper resembling the American Senate. A final resolution urged the necessity of the complete cessation of all punishments inflicted by "administrative order." A Congress of 34 Presidents of Zemstvos afterwards assembled, and 32 of them carried a resolution

embodying most of the points given above, and urging a grant to the peasantry of rights equal to those of other sections of the community, the creation of regular judicial institutions for their defence, and the reorganisation of the Zemstvos and municipalities in order to make them popular bodies with independent powers for local affairs. These proceedings attracted wide-spread attention in Russia and elsewhere, and the keenest anxiety was manifested to see what would be the result. The period of waiting during December was marked by riots at St. Petersburg, where a popular demonstration against the Government took place (11th), and Moscow (18th). The Municipalities of these two cities followed the lead of the Zemstvos in urging that the Constitution should be granted.

The *Matin* (Dec. 21st) gave an account of a Ministerial Council which it said was held on the 15th inst. at Tsarskoe Selo, at which M. Witte and Prince Sviatopolk-Mirski argued in favour of reform, while M. Muravieff and M. Pobiedonostzeff were energetically opposed to it, and the Finance Minister, M. Kokovzov, joined them, urging the difficulties which popular representation would give rise to. All hope of reform died after this, and on Dec. 27th a Manifesto issued by the Czar caused profound disappointment. The Manifesto said: "We regard as the duty of the Government, in conjunction with the undeviating maintenance of the immutability of the fundamental laws of the Empire, untiring care for the needs of the country. . . . When the need of this or that change has been shown to be mature, then we consider it necessary to meet it, even though the transformation to which this leads involves the introduction of essential innovations in legislation." The peasant population's interests were under consideration, and the laws regarding peasants were to be brought into unity with the general Imperial legislation, the peasants being recognised as "free citizens possessing full rights." The Manifesto went on to describe as urgent:—

1. The safeguarding the law in its full force as the most important pillar of the throne of the autocratic Empire.

2. That local and municipal institutions should be given as wide a scope as possible in matters of local administration. Local bodies should be established for local affairs in localities of smaller extent than the Districts.

3. The unification of judicial procedure throughout the Empire.

4. The introduction of State Insurance of workmen.

5. A revision of exceptional laws for suppressing crime and of the discretionary power of administrative authorities.

6. A revision of the laws dealing with heterodox and non-Christian Confessions, and the removal of all limitations on the exercise of their religions not directly mentioned in the law.

7. A revision of ordinances limiting the rights of foreigners and natives in certain territories of the Empire.

8. The removal of all unnecessary restrictions on the Press.

The Moscow and Tchernigoff Zemstvos adjourned *sine die* (30th), and by formal resolution recorded their view that the Manifesto did not respond to the aspirations of the Russian nation.

*Provinces and Dependencies.*

**Bokhara** is a feudatory Central Asian State attached to Turkestan, and lying between it and Afghanistan. It was conquered in '68. It is the most populous khanate of Turkestan, while Bokhara (75,000) is the principal trade centre of the region. **Area**, 92,000 sq. m., **pop.** 1,250,000. The **Ameer**, Sayid Abdul Ahad (b. March 26th, 1859), succeeded '85; heir Sayid Mir Alim Khan (b. Jan. 3rd, '80), is allowed to maintain an army of 11,000 troops for administrative purposes, and these are drilled by Russian instructors. The products of the country are fruit, tobacco, cotton, corn, silk, and hemp, and the trade is almost entirely in the hands of the Russians. There is a considerable trade with Afghanistan.

The **Grand Duchy of Finland** is a Russian province, which was ceded to Russia in 1809. Under its original constitution it has a Diet or national Parliament consisting of four estates—nobles, clergy, burghers, and peasants. The Czar is the Grand Duke, and has a right of veto, but the assent of all four estates is necessary to any changes in the Constitution or for making new taxes. There is a Senate nominated by the Crown, presided over by the Governor-General, which sits at Helsingfors, and is the chief administrative body. A State Council, also nominated by the Crown, sits at St. Petersburg. Provincial affairs are principally managed by the Senate, military and foreign affairs by the Imperial officials. Great changes have, however, been made in recent years. In '99 the Czar ordered that all new laws affecting Finland should in future be submitted to the Diet first, and then be sent up to the Imperial State Council for settlement and promulgation. This had the effect of removing from the Finnish Parliament the exclusive right of discussing measures affecting both Finland and the Empire, and involved—indeed was intended to effect—the Russification of the country. The Diet and the Senate opposed the strongest objections to the manifesto. They further opposed the scheme of **obligatory military service**, approved by the Czar in Feb. '99, under which a term of five years' service was fixed, and the Finnish privilege whereby Finnish regiments were required to serve only in the Duchy was abolished. But protests proved unavailing, the civil administration of the army was transferred from the Senate to the Russian Minister for War, and other steps were taken to deprive the army of a national character. In June 1900 an Imperial Ukase commanded the gradual introduction and use of the Russian language in all the official departments and public offices, and five years were given to minor officials to prepare for the exclusive use of Russian in communicating with their superiors and the Governor-General. The Senate refused to promulgate this order, on the ground that it was unconstitutional, and that out of 2,700,000 inhabitants only 8000 spoke Russian. In Sept. 1902 an edict was issued placing the Senate under the direct supervision of the Governor-General and making all its acts dependent on his consent. As the Senate is the Supreme Court of Justice, the whole judicial system was thus placed under the control of the Governor-General. It was also provided that no official should be brought to trial without the consent of his

superiors. In 1903 the Czar gave the Governor virtually dictatorial powers, and many leading men were banished; while the Russian language was substituted for the Swedish in all the public institutions of the country in October. The Governor-General, M. Bobrikoff, was murdered on June 16th, 1904, by Eugen Schauman, who shot himself immediately afterwards. On Dec. 9th, 1904, in opening the Diet the Czar's speech held out a hope of some amelioration by the abolition of the special measures "enacted for the suppression of resistance" on the part of the people, and the limitation of the objectionable laws as a result of the remonstrances made by the Senate. The chief products are timber, farm produce, etc. There is a large class of small peasant proprietors. Railways exist with a total length of about 2106 miles, all but 200 miles of which belong to the Finnish Government. Chief town, Helsingfors (**pop.** 77,484).

**Area**, 144,255 sq. miles; **pop.** about 2,750,000. **Imports**, 1903, £1,068,000; **exports**, 1903, £1,528,000. **British Consul**, C. J. Cooke (Helsingfors).

**Khiva**. A state in Central Asia lying to the south of the Sea of Aral, and bounded on the east by the Oxus and on the south and west by Transcaspia. It has been subject to Russia for about two hundred years, but in '72 it became definitely a Russian vassal state. The reigning Khan is Seyd Mahomed Rahim, who succeeded in '65, and his third son, Asfendiar, is the heir apparent. The inhabitants are Mohammedan Sunnis. **Area**, 22,320 sq. m.; **pop.** 800,000. The chief products are silk and cotton.

**Kwang-Tung**. In March '98 Russia obtained **Port Arthur** and **Ta-lien-wan**, with the adjacent territory on the Liao-tung peninsula, on lease from China for the term of 25 years, to be extended by mutual agreement. An outlet into the Yellow Sea was thus secured for the Trans-Siberian Railway. The province was called Kwang-Tung, and with the Trans-Baikal, Amur, and Maritime Provinces, was in July 1903 made a Viceroyalty under Admiral Alexieff. The Admiral was made responsible, however, to a Special Committee of the Far East, presided over by the Czar in person. Port Arthur was reserved as a Russian naval port for Russian and Chinese men-of-war, but Ta-lien-wan, with the exception of one part of the harbour, was declared a free port for the merchant ships of all nations. **Dalny**, in the neighbourhood of Ta-lien-wan, was made the terminus of the Chinese Eastern Railway and its connections, the Central Manchurian and Great Siberian lines. The harbour is one of the best in the Pacific. The population in 1902 was about 50,000. **See RUSSO-JAPANESE WAR.**

**Poland** includes ten provinces, with a total area of 49,159 sq. miles, and a population in 1903 of 11,759,642. The population increases very rapidly, and of the above total about 1,320,000 are Jews and 500,000 Germans. The country had a separate constitution 1815-30, and a separate government '30-64; but in the latter year it was deprived of its administrative independence, and in '68 it was incorporated as an integral part of Russia, trial by jury was abolished, and the official use of the Polish language was prohibited. The majority of the inhabitants are Roman Catholics. There are two main parties, one the Nationalist party and the other the Socialist party; but both are equally opposed to the Russian Government. Russian Poland is one of the largest pig-pro-

ducing countries in Europe. Capital, Warsaw; pop. 771,382.

**Siberia** is a Russian province, larger than Europe, which is only separated from the rest of the empire by the low-lying Ural Hills, a slender barrier which has now been broken down by the extension of the Russian railway system into Siberia, and by incorporating the West Siberian governments with the European Russian administrative system. A uniform system of public justice was instituted in July '97 by order of the Czar, in place of the existing arbitrary administration of autocratic officials. Trial by jury was not conceded, but justices of the peace are appointed by the Crown, and they also act as *juges d'instruction*. The higher tribunals consist of eight circuit Courts in the towns of Tomsk, Tobolsk, Chita, Krasnoyarsk, Irkutsk, Yakutsk, Blagovestchensk, and Vladivostok, and a Court of Appeal or Palace of Justice above these at Irkutsk. Area, 4,833,496 sq. m.; pop., '97, 5,727,090. Valuable goldfields have been discovered in the Government of Yeniseisk, and in the basins of the Obi, Lena and Amur rivers, 50,000 men being employed in mining. Of recent years thousands of Russian peasants have emigrated hither, and nearly all the fertile soil free of forest and outside the steppes has been occupied. A new sea route through the Kara Sea to Siberia has been opened up, chiefly by English enterprise.

The railway connection between Russia and Siberia forms the greatest railway scheme in the world. The first sod was cut at Vladivostok, on May 24th, '91. To facilitate the work of construction, the line was divided into three parts. The first starts from the European frontier in the Ural, and runs eastward; the second from Vladivostok, on the Pacific, running west; while the third is the middle section, near Lake Baikal, formed to join the other two. As to the Manchurian deviation, we gave details in our '98 edition of the concession granted by the Chinese Government (for 80 years) to the new concern, under Russian auspices, known as the Eastern Chinese Railway Co. On Dec. 28th, '99, the last rails were laid on the Trans-Baikal section, thus establishing steam and boat communication between Western Europe and the Pacific coast (see below). During 1902 there were other interesting developments. These included the practical supersession of Vladivostok as the terminal port by Dalny, in the neighbourhood of Port Arthur, which is the terminus of the Eastern China Railway. The *Board of Trade Journal* of March 19th, 1903, stated that at a meeting of the board of directors held on Jan. 15th it was reported that the main Siberian line was completed, except that portion of it circling Lake Baikal. It was further stated in May that there was no longer any secret made of the fact that preliminary surveys connected with the construction of a line of railway from Kiakhta, south of Lake Baikal, to Urga and thence across Mongolia to Peking, had been duly carried out by a Swedish engineer, Herr Olivecron. The assistance rendered by the Trans-Siberian railway in opening up Siberia is forcibly illustrated by the fact that the total distance from St. Petersburg to Vladivostok is 9781 versts, or 6521 miles, and to Port Arthur 5913 miles. The Trans-Siberian bifurcates into two branches at Stretensk—one branch going south to Port Arthur and Peking and the other eastward to Vladivostok.

During 1904 world-wide interest was evinced in this great railway, in consequence of its use during the war (*q.v.*). Being a single line, its capacity was tried to the utmost. The resource of Prince Khilkoff, Minister of Ways and Communications, was specially exhibited in handling the traffic at Lake Baikal, where the only break in the long line occurred. During the winter season he succeeded in laying and maintaining a line across the ice, while the Circum-Baikal Railway, to connect the sections on both sides of the lake, was being constructed. This work was accomplished by Sept. 25th. The link begins at Baikal, and runs round the southern end of the lake to Myssovaya, a distance of 163 miles; the work was extremely difficult, there being numerous bridges and viaducts, while a large number of crossing-places, or sidings, are included in the scheme. The cost of the new line was very high, being about £6,000,000. It was reported from St. Petersburg, under date Nov. 13th, that the Czar had approved the decision of a conference which agreed to double the track of the Siberian Railway. The further decision as to which portions should be so treated was left to the departments of War, Finance and General Control, and a sum of £1,068,000 was set aside from the Budget of 1905 for preliminary expenditure. A report on the working of the Siberian system during the first three months of 1904 showed total receipts £578,000 (about £34,000 less than the corresponding period), and the expenditure £560,000.

**Transcaspia** is a Russian province in Central Asia, including the Turkoman region between the Caspian and the Oxus. Area, 214,237 sq. m.; pop. 375,000. The administrative centre is Askabad. In this province is Merv, an oasis situated almost midway between Meshed and Bokhara, and Herat and Khiva. It has an area of 1600 square miles, and a population of a quarter of a million Turcomans. There is no town of Merv—the thickly packed prosperous settlements spread over the oasis constituting what is recognised under that name. About 10,000 Russian troops are maintained in the oasis, which is distant 200 miles from Herat. **Turkestan** is another province in Central Asia. It comprises the khanates and deserts annexed by Generals Tcherniaeff and Kaufmann between 1860 and 1875, and now known as the provinces of Samarcand, Fergana, and Syr-Daria. Area about 257,134 square miles, with 3,900,000 inhabitants. The principal town is Tashkent, pop. 156,500; Bokhara and Khiva are under the control of the Governor-General. The Orenburg Tashkent Railway, according to a St. Petersburg telegram of Oct. 13th, 1904, was finished by that date, the length being given at nearly 1900 kilometres. A special article in the *Times* of Oct. 27th contained the statement that although the rails had been laid, the line would not be opened for passenger traffic till July 1905. Attention was also called to the strategic importance of the railway as an advanced Russian base in Asia. The writer said that if the new railway is destined to achieve but small economical results, its value as a strategical factor must not be underrated. Hitherto Tashkent has been a comfortable garrison for 10,000 men. Henceforth it will become the storehouse and advanced base of the Russians in Asia. A section leading to the Afghan frontier, north of Balkh, remains to be finished, and then Russia

will have two lines of railway leading to the borders of Afghanistan. The Central Asian line, being without water, was by no means an ideal method of transport across the desert. But this line of communication will now become merely an auxiliary one. Troops from the Caucasus even would be sent by rail, *via* Tzaritzyn and the Volga, to entrain direct for Tashkent at Samara. Moreover, the great military centres of Odessa, Simpheropol, Kieff, Kharkoff, and Moscow, now being drawn upon to reinforce Kuropatkin, who is two months' journey away in Manchuria, will be brought within 14 days of Tashkent. It was reported in November that the Riazan-Uralsk Railway

Co. had had to abandon its intention of connecting Astrakhan, at the mouth of the Volga, with the rest of the system, owing to engineering difficulties and the question of expense. The building of the railway extension of the Riazan-Uralsk line was being pushed forward from the northern end, and the hasty surveys which were being made to the east of Astrakhan showed that the line, originally intended to terminate at Astrakhan itself, will really turn off to the east before reaching the Volga delta and come out on the Caspian at a point to the east of Krasnoi Yar. This extension will facilitate access to Central Asia *via* the Caspian.

## THE RUSSO-JAPANESE WAR.

### I. THE PRELIMINARY NEGOTIATIONS.

In the 1904 ANNUAL the preliminary negotiations between Japan and Russia up to the end of 1903 were described. By way of recapitulation it may be said that Japan felt it indispensable to her safety that the independence and territorial integrity of Korea should be maintained, and that Japanese interests there should be acknowledged to be paramount. The action of Russia in maintaining her occupation of Manchuria, despite her treaty with China and her repeated assurances to the Powers, and in taking aggressive action in Korean territory on the Ya-lu, threatened the independence of Korea and the safety of Japan. Japan saw that if Manchuria were annexed by Russia, the independence of Korea would be impossible, as Russia had herself pointed out in 1895, when Japan, after the war with China, was compelled to abandon the Liau-tong Peninsula. Accordingly, Baron Komura, the Japanese Foreign Minister, instructed M. Kurino, the Japanese Minister at St. Petersburg, in a despatch dated July 28th, 1903, "to approach the Russian Government in a spirit of conciliation and frankness, with a view to the conclusion of an understanding" on these questions, and "to a definition of their respective interests in those regions."

#### *Japan's First Proposals.*

In a further despatch from Tokio, dated August 3rd, 1903, the Japanese proposals were set out as follows:

1. A mutual engagement to respect the independence and territorial integrity of the Chinese and Korean Empires, and to maintain the principle of equal opportunity for the commerce and industry of all nations in those countries.
2. Reciprocal recognition of Japan's preponderating interests in Korea and Russia's special interests in railway enterprises in Manchuria, and of the right of Japan to take in Korea and of Russia to take in Manchuria such measures as may be necessary for the protection of their respective interests as above defined, subject, however, to the provisions of Article 1.
3. Reciprocal undertaking on the part of Russia and Japan not to impede development of those industrial and commercial activities respectively of Japan in Korea and of Russia in Manchuria,

which are not inconsistent with the stipulations of Article 1.

Additional engagement on the part of Russia not to impede the eventual extension of the Korean railway into southern Manchuria, so as to connect with the East China and Shan-hai-kwan-Newchwang lines.

4. Reciprocal engagement that in case it is found necessary to send troops by Japan to Korea, or by Russia to Manchuria, for the purpose either of protecting the interests mentioned in Article 2, or of suppressing insurrection or disorder calculated to create international complications, the troops so sent are in no case to exceed the annual number required, and are to be forthwith recalled as soon as their missions are accomplished.
5. Recognition on the part of Russia of the exclusive right of Japan to give advice and assistance in the interest of reform and good government in Korea, including necessary military assistance.
6. This Agreement to supplant all previous arrangements between Japan and Russia respecting Korea.

The Russian Government consented to open negotiations on this basis, but proposed that they should be carried on at Tokio, as there were many details which would have to be referred to Admiral Alexieff; and the Japanese Government, though reluctantly and under protest, consented to this on Sept. 9th, 1903.

#### *Russia's Counter Proposals.*

On Oct. 3rd, 1903, after conference with Admiral Alexieff, the Russian Minister at Tokio submitted the following Russian counter proposals:

1. Mutual engagement to respect the independence and territorial integrity of the Korean Empire.
2. Recognition by Russian of Japan's preponderating interests in Korea and of the right of Japan to give advice and assistance to Korea tending to improve the civil administration of the Empire without infringing the stipulations of Article 1.
3. Engagement on the part of Russia not to impede the commercial and industrial undertakings of Japan in Korea, nor to oppose any measures taken for the purpose of protecting them, so long as such measures do not infringe the stipulations of Article 1.

- 4 Recognition of the right of Japan to send for the same purpose troops to Korea, with the knowledge of Russia, but their number not to exceed that actually required, and with the engagement on the part of Japan to recall such troops as soon as their mission is accomplished.
5. Mutual engagement not to use any part of the territory of Korea for strategical purposes, nor to undertake on the coasts of Korea any military works capable of menacing the freedom of navigation in the Straits of Korea.
6. Mutual engagement to consider that part of the territory of Korea lying to the north of the 30th parallel as a neutral zone, into which neither of the contracting parties shall introduce troops.
7. Recognition by Japan of Manchuria and its littoral as in all respects outside her sphere of interest.
8. This Agreement to supplant all previous Agreements between Russia and Japan respecting Korea.

#### **Further Proposals and Counter Proposals.**

The Japanese Government, in view of their important political and commercial interests in Manchuria, could not agree to regard Manchuria as being entirely outside their sphere of interest, and on Oct. 30th, 1903, rejected the Russian proposals in this respect and proposed other amendments. With regard to a neutral zone, they suggested that if one were created it should be established on both sides of the boundary between Manchuria and Korea, with an equal width of 50 kilometres on both sides. On Dec. 1st, 1903, M. Kurino was instructed to inform the Russian Government that his Government regarded the delay in sending a reply to the communication of Oct. 30th with grave concern.

The Russian reply was communicated to Japan on Dec. 11th, 1903, and consisted simply of the proposals of Oct. 3rd minus Article 7 (see above).

On Dec. 21st, 1903, the Japanese Government replied that the exclusion of Manchuria from the negotiation nullified it entirely, since their whole object was to remove every cause for conflict as to both Manchuria and Korea. They asked Russia, therefore, to reconsider the matter, and further proposed the entire suppression of the neutral-zone clause, on the ground that it could not be established in Korea if Russia would not accept its establishment in Manchuria.

Russia's reply was received at Tokio on Jan. 6th, 1904. It proposed to insert in the Agreement the following article, on condition that the articles relating to a neutral zone in Korea, and the prohibition of the use of Korean territory for strategic purposes, were agreed to:

Recognition by Japan of Manchuria and its littoral as being outside her sphere of interests, while Russia within the limits of that province will not impede Japan or other Powers in the enjoyment of rights and privileges acquired by them under existing treaties with China, exclusive of the establishment of settlements.

#### **Japan's Final Proposals.**

On Jan. 13th, 1904, Baron Komura sent to M. Kurino, for presentation to the Russian

Government, their final proposals. They asked for the following modifications in the Russian terms, and requested an early reply:

1. The elimination from Article 5 of the words "not to use any part of the territory of Korea for strategical purposes."
2. The elimination of Article 6, as to a neutral zone in Korea.
3. The acceptance of the final article concerning Manchuria, provided Russia agreed
  - (a) To respect the territorial integrity of China in Manchuria;
  - (b) Not to impede Japan or other Powers, within the limits of Manchuria, in the enjoyment of rights and privileges acquired by them under the existing treaties with China;
  - (c) To recognise Korea and its littoral as being outside the Russian sphere of interest.
4. The recognition by Japan of Russia's special interests in Manchuria, and of the right of Russia to take measures necessary for the protection of those interests.

#### **Negotiations Broken Off.**

The dilatory tactics adopted by Russia in these negotiations had created a very grave situation at the beginning of the year. The Japanese Government, backed by the whole nation, gave evidence of their resolve not to submit to protracted delays, which Russia might use to strengthen her armaments. A censorship was imposed on the press, and references to military or naval movements were forbidden; but the preparation of troops for embarkation and despatch to Korea went actively on, and, as afterwards appeared, the naval force was brought to the highest pitch of efficiency and preparedness. The Government, on Jan. 23rd, 26th, 28th, and 30th, sent urgent representations to St. Petersburg that an early response was desired.

The Russian preparations for war, in the form of arrangements for transporting a large force over the Siberian railway, of sending ships to strengthen the fleet in the Far East, and in other ways, were being actively carried on at the beginning of the year. A regiment was sent into Korea (Jan. 5th) to protect Russian interests there. The majority of military men in Russia were undoubtedly anxious for war, and their influence was thrown heavily into the scale in favour of resisting the Japanese demands. In the circumstances special interest attached to the Russian Budget (14th); but though the War Ministry estimates showed small increases, there was no indication given of the existence of any crisis. The Budget balanced at 2,178,637,053 roubles, showing a surplus of ordinary revenue over ordinary expenditure of 13,636,242 roubles. The extraordinary expenditure, chiefly for railways, was estimated at 212,178,804 roubles. The harvest and foreign trade of 1903 were reported as having shown a most satisfactory advance on the previous year, and the amount of gold in the country had much increased. The Czar's desire for peace was well known, and he specially emphasised it at his New Year reception of the Diplomatic Body (15th), when he told the assembled diplomatists that he desired and intended to do all in his power to maintain peace in the Far East. The bulk of the com-

mercial class and of the more enlightened classes of Russia, together with the Press in the centre and south of the country, were also strongly against war, but the military party had the upper hand in its control of the negotiations. The Czar was greatly impressed by the disclosures which the prospect of war brought to light as to the unpreparedness of the Russian forces—disclosures which the subsequent course of affairs amply confirmed. He was overborne all the same by his military advisers, who represented that Russia's prestige would suffer if she yielded to Japan's demands.

M. Kurino, Japanese Minister in St. Petersburg, notified Count Lamsdorff (Feb. 6th) that his Government had decided, in view of the delay of the Russian Government in connexion with the negotiations, which remained largely unexplained, and of their naval and military activities, which it was difficult to reconcile with pacific intentions, to terminate the negotiations, to recall the Minister and his staff from St. Petersburg, to sever diplomatic relations with the Russian Government, and to take such independent action as she saw fit in defence of her rights.

### **Russian View of the Rupture.**

In an official *communiqué* published on Feb. 9th, 1904, at St. Petersburg, it was stated: "The question of Russia's position in Manchuria concerns in the first place China herself, and then all the Powers having commercial interests in China. The Imperial Government, therefore, saw absolutely no reason to include in a special treaty with Japan regarding Korean affairs any provisions concerning territory occupied by Russian troops. The Imperial Government, however, does not refuse, so long as the occupation of Manchuria lasts, to recognise both the sovereignty of the Emperor of China in Manchuria and the privileges acquired there by the Powers through treaties with China. A declaration to this effect has already been made to the foreign Cabinets. In view of this, the Imperial Government, in charging its representative at Tokio to present its reply to the last proposals of Japan, was justified in expecting that the Tokio Cabinet would take into account the importance of the considerations set forth above, and would appreciate the wish manifested by Russia to come to a peaceful understanding with Japan. Instead of this the Japanese Government, without even awaiting this reply, decided to break off negotiations and to suspend diplomatic intercourse with Russia. The Imperial Government, while laying upon Japan the full responsibility for any consequence of such a course of action, will await the development of events, and the moment it becomes necessary, will take the most decisive measures for the protection of its interests in the Far East."

It appeared that M. Kurino telegraphed to Tokio on Feb. 5th that he had been informed by Count Lamsdorff that the Russian reply had been despatched to Admiral Alexieff on Feb. 3rd for transmission to Tokio, and had been sent in duplicate to Baron Rosin at Tokio; but Count Lamsdorff's observations indicated that Russia's views in regard to the main points at issue remained unchanged. Baron Rosen was informed of the rupture on Feb. 6th, and only received the note forwarded to him by the Russian Government on the day after the rupture.

### **The Charge of Treachery.**

In view of charges contained in Russian official *communiqués* that Japan had "treacherously" attacked Russia, who was bent upon maintaining peace, after the rupture of diplomatic relations; that such rupture could not be taken as announcing the commencement of hostilities; and that as the Japanese declaration of war was not issued till Feb. 11th she had committed a flagrant breach of the principles of international law in attacking the Russian fleet on Feb. 8th, the Japanese Government issued a statement at the end of February. In this statement the Japanese Government pointed out that Russia had by wanton delays put off the settlement of the question while she was busily engaged in concentrating her naval and military forces in the Far East. From April 1903 to Feb. 1904 she added 19 war-ships to her Pacific fleet, and others were *en route* to the East at the time of the outbreak of war. The Russian military forces in the Far East had been very considerably augmented since June 1903, and at the end of the year 1904 were estimated to be about 150,000 men with 266 guns, and the fortifications at Port Arthur and Vladivostok had been strengthened, work going on day and night. Troops were sent from Liao-Yang towards the Ya-lu, the Korean Government reported that Russian troops had crossed the Ya-lu into Korea on Feb. 2nd, and the fleet at Port Arthur showed its preparedness by steaming out to sea. The announcement that Japan would take "independent action" naturally included the commencement of hostilities, and it was held by all jurists that a formal declaration of war was not an indispensable pre-requisite to hostilities.

### **The Japanese Imperial Rescript.**

The Imperial Rescript declaring war against Russia was published (10th). It charged Russia with wanton delays in the negotiations, and with ostensibly advocating peace on the one hand while she was on the other extending her naval and military preparations. The Rescript continued: "We cannot in the least admit that Russia had from the first any serious or genuine desire for peace. She has rejected the proposals of our Government. The safety of Korea is in danger. The interests of our Empire are menaced. The guarantees for the future which we have failed to secure by peaceful negotiations can now only be obtained by an appeal to arms."

### **Books about the War.**

"Russia: What she was and What she is." War edition. By Prelooker (Simpkin, Marshall & Co., 2s. 6d.)

"Russo-Japanese War (The)," from the outbreak of hostilities to the battle of Liao-yang, by Thomas Cowen (E. Arnold, 15s. net).

"With Kuroki in! Manchuria" (Methuen, 7s. 6d. net).

"Campaign with Kuropatkin" (T. W. Laurie, 10s. 6d. net).

"Russian Advance (The)," by A. J. Beveridge (Harper, 10s. 6d.).

"Japan: Aspects and Destinies," by W. P. Watson (Grant Richards, 12s. 6d. net).

"Russia as it really is," by C. Joubert (Nash, 7s. 6d.).

"Russia: her Strength and her Weakness" (Putnam's, 7s. 6d. net).

"Russia of To-day," by E. Von der Bruggen (Digby & Long, 6s.).

"Russia's Imperial Navy," by F. T. Jane (Thacker, 25s. net).

"Japanese Imperial Navy," by F. T. Jane (Thacker, 21s. net).

"Japan by the Japanese," ed. by A. Stead (Heinemann, 20s. net).

"Romance of a Nation," a History of Japan, by H. D. Warner (2s. net).

"Russia." War edition, with war map. H. Grant (Unwin, "Story of Nations" Series, 5s.).

"Russia's Road to Korea," with map, etc., by F. E. Clark (Partridge, 2s. 6d.).

The Kinkodo Publishing Co. in Tokio issued a history of the War in several volumes under the title "The Russo-Japanese War."

Another publishing house, "The Tanuma," in Yokohama and Tokio (London: Kegan Paul), issued a monthly illustrated history of "The Japan-Russia War" at 1s. each part.

Messrs. Cassell & Co. issued an illustrated History of the War in monthly parts.

## II. PROGRESS OF THE WAR.

The outbreak of hostilities was not long delayed after the rupture of diplomatic relations. At midnight on Feb. 8th the Japanese fleet attacked the Russian fleet, which was lying outside Port Arthur, and torpedoed the battleships *Retvisan* and *Tsarevich*, and the cruiser *Pallada*. The next day another attack was made by the Japanese, and the battleship *Pollava* and the cruisers *Diana*, *Askold*, and *Novik* were seriously damaged. On the same day (9th) the Russian cruiser *Variag* and the gunboat *Koriets* were sunk at Chemulpo by a Japanese squadron under Admiral Uriu, which had escorted a number of transports and landed a Japanese force at Chemulpo on the 8th. This force secured the Japanese position in Korea and seized Ping-Yang on the Peking road. The Russian torpedo transport *Yenisei*, while laying mines at the entrance of Talienswan Bay, was blown up by a mine and foundered (11th). Admiral Makaroff was then appointed to supersede Admiral Stark in the command of the Russian fleet at Port Arthur, and General Kuropatkin was relieved of his post as Minister of War and appointed Commander-in-Chief of the troops in Manchuria. The cruiser *Boyarin* was torpedoed in an attack by Japanese torpedo-boat destroyers (14th). The Viceroy, Admiral Alexieff, and his staff left Port Arthur in order to make Mukden their headquarters (21st). The first of a series of attempts to block Port Arthur by sinking steamers at the harbour mouth was made by the Japanese (23rd), but failed, but the destroyer *Vnushitelni* was sunk in Pigeon Bay (25th). Vladivostok was bombarded by them (March 6th), and in a fight between torpedo boats the Russian *Stereguschtsi* was sunk. The torpedo-boat destroyer *Skori* struck a mine and blew up (17th). Another attempt, conducted with the utmost skill and bravery, to block Port Arthur failed (27th).

In Korea the advance of the Japanese brought them to Cheng-ju, where they defeated a Russian force and captured the town (28th). The port of Chinampo was then occupied by the Japanese, and General Kuroki, with the First Japanese Army of 45,000 men, began his advance upon Wiju at the mouth of the Ya-lu. The Russian forces fell back before them to

the mouth of the river, and the Japanese occupied Wiju (April 7th). A great disaster befel the Russians through the destruction of the battleship *Petropavlovsk* with Admiral Makaroff on board (13th), and a torpedo-boat destroyer was also lost. Admiral Togo laid a trap, sending in a mining vessel overnight to lay a mine-field in the track likely to be taken by the Russian ships. In the morning a weak Japanese squadron lured Admiral Makaroff away, and then sent a wireless message to Admiral Togo to cut him off. Admiral Makaroff, however, saw the trap, and returned before the Japanese fleet could get up, but was blown up by a mine and perished with his ship. Only 80 were saved, including the Grand Duke Cyril. Vice-Admiral Skrydloff was sent out as successor to Admiral Makaroff. The Vladivostok Squadron made an excursion to Gen-san (April 25th), and sank a small Japanese steamer. On their way back to Vladivostok they fell in with the transport *Kinshiu Maru*, and sank it with most of the soldiers on board, who refused to surrender.

### The Passage of the Ya-lu.

The passage of the Ya-lu was forced by the First Japanese Army under General Kuroki (May 1st). The Russian force was not only largely outnumbered, but also outmanœuvred. The Japanese artillery was splendidly handled, and the infantry stormed the position at Kin-lien-cheng, turning the Russian left and driving them back to Feng-hwang-chenn, with the loss of 29 guns. The Japanese buried 1363 Russians and took 613 prisoners, while General Kuropatkin gave his loss as 70 officers and 2324 men killed, wounded, or made prisoners. The Japanese loss was put at 318 killed and 783 wounded.

This victory gave the signal for rapid and significant developments. Admiral Togo was at once ordered to seal Port Arthur, and this he accomplished for all practical purposes by sinking 8 steamers at the harbour mouth (3rd). He then steamed to the Hall Islands, off the west coast of Korea, where the Second Japanese Army, under General Oku, lay in transports ready either to aid General Kuroki or to invest Port Arthur. The success of Kuroki set it free for the latter operation (though it was afterwards sent north, as will appear), and a landing was effected at Yen-toa Bay, on the east coast of the Liau-tung Peninsula (5th). A column was sent across the isthmus to seize Port Adams and cut the railway, while another moved up the east coast to Pi-tse-wo. Other divisions of the Second Army landed farther south, and took up positions near Kin-chau. While clearing Kerr Bay, near Ta-lien-wan, of Russian mines, a Japanese torpedo-boat (12th) and despatch-boat (15th) were blown up and destroyed; the cruiser *Kasuga* rammed and sank the cruiser *Yoshino* with 235 officers and men, during a dense fog off Port Arthur (15th), and the battleship *Hatsuse* struck a mine 10 miles S.E. of the harbour entrance and was lost, 61 officers and 378 bluejackets going down with her. *Per contra*, the Russian cruiser *Bogatyr* ran aground at Vladivostok and was lost.

### From Kin-chau to Telissu.

In the meantime the Japanese had found Kerr Bay practicable as a landing-place, and a strong force under General Oku had been

placed in the peninsula. The Russians held the walled town of Kin-chau, and had thrown up field-works across the narrow isthmus, less than 2 miles wide, to the south of the town, on a position which was so strong as to be almost impregnable. General Oku, however, soon concentrated his force, and captured Kin-chau (May 27th). Aided by the fire of gunboats and torpedo craft from Kin-chau Bay, he then assaulted the Russian position at Nan-shan, and, after a day's stubborn fighting, drove the Russians back in disorder and captured 68 cannon and 10 machine guns. The Japanese losses were officially put at 739 killed and 3456 wounded. This victory enabled Dalny to be used as a sea base. It was occupied by General Oku's force (29th), and the railway station, warehouses, and railway carriages were found uninjured, while many of the docks and piers were left in a usable condition. Fresh troops were landed from Japan, and with part of the victorious troops at Nan-shan were placed under General Nogi to invest and attack Port Arthur, which was defended by a considerable force under the command of General Stössel. The rest of General Oku's force marched northward. This commencement of the grip upon Port Arthur from the land side led to orders being sent to Kuropatkin to do what he could to relieve the situation. A force under General Stackelberg was accordingly sent south, to hamper the Japanese in the Liau-tung peninsula. General Oku found this force was concentrating at Telissu, 28 miles north of Port Adams, and at once assumed the offensive. After some severe fighting he directed an enveloping movement, which led to the complete rout of the Russian force (June 14th and 15th), with losses that included 1854 killed and buried on the field by the Japanese, besides 16 guns and 300 prisoners. The Japanese lost 217 killed and 946 wounded.

### **The Three Japanese Armies Unite.**

Meanwhile General Kuroki, after the battle of the Ya-lu, pushed on to Feng-hwang-chenn (May 6th), and there captured considerable stores of ammunition and food. He then felt his way along the Liau-yang road, being strengthened by the arrival of reserve battalions from Japan. Numerous affairs of outposts took place between the two forces during the month over a very wide range of country, but for some time there was no decisive engagement. A Third Japanese Army under General Nodzu was landed at Ta-ku-shan, and at Tsing-tui-tse, 20 miles S.E. of Ta-ku-shan. When this was in a position to lend its co-operation to General Kuroki, both forces advanced and occupied Siu-yen (June 8th), commanding the road to Hai-cheng in the north-west. The advance of General Oku's forces and their success at Telissu, already recorded, enabled the three forces under Generals Oku, Nodzu and Kuroki to work in co-ordination on a front of from 150 to 180 miles, extending from a point south of Kai-ping on the west to Cheng-chang on the east. Marshal Oyama was appointed Commander-in-chief at this juncture, with Lieut.-General Kodama as his Chief of the Staff (June 23rd), though he did not leave Tokio for the front till July 6th.

The fit time having arrived, a general forward movement was made by the Japanese forces. The First Army, under General Kuroki, commanding the northern and southern roads to

Liau-yang from Feng-hwang-chenn, captured the Ta-ling and Mo-tien-ling passes (June 27th), and so reached a position looking down on the Liau-yang valley and menacing the railway connecting the Russian forces there with those at Hai-cheng and Kai-ping. The Third Army, under General Nodzu, which had been landed at Ta-ku-shan, forced the Fen-shui-ling Pass, 13 miles N.W. of Siu-yen, at the same time, thus threatening Hai-cheng. The Second Army, under General Oku, had to move more slowly because of the Russian force at Kai-ping. In face of this forward movement General Kuropatkin gave orders for a concentration at Hai-cheng, but the tremendous rains impeded the movements on both sides for some days. An attempt to re-take the Mo-tien-ling was made and failed (July 4th), and in the west the Third Army rolled back the Russians after three days' fighting, and occupied Kai-ping (July 9th), their opponents retreating on Ta-shih-chiao. Pressure applied by the Third Army materially helped this movement. A more serious attempt to recover possession of the Mo-tien-ling defile was made by two divisions under Lieut.-General Count Keller (17th), who tried outflanking tactics, but was driven back at every point with considerable loss. Kuroki followed up his success by driving the Russians from their advanced positions on the northern route from Saimatse to Liau-yang, capturing Hsi-ho-yen and compelling the Russians to retreat in great disorder upon An-ping. General Oku, in his turn, attacked the Russian positions outside Ta-shih-chiao (July 24th), and the fighting lasted all day and into the night, when all the positions were captured and the Russians were pursued towards Ta-shih-chiao, which was occupied by General Oku (25th). On the 27th the Japanese occupied Niu-chwang in force, and hauled down the Russian flag there, turning the place into an advanced base for their southern armies.

### **From Hai-cheng to Liau-yang.**

A general advance all along the widely extended Japanese line commenced (July 31st). In the south the Russian were driven in on Hai-cheng by General Oku, General Nodzu co-operating from Si-mu-ching, 15 miles S.E. of Hai-cheng, while in the east General Kuroki carried Yan-su-ling, 6 miles west of Mo-tien-ling, and Yu-shu-lin-tzu, 4 miles west of Hsi-ho-yen, capturing 2 guns. In the fighting at Yan-su-ling General Count Keller was killed. General Nodzu's force captured 6 field guns at To-mu-cheng, and the result was that Hai-cheng was found to be untenable. Consequently General Kuropatkin withdrew his southern army by the An-shan-chan road leading to Liau-yang, and there at last effected a concentration of his forces. The weakness of the Japanese position was the gap that separated the southern armies under Oku and Nodzu from Kuroki's army on the east. To remedy this a division was sent from Nodzu's army to assist Kuroki on his left flank (Aug. 25th), and the southern armies advanced in force. They found the Russians had left a strong rear-guard at An-shan-chan under Major-General Kontkovsky, which fought stubbornly and suffered the loss of 8 field guns before it gave ground, Major-General Kontkovsky himself being killed. An-shan-chan was occupied (28th), and the Russian forces fell back upon the previously prepared

positions at Sa-san-po, 6 miles south of Liau-yang. Meanwhile, severe fighting had gone on between Kuroki and the forces opposed to him in the neighbourhood of An-ping. Kuropatkin appears to have endeavoured to overwhelm Kuroki by superior force while he was to some extent isolated, but the attempt failed. On the other hand, Kuroki was so checked that his army could not carry out the outflanking manœuvre which was probably assigned to it. He carried the strong fortified positions at Kung-chang-ling, near An-ping (Aug. 25th), and at Hung-sha-ling (26th), where he took 8 guns and drove back those opposed to him (27th).

### **The Battle of Liau-yang.**

By the morning of the 29th Kuroki's right wing and centre were about 9 miles E.S.E. of Liau-yang, while his left was in touch with Nodzu and Oku's forces, which had come up from the south, and began pounding (30th) at the Russian defences to the south-west and south of Liau-yang. Careful calculations render it probable that Kuropatkin's strength at this time was about 150,000, or even 180,000, and that the Japanese forces under Marshal Oyama numbered about 200,000. The Russian position had been strongly fortified and intrenched, and extended from the hill called Hsin-li-tun on the west of the city in a crescent eastwards around the south front of it, taking advantage of a line of hills, through Shou-shan and Yayuchi to a point near the junction of the Tang-ho river with the Tai-tse river. No material advance was made by the attack on the 30th, but that night Kuroki took his centre and right across the Tai-tse, leaving his left with the Second and Third Armies under Oku and Nodzu to continue the attack. This was a most perilous move, for Kuroki found himself opposed by far superior forces, which would have been able to crush him, undoubtedly, had they not been "bluffed" by him into the belief that his forces were far stronger than they were. As it was, his attempt to turn the Russian left flank and cut the railway to Mukden failed, and was indeed foredoomed to failure from the outset, and only the bravery and skill of the Japanese averted a disaster on this side. The Second Army made good progress against Hsin-li-tun, and the Third against Shou-shan (31st), while both positions were captured (Sept. 1st). Some heavy guns were captured and turned against the railway station, whence the Russians were sending away train after train to the north. The Japanese advance, however, was stayed by a second line of works between the hills already mentioned and the town, which was defended by a strong rearguard long enough to enable the main body to cross the river. When Kuropatkin had sufficient men across the river he turned fiercely on Kuroki, who had pushed on from his crossing-place and on the previous night had occupied Sy-kwan-tun and threatened the railway northwards. By a brilliant *coup-de-main* Kuroki took Manjayama Hill, the key to the Russian position, on the night of Sept. 1st, and held it during the next two days in spite of frequent and desperate attempts on Kuropatkin's part to regain it. Kuroki was then strengthened, the Russians fell back on the railway, and Kuropatkin had no alternative but to order a general retreat (3rd), drawing off his gallant rearguard from Liau-yang, where it had

held the southern Japanese forces for three days (4th), after it had burned the stores there and destroyed the bridges. The Russian losses during the fighting preceding the evacuation of the city were estimated at 4000 killed and 12,000 wounded; but the Russian General Staff put the killed at 1810, the wounded at 10,811, and reported that 1212 were "left on the field." The Japanese lost 17,539—4866 in the Right, 4992 in the Centre, and 7681 in the Left Army.

### **After Liau-yang.**

By Sept. 5th General Kuropatkin was able to report to the Czar that he had extricated his army from the dangerous situation in which it found itself, and on all sides the highest tributes were paid to his skill in so extricating it. The Japanese pressed hard upon their retreating enemies, and a good deal of fighting took place as Kuroki's forces advanced along the ridges to the east of the railway. General Kuropatkin and the bulk of his forces had reached Mukden by Sept. 7th. A pause of some duration ensued, rendered necessary by the exhausting efforts made by both sides. The Japanese used it to pour reinforcements and supplies into Liau-yang for their forces encamped between that place and Yen-tai.

A change was also made in the Japanese military system, extending service with the reserves from 9½ to 14½ years, and thus extending the period during which the men are liable to service abroad. It was calculated that this was equivalent to adding 300,000 men to the number actually available for service with the active army.

On the Russian side the Czar felt impelled, in view of "the intense energy with which Japan is conducting the war, and the stubbornness and high warlike qualities displayed by the Japanese," to raise a second Manchurian Army, and to appoint General Gripenberg to command it (Sept. 25th).

### **The Battle of the Sha-ho.**

General Kuropatkin issued an Order of the Day (Oct. 2nd), in which he said: "The moment to go and meet the enemy, for which the whole army has been longing, has come, and the time has arrived for us to compel the Japanese to do our will, for the forces of the Manchurian Army are strong enough to begin the forward movement." This very plain warning that he would take the offensive was soon confirmed by his advance southwards on both sides of the railway (5th), and occupation of Ben-tsia-putse and Sha-ho Station, about 15 miles south of Mukden. The Russian stroke was aimed at Kuroki's flank, a Russian force crossing the Tai-tse river, 40 miles east of Liau-yang and temporarily cutting his communications (9th). Two Japanese positions near Pen-hsi-hu were captured, but were retaken (10th). The Russian turning movement on this side was checked, and simultaneously the Japanese held the centre strongly, and set in motion a strong enveloping movement on their left, trying to seize the line of the Sha-ho and threatening the Russian right flank and rear. By the 13th it was clear that the Russian offensive had failed. The left wing was therefore withdrawn on that day, under cover of a cavalry screen, which for 24 hours deceived Kuroki; the centre in its turn retired (14th), Nodzu driving it over the Sha-ho, and on the Russian right a tremendous

struggle was waged around Sha-ho-pau during these two days, accompanied by a heavy deluge of rain on the 14th. On the 15th Oku took Sha-ho-pau and Li-mun-tun. Thus, after a fierce and sanguinary battle lasting five days, the Russians were driven back at every point.

Marshal Oyama reported later on that his forces had buried 13,333 Russian corpses which had been left on the field (5200 in front of the Right, 2530 in front of the Centre, and 5603 in front of the Left Army), had taken 709 prisoners, and captured 45 guns (43 by the Left Army and 2 by the Centre Army), 37 ammunition waggons, and 5474 rifles. Calculating from the number of dead, the total Russian casualties were estimated at about 60,000.

The total Japanese casualties were put by Marshal Oyama at 15,879, including officers, for the period Oct. 10th to 25th.

Fighting did not cease, however. Desultory struggles went on at various points, and a Japanese force got enveloped near Liun-yan-tun, north of Sha-ho-pau (17th), and had to "cut its way through," losing 9 field guns and 5 mountain guns. Then for some time the two armies remained fronting one another from opposite sides of the Sha-ho, the river dividing them, except on the extreme west, where the Japanese line extended to the north bank. Both armies fortified their positions very strongly, and no movement of importance took place in this part of the field of war during the remainder of the year.

On Oct. 24th the Czar relieved the Viceroy, Admiral Alexieff, at his own urgent request, of his position and duties as Commander-in-Chief of the Russian Forces in the Far East, while retaining him in his position as Viceroy, and appointed General Kuropatkin Commander-in-Chief in his stead of all the military and naval forces at the seat of war. General Kuropatkin reorganised his forces, dividing them into three armies, each of four army corps and two rifle brigades, and each numbering 150,000 men. The First Army was put under General Linevitch, the Second Army under General Gripenberg, and the Third Army under General Baron Kaulbars. Of these there were on the Sha-ho only about 250,000, according to the most trustworthy estimates at the end of 1904.

On the other hand, preparations were made in Japan, even before the fall of Port Arthur was announced, to bring up the Japanese forces under Marshal Oyama to 500,000 men, besides heavily reinforcing his artillery.

### **The Siege and Capture of Port Arthur.**

By the beginning of July Kinshan and Hsitaushan, two hills fronting the Russian defences of Port Arthur, had been occupied by the Japanese investing army under General Nogi, which had approached in two bodies, one from Kinchau and the other by the coast road from Dalny. The latter column captured the line of hills fronting the eastern forts on June 26th, and carried the Miao-tsin fort on July 2nd, and Fort No. 16 on July 6th. By the end of the month, after heavy fighting, they had captured a number of very strong positions culminating in Langshan, or Wolf's Hill, about 3 miles north of the harbour, and commanding it with artillery fire. In the three days July 26th to 28th the Japanese lost over 4000 killed and wounded, but the defenders were by these successes

driven in on the permanent defences of the fortress. The effect of this advance was seen in the sortie (described below) of the Russian fleet on Aug. 10th, three days after the Japanese had brought up siege guns to Wolf's Hill. Two important positions on the eastern front—**Takushan** and **Shakushan**—were captured (Aug. 8th), and there also siege guns were mounted, the artillery attack being from this point onwards aided by a **Naval Brigade**. A summons to surrender was then sent in to General Stössel, the Russian commander (Aug. 16th), but the answer was a prompt and emphatic refusal, and a similar refusal met an offer of safe-conduct for the non-combatants. A general assault followed, resulting in failure, except for the capture of the forts east and west of Panlungshan. Reuter's correspondent with the Japanese estimated their losses from Aug. 19th to 24th at 14,000 killed and wounded. The method of approaching by saps and parallels was then employed, and **Fort Kuropatkin** was captured (Sept. 29th), together with 4 forts just south of Suezeying, and other forts on the right wing of the attack. Access by indirect fire to the Russian ships in the harbour was thus gained, and some damage was done to them. On Oct. 25th the Japanese saps having been carried near the counter-scarps of the **Sungshushan**, **Erlungshan**, and **East Keekwanshan** forts, a heavy bombardment by large-calibre siege guns and naval guns was begun, and continued ceaselessly for four days, dismounting or disabling many guns. By sunset on Oct. 30th the crests and glacis of **Sungshushan**, **Erlungshan**, and the north fort of **East Keekwanshan** were occupied, with a fort standing midway between **East Panlungshan** and the north fort of **East Keekwanshan**. In the last-named fort 3 field guns and 2 machine guns were taken. The naval and other heavy guns then bombarded the dock and eastern harbour (Nov. 3rd), causing a great conflagration and sinking steamers there. It was reported (6th) that the **Erlungshan** and **Sungshushan** forts had been completely silenced and that the main attack was being directed against **Itzushan**. The torpedo-boat destroyer **Rastoropni** arrived at Chifu (Nov. 16th), having escaped with despatches from Port Arthur during a snow-storm, and her commander blew up his ship later in the day.

On Nov. 26th a general attack on the centre of the permanent forts, delivered on both sides of the gap through which the railway passes, was commenced. On the west of the gap lies an eminence called **203 Mètre Hill**, which dominates the harbour and dockyard. This was captured on Nov. 30th, though a simultaneous attempt on the **Erlungshan** and **Sungshushan** Forts on the east of the gap failed. The carnage was so great that a suspension of hostilities was agreed to for six hours on Dec. 2nd to deal with the dead and wounded on both sides. The Japanese at once brought up their heavy siege guns to this hill, and on Dec. 3rd began to bombard the harbour with 11-inch shells, which did great execution. Most of the ships there were hit repeatedly, and were reported to have been partially submerged and quite incapacitated (9th). The **Sevastopol** steamed out to the harbour entrance, and was there torpedoed by Admiral Togo's torpedo-boat flotillas, several daring attacks being made between the 12th and the 14th, in the course of which one Japanese torpedo boat was disabled and had to be abandoned.

The north fort of East Keekwanshan on the east ridge was captured on the night of Dec. 18th, 5 field guns, 4 quick-firing guns, and 4 machine guns being taken with the fort; and on Dec. 22nd the Japanese right wing occupied the height north of Hon-san-yung-tau, near Pigeon Bay, and the Pigeon Bay promontory, where a small siege gun was captured. This latter success gave the Japanese possession of all the enemy's advanced positions on the west of the fortress. Further success was not long in coming on the east side also. The formidable Erhlungshan Fort was mined, the tunnels being cut through solid rock, breached by dynamite, and carried by assault (Dec. 28th), the spoils consisting of 4 large-calibre guns, 7 smaller, 30 37-millimetre guns, and 2 machine guns. A similar procedure gave the besiegers possession of the great Sungshushan Fort (31st), 7 guns falling into their hands. Early the next morning (Jan. 1st, 1905) the Japanese centre took H fort, with 3 guns, and subsequently Panlungshan and Wantai Forts. The whole east ridge and great part of the west were thus in General Nogi's possession. His command of the remaining forts and of the town was assured, and the situation of the gallant defenders was seen to be hopeless. The Russians themselves blew up the East Keekwanshan and Q forts (2nd), and destroyed the shipping and the war-vessels in the harbour, though on the night of Jan. 1st 4 destroyers got away to Chifu, where they were disarmed the next day.

On Dec. 31st General Stössel wrote to General Nogi that further resistance was useless under the conditions, and therefore he desired to open negotiations for the evacuation of the fortress. On Jan. 1st General Nogi received this letter, and at once assented to a conference to settle the details. The conditions as to surrender were settled at 4 p.m. on Jan. 2nd. The Japanese Emperor telegraphed that, appreciating the self-sacrifice and devotion of General Stössel and the garrison, he desired that all the honours of war should be extended to them.

The terms of surrender, signed at 9.45 p.m. on Jan. 2nd, 1905, were that the whole fortress, with the batteries, war-ships and other vessels, arms, ammunition, materials, and all Government property, should be transferred to the Japanese, the Itsushan, Antsushan and other forts named being evacuated and transferred by Jan. 3rd noon, as a guarantee. Provision was made for Japanese freedom of action in case of any forts, etc., having been destroyed or injured after the signing of the agreement. Plans of forts, subterranean and submarine mines, lists of military and naval officers, civilians, etc., were required to be delivered to the Japanese commissioners. The whole garrison were to render themselves as prisoners; but, in view of their gallant resistance, the Russian naval and military officers, officials and volunteers were allowed to carry their swords and take with them private property directly necessary for the maintenance of life, and those who signed a written parole not to take arms or act against Japan till the close of the war were permitted to return to Russia, each officer being allowed one servant. The forts were duly transferred (Jan. 3rd), and order was established in the town.

The evacuation of the fortress was completed on Saturday, Jan. 7th. The total number of prisoners was 878 officers and 23,491 men, whereof 441 officers and 229 orderlies gave

their parole. The prisoners included over 6300 naval officers and seamen.

### The Naval Operations.

Despite previous efforts (see p. 622) to seal the entrance to Port Arthur, the cruiser *Novik* with ten destroyers made a sortie (June 14th), and engaged the Japanese torpedo boats and destroyers. At the same time, the Vladivostok cruiser squadron made a raid. Two small Japanese sailing-craft were plundered and sunk (13th), and just outside the Straits of Korea the transport *Izumi Maru* was sunk after the crew and passengers had taken to the boats. The transports *Hitachi Maru* and *Sado Maru*, with troops, horses, and railway plant on board, were also overhauled and torpedoed, with considerable loss of life, the crews refusing to surrender. Admiral Kamimura tried in vain to cut off the Russian squadron, which got back safely to Vladivostok.

The Russian fleet at Port Arthur, consisting of the *Retvisan*, *Cesarevitch*, *Pollava*, *Sevastopol*, *Peresviet*, *Pobieda*, *Bayan*, *Pallada*, *Diana*, *Askold*, and *Novik*, with fourteen destroyers, came out to sea (June 23rd), and, after some manœuvring with the Japanese fleet, returned and anchored outside the harbour. The Japanese destroyers, of course, seized their opportunity, and succeeded in damaging the *Peresviet*, the *Sevastopol*, and the *Diana*. The Russian fleet withdrew into the harbour on the following day.

The Vladivostok ships again emerged, and bombarded Gen-san (June 30th). On this occasion also they were fortunate enough to elude Admiral Kamimura.

The Russian cruisers, with 2 gunboats and 7 destroyers, left Port Arthur and had a brush outside with the Japanese torpedo flotilla (July 9th), and, after some other minor engagements, the whole fleet, except the *Bayan*, finding themselves brought under the Japanese land fire through the capture of Wolf's Hill, attempted to escape, Admiral Vitof commanding till he was killed in the action which followed (Aug. 10th). Admiral Togo was on the watch, however, and a battle ensued, which lasted from about midday till nightfall. Five battleships and the cruiser *Pallada*, with three destroyers, regained the harbour on the 11th, under Rear-Admiral Prince Ukhtomsky. The battleship *Cesarevitch*, the cruiser *Novik*, and 3 torpedo-boat destroyers took refuge in Tsintao, where they were disarmed by the authorities. The torpedo-boat destroyer *Retshitelny* took refuge in Chifu, but was cut out and towed away by Japanese torpedo-boat destroyers, and the cruiser *Askold* and another torpedo-boat destroyer in Shanghai, where they were disarmed, the Czar himself sending orders to that effect to Admiral Reitzenstein (24th). Another torpedo-boat destroyer went on the rocks near Shantung, and was blown up. The *Novik* left Tsintao after having coaled, and made a gallant attempt to reach Vladivostok, but was sunk by Japanese cruisers at Korsakovsk, Sakhalin (Aug. 21st); and the *Diana*, which got away south, was disarmed at Saigon.

Apparently as the result of an attempt at concerted action, the Vladivostok squadron sailed south (Aug. 14th), but was cut off by Admiral Kamimura. The Russian cruiser *Rurik* was sunk, and the other two cruisers fled north again. The Japanese rescued 600 Russians from the *Rurik*.

The Japanese armoured gunboat *Hei-yeu* struck a mine while on guard duty off Pigeon Bay (Sept. 18th) and foundered, nearly 300 men being drowned. The cruiser *Sai Yen* struck a mine (Nov. 30th) and sank, her commander and 39 men going down with her, though consorts saved 191 officers and men.

In the paragraphs relating to Port Arthur above, the inglorious end of the Russian fleet is referred to. Admiral Togo was able, on Dec. 18th, to report that the whole fleet was so damaged as to be unfit for action, while the Russians themselves blew up the wrecks before the surrender of the fortress, a few torpedo-boats only escaping to Chifu. Admiral Togo's ships were thus set free, after their long and arduous, but most successful, blockade. Admirals Togo and Kamimura received a great ovation in Tokio (Dec. 30th), where they went to report to the Emperor.

### III. THE BALTIC FLEET AND THE NORTH SEA OUTRAGE.

Rear-Admiral Rozhdestvensky went on board the *Kniaz Suvaroff* in the Cronstadt roadstead (Aug. 14th), and assumed the command of the Baltic Fleet, which the Russian Government had ordered to be assembled for service in the Far East when it was seen that Japan had established unmistakably her naval superiority. It was only after many months of preparation that the ships of the Fleet were assembled, and, as will be seen, it was only several weeks later that they were able to set sail. After innumerable false starts, they got out into the North Sea (Oct. 20th), and fairly started on their journey to the East. The composition of the Fleet was: 4 1st-class and 3 2nd-class battleships; 2 armoured cruisers; 6 protected cruisers with 7 destroyers, and a number of armed transports, etc. Some of the cruisers did not leave Libau till Nov. 17th, 8 torpedo boats accompanying them.

On the night of Oct. 21st the Fleet were passing down the North Sea, taking a more westerly course than would naturally be followed, and soon after midnight they passed through a Hull fishing fleet, with their trawls down, on the Dogger. The leading ships passed without incident; but searchlights were turned on the fishing boats by those that followed, they were examined by Russian torpedo boats, which approached them for that purpose, and the Fleet then fired on the trawlers. The steam trawler *Crane* was sunk, other boats were injured, two men were killed, and a number were seriously wounded.

Urgent representations were at once made by the British Government to the Russian Government, demanding immediate explanation and reparation; and as a measure of precaution the Home, Channel, and Mediterranean Fleets were ordered to take the necessary steps for mutual support and co-operation (24th). A message from the Czar to King Edward and the British Government was conveyed by Count Lamsdorff to the British Embassy at St. Petersburg (25th). The Czar, having received no news from Admiral Rozhdestvensky, could only attribute the incident to a regrettable misunderstanding; he expressed his sincere regret for the sad loss of life that had occurred, and would take steps to afford complete satisfaction to the sufferers as soon as the circumstances were cleared up.

### The Russian Version.

The Russian fleet arrived at Vigo (26th), and the Admiral reported to the Port Commandant that some of his ships were damaged. His officers also asserted that they had seen two Japanese torpedo boats amongst the trawlers in the North Sea, and fired upon them; and this version found a place in the Admiral's official report to his Government. He went further, declaring that one of the torpedo boats was sunk, and that the warship which the trawlers observed standing by till the morning must have been one of the Japanese torpedo boats, which was not sunk, but only damaged. The Russian ships "did not assist the small steam craft because it suspected them of complicity, in view of their obstinate persistence in cutting the line of advance of the warships. Several of them did not show any lights at all. The others showed them very late."

The Naval Headquarters Staff at St. Petersburg issued the following statement on Dec. 5th:—"According to supplementary information from Admiral Rozhdestvensky concerning the North Sea incident of Oct. 21st, after the *Kniaz Suvaroff* had ceased firing there suddenly appeared on the left of the ironclad division the two searchlights of the cruisers *Dmitri Donskoi* and *Aurora*, lighting up the division. The *Dmitri Donskoi* showed her night signals, whereupon, for fear lest projectiles from the hindmost ships of the division should hit our own vessels, either directly or by ricochet, a general signal to cease fire was made from the ironclad *Kniaz Suvaroff*, and was at once carried out. The whole of the firing lasted less than ten minutes. Communications by wireless telegraph stated that five projectiles had struck the cruiser *Aurora*, some ricocheting and others hitting her direct. Three were 75-millimetre and two 47-millimetre shells. The chaplain was seriously injured, and a petty officer was slightly wounded. The former subsequently succumbed at Tangier."

The Czar proposed (28th) that the affair should be submitted to an International Commission of Inquiry on the basis of The Hague Convention, and the British Government accepted the proposal. The Board of Trade, at the same time, appointed Admiral Sir Cyprian Bridge, G.C.B., and Mr. Butler Aspinall, K.C., as Commissioners to report on the matter as to the amount of damage and the proper compensation. The Commissioners held several sittings in Hull during November, and resumed the inquiry in London on Dec. 19th.

### The Inquest on the Victims.

An inquest on the victims of the outrage was held at Hull, and resulted (Nov. 2nd) in the following verdict: "That George Henry Smith and William Leggett were at about 12.30 a.m. on the 22nd day of October, 1904, while fishing with trawls out in the North Sea, on the Dogger Bank, on board the British steam trawler *Crane*, in company with between 40 and 50 vessels of the Hull fishing fleet, with Board of Trade marks exhibited and regulation lights burning, killed by shots fired, without warning or provocation, from certain Russian war-vessels at a distance of about a quarter of a mile from the said steam trawler *Crane*; and we further say that the bodies of the said George Henry Smith and the said William Leggett were landed at the St. Andrew's Dock,

in the parish of Sculcoates, in the city and county of Kingston-upon-Hull, on the 23rd day of October last." The jury added the following rider: "On this occasion, probably one of the most momentous in the annals of the British Empire, the jury would record their appreciation of the efforts made by the Governments interested to arrive at a decided and satisfactory conclusion of a matter which we feel has, in the history of the world, had no parallel. The jury, at the end of their honourable duties, desire unanimously to convey to the relatives of the deceased the expression of their deepest sympathy, and this sympathy they freely extend to the injured."

#### **Convention as to the Commission of Inquiry.**

The terms of the Convention proposed by Great Britain, and accepted by Russia, regarding the Commission to investigate the North Sea incident, were, after some delay caused by the attitude of the Russian Admiralty, settled as follows on Nov. 25th:—

1. The Commission shall consist of five members: namely, officers of Great Britain, Russia, the United States, and France, the fifth commissioner being selected by agreement between them, or failing agreement by the Emperor of Austria.

2. The Commission shall report on all the circumstances relating to the disaster and to establish the responsibility.

3. The Commission shall have power to settle all questions of procedure.

4. The parties bind themselves to supply the Commission with all necessary information, facilities, etc.

5. The Commission shall meet at Paris as soon as possible after the signature of the Convention.

6. The report of the Commission shall be officially communicated to the respective Governments.

The Convention further provided for the appointment of legal assessors for the contracting parties, the division of the expenses of the Commission equally between the two Governments, and that the decision of a majority of the Commissioners shall be binding on the contracting parties.

The Russian Government gave assurances also that the officers actually implicated in the disaster had been detained when the fleet left Vigo, that if the Inquiry should find other officers to be culpable they should be punished, that full and ample compensation should be paid to the sufferers, and that the fleet had been given instructions which would prevent the recurrence of such incidents, and secure neutral commerce from the risk of inconvenience. Accordingly, on leaving Vigo, Admiral Rozhdestvensky left there 4 officers, including Captain Klado, to be called as witnesses.

#### **The Commission of Inquiry.**

The Commissioners nominated were:—

Great Britain.—Vice-Admiral Sir Lewis Beaumont, K.C.B., K.C.M.G.

Russia.—Vice-Admiral Kaznakoff (though at the end of December Vice-Admiral Dubassoff was appointed to take his place).

France.—Vice-Admiral Fournier.

United States.—Rear-Admiral Davis.

Austria-Hungary.—Admiral Baron von Spaun.

The four Commissioners first named above

met at the Foreign Office, Paris, on Dec. 22nd, and unanimously selected Admiral von Spaun as the fifth Commissioner. M. Soulangue Bodin was appointed **General Secretary**, and Mr. W. Martin **Secretary**. The Commission then adjourned till Jan. 9th, 1905.

The British representatives at the Inquiry include Captain F. Morgan, R.N.; Mr. C. Barclay, M.V.O., Secretary to the British Commissioner; Mr. Hugh O'Beirne, British Agent; Sir Edward Fry, Legal Assessor; and Mr. Cunliffe, Solicitor to the Board of Trade.

#### **Progress of the Baltic Fleet.**

Admiral Rozhdestvensky, with 4 battle-ships arrived at Tangier, whither part of his fleet had preceded him (Nov. 3rd). Some of the fleet then left for Suda Bay (10th). There were unpleasant reports of the conduct of the sailors at Canea, and of the lack of discipline on board the ships. The first division reached Port Said Nov. 24th, and the passage of the Canal was successfully accomplished. Another division went down the west coast of Africa, taking the route round the Cape; while, as is stated above, a third division did not leave Libau till Nov. 17th.

The formation of a Third Fleet was announced as having been determined upon (Dec. 18th).

The two first divisions of the Baltic Fleet were at Madagascar when Port Arthur fell, and it was stated that they had been recalled and the third division stopped in the Mediterranean (Jan. 4th).

#### **IV. RUSSIA AND NEUTRAL SHIPPING.**

During July public attention was drawn very forcibly to the Russian attitude towards neutral shipping and the question of contraband by the seizure of the *Malacca*. On the outbreak of the war in February three British steamships were detained by the Russians at Port Arthur, and a Russian squadron under Admiral Wirenius, acting in the Red Sea and the Mediterranean, stopped a number of British ships, and even seized some of them; but in every case they were allowed to proceed. The neutrality of the Egyptian Government was undoubtedly infringed by the Russian ships at this time. The Vladivostok squadron, in the course of their raids during June and July, went a good deal further. The British s.s. *Allanton* was seized when homeward bound (June 16th), taken to Vladivostok, and condemned by the Prize Court there, mainly on the ground that she had carried contraband on her outward voyage. The Admiralty Council at St. Petersburg, however, afterwards ordered her to be released (Oct. 22nd). The German s.s. *Arabia* was seized (July 22nd) and taken to Vladivostok; her cargo for Japan was confiscated, and she was released early in August. The German s.s. *Thea*, chartered by a Japanese firm, was also sunk by the Russian cruisers (July 24th), and declared a lawful prize; but compensation was granted to her German owners. The Supreme Prize Court at St. Petersburg, on appeal, however, quashed the judgment of the Vladivostok Court as to the *Arabia* and the *Thea*, and so formally recognised the distinction between absolute and conditional contraband, (Dec. 3rd).

The British s.s. *Knight Commander* was sunk (July 24th) by the Russian cruisers, and the

Prize Court declared her a lawful prize. No compensation was granted.

The British s.s. *Calchas* was seized and taken to Vladivostok (July 25th), but on Sept. 13th it was announced that the Prize Court had ordered its release after confiscation of that part of the cargo which was consigned to Japan.

The Russian Volunteer Fleet cruisers *Peterburg* and *Smolensk* passed the Bosphorus and Dardanelles (July 4th to 6th) flying the commercial flag, and soon after commenced operations as warships in the Red Sea. The British s.s. *Crewe Hall* and *Menelaus* were stopped off Jiddah (July 12th), but allowed to proceed after examination.

The P. & O. boat *Malacca* was seized (July 13th) by the *Peterburg*, taken as a prize through the Canal, and only released after strong protests by the British Government. She was carrying ammunition for the British Navy to Singapore and Hong Kong, and secret information was said to have been given to the Russian Government that she was carrying contraband.

The following British ships were also stopped and examined, and then allowed to proceed on the dates named: *Dragoman* (July 15th), *Dalmatia* (July 17th), *Ceylon* (July 18th), *City of Agra*, *Massilia*, and *Comedian* (Aug. 22nd).

The following British ships were seized and afterwards released: *Ardova* (July 25th), *Formosa* (26th).

The German s.s. *Prinz Heinrich* had her Japanese mails seized by the *Smolensk* (July 15th). The German Government at once protested, and they were afterwards sent on by the British s.s. *Persia*. The German s.s. *Scandia* was seized (July 24th) and afterwards released, and the *Holsatia* was similarly treated (27th).

The Russian Government purchased four Hamburg-American liners and a North German Lloyd boat, armed them as cruisers, and sent them out from Libau with sealed orders (July 23rd).

In consequence of these seizures and this interference, Messrs. Alfred Holt & Co. and the P. & O. Co. announced that they would have to restrict temporarily the service to Japan of their shipping companies.

As a result of the renewed activity of the *Smolensk*, which passed out from the Red Sea and stopped and searched a British ship in the neighbourhood of the Cape of Good Hope, and of the urgent representations made as to this by the British Government, the Russian Government requested that British cruisers should be despatched to search for the *Smolensk* and *Peterburg*, and to convey to them the Czar's instructions to cease stopping vessels in search for contraband (Aug. 26th). This was successfully done near Zanzibar (Sept. 6th).

Both the British and the American Governments presented Notes to the Russian Government in August, raising the question of the treatment of neutral shipping. The British Government from the first objected to the extension of the doctrine of contraband of war, under which such articles as coal, cotton, and machinery were classed as unconditionally contraband. They also stated that they would not recognise as valid any decision confirmed by the Prize Courts of last resort which might be inconsistent with well-established principles of international law, and would strenuously support claims for compensation put forward by British subjects whose interests had suffered

in consequence of any such decision. The American Government took the same view as to the distinction between absolute and conditional contraband; and Russia in effect admitted it, and issued fresh instructions to her naval officers.

### Coal for Russian Ships.

In November the question of allowing British shipowners to charter their ships for such purposes as supplying the Russian fleet with coal attracted attention, and the Foreign Office intimated that this was not permissible under the Foreign Enlistment Act, 1870. The German ss. "*Captain W. Menzell*" was detained at Cardiff by warrant of the Foreign Secretary (Dec. 4th), on the ground that she was about to contravene the provisions of that Act by conveying coal to the Russian fleet; but it was stated that a large number of steamers had carried coal in this way during August, September, October, and November.

### Case of the "Caroline."

The Case of the "*Caroline*" was another incident that gave rise to much discussion. On Sept. 23rd, according to the statement publicly made by Messrs. Yarrow & Co., Ltd., Mr. Sinnott, of Paris, and the Hon. James Roche opened negotiations for the purchase of the *Caroline* "for a wealthy American," and gave instructions for her to be fitted up as a yacht. The firm communicated with the Admiralty on Sept. 24th, and received an acknowledgment without comment on Sept. 30th. On Oct. 3rd the *Caroline* was transferred to the purchasers, and she was taken from the Thames on Oct. 6th (an attempt to stop her failing owing to her superior speed), and transferred, as it was stated, to the Russian Government.

## V. THE COST OF THE WAR.

### Russia's Financial Position.

A loan of £32,000,000 at 5 per cent. was obtained from French sources in May, and the Government also issued £15,000,000 of Treasury Bonds. At the end of December it was announced that a German loan of £25,000,000, issued at 95 and bearing interest at  $\frac{4}{2}$  per cent., had been arranged, and that a new French loan of £32,000,000 was about to be issued.

At the end of August it was estimated from official figures published by the Ministry of Finance that Russia's war expenditure amounted to about £156,750 per day, or £1,097,250 per week. The *Times* military correspondent stated (Sept. 15th) that the latest Russian Bank Return at the time of the outbreak of war showed a gold reserve of about £92,000,000, of which £17,750,000 was at call abroad.

M. Dru, of the *Echo de Paris*, estimated the cost of the war up to Nov. 23rd at £47,600,000, basing his figures on official information; and stated that the cost from Nov. 23rd to Feb. 14th, 1905, was estimated at £25,200,000, making the cost for the year ending Feb. 14th, 1905, £72,800,000. The Russian Treasury had in hand for war purposes in November £29,800,000, which would leave a balance unexpended of £4,600,000 to carry forward on Feb. 14th, 1905. The estimated cost for the following 12 months was £60,000,000. On the authority of his official informant, M. Don said the Russian exports from January to

November 1904 were £74,200,000, and the imports £46,800,000, so that "the economic situation was extremely satisfactory."

### Japan's Financial Position.

The foreign trade of the country seemed to be not at all adversely affected by the war, and for the first 8 months of 1904 the total value of the country's foreign commerce was about £1,900,000 in excess of the amount for the same period in 1903, the Government imports in connection with the war not being taken into account in making this comparison. The rice crop and the harvest of other cereals was also a very bountiful one in 1904.

On the outbreak of war the Diet were asked to sanction for the year 1904 an outlay of £57,600,000, of which £16,500,000 was to be obtained by increased taxation, etc., and £41,100,000 by loans, etc. Accordingly two domestic loans and one foreign loan of £10,000,000 each were floated, producing in all, because of the price at which they were subscribed, £28,050,000. Up to the end of July, including the purchase of the two new cruisers, *Nisshin* and *Kasuga*, only £27,000,000 had been spent. The specie reserve in the Bank of Japan stood at the end of August at £11,150,000.

It was calculated at this time that Japan was

spending about £100,000 per day in war expenditure, and that, omitting initial capital outlays, such as that on the two cruisers, the cost of the war up to the end of July—for the first six months, that is—amounted to about £20,000,000. It was decided (Oct. 12th) to raise another internal loan of £8,000,000 at 5 per cent., the price of issue being 92; and when the lists closed on Nov. 7th the subscriptions amounted to no less than £24,200,000.

Addressing the Associated Banks at Tokio (Oct. 5th), Count Okuma warned the country to prepare for a long war. He estimated the cost of it, if it should last for two years more, at from £120,000,000 to £130,000,000. With the existing national debt and the cost of *post-bellum* undertakings, the country's liabilities would then be about £200,000,000, which nevertheless would only represent about £4 per head of the population.

The 1905 Budget was presented to the House of Representatives in Dec. 1904, and the Finance Minister said the estimated war revenue was £78,000,000, including provision of interest on existing loans. He estimated that it would be necessary to borrow only £45,000,000 of this. The ordinary Budget revenue was £22,000,000, showing a total revenue for 1905 of £100,000,000.

## S

**St. Andrews, The Most Rev. George Howard Wilkinson, D.D., Bishop of,** and Primus of the Episcopal Church in Scotland, is the son of George Wilkinson, Oswald House, Durham, and was b. 1833 and ed. at Durham School and Oriel Coll., Oxford. After holding minor appointments he became Vicar of St. Peter's, Eaton Square, '70-'83, was Select Preacher at Oxford '79-'81, and appointed Bishop of Truro '83-'91. In '93 he was appointed Bishop of St. Andrews, Dunkeld and Dunblane, and in 1904 Primus of the Scottish Episcopal Church. He has published several devotional books, "Instructions in the Devotional Life," etc. Pitfour, Glencarse, Perthshire.

**St. Deiniol's Library, Hawarden,** of the foundation of William Ewart Gladstone. The main design of the institution, as declared by the founder, is the promotion of Divine learning in connection with the Church of England. All students, whether clerical or lay, and without restriction of communion or religion, are welcome to the opportunities it offers. The Library, for the sustentation and growth of which provision is made, includes the whole of Mr. Gladstone's personal collection, amounts to more than 35,000 volumes, and has been placed in the building erected to his memory by the nation, and opened Oct. 14th, 1902. In the Hostel attached to it, board and lodging are provided at a cost of 25s. per week. Application for admission should be made to the Warden, the Rev. Gilbert C. Joyce.

**Saint-Saëns, Charles Camille,** composer, organist, and pianist, was b. at Paris, Oct. 9th, 1835. He distinguished himself at the Conservatoire under Benoist, and was ap-

pointed organist of St. Méry, Paris, '53, and of the Madeleine '58-'77. He first appeared in London (as a pianist) in '71; since then his visits have been frequent. He has composed several symphonies, symphonic poems, cantatas, sacred and secular, much chamber music, and many songs. His operas include "Samson et Dalila," first heard at Weimar in '77, and brought to Covent Garden Promenade Concerts, Sept. '93, and "Henri VIII." (Paris '83 and London '98). One of his earliest successes in this country was the quaint "Danse Macabre." He received the Mus. Doc. degree at Cambridge in '94.

### SALVADOR.

Salvador is an independent republic of Central America since the dissolution of the Central American Federation (which included Costa Rica, Guatemala, Honduras, Nicaragua, and Salvador) in 1839. It is bounded on the south by the Pacific and on the north by Guatemala and Honduras, is governed by a President and a Congress of seventy Deputies, elected respectively for four years and one year, by universal suffrage. Education is free and obligatory. The army numbers only 4000 men, but there is a militia of about 25,000. The bulk of the population are engaged in agricultural pursuits. The chief products are coffee, indigo, sugar, rubber, and tobacco. Cotton growing now receives State encouragement. There is some mining done also. Trade is carried on chiefly with the United States, the United Kingdom, France, and Germany.

Area, 7225 sq. m.; pop. 1,006,848, of whom about 75 per cent. are of mixed race and 25 per

cent. Indians. Capital, San Salvador, pop. 60,000. Revenue, 1903, £618,468; expenditure, £616,380; imports, 1903, £617,695; exports, 1903, £1,133,909; external debt, estimated at £726,500, was in '99 taken over by the Salvador Railway Co., Ltd., in consideration of the transfer to it of the railways and other concessions formerly held by the Central American Public Works Co. President, Señor Escalon (assumed office March 1st, 1904).

Chargé d'Affaires in London, Señor Santiago Perez Triana, 21, Devonshire Terrace, Hyde Park.

British Minister (at Guatemala), Chargé d'Affaires, H. W. Harrison, C.M.G.

British Consul, W. E. Coldwell (San Salvador). —Consul-General in Great Britain, Mr. M. J. Kelly, 8, Idol Lane, London, E.C.

Sanderson, Sir Thomas H., Permanent Under-Secretary of State at the Foreign Office was, after gaining a competitive examination, appointed a junior clerk in the Foreign Office in 1859. He was attached to the special mission of Lord Kimberley (then Lord Wodehouse) to Denmark 1863-4, served as private secretary to Lord Stanley, afterwards Earl of Derby, Secretary of State for Foreign Affairs '66-68; assisted the late Lord Tenterden in his duties as H.M.'s Agent at Geneva with reference to the *Alabama* claims, Nov. '71; was again private secretary to Lord Derby from '74 to '78, and to the late Earl Granville, Secretary for Foreign Affairs from April '80 until June '85, was appointed an Assistant Under-Secretary of State for Foreign Affairs April '89, Permanent Under-Secretary of State Jan. '94. Created a C.B. in '80; K.C.M.G. Aug. '87; K.C.B. '93; G.C.B. 1900; I.S.O. 1902.

### SAN DOMINGO.

San Domingo is the republic which occupies the eastern end of the island of Hayti (*q.v.*), and was founded in 1844 after a revolution which overthrew the Spanish rule. Area, 18,045 sq. m.; estimated pop. 650,000. It is divided into six states or provinces, and six maritime districts, and is governed by a President, chosen by an electoral college for a term of four years, and a National Congress of twenty-four members elected for two years. Capital, San Domingo, pop. 20,000. The inhabitants of the island are composed chiefly of mulattoes, and the Spanish language is that which is chiefly spoken. The State religion is Roman Catholic. Education is free and compulsory. There is said to be now some progress, and the country is being opened up by railways. Exports consist of valuable timbers, coffee, tobacco, cocoa, bananas, and sugar. Cotton is now being grown. Mining is largely in the hands of Americans. The customs duties are the main source of revenue.

Revenue, 1900-1, £478,000; expenditure (no returns); foreign debt, about £4,000,000; imports, 1901, £646,635; exports, £1,201,175.

President, C. F. Morales (elected June, 1904). Consul-General in London, M. Miguel Ventura, 17, Coleman Street, E.C.

British Consuls, A. G. Vansittart (Port-au-Prince, Hayti). Vice-Consul, Mr. Gosling (San Domingo).

San Marino is an independent republic in the north-east and under the protection of Italy,

surrounded by Italian territory, and governed by a Great Council of 60 members, two of whom are appointed every six months to act as Regents. Area, 33 sq. miles; pop. 11,002. Exports, wine, cattle, and stone.

British Consul, Major W. P. Chapman, residing at Florence.

Santos Dumont, M., the intrepid young aeronaut, is a Brazilian of means and leisure, whose ambition it is to establish that an air-ship for aerial navigation "is not a mere plaything but a practical invention, capable of being applied in a thoroughly useful fashion." M. Santos Dumont, in the course of his experiments, is said to have spent several thousands of pounds. He made several attempts with different machines to win the Deutsch prize, offered to the first aeronaut who should go to and return from the Eiffel Tower, the Aérostatic Park, in Paris, being the starting-point. The successful attempt was made by the aeronaut in his seventh balloon on Oct. 19th, 1901, and he returned to the starting-point with thirty seconds to spare. At one time the balloon travelled through the air at the rate of thirty miles an hour. In November 1901 the Brazilian Congress voted him £5000 in recognition of his great services to aerostatic science. Chevalier of the Legion of Honour 1904. See AERIAL NAVIGATION.

Satow, Sir Ernest Mason, G.C.M.G., British Minister at Peking, was b. in 1843 and ed. at Mill Hill School and University College, London (B.A. Lond. '61 and Hon. Ph.D. Warburg '77). He was appointed a Student Interpreter in Japan '61, and became Secretary to the British Legation '68, Agent and Consul-General at Bangkok '84, and Minister Resident '85; transferred to Monte Video '88, Minister to Morocco '93, and to Japan '95. In 1900 he was sent as British Minister to Peking, Sir Claude MacDonald taking his place at Tokio. He was promoted to G.C.M.G. on June 26th, 1902. He has collaborated in a Handbook to Japan and a Japanese-English Dictionary. Address: British Legation, Peking.

Savings Banks (Trustee) were founded early in the nineteenth century. Regulated originally by Acts 57 Geo. III., cc. 105 & 130; now by the Act 26-7 Vict., c. 87, and amending Acts, and by regulations framed by the Lords' Commissioners of H.M. Treasury. Funds invested in banks of England and Ireland in names of Commissioners for reduction of the National Debt. In the year 1902 they were 229 in number, with funds amounting in the aggregate to over £60,500,000, including "special investments"—i.e. moneys invested independently of the Government. Very successful in promoting thrift and in fostering habits of saving, especially in large towns and in Scotland, where they were formerly known as National Security Savings Banks. See SESSION, sect. 84, for Savings Banks Act 1904. In '91 a Statutory Committee was appointed to exercise certain limited powers of supervision and control over them, inspecting them periodically and reporting annually to Parliament. This Committee is known as the Trustee Savings Banks Inspection Committee, whose Chairman is Sir Albert K. Rolitt, M.P. Secretary, W. S. Cameron. Offices, 9, Serle Street, W.C.

## SCIENTIFIC PROGRESS, 1904.

## BRITISH ASSOCIATION MEETING, 1904.

Founded at York in 1831, at the suggestion of Sir D. Brewster, for the purpose of stimulating scientific inquiry and for promoting the intercourse of scientific men. The Association meets annually for a session of one week, in some large provincial town, but never in London. An annual volume is issued, containing not only the addresses and abstracts of papers communicated to the several sections, but also reports on the state of science, prepared by committees specially appointed, and often assisted by grants of money for conducting researches.

The 1904 meeting was held at Cambridge, under the presidency of the Right Hon. Arthur James Balfour. The Association had held three previous meetings at Cambridge—in '33, '45, and '62. In 1904 the attendance of members and associates was nearly 2800, a larger attendance than any since '96. Both the Corporation and the University rendered the Association all the assistance possible; and the meeting was in every respect a very successful one.

The address of the President was entitled "Reflections Suggested by the New Theory of Matter." In the course of his closely reasoned address, the President showed that by the new electric theory of atoms matter is not merely explained, but explained away. There is not only a great divergence between the physicist's view of matter and the view of the ordinary man, but the former of these two quite inconsistent views is wholly based on the second. Our knowledge of reality is based upon illusion. Hence there is a certain inevitable incoherence in any general scheme of thought built out of materials provided by natural science alone. Natural science must ever regard knowledge as the product of irrational conditions, for in the last resort it knows no others; yet it must always regard knowledge as rational, or else science itself disappears. The President concluded by saying, "My first desire has been to rouse in those who, like myself, are no specialists in science, the same absorbing interest which I feel in what is surely the most far-reaching speculation about the physical universe which has ever claimed experimental support; and if in so doing I have been tempted to hint my own personal opinion that as natural science grows it leans more, not less, upon an idealistic interpretation of the universe, even those who least agree may be prepared to pardon."

In the Mathematical and Physical Section, the President, Prof. Horace Lamb, LL.D., D.Sc., F.R.S., based his address principally upon the work of a former President of the Section, Sir George Stokes, and the mathematical physics of the middle of the nineteenth century. Among the subjects discussed by this section were "The Meteorology of India," by Sir John Eliot; "The Classification of the Stars according to their Temperature," by Sir Norman Lockyer; and "The National Physical Laboratory," by Dr. Glazebrook.

In the Chemical Section, the President, Prof. Sydney Young, D.Sc., F.R.S., starting from the researches of Hermann Kopp on the molecular volumes and boiling-points of chemical compounds, arrived at the conclusion that, in order to ascertain the normal behaviour of pure

substances under different conditions attention should be given at first to substances of which the molecules show no sign of association in either the gaseous or liquid state.

In the Geological Section, the President, Mr. Aubrey Strahan, M.A., F.R.S., dwelt at length upon the overthrusting and buckling of certain belts of the earth's surface, and particularly upon the disturbances which occurred between the Carboniferous and the Permian Eras. At a later sitting, the President also opened an interesting discussion on the nature and origin of the movements of the earth's crust.

In the Zoological Section, Mr. William Bateson, M.A., F.R.S., President, included in his address on "Heredity" an exposition of the Mendelian method of experiment, and described results of that method. He came to the conclusion that there are no means—education, sanitation, and the rest—by which transmission may be made to deviate from its course. All extraneous means only give or withhold opportunity. An important discussion on the "Evolution of the Horse" was opened by Prof. H. F. Osborn.

In the Geographical Section, the President, Mr. Douglas W. Freshfield, entitled his address "On Mountains and Mankind," and referred to the British Antarctic Expedition and the Mission to Tibet.

In the Economic Science and Statistics Section, Prof. William Smart, M.A., D.Phil., LL.D., made "The Housing of the Poor by Municipalities" the subject of his address. One of the subjects discussed at length was Fiscal Policy; several eminent economists from the Continent took part in this discussion.

In the Engineering Section, the President, the Hon. Charles A. Parsons, M.A., F.R.S., M.Inst.C.E., read an address on the history of inventions, including under the word discoveries in physics, mechanics, chemistry and geology. Among the more important papers read was one by Sir Hanbury Brown on "The Control of the Nile."

In the Anthropological Section, the President, Mr. Henry Balfour, M.A., gave in his address a review of the general line of ethnographical inquiry inaugurated by the late Col. Lane-Fox (General Pitt-Rivers). Among the discussions of the section were one on the Report of the Committee on the present state of Anthropological Teachings, and another on Anthropometric Surveys, with special reference to Physical Deterioration.

In the Physiological Section, the President, Prof. C. S. Sherrington, M.A., D.Sc., M.D., LL.D., F.R.S., gave a long and elaborate address on "The Correlation of Reflexes and the Principle of the Common Path," in which he sought to make an advance on the present teaching concerning the action of nervous centres.

In the Botanical Section, the President, Mr. Francis Darwin, F.R.S., gave an address on "The Perception of the Force of Gravity by Plants." The chairman of the Sub-section Agriculture, Mr. William Somerville, M.A., D.Sc., D.Ec. dealt with some of the subjects which have recently received attention at the hands of scientific investigators, especially abroad, including "Conservation Agents in Farmyard Manure," the "Chemical Fixation of Atmospheric Nitrogen," etc.

In the Educational Science Section, the President, the Bishop of Hereford, expressed his conviction that English education needed the influence of more light and more thought from every quarter, and especially from those who are familiar with scientific methods. The greater part of the address was occupied with practical suggestions. A discussion took place on "The National and Local Provision for the Training of Teachers."

The Association is now divided into eleven sections, distinguished by letters as follows:—A, Mathematics and Physics; B, Chemistry; C, Geology; D, Zoology; E, Geography; F, Economic Science and Statistics; G, Engineering; H, Anthropology; I, Physiology; K, Botany; L, Educational Science. The section of Physiology meets only in those towns where there are laboratories for demonstrations. Each section is governed by a president, vice-presidents, secretaries, and committee.

The Association is to meet in South Africa in August 1905, the members leaving England on July 29th, and reaching home not later than October 20th.

General Secretary, Major P. A. MacMahon. Assistant Secretary, Dr. J. G. Garson. Offices, Burlington House, W.

### ANTHROPOLOGY, 1904.

By far the most interesting discussion in anthropological circles during 1904 related to the alleged physical deterioration of the inhabitants of the British Isles. In order that it may be definitely determined whether the national physique is degenerating, or not, a great body of trustworthy information, systematically collected, is clearly necessary. As statistical conclusions from insufficient data may lead to grave fallacies, it is suggested that a national anthropometric survey should now be undertaken. The British Association Committee on Anthropometric Investigation, under Prof. D. J. Cunningham, has recommended the establishment of a small Anthropometric Bureau under the Privy Council. The Report of the Inter-departmental Committee on the subject of deterioration is encouraging; and Prof. Rudolfo Livi, whose work in connection with the Italian Military Survey is well known, assured the British Association that there was no physical degeneration in Europe generally, and certainly not in Britain. Mrs. Watt-Smyth, who has written a popular work on the subject, advocates systematic observation on school-children. It seems clear that without proper environment for the child, especially an adequate supply of food and air, the national standard of physique must be lowered. The physical characters of a large number of children in Scotland have recently been studied by Mr. Tocher and others. Dr. Beddoe has published a paper on the somatology of 800 boys in training for the Royal Navy, and of a number of boys in reformatories and industrial schools. Comparing London-born boys with others, he finds the former more often dark-eyed and dark-haired than the latter, and also oftener dolichocephalic, or long-headed. Dr. F. C. Shruballs, writing from experience in hospital practice, points out that blondes suffer more than brunettes from rheumatic disorders, but less from tuberculosis, cancer, and nervous affections. Blondes, again, are more liable to disease in childhood, and it is mainly from

this cause that in overcrowded and unhealthy areas there is a preponderance of brunettes. Mr. J. Gray, the secretary of the Anthropometric Committee of the British Association, has proposed certain modifications in the Bertillon system of anthropometric identification, whereby the work is likely to be greatly facilitated.

The Huxley Lecture of the Anthropological Institute was delivered this year by Dr. J. Deniker, of Paris, who discoursed on his favourite subject—the Races of Europe. For many years he has collected anthropological statistics relating to the various nationalities of the whole of Europe, using especially the data obtained by conscription for military service. From these data, derived from the examination of more than 3,000,000 individuals, he has been led to divide the population into six main races, and has represented their distribution on maps. The Northern race is blond, very tall, and long-headed; the Eastern race blond, short, and moderately short-headed; the Mediterranean race dark, very short, and long-headed; the Western race dark, very short, and round-headed; the Littoral or Atlanto-Mediterranean, race very dark, rather tall, and moderately long-headed; and the Adriatic or Dinaric race dark, tall, and short-headed. It will be seen that northern Europe is mainly blond, southern Europe dark, and central Europe intermediate. The two extremes are presented by Sweden and South Italy. Dr. Deniker's discourse has been published by the Institute.

A so-called palæolithic floor was discovered on the Cornish coast, near Penzance, by Mr. and Mrs. Clement Reid. In a raised beach on a rocky platform at Prah Sands there are certain black seams full of small fragments of bone and charcoal, collected especially around large flat stones supposed to have been ancient hearths. With these evidences of human occupation are associated fragments of vein-quartz, some of which are believed to have been worked. The discovery was brought before the Geological Society.

What has been regarded as a palæolithic human skeleton was found beneath a floor of stalagmite in Gough's Cavern, near Cheddar, and described by Mr. H. N. Davies. The great antiquity of the relics has, however, been doubted by competent authorities. An excellent popular work on prehistoric archaeology was written by Dr. Bertram Windle, under the title of "Remains of the Prehistoric Age in England." The British Museum authorities issued a Guide-book to the Antiquities of the Bronze Age which are exhibited in the department of prehistoric antiquities at Bloomsbury. This admirable work, amply illustrated, was prepared under the direction of Mr. C. H. Read, the keeper of those antiquities, and forms a companion to the Stone Age Guide, published in 1902.

Dr. Arthur Evans has drawn up a scheme for the approximate chronology of prehistoric culture in Crete, from the Neolithic to the Early Iron Age, thus extending over a prolonged period which he proposes to call, after Minos, the Minoan Era. This era is divisible into three periods—early, middle, and late; and each of these is in turn divisible into three sub-periods. The so-called Mycenaean period is late Minoan.

The University of Cambridge is publishing

a series of volumes descriptive of the results obtained by the anthropological expedition which it fitted out some time ago for the purpose of investigating the islands in **Torres Straits**. A valuable volume dealing with the sociology, magic and religion of the Western Islanders was written chiefly by Dr. Haddon, the leader of the expedition, and by Dr. Rivers and Mr. Seligman, who accompanied him.

Prof. Baldwin Spencer and Mr. Gillen added to the reputation they had already achieved in the study of Australian ethnology by the publication of a volume on the **Northern Tribes of Central Australia**. Dr. A. W. Howitt, well known for his intimate study of the Australian marriage customs and totem-system, wrote on **Group-marriage in Australian Tribes**; and jointly with Mr. Siebert he contributed to the Anthropological Institute a paper on the **Legends of certain Tribes in Central Australia**. The Institute also published during the year several other valuable papers on ethnology, including a report on the **Siciati of British Columbia**, a coast division of the Salish stock, by Mr. C. H. Tout; some notes by Mr. Latham on the **physical characteristics of the Araucanos**, a race in Chile which is increasing rather than diminishing in population; some anthropological studies by Mr. C. W. Hobley in **Kavirondo and Nandi**, in British East Africa; a paper by Mr. H. R. Tate on the **Kikuyu and Kamba tribes**, also in the East African Protectorate; and some observations by Capt. Cummins on the sub-tribes of the **Bahr-el-Ghazal Dinkas**. Mention should also be made of Mr. J. F. Cunningham's work on the peoples of Uganda; of Mr. C. Partridge's on the **Cross River Natives in Southern Nigeria**; and especially of Dr. Howitt's important volume on the **Native Races of S.E. Australia**.

For *Societies* see p. 644.

### ASTRONOMY, 1904.

The spot activity of the sun has increased almost uniformly, there being no outburst of special importance. M. Jannsen has published an excellent atlas of the sun, containing 30 plates, each 21 in. by 18 in. on a scale of about 4 ft. for the solar diameter, sufficient to show minute detail of the surface. These are from photographs taken at Meudon. A different and new method of showing the sun's surface is given in the "Yerkes Publications," vol. iii. In this case a spectro-heliograph is used and the negative is obtained from the calcium lines only. The essentially granulated structure of the calcium ( $\kappa$ ) flocculi, and the discovery of dark calcium flocculi being amongst the chief features. But of the many solar phenomena that which has come most prominently forward during the year is the connection between sun-spots and magnetic storms. Some four years ago the Rev. W. Sidgreaves discussed a large number of observations, and came to the conclusion that there was a real connection between the two phenomena, but that the spots did not cause the magnetic disturbances, nor, indeed, was the disturbing cause within the sun. Mr. Ellis, of the Greenwich Observatory, also made a study of the phenomena, and not only established a connection between sun-spots and magnetic disturbances, but also with Auroræ. Other astronomers worked at the subject, and the outcome was the conclusion that mag-

netic storms reached their greatest intensity about 45 hours after the spot had crossed the central meridian of the sun. Mr. Maunder, of the Greenwich Observatory, also has discussed the subject in two papers. In the earlier paper he proved that the nineteen greatest storms of the period 1874 to 1903 synchronised in every case with a great sun-spot. In the recent paper read before the Royal Astronomical Society in November he dealt with 276 magnetic disturbances in which the movement of the magnet exceeded 20' in declination. These extended over the period 1882 to 1903, and a most important fact has come from his method of treating the observations—viz., that the magnetic storms follow according to the rotation period of the sun. Not only is the mean rotation period brought out, but the different periods given by the various latitudes from the Equator to 30°, i.e., the latitudes richest in sun-spots. This relation demonstrates that the exciting cause of our magnetic disturbances lies in the sun, that it is situated in definite restricted areas of its surface, lying within the sun-spot zones, and that the influence proceeding from those areas, whatever its nature, does not radiate equally in all directions, but along narrow stream-lines. These stream-lines are not necessarily truly radial to the sun, and, on the hypothesis of a circular section, have a mean diameter of 20°. The stream-lines from many spot-groups, therefore, must necessarily miss our planet altogether. On the other hand, there is evidence that many of these solar areas may continue to be magnetically active long after the spots developed in that region have disappeared. Here is an undoubted advance both in our knowledge gained and in the method of attack. Sir W. Ramsay and others have suggested that the sun gives out electrons which find a resting-place in the upper regions of our atmosphere, and that when the earth is in a magnetic condition the electrons are drawn towards the earth and so form the illuminated streams making up Aurora.

Two sets of **Lunar Photos** have been issued: (1) those taken with the 40-in. Yerkes refractor, using a yellow screen; (2) those forming the seventh section of Lowy and Puiseux' great Lunar Atlas. Both are splendid works. The theory of the moon's motion has been greatly advanced by Messrs. Brown and Cowell. During the opposition of Jupiter in 1901 and 1902 Mr. Cookson, when at the Cape Observatory, made a considerable number of measures of the satellites of Jupiter. His results, published in the *Monthly Notices* this year, give 1047'67 as the reciprocal of Jupiter's mass. Mr. Denning has come to the conclusion that the period of rotation of the Great Red Spot is variable, the period steadily increasing from 1894 to 1899 and then decreasing. The mean rotation period he gives as 9h. 55m. 18'7s. In 1899 a faint object found on a photographic plate, exposed on Saturn by Prof. W. H. Pickering, was declared to be a ninth satellite to Saturn. No confirmation was forthcoming until the spring of this year, when it was observed both photographically and visually. The motion is retrograde in a period of 443 days at a mean distance of 6,960,000 miles from Saturn. It has been given the name Phœbe, and is, if we accept nebulae, the faintest observed object in the universe. The fifth satellite of Jupiter is 13 mag., while the magni-

tude given for Phœbe is 16.7. The two satellites have the same diameter—about 120 miles.

The comets due to return in 1904 were D'Arrest, discovered 1851, period  $6\frac{1}{2}$  years, last observed in 1897; Winnecke, discovered by Pons 1819, last observed 1898, period  $5\frac{1}{2}$  years; Tempel, 1873, period  $5\frac{1}{2}$  years, last observed 1899; and Encke, period  $3\frac{1}{2}$  years, last observed 1901. Encke was discovered on a photograph taken at Heidelberg on Sept. 11th, after  $3\frac{1}{2}$  hours' exposure. Tempel was discovered on Nov. 30th, at Nice. A new comet was discovered on April 16th by Mr. Brooks (his 24th), and another was discovered by Jacobini at Nice, on Dec. 17th.

Preparations were made at Greenwich to observe the November Leonids; fog and cloud interfered, except Nov. 14th-15th. On this night the counts by three observers were: From midnight to 3 $\frac{1}{2}$ h., 62 meteors; from 3 $\frac{1}{2}$ h. to 4h., 52; from 4h. to 4 $\frac{1}{2}$ h., 78; from 4 $\frac{1}{2}$ h. to 5h., 65; from 5h. to 5 $\frac{1}{2}$ h., 58; and from 5 $\frac{1}{2}$ h. to 6 $\frac{1}{2}$ h., only 22. Altogether 337 meteors.

It is 17 years since work was begun on the *Astrographic Catalogue*, and the results are now beginning to appear. Three volumes have been issued from Potsdam, one each from the Vatican and Helsingfors Observatories, and one from Greenwich.

The obituary includes Dr. Isaac Roberts, Capt. Noble, Dr. F. McClean.

The Honours List includes a knighthood for Mr. Christie, the Astronomer Royal.

Among future events are the following: *Aldebaran* will be occulted by the moon, May 6th, 5h. 28m. (even.); Sept. 20th, 8h. 24m. (morn.); Nov. 13th, 6h. 35m. (even.); Dec. 11th, 2h. 52m. (morn.). Total solar eclipse, Aug. 30th, visible in Spain.

**Books of Reference.**—"Astronomy for Everybody" (Newcomb), 7s. 6d.; "Astronomy without a Telescope" (Mauder), 5s.; "Problems in Astro-physics" (Clerke), 20s.; "General Astronomy" (Young); and for current literature *The Observatory*; *Monthly Notices of the R.A.S.*; *Popular Astronomy* (American); *Astronomische Nachrichten* (Continental).

For Societies, see p. 664.

## BIOLOGY, 1904.

The physiological action of radium continues to receive attention. Dr. Alan B. Green has subjected various species of micro-organisms to the influence of the emanations of radium. It was found that a marked germicidal effect was exerted on the specific and extraneous micro-organisms of vaccine. The specific germ of the latter lost its potency after some ten hours' exposure, the vitality of the vaccine being tested by inoculations on calves. Interesting results were obtained with induced radio-activity, and photographs of micro-organisms possessing this quality have been obtained through a double layer of lead foil. It should, however, be mentioned that S. C. Prescott, of the Biological Laboratories, Massachusetts Institute of Technology, as the result of experiments to determine the possible effect of a brief exposure to radium rays of the diphtheria bacillus (*B. diphtheria*), the intestinal bacillus (*B. coli*), and the yeast organism, is unable to ascribe a germicidal action on the life or growth of these micro-organisms.

The investigation of sleeping sickness is being actively pursued. Confirmation of the

particular agency of infection (see ed. 1904) has been forthcoming. It appears that the efforts of observers are now being directed to the attempt to discover a means of eliminating the "trypanosomes" from the blood and tissues of the infected subject in the early stages, and before the onset of grave disturbance to the nervous centres. The British Government has been advised to adopt such preventive measures as may be practicable for protecting a non-infected area, where the carrier fly is found, from the incursion of emigrants from the infected areas. (Consult reports of the Sleeping Sickness Commission; reports of the Liverpool School of Tropical Medicine.)

The second portion of the report on the pearl fisheries of Ceylon has been issued, under the editorship of Prof. Herdman, F.R.S. At the British Association, Dr. J. A. Murray, of the Imperial Cancer Research Fund, read an important paper on the biological significance of certain aspects of the general pathology of cancer. Working zoologists were advised to be watchful for malignant new growths in the lower animals. An announcement by a French observer, Dr. Doyen, of new results in connection with the cancer problem, permit of no more in its present stage than mere allusion. Considerable discussion took place here, as elsewhere, on the evolutionary problems concerned in what is called *Mendelism* (consult "Mendel's Principles of Heredity," 1902). According to Mr. Bateson, President of the section of Zoology, by the Mendelian hypothesis alone is it possible to draw together the vast array of facts relating to heredity. Prof. Karl Pearson is one of the critics of the Mendelian school of research.

Prof. Koch's assertion (1901) of the dissimilar characters of human and bovine tuberculosis was met by the pronouncement of the *Royal Commission* (Interim Report, June 1st) that inquiries "show quite clearly that it would be most unwise to frame or modify legislative measures in accordance with the view that human and bovine tubercle bacilli are specifically different from each other, and that the disease caused by the one is a wholly different thing from the disease caused by the other."

*Nature-study*, in its varied aspects, continues to influence (and vex) the thoughts of educationists. At the Royal Botanic Gardens, Sir G. Kekewich gave an address on "Nature-study and its Cognate Educational Subjects." The sixth International Congress of Zoology was held at Berne, under the presidency of Prof. Studer. The next Congress (1907) will take place at Boston, U.S.A.

An allocation of £20,000 to establish the *Percy Sladen Memorial Fund*, to assist research in natural science, more specially in zoology, geology, and anthropology, will doubtless materially aid many departments of biology. (Office, Linnæan Society.)

An *Association of Economic Biologists* has been founded to promote and advance the economic side of biological science. Membership (ladies are eligible) is confined to workers in economic biology (Hon. Sec., W. E. Collinge, University, Birmingham).

It is useful to place on record here the outcome of researches and actual experiments carried on by M. Variot for more than a decade on the *assimilative value* to infants of cows' milk sterilised at 108° C. (*Comptes Rendus*, 1904). At the temperature and under the condition

cited the full nutritive value of milk to the child is preserved. Moreover, it is as beneficial as pasteurised milk at  $80^{\circ}$  C., or milk heated to  $100^{\circ}$  C. by ordinary means.

Reference is made in the article **Physics and Chemistry** to Meldola's new work on the "**Synthesis of Vital Products.**" Whatever may legitimately lie in front of biochemistry, this author's view is optimistic, since he holds that present achievements in the domain of chemical synthesis furnish no warrant for the belief that the chemical processes of the living organism are in any sense "transcendental," or that they must be regarded as belonging to a class of special material transformations which human science will never be able to reproduce.

The annual **Croonian Lecture of the Royal Society** was delivered by W. M. Bayliss, F.R.S., and E. H. Starling, F.R.S., on "The Chemical Regulation of the Secretory Process." The Society's gold **Royal medal** was awarded to Col. D. Bruce, R.A.M.C., for his researches on the causation of sleeping sickness and other tropical diseases (see ed. 1904).

For Societies see p. 644.

## CHEMISTRY AND PHYSICS, 1904.

The genesis of radium in the cosmos is as yet an unwrested secret. Its high significance has, however, in no wise diminished. The chemist and the electrician acknowledge it to be a finger-post on the cross-roads of discovery. The physician cherishes hopes that he may find in the action of some of its rays a fresh ameliorative agent for his beneficent purposes. The geologist realises that its existence opens up new speculations concerning the age of the earth. For their time limits, remarks Prof. Joly, geologists must now take what interval rates of denudation afford, whether measured by sedimentation processes or solvent denudation. Of the three types of radium rays, the third, or unelectrified and penetrating "gamma" rays, were lately held to warrant increased attention from their special heating effect (Paschen), but Rutherford and Barnes dissent.

As regards study of the property of radio-activity, much work is going forward in the various aspects of inquiry. E. F. Burton (Toronto) has obtained a highly radiative gas from fresh crude petroleum. The phenomenon as observed in natural waters has received particular investigation. The Hon. R. J. Strutt examined the red deposit left by the water of the King's Spring, at Bath, and found it to be conspicuously radio-active, the emanation being identical with that derived from the presence of radium salts. This discovery is the more interesting since Lord Rayleigh had previously shown that helium is a constituent of the gases which bubble forth from the spring waters (*Proc. Roy. Soc.*, No. 491). Sir W. Ramsay and Mr. Soddy have made further experiments on the production of helium from radium, with the view of ascertaining the volume of emanation produced in a given time from a known weight of radium in the form of bromide, and also the quantity of helium resulting from the spontaneous change of the emanation. According to them, there are now direct experimental reasons for believing that the greater part of the energy of disintegration appears in the form of kinetic energy of a radiation; that the

emanation is a monatomic gas, whose density has a value of about 80 and atomic weight of 160. Further, the average life of the radium atom is given as 1050 years.

Attempts to map the spectrum of the radium emanation, made by Sir W. R. and Prof. J. N. Collie, have met with only partial success. The following comments by these authors may be recorded for reference: "Sufficient evidence has now been accumulated that radium is an element, accepting that word in the usual sense. It is true that it is only a transient element, and ought in justice to be called a compound,—but of what? Now, it appears advisable to devise a name which should recall its source, and at the same time, by its termination, express the radical difference which undoubtedly exists between it and other elements." Hence Sir W. Ramsay suggests the name **extradio**. The experimental work that is in progress at the Cavendish Laboratory, Cambridge, with the object of elucidating still further the character of the apparent universality of radio-activity, promises to yield results of supreme interest, and these possibly will be achieved at no distant date. But the full import of the revision of existing views of the constitution of matter that must ensue from the new insight and scrutiny into natural operations, no one can as yet foreshow. The mystery of radium remains untouched, says Lord Kelvin (*Phil. Mag.*, Feb. 1904). To him it seems absolutely certain that, if emission of heat at the rate of 90 calories per gramme per hour found by Curie at ordinary temperatures, or even at the lower rate of 38 found by Dewar and Curie from a specimen of radium at the temperature of liquid oxygen, can go on month after month, energy must somehow be applied from without to give the energy of the heat which gets into the material of the calorimetric apparatus.

A distinctive historical and general literature on radium is now available. Consult "Radio-Activity" (Rutherford); "Radio-Activity" (Soddy); "The Becquerel Rays and the Properties of Radium" (Strutt); also the notable little treatise by Madame Curie, "Untersuchungen über die Radioaktiven Substanzen."

A series of articles and papers on chemical subjects, viewed in the light of modern discovery, by Prof. Mendeléeff, the celebrated Russian chemist, attracted much notice. One contribution, "An Attempt at a Chemical Conception of the Universal Ether," has been translated into English (Longmans), though in a somewhat abridged form. Lord Rayleigh undertook re-weighings of nitrous oxide, M. Leduc having placed the density appreciably higher. Purifying the nitrous oxide with the aid of liquid air, Lord Rayleigh reaffirms his former result. German enterprise is responsible for the production of metallic calcium in commercial quantities in the form of rods of white metal. The melting-point is in the neighbourhood of  $760^{\circ}$  C. Dr. Guillaume's new nickel-steel alloy, **invar**, promises applications of first-rate importance for instruments of precision; also for timepieces and chronometers. Analytical chemists may perhaps find some useful data relating to the vexed subject, What is brandy? in a report presented to the French Minister of Commerce. Consult *Moniteur Officiel du Commerce* (June 30th).

Sir James Dewar contributed an important paper on the absorption and thermal evolution

of gases occluded in charcoal at low temperatures. The gas helium resembled the other gases under observation in showing increased absorption at liquid-air temperature; but the absolute amount occluded per unit volume of charcoal was about one-tenth that of the other gases at the same temperature. He will now undertake measurements at the temperature of liquid hydrogen. He thinks charcoal at the boiling-point of hydrogen will become an efficient condensing agent for helium, and this property will have important applications in future research. The publication of Prof. Meldola's "Chemical Synthesis of Vital Products, and the Inter-relations between Organic Compounds," should be chronicled. The wonderful achievements of synthetical chemistry are set forth in this work. It may not be a day-dream (says Prof. McKendrick) if we contemplate the time when even the starches, fats, and proteids we use in our food may be artificially formed. See art. *Biology*, *supra*.

Prof. Blondlot, of Nancy, furnished the French Academy of Sciences with some further notes regarding his discovery of "n-rays." We may recall that these were denoted in the course of researches on the Röntgen rays, and referred to a supposed novel series of radiations whose properties comprised ability to pass through aluminium, wood, and other substances, and the brightening of an electric spark, while being non-fluorescent and without photographic action. A controversy has arisen as to whether the rays have objective reality at all. English scientists are sceptical, and discussion at the meeting of the British Association emphasised this attitude. Later, in the columns of *Nature* (September), Prof. R. W. Wood announced his "firm conviction" that the few experimenters who have obtained positive results have been in some way deluded. He discussed the subject further in the *Physikalische Zeitschrift* (December). French confidence was, however, lately evinced in the award of the *prix Leconte*, of 50,000 francs, by the Academy of Sciences to Prof. Blondlot for this particular discovery.

The "Sir Humphry Davy" medal of the Royal Society for the most important discovery in chemistry was awarded to Prof. W. H. Perkin, jun., F.R.S., for his researches on the synthesis of organic substances. The Bakerian lecture of the Society was delivered by Prof. Ernest Rutherford, of McGill University, Montreal, on "The Succession of Changes in Radio-active Bodies." In the autumn the Professor was further honoured by being made the recipient of the "Rumford" medal of the same institution, on account of his investigations on the properties of radio-active matter, in particular for

his discovery of the active gaseous emanations emitted by such matter and his researches on their transformations. Canada and the mother-country were happily linked in the work of radium inquiry by this award. The Nobel Prizes in Physics and Chemistry were awarded to Lord Rayleigh and Sir W. Ramsay respectively. In July 1905 a Chemical Congress will be held at Liège in connection with the forthcoming International Exhibition in that city. (Secretary, M. J. Raymond, Liège.)—Consult *Journal of the Chemical Society*, *Journal of the Society of Chemical Industry*, *Nature*, and *Proceedings of the Royal Society*. For Societies see p.

For Societies see p. 644.

ELECTRICAL PROGRESS, 1904.

During 1904 electricity made a steady progress in all its branches. In England the general trade depression and lack of funds does not appear to have caused any corresponding diminution in the increasing demand for electricity as a motive power for the operation of tramways, short-distance trains on railway lines, factories and workshops, and for all those purposes where experience has now shown that vast economies over the old methods can be made. In fact, the very necessity of more economy has stimulated the conversion to electrical methods. Manufacturers of electrical and other machinery are, however, in need of a still larger demand for their wares; but this is due to over-production (as in Germany a few years ago) rather than to any decline in demand. From four to five years ago the public very suddenly realised the solid advantages of electricity, and manufacturers were not in a position to adequately cope with the huge demand for electrical machinery. All the supply companies and municipalities were placing large orders for larger engines and dynamos than had yet been made in England, and workshops were found to be insufficiently equipped with suitable tools and accommodation. Consequently capital was raised, schemes prepared, lands purchased, and large and splendidly equipped shops have sprung up all over the country. Unfortunately, these came too late, and it is now difficult to get orders to keep all the shops fully and economically employed. This state of affairs, however, appears to be only temporary, as the demand for large units still exists, and is steadily increasing.

The following table gives the number and state of progress of the English Provisional Orders granted, up to and including 1904:—

	Local Authorities.		Companies.		Total.	
	Orders.	Under-takings.	Orders.	Under-takings.	Orders.	Under-takings.
Works in operation . . . . .	266	239	101	122	457	361
Works in course of construction . . . . .	104	93	28	27	132	125
Works not yet decided upon . . . . .	107	—	14	—	121	—
Total . . . . .	477	337	233	149	710	486

The total capital expenditure on electricity supply undertakings up to and including 1904 was approximately as follows:—

	Municipalities.	Companies.	Total.
General Supply.	£ 32,000,000	£ 27,000,000	£ 59,000,000
Traction.	27,000,000	79,000,000	106,000,000
Totals .	59,000,000	106,000,000	165,000,000

During 1904, 15 municipal undertakings and 7 companies opened electricity works for supply.

#### Power Companies.

There are 26 "Power Companies" in the United Kingdom, which have obtained Acts conveying powers to supply electricity over large areas, and to sell in bulk to local authorities, local distributing companies, or certain railway companies: notably Edmonton (in operation), Finchley, Hendon, and Wood Green (in operation) by the North Metropolitan Co.; the Urban District Councils of Stanley, Leadgate, Annfield Plain, Consett, and Benfieldside by the Cleveland and Durham County Co.; the Corporation of Ilkeston (in operation) for tramways and town lighting; general supply to the Corporation of Newark and the Nottingham & Derbyshire Tramways Co. by the Derbyshire & Nottingham Power Co.; and the North-Eastern Railway Co. by the Newcastle-on-Tyne Power Co., which latter company are also supplying several small areas in bulk. Of the 26 Power Companies who have obtained powers, 8 have exercised them and are in operation, and most of the remaining ones are taking active steps to get under way in as short a time as possible. As the areas of supply practically cover most of the important dis-

tricts in the kingdom, it is confidently anticipated that small local authorities will take a supply in bulk from these companies rather than exercise their powers and erect small generating stations—as, bearing in mind the fact that the cost of generating from these large central stations will be very low in comparison with the cost of generating in small isolated stations, the local authorities will probably be able to sell cheaper when buying in bulk than with their own generating stations.

#### Electrical Applications, 1905.

As regards new business, the following is a summary of Electrical Applications presented to Parliament for the 1905 Session:—

	Local Authorities.	Companies.	Total.
Electric Lighting Provisional Orders .	30	33	63
Electric Lighting and Power Bills . . .	10	11	21
Tramway Provisional Orders . . .	10	5	15
Tramway Bills . . .	15	15	30
Electric Railway Bills . . .	—	9	9
Light Railway Provisional Orders .	2	9	11
	67	82	149

#### Electric Traction.

The *Electrical Times* published some interesting statistics showing the progress of electric traction in connection with Tramways and Light Railways, the following being an excerpt therefrom:—

Name of Country.	1894.			1904.		
	Miles of Route.	No. of Cars.	K.W. capacity of Power Station.	Miles of Route.	No. of Cars.	K.W. capacity of Power Station.
Great Britain . . .	70	3,000	120	5,500*	7,500	120,000
Germany . . .	164	350	3,000	4,000*	10,000	150,000
United States . . .	9,000	25,000	—	30,000	61,000	—

\* Estimated.

The first Electric Railway was opened on May 31st, 1879, at the Berlin Exhibition, and only 2 per cent. of the existing tramways in Germany now are not operated electrically.

It is interesting to note that the *Electrification of the Metropolitan and District Railway Companies'* lines will require power-houses of a combined capacity of 100,000 K.W., or nearly equal to that required to operate all the electric tramways at present existing in the United Kingdom. See LONDON ELECTRIC LINES, p. 358.

#### The "Third Rail" System.

Fatal accidents occurred during the year on both North-Eastern and Lancashire and Yorkshire lines, owing to accidental contact with the "third rail," and it is seriously being con-

sidered that in future surface-line electrification schemes the use of this third rail will have to be abandoned. In ordinary positions it is a nuisance and a source of danger, but at complicated crossings and junctions it becomes practically impossible. On most main-line systems this rail must of necessity be kept alive day and night, and the consequent precautions necessary to ensure the safety of the plate-layers will considerably increase the time and cost of the work. The use of the third rail instead of a trolley wire as used by tramways (where comparatively only small currents have to be collected), is rendered necessary by the practical impossibility of constructing high-pressure continuous-current motors (*i.e.* with a view of decreasing the current—the power being the product of the current and the pressure); and it is now almost the universal

opinion that the only practical solution of the main-line electrification problem is the direct use of single-phase alternating-current motors on the trains. By this means current, at almost any pressure, can be transmitted to the train by an ordinary trolley and trolley-wire, and transformed on board to the requisite pressure for the motors—this transformation on board being impracticable with continuous current. The losses in distribution with the single-phase system are from 15 to 20 per cent. less than with any other system, with a corresponding reduction in the capital spent on plant. Without alteration to the motors the pressure on the trolley-wire can be reduced to safe limits in congested districts, and, if necessary, by means of simple switching arrangements, the same motors can be operated with continuous current. In fact, the practicability of this system is certain, and it only waits for the capital bold enough to make the experiment.

Interesting experiments have been concluded in Germany with regard to high speeds on rail-

ways. Three experimental runs were made on the permanent way from Zossen to Marienfelde (which was entirely relaid for the purpose) with increasing speeds up to 210 kilometres (130 miles) per hour. High-pressure 3-phase alternating-current locomotives were employed for the purpose, the current being collected from three overhead trolley-wires. The air-resistance was found to be of chief importance, the collector had to be modified to avoid jumping and vibration at high speeds, and high speeds on curves were found to be impossible.

### Street Lighting.

The following report of Mr. J. W. Bradley, C.E., the City Engineer of Westminster, as showing the comparative cost of Street Lighting by the various methods in vogue, is interesting and valuable, more especially so as it comes from an impartial judge of very wide experience. It will be seen that Electric Arcs work out to be the cheapest, light for light :—

### CITY OF WESTMINSTER.

#### City Engineer's Department—Testing Branch.

Tests of Street Lamps (Gas and Electric), with Statement of Comparative Costs extending over a period of 18 months.

Description and Position of Lamps.	No. of Lamps in City of class specified.	Average candle power.	Total cost per Lamp per annum.	Average total cost per candle power per annum, including all Tests up to date (6 series).	Total No. of Tests up to date.
Electric Arcs (Charing Cross and Strand Electric Light Co.), Opalescent Globes	100	670	£ s. d. 30 0 0	d. 11'49	40
Electric Arcs (St. James and Pall Mall Electric Light Co.), Muranese Globes.	60	474	34 0 0	15'1	43
Electric Arcs (Westminster Electric Supply Corporation), Opalescent Globes	945	605	22 0 0	8'7	35
Refuge Lanterns, four Mantles, Victoria Street	12	113	13 6 6	30'7*	24
Sugg's High-pressure Lamps, Parliament Street	29	573	18 5 0	9'85	35
Incandescent Mantles, Victoria Street type	1241	42	3 10 0	18'42	40
Triple Flat-flame, footway, Whitehall, now in process of removal, Scott-Snell Lamps being substituted	35	51	6 1 2	25'65	33
Incandescent Mantles, Carlton House Terrace type	251	38	2 17 11	18'18*	27
Triple Flat-flame, Strand type	508	47	9 8 10	47'44*	30

\* Average of 5 series only.

All tests were carried out under precisely similar conditions, so that it would be manifestly unfair to accept one set of results and reject the rest. The Sugg photometer, which was used in making these observations, is fitted with 2- and 5-candle standards for testing low- and high-power lamps respectively, and will, from its construction, give results in all cases, if anything, slightly higher than the true values, which error is practically constant for all the types of lamp tested, thus making the comparison of the various lamps approximately accurate. Further, precautions were

duly taken during each test to guard against the effect of extraneous light, reflection from buildings, obstruction by any opaque object, such as glazing bars; and the tests were only carried out on clear nights. In the case of incandescent mantles, including high-pressure lamps, great variations in candle-power were found to be due to the condition of the mantles. What appeared to the naked eye as a slight diminution in intensity resulted in an enormous loss of candle-power; and this circumstance rendered it difficult to form any comparison between tests carried out in a

laboratory and those made under actual lighting conditions.

#### Progress in France.

In France, speaking generally, the progress of Electricity supply has been steady, and in all there are about 1200 places where an Electricity supply is given. Many small places have gone straight from oil to Electricity, and the system of grouping small villages together on one supply station is used extensively, bare high-tension wires being carried on poles across country for the purpose.

Among the larger concerns may be mentioned the *Société Méridionale*, which has a water-power station supplying the whole department of Aude and transmitting at 20,000 volts, 3-phase alternating. In the *Isère* there are several water-power stations supplying factories, etc., round Grenoble, Voiron, Rives and Vienne, transmitting at 25,000 and 36,000 volts, 3-phase alternating. The *Société des Forces Motrices de l'Auvergne* supplying in Thiers and Clermont Ferrand from the Miodeix Falls. On the south coast there are several single-phase high-tension transmission schemes in operation chiefly supplying hotels and houses.

#### Progress in Germany.

In 1904 there were 959 stations in operation, 7,000,000 8-candle-power incandescent lamps connected, 93,000 10-ampère arc lamps, and an aggregate of 219,000 horse-power of electric motors in operation. Of the 959 stations 359 were of a capacity less than 100 kilowatts each.

#### Progress in Italy.

The utilisation of electric power in Italy has undergone extraordinary developments since the year 1890. At that time the only important plants were situated at Milan, Rome, Genoa, Turin and Naples. There are no statistics as to the collective horse-power of the small plants scattered over the peninsula in 1890, but it is improbable that the total electric power available in Italy in that year exceeded 20,000 horse-power. To-day electricity in Italy provides a total motive power of over 200,000 horse-power. Among the larger installations may be mentioned Milan, 20,000 horse-power, and the water-power station at Vizzola, 18,000 horse-power: both stations supply to various points in the provinces of Milan and Como.

In 1890 electric traction was only utilised on the Florence-Fiesole line; to-day, in addition to the complete urban and suburban lines at Milan, Naples, Rome, Genoa, Florence, Leghorn, Palermo, Perugia, and Varese there are the electric lines of Milan-Monza, Milan-Gallarate-Varese, Lecce-Colico, Terni-Collestatte, Lecce-San Cataldo, and some few lines on the Italian Riviera. In the aggregate there are over 500 kiloms. of rail and tram in Italy served by electricity.

In 1890 there were about 400 communes in Italy either partially or totally lighted by electricity. To-day electric light is general in at least 600 communes.

The development of the application of electricity to industrial purpose in Italy is very marked, and with a continued adaptation of the water-power with which the country is so richly provided, greater progress in this direction may be confidently anticipated.

#### Pollak-Virag Telegraph.

In Dec. 1904 a demonstration was given in

London of the Pollak-Virag high-speed writing telegraph, which is the invention of two Hungarian electricians—Messrs. Antal Pollak and Jozsef Virag. Two live wires and an earth return are used. The message at the transmitting end is punched on a paper slip by a special machine with a keyboard like that of a typewriter. The perforations are so arranged as to represent the vertical motion and the horizontal motion necessary in writing a letter or figure. The slip thus perforated is passed over a roller made up of six electrically insulated sections, and metal brushes come into contact with one or other of these through the perforations, and form electrical connections, sending currents to the receiving end.

There two telephones are placed, each receiving the currents from one group of three sections. A mirror is connected with the diaphragms of these two telephones, and is so suspended that it can move freely in unison with the movements of the diaphragms. These diaphragms are so energised by the currents that the horizontal and vertical motions transmitted to them are reproduced in combination by the motions of the mirror. A ray of light is thrown on the mirror, and the movement of the reflected ray reproduces the complete characters. This reflected ray is thrown on to a photographically sensitive strip of paper, and developed and fixed by an automatic machine in from 11 to 17 seconds. The speed of the apparatus is about 300 letters a second, the limit at which the perforations can be made. In some experiments made by the Hungarian Postal Department between Buda-Pesth and Pozsony, a distance of about 218 kilometres, with two copper telephone wires of 3 mm. diameter, the transmission of 45,000 words an hour was found possible; while in another case, between Berlin and Königsberg, the maximum was about 40,000 words over a distance of 710 kilometres, with wires  $4\frac{1}{2}$  mm. in diameter.

See also RAILWAYS, TELEPHONES, and WIRELESS TELEGRAPHY.

#### GEOGRAPHICAL PROGRESS, 1904.

In the ANNUAL for 1904 mention was made of the fitting out and departure of the relief ships *Morning* and *Terra Nova*, in connection with the National Antarctic Expedition. On Jan. 5th, 1904, they arrived off the winter station of the *Discovery*, the vessel being still fast locked in the ice about seventeen miles from open water. The second winter in the Antarctic had passed with less discomfort than the first, owing to the better arrangements which experience enabled the explorers to make. Meteorological and magnetic observations were recorded regularly, and such work as was possible was done. Terrific hurricanes, laden with powdered snow, continued for days together, and the temperatures were very low—50° being common, while on one occasion the thermometer stood at—68°. With the opening of spring sleigh journeys were organised to take different directions. One led by Captain Scott proceeded westwards across Victoria Land to 146° 38' E. in 79° 59' S., this, the most westerly point attained, being 270 miles from the ship. Here the surface formed a vast plain about 9000 ft. high. Meanwhile two other sledge parties had been at work, one under Lieut. Barne going S.W., and

another under Lieut. Royds, S.E. The former obtained distinct evidence of the movement of the ice-barrier, a depot established in the previous year having moved a distance of 608 yards. Lieut. Boyds' party travelled entirely over floating ice to a distance of 160 miles from the ship, thus showing that a great arm of the sea stretches southward between Victoria Land and the Ross Barrier. Several shorter journeys, all very important, were made by other members of the expedition.

As the ice gave no sign of breaking up, it was feared the *Discovery* would have to be abandoned, and the most valuable effects were therefore transported over the ice to the relief ships. Towards the end of January, however, a welcome change set in, the ice began to break away, and by Feb. 3rd the distance to the edge was reduced to six or seven miles. Blasting was resorted to, but it was not until Feb. 16th that the *Discovery* was moved, and many further difficulties were experienced before getting quite free, heavy gales and an insufficient coal supply being serious hindrances. After a short cruise taken westward, the Antarctic Circle was recrossed on March 5th, after an interval of two years and two months, and on March 15th the *Discovery* anchored at Auckland Island, where it was joined a few days later by the *Terra Nova* and the *Morning*. Proceeding to Lyttleton, stores were replenished, and on June 8th the *Discovery* sailed eastward through the South Pacific, continuing observations and soundings, passed through the Straits of Magellan, touched at the Falkland Islands, and reached Spithead Sept. 10th.

The expedition bravely accomplished a great work: the physical features of a large part of Victoria Land were determined, the Balleny and Russell Islands were shown to be identical, the meteorological and magnetic observations afford most valuable data, geological specimens were secured, a fossil flora believed to be of the Miocene age was discovered, and a biological collection was made, which stands unique as the first and, so far, the only one representing a region half-way between the Antarctic Circle and the South Pole.

#### Other Antarctic Expeditions.

The extended operations of the Scottish Antarctic Expedition, led by Dr. Bruce and chiefly devoted to oceanography, also yielded valuable results. The *Scotia* left Port Stanley on Feb. 9th for her second cruise. After calling at the South Orkneys, where an observatory had been established the previous year under the charge of Mr. Mossman, the vessel proceeded S.E., and on March 3rd in lat.  $72^{\circ} 25' S.$  and long.  $18^{\circ} W.$ , reached the supposed ice-foot of the continent, which was followed for about 100 miles. This is of special interest, as the land was not known to extend so far north here. A depth of 2650 fathoms was sounded where Ross reported "no bottom" at 4000 fathoms, but the latter appears to have been an error. Gough Island was afterwards visited, and found to be very fertile. The *Scotia* reached the Clyde on July 21st.

Details were published of the Swedish expedition under Dr. Nordenskiöld, the safety of which could only be noted in the 1904 ANNUAL. A relief expedition was organised under the leadership of Dr. Charcot, but was forestalled by the promptitude of the Argentine

Government, which despatched the *Uruguay*, under the command of Lieut. Irizar. Nordenskiöld had established his winter quarters on Snow Hill Island, near Seymour Island, in the South Shetland group, in Feb. 1901, it being arranged that the *Antarctic* should return the following year for the explorers. Summer closed without tidings of the vessel, a second winter passed, and with the opening of the following spring sledge journeys were undertaken, during one of which two of the *Antarctic* staff were unexpectedly encountered. The vessel had left Tierra del Fuego as arranged in Nov. 1902 for Seymour Island, but was driven back by the ice when within about twenty-four hours of the station. Dr. Andersson and two others volunteered to try to make their way over the ice, but had failed to accomplish their purpose till thus met by Nordenskiöld, twenty months after they had parted from him. On Nov. 8th Captain Irizar arrived in the *Uruguay*, and preparations were immediately made for leaving Snow Hill Island. No news had been received of the *Antarctic*, and the members of the expedition were fearing the loss of their comrades, when the same evening Captain Larsen and five of the crew appeared. The vessel had been wrecked in the ice; the crew had made their way to Paulet Island, 21 miles distant, the journey occupying sixteen days. There they had wintered; one of the party had died, and there still remained twelve of the crew. On Nov. 10th the expedition left Snow Hill in the *Uruguay*; the next morning Paulet Island was reached and the twelve men were taken off. The results of the expedition include the mapping of King Oscar II. Land and other islands as far south as the 66th parallel, and the discovery of fossil floras belonging to the Jurassic and Tertiary periods, besides rich fossiliferous marine deposits. Dr. Charcot, finding his services not required for the relief of Nordenskiöld, determined to undertake independent investigations south of Belgica Strait and about the Palmer Archipelago.

#### In the Arctic.

In the Arctic region there is little of actual advance to record. An expedition sent to search for Baron Toll failed to find any trace of him. The Ziegler expedition, led by M. Fiala in the *America*, is still in the Polar regions, but, as it is well equipped, no special anxiety is felt regarding it, though the *Frithjof*, sent during the summer, with additional supplies, was unable, owing to severe weather, to reach Franz Josef Land. The Danish expedition to North Greenland, led by Mylius Erichsen, as to which some anxiety was felt, reached Upernavik in January, after spending some months on Saunders' Island, north of Baffin Bay. The party proposed remaining in Greenland during the summer. Commander Peary is organising another Polar expedition, on which he hopes to start next summer. A Canadian expedition under Captain Bernier in the *Gauss* is also projected.

#### In Asia and Africa.

In Asia the political mission to Tibet led by Colonel Younghusband yielded important geographical information. Dr. Merzbacher did valuable work in the Tian Shan region; and Mr. Pumpelly and Prof. Huntington continued their investigations in the Issik-kul region.

The western coast of the Yalmal Peninsula was surveyed by Russians, and M. Knipowitsch made researches as to the physical character and biology of the Caspian Sea.

In Africa a good deal of work was done in the central zone. Lieut. Boyd Alexander, in charge of a party equipped for two years, started from the coast to work his way eastward through Nigeria. French explorers were busy in the Lake Chad region. Capt. Lenfant established the existence of a channel connecting the Logone and the Benue, thus affording a waterway, at least at certain seasons, between the Atlantic and Lake Chad, though its actual utility remains to be proved. On the Logone, near the Tubari Lake, are the falls of M'Burao, descending 200 to 250 ft. in three cascades. M. Chevalier, exploring more to the south-east, described the Maimun marshes as occupying a plain on which five rivers converge. He considered that the whole of the Lake Chad region was formerly drained by a great river, which crossed the Libyan desert and discharged into the Mediterranean. Commandant Laperrine and Capt. Thiévenant explored the Sahara south of Algeria; M. Villatte, who accompanied the former, executed valuable surveys, and his determination of positions will, it is expected, involve considerable cartographical changes. Mr. Macmillan accomplished a successful journey to the Abyssinian plateau *via* the upper branch of the Sobat and the Bure escarpment. Mr. E. T. Mellor found distinct evidence of glaciation in the Transvaal. Early in November Major Powell-Cotton set out on a fresh expedition to Africa, where he hopes to traverse the eastern part of the Congo Free State.

### In America and Europe.

As to America, valuable information regarding the geography of Alaska is supplied by the detailed report of a survey carried out by Messrs. Peters and Schrader. The mountains are shown to be a continuation of the Rocky system, and the northern slope, consisting of wide plains, is drained by the Colville River. An account was also published in 1904 of an expedition around Mount McKinley undertaken by Dr. Cook. On its sides are great glaciers, of which the Fidele is considered to be the largest in the interior of Alaska. Ranges about 10,000 ft. high flank the central peak. In the West Indies a small addition to the British Empire was effected by the annexation of Aves Island,  $\frac{1}{2}$  mile long, in  $15^{\circ} 38' N.$ ,  $53^{\circ} 36' W.$  In South America geodetic operations were continued in Ecuador, besides explorations in the basins of the Tambopata and Ynambari tributaries of the Beni, traversing a very rich rubber district. Dr. Nevers Lemaire carefully studied the physical characteristics of the Titicaca-Poopo basin. He found that Lake Poopo is very shallow and steadily shrinking. Fuller information regarding the Patagonian-Andean lake region was collected by the Chile-Argentine Boundary Commission.

In Australia, a Queensland official report by Mr. Weston contained interesting information regarding the Bellenden-Ker range. It supports a luxuriant vegetation, including fine timber trees and a great variety of fruits.

In Europe the scientific examination of lakes continues to engage much attention. The bathymetrical survey of the Scotch fresh-water lochs, under the direction of Sir John Murray,

was steadily prosecuted, and valuable data were collected. Lake Bolsena, in Italy, was studied with special regard to temperature and *seiches*. The glaciation of the High Tatra was investigated by M. J. Partsch; and M. de Martonne working in the Southern Carpathians, and M. Evijié in the Balkans, found evidence of glaciation representing two epochs, the later of which is limited to the cirque-valleys.

For Societies see following pages.

### GEOLOGY, 1904.

Great geological interest attaches to the *Report of the Coral Reef Committee* of the Royal Society, which was published under the editorship of Prof. Bonney. The prime object of the Committee was to make a deep boring in the atoll, or coral island, of Funafuti, with the view of testing the validity of Darwin's hypothesis as to the subsidence of such reefs. The first expedition, under Prof. Sollas in 1896, failed in its attempted boring, but the following year Prof. Edgeworth David, of Sydney, bored down to 698 ft., and subsequently, under Mr. Finckh, the work was carried down to 1140 ft., while two borings were also made in the lagoon of the atoll. The cores from these bore-holes were sent to England and intrusted to Prof. Judd for examination. He reported that limestone with corals occurred down to the bottom of the bore. The report shows that coral islands are by no means built wholly of corals; indeed, corals are not their most important builders. Dr. G. J. Hinde submitted the cores to exhaustive examination, and found that while the rock is entirely organic, it is made up chiefly of the calcareous structures of foraminifera, corals, and algae, like *Lithothamnion* and *Halimeda*. It appears that the calcareous parts of these algae play a very important part in the formation of the reef. In the cores from the deeper parts of the boring the coral rock becomes highly magnesian, the proportion of magnesium carbonate reaching 40 per cent. Prof. Judd believes that the small percentage of magnesium carbonate in the original structures became increased relatively by leaching out the more soluble calcium carbonate; and when the rock had thus become moderately magnesian it may have acted as a centre of segregation, attracting the magnesium compounds from the sea-water, whereby a reaction was set up, resulting in the partial replacement of calcium carbonate by the corresponding magnesium salt.

In the early days of geology it was supposed that changes in the relative level of land and sea were due to movement of the water, but this opinion gave way, as science progressed, to the view that the movements had taken place in the terrestrial crust. A few years ago, however, Prof. Suess of Vienna revived the older view, and supported it with such ability as to secure the adhesion of many of the younger geologists. At the last anniversary meeting of the Geological Society Sir Archibald Geikie discussed this subject in an address on *Continental Elevation and Subsidence*. He held that the raised beaches round our coast, like the strand-lines of the Norwegian fjords, clearly pointed to elevation of the solid land, whilst the submarine forests proved with equal clearness that the land had locally subsided. Emergence in Scotland seems to have been contemporaneous with submergence in the south,

Local movement of the land may be readily admitted, but great variation of sea-level in a very limited area seems incredible. He believes, therefore, that changes of level are due to secular movements of the earth's crust, and not to oscillation of the oceanic surface. The first volume of Miss Sollas's translation of Prof. Suess's important work on "The Face of the Earth" has recently been published.

At the Cambridge meeting of the British Association, a formal discussion was carried on with regard to the nature and origin of earth-movements. Although some of the ablest British and foreign geologists contributed to the discussion, no definite result was attained, and the proceedings brought into relief the very marked differences of opinion which exist in reference to so obscure a subject as the origin of such disturbances.

The study of earthquakes continues to engage the attention of Dr. C. Davidson, who published careful reports on the seismic disturbances felt in 1903 in Derbyshire and in Caernarvonshire. Major C. E. Dutton contributed to the "Progressive Science Series" a volume on Earthquakes viewed in the Light of the New Seismology.

So much diversity of opinion exists as to the succession of events in the Great Ice Age that whilst some authorities argue in favour of several warm interglacial periods, others recognise only one such episode, whilst others again refuse to admit any important break in the general glacial conditions. Dr. E. Geinitz, of Rostock, writing with reference to North Germany and Denmark, argued that the evidence in these countries favours the view that the Glacial period was practically a single event, interrupted only by minor oscillations—a view which is also held by most Swedish geologists.

A cavern in the Carboniferous Limestone at Grange Quarry, near Brassington in Derbyshire, yielded a vast number of relics of pleistocene mammalia, proving it to have been used as a hyæna den. The cave was explored and the relics described by Mr. Arnold-Bemrose and Mr. E. T. Newton. Among the mammalian remains there occurred, in addition to the hyæna bones, relics of the cave lion, the small-nosed rhinoceros, the bison, and a fragment of a single tooth of a young elephant, probably the straight-tusked species. It is remarkable that with these pleistocene mammals were associ-

ated the remains of what appears to be the fallow deer.—Under the name of *Testudo ammo* Dr. C. W. Andrews has described the shell of a gigantic tortoise discovered in the Upper Eocene beds of the Fayûm by Mr. H. J. I. Beadnell, of the Geological Survey of Egypt. It seems to be an early representative of a large group of tortoises found in various parts of the Tertiary system in Europe; and is probably related to the existing giant tortoise of Madagascar and the Aldabra Islands.—Mr. Upfield Green, whose work in connexion with Cornish geology is well known, has announced in the *Geological Magazine* his discovery of Upper Silurian (Ludlow) fossils in the Caerhaye limestone, thus fixing a definite horizon which may be of importance in working out the stratigraphy of a difficult part of the country.

Quite a revolution has recently been effected in geological opinion with regard to the character of the flora of the coal-measures. Ever since the early researches of Brongniart it has been held that this flora was essentially cryptogamic or flowerless, but the investigations of modern palæobotanists have shown that many of the Carboniferous plants regarded as ferns and club-mosses were really seed-bearing plants. Some were synthetic types between ferns and cycads. According to Dr. D. H. Scott quite one-half of the vascular plants of the Carboniferous period were seed-bearers.

Mr. Stanford published a very convenient *Geological Atlas of Great Britain*, with the county maps, familiar in Reynolds' Atlas, accompanied by explanatory text by Mr. H. B. Woodward and by a series of plates of characteristic fossils.

It is interesting to note that the officers of the Geological Survey discovered tin-stone (cassiterite) in Scotland. The mineral occurs in association with magnetic iron-ore in the gneissose rocks of Ross-shire. Although found in England and Ireland, tin-ore had never been previously recorded in Scotland. The discovery is not at present of any economic value.

A large collection of British minerals has been lately formed at the Museum of Practical Geology, and a descriptive handbook to the collection, giving a sketch of the mineral resources of the British Islands, was written by Mr. F. W. Rudler, the former curator.

For Societies see below.

## SCIENTIFIC SOCIETIES AND INSTITUTIONS.

**Anthropological Institute of Great Britain and Ireland.** President for 1903-4, Henry Balfour, M.A.; F.Z.S.; Hon. Secretary, T. A. Joyce, M.A.; Treasurer, J. Gray, B.Sc.; Assistant Secretary, H. S. Kingsford, B.A. Offices, 3, Hanover Square, W. The Institute publishes a half-yearly journal, and a monthly periodical entitled *Man*.

**Australasian Association for the Advancement of Science.** The Association was formed in '86, and is modelled on the British Association. The sections include Astronomy, Mathematics and Physics, Chemistry, Geology and Mineralogy, Biology, Ethnology and Anthropology, Geography, Economic Science and Agriculture, Engineering and Architecture, Sanitary Science and Hygiene, Mental Science and Education. An elaborate and most valuable report of its proceedings is published by the Association. The ninth session was held at

Hobart in 1902, and the tenth will be held at Dunedin, New Zealand, in 1904. The Permanent Hon. Secretary is Prof. A. Liversidge, M.A. LL.D., F.R.S.; address, The Chemical Laboratory, The University, Sydney, N.S.W.

**British Astronomical Association**, founded Oct. '90 for "the encouragement of a popular interest in astronomy, the association and organisation of amateur observers for mutual help, and the circulation of current astronomical information." There are upwards of 1000 members, and twelve "Observing Sections." The subscription is *ros. 6d.* per annum; entrance fee *5s.* President, Mr. A. C. D. Crommelin, B.A., F.R.A.S. Secretaries, Mr. J. G. Petrie, F.R.A.S., and Mr. J. A. Hardcastle, F.R.A.S. There are branches in Glasgow, Sydney, N.S.W., and Melbourne Victoria. Inquiries and applications for membership should be made to the Assistant

**Secretary, Mr. T. F. Maunder, F.S.A.A. Office,** 35, Gracechurch Street, E.C.

**British Numismatic Society,** 43, Bedford Square, W.C. **President, P. Carlyon-Britton, F.S.A.** Ordinary members limited to 500. The King of Portugal received an address from the Society, and was elected an honorary member, 1904.

**British Science Guild,** formed in 1904, "in order, by joint action, to convince the people, by means of publications and meetings, of the necessity of applying the methods of science to all branches of human endeavour, to bring before the Government the scientific aspects of all matters affecting the national welfare; to promote the application of scientific principles to industrial and general purposes, and to promote scientific education. **President, Sir Norman Lockyer. Hon. Treasurer, Lord Averbury. Hon. Secretary, Mr. C. Cuthbertson.**

**Chemical Society,** Burlington House, W. **President, Prof. William A. Tilden, D.Sc., F.R.S.; Treasurer, Dr. Alexander Scott, F.R.S.; Hon. Secs., Prof. W. Palmer Wynne, D.Sc., F.R.S., and Dr. M. O. Forster; Assist. Sec., Stanley E. Carr; Librarian, F. W. Clifford.**

**Civil and Mechanical Engineers' Society,** The, was established in 1859. The meetings are held in Caxton Hall, Caxton Street, Westminster, S.W., on the first Thursday in each month from October to May. Visits are paid to engineering works in the summer. The 1904-5 session commenced Oct. 6th, 1904, and will end May 3rd, 1905. The **President** is Mr. Alfred Hansen, A.M.I.C.E.; and the **Hon. Sec., Mr. A. S. E. Ackermann, A.C.G.I., A.M.I.C.E., M.S.I.** The offices are at 25, Victoria Street, Westminster, S.W.

**Civil Engineers, Institution of.** Founded Jan. 2nd, 1818, incorporated by royal charter June 3rd, '28, and received supplemental charters, with extended powers, Aug. 3rd, '87, and March 20th, '96. The object of the Institution is to further the advancement of mechanical science, and more particularly to promote the acquisition of that species of knowledge which is essential in the profession of a civil engineer. According to its constitution, it consists of members, corporate associates (called associate members), and honorary members. There are also attached to it non-corporate associates and students. Candidates for associate membership and studentships are subject to examination, the subjects being general education and scientific knowledge befitting the profession of a civil engineer. The numbers of the several classes are: members 2159, associate members 4107, honorary members 19, associates 272, and students 1037: total 7594. It has a library of upwards of 50,000 volumes, including 750 of rare tracts, the number of which cannot be much less than 10,500. **President, Sir Guilford L. Molesworth, K.C.I.E. Secretary, Dr. J. H. T. Tudsbery. Offices, Great George Street, Westminster, S.W.**

**Clinical Society,** 20, Hanover Square. **Secs., W. Pasteur, M.D., and W. G. Spencer, M.S.**

**Entomological Society,** 11, Chandos Street, Cavendish Square. **Hon. Secs., H. Rowland Brown, M.A., and Commander J. J. Walker, R.N.**

**Ethological Society.** The object of the Society is the story of human nature, not through any one department of science, but through all, in order to arrive at a knowledge

of the intellect and character of man and the laws which govern their manifestation, and to apply it to the preservation of the mental health of the individual, to education, moral reform, and the solution of various sociological problems. **President, Dr. B. Hollander; Hon. Sec., A. F. Brady, 62, Queen Anne Street, Cavendish Square, W.**

**Geological Society of London.** Has offices at Burlington House, and issues a quarterly journal. **President for 1904-5, Dr. J. E. Marr, F.R.S. Secretaries, R. S. Herries and Prof. W. W. Watts.**

**Geologists' Association** meets at University College, Gower Street. **President, A. Smith Woodward, LL.D., F.R.S.**

**Institution of Electrical Engineers,** 92, Victoria Street, Westminster, S.W. **Secretary, G. C. Lloyd; Assist. Sec., P. F. Rowell.**

**Institution of Mechanical Engineers,** Storey's Gate, St. James's Park, S.W. **President, J. Hartley Wicksteed; Secretary, Edgar Worthington, B.Sc.** Instituted in 1847 to promote the science and practice of mechanical engineering. There are upwards of 4400 members. An annual congress is held in the summer at different centres: Liverpool, 1904. Monthly meetings are held, October to April.

**Institution of Mining and Metallurgy,** Salisbury House, E.C. Founded 1892 to, promote the general advancement of mining and metallurgical science. **President, H. Jennings; Secretary, C. McDermid.** The constitution embraces members, associates, and students. Ordinary meetings are held monthly, October to June; the Annual General in March. The Institution's gold medal is awarded periodically. South African mining interests receive considerable attention.

**Iron and Steel Institute,** 28, Victoria Street, S.W. **Secretary, Bennett H. Brough.**

**Key Observatory,** Old Deer Park, Richmond, Surrey. Now the Observatory Department of the National Physical Laboratory (*q.v.*), and as such superintended by Mr. C. Chree, Sc.D., F.R.S. It possesses a valuable collection of verifying apparatus and standard instruments, many of which have been purchased by grants made by the Royal Society and the British Association. In addition to its observational work in magnetism, electricity and meteorology, the observatory has attained a high reputation at home and abroad for the trustworthiness of its verifications and for its many services to experimenters. It is subsidised as the central station of the Meteorological Office for self-recording observations; it serves as a place where new instruments intended for other observatories can be tested beforehand, as a school where intending observers can be practically trained, and as an experimental laboratory where the efficiency of new designs of meteorological instruments may be thoroughly tried. A large number of thermometers, barometers, magnetic instruments, sextants, watches, chronometers, telescopes, and a variety of other forms of apparatus, are tested annually, suitable fees being charged to defray the cost of the examination.

**Linnean Society of London,** Burlington House, W. **Gen. Sec., B. D. Jackson.**

**Mining Engineers, The Institution of.** This institution was founded July 1st, 1889, for the advancement of the sciences of geology, mining, and metallurgy, by the interchange of opinions, by the reading of communications

from members and others, and by discussions; to supply information to the Government upon the practical requirements of legislation affecting mining and metallurgical industries, and more especially to promote a more general recognition of the status of mining and metallurgical engineering as scientific professions. The Institution now comprises seven affiliated societies. The numbers of members are: Honorary members, 43; members, 2012; associate members, 162; associates, 272; students, 173; subscribers, 50; total, 2712. Two general meetings are held during the year, one in London and the other in one of the mining districts. The papers and discussions are printed in the *Transactions*, which also contain notes of papers on the working of mines, metallurgy, etc., from the *Transactions* of colonial and foreign societies and colonial and foreign publications. **President**, Sir Lowthian Bell, Bart.; **Secretary**, Mr. M. Walton Brown; **Offices**, Neville Hall, Newcastle-upon-Tyne.

**Museums Association.** Founded in 1890 under the auspices of the late Sir W. H. Flower to promote the educational and scientific work of museums. Annual Congresses are held: 1904, at Norwich, Dr. S. F. Harmer, F.R.S., presiding. **Secretary**, E. Howarth. Organ, *Museums Journal*.

**National Physical Laboratory.** A committee, with Lord Rayleigh as chairman, was appointed by the Treasury, and reported in 1899 in favour of the establishment of a public institution "for standardising and verifying instruments, for testing materials, and for the determination of physical constants." The report was adopted, and the Government, with the approval of H.M. Queen Victoria, allotted for the purpose Bushy House and the grounds adjoining it. The house itself is used as the Physical Laboratory, and an Engineering Laboratory with the usual appliances has been erected in the grounds. The formal opening by the Prince of Wales took place on March 10th, 1902. Most of the work now undertaken at the Kew Observatory (*q.v.*) continues to be carried on there as one Department of the work of the Laboratory. The Government have granted £19,000 for the buildings, and £4000 a year towards the working expenses. The Laboratory also receives the proceeds of the Gassiot endowment, amounting to about £450 a year, and has an income of about £4200 derived from standardising fees. An additional sum of £2000 was received in 1904 in the form of subscriptions and donations from friends interested in the work. The object of the Laboratory is to aid in every way the application of science to trade and manufacture. Under the ultimate control of the Royal Society, the institution is managed by an Executive Committee and a General Board. **Director**, Mr. R. T. Glazebrook, D.Sc., M.A., F.R.S. **Superintendent of the Observatory Department**, Mr. Charles Chree, Sc.D., F.R.S. **Superintendent of the Engineering Department**, Mr. T. E. Stanton, D.Sc. The staff includes ten assistants at Kew and sixteen at Bushy House, Teddington.

**Palæontographical Society**, a publishing body established in 1847 for the issue of figures and descriptions of British fossils. **President**, Dr. H. Woodward, F.R.S. **Secretary**, Dr. A. Smith Woodward, F.R.S., British Museum Nat. Hist., Cromwell Road, S.W.

**Pathological Society**, 20, Hanover Square W. **Gen. Sec.**, S. G. Shattock, F.R.G.S.

**Royal Astronomical Society**, Burlington House. **President**, Prof. H. H. Turner, D.Sc. **Secretaries**, F. W. Dyson, M.A., and E. T. Whittaker, M.A.; **Assist. Sec.**, W. H. Wesley; **Foreign Secretary**, Sir William Huggins, K.C.B.

**Royal Botanic Society.** The Society was incorporated in 1839 for the promotion of Botany, and for the formation of Botanical Gardens within the Metropolis. The Gardens in the Inner Circle, Regent's Park, are about 20 acres in extent, and are beautifully laid out as an ornamental English park. The Society is composed of Fellows and members. A School of Practical Gardening has also been established, and is officially recognised by the Technical Education Boards of the London and Middlesex County Councils. About 800 free orders of admission for three months each are issued each year to botanical and art students, and 50,000 cut specimens distributed to the various schools and colleges annually. The public are admitted on Saturdays and Mondays at a charge of 1s. (Bank Holidays, 6d.). Musical promenades are held in the season on Wednesdays (admission 2s. 6d.). The public are now admitted, by payment, to the exhibitions and fêtes held in the spring and summer. **President**, H.S.H. The Duke of Teck; **Secretary**, Mr. J. B. Sowerby, F.L.S.; **Library and Office**, Inner Circle, Regent's Park, N.W.

**Royal College of Science, London, The**, is primarily intended for the instruction of teachers, and of students of the industrial classes selected by competition in the examinations of the Board of Education, but other students are admitted so far as there may be accommodation for them, on the payment of fees. The **Royal School of Mines** is incorporated with the Royal College of Science. Students entering for the Associateship of the Royal School of Mines obtain their general scientific training in the Royal College of Science. The course of instruction lasts for three years, and is the same for all the divisions during the first year, after which it is specialised according to the particular division in which the student is working for the Associateship. The **Associateship of the Royal College of Science** is given in one or more of the following divisions: mechanics, physics, chemistry, biology, and geology; and the **Associateship of the Royal School of Mines** in metallurgy and mining. A student obtains the Associateship who passes in all the subjects of the first year, and in the second and third year those subjects prescribed as necessary for the division in which he seeks to obtain his Associateship. Occasional students in one or more special branches of science may be admitted, providing they possess some preliminary knowledge of the subject they propose studying, and so far as there is room. Application for admission to the College must be made on a form obtainable from the Registrar, and be sent before the middle of June for admission in the following October. The fees of students entering for the Associateship course amount to a total of from £105 to £115 in the three years. A certain number of royal exhibitions, national scholarships, and free studentships tenable at the College are awarded by competition at the examinations of the Board of Education. Particulars respecting these will be found in the Regulations of the Board of Education. **Dean**, Prof. J. W. Judd, C.B., LL.D., F.R.S. **Registrar**

and Superintendent of Discipline, Francis Flatgate, Royal College of Science, South Kensington, S.W. Clerk and Librarian, A. Tillott.

**Royal Geographical Society**, (1, Savile Row, W.), was founded in 1830. It annually awards three medals and other honours to distinguished workers in the cause of geography, and distributes prizes among University extension students for proficiency in this science. It contributes to the maintenance of chairs of geography in Oxford and Cambridge. It subsidises exploring expeditions. It also gives instruction to and lends instruments to travellers in various parts of the world. There is free admission for the public to the map room. In 1904 the **Founder's medal** was given to Sir Harry H. Johnston, G.C.M.G., K.C.B., the **Patron's medal** to Commander Robert F. Scott, R.N., M.V.O. During the year 310 Fellows and 5 Honorary Corresponding Fellows were elected, and in March 1904 there was a total of 4227 Fellows. The published *Journal* is valuable, as tracing the progress of explorations and discoveries. The annual report presented at the anniversary meeting (May 16th) showed that the income of the Society during 1903 had been £12,733 13s. 1d., and the expenditure £11,634 18s. 1d., while the total assets amounted to £59,709 4s. 2d. **President**, Sir Clements Markham, K.C.B., F.R.S., etc.; **Hon. Secretaries**, Major L. Darwin, and J. F. Hughes, Esq.; **Secretary**, J. Scott Keltie, LL.D.

**Royal Institution of Great Britain**, The, is an association of men and women for the advancement of natural knowledge. Founded 1799, incorporated 1800, and enlarged in 1810. Its chief objects are: To prosecute scientific and literary research; to illustrate and diffuse the principles of inductive and experimental science; to promote social intercourse among lovers of science, and to afford to them opportunities for collective and individual study. The Institution includes Laboratories for the promotion of chemical and physical science. In the Laboratories the researches of Thomas Young, Humphry Davy, William Thomas Brande, Michael Faraday, John Tyndall, Edward Frankland, William Odling, John Hall Gladstone, James Dewar, and Lord Rayleigh have been conducted. It gives public lectures, holds weekly meetings (on Friday evenings) of its members, and supports a model-room and a reading-room. The entrance fee is £10 10s., which includes the first year's annual subscription of £5 5s.; or a life composition of 60 guineas may be paid. The library contains about 60,000 volumes. **House**, 21, Albemarle Street, Piccadilly; **President**, The Duke of Northumberland, K.G., D.C.L., F.R.S., **Treasurer**, Sir James Crichton-Browne, M.D., LL.D., F.R.S., V.P.; **Hon. Secretary**, Sir William Crookes, D.Sc., F.R.S., V.P.; **Professor of Natural Philosophy**, The Right Hon. Lord Rayleigh, O.M., M.A., D.C.L., LL.D., Sc.D., F.R.S.; **Fullerian Professor of Chemistry**, Sir James Dewar, M.A., LL.D., D.Sc., F.R.S.; **Fullerian Professor of Physiology**, Louis C. Miall, D.Sc., F.R.S.; **Assistant Secretary and Librarian**, Mr. Henry Young; **Assistant Librarian**, Mr. R. Cory.

**Royal Meteorological Society**, 70, Victoria Street, S.W. **Sec.**, W. Marriott.

**Royal Numismatic Society**, 22, Albemarle Street, W. **Secs.** H. A. Grueber, F.S.A., and E. J. Rapson, M.A., M.R.A.S.

**Royal Society, Burlington House**. A society, formed in 1660 for the pursuit of science, now famous throughout the world. Charles II. in 1662 granted the Society a charter of incorporation. This was followed by a second in 1663, giving further privileges. By that the Society was named "The President, Council, and Fellows of the Royal Society of London, for Improving Natural Knowledge." Meetings for reading and discussing scientific papers are held weekly on Thursday afternoons at 4.30 p.m. from November to June. The Society awards the Copley, Rumford, two Royal, Davy, Darwin, Buchanan, Sylvester and Hughes medals, each annually, with the exception of the Rumford and Darwin, which are given biennially, the Sylvester, which is given triennially, and the Buchanan, which is given quinquennially. The Copley is the most highly prized, and may be awarded to Englishmen or foreigners, but only goes to distinguished savants. Sir William Crookes was the recipient in 1904. Among the presidents have been Sir Isaac Newton, Sir Christopher Wren, Samuel Pepys, Sir Hans Sloane, Martin Folkes, Sir Joseph Banks, Sir Humphry Davy, Sir Joseph Hooker, Prof. Huxley, Sir Gabriel Stokes, Lord Kelvin and Lord Lister. Sir William Huggins, D.C.L., LL.D. (q.v.), is the present President. There are now upwards of 450 Fellows and 50 Foreign Members. Fellows elected, 1904: Dr. Thomas Gregor Brodie, Major S. G. Burrard, Prof. Alfred Cardew Dixon, Prof. James Johnstone Dobbie, Thomas Henry Holland, Prof. Charles Jasper Joly, Dr. Hugh Marshall, Edward Meyrick, Dr. Alexander Muirhead, Dr. George H. F. Nuttall, Arthur Everett Shipley, The Rt. Hon. Lord Strathcona, G.C.M.G., Prof. Morris William Travers, Harold Wager, Gilbert Thomas Walker, William Whitehead Watts. The rooms of the Society are enriched with busts and paintings, while the library contains 50,000 volumes, and there is a unique collection of relics, many of which relate to Sir Isaac Newton. **Secretaries**, Prof. J. Larmor, D.C.L., D.Sc., and Sir Archibald Geikie, D.C.L., Sc.D. **Foreign Secretary**, Francis Darwin, M.A. **Assistant Secretary**, Robert Harrison, Burlington House, Piccadilly, W.

**Royal Scottish Geographical Society**. This Society was founded in '84 to promote inquiry into all subjects of geographical interest, to give special attention to Scottish topography, to form a library, to press for the recognition of geography as a branch of Higher Education, and for other objects. There are 1623 members, including 100 ladies. Monthly meetings are held in Edinburgh and Glasgow; meetings are also held in Dundee and Aberdeen, and lectures and papers are given and read, while the Society publishes monthly the *Scottish Geographical Magazine*. The President is Prof. J. Geikie, D.C.L., LL.D., F.R.S.S.L. & E., the Editor Miss M. I. Newbigin, D.Sc., and the Secretary Lieut. E. H. Shackleton. The Headquarters are at Queen Street, Edinburgh.

**Society of Chemical Industry**, 9, Bridge Street, S.W., founded 1881, has for its object the promotion and extension of industrial and scientific chemistry. The London section holds monthly meetings at the Chemical Society, Burlington House, W. Local sections have headquarters at Liverpool, Manchester, Newcastle, and Nottingham; in addition there are Scottish, Yorkshire, Canadian, and New York branches. Annual Congress, 1904, held at New

York. President, W. H. Nichols; Secretary, C. G. Cresswell.

**South African Association for the Advancement of Science.** A meeting was called together at Cape Town in 1901 by Mr. T. Ruenert, M.Inst.C.E., of Johannesburg, and others, Sir C. Metcalfe, Bart., presiding, with the idea of promoting an annual congress of engineers in South Africa; and from this sprang the scheme for an organisation on the lines of the home British Association. The first meeting was held at Cape Town in 1903, under the presidency of Sir David Gill, F.R.S., with a membership of 700, since increased to over 1000; the second at Johannesburg, Sir C. Metcalfe presiding. President, Mr. T. Ruenert. The **British Association (q.v.)** at its forthcoming congress will conduct its meetings with the co-operation of the South African Association. **Chairman of Reception Committee (Cape Town),** Sir D. Gill.

**Victoria Institute.** This society, which has now been in existence for 36 years, was founded to associate together men of science and all interested and qualified persons, in investigating "impartially and fully the most important questions of philosophy and science, especially those that bear upon the great truths revealed in Holy Scripture"; "to examine and discuss all supposed scientific results with reference to final causes, and the more comprehensive and fundamental principles of philosophy proper, based upon faith in the existence of one Eternal God"; and to bring together the results of such labours in the printed transactions of the Society. The number of members and associates is nearly 1000, about one-third of whom reside abroad and in the colonies. President, The Rt. Hon. the Earl of Halsbury, F.R.S.; Secretary, Prof. Edward Hull, LL.D., F.R.S., 8, Adelphi Terrace, W.C.

**Zoological Society of London.** The annual report of this Society, which was instituted in 1826 for the advancement of zoology and animal physiology, stated that the number of Fellows on Jan. 1st, 1903, was 3481, the largest in the history of the Society. The Gardens in Regent's Park are open from 9 a.m. till sunset, and the Offices and Library from 10 a.m. till 5 p.m., Saturday, 10 a.m. till 2 p.m. Admission 6d. on Monday, 1s. the rest of the week, children 6d. all days. Reduced prices to parties of 50 and upwards. On Sunday only Fellows and their friends are admitted. President, The Duke of Bedford, K.G.; Secretary, P. Chalmers Mitchell, M.A., D.Sc. Superintendent of Gardens, R. I. Pocock. Offices, 3, Hanover Square, W.

#### SCOTLAND.

Scotland has an area of 29,785 square miles, and a population, according to the 1901 Census, of 4,472,103. The proportion of males to females was 2,173,755 males to 2,298,348 females, giving an excess of 124,593 females, as against a similar excess in '91 of 140,213. The percentage rate of increase from '91 to 1901 was the highest recorded since '21-31, except the period '71-81, when it was 11.18. The increase was very unequally distributed, 18 counties showing an increase and 15 a decrease. The highest rates of increase were Linlithgow 24.4 per cent., Lanark 21.1 per cent., Stirling 20.5 per cent.; and the greatest decreases were Caithness 8.9 per cent., Wigton 9.36 per cent., and Selkirk 15.78 per cent. The town districts with a population of 2000 and upwards showed

an average increase of 18.58 per cent. over '91; the villages with a population of from 300 to 2000 showed an increase of .05 per cent., and the rural districts a decrease of 4.60 per cent. The number of inhabited houses was 926,914, as against 817,568 in '91. The number of families was 967,200 in 1901, as against 876,089 in '91. There were 28,106 inhabitants who spoke Gaelic only. Of the total population 1,982,812, or 44.56 per cent., were returned as following some occupation. Male workers numbered 1,391,188, or 64 per cent. of the total male population; female workers 591,624, or 25 per cent. of the total female population. In 1904 the population was estimated to be 4,627,656.

Secretary for Scotland, Rt. Hon. A. Graham Murray, K.C., M.P.

Permanent Under-Secretary, Reginald MacLeod, C.B.

Lord Advocate, Rt. Hon. C. Scott Dickson, K.C., M.P.

Solicitor-General, David Dundas, K.C.

#### The Scotch Police.

H.M. Inspector of Constabulary for Scotland (Major Arthur G. Ferguson), appointed under the County and Burghs Police Act, '57, submits a report annually. According to that for the year ended Dec. 31st, 1902, the authorised strength of the force was 5347, of which 1839 belonged to county forces and 3276 to city and burgh forces. There are also 232 additional police who are privately employed. If these are added, the total in counties will be 1912 and in cities and burghs 3425, giving a grand total of 5347 policemen in Scotland, excluding the Orkney and Shetland Islands. There is a detective staff of 165 officers in 14 county and in 15 city and burgh forces. The staff in the former is 29 and in the latter 136. In addition to these detectives constables in plain clothes frequently assist them. In Edinburgh there is a detective staff of 29, consisting of 1 lieutenant, 2 inspectors, 4 sub-inspectors, 2 sergeants, 6 detective officers, 9 constables, and 5 detective clerks. In Glasgow, which has a police force of 1379 members and a census population of 766,967, there is a detective staff of 47, consisting of 2 lieutenants, 7 sub-inspectors, and 38 detective officers. The Criminal Registry kept at Edinburgh, Glasgow, Aberdeen, Inverness, Greenock, Dumfries, Dundee, Perth, Stirling, Elgin and Ayr works very satisfactorily in supplying the police with valuable information concerning habitual criminals. The total amount expended for the last financial year for pay and clothing for the whole authorised force was £424,701 9s. The aggregate cost of the police, excluding the additional police, privately employed and paid for, was £541,864 2s. 10d., which includes rent, taxes, buildings, and all other expenses connected with the police. Towards the cost of pay and clothing £150,000 per annum is distributed out of the Local Taxation (Scotland) Account. This amount is made up of duties of local taxation, licences, and a part of the probate duty. Only those forces, however, are entitled to be aided out of the amount which obtain a certificate from the Secretary for Scotland under the Police Act of '57. A satisfactory system of paying pensions and gratuities has been provided by the Police (Scotland) Act, '90, substantially similar to the system established for the police of England and Wales by another statute passed in the same year.

**Local Government Board.**

The Board consists of the following **ex-officio Members**: The Secretary for Scotland, President; The Solicitor-General for Scotland; and the Permanent Under-Secretary for Scotland; and the following **Appointed Members**: Mr. James Patten-MacDougall, M.A., Vice-President; Mr. James Burn Russell, M.D., LL.D., Medical Member of Board (one vacancy). The Secretary is Mr. G. Falconar Stewart; the Medical Officer under the Public Health Act is Prof. Sir Henry Littlejohn, M.D., LL.D. Offices, 125, George Street, Edinburgh.

The powers of the Board, though not so extensive, are somewhat similar to those of the English Local Government Board, and involve a complete control of poor law administration and the poor law authorities, and a supervision of the local government and public health authorities; but the Secretary for Scotland exercises certain of the powers which in England belong to the Local Government Board. The poor law authorities are the Parish Councils, who also exercise many other powers. The other local authorities are the Burghal or Urban Authorities and the County Councils. The Local Government Board collects and publishes statistics as to sickness and mortality.

The **Annual Report** for the year ended Dec. 31st, 1903, shows that on May 15th, 1903, there were 103,016 poor persons in receipt of relief, of whom 66,703 were paupers and 36,313 their dependants. Of the paupers 14,193 were lunatics. Of the sane poor, 76,974 received outdoor and 11,711 indoor relief, and 138 were vagrants. Of the sane paupers 42 per cent. were 65 years of age or upwards and 49 per cent. between the ages of 14 and 65. The total number of persons in receipt of relief amounted to 22 per 1000 of the population.

**Local Taxation Statistics.**

The receipts of the Parish Councils for the year ended March, 1902, for poor law purposes amounted to £1,225,160, and the expenditure to £1,235,053. Of the receipts, £919,767 came from rates, £244,085 from Local Taxation Contributions, and £61,308 from other sources. The average annual cost of maintenance of outdoor paupers was £6 8s. 6d. per head, and of indoor paupers £9 2s. 3d.

Taking all the local authorities together, their revenue, excluding receipts from loans, amounted to £11,765,035, made up as follows:—

Rates	£4,800,677
Imperial subventions and payments	1,992,622
Tolls, dues, fines, etc.	1,112,276
Miscellaneous sources	3,769,460
	<hr/> £11,765,035

The total expenditure, not defrayed out of loans, amounted to £12,072,395. The principal items of expenditure were:—

Poor relief	£1,132,513
Education	1,913,363
Police	518,036
Roads and bridges	789,735
Water supply	257,059
Private lighting	1,763,508
Harbours and ports	546,837
Tramways	499,698

The total of the outstanding loans of local authorities amounted to £46,236,450, in addition

to perpetual annuities of the value of £5,000,000. Of the outstanding loans, £10,858,000 had been incurred on account of harbours and ports, £8,740,000 for water supply, and £4,790,000 for education. Burghal authorities were responsible for £35,500,000.

The amount paid into the Local Taxation Account for Scotland during the year ended Lady Day, 1904, from Imperial sources was £1,128,364. It was made up as follows:—

Death Duty grant	£305,843
Local Taxation License Duties	378,134
Beer and Spirit Duties	163,969
Agricultural and congested districts grant	182,628
Additional grant from Consolidated Fund.	97,790
	<hr/> £1,128,364

This amount was distributed by the Secretary for Scotland in aid of local expenditure.

The Final Report, dealing with Scotland, of the Royal Commission appointed in 1896 to inquire into Local Taxation, is dated April 10th, 1902, and is signed by all the Commissioners except Sir E. Hamilton, Sir G. Murray, and Judge O'Connor. (See 1903 ed.) The Report runs on similar lines to that on England (see p. 176). It suggests that further relief should be given to the local rates from Imperial sources, and that grants should be given in aid of the following National services: viz., 1. Poor Relief, including lunatic asylums; 2. Police; 3. Education; 4. Main Roads; and 5. Sanitary Inspection. The amount of the grant should be about one-half of the expenditure on these National services.

Under the Agricultural Rates, etc., Scotland, Act, '96, occupiers of "agricultural lands and heritages" are liable to pay only three-eighths of the rate in the £ on rates levied by County Councils and Parish Councils. The deficiency in respect of the remaining five-eighths is met by grants paid by the Secretary for Scotland to those Councils out of the Local Taxation (Scotland) Account. The moneys come from Estate Duty in Scotland and a grant from the Consolidated Fund. The grants amount to about £160,000, of which £62,000 goes to County Councils and £98,000 to Parish Councils. The total value of agricultural lands and heritages fell from £5,827,462 in '96 to £5,634,559 in 1900, while the total valuation of all property in Scotland increased from £25,161,668 in '96 to £27,748,562 in 1900. The Scottish Act was passed for a period of five years, and, like the English Act, has been continued till March 31st, 1906.

**Local Administrative Bodies.**

County Councils and District Committees.—The Local Government (Scotland) Act, '89, set up County Councils for all the counties of Scotland on lines practically the same as the English precedent, though with some important variations, such, for instance, as the County Council being wholly elective and having no aldermen. The number of councillors to constitute the County Council was fixed by the Secretary for Scotland, "having regard to the population, distribution and pursuits of the population, area, annual value, and other circumstances." Burghs having less than 7000 population are merged in the

county for representation, and their County Councillors are elected by the Town Councils of such Burghs from among their own number. The chairman of each County Council is called the "Convener of the County," and must be a councillor. The County Council superseded, as regards its County, certain existing local bodies, such as road trustees and parish local authorities under the Public Health Acts, and it was invested with many of the powers of other bodies, such as Commissioners of Supply and Justices of the Peace in General Quarter Sessions. In Burghs under 7000 population the Police Administration is merged in the County, and the County Police force is controlled by a Standing Joint Committee of the County Council and the Commissioners of Supply. For public health and highway purposes each county is divided into districts, and each district has its committee, consisting of the elected representatives of the area on the County Council, and representatives from the Councils of each of the parishes in the district. County Councils are elected by the county electors, whose qualifications consist of occupation and payment of rates. Financial relations are established between the County Council and subordinate authorities for the purpose of raising funds, and duties of local taxation, licences, and probate duty grants are set aside from Imperial funds for administration by County Councils. The "County Fund" is constituted out of moneys raised by rating and the Imperial grant, and the County Council are required "to keep such accounts of the County Fund and of the sums raised by rates as will prevent a rate being applied to any purpose to which it is not properly applicable." The County Council is required to fix the rate in the pound of the rateable property which will be necessary to meet its requirements, and such rate is levied as a consolidated rate on all lands and heritages within the County; but rates for the maintenance of highways and the administration of the laws relating to public health are imposed on all lands and heritages in each division, district, or parish.

**Burgh Corporations.**—In every one of the larger towns there is a Municipal Corporation, and these bodies have complete control of local affairs, and are elected by the municipal electors on the register. These Burghs are divided into Royal or Parliamentary Burghs and Police Burghs. The former exist by virtue of ancient charters in most cases, and the latter have been formed under the General Police Act, 1862, and under local Acts. All Burghs have control of their own general government and sanitation; but in the smaller ones the control of the police has been taken away, and it is only those with a population exceeding 7000 that now possess such control.

**Parish Councils.**—The Local Government (Scotland) Act, '94, effected a greater change than its predecessor. By it the constitution of the smaller local bodies was entirely reformed, and in place of the Parochial Boards Parish Councils were established, to be elected triennially, with not less than 5 nor more than 31 members, regard being had to the population and special wants and circumstances of the Council. Of the total number of parishes in Scotland, 9 are wholly burghal (*i.e.* within some burgh), 650 are wholly landward (*i.e.* rural), and 226 are partly landward and partly

burghal. The roll of electors is the Parish Council Register, and the elections are required to be held under the Ballot Act. Candidates are disqualified if they hold certain local offices, or are concerned in any contract. Parish Councils took the place of the Parochial Boards, and acquired all their powers and duties, which are equivalent to those of Guardians of the Poor in England, and, in the case of landward Parish Councils, additional powers were conferred, relating, amongst other things, to such matters as the provision of public offices, the acquisition of grounds for public recreation, and of rights of way for the benefit of the inhabitants, the acceptance and holding of gifts of property, as well as powers of spending or contributing money on, or towards the furtherance of, any object as to which the Council has power. Further powers are given as to the protection of rights of way, lighting streets, scavenging, public baths, the establishment of allotments, and the control of charities other than those which exist for purposes ecclesiastical, or which relate to an educational endowment, or have been left for the benefit of the poor of the parish. Every year the Parish Council cause to be submitted to them estimates of their receipts and expenditure for the year, whether on account of property, contributions, rates, loans, or otherwise, and make provision for meeting the same. The Council are required to divide their administration into "General Parish Funds" and "Special Parish Funds," and to keep such accounts of these funds, "and of the sums raised by rates, as will prevent a rate from being applied to any purpose to which it is not applicable." The accounts are subject to audit by auditors of the Local Government Board.

### County Councils.

**Aberdeen.**—Convener, Alex. M. Gordon, of Newton; Clerk, William Murison; Office, County Buildings, Aberdeen; Chief Constable, Major D. F. Gordon; County Medical Officer, Dr. James P. Watt.

**Argyll.**—Convener, John Campbell of Kilberry, Tarbert; Clerk, M. Sinclair; Office, Lochgilphead; Chief Constable, James Fraser.

**Ayr.**—Convener, R. A. Oswald; Clerk, J. E. Shaw; Office, County Buildings, Ayr; Chief Constable, Capt. Hardy McHardy, R.N.

**Banff.**—Convener, James Campbell, LL.D., Old Cullen; Clerk, Francis George, Solicitor, Banff; Chief Constable, William Hope, Banff; Medical Officer, Dr. Cameron, Nairn; Sanitary Inspector, James MacIntosh, Banff.

**Berwick.**—Convener, Sir George Houstoun Boswall, Bart.; Clerk, Joseph Wilson; Office, County Buildings, Newtown Street, Duns; Chief Constable, Alexander Porter.

**Bute.**—Convener, J. Windsor Stuart; Clerk, Robert D. Whyte; Office, County Office, Rothesay; Chief Constable, Charles Harding; Surveyors, William McIntyre and Peter Jenkins.

**Caithness.**—Convener, D. P. Henderson; Clerk, James Young, Thurso; Chief Constable, Thomas Sinclair, Wick; Surveyor, J. Harrison, Wick.

**Clackmannan.**—Convener, George Younger; Clerk, James W. Moir; Office, County Buildings, Alloa; Chief Constable, John Scott, Alloa; Surveyor, Mr. J. C. Alford, Alloa. Medical Officer, Dr. T. G. Nasmyth, Cupar Fife.

**Dumfries.**—Convener, A. Johnstone Douglas, Comlongon Castle, Ruthwell; Clerk, John Robson, County Buildings, Dumfries; Chief Constable, William Gordon; Medical Officer, Dr. J. Maxwell Ross; Sanitary Inspector, Christopher O-selton.

**Dunbarton.**—Convener, Lord Overtoun, of Overtoun, Dunbarton; Clerks, William Babie and William Craig, County Buildings, Dunbarton; Chief Constable, Charles Andrew McHardy; Surveyor, Archibald Wilson.

**Elgin.**—Convener, Thomas Yool; Clerk, E. D. Jameson; Office, Elgin: Chief Constable, J. B. Mair; Surveyor, Alexander Hogg.

**Fire.**—Convener, The Right Hon. the Earl of Elgin, K.G., Broomhall; Clerk, William D. Patrick; Office, County Buildings, Cupar; Chief Constable, J. Tennent Gordon, Cupar.

**Forfar.**—Convener, The Right Hon. the Earl of Camperdown; Clerk, A. W. Myles; Office, National Bank Buildings, Forfar; Chief Constable, R. T. Birnie; Assessor, D. J. Carnegie.

**Haddingtonshire.**—Convener, Sir Alexander Kinloch, Bart.; Clerk, John D. Watson; Office, Haddington; Chief Constable, Lieut.-Col. Borthwick; Surveyors, Thomas Callen and Peter Clarke, C.E.; Sanitary Inspector, G. Reid.

**Inverness.**—Convener, Donald Cameron of Lochiel; Clerks, Messrs. Anderson & Shaw, Solicitors, Inverness; Office, 15, High Street, Inverness; Chief Constable, Alexander McHardy, Castle, Inverness; Surveyors, Robert Black, C.E., and C. R. Manners, C.E., both of Inverness.

**Kincardine.**—Convener, Sir Thomas Burnett, Bart., of Leys, Crathes Castle, Banchory, N.B.; Joint Clerks, Robert Tindal and Arthur Wellesley Kinnear; Office of County Clerk, County Buildings, Stonehaven, N.B.; Chief Constable, Charles George, Stonehaven.

**Kinross.**—Convener, Sir Charles E. Adam, Bart.; Clerk, W. K. Falconer; Office, County Buildings, Kinross; Chief Constable, J. T. Gordon; Surveyor, James Edwards.

**Kirkcudbright.**—Convener, W. J. Herries Maxwell, M.P.; Clerk and Treasurer, Adam Brown; Office, Kirkcudbright; Chief Constable, Alexander Davidson; Road Surveyors, J. M. Cuthbert, Robert Grant, and John Howie; Medical Officer, Dr. Macmartin Cameron, Newton-Stewart; Sanitary Inspector, George Wintrup.

**Lanarkshire.**—Convener, A. G. Barns Graham, of Lymekilns; Clerks, W. Alston Dykes and Thomas Munro; Office, County Buildings, Hamilton; Chief Constable, Captain Despard; County Medical Officer, Dr. John T. Wilson, M.D., D.P.H.

**Linlithgow.**—Convener, Thomas Hope of Bridgecastle; Clerk, John George Barron Henderson, Linlithgow; Chief Constable, Lieut.-Col. A. Borthwick; Surveyors, A. Forbes, Linlithgow, and T. Y. Ramsay, Bathgate.

**Mid-Lothian.**—Convener, Lieut.-Col. Robert Dundas, Younger of Arniston; Clerk, A. G. G. Asher, W.S.; Office, County Rooms, Edinburgh; Chief Constable, Lieut.-Col. A. Borthwick; County Road Surveyor, John Robb.

**Nairn.**—Convener, J. S. Robertson, Constabulary Gardens, Nairn; Clerk, H. T. Donaldson, British Linen Bank Buildings; Chief Constable, James Stirling; Surveyor, P. McFarlane Cram.

**Orkney.**—Convener, Colonel James William Balfour of Balfour and Trenabie; Clerk and Collector, Duncan J. Robertson, 50, Albert

Street, Kirkwall; Chief Constable, Richard Atkin, Superintendent of Orkney Police Force; Surveyor, Malcolm Heddle; Treasurer, W. P. Drever, Albert Street, Kirkwall; Medical Officer, G. R. C. Russell, M.B., C.M.; Sanitary Inspector, George Stevenson, M.R.C.V.S.

**Peebles.**—Clerk, John Ramsay Smith, Solicitor, 37, High Street, Peebles; Chief Constable, Col. Alexander Borthwick; Surveyor, Robert S. Anderson, C.E.; Medical Officer, William J. Brock, D.Sc., Edinburgh; Veterinary Inspector, John C. Johnston, M.R.C.V.S. Peebles.

**Perth.**—Convener, Col. Home Drummond of Blairdrummond; Clerk, David Marshall; Office of Clerk, County Buildings, Perth; Chief Constable, John Macpherson.

**Renfrew.**—Convener, Robert King of Levernholme; Clerk and Treasurer, James Caldwell; Office, County Buildings, Paisley; Chief Constable, Charles Harding; Road Surveyors, Robert Drummond, P. D. Alexander, and James Gibson. Medical Officer, Dr. A. Campbell Munro.

**Ross and Cromarty.**—County Convener, Sir Hector Munro of Foulis, Bart., Foulis Castle, Evanton; Vice-Convener, J. Douglas Fletcher, Esq., of Rosehaugh, Rosehaugh House, Avon; Clerk, W. J. Duncan; Office, County Buildings, Dingwall; Lord-Lieutenant, Sir Hector Munro; Chief Constable, M. Macaulay, Police Buildings, Dingwall.

**Roxburgh.**—Convener, Lord Polwarth, Mertoun House, St. Boswells; Clerk, P. Stormonth Darling, Kelso; Chief Constable, Alexander Porter, County Constabulary Office, Jedburgh.

**Selkirk.** No returns.

**Shetland.**—Convener, John Bruce of Sumburgh; Clerk, Archibald Sutherland, County Buildings, Lerwick; Chief Constable, Gifford Gray; Surveyor of Roads, John McDonald.

**Stirling.**—Convener, A. P. Waddell; Clerk, P. Welsh; Office, County Buildings, Stirling; Chief Constable, J. D. Sempill.

**Sutherland.**—Convener, Andrew Lindsay, Esq., J.P., Golspie; Clerk, Archibald Argo, Solicitor, Golspie; Office, Golspie; Chief Constable, M. Macdonald, Dornoch; Surveyor, John Baxter, C.E., Brora.

**Wigtown.**—Convener, James Drew, of Craigenallie; Clerk, C. A. McLean, Wigtown; Chief Constable, B. S. Cunliffe; Surveyors, J. D. Smith, Stranraer; D. H. Robb, Wigtown.

**Scottish Rights of Way and Recreation Society, The, Ltd.,** Edinburgh, is the society for Scotland which performs the same kind of work as the Commons and Footpaths Preservation Society of England. It has been instrumental in vindicating many rights of way in Scotland which were in danger of being lost, and is deserving of the support of all tourists, who have benefited greatly by its operations. The Hon. Secretary is Mr. C. E. W. Macpherson, C.A., 6, North St. David Street, Edinburgh.

**Secretaries, Chartered Institute of,** was founded 1891. Royal charter granted 1902. Has a membership of over 2400, and aims at the general advancement of the status of secretaries, and the promotion of personal and friendly intercourse. Secretaries of public companies, societies, institutions, etc., are eligible as fellows, and assistant secretaries, registrars, or clerks as associates. Examinations for membership—preliminary (educational), intermediate (Associates), and final

(Fellows)—are held in June and December. A Library and Reading-room has been opened, and an Employment Register is kept. *Organ, The Secretary*, monthly. President, Mr. George Parker, F.C.A.; Vice-Presidents, Mr. Alexis L. Charles, J.P., and Mr. J. Cecil Bull; Secretary, Mr. Russell Day, B.A., L.L.M. Offices, 65, London Wall, E.C.

**Seddon, Rt. Hon. R. J., P.C.**, Premier of New Zealand, was b. at Eccleston, Lancashire, in 1845, and emigrated to Australia in '63. His profession is that of a mechanical engineer. Going to New Zealand, he stood for the House of Representatives, was elected '79, and has held his seat ever since. Since '93 he has been Premier, Colonial Treasurer, Postmaster-General, Minister of Labour, and Minister of Native Affairs; from '91-3 he was Minister of Mines, and was also Minister of Public Works and Minister of Defence from '91-6. He came to England for the Jubilee celebrations, '97, and was made a Privy Councillor, and had the honorary degree of LL.D. conferred upon him by Cambridge University. During the Boer War he rendered splendid service to the Empire in leading the movement to send New Zealand volunteers to South Africa, and an address bearing thousands of signatures was presented to him at Wellington in April 1902. He came to England for the Coronation and the 1902 Colonial Conference, and visited South Africa *en route*. In 1903 he strongly supported Mr. Chamberlain's Fiscal proposals.

## SERVIA.

Formerly an autonomous province of Turkey, now a kingdom under King Peter I. of the House of Karageorgevitch. The constitution of 1889 was abrogated by the King in May '94, and an older constitution of '69 temporarily revived; but in 1903 the 1889 Constitution was restored. The executive is vested in the King and his ministers, and the legislative authority in the King in conjunction with the National Assembly or Narodna-Skuptschina and a State Council. The former consists of 130 deputies elected by universal suffrage for 4 years; the latter of 16 members, 8 nominated by the King and 8 elected by the Assembly.

## Army.

The military forces consist of the National Army and the Militia (Opoltshénié). The former is divided into three levies: 1st, men from 20 to 30 years of age, and containing permanent cadres and a reserve; 2nd, men from 31 to 37 years of age; and 3rd, men from 38 to 45 years, with no constituted cadres in peace time. The Militia consists of men from 17 to 50 years of age not in the National Army. No substitution or buying off is allowed. The annual contingent is usually about 20,500 conscripts, of whom 6000 are generally unfit for service. The peace effective is difficult to calculate, because, for economic reasons, it is usual to send men down before their proper date for release. The units are strongest in the spring, and from then gradually dwindle away until a company barely consists of more than 10 or 15 men. The army is a species of semi-militia. The maximum strength is said to be 22,000 officers and men. The war effective, according to official tables, the accuracy of which must be accepted with caution, amounts to 8110 officers, 331,900 men, 420 guns, and 39,070 horses. The number of actual combatants would be about

228,000, but a very large proportion are of the 2nd and 3rd levies, with little or no training.

The three political parties in the country are the Radicals, including the bulk of the peasants, who look to Russia for guidance; the Liberals, consisting chiefly of the town population, who are also Russophil; and the Progressives, who look to Austria for support. For local purposes the country consists of 16 departments and these into 1290 communes. State religion is Greek Orthodox, but others are tolerated. Education is backward, but progressing. It is compulsory and free. Agriculture is practically the only industry, and almost every peasant cultivates his own freehold. The chief source of wealth for the peasants is animals, and particularly swine. Pauperism is practically unknown. The chief exports are agricultural produce, animals, and animal produce, fruits, etc. The bulk of the exports go to Austria-Hungary. The chief imports are cotton, hemp, flax, wool, metals, hides and leather, machinery, haberdashery, etc. The bulk of the imports are sent by Austria-Hungary and Germany, Great Britain coming next. There are about 370 miles of railways. The capital is Belgrade, with about 70,000 inhabitants.

**Area**, 18,630 sq. m.; **pop.** 2,579,842. **Revenue**, 1902, £3,111,585; **expenditure**, £3,050,370; **public debt**, 1903, £16,634,168; **imports**, 1902, £1,792,830; 1903, £2,329,410; **exports**, 1902, £2,884,946; 1903, £2,398,695.

**Ministry: Premier and Minister for Foreign Affairs**, M. Pashitch.—**Finance**, M. Pacsu.—**Interior**, M. Protitch.—**War**, General Putnik.—**Public Works**, M. Velimirovitch.—**Commerce**, M. Adovanovitch.—**Justice and Education**, M. Nikolitch.

**Chargé d'Affaires in London**, Alexandre Z. Yovitchitch.—**Legation**, 51, Palace Gardens Terrace, Kensington, W.

**Consul-General in London**, H. W. Christmas, Esq., 9, Southampton Street, Bloomsbury Square, W.C.

**British Representative at Belgrade**, none since June 22nd, 1903).

**British Vice-Consul at Belgrade**, Hon. W. G. Thesiger, D.S.O.

## Sovereign.

**King Peter Karageorgevitch I.**, who succeeded Alexander I. on the murder of the latter, June 11th, 1903, was b. in 1846, and is a grandson of George Czerny, surnamed Karageorge or Black George, who was the first chief of the Serbian insurrection against the Turks in the beginning of the last century. He was joined by Milosch, who added to his name that of his mother, Obren. These two chiefs founded the rival families of Karageorgevitch and Obrenovitch, between which the leadership of the Servians has ever since oscillated. Czerny was murdered by the order or at the instigation of Milosch in 1817, and the latter was acknowledged as hereditary Prince of Servia in 1830, after the Turkish Government had granted the independence of the country. In '39 Milosch was compelled to abdicate in favour of his son Milan, after whose death his brother Michael III. succeeded. Michael recalled from exile Alexander Karageorgevitch, and was rewarded by being deposed through his influence in '42. Alexander then ruled till '58, when he was deposed, and Milosch was recalled in his old

age, but died in '60. Michael III. succeeded, but was murdered in '68 by the partisans of Alexander Karageorgevitch. King Milan was then elected, and ruled till his enforced abdication in favour of his son, the unfortunate Alexander I., who was murdered June 11th, 1903, together with his consort, Queen Draga. The officers who perpetrated the murder then invited the present King Peter, son of Prince Alexander Karageorgevitch who died in '84. King Peter married in '83 Princess Zorka, a daughter of the Prince of Montenegro, who died in '90. He has two sons (Prince George, born '87, Prince Alexander, born '88) and a daughter (Princess Helène, born '84), and a brother (Arsenius).

### History, 1904.

The Cabinet resigned (Feb. 3rd), but after some delay was reconstructed, with General Gruitch as Premier once more. Several of the officers implicated in the Royal murders were promoted (April 1st), Colonel Maschin being appointed Chief of the General Staff. The chief conspirator, Colonel Popovitch, was removed from the position of Aide-de-Camp General of the King to the command of the Belgrade Army Division, and the posts about the person of the King were given to non-conspirators; several of the Powers thereupon appointed Ministers to Belgrade. The Coronation of King Peter took place at Belgrade (Sept. 21st). The Crown Prince and Princess of Montenegro were the only members of a foreign reigning house present. Mgr. Innocent, Archbishop of Belgrade, conducted the service at the Cathedral, but the King placed the crown on his head himself. A reception at the Palace followed, when the Italian Envoy and the Russian, Roumanian, and Greek Ministers presented letters from their rulers. Great Britain was the only country altogether unrepresented at the function. In December the Cabinet was again reconstructed, and finally (10th) a new Administration, composed of members of the Moderate Radical party under M. Pashitch, was appointed.

**Sewage. Disposal of.** A Royal Commission was appointed during '98 to inquire and report on—(1) What method or methods of treating and disposing of sewage (including any liquid from any factory, or manufacturing process) may properly be adopted, consistently with due regard for the requirements of the existing law, for the protection of the public health, and for the economical and efficient discharge of the duties of local authorities; and (2) if more than one method may be so adopted, by what rules, in relation to the nature of the volume of the sewage or the population to be served, or other varying circumstances or requirements, should the particular method of treatment and disposal to be adopted be determined; and (3) to make any recommendations which may be deemed desirable with reference to the treatment and disposal of sewage. The members of the Commission are: Lord Idlesleigh, Major-General C. Phipps Carey, R.E., Sir Michael Foster, M.P., Col. T. W. Harding, Sir W. Ramsay, Dr. J. B. Russell, Mr. W. H. Power, and Mr. T. J. Stafford, with Mr. Frederick J. Willis, as Secretary. An interim report was issued July 23rd, 1901, giving the Commissioners' conclusions on the three questions: (1) Are some sorts of land unsuitable for the purification of sewage? (2) Is it practicable uniformly to produce by artificial

processes alone an effluent which shall not putrefy and so create a nuisance in the stream into which it is discharged? (3) What means should be adopted for securing the better protection of our rivers? The three conclusions were as follow:—**Conclusion 1:** We doubt if any land is entirely useless, but are forced to conclude that peat and stiff clay lands are generally unsuitable for the purification of sewage, that their use for this purpose is always attended with difficulty, and that where the depth of top soil is very small, say 6 in. or less, the area of such lands which would be required for efficient purification would in certain cases be so great as to render land treatment impracticable. **Conclusion 2:** We are satisfied that it is practicable. We think, therefore, that there are cases in which the Local Government Board would be justified in modifying, under proper safeguards, the present rule as regards the application of sewage to land. **Conclusion 3:** We are of opinion that the general protection of our rivers is a matter of such grave concern as to demand the creation of a separate Commission, or a new department of the Local Government Board, which shall be a Supreme Rivers Authority, dealing with matters relating to rivers and their purification, and which, when appeal is made to them, shall have power to take action in cases where the local authorities have failed to do so. The third report of the Commissioners was issued in March 1903. The first point dealt with was the relations between local authorities and manufacturers in regard to the disposal of manufacturing effluents. The Commissioners recommended that the law should be altered so as to make it the duty of the local authority to provide such sewers as are necessary to carry trade effluents as well as domestic sewage, and that manufacturers should be given the right, subject to the observance of certain safeguards, to discharge trade effluents into the sewers of the local authority, the safeguards being framed by each local authority subject to confirmation by a central authority. The second point was the need of a central authority to settle differences between manufacturers and local authorities, to protect sources of water supply, and to collect facts and investigate questions of general importance relating to the protection of water. This the Commissioners unhesitatingly recommended. The central authority should be provided with an administrative head, a bacteriologist, a chemist, an engineer with a special knowledge of geology and water supply, and a laboratory. The new authority should be a new department under the Local Government Board, and should exercise a general superintendence over the whole country in regard to the prevention of pollution of water. In Jan. 1904 an interim report was issued dealing with the pollution of tidal waters and the contamination of shell-fish. The Commissioners found that statute law does not prohibit the discharge of polluting liquid into tidal waters, and were of opinion that injury to health and fisheries may be caused by the discharge of unpurified sewage into tidal waters, and that some alteration of the law is required. Tidal waters should be placed under the jurisdiction of a competent authority with power to prevent the taking of shell-fish for human consumption from any position in which they are liable to the risk of dangerous contamination, and to enforce restrictions as regards pollution.

## THE SESSION OF PARLIAMENT, 1904.

FEB. 2nd to AUG. 15th, 1904.

[1] This article gives an outline of some of the principal business transacted and legislation accomplished during the Parliamentary Session of 1904.

As in previous editions, **Military, Naval, and Educational matters** are dealt with under **ARMIES, NAVIES, and EDUCATION** in the body of the work, though some allusions to the Parliamentary proceedings regarding them will be found in Part I. of this article.

The **Budget proposals** are given in the headed article **FINANCE OF THE UNITED KINGDOM** (p. 183), but the discussions upon them are noticed under the heading **Finance Bill** (sect. 41).

The **Fiscal Question** has an article to itself, wherein the Parliamentary standpoint is dealt with (p. 196).

Under **PARLIAMENT** will be found biographical lists of **Lords and M.P.s**, and matters of **party policy** are referred to under the heading **Political Parties** in the same article.

For convenience of reference the subjoined article is broken up into numbered sections, and divided into three parts:—

- I., containing the **King's Speech**, and having reference to a number of **miscellaneous matters of interest**;
- II., being devoted to **proceedings on Bills** and an analysis of some of the **principal Acts passed**; and
- III., to **reports of Parliamentary Committees**.

### I. KING'S SPEECH AND MISCELLANEOUS.

[2] The 5th session of the 27th Parliament of the United Kingdom and the first of H.M. King Edward VII. was opened by His Majesty in person, accompanied by Queen Alexandra, on Feb. 2nd. H.M. Speech opened with the customary reference to foreign affairs, including the arbitration agreements concluded with the **French Republic**, and in process of negotiation with the **Governments of Italy and the Netherlands**, the agreement with **Portugal** for the settlement by arbitration of the frontier-line of the **Barotse Kingdom**, and the decision of the **Alaskan Boundary Commission**. The **military operations in Somaliland** were referred to, and H.M. said: "I have watched with concern the course of the negotiations between the **Governments of Japan and Russia** in regard to their respective interests in **China and Korea**. A disturbance of the peace in those regions could not but have deplorable consequences. Any assistance which my Government can usefully render towards the promotion of a pacific solution will be gladly afforded." As to **Macedonia**, H.M. said: "I have authorised the employment of a staff officer of my Army aided by other British officers for this purpose"—*i.e.* to assist in the reorganisation of the gendarmeries. Reference was made to the fact that **Australia and New Zealand** had passed laws under which they assumed a larger share than heretofore in the general scheme of **Imperial Defence**, and to the **New Zealand Tariff**, giving a preference to the produce of the United Kingdom. H.M. proceeded: "The insufficiency of the supply of the raw material upon which the great cotton industry of this country depends has inspired me with deep concern. I trust that the efforts which are being made in various parts of my empire to increase the area under cultivation may be attended with a large measure of success."

"With the concurrence of the Chinese Government, a political mission has entered **Thibetan** territory in order to secure the due observance of the Convention of 1890 relating to **Sikkim and Thibet**. A Chinese official has been despatched from **Peking** to meet it, and I trust that an arrangement may be arrived at with the Chinese and Thibetan authorities which will peacefully remove a constant source of difficulty

and friction on the northern frontier of my Indian Empire. Papers on the subject will be laid before you."

The **Estimates** for the year had been framed with the utmost desire for economy, and the possibility of diminishing the burden of **naval and military expenditure** was being carefully considered in connection with the general problem of **Army and War Office reform**.

Measures were promised dealing with the immigration of criminal and destitute aliens into the United Kingdom, amending the law with respect to licences for the sale of intoxicating liquors in England, affecting valuation authorities and the preparation of valuation lists, relating to education in Scotland, amending the **Labourers Acts** and the **Housing of the Working Classes Act** in Ireland, amending the **Workmen's Compensation Acts**, amending the law relating to **Public Health**, dealing with the **Hours of Employment in Shops**, consolidating the enactments relating to **Naval Prize of War**, removing, after the termination of the present Parliament, the necessity for re-election in the case of acceptance of office by Members of the House of Commons, supplementing the powers of the **Congested Districts Board** in Scotland, and amending the law relating to **Sea Fisheries**.

[3] The **Address in reply to the King's Speech** was moved and seconded in the **House of Lords** by **Earl Fitzwilliam** and **Lord Hylton**, and in the **Commons** by **Mr. L. Hardy** and **Mr. Plummer**. For some time after the formal opening the **Prime Minister** was unable through indisposition to be present, and he only resumed his parliamentary duties on Feb. 25th. In his absence **Mr. Austen Chamberlain**, **Chancellor of the Exchequer**, and the **Home Secretary** acted on occasions as the mouthpiece of the Ministry. The **Marquis of Lansdowne** was now **Leader of the Upper House** *vice* the **Duke of Devonshire**. In raising, at the meeting of Parliament, his pet grievance, the interference of peers at elections, **Mr. J. Lowther** exhibited such tokens of indisposition that his decease some months later caused no surprise. The veteran **Sir William Harcourt** saw his son "**Lulu**" returned for **Rossendale**, and made his last parliamentary appearance. The death of **Mr. Powell Williams** removed a well-known figure from the House. An interesting incident of the Session was the entertainment at dinner by the commercial committee of the Houses of Parliament of

Baron d'Estournelles de Constant, the eminent economist, and the presentation to him on the occasion of some handsome pieces of plate.

[4] The **Prorogation Speech** was delivered by the Lord Chancellor (Aug. 15th). It referred to H.M.'s visits to the King of Denmark at Copenhagen, and to the German Emperor at Kiel. The agreements with France "will not only be advantageous in themselves to all concerned, but will have the effect of materially strengthening the ties of friendship which now so happily unite my subjects and the citizens of the French Republic." The King of Italy's Award as to the boundary between **British Guiana and Brazil** would be at once put into effect.

The military operations in Somaliland had ended in the infliction of a severe defeat upon the Mullah's forces, and, with the exception of a temporary garrison, the troops had been withdrawn. The Speech proceeded:—"Hostilities are, I regret to say, still in progress between **Russia and Japan**. Upon the outbreak of the war, I issued a Proclamation declaring my neutrality, and enjoining upon all my people the strict observance thereof. Important questions involving the treatment of neutral commerce at the hands of belligerents have arisen in connection with these operations. The issues involved, which are of the gravest moment to the trade of my Empire, will, I trust, be amicably settled, and without prejudice to the vast commercial interests of this country. My Government will energetically support my subjects in the exercise of the rights recognised by international law as belonging to neutrals."

Allusions were made to the reorganisation of the **Macedonian gendarmerie**, and the introduction of an elective element into the **Legislative Council of the Transvaal**; and the hope was expressed that the **Thibetan Mission**, which had arrived at Lhasa, would, by conference with the Thibetan authorities, in conjunction with the Chinese representative at Lhasa, be able to arrange terms which would facilitate trade and put an end to the difficulty and friction which had arisen on the northern frontier of India. References to the reorganisation of the Army and its central administration, to the Licensing Act, the Education (Wales) Act, and the Early Closing of Shops Act, concluded the Speech.

[5] **Board of Trade and Local Government Board, position and duties of.** In accordance with a promise made in the House on March 3rd, 1903, a committee, the Earl of Jersey being chairman, was appointed by the Treasury Board, "to consider the position and duties of the Board of Trade and the Local Government Board, and to report whether any, and if so what, alterations should be made in the constitution and status of those offices: also whether in the interests of administrative efficiency any rearrangement of duties between those and other Government departments is desirable." As regards the Board of Trade, the Committee reported that its present constitution dates from 1786, and among the members appointed of it were the Archbishop of Canterbury, the First Lord of the Treasury, the principal Secretaries of State, the Speaker of the House of Commons, the Speaker of the Irish House of Commons, and quite a number of others, including a president. The Committee regarded the above constitution as

obsolete. They understood that the Board never meets, and that the responsibility for the conduct of its business rests on the President. His salary is by statute not to exceed £2000 a year, and the Parliamentary Secretary is paid £1200 a year. The Committee reported that the work of the Board had greatly increased in importance of recent years, as new duties and responsibilities had been successively imposed upon it. Since 1852 there had only been two occasions on which the President was not included in the Cabinet. They recommended that the salary of the President should be raised to £5000 a year, that of the Parliamentary Secretary to £1500, and that of the Permanent Secretary to £2000. In order to indicate more clearly the functions of the Board of Trade it might be deemed desirable to give to its head the title of "Minister of Commerce and Industry."

The present constitution of the **Local Government Board** dates from 1871, and "since the Board consists entirely of members of the Cabinet," the Committee "do not recommend any change in its constitution." The administrative business of the department is very considerable, and the Parliamentary business is especially heavy. On the other hand, the Board is not charged with the main responsibility for the decision of great questions of policy, and its jurisdiction is limited to England and Wales. The Committee recommended that the salary of the President should be raised to £3000 a year, that of the Parliamentary Secretary to £1500, and that of the Permanent Secretary to £2000. The report was dated May 10th, 1904.

[6] **Chinese Labour.** The introduction of Chinese labour into the Transvaal was frequently referred to in the course of the Session. The **Marquis of Ripon** called attention (Feb. 11th) to further correspondence relating to the affairs of the Transvaal and Orange River Colony, with special reference to the question of the employment of Chinese labour in the Transvaal. The Ordinance for the employment of such labour, under the conditions prescribed, was, he said, without precedent in any part of H.M.'s dominions. The **Duke of Marlborough** said the evidence given before the Labour Commission justified the action of the Government. All the engineers and experts connected with the mining industry were unanimous in their conclusion that white unskilled labour was quite impracticable owing to the extreme cost. The **Archbishop of Canterbury** thought that they should not assent to the scheme until they knew it would not be a source of moral and social evil. The **Marquis of Lansdowne** said the experiment was to be tried on a limited scale and with every precaution which experience could suggest.

On the Address (Feb. 16th) **Mr. H. Samuel** moved an amendment, representing that it was highly inexpedient that sanction should be given to the Ordinance permitting the introduction of indentured Chinese labourers into the Transvaal until the approval of the colonists had been formally ascertained. **Mr. Lyttelton** traversed the allegation that the Government had acted on insufficient evidence, and contended that when they assented to the importation of Chinese they were convinced that this Asiatic labour would not be a substitute for but would be supplemental to the labour already obtainable in the Transvaal. It

would, they believed, lead to an increase in skilled white labour. **Mr. S. Buxton** urged that the sanction of Parliament to the Ordinance should be withheld. **Sir H. Campbell-Bannerman** (Feb. 17th) maintained that if a sufficiency of native labour was not procurable, the alternative of white labour ought to be tried. He should prefer to see the development of the Transvaal delayed rather than that this country should do a great wrong and bring upon itself the opprobrium of the world. The amendment was rejected by 330 votes to 172.

**Dr. Macnamara**, being dissatisfied with the answers which the Colonial Secretary had given to questions (Feb. 22nd), moved the adjournment of the House in order to call attention to the introduction of indentured Chinese labour into the Transvaal before the Ordinance and the regulations for carrying it into effect had been discussed in Parliament in their complete and operative form." **Mr. Lyttelton** repudiated the charge that the Government were about to recognise a state of slavery. It was absurd to ask the Government to suspend the operation of the Ordinance until all the regulations which it might be necessary to make should have been issued. The importation of indentured native labour under restrictions was no novelty in the British Empire. **Mr. Asquith** complained that the Ordinance was silent upon the hours of labour and the wages to be paid. The motion was rejected by 212 votes to 156.

**Mr. Balfour** stated (March 14th) that as His Majesty had not disallowed the Ordinance, it had become law in the colony.

**Lord Coleridge** moved (March 18th) that their lordships' House disapproved of the importation of Chinese labourers into the Transvaal under the recent Ordinance until the grant to the country of full representative government. The **Archbishop of Canterbury** could not ask the Government to forbid that which they thought to be right, though he was terribly afraid that the introduction of Chinese labour would throw back native life and energy. The **Marquis of Lansdowne** having declared that the Government was prepared to accept full responsibility for the Ordinance and the regulations, the motion was defeated by 97 votes to 25.

**Sir H. Campbell-Bannerman** moved (March 21st) a resolution censuring the Government for having advised the Crown not to disallow that Ordinance for the introduction of Chinese labour into the Transvaal. **Mr. Lyttelton** maintained that the Transvaal was in favour of the importation of Chinese labour, and pointed out that while 26 meetings had been held in favour of the new policy, only five or six had been held against it. **Mr. Balfour** dwelt on the abyss separating the white man from the black, and on the absurdity of supposing that the rough industrial work of the colony could be done by white men. If the Liberals were in power they would act in the same way as the Government were acting. The motion was rejected by 299 votes to 242.

The **Marquis of Lansdowne** (June 24th) assured the **Marquis of Ripon** that the outbreak of beri-beri among the Chinese labourers in South Africa was receiving careful attention. The Government would see whether the steps taken by the local authorities were sufficient, and supplement them if necessary.

In Committee on the Colonial Office Vote

(July 21st) **Sir Henry Fowler** called attention to the Transvaal Ordinance dealing with the importation of Chinese labour, and contended that it established an apprenticeship which was like slavery. **Mr. Chamberlain** urged that it would not be wise for Parliament to interfere with any decision arrived at in South Africa, unless it could be shown that some direct Imperial interest was at stake. He believed that the importation of Chinese labour would lead to more white labour being employed. **Mr. Lyttelton** said it would be hypocritical on our part to refuse to sanction the Transvaal Ordinance, considering that we had allowed British subjects to work under very similar ordinances in Guiana and elsewhere. The minimum Kaffir wage in the colony was 47s. a month, and **Lord Milner** assured him that the average wage which would be earned by the coolie was 50s. But in order to protect the Kaffir against unfair competition, if it should turn out that the coolie's remuneration fell below 50s. the present minimum wage of 30s. would be raised to 45s.

[7] **Crown Agents.** The Earl of Portsmouth moved (June 10th) for a select committee of inquiry into the system by which the Crown Agents for the Colonies are paid, and their methods of transacting their official duties. He did not desire to abolish the office, but merely to bring to light the manner in which it was conducted. The Duke of Marlborough, on behalf of the Government, said there was no justification for assuming that there was any inducement on the part of the Crown Agents—men of high character—to buy in a dear market in order to increase the amount of their percentage; and contended that the present system was the best that could be devised. The **Marquis of Ripon** regretted that the Government did not propose to grant an inquiry, and was sorry in the interests of the Crown Agents themselves. The Earl of Onslow said **Mr. Chamberlain** had gone so fully into the matter that he did not see any necessity for the inquiry. The motion was negatived.

[8] **Dundonald, the Earl of, and the Canadian Government.** **Mr. Lloyd-George** obtained leave (July 10th) to move the adjournment in order to discuss "the conduct of Major-General Lord Dundonald, late Commander of the Militia in Canada, in taking part, whilst still an officer in the British Army, in political agitation against His Majesty's Government in the Dominion of Canada" (see Canada). The hon. member said that nothing could be more mischievous than for an Imperial officer to start an agitation against a Colonial Government, criticising and bringing charges of corruption against it, and practically throwing in his influence with one political party. The motion was seconded by **Mr. Churchill**. **Mr. Arnold-Forster** replied that no advantage was to be gained by discussions of this kind, except to make bad blood between two great branches of the Empire. Nothing more could be imputed to Lord Dundonald than want of judgment. When his lordship was discharged from office he became an officer on half-pay, and had a perfect right to express his views on political questions or to stand for the Dominion Parliament. He thought, however, it was undesirable that he should continue to act as he had been acting, and the War Office had requested him to return. The motion was negatived, leave to withdraw it being refused.

[9] *Education Questions.*

**The Welsh Difficulty.** Mr. Lloyd-George (March 14th), on the vote on account, complained of the administration of the Education Act of 1902, contending that the Board of Education had issued draft orders which were unfair to Nonconformists, and that these orders with the Act had had the effect of putting non-provided schools in Nonconformist districts to too great an extent under the control of the clergy. It had been shown by the recent county council elections that Wales was practically unanimous in its opposition to the Act. Mr. Haldane hoped the Government would amend the Church clauses of the statute. Sir W. Anson replied that the Welsh authorities were ready to administer the Act, but wished to do it in their own fashion. He doubted if the dissatisfaction which prevailed was a genuine outburst of popular opinion, and was inclined to regard the passive resistance movement rather as organised for political purposes than as a real expression of conscientious objection. A fair trial had not been given to the Act in Wales, and if any orders which were issued for the purpose of the Act were not successful, further Parliamentary powers would be asked for. Sir E. Grey said it was clear from this speech that the Government had no intention of amending the Act. Sir J. Gorst blamed the Welsh councils, and justified the Board of Education. Lord H. Cecil, while unable to accept any compromise which gave a preference to undenominational teaching, would be ready to support a rational system under which the local authority would be empowered to teach in its schools any religion the parents might favour. Mr. Balfour, replying after further discussion, complained of what he described as the amazing falsifications in which many members of the Opposition had indulged. He agreed that there was a body of doctrine common to all Christian sects which might with advantage be taught to children in our schools, but that doctrine could not be settled by Act of Parliament. He thought religious men of different denominations were becoming sick of these disputes, but the strife could not be brought to an end so long as Nonconformists considered that the Cowper-Temple clause ought in no circumstances to be trenched upon. He repeated in substance what Sir W. Anson had said as to the need for further legislation if the state of things in Wales were not brought to an end. Attempts to bring about a compromise failed, and legislation was afterwards initiated by the Government (see Education (Local Authorities Default) Bill, sect. 36, and the Bishop of St. Asaph's proposal, Education (Transferred Schools) Bill, sect. 39, *post*.)

Mr. Claude Hay (April 20th) moved a resolution under which the Board of Education would require arrangements to be made by the local authorities whereby every child compelled to attend a public elementary school should have received proper nourishment before being subjected to instruction, and that in cases in which proper food had not been provided for the child by its parents, it should be first supplied by the local education authority, and subsequently suitable action taken to recover the cost. This was seconded by Sir J. Gorst. Sir W. Anson reminded the House that a committee was considering this subject. He agreed that much of the money devoted to education would be

wasted if the children were hungry. Something in the way of remedy could be effected without legislation, such as the gradual teaching of the laws of health and of cookery. But an extension of the system of truant and industrial schools was necessary in some cases, the nourishment for the body being increased, together with more manual training, while the burden on the mind was decreased. For that legislation would be necessary, and he promised to consider the subject. The debate stood adjourned at midnight.

Mr. Cripps (August 10th) discussed the minutes of the Board of Education regarding denominational education, and asserted that in many cases the local authorities had put almost insuperable difficulties in the way of religious instruction. Sir J. Gorst inquired whether effect was to be given to the main recommendations of the Committee on Physical Degeneration as regards school-children. Sir W. Anson replied that he did not propose to go into the question of underfed children until he could submit a plan. The Board had no power to make a general pronouncement as to the hours for religious instruction, and no pressure had been put upon the education authorities to extend the time they proposed to allow.

[10] *Government Departments (Wages).* Mr. Shackleton proposed (March 23rd) "That this House is of opinion that the wages paid to the unskilled workers in Government factories and shipyards should be not less than the standard rate of wages paid for similar work in other employments in the respective districts." Captain Norton seconded, and Sir J. Gorst supported. Mr. Victor Cavendish announced that the Government would accept the resolution, and that, with due regard to the ratepayers, they were determined to act as model employers and thus set an example to others. Mr. J. Burns moved to add at the end of the resolution the words, "and the standard rate of wages shall be those recognised by associations of employers and in practice obtained by the trade unions in such trades." Mr. Balfour, speaking after further debate (in course of which it had been represented that the Government wages were inadequate), said that before accepting or opposing the amendment the Government must have time for consideration. Mr. Shackleton claimed to move the closure, but the Speaker withheld his assent, and the debate stood adjourned; and no opportunity could be found for resuming it.

[11] *Irish Affairs.*

Mr. Boland (May 4th) moved a resolution calling for the immediate repeal of the Crimes Act. Mr. W. Moore and Colonel Saunderson defended the Act; Sir H. Campbell-Bannerman supported the motion for its repeal, which was opposed by Mr. Wyndham, and ultimately rejected by 197 to 124.

Mr. Wyndham stated (Feb. 3rd) that the Government did not intend to introduce any measure dealing with university education. Mr. Sheehy (Feb. 24th) moved a resolution declaring the action of the Treasury in withholding the Irish Equivalent Grant for Technical Education to be a violation of the intention of Parliament, and a gross injustice to Ireland. In reply the Government asserted that Ireland had been treated in the withdrawal of the

special aid grant in the same way as England and Scotland, but having regard to the representations of hardship a vote of £3500 would be put upon next year's estimates. It was hoped that the model schools might remain available for technical education work, and if it were found possible to effect further savings in the Irish judiciary they would be left available for the same purpose. The motion was rejected by 142 to 80.

Mr. J. Redmond (Mar. 15th) moved to reduce by £100 the vote for the expenses of the Commissioners of National Education in Ireland, as a protest against a circular issued by them, the effect of which, he said, would be to diminish the teaching of Irish to young children. The Chief Secretary announced that the Education Board were prepared to modify the circular, and he himself agreed that children in Irish-speaking districts ought not to be prevented from obtaining instruction in their own language. Mr. Redmond's amendment was carried against the Government by 141 to 130. A motion to report progress was later on, when Government reinforcements had arrived, beaten by 171 to 146.

Mr. Nannetti (April 18th) moved that the system of primary education in Ireland is fundamentally defective, and has proved injurious in its operation. Sir J. Gorst expressed the opinion that it was high time a serious effort was made to give the youth of Ireland similar educational advantages to those enjoyed by the people of Great Britain. Mr. Wyndham admitted that there was room for improvement in Irish education, but pointed out that the difficulty was to hit upon a scheme of reform which would be generally acceptable. The resolution was negatived on a division.

Mr. McVeagh (Mar. 22nd) moved a resolution censuring the Government for its persistent neglect to take steps to abolish the evil arising from floods, and calling on them to institute a scheme for the effective draining, dredging, and improvement of the inland waterways of Ireland. Mr. Wyndham wished it were possible to do something to improve Irish waterways, but no money was available for grants to that end at present. It was stated that the Irish members on both sides were in favour of the motion, and on a division the Government majority fell to 16, the figures being:—For the motion, 114; against, 130.

The Land Question was discussed (Feb. 18th), when Mr. Wyndham promised a measure which would remove ambiguities in the parent Act (see sect. 46 *post*), and explained what had been done during the three months in which it had been in operation, and maintained that the zone system had no effect upon prices.

The substance of a far more interesting statement of the Chief Secretary on July 7th as to the progress made in connection with the Purchase Clauses of the Act, was that under sect. 6 (Purchase of Estates by Land Commission) advances had been applied for in respect of 26 estates involving 2403 holdings and £678,458, proceedings being pending in respect of 11 other estates. Under sect. 7 (Sales in Court of Land Judge) advances had been applied for in respect of 28 estates involving 987 holdings and £301,680. Requests had been issued regarding 19 other estates, and advances had been sanctioned in the cases of 9, involving 104 holdings and £67,749. As regards sales directly between landlord and tenant advances had

been applied for respecting 682 estates involving 14,476 holdings and £6,630,502.

On the motion of Mr. Murphy, seconded by Mr. T. W. Russell, it was resolved (April 13th) that the time had arrived for taking immediate steps to wind up the business of the Land Judge's Court in Ireland in the interests of all concerned.

A resolution of Mr. Swift MacNeill condemning the attitude of the Government in neglecting the introduction of legislation for the purpose of bringing the Royal Irish Constabulary and the Dublin Metropolitan Police under the control of popularly elected bodies, was (Mar. 29th) opposed by the Attorney-General for Ireland, who at the same time praised the county councils for the manner in which they had discharged duties, and negatived by 157 to 65.

Mr. J. F. X. O'Brien (Feb. 23rd) moved that excessive railway rates and defective transit facilities generally constitute a serious bar to the material advancement of Ireland, and should receive immediate attention from the Government. Mr. Wyndham replied that the Government were doing all they could without resorting to heroic measures. The motion was rejected by 121 to 87.

(References to the Financial Relations controversy, and the Nationalist protest against the increase in the Tea Duty, will be found in the debates on the Finance Bill, sect. 41 *post*.)

## [12] Navy Matters.

The House considered (Feb. 23rd) a supplementary estimate of £1,270,000 for the Navy, of which £770,000 was for the purchase of two battleships which had been ordered to be built for the Chilean Government. The total price to be paid for these by us was £1,875,000, and the balance over and above the amount now asked for would appear on the ordinary estimate for 1904-5. Mr. E. Robertson remarked that they had been told last year that these vessels were not suitable to our needs. The Chancellor of the Exchequer replied that the price of the ships fell, and the circumstances had altered since then. In consequence of the above purchase, only two instead of three battleships would be laid down in 1904. Sir E. Reed said these Chilean vessels would be the fastest battleships in the Navy.

In explaining the Navy Estimates, the number of men and boys proposed being 131,100, and the total amount asked for being £36,889,000, as opposed to £34,457,000 for 1903-4, more than half the increase being due to the purchase of the Chilean ships, Mr. Pretyman (Feb. 29th) justified the amount of the votes as being necessary to give effect to the decision of the country in favour of the maintenance of the Two-Power Standard of efficiency. Explaining that this power could only be strictly applied to battleships, he stated that the total number of these, French and Russian, built and building, was 64, of French and German it was 61 while our own figure was 63. It was, he pointed out, not desirable to build too many submarines at once, as improvements in this class of craft were constantly being made.

Mr. H. Roberts moved an amendment, which was seconded by Mr. Buchanan, to the effect that, in view of our increasing naval expenditure, and in the interests of international peace, the Government should enter into com-

munications with the great naval Powers in order to ascertain whether they would agree to reduce their shipbuilding programmes and to adjust upon some permanent basis their relative naval strength. Mr. Arnold-Forster pointed out that Lord Goschen, when First Lord, had stated that this country would be glad to consider any proposal from other Powers for a reduction of naval armaments; and this pronouncement having been made, we were justified in waiting for other countries, and were still prepared favourably to consider any proposal of the kind. Mr. E. Robertson said he estimated that we should expend on the Navy this year, including expenditure under the Naval Works Acts, upwards of £42,000,000. Mr. Haldane considered that until we took the initiative in the matter of disarmament nothing would ever be done. Sir H. Campbell-Bannerman supported the amendment, which was in the end defeated by 174 to 122.

Mr. E. Robertson contended (March 1st) that the Admiralty were considerably exceeding the Two-Power Standard. Sir M. Hicks-Beach questioned the necessity of the proposed large outlay on new construction, and advocated a system of short service for the Navy, followed by service in the Reserve. Sir E. Grey suggested whether it would not be possible to come to some arrangement with France for reduction of naval armaments if our present good relations with that country continued. Mr. Balfour expressed the belief that the Admiralty had not exceeded the Two-Power Standard, with a margin. We could not do less than lay down ships when other nations were augmenting their fleets. Mr. Gibson Bowles (March 2nd) contended that our present naval strength represented a Three-Power and not a Two-Power Standard.

Lord Brassey having in the House of Peers (March 8th) called attention to the Naval Reserve, and suggested an increase in its number, and a reduction of the permanent men of the Navy, the Earl of Selborne stated that the Fleet Reserve now numbered 8500, the Naval Reserve nearly 27,000, and the Volunteer Reserve 2000, showing a total increase of from 25,000 to about 37,000 men. Mr. Lee (April 12th) assured the House that under the new arrangements skill in the use of torpedoes was encouraged just as much as skill in gunnery. Mr. E. Robertson stated that in nine years we had spent £70,000,000 on new construction as compared with £82,000,000 spent by Russia, France, and Germany together. Sir C. Dilke thought it was not too much to say that German shipbuilding was directed against our supremacy, and though he was prepared to go a long way in the direction of economy, it was necessary to be very cautious in reducing the Estimates. Mr. Pretymann announced in June that there would be no modification of the Admiralty programme in consequence of the events that had occurred in the Far East, adding (Aug. 4th) that the reduced expenditure of France upon her Navy and the effect of the war upon the Russian Fleet would not be disregarded by the Admiralty, though he could give no assurance that there would be any reduction in naval expenditure next year.

The Chancellor of the Exchequer, speaking on the Finance Bill (July 28th), said it was the hope of the Government that in the years to come the colonies would take a larger share

in all that concerned the Empire, including its finance.

[13] **Parliament, Sittings of.**—Lord Newton (Feb. 23rd) called attention to the resolution adopted by the House of Peers (May 25th, 1903) to the effect that Parliament ought to rise at the beginning of July, and that the time required for the due transaction of public business should be provided by Parliament sitting during a longer period of the winter than was customary at present; and asked the Government whether they proposed to take any steps with reference to it. The Marquis of Lansdowne undertook to bring the matter under the notice of the Prime Minister, and some months later—July 19th—stated that he had fulfilled his promise, and understood from Mr. Balfour that he saw no prospect of any change of the kind being agreed to by the House of Commons. If they had an autumn session there was a probability of the House sitting from November to the end of July.

In the Commons (May 19th) Dr. Farquharson asked for a committee to consider the existing rules of procedure, criticising adversely the arrangement for meeting at two o'clock. Mr. Balfour, in defending the present regulations, urged that the sittings could only be shortened materially by members cutting down their speeches. The new rules worked well, and he saw no necessity for inquiry. Sir H. Campbell-Bannerman objected that the new rules prejudicially affected public business, although they might possibly conduce to the comfort of individual members. Sir C. Dilke regarded as a public scandal the present system under which the discussion of questions of interest could be blocked.

[14] **Payment of Members.**—Mr. A. Henderson (May 11th) moved "That it is desirable and expedient that, in order to give constituencies a full and free choice in the selection of Parliamentary candidates, the charges now made by the returning officer to the candidates should be chargeable to public funds, and that all members of the House of Commons should receive from the State a reasonable stipend during their Parliamentary life." This was seconded by Mr. Fenwick, and supported by Sir E. Grey, but opposed by Sir Carne Rasch and the Secretary for Scotland, and defeated by 221 to 155.

[15] **Post Office Affairs** (see also **Telegraph Money Act**, sect. 92, *post*).—Lord Stanley (May 12th) made a general statement as to the work of his department during the year. A large number of colonies had agreed to his proposal under which British postal orders would be issued therein, as well as in the United Kingdom, and he was hopeful that most, if not all, of them would in a few months come in. The graduated postal order system had apparently met a real public want. The limit for money orders had been raised from £10 to £40. He had written to the Australian colonies stating that if they would give this country an assurance that at a definite date they would institute penny postage between themselves and this country, he was ready, not to wait for them, but to institute such a postage from this country to Australia immediately. On June 16th Lord Stanley informed Mr. Lough of his conclusion that it would not be in the public interest to exercise the compulsory powers giving the right to purchase reserved to the Postmaster-General under clause 17 of the

**National Telephone Company's licence.** He should therefore not give notice to the company under that clause. He was unable to say whether the negotiations then in progress with a view to a voluntary sale would lead to a satisfactory result or not. If these negotiations failed—and he could not say whether they would fail or not—the circumstances would have changed; and then he should have to consider what action to take as regards the telephones.

Sir A. Rollit (August 9th) called attention to the report of the Departmental Committee on the grievances of the various branches of the postal staff, and asked if it were intended to act upon the recommendations of the Committee. Lord Stanley, in reply, remarked that the Committee admitted that the Department had no difficulty in attracting as many candidates of satisfactory character as were required, but went on to say that the men were discontented, and that therefore their wages should be raised. This he regarded as a direct encouragement to agitation. At the same time he recognised that according to the report some employees were in a position which called for amelioration, and promised to consider the whole matter during the recess.

[16] **Royal Declaration, The.**—The Duke of Norfolk moved (July 1st) "That whereas, under the Bill of Rights and the Act of Settlement, the Sovereign is required to join in communion with the Church of England as by law established, and ample securities are provided to ensure the Protestant succession to the Crown; and whereas in addition to these securities the Sovereign is required, immediately after his accession, to make a declaration, commonly called the Declaration against Transubstantiation, which is deeply and needlessly offensive to many millions of loyal subjects of His Majesty, this House is of opinion that the declaration aforesaid ought to be amended so as not to include the condemnation or repudiation of specific doctrines which form part of the conscientious beliefs of any of His Majesty's subjects." To this the Earl of Jersey proposed as an amendment "That this House, while desirous that no expression unnecessarily offensive to any of his subjects should be required of the Sovereign on his accession to the throne, is of opinion that nothing should be done to weaken the security of the Protestant succession." The motion of the Duke of Norfolk was negatived without a division, and the amendment of the Earl of Jersey put and agreed to. Lord Stanmore then proposed to add, "And that a select committee be appointed to consider whether any unnecessarily offensive words may not be expunged from the King's declaration without incurring such danger." The Duke of Northumberland moved the previous question. The Marquis of Lansdowne, replying to the Duke of Norfolk, said if a *rapprochement* was arrived at, the Government would be prepared to consider the question and appoint a committee. The previous question was supported by the Marquis of Salisbury, and carried by 103 to 36.

[17] **Salisbury, the late Marquis of.** At the meeting of Parliament (Feb. 2nd) tributary references were on the Address made to the public services of the ex-Premier, who had passed away on Aug. 22nd, 1903. Mr. Balfour moved (May 17th) an address praying that His Majesty would give directions that a monument be erected in Westminster Abbey, to the

memory of the late Marquis, "with an inscription expressive of the high sense entertained by the House of his rare and splendid gifts and of his devoted labours in Parliament and in great offices of state"; and assuring His Majesty that the House would make good the expenses attending the same. In proposing this the Prime Minister said he moved this national recognition of a man who held the office of Prime Minister for a longer time than any one who had served the Crown in that capacity since the great Reform Act. "Not until the Chancelleries of Europe had given up to future historians their secrets, not until the controversies in which we had been engaged had lost their living interest and had become the property of the student and historian, would our children be able to judge how great and beneficent was the part played by Lord Salisbury in the foreign history of this country." Sir H. Campbell-Bannerman, in supporting, observed that "Lord Salisbury's exalted character, his honesty of purpose, his independence of thought, his broad views, and his steadfast devotion to duty won him the regard and confidence of men of all shades of opinion." Mr. J. Redmond, speaking as the leader of the Irish Parliamentary party, agreed that Lord Salisbury was intellectually a great man, but he was throughout his career the consistent and vehement opponent of every extension of the liberties of the Irish people. In the circumstances the Irish Party could not associate themselves with the project in this resolution. The motion was supported by Sir A. Thomas and Col. Saunderson, and in the result agreed to without a division; and a concurring resolution was adopted by the Lords, on the same date, at the instance of the Marquis of Lansdowne, supported by Earl Spencer.

[18] **Sugar Convention.** Mr. Lough moved (March 2nd) that the decisions of the Permanent Commission of the Brussels Sugar Convention had operated so as to inflict grave injury on the manufacturers of sugared products in the United Kingdom as compared with their foreign rivals, and that the Convention has failed to confer the anticipated benefits on the West Indies. Mr. Kearley seconded. Mr. Churchill said the policy of Mr. Chamberlain in regard to sugar had failed. Mr. G. Balfour maintained that sufficient time had not elapsed to enable a fair estimate of the value of the Convention to be formed, and said he had been told that the sugar refiners of the country were satisfied with its working. The motion was rejected by 202 votes to 162.

[19] **Unemployed, The.** Mr. Keir Hardie (Feb. 19th) moved on the Address an amendment, which was seconded by Mr. Crooks, expressing regret that the Government had not seen fit to recommend the creation of a department of labour empowered to deal effectively, in conjunction with local authorities, with the problem of the unemployed by the execution of public works, afforestation and the encouragement of agricultural pursuits. Mr. Long, on behalf of the Government, while expressing great sympathy with the deserving unemployed, did not believe there was any necessity for the creation of a labour department, for this, he considered, could not do more than could be done by the Local Government Board and the Board of Trade. Afforestation on a large scale had never yet been undertaken by the

State, and if it were it would not benefit the majority of the unemployed who had no experience of work on the land, while men who were able to do ordinary agricultural work would find little difficulty in obtaining employment. Mr. Asquith hoped the Local Government Board would encourage combined action on the part of the Metropolitan local authorities in times of distress, when labour had to be provided. The amendment was defeated by 231 votes to 151.

[20] **Votes of Mariners and Railway Servants.** Sir Elliot Lees proposed a resolution regarding mariners' votes, which after some discussion was amended at the instance of Mr. Bell. Mr. Grant Lawson in the first instance objecting to the change, and (March 8th) agreed to as follows: "That this House is of opinion that means should be given to seamen and fishermen, railway servants, and others to record their votes at Parliamentary elections, when by reason of their calling they will be absent on duty on the day of the poll."

[21] **Whitaker Wright, the case of Mr.** On the Address Mr. Paulton (Feb. 2nd) observed that in 1903 the Law Officers held that there was no hope of a prosecution succeeding against Mr. Whitaker Wright, though at the same time the Prime Minister gave a pledge that the law should be amended. Why, he asked, was some reference not made in the King's Speech to this proposed amendment of the law? The Attorney-General replied that the King's Speech did not mention every measure contemplated by the Government, and he still held that an amendment of the law was urgently required. The decision not to prosecute Mr. Whitaker Wright was not a decision of the Government but of the Attorney-General, who was solely responsible, and it was based solely upon the materials which were before him in 1902. Since the termination of the case the Treasury, with his full concurrence, had determined to bear the cost of the recent prosecution. From the evidence before him he came to the conclusion that Mr. Whitaker Wright could not be prosecuted for conspiracy. He was not prepared to recommend the House to proceed to deal with the law affecting what were called "corners," or the analogous subject of "rigging the market." The question was one of very great interest, and if anything were done—and for his part he should like it to be done—it could only be after very full inquiry. With regard to making punishable the issue of statements by officials of a company which they knew to be untrue, legislation ought certainly to be undertaken, and should proceed on the lines adopted in the 28th section of the Companies Act, 1900. This section related only to documents required by or for the purposes of that Act, and enacted that any wilful false statement in such a document was a misdemeanour. Replying to a question, the Attorney-General stated (Feb. 24th) that the total cost of the extradition proceedings in the case of Whitaker Wright was about £1500. Mr. MacNeill proposed and Mr. Labouchere seconded a reduction of the vote for Miscellaneous Legal Expenses as a protest against the remission of the authorities in allowing Whitaker Wright to escape from the country. The Attorney-General in defence maintained that the authorities had at once taken every step in their power. The proposed reduction was defeated by 214 votes to

126. The promised bill was presented on the following day, Feb. 25th (see sect. 40).

## II. ACTS AND BILLS.

[22] Subjoined is a list of the public Acts passed during the session of 1904:—

Anglo-French Convention (ch. 33).  
Appropriation (ch. 17).  
Army (Annual) (ch. 5).  
Bishoprics of Southwark and Birmingham (ch. 30).  
Capital Expenditure (Money) (ch. 21).  
Consolidated Fund (No. 1) (ch. 1).  
Cunard Agreement (Money) (ch. 22).  
Education (Local Authority Default) (ch. 18).  
Expiring Laws Continuance (ch. 29).  
Finance (ch. 7).  
Hall-marking of Foreign Plate (ch. 6).  
Indian Councils (ch. 26).  
Irish Land (ch. 34).  
Isle of Man (Customs) (ch. 25).  
Leeds University (ch. 12).  
Licensing (ch. 23).  
London Electric Lighting Areas (ch. 13).  
Metropolitan Improvements (Funds) (ch. 2).  
Outdoor Relief (Friendly Societies (ch. 32).  
Poor Law Authorities (Transfer of Property) (ch. 20).  
Post Office (ch. 14).  
Prevention of Cruelty to Children (ch. 15).  
Prisons (Scotland) (ch. 35).  
Public Health (ch. 16).  
Public Works Loans (ch. 36).  
Railways (Private Sidings) (ch. 19).  
Registration of Clubs (Ireland) (ch. 9).  
Savings Banks (ch. 8).  
Secretary for Scotland (ch. 27).  
Shop Hours (ch. 31).  
Telegraph (Money) (ch. 3).  
University of Liverpool (ch. 11).  
Weights and Measures (ch. 28).  
Wild Birds Protection (ch. 4).  
Wild Birds Protection (St. Kilda) (ch. 10).  
Wireless Telegraphy (ch. 24).

The above list does not include a large number of local bills which became law in course of the session. Particulars of some of these may be found in "London Bills" (sect. 57).

The measures mentioned in the following paragraphs which were either introduced or afforded facilities by the Government have prefixed to their titles a (\*).

Where a bill was withdrawn or dropped it is so stated, and cases in which the proceedings on a measure lapsed are signified by the mark (=).

The date on which the royal assent was given is indicated by the small letters r.a.; and the day upon which the act came or is to come into operation is also notified, though it should be understood that where no date is set down the measure became operative immediately it had received r.a.

In the absence of indication in the title or contents, the capital letter E. or S. or I. is used to signify that the operation of the act is limited to a part of the United Kingdom only; U.K. stands for the United Kingdom, and the Colonies, if it so extend; and Ind. for India.

[23] **Aged Pensioners Bill** was presented by Mr. Goulding, and supported by members on both sides, including Mr. Remnant, Mr. Lloyd-George, Mr. Duke, Mr. W. Redmond, and Mr. C. Hay. The Bill proposed to provide pensions for the aged deserving poor, by empowering

pecially constituted pensions committees in poor law unions, with the help of Parliament, to grant pensions which should not involve any electoral disability or convey the reproach of pauperism. It was framed on the reports of the Select Committee on "Aged Deserving Poor," 1899, of the Select Committee on "The Cottage Homes Bill" of the same year, and of the Select Committee on "The Aged Pensioners Bill" of 1903. An aged pensioner was to be entitled to an old age pension of not less than 5s. or more than 7s. each week, if of the age of 65 years or upwards; he must not within the previous 20 years have been sentenced to imprisonment or received poor relief other than medical relief, unless in circumstances of a wholly exceptional character; and he must not have an income from any source of more than, in the case of a single person, 10s. a week, or in the case of a married couple 15s. a week. The State was to contribute half the sum out of which the pensions were to come. Second reading was moved by Mr. Goulding (May 6th), and seconded by Mr. J. Hutton. Mr. Long, President of the Local Government Board, referred to the practical difficulties of the question, and said it did not follow that because the Government had failed to take any action they had forgotten the subject. Nothing could be done until a Government was in power that had the means. Sir M. Hicks Beach observed that the more the question was examined the more impossible it was seen to be to impose a charge on either the ratepayers or taxpayers for the purposes of an old age pension scheme. Second reading was agreed to without a division. [Dropped.]

#### [24] \**Aliens Bill.*

This Bill proposed to enable the Secretary of State, after consultation with the Board of Trade and the Local Government Board, in connection with alien immigration, to make regulations requiring the master of any ship landing or embarking passengers at any port in the United Kingdom to furnish certain prescribed returns and particulars with respect to any such passengers who were aliens, and to give certain prescribed facilities for carrying out this measure; requiring any such alien passenger to furnish specified certificates and particulars respecting his character and antecedents and with respect to his proposed place of residence in the United Kingdom, and to furnish certain means of identification; and requiring the alien also to furnish during a prescribed time, not exceeding two years from his last landing here, particulars as to his place of residence, etc.; providing for the inspection of aliens before they were landed, and for enforcing the prevention of the landing of any alien or the detention of any alien, and the compliance by an alien permitted to remain with any conditions attached to the permission by the Home Secretary. Regulations made under the Act were to be laid before Parliament.

If on any inspection under the Act it appeared that any passenger who was being brought to the United Kingdom was an alien, and had within five years been convicted in any foreign country of any extradition crime, or was a prostitute, or was living on the proceeds of prostitution, or was likely to become a charge upon the public funds, or had no visible or probable means of support, or was a person of notoriously

bad character; or if it appeared that the person was suffering from any infectious or loathsome disease, or from any mental incapacity; or if he refused to furnish the prescribed particulars, his landing might be prohibited or he might be detained pending the decision of the Secretary of State; and the alien might under his decision be required to leave the United Kingdom, or be permitted to land, possibly on conditions. Any alien in this country who was found to have been convicted abroad of any extraditable crime, any alien of bad character, or who had been in receipt of such parochial relief as disqualifies for the Parliamentary franchise, might up to two years of his last entering the United Kingdom be required to leave it; and power was also taken to order aliens sentenced to imprisonment in this country to leave the kingdom on being released.

If the Local Government Board were satisfied, on the complaint of any sanitary authority, that the dwellings in the district of that authority or in any part of that district were overcrowded, and that the immigration of aliens into that district or part had substantially contributed to that overcrowding, the Board might make regulations as regards that district or part (in this connection referred to as a prohibited area)—(a) for defining the limits of the prohibited area; and (b) for prohibiting or regulating the dwelling or residence of aliens or of any particular class of aliens in the prohibited area; and (c) providing for such other matters as appeared to the Board necessary or expedient for the purpose of giving effect to this part of the Bill.

Power was given to the Home Secretary to defray the whole or any part of the expenses of his return to his own country of any alien prohibited from landing or ordered to leave the country. The measure was to come into operation on Jan. 1st, 1905.

Mr. Akers-Douglas, Home Secretary, in introducing the measure (March 29th) said it was recognised by the Government that many of the aliens in Great Britain were loyal, law-abiding, and industrious; but there were among them, he contended, persons whose presence here was not welcome. During the last twenty years the number of aliens in this country had increased enormously, there being in Stepney alone 54,000 aliens with their families. A large amount of British labour had been displaced, and in London especially the presence of these aliens constituted a serious menace to the maintenance of social order, owing to the strained relations between them and the English population. Many of these aliens would not be allowed to land in the United States, and the increase of crime amongst them had been made the subject of numerous representations by courts of justice. The Bill was based on the recommendations of the royal commission which had considered the subject. The motion for leave was accepted without a division.

On second reading (April 25th) Sir C. Dilke moved an amendment declaring that "this House, holding that the evils of low-priced alien labour can best be met by legislation to prevent sweating, desires to assure itself before assenting to the Aliens Bill, that sufficient regard is had in the proposed measure to the retention of the principle of asylum for the victims of persecution." The percentage of aliens in this country was, declared Sir Charles,

only a quarter of what it was in France, and less than in any important country. The minute increase here was more than counterbalanced by the number of rich foreigners who were making London their home. Mr. Trevelyan thought that the Bill had many of the characteristics of panic legislation. Major Evans-Gordon (Stepney) remarked that there was nothing in any part of the world to compare with the number of aliens who crowded into certain areas in England. Mr. Asquith would not deny that there were evils connected with the immigration of aliens, but the remedies called for need not be at all revolutionary. The alien population of the country was something like 300,000 persons out of a total of 42,000,000. We had the smallest alien population of any civilised country in the world. In London, the alien population in receipt of poor law relief was  $\frac{1}{2}$  per cent., as compared with a grand total of 8 per cent. The poor people who came from Russia, Poland, and the East of Europe, did not compare in industrial efficiency with the Dutch and Huguenots, but the Royal Commission attested to the fact that the aliens in the East-End had revived the tailoring, cabinet-making, and shoemaking trades. He admitted that there was evidence of a substantial increase of crime by aliens as contrasted with the native-born population. A more childish proposal had never been submitted to the House than that to schedule particular areas from which aliens were to be excluded, and which were to be made preserves for British-born subjects. He agreed that where an alien had been convicted of a serious offence the court should be empowered to add expulsion to the sentence. Overcrowding could be dealt with by a slight amendment and the more vigorous enforcement of the existing law. Mr. Long, President of the Local Government Board, in reply said they did not want to check the legitimate, reasonable importation of people in good health who desired to take their part in the industry of the country. In course of further discussion Mr. S. Buxton (Poplar) said he was one of those on the Opposition side who, while not agreeing with everything in the Bill intended to vote for the second reading. In the result Sir C. Dilke's amendment was rejected by 241 to 117, second reading being then agreed to.

Mr. Akers-Douglas moved (June 8th) that the order for the consideration of the Bill in committee of the whole House be discharged and the Bill be committed to the Standing Committee on Law. This proposal was objected to from the Opposition side on the ground that the measure should be considered in the House itself, and that it was unsuited for consideration by Grand Committee; and defended by the Government, who urged that the Bill was especially suitable for discussion upstairs. The motion was carried by 277 to 187. On the resolution enabling provision to be made out of moneys to be provided by Parliament for the remuneration of any persons employed and of any expenses incurred under the measure, Mr. Lloyd George proposed to limit any such expenditure to £5000 in any one year, the Government having stated their inability at present to give any estimate of the probable cost. The amendment was rejected on a division, and the motion was ultimately carried by 192 to 140.

In the Grand Committee on Law, Sir J. Fergusson presiding, very slow progress was made with the clauses. Thus, on one occasion numerous amendments were proposed and discussed, the effective result, so far as the progress of the Bill was concerned, being that in two-and-a-quarter hours less than one line of the second clause was disposed of, and something very similar happened later on. At the seventh sitting (July 7th) the Home Secretary moved that the Committee do not proceed further with the consideration of the measure, and this was carried by 30 to 14, the Bill being on the same day reported so far as amended to the House. A draft special report was submitted to the Committee by the Home Secretary, stating that "The Committee are of opinion there is no prospect of their being able to consider the remaining clauses of the Bill, or any substantial portion of them, so as to allow the Bill to be reported to the House at such a period of the Session as would afford the House an opportunity of duly considering the Bill, and therefore the Committee have resolved not to proceed further with the consideration of the Bill." This was, however, withdrawn after discussion in favour of a special report by the Attorney-General, setting forth the opinion of the Committee that, having regard to the number of amendments to the Bill and the late period of the Session, they could not with advantage proceed further with the measure. This was agreed to.

There was however a body of opinion on both sides that the Government might have contented themselves with withdrawing the contentious clauses of the measure against the landing and regulation of alien immigrants generally, and proceeded with the provisions dealing with criminal aliens only; and this feeling found expression in the Criminal Aliens Bill presented July 12th (see sect. 32 *post*).

[25] \* Anglo-French Convention Act, 1904 (4 Edw. VII. ch. 33—r.a. Aug. 15th) is for approving and carrying into effect a convention between His Majesty and the President of the French Republic, which was signed at London, April 8th, 1904. Any sums payable by way of indemnity under the said convention, and any expenses to be incurred in carrying it into effect, are to be defrayed out of moneys provided by Parliament. (For details of the Convention see FRANCE, p. 1.) Referring to the matter in the House of Peers, April 19th, Earl Spencer said he was sure their lordships would all cordially recognise the diplomatic achievements of the Secretary for Foreign Affairs in concluding this Convention with France. They all knew and recognised the admirable influence which His Majesty the King and President Loubet had exercised in this matter. The noble marquis had carried the question a stage further, and secured by his negotiations a Convention of the greatest possible importance. The Marquis of Lansdowne offered Lord Spencer the thanks of the Government, and of their supporters, for the manner in which he had referred to the Convention. Throughout the long months during which these negotiations were continued the Government had an absolute certainty that they had behind them the general public feeling of this country. Second reading of the Bill was moved (June 1st) by Earl Percy, Under Foreign Secretary, who reviewed the details of the

arrangement. In course of the discussion following upon the statement of Lord Percy, Sir E. Grey doubted if we got such a free hand in Egypt as we gave in Morocco; and after touching on other points, thought it entirely wrong to look at the agreement as a bargain, observing that if France, as he believed, gained most, he did not grudge it in the least. Sir H. Campbell-Bannerman observed that it was not difficult to find blemishes, omissions and errors in the details of the Convention, but the Convention was a great instrument for bringing together two neighbouring nations, two old rivals, who had been separated by what was believed to be hereditary inborn enmity, and for insuring the friendship and co-operation of the two countries most identified with progress and free government. He hoped that this arrangement might be a model for other arrangements with other countries. Second reading was agreed to. On the report of the money resolution in reference to the Bill, Mr. Balfour, replying to Mr. Bowles (Aug. 4th) said it was true the French Chamber had not passed a similar measure, and that there was no absolute security that it would, but he thought his hon. friend misread the signs of the times if he thought the French Government would suggest any modifications in the Convention as signed. The motion was agreed to, and the Bill passed through Committee without amendment, and became law in due course. (U.K.)

[26] \*Army (Annual) Act (4 Edw. VII., ch. 5—r.a. April 28th) makes the usual provision, during twelve months, for the discipline and regulation of the Army, but also effects certain important modifications in law and practice. By the Pay Warrant a finding of absence without leave or desertion involves forfeiture of pay. If the finding or sentence of a commanding officer involves such a forfeiture, it has been the custom to allow the soldier to claim to be tried by a court-martial. The new Act gives the soldier a statutory right to make such a claim. The measure also decreases from six months to three months the minimum sentence of imprisonment, which may be commuted to general service and liability to transfer to another corps. It removes a difficulty which has arisen with respect to troops raised in the East and West African Protectorates when serving outside those Protectorates. It authorises deductions to be made from an officer's pay to make good damage caused by his negligence. This would obviate the necessity of court-martialing officers in many cases. The object of another section is to double the amounts which can be compulsorily stopped from the pay of a sergeant or soldier to enforce payment for the maintenance of his wife and legitimate children. The amount which may be stopped out of pay and appropriated in liquidation of any sum ordered to be paid under an affiliation order is left unaltered. At present persons who receive or detain as security for a debt identity or life certificates of a person entitled to a military pension or reserve pay are subject to penalties. The Act extends this provision to identity and life certificates of militiamen and yeomen entitled to non-training bounties. Another section makes enforceable the liability for duty which an officer undertakes on joining the reserve of officers. The position of marine reservists raised under the Naval Reserve Act, 1900, and of marine volun-

teers enrolled under the Naval Forces Act, 1903, is made clear. The suspension of warrant officers from rank, pay, and allowances has been found impracticable; consequently the power of so suspending them is repealed. Another provision of the statute authorises the reduction of an army schoolmaster holding the rank of warrant officer to a lower grade, though he was not originally enlisted as a soldier; but it is left impossible to reduce him to the ranks unless he was originally enlisted as a soldier. An obligation is imposed on keepers of victualling-houses to provide a separate bed for each soldier billeted in the house. Relates to the United Kingdom and elsewhere; came into operation in the U.K. April 30th, 1904, and elsewhere at later dates.

[27] \*Army Council Bill, presented by the Earl of Donoughmore (July 26th). The preamble recited that His Majesty had been pleased by letters patent to constitute an Army Council for the administration of matters pertaining to his military forces and the defence of his dominions; and Clause 1 of the measure proposed that all statutory powers and duties which at the date of the passing of the Act were exercised and performed by the Secretary of State for War, or the Commander-in-Chief, or the Adjutant-General, should, subject to the exception mentioned in this section, after that date be transferred to and become powers and duties of the Army Council. All property at the date of the passing of this Act vested in the Secretary of State for War as such was by virtue of this Act to become vested in the Army Council on the same trusts and for the same purposes on or for which the property is vested in the Secretary of State. Orders in Council might be made for carrying the Act into effect. The exception above referred to enacted that nothing in the measure should affect any provision under which communications to His Majesty have to be made through a Secretary of State. Bill passed Lords. Withdrawn in Commons (Aug. 11th).

[28] \*Bishoprics of Southwark and Birmingham Act, 1904 (4 Edw. VII., ch. 30—r.a. Aug. 15th), provides for the foundation of Bishoprics of Southwark and Birmingham and for matters incidental thereto, adapting the Bishoprics Act of 1878 for these purposes. No part of the income of the new bishoprics is to be drawn from public funds, and although the Act provides for an increase of two in the number of bishops, it makes no addition to the number having seats at any one time in the House of Lords. The new see of Southwark is to be taken out of the diocese of Rochester, and is to consist of the rural deaneries of Greenwich, Lewisham, Woolwich, Battersea, Camberwell, Clapham, Dulwich (except the parishes within the Urban District of Penge), Kennington, Lambeth, Newington, Southwark, Barnes, Beddington, Caterham, Godstone, Kingston, Reigate, Richmond, Streatham, and Wandsworth, and of such other parishes as may be transferred to the diocese in pursuance of this Act. The new see of Birmingham is to be taken in the main out of the diocese of Worcester, though it will include a portion of the diocese of Lichfield. It will consist of the archdeaconry of Birmingham and the rural deanery of Handsworth, and of such other parishes as may be transferred to the diocese in pursuance of this Act. The two new bishops are to be subject to the metropolitan jurisdiction of the Arch-

bishop of Canterbury. The Church of St. Saviour, Southwark, subject to the rights of the patron and incumbent, is to be the cathedral church; and such church in Birmingham as may be determined by order in Council is, subject as aforesaid, to be the cathedral for that diocese.

The Bill was discussed on second reading (May 4th), when Mr. C. McArthur moved an amendment declaring that, "in view of the continuance in the Established Church of England and Wales of grave and widespread disorders which the archbishops and bishops have failed to restrain, this House declines to assent to any revival of the provisions of the Bishops' Act, '78, until satisfactory assurances are obtained that the archbishops and bishops will enforce a reasonable conformity by the clergy to the Book of Common Prayer, the Articles of Religion, and the law as determined by the courts which have statutory jurisdiction in matters ecclesiastical." This was seconded by Mr. Brynmor Jones. Mr. Chamberlain, speaking as senior representative of one of the districts affected, said he himself was a Nonconformist, and in favour of disestablishment, which he believed would be for the benefit of the Church of England. He was strongly opposed to the illegal practices to which reference had been made, not only because of the theological points involved, but on the simple ground that they were illegal. But he urged that it was the law-breakers who should be proceeded against. The amendment was defeated by 279 to 97, second reading being carried by 282 to 85. The Bill in due course passed without amendment. As details of the measure, there may be mentioned the power to transfer from the Bishop of Worcester, with his consent, the patronage of the benefices of Bromley, Chislehurst, and Dartford, to the Bishop of Rochester. As regards the Bishopric of Southwark, the existing residence of the Bishop of Rochester is to become the residence of the Bishop of Southwark, and the surplus arising from the sale of Addington is to be paid to the endowment fund of the Bishopric of Southwark, after setting aside the sum of £15,000 for the provision and maintenance of a residence for the Bishop of Rochester. (E.)

[29] \*Capital Expenditure (Money) Act (4 Edw. VII., ch. 21—r.a. Aug. 15th) authorises the Treasury to borrow, by means of Exchequer Bonds, any sums which they are authorised to borrow by means of terminable annuities, the principal of and interest on such Exchequer Bonds to be charged on the Consolidated Fund, and to make provision for the discharge of any sums so borrowed out of moneys annually provided by Parliament. The money may be applied for the purpose of carrying out military, naval, and other works sanctioned by Parliament. The estimated amount required was £9,250,000. (U.K.)

[30] Church Discipline Bill, to amend the Church Discipline Act, 1840, the object of the promoters being "to provide a simplified procedure by which the observance of the law of the Established Church may be secured"; presented by Sir J. Willox, and supported by Mr. A. Taylor and others. No opportunity for discussing it on second reading was found. [Dropped.]

[31] \*County Courts Bill, was presented by the Lord Chancellor, and proposed an extension of the jurisdiction in certain Courts, under a scheme of rearrangement of dis-

tricts, etc., of from £50 to £100, an increase of salary of the judges of the courts at which such extended jurisdiction is exercisable of from £1500 to £1800, certain changes as to pensions of judges and remuneration of deputies, and an extension of the jurisdiction of certain registrars, while the number of jurymen was to be increased from five to eight. Passed Lords. Withdrawn in Commons (Aug. 8th).

[32] Criminal Aliens Bill (see Aliens Bill, sect. 24 *ante*) proposed to make provision for the repatriation of criminal aliens; was presented (July 12th) by Sir Howard Vincent, and supported by members on both sides. Its three operative clauses gave power to order criminal aliens to leave the United Kingdom on conviction, to make orders that persons convicted of crimes in foreign countries should leave the kingdom, and enabled penalties to be imposed in default (=).

[33] Criminal New Trials Bill, was presented by Mr. Bousfield (Aug. 8th), and supported by Mr. Lawson Walton; proposed to enact that where it was made to appear to the Secretary of State for the Home Department that there were reasonable grounds for such a course, he might order a new trial of any prisoner convicted and sentenced upon an indictment. Such new trial would, in the case of a prisoner convicted at a court of quarter sessions, take place before a court of assize, and, in the case of any other prisoner, before three judges of the High Court, or in such other manner as the Lord Chief Justice of England, with the approval of the Secretary of State, might direct. Nothing in the Act was to affect the prerogative of His Majesty to pardon any prisoner, and the Act was not to extend to Scotland or Ireland (=).

[34] \*Cunard Agreement (Money) Act, 1904 (4 Edw. VII., ch. 22—r.a. Aug. 15th), authorises the issue out of the Consolidated Fund of such sums, not exceeding in the whole £2,600,000, as are required for making the advances to the Cunard Steamship Company (Limited), under an agreement with that company, dated July 30th, 1903, and approved by the House of Commons Aug. 12th, 1903; and authorises the Treasury to borrow money, by means of Exchequer Bonds, for the issue of such sums or the repayment thereof, the principal of and interest on such bonds to be charged on the Consolidated Fund. Stamp duty is not to be chargeable on the agreement, etc. (For outline of agreement with the Company see SESSION, sect. 11, 1904 ed.). Mr. Pretyman stated (Aug. 3rd) that the Admiralty under this arrangement were securing ships of speed that would enable them to catch up any other ships on the Atlantic. Having regard to the position of this Country in reference to food supplies, that was a matter of the greatest importance. The hon. gentleman added (Aug. 8th) that the subsidy of £150,000 a year to be paid to the Company was granted as a naval subsidy, pure and simple, in respect of the speed that would be obtained by the two new fast ocean-going steamers over long distances. The subsidy was the measure of the loss the Cunard Company expected to sustain from running these vessels for commercial purposes, and was intended to place us in a somewhat similar position to that occupied by Germany, which in time of war would have at its disposal a number of fast ocean-going steamers. (U.K.)

[35] **\*Dogs Bill**, introduced by Mr. Fellowes on behalf of the Board of Agriculture, the main object of the measure being to prevent sheep-worrying. It made the owner of a dog liable in damages for injury done to any cattle by that dog, and provided that where a dog was proved to have chased or injured cattle it might be dealt with under the statute as a dangerous dog. The Board might make orders about dogs prescribing the wearing of address-bearing collars; and, with a view to the prevention of sheep-worrying, for preventing dogs from straying between sunset and sunrise; stray dogs might be seized, and sold or destroyed if not claimed; and the exemption of sheep-dogs, etc., from licence would require the previous consent of a petty sessional court. The seizure of strange and dangerous dogs, Mr. Fellowes explained in moving second reading (March 23rd), was an extension throughout the country of the powers already possessed by the Metropolitan police. Rejection of the measure was proposed and seconded by Mr. T. Bayley and Mr. O'Mara, and continued until the debate stood adjourned. The measure, which Mr. Fellowes, who had it in charge, described as the one ewe lamb of the Board of Agriculture during the present session, was eventually withdrawn.

#### [36] **Education Measures.**

**\*Education (Local Authority Default) Bill.**—Sir W. Anson, in asking leave to introduce the Bill, the provisions of which are set out in the next section (April 26th), explained that the measure had been rendered necessary by the action of local authorities in refusing to appoint school managers, to provide for the appointment of teachers, and to supply particular schools with fuel, books and other necessities. Mr. Lloyd George regarded the Bill as a coercive measure, and maintained that its introduction was tantamount to an admission that the Education Act was a failure, at any rate in Wales. The motion for leave having been carried by 262 votes to 110, the Bill was brought in and read a first time. On the motion for the second reading of the Bill (July 15th) Mr. Lloyd Morgan moved an amendment protesting against any extension of the powers of the Board of Education under the Acts of 1902 and 1903 until a Bill was introduced to amend those statutes by abolishing all religious tests on teachers, and placing all elementary schools supported by public funds under complete popular control. Mr. Balfour alluded to the action of Welsh county councils, and said the Government could not allow the intentions of Parliament, as embodied in an Act, to be defeated by authorities who repudiated the responsibilities imposed upon them. In the interests of the children they were determined that the Act of 1902 should be carried into effect. Sir H. Campbell-Bannerman condemned the Bill, and declared that the Opposition would resist such legislation to the utmost of their power. Replying to the debate, Sir W. Anson pointed out that the Bill did not affect Wales alone, but applied to England as well. Pending an amicable settlement of the religious difficulty, it was essential that the Board of Education should be empowered to step in and make good the deficiencies in the Welsh non-provided schools. The closure having been applied, the amendment was defeated by 245 votes to 111, and the second reading carried

by 233 votes to 102. In Committee (Aug. 5th) Mr. Ellis Griffith moved an amendment with the object of breaking up the first clause, which, he said, dealt with too many subjects. After considerable discussion the amendment was defeated by 150 votes to 68. Mr. Whitley moved that the Board of Education should not exercise the powers conferred on it by the measure, except after public inquiry. Sir W. Anson argued that when teachers' salaries were not paid and schools were left by local authorities without books or fuel a prompt remedy was needed. The amendment, which was debated at length, was rejected by 166 votes to 82. Mr. Balfour then rose and moved that the first four lines of the Bill should be put. The Chairman accepted the motion and put it. While the House was being cleared for a division, Mr. Lloyd George asked whether "wholesale" closure of this kind could be applied. The Chairman replied in the affirmative, and pointed out that only two amendments had been disposed of in four hours. Several Liberal members declined to leave the House, Mr. Lloyd George exclaiming that he saw no reason for going into the lobbies after what had occurred. The Chairman appealed to the members of the Opposition to leave the House, remarking that no very substantial amendments would be excluded by the motion of the Prime Minister. No attention was paid to this appeal, and the Chairman said that as a certain number of members refused to obey his directions he should be compelled to name them and report them to the House for disregarding the authority of the chair. The Ministerialists and those members of the Opposition who had gone into the lobbies returned to the House. Mr. Lowther then left the table and took his seat in the chair as Deputy-Speaker, in the absence of the Speaker. He then reported to the House that a certain number of members had refused to take part in the division, and that it was his duty to name them. Mr. Lloyd George said he and his hon. friends felt bound to act in this way in order to mark their disapproval of the action taken by the Chairman at the instigation of the Prime Minister. Mr. Lowther said hon. members had made a dignified protest, and he appealed to them once more not to obstruct the proceedings. Mr. Asquith said it was desirable to avoid an unseemly scene, and therefore the Opposition proposed to leave the House and to take no further part in the discussion of the Bill. The Opposition, led by Mr. Asquith, then quitted the House. The Chairman, having returned to the table, put the closure-motion again, and it was immediately carried. The clause was then agreed to, as was also Clause 2, and the Bill was reported to the House. The Bill was read a third time (Aug. 9th). It was taken to the Lords and read a first time (Aug. 10th). In moving the second reading (Aug. 11th) the Marquis of Londonderry said the Government regretted the necessity for the measure. In certain areas in Wales there was a want of efficiency, and that rendered the present Bill indispensable. It was the bounden duty of the Government to see that the law was carried out. The Bill was read a second time. Having passed through Committee without amendments (Aug. 12th), it was read a third time (Aug. 13th). (For provisions of the Act see next section.)

[37] **\*Education (Local Authority Default) Act, 1904** (4 Edw. VII. ch. 18—r.a. Aug. 15th) enacts

by Section 1 that the "Board of Education, without prejudice to their right to take any other proceedings, may, if they are satisfied that it is expedient to do so on account of any default of a local authority in the performance of their duties as respects any elementary school, (a) make orders for recognising as managers of that school any persons who are acting as managers thereof, and for rendering valid any act, thing, payment, or grant which in the opinion of the Board might otherwise be invalid by reason of the default of the authority, and every such order shall have effect accordingly; and (b) if it appears to the Board that the managers of that school have, for the purpose of maintaining and keeping efficient the school, incurred any expenses for which provision should have been made by the local education authority, pay to the managers such amount in respect of these expenses as in the opinion of the Board was properly incurred. Any sums paid by the Board of Education under this Act shall be a debt due to the Crown from the local education authority, and, without prejudice to any other remedy, may be deducted from any sums payable to that authority on account of parliamentary grants. Any order or payment may be made under this Act as respects matters occurring whether before or after the passing thereof." Section 2 provides that the Act shall be construed as one with the Education Act, 1902, and may be cited as the Education (Local Authority Default) Act, 1904. (E.)

[38] \*Education (Scotland) Bill. Mr. Graham Murray, Secretary for Scotland, in introducing this measure (Mar. 28th), remarked that Scotland was singularly free from the religious difficulty which had tended so much to interfere with the cause of education in this country, yet the present educational system had some defects: it for example encouraged the overlapping of educational institutions. Turning to the question of the bodies which should replace the present school boards, he said it would not be in consonance with Scottish opinion to take the county councils, and suitable areas, ready to hand, were to be found in the district areas of the county councils. The Bill provided that for each such area a school board should be elected *ad hoc*, the district being the district of every county, and all boroughs—Royal, Parliamentary, or police—falling into the districts in which they were situated. The only exceptions would be Edinburgh, Glasgow, Dundee, and Aberdeen, which were in an exceptional position and would be specially dealt with. The number of members on each board would be settled by the Education Department, subject to a minimum. These school boards would constitute the public educational authorities for all branches of education within their respective districts, and they would be elected on the same franchise as the county councils and on the same day. It was also proposed that each school should have local managers, who should consist of one-third members of the educational body and two-thirds of persons appointed by the parish council of the parish in which the school was situated. To these managers would be delegated such powers as the educational authority might think fit, except in regard to the appointment and dismissal of teachers and the borrowing of money. The correlative powers of the school boards would be very large, and they

would be allowed to help out of the rates, if they chose, and under such conditions as they thought fit to impose, educational institutions within their boundaries but not managed by themselves. This power, however, was purely permissive. With regard to the financial proposals of the Bill it would not be necessary to impose any new rate, but, in consideration of that, he asked to be allowed to lay hands on the £100,000 available under the Education and Local Taxation (Scotland) Act of 1892. With a view to giving Scottish public opinion a better chance of representation to the Board of Education, the Bill would provide for the constitution of four provincial councils, which would meet in Edinburgh, Glasgow, Aberdeen, and Inverness, and the functions of which would be to deal with all matters referred to them by the Department. Sir H. Campbell-Bannerman, who next spoke, observed that the Bill in the main retained what the Scottish people valued—their own control of their own schools. Reserving criticism as to details, he congratulated the Government on the Bill as a whole. Mr. Lloyd George wondered whether the Secretary for Scotland could see his way to extend the Bill to Wales. He understood it was to be left to the option of the Scottish local authorities whether they gave aid to voluntary schools or not; in England persons who claimed the same right were told that the only alternative to paying was to go to prison. Dr. Macnamara remarked that the school board was to be retained in Scotland because the Government knew that any attempt to destroy it would meet with sharp retribution. Second reading was (May 2nd) agreed to, after a motion of Mr. Weir for the adjournment of the debate had been negatived. Bill discussed in Committee, and amendments made in June. Withdrawn, Aug. 8th.

[39] Education (Transferred Schools) Bill (see sects. 54 & 55, *ante*).—The Bishop of St. Asaph, in presenting this Bill (March 9th), said he was solely responsible for the proposals it contained. It was a readjustment and adaptation of the principles of the Education Act, 1902. Under that Act the provision of new schools was largely to be decided by the wishes of the parents, and he proposed to give to parents the right to decide on the instruction to be given in the schools. The Bill would thus give an opportunity of securing religious instruction in every board school. Earl Spencer said if the Bill proposed to give a *locus standi* to various denominational parties to teach their religion within school hours, it would meet with strong opposition. The Bishop of St. David's supported the Bill, as it proposed to extend the system of local option in education. The Archbishop of Canterbury said that some six months ago he endeavoured to bring about discussion with their leading opponents, but he was told that unless he abandoned the principle of any inquiry into the capacity of the persons who gave religious teaching, discussion was impossible. It was impossible for him to give way on that point. The Marquis of Londonderry thought it had been made clear that there was a desire to find some solution of a difficult problem, which had hindered the progress of education in the country, but he pledged the Government neither to approval nor to disapproval of the Bill. The Bill was read a first time. On July 4th the Bishop of St. Asaph moved the second reading

of the Bill, the object of which, he said, was that an arrangement for the transfer of a school to a local education authority under sect. 23 of the Act of 1870, might provide, amongst other things, that religious teaching which was not distinctive of any particular denomination should be given in the transferred school in school hours, and that facilities should be afforded for the giving of religious teaching distinctive of any particular denomination to the children of such parents as desired it in the transferred school during school hours, but not at the cost of the local authority. The Bill also dealt with the conditions under which the consent of the Board of Education would be required in regard to specified details. **The Marquis of Londonderry** said the Government could not accept any departure from the Act of 1902. **Lord Tweedmouth** regarded the principle of the Bill in the main in a friendly spirit. **The Bishop of Rochester** held that the Bill would affirm the desire for an ultimate solution of the difficulty, not by the victory of one party over the other, but a solution which would do full justice. The Bill was read a second time (=).

**Electric Lighting (London) Bill.** (See London Electric Lighting Areas Act, 1904, *post*.)

[40] **\*False Statements (Companies) Bill**, presented by the Attorney-General (Feb. 25th) and made it a misdemeanour to issue a written statement or account relating to the financial affairs or property of a company which was known to be false in any material particular. (See sect. 21, **Whitaker Wright**, case of Mr., *ante*.) Withdrawn, Aug. 9th.

#### [41] **Finance Bill.**

For details of Budget proposals see headed article FINANCE of THE UNITED KINGDOM: they consisted principally of an increase in the Income Tax of from 11d. to 1s., an increase in the duty on stripped tobacco before importation, increases in the duty on cigars and foreign cigarettes, and an increase in the tea duty of from 6d. to 8d.; and an appropriation of unclaimed dividends to the extent of £1,000,000.

In course of the discussion on the Budget (April 19th), **Sir H. Campbell-Bannerman** pointed out that, notwithstanding that this was the second year after the conclusion of war, it was deemed necessary not only to maintain but to increase the war taxation. **Mr. Ritchie** concurred in the way in which the two deficits had been met by the Chancellor, and gave as some of the reasons for the falling off in the revenue the want of that revival in South African trade which had been looked for twelve months previously, and the effect on trade caused by the fiscal controversy. **Sir M. Hicks-Beach** held that if the growth of expenditure continued indefinitely there would be a reaction detrimental to the public services. He saw no justification for this year's increase in the Navy Estimates; but agreed with the increase in the tea duty, though he questioned the expediency of adding to the income tax and so reducing our resources of taxation should war occur. An amendment of Mr. Lough for retaining the tea duty at 6d. was defeated by 265 to 193, and the resolution sanctioning the increase to 8d. adopted by 259 to 188.

The next resolution, proposing that the customs duties payable on manufactured tobacco should on and after April 20th, 1904, be in-

creased, in the case of cigars, by 6d. per lb., and in the case of cigarettes by 1s. per lb., and the duties payable on unmanufactured tobacco should, on and after the same date, be increased, in the case of stripped tobacco, by 3d. per lb., was carried by 200 against 106. The debate was resumed (April 21st) on the resolution for imposing an additional 1d. on the income tax, the Chancellor of the Exchequer, in replying to criticisms of his financial policy, stating that if his proposals were accepted direct taxation would contribute 48·2 per cent. and indirect taxation 51·8 per cent. towards the national revenue, and that these were the exact proportions which prevailed in the year before the outbreak of the war. The population paid per head £1 9s. in direct, and £1 11s. 2d. in indirect taxation, and of the latter sum £1 3s. 11d. per head was for alcohol and tobacco. Although during 40 years our expenditure had doubled, so too had our income, so that the ratio of expenditure to income was no higher than before. As to the Transvaal War Contribution Loan, its issue would depend upon the prosperity of the colony and the condition of the money market, but the obligation of the guarantors of the first instalment was in no way impaired by the present delay. The income tax increase was passed by 214 to 16. The additional duties imposed on tobacco, beer and spirits in 1900 were continued by resolution (April 26th), after further discussion. The increase in the tea duty was further debated (April 27th) on a proposal of Mr. Lough to retain the duty at 6d., which amendment was in the end defeated by 239 to 202. The tobacco, etc., resolution being taken May 3rd, Mr. Robson contended that the proposals were protective, in favour of the home consumer, and calculated to disturb trade. The Chancellor of the Exchequer in reply said it was possible his additions to these duties might have some slight protective effect, but that had not been his object, which was to increase the revenue. The resolution was passed by 250 to 170.

On second reading of the Finance Bill embodying the above proposals, **Sir H. Campbell-Bannerman** (May 16th) moved by way of amendment, "That this House, having regard to the heavy burden of taxation proposed by this Bill in a time of peace, deems it necessary to declare its condemnation of the large and continuous increase of the national expenditure in recent years." He stated that since 1895, apart from the cost of the war—£230,000,000—our ordinary expenditure had shown an aggregate increase of £49,000,000, of which £40,000,000 had gone to the fighting services, while in addition large capital expenditure had been incurred on military works. **Mr. Victor Cavendish**, Financial Secretary to the Treasury, in reply, justified our military and naval expenditure, pointing out that it made it easier for us to come to friendly agreements with other powers, and charging the Opposition with preaching rather than practising economy. In supporting the amendment **Mr. Churchill** urged a reduction in the expenditure on the army and navy, pointing out that the national expenditure now amounted to half as much again as when the Unionist Government came into power. **Sir W. Harcourt** maintained that the annual increment of our expenditure was far greater proportionally than the increment of our wealth; and that the financial position

of the country was worse than it had been for many a year. The Chancellor of the Exchequer in reply said that the question of reduction in army expenditure was under consideration, and controverted the statement of Sir H. Fowler that we had reached a three-Power standard of naval strength. Mr. Asquith having also spoken, Mr. Balfour in summing up the debate admitted that our expenditure was great, but maintained that the country was capable of bearing it. The amendment of Sir H. Campbell-Bannerman was defeated (May 17th) by 297 to 213.

The general debate on second reading was pursued on the following day, when, speaking on the question of financial relations with Ireland, the Chancellor of the Exchequer asserted that there was no tax imposed by Parliament which bore more hardly on Irishmen than on Englishmen, where the conditions were similar. The motion for second reading was carried by 278 to 165. There was a little cross-voting in the division on Sir H. Campbell-Bannerman's amendment, Mr. Beckett, Mr. Churchill, and Mr. E. Mitchell, going against the Government, who were, however, supported by Major Jameson.

In Committee on the Bill, Mr. Churchill (June 20th) moved an amendment limiting the increased duty to tea imported from foreign countries, explaining that his object was to supply tariff reformers with an opportunity of debating the question of imperial preference. The Chancellor of the Exchequer renewed the pledge of the Government that the question of tariff reform would not be dealt with by them during the existence of the present Parliament. The amendment was defeated by 198 to 38. An amendment of Mr. Hugh Law, to exempt Ireland from the additional duty of 2d., was opposed by the Chancellor of the Exchequer on the ground that it would relieve not only the poor but those in Ireland who could well afford to pay, while the poor in Great Britain would obtain no relief. Mr. J. Redmond urged that it was cruelly unjust to increase the indirect taxation which Ireland already paid. The amendment was defeated by 270 to 185, but the Government agreed to limit the duration of the impost to July 1st, 1905, in lieu of August of the same year. On June 22nd, amendments opposing the increased duties on imported cigars and cigarettes were defeated; but on an amendment by Mr. McKenna to omit the proposed increase in the duty on stripped tobacco by 3d. per lb., his contention being that the proposal was protective in character, and therefore in violation of the Prime Minister's pledge, the Chancellor of the Exchequer (July 18th) expressed his willingness to grant a rebate at the rate of 1½d. for every pound of tobacco on any increased duty paid on or after July 10th, in respect of any stripped tobacco which was shown to the satisfaction of the Customs to have been bonded before April 20th; and this, with a modification suggested by Mr. Runciman extending the proviso to stripped tobacco which was on the high seas consigned to a United Kingdom port on April 20th, was agreed to. Consideration of the Bill was further proceeded with (July 19th), when the clause enacting the continuance of the additional beer, spirit, and tobacco duties imposed in 1900 was carried by 183 to 129. On the clause increasing the income tax to 1s., Mr. Herbert Lewis proposed an amendment

embodying a system of graduation. This was objected to by the Chancellor of the Exchequer, who contended that graduation involved self-assessment, and that there were insuperable difficulties in the way of the adoption of any plan based on this. The amendment was defeated by 234 to 165; and a proposal to keep the income tax at 11d. was rejected by 209 to 101.

A new clause, proposed by Mr. Lough, for the abolition of the Sugar Duty from and after Dec. 31st, 1904, was defeated by 150 to 66; and a proposal of Mr. J. Wilson (Durham) for reducing the coal tax from 1s. to 1½d. was negatived by 173 to 129. The Chancellor of the Exchequer was unable to agree to a proposal of Mr. Lough abolishing the charge for warehousing tea, but accepted another with respect to the warehouse charges on goods for home consumption, and this was duly inserted in the Bill. The measure passed through Committee at 25 minutes to 4 on the afternoon of Wednesday, July 20th, the House having met at 2 o'clock on the previous afternoon. Several motions to report progress, one being by Sir H. Campbell-Bannerman, were made in the course of Wednesday and defeated; a charge of obstruction was made against the Opposition from the Ministerial side, and repudiated. On the report stage, Mr. E. Robertson (July 25th) proposed to make the fixed charge for the National Debt £26,800,000 and in course of the discussion the Chancellor of the Exchequer repeated his previous statement that he did not despair of receiving the Transvaal war contribution, believing that when circumstances were favourable payment would be made. The amendment of Mr. Robertson was rejected by 223 to 136. The Chancellor of the Exchequer accepted a proposal of Sir S. King enacting that income tax should not be charged on insurances effected with Indian and Colonial companies. Mr. C. Hobhouse having proposed to exempt from duty alcohol used for motive power and manufacturing purposes, the Chancellor of the Exchequer said he was prepared to appoint a departmental committee to inquire into the whole question, which was a complicated and difficult one; and the amendment was rejected by 219 to 128. A final attempt to limit the tea duty to the former rate of 6d. was defeated by 191 to 107. On third reading (July 28th), Mr. T. Shaw moved the rejection of the measure; but after discussion, in which the Chancellor of the Exchequer contended that there was no cause for alarm in our financial position, the amendment was rejected by 206 to 129, and the Bill passed third reading. In the Lords, complaint was made by Earl Spencer, Lord James of Hereford, Earl Carrington, and others, of the delay in sending up the measure, and second reading was carried by 42 to 8 (July 29th), after a discussion on the increase in national expenditure.

[42] As the \*Finance Act, 1904 (4 Edw. VII. ch. 7) the preceding measure received r.a. Aug. 1st. It enacts until July 1st, 1905, a tea duty of 8d. per lb.; increases the Customs duties payable under sect. 1 of the Finance Act, 1898, on manufactured tobacco, in the case of cigars by 6d. per lb., and in the case of cigarettes by 1s. per lb.; while the duties payable under the same section on unmanufactured tobacco are as from the same date to be increased, in the case of stripped tobacco, by 3d. per lb., subject to a rebate of 1½d. per lb. on any increased duty paid on or after July 19th, 1904, in

respect of any stripped tobacco which was shown to have been deposited in a bonded warehouse before, or to have been in an importing vessel consigned to a port in Great Britain or Ireland on April 20th, 1904. Section 3 enacts a rearrangement to the tobacco drawbacks, and substitutes in the provision as to moisture in tobacco 32 per cent. for 35 per cent. The additional duties on tobacco, beer and spirits enacted by the Finance Act, 1900, are continued until July 1st, 1905. The warehouse delivery charges on goods for home consumption are reduced as regards every £100 of Customs duties to, in respect of tobacco 1s. 3d., in respect of other goods 2s. 6d., whether such tobacco or other goods shall have been removed to such warehouse under bond or not. The rate of charge on the delivery of spirits from an excise warehouse is reduced from 5s. to 2s. 6d. Income-tax for the year beginning on April 6th, 1904, is to be charged at 1s. Doubts having arisen whether unregistered friendly societies are entitled to the exemption from income tax given under the Acts relating to income tax to persons whose income does not exceed £160, it is enacted that an unregistered friendly society whose income does not exceed £160 is entitled to that exemption. The section of the Income Tax Act, 1853, under which relief is granted in respect of premiums on life insurances or contracts for deferred annuities, is applied in relation to life insurances or contracts for deferred annuities effected in or with any insurance company legally established in any British possession as it applies in relation to life insurances or contracts in or with the insurance companies mentioned in that section. The National Debt Commissioners are to pay into the Exchequer, out of the account of unclaimed dividends, sums not exceeding in the whole £1,000,000, and may for that purpose sell any stock standing to the credit of that account. (U.K.)

[43] \*Government Ships Bill. The need for this measure arose from the existence of certain ships owned by Government departments, which are Government ships, but do not form part of the Navy. These ships are not in law capable of being registered under the Merchant Shipping Act, 1894. On the other hand, they cannot be brought under the provisions of the Naval Discipline Act unless manned by the Royal Navy, which is not always practicable. The Bill enabled His Majesty by order in Council to make regulations embodying portions of either or both of these Acts, and also special regulations for particular ships or particular Government departments that own ships, such powers being necessary for the purpose of regulating the discipline on board, etc. Bill presented by Mr. Pretyman, May 18th; withdrawn Aug. 8th.

[44] Hall-Marking of Foreign Plate Act (4 Edw. VII. ch. 6—r.a. July 22nd) was presented by Mr. Samuel Roberts, the object being to provide for the marking of foreign plate with some mark readily distinguishable from those used for British plate. Under the old law, which the new Act modifies, foreign plate was marked, first of all, in the same manner as British plate; and, secondly, with a further mark, the letter F on an oval escutcheon. It was alleged that this letter F (which was often taken as being the manufacturer's initial) did not afford a sufficiently ready means of distinguishing foreign plate, and that legislation was necessary to provide such a means. The new statute accord-

ingly prescribes that where, in order to comply with older British enactments, any plate has to be assayed, stamped, and marked, or where for any other purpose any plate or article imported from a foreign part is brought to an assay office in the United Kingdom to be assayed, stamped, or marked, the plate or article shall be marked in such manner as His Majesty may determine by Order in Council so as readily to distinguish whether the plate or other article was wrought or made in England, Scotland, or Ireland, or was imported from foreign parts, and such mark or marks shall be deemed to be a compliance with the said Acts. Was to come into operation Nov. 1st, 1904. (U.K.)

[45] \*Indian Councils Act, 1904 (4 Edw. VII. ch. 26—r.a. Aug. 15th). By this enactment there is repealed so much of the provisions of the Indian Councils Act, 1874, as renders it necessary that the sixth member of the Council of the Governor-General of India shall be member for public works purposes. It is proposed that there shall now be a member for commerce and industry. (Ind.)

[46] \*Irish Land Act, 1904 (4 Edw. VII. ch. 34—r.a. Aug. 15th) is to explain and amend sect. 48 of the Land Act of 1903 with respect to the payment and application of the percentage provided by the said section. The statutory provision in question enacts that for the purpose of aiding the sale of estates the Land Commission may, out of advances by the National Debt Commissioners from the said fund, pay to the vendor of each estate sold a sum calculated at the rate of 12 per cent. on the amount of the purchase money advanced under the Land Purchase Acts. Where an estate is so encumbered that the vendor is not entitled to receive for his own use any part of the rents or profits thereof, or where the percentage is payable in respect of an estate sold by the Land Judge, the percentage shall be added to the purchase money, and shall not be paid to the vendor. After the expiration of five years from the commencement of the 1903 Act, and thereafter at each quinquennial period, the Treasury may revise the percentage. The Act of 1904 prescribes that any land wholly or partly untenanted sold to the Land Commission or the Congested Districts Board may be regarded as an estate for the purpose of the payment of any percentage under section 48 of the 1903 Act. This percentage may, subject to modifications, be paid to any vendor, other than the Congested Districts Board, whether such vendor is a person entitled to a beneficial interest in the land sold, or is a trustee or other person not so entitled, and, save as hereinafter provided, shall be held by him on the trusts (if any) affecting the purchase money. Where the vendor is a tenant for life or a person having the powers of a tenant for life under the Settled Land Acts, '82-90, the percentage shall, subject to the enactments of section 48 of the 1903 Act, be retained by him as his own proper moneys for his own use and benefit, free and discharged from all claims upon the lands sold, or the purchase money thereof, and from any trust affecting the same. Provided that where the vendor is a person exercising any power of sale on behalf of a person of unsound mind or infant, or where the vendor is a person of unsound mind selling pursuant to any order made by the Lord Chancellor, the percentage shall be held for the use and benefit of the same persons, or

upon the same trusts, as the case may be, as if the person of unsound mind, or infant, as the case may be, were not under any disability. Provided also that where the vendors are husband and wife exercising together the powers of a tenant for life under section 61 of the Settled Land Act, '82, the percentage shall be retained by them jointly for their own use and benefit, free and discharged from all claims and trusts as aforesaid. On second reading of the Bill, Mr. J. Redmond moved an amendment setting forth that no measure dealing with the amendment of the Land Act of 1903 could be accepted as satisfactory which dealt merely with the question of facilitating Irish landlords in obtaining the bonus, and which provided no remedy for other defects in the Act; but this was defeated by 203 to 90. (1.)

[47] **\*Judicature and Development Grant (Ireland) Bill**, presented by Mr. Wyndham (May 10th), and proposed to augment the Ireland Development Grant by means of the abolition of two judgeships, and the reduction of the salary of the Lord Chancellor of Ireland on the occurrence of the next vacancy from £8000 to £6000; and by the transfer of certain accumulations. (Withdrawn, Aug. 8th.)

[48] **\*Justices of the Peace Bill**, proposed to amend the law relating to justices of the peace with respect to residence, to qualification of solicitors, and to the removal of *ex-officio* justices, enacting among other things that a person not resident in a county but residing within seven miles of it might be appointed a magistrate in that county. (Passed Lords, withdrawn in Commons.)

[49] **Juvenile Smoking Bill**, to provide for the prevention of juvenile smoking, presented by Mr. Rigg, supported by Colonel Bain, Mr. Allen, Mr. Cathcart Wason, Dr. Macnamara, and Mr. Lambert.—The preamble of the measure set forth that the use of tobacco by persons of tender years was most injurious to such persons, and that it was desirable that the same should be suppressed; and the Bill itself proposed that no person under the age of sixteen years should smoke or use tobacco in any form, and that any such person so doing should be liable on conviction to a penalty not exceeding 10s. for each offence. No person should sell, give, or supply tobacco in any form to or for the use of any person under the age of sixteen years, and any person so doing should be liable to fines; and in addition the licence (if any) held by such person for the sale of tobacco should in case of a third conviction become void, and such person should be disqualified for a term of five years from the date of such conviction from holding any such licence. The onus of proof of age was to lie on the person charged (=).

[50] **\*Labourers (Ireland) Bill**.—Mr. Wyndham stated (March 9th) that the gist of this measure was a scheme which involved the compulsory acquisition of land and the building of cottages. Broadly speaking, and subject to appeal, the county council would take the place of the Local Government Board, and the latter would take the place of the Privy Council. Where a district council failed to put the Act into operation, the Local Government Board was empowered to step in and take its place. Labourers who had discharged their obligations without default for five years would be enabled to purchase a farm under the second clause of the Land Act of 1903. Mr. J. Redmond thought

there would be widespread dissatisfaction in Ireland when the provisions of the Bill became known. Disappointment with the measure was also expressed on the second-reading stage.

The Standing Committee on Trade, to which the measure had been referred, proceeded to consider it (July 21st), and dealt with it further on the 26th, when certain modifications in its text were submitted by the Government, and certain changes proposed by the Irish party were carried against the Chief Secretary and Attorney-General for Ireland. On the following day Mr. Wyndham proposed that the Bill so far as it had been amended be reported to the House, declaring that in consequence of the amendments already adopted the Government would not proceed with it. The Bill was ordered for report, with a special report proposed by Mr. J. Redmond, and setting forth the reason for not proceeding further (=).

[51] **Land Values Assessment and Rating Bill**, presented by Mr. Trevelyan.—It was explained by the promoters that under the Bill all valuation lists on which local rates are based should contain a separate assessment of the land values of rateable premises. The land value was to be taken to be an amount equal to 3 per cent. on the selling value of the land as distinct from the building. Unoccupied premises were to be subject to rating, but only on the land value. In any case where the land value of premises exceeded the present rateable value, which might happen where land ripe for building was not used for building, or very poor buildings were allowed to stand on valuable sites, rates were to be paid on the land value. Under any lease made after the Bill became law, it was proposed that the occupier should be entitled to deduct from his rent so much of any rate as was based on the amount of the land value. But there was to be no interference with existing contracts between landlord and tenant. It was also proposed that deductions made from the gross value for the purpose of arriving at the rateable value should be made on the value of the buildings only, and not on the land value. The Bill applied only to London and boroughs and urban districts of England and Wales. Mr. Trevelyan moved second reading (March 11th), and the motion was seconded by Mr. Rutherford. Mr. Cripps proposed an amendment declaring that no change in the incidence of local taxation would be satisfactory which did not recognise the unfairness of the existing charges, and make further provision for the equitable contribution of all kinds of property to such taxation; and this was seconded by Mr. Remnant. Mr. Asquith supported the Bill, and the Government left the question an open one to the House. The amendment was defeated by 223 to 156, and second reading agreed to. The debate stood adjourned on a motion to send the Bill to a Grand Committee. [Dropped.]

[52] **Leeds University Act, 1904** (4 Edw. VII., ch. 12—r.a. Aug. 15th), presented by Mr. Barran, and supported by Mr. Gladstone and others on both sides.—The object of this enactment is to extend to graduates of the University of Leeds certain privileges and exemptions enjoyed by the graduates of all the other universities in England and Wales. A typical instance is that of persons desirous of practising as solicitors, who, if they possess no university degree, have to serve under articles for a period of five years, but are permitted to

serve for only three years if they are graduates of any English or Welsh university. These privileges were extended to graduates of the Victoria University of Manchester and to the University of Wales, and are extended to graduates of the University of Liverpool by another Act of the present session (see sect. 95 *post*). (E.)

### [53] \*LICENSING ACT, 1904.

In moving for leave to introduce a Bill to amend the Licensing Acts (April 20th), Mr. Akers-Douglas explained that the measure had been rendered necessary by the action of magistrates in dealing with licences. A very large number of licences were withdrawn on the sole ground that they were not required, and this inflicted great loss on men who had invested large sums in a business which was perfectly legitimate. The Government were as anxious as the Opposition to see a reasonable reduction in the number of licensed houses; but they held that compensation should be given to the licensees. Though licences were held for a year only, by long custom they had, until recently, been renewed annually by the justices of the peace, and death duties had been charged on the full value of licensed houses, which showed that the Government regarded the renewal of licences as reasonably probable. The Government had based their Bill on two principles. These were that there should be compensation whenever a licence was taken away on the ground of public policy, and that such compensation should be paid by the trade itself. These proposals were in accordance with the recommendations of the Royal Commission. Sir H. Campbell-Bannerman regarded the Bill as a timid concession for party purposes to a great and powerful trade, and said it would meet with his strenuous opposition at every stage. Mr. Balfour denied that the Government had been influenced by mean political motives, and said that extreme temperance reformers did their cause great harm by coupling temperance with injustice. The motion for leave having been carried by 314 votes to 147, the Bill was brought in and read a first time.

On the motion for the second reading of the Bill (May 9th), Mr. Burt moved the rejection of the measure. After criticising its provisions, he declared that, instead of putting an end to an evil, the Bill would strengthen and intrench the position of those engaged in the liquor trade and duplicate the capital value of licences, which was put at £300,000,000 sterling. Sir H. Campbell-Bannerman (May 10th) said the immediate effect of the Bill would be to confer a gigantic endowment on the liquor trade, and its ultimate result would be to prevent any real reform of the licensing system. In short, the Bill was a betrayal of the interests of the public and a capitulation of the State to the trade. Mr. Asquith (May 11th) believed that the Prime Minister had introduced the Bill to redeem a pledge which he gave twelve months ago to a panic-stricken deputation. The compensation, he said, would go into the hands of the brewers, and a time limit was absolutely vital. Mr. Balfour defended the Bill, and declared that the scheme of compensation was thoroughly sound, and strictly, in administration, in accordance with the principle of local government. As to a time limit, it was only in committee that the House could give a final decision.

The closure having been agreed to, the amendment was defeated by 329 votes to 224. The Bill was then read a second time.

The Committee stage was entered upon on June 6th, when Mr. Whittaker moved to defer the consideration of the first clause, which proposed to vest in quarter sessions the power to refuse the renewal of licences in the public interest. The amendment was defeated by 227 votes to 116. Mr. Ellis Griffith moved to limit the operation of the clause to seven years. Mr. Balfour opposed a time limit. Col. Williams moved to amend the amendment by substituting 14 for 7 years. Eventually Mr. Balfour moved the closure, which was agreed to by 289 votes to 205. The amendment of Col. Williams having been rejected by 306 votes to 187, that of Mr. Ellis-Griffith was defeated by 290 votes to 192. Mr. Griffith Boscawen moved an amendment with the object of including off licences within the operation of the Bill. Mr. Akers-Douglas (June 27th) opposed the amendment. The Solicitor-General assured Mr. Asquith that the operation of the Bill would be confined strictly to on licences. The amendment was negative without a division. Mr. Whitley moved to exclude tied houses from the purview of the measure. Mr. Akers-Douglas opposed the amendment, which was rejected by 271 votes to 172. An amendment by Mr. H. Lewis to restrict the right to compensation to the holders of licences existing at the date of the passing of the Act was accepted by the Government and agreed to. Mr. H. Roberts moved an amendment to the effect that compensation should only attach to licences granted by way of renewal for more than ten years. This was opposed by the Solicitor-General, and rejected by 245 votes to 143. Mr. Whittaker moved (June 28th) to limit the operation of the Bill to the ante-1869 beerhouses. The amendment was defeated by 288 votes to 165. Mr. Mansfield moved that magistrates should have power to refuse to renew licences in cases where the holders had refused to supply reasonable non-alcoholic refreshment. The Solicitor-General did not see any objection to the introduction of words requiring publicans to supply food and tea and coffee; but the form of the amendment would require consideration. The following day he placed an amendment on the paper giving effect to his views, but the Opposition were dissatisfied with it. In the result a division was taken on Mr. Whittaker's amendment, which was rejected by 265 votes to 180 (June 29th).

### Closure in Compartments.

Mr. Balfour rose in an excited House (July 1st), and, amid Opposition cries of "Gag" and Ministerial cheers, moved a resolution for the closure in compartments of the proceedings on the Bill. He complained that too much time was given to criticism and too little to legislation. Six days, he maintained, were quite sufficient for the further consideration of the Licensing Bill in Committee and on report. Mr. Asquith moved as an amendment that the House declined to consider a proposal to deprive it, without any justification in the previous course of the debate, of all power of reasonable and adequate discussion in respect of a measure which sought to make fundamental and much-controversial changes in laws vitally affecting the well-being of the people. The Committee stage of the Bill had only

occupied 34 hours, and in that time 115 speeches had been delivered from the Government benches and 135 from the Opposition side, and many of the Unionist speeches had been delivered in support of amendments moved. He hoped the House would refuse to take this last step on the road to humiliation and impotence. The debate extended over three sittings, and a large number of members spoke on both sides. Three Unionists—Mr. H. Hobhouse, Mr. Gibson Bowles, and Sir J. Gorst—opposed the proposal of the Prime Minister, while others asked that additional days should be granted for the Committee stage of the Bill. Sir H. Fowler warned the Government that this throttled Bill would not settle the licensing question, and that the Liberals, when they returned to power, would certainly reopen the subject. Mr. Morley (July 4th) deplored the huge stride which the Prime Minister contemplated taking in the direction of suppressing Parliamentary liberties. Mr. J. Redmond announced that, in accordance with their unbroken record, the Nationalists intended to vote collectively against the resolution. Mr. Balfour having reminded Mr. Redmond that the Nationalists voted for the closure when the Home Rule Bill was before Parliament, contended that if the House rejected his motion and plunged into the consideration of all the amendments on the 65 pages of the order paper the Parliamentary machine would infallibly break down. Mr. J. Chamberlain believed that the Bill was an enormous advance in the direction of reform, and if the Government went to the country on the licensing issue they would win. Sir H. Campbell-Bannerman said the Government had mismanaged their business, and on them must rest the responsibility for the existing *impasse*. Mr. Asquith's amendment having been rejected by 301 votes to 228, Mr. Balfour's resolution was carried (July 5th) by 262 votes to 207.

#### *Committee and Closing Stages.*

The Committee stage was again resumed, and Mr. H. Hobhouse (July 6th) moved an amendment to Clause 1, directing local justices to inquire at intervals into the needs of their district, and to report to Quarter Sessions as to the licences which in their opinion ought not to be renewed. This was opposed by the Government and defeated by 251 votes to 192. Mr. Asquith rose at 10 minutes to 11 p.m. and moved an amendment standing in the name of Mr. Ellis Griffith, which, he said, raised the whole question of compensation. Amid considerable Opposition cheering, the right hon. gent. said the motion of the Prime Minister had reduced the whole proceedings on the Bill to a farce. Mr. Balfour rose to oppose the amendment, but was unable to make himself heard owing to the shouts of "Gag" and the great noise on the Opposition side of the House. At 11 o'clock the closure came into operation, and the right hon. gent. resumed his seat. The amendment under discussion having been disposed of, the Government amendments to Clause 1 were put and agreed to. The clause was carried by 281 votes to 194. Sir W. Houldsworth proposed (July 11th) an amendment to Clause 2, to insert a time limit of 14 years. Mr. Balfour objected to the amendment on the ground that it would mar the scheme of the Bill. He wanted to see a great and immediate reduction of licences, and that could

not be obtained if the power of the local authority to borrow was limited to 14 years. The amendment was rejected by 250 votes to 209. Mr. Seely moved an amendment with the object of defining the amount of compensation to be paid to different classes of persons interested in the licensed houses, including employes. The amendment was under discussion at 11 p.m., when, under the closure resolution, it was at once put, and defeated by 285 votes to 151. The Government amendments to the clause having been agreed to, the Opposition challenged a division on the question that Clause 2, as amended, stand part of the Bill. The clause was carried by 280 votes to 174. There were eight Government amendments to Clause 3, and these were agreed to with only one division. The clause, as amended, was then added to the Bill. On Clause 4 (July 12th), which dealt with the granting of new licences, Mr. Akers-Douglas moved amendments with the object of remodelling the clause so as to bring it into harmony with amendments already accepted, limiting the compensation clauses to existing licences. After considerable discussion the amendments were agreed to. Mr. Akers-Douglas next moved subsections, giving justices power to attach to the grant of a new licence such conditions as to payments and tenure as they might think fit in the interests of the public, and also conditions to prevent the creation of a monopoly value. These were debated until 11 o'clock, when, under the closure resolution, they were put and agreed to. The clause was carried without a division. On Clause 5 (July 13th) an amendment by Mr. Akers-Douglas was agreed to, excepting county boroughs from the obligation to delegate their power, and confirming the grant for a new licence, and of determining any question as to the refusal of the renewal of a licence. Clause 6, which gave power to the Secretary of State to make rules for carrying the Act into effect, was under consideration at 11 o'clock, when, under the closure resolution, it was put, and carried by 267 votes to 182. The remaining clauses were also put and agreed to, and the Committee stage of the Bill was brought to a close.

On the report stage (July 26th) Mr. Lloyd George moved a new clause providing that the Act should not extend beyond 1910. Mr. Akers-Douglas opposed the clause, which was defeated by 220 votes to 138. The other new clauses of which notice had been given having been ruled out of order or withdrawn, the House proceeded to discuss various amendments until eleven o'clock, when the closure resolution came into operation. The Government amendments to Clauses 2 and 3 were agreed to. The Solicitor-General (July 27th) moved an amendment providing for the imposition of conditions securing to the public the monopoly value represented by the difference between the value of premises as licensed premises and their value as unlicensed premises. After considerable discussion the amendment was agreed to. At eleven o'clock the closure resolution again came into operation, and the remaining Government amendments were put and agreed to.

On the third reading of the Bill (July 29th) Mr. Asquith moved the rejection of the measure, observing that there had been a surrender by the House of Commons of its right to mould the law of the land. Sir H. Campbell-Bannerman

maintained that four-fifths of the contents of the Bill had never been under discussion. He feared that it would haunt the House like the ghost of an evil-doer, and that it would come up again and again for revision. The Opposition would not rest content until steps had been taken to repair the evil which the Government was doing. **Mr. Balfour** declared that the Bill was a great step forward in the direction of temperance reform. The motion for the rejection of the Bill having been defeated by 217 votes to 129, the Bill was read a third time.

### *In the Lords*

It was immediately taken to the House of Lords and read a first time (July 29th). Lord Belper moved the second reading (Aug. 1st). Lord Peel moved an amendment declaring that the House could not accept as a satisfactory settlement of the licensing question a Bill which created a perpetual interest in a terminable licence. The Archbishop of Canterbury regarded the Bill as a genuine and straightforward endeavour to promote the reduction of licences. Earl Spencer (Aug. 2nd) was opposed to the scheme of the Bill, which provided not only an indemnity, but a gift in perpetuity to the brewing interest which would greatly intensify the drink difficulty. The amendment was rejected by 142 votes to 47, and the Bill read a second time. The Committee stage was commenced on Aug. 4th, when Lord Coleridge moved to exclude tied-houses from compensation. Lord Belper opposed the amendment, which was withdrawn. An amendment to Clause 1 by the Marquis of Salisbury, that a ground for the refusal of a licence should be that the premises were "structurally" unsuitable as well as "structurally deficient," was carried by 124 votes to 38. The Archbishop of Canterbury moved a new clause providing, as a time limit, that after 14 years existing licences should not be renewed, but that a new licence for seven years should be granted conditionally. The Marquis of Salisbury opposed the amendment on behalf of the Government, and it was defeated by 126 votes to 52. Other amendments were discussed at length, and the Bill was reported to the House (Aug. 5th). The third reading was agreed to (Aug. 9th), after a protest from Earl Spencer, who said the whole responsibility for the Bill must rest on the Government. The Lords' amendments were considered in the Commons (Aug. 11th) and agreed to, with the exception of Earl Grey's amendment dealing with the allocation of money paid in respect of new licences. This amendment, the Speaker pointed out, constituted a breach of the privileges of the House. The provisions of the Act are set forth in the ensuing section.

### *Text of Licensing Act.*

[54] \*Licensing Act, 1904 (4 Edw. VII., ch. 23—r.a. Aug. 15).

Section 1 vests the power to refuse the renewal of an existing on licence, on any ground other than the ground that the licensed premises have been ill-conducted or are structurally deficient or structurally unsuitable, or grounds connected with the character or fitness of the proposed holder of the licence, or the ground that the renewal would be void, in Quarter Sessions instead of the justices of the licensing district; but power shall only be exercised on a refer-

ence from those justices, and on payment of compensation in accordance with this Act. In every case of the refusal of the renewal of an existing on licence by the justices of a licensing district, they shall specify in writing to the applicant the grounds of their refusal. Where the justices of a licensing district, on the consideration by them, in accordance with the Licensing Acts, 1828 to 1902, of applications for the renewal of licences, are of opinion that the question of the renewal of any particular existing on licence requires consideration on grounds other than those on which the renewal of an existing on licence can be refused by them, they shall refer the matter to Quarter Sessions, together with their report thereon, and Quarter Sessions shall decide all reports so made to them, and may, if they think it expedient, after giving the persons interested in the licensed premises, and, unless it appears to Quarter Sessions unnecessary, any other persons appearing to them to be interested in the question of the renewal of the licence of those premises (including the justices of the licensing district) an opportunity of being heard, and subject to the payment of compensation under this Act, refuse the renewal of any licence to which any such report relates.

Section 2 enacts that where Quarter Sessions refuse the renewal of an existing on licence under this Act, a sum equal to the difference between the value of the licensed premises (calculated as if the licence were subject to the same conditions of renewal as were applicable immediately before the passing of this Act. and including in that value the amount of any depreciation of trade fixtures arising by reason of the refusal to renew the licence), and the value which those premises would bear if they were not licensed premises, shall be paid as compensation to the persons interested in the licensed premises. The amount to be so paid shall, if an amount is agreed upon by the persons appearing to Quarter Sessions to be interested in the licensed premises, and is approved by Quarter Sessions, be that amount, and in default of such agreement and approval shall be determined by the Commissioners of Inland Revenue in the same manner and subject to the like appeal of the High Court as on the valuation of an estate for the purpose of estate duty, and in any event the amount shall be divided amongst the persons interested in the licensed premises (including the holder of the licence) in such shares as may be determined by Quarter Sessions. Provided that in the case of the licence-holder regard shall be had not only to his legal interest in the premises or trade fixtures, but also to his conduct and to the length of time during which he has been the holder of the licence; and the holder of a licence, if a tenant, shall (notwithstanding any agreement to the contrary) in no case receive a less amount than he would be entitled to as tenant from year to year of the licensed premises. If on the division of the amounts to be paid as compensation any question arises which Quarter Sessions consider can be more conveniently determined by the County Court, they may refer that question to the County Court in accordance with rules of Court to be made for that purpose. Any costs incurred by the Commissioners of Inland Revenue on an appeal from their decision to the High Court under this section, shall, unless the High Court order those costs to be paid by some party to

paid out of the amounts to be paid as compensation.

Section 3 provides that Quarter Sessions shall in each year, unless they certify to the Secretary of State that it is unnecessary to do so in any year, for the purpose of this Act, impose in respect of all existing on licences renewed in respect of premises within their area, charges at rates not exceeding, and graduated in the same proportion as, the rates shown in the scale of maximum charges set out in the first schedule to this Act. Charges payable under this section shall be levied and paid together with and as part of the duties on the corresponding excise licence, but a separate account shall be kept by the Commissioners of Inland Revenue of the amount produced by those charges in the area of any Quarter Sessions, and that amount shall in each year be paid over to Quarter Sessions in accordance with rules made by the Treasury. Any sums paid under this Act to Quarter Sessions in respect of the charges under this section, or received by Quarter Sessions from any other source for the payment of compensation, shall be paid by them to a separate account under their management, and the moneys standing to the credit of that account shall constitute the compensation fund. Quarter Sessions may, with the consent of a Secretary of State, borrow in accordance with rules made under this Act on the security of the compensation fund for the purpose of paying any compensation payable under the Act.

Section 4 transfers the power of the County Licensing Committee to confirm new licences to Quarter Sessions. The justices, on the grant of a new licence, may attach to the grant such conditions, both as to the payments to be made and the tenure of the licence and as to any other matters, as they think proper in the interests of the public, subject as follows: (a) Such conditions shall in any case be attached as, having regard to proper provision for suitable premises and good management, the justices think best adapted for securing to the public any monopoly value which is represented by the difference between the value which the premises bear, in the opinion of the justices, when licensed, and the value of the same premises if they were not licensed, provided that, in estimating the value as licensed premises of hotels or other premises where the profits are not wholly derived from the sale of intoxicating liquor, no increased value arising from profits not so derived shall be taken into consideration; (b) the amount of any payments imposed under conditions attached in pursuance of this section shall not exceed the amount thus required to secure the monopoly value. The justices may, if they think fit, instead of granting a new on licence as an annual licence, grant the licence for a term not exceeding seven years. Where a licence is so granted for a term, any application for a re-grant of the licence on the expiration of the term shall be treated as an application for the grant of a new licence, not as an application for the renewal of a licence, and during the continuance of the term the licence shall not require renewal; and any transfer of the licence shall, subject to any conditions attached thereto on the grant, have effect for the remainder of the term of the licence, and may be granted at a general annual licensing meeting as well as at special sessions; and any reference to special sessions in any enactment relating to transfers or protection orders

the appeal other than the Commissioners, be shall include a reference to the general annual licensing meeting. A licence granted for a term under this section may be forfeited if any condition is not complied with, or if the holder is convicted of any offence committed by him as such; but where the licence is so forfeited the owner of the licensed premises shall have all the rights conferred on owners by section 15 of the Licensing Act, 1874.

Section 5 enables Quarter Sessions, if they think fit, to divide their area into districts for the purposes of this Act, and to delegate any of their powers and duties under the Act to a committee appointed in accordance with rules made by them under this section, and enacts that, except in a county borough, they shall so delegate their power of confirming the grant of a new licence, and of determining any question as to the refusal of the renewal of a licence under the Act and matters consequential thereon. The justices of a licensing district being a county borough shall exercise their powers under the Licensing Acts, 1828 to 1902, as to the renewal of licences through the borough licensing committee appointed under section 38 of the Licensing Act, 1872.

Section 6 provides that a Secretary of State may make rules for the provisional renewal of licences, the enforcement of any security given for money borrowed, the management and application of the compensation fund, the appointment, where requisite, of committees of Quarter Sessions Standing Committees, the regulation of the procedure of Quarter Sessions on the consideration of the reports of justices of a licensing district, and on any hearing with reference to the refusal of the renewal of on licences or the approval or division of the amount to be paid as compensation, and the authentication of documents.

Section 7 enacts that Quarter Sessions, with respect to their own action, and that of the justices of licensing districts, and the confirming authority with respect to new licences granted under the Act, shall in each year make such returns as the Secretary of State may require.

Section 8 defines the area of Quarter Sessions for a county for the purposes of the Act as including any borough (not being a county borough) or any part thereof which is locally situated in that county, and says that the Act shall apply to a county borough as if it were a county, and that for the purposes of the Act the City of London shall be deemed to be a county borough.

Section 9 makes the provisions of the Act apply to the transfer of an existing on licence as they apply to the renewal, and enacts that if the justices of a licensing district refuse to renew an existing on licence on the ground that the holder of the licence has persistently and unreasonably refused to supply suitable refreshment (other than intoxicating liquor) at a reasonable price, or on the ground that the holder of the licence has failed to fulfil any reasonable undertaking given on the grant or renewal of the licence, they shall be deemed to have refused the licence on the ground that the premises had been ill-conducted. The section further defines certain expressions contained in the Act, and repeals section 19 of the Wine and Beerhouse Act, 1869, and section 7 of the Wine and Beerhouse Amendment Act, 1870.

Section 10 excludes Scotland and Ireland from the operation of the Act, and provides that it shall come into operation on January 1st, 1905.

The schedules to the Act deal with the charges to be levied for the compensation fund. The first provides that the rate of charge in the case of an hotel or other premises to which subsection 4 of section 43 of the Inland Revenue Act, 1880, applies, shall be one-third of that charged in other cases, and, in the case of any licensed premises which are certified by the justices of the licensing district on the application of the holder of the licence to be used only as public gardens, picture galleries, exhibitions, places of public or private entertainment, railway refreshment-rooms, *bonâ-fide* restaurants or eating-houses, or for any other purpose to which the holding of a licence is merely auxiliary, such rate to be not less than one-third of that charged in other cases, as the justices think proper under the circumstances. (For Parliamentary proceedings on the Bill see previous section.) Comes into operation January 1st, 1905. (E)

[55] **Local Authorities (Qualification of Women) Bill.**—A measure of Earl Beauchamp to enable women to be elected and to act as members of county and borough councils and metropolitan borough councils, was discussed (June 28th), opposed by the Lord Chancellor, and in the result thrown out by 57 to 38.

[56] **Local Government (Ireland) Acts Amendment Bill**, proposed to remove the disqualification for sitting on municipal bodies imposed on persons convicted under the Crimes Act. Second reading moved by Mr. Field, and supported by other Nationalist members, but opposed by the Attorney-General for Ireland, and defeated by 205 to 137 (April 29th).

#### [57] **London Bills.**

Such further proceedings as there were on the Ministerial measure for the establishment of a commission for the administration of the Port of London and its docks, are noticed in sect. 69. In the late session two other bills in relation to docks were privately promoted, one to impose rates on goods brought into the Port and to make provision for the dock accommodation at and the navigation of the Port. Representatives of the trade of the Port of London disapproved of the principle on which the Ministerial Bill was founded, and accordingly promoted this alternative measure, which in their view better carried out the intentions of the Royal Commission of Inquiry. This Bill was withdrawn in July. The second of the two measures proposed to confer certain powers on the **London and India Docks Company**, but that part of it enabling the Company to apply to the Railway and Canal Commissioners for through rates with railway companies was struck out by a committee of the House of Lords, which held that the proposed change was of such importance that it should be the subject of a public bill, the Act passed being limited mainly to an extension of time for the compulsory purchase of lands required for and the completion of certain works. Power was conferred on the Postmaster-General to acquire lands in London, Southgate, and elsewhere, for the public service, and certain arrangements were enacted in reference to the purchase of land from Christ's Hospital.

The London County Council again submitted

some important proposals to Parliament, foremost among them being one for the establishment of a service of steamboats on the Thames, the river passing through or by the county for some twenty-two miles, between Hammermith on the west and Barking Reach on the east. The Council are now, under this Act of 1904, empowered to provide for the acquisition, construction, and maintenance of piers and landing-places on the river, subject to certain provisions for the protection of the Thames Steamboat Company; they may make through bookings with the tramways of the Council; and they are authorised to expend on capital account for the purposes of the Act such money as they may from time to time think fit, not exceeding £280,000. On its return from the Commons Committee which had considered it the Bill was opposed, but an amendment hostile to its passing was defeated by 156 to 70.

A number of changes having been made in it during its progress, an Act enabling the Council to construct and work new tramways and to alter and reconstruct existing lines in the county of London, to make street improvements in London and to empower the Borough Council of Woolwich to construct a new street, was passed in course of the session. In the first instance the proposal was renewed to lay a line from Westminster Bridge Road over the bridge and along the Embankment to the Savoy, where it was to form a junction with the line coming in a shallow subway from Theobald's Road; but this was rejected in the House by 159 to 131. The scheme for laying lines from Hampstead Road along Tottenham Court Road nearly to Oxford Street was strongly opposed, with the result that it finally disappeared from the Bill. The amount authorised to be expended under the measure is, £726,500 for the construction and equipment of new tramways, reconstruction or purchase of existing tramways, etc., and £328,000 for the street improvements and works connected therewith: total, £1,054,500, subject to certain local contributions and to recoupments.

The **General Powers Act** of the Council empowers them to acquire lands for fire brigade purposes in the City, Kensington and Plumstead, and to alter the titles of the Metropolitan Fire Brigade and of the head thereof to "The London Fire Brigade," and "The Chief Officer of the London Fire Brigade"; to slaughter dairy cattle suspected of tuberculosis of the udder, on payment of compensation at the full value of the animal if found to be sound, and at three-fourths if discovered to be affected by the disease. Other clauses require that filthy, dangerous or unwholesome articles found in any house shall be purified, and that houses infested with vermin shall be cleansed. The Police and Sanitary Committee of the Commons gave power to the Council to supply refreshments other than intoxicants to the occupants of their lodging-houses, on condition that no burden was thereby brought upon the ratepayers, but this provision was struck out in the Upper House.

The **Money Act** of the Council authorises the raising on capital account during the financial period April 1st, 1904—Sept. 30th, 1905, of a sum not exceeding £15,102,227, but £11,226,946 of this consists of re-grants of borrowing powers previously granted, so that the net aggregate new borrowing powers are £3,875,281,

of which £3,087,934 are for the Council and £787,347 for loans to other bodies.

An Act was passed enabling the Corporation of London to raise £350,000 for the provision and erection of a new central Criminal Court upon the site of old Newgate Gaol, the money to be repayable within sixty years. The Corporation also promoted a measure to empower them to rebuild Southwark Bridge, at an estimated cost of £480,000, but as the result of proceedings in committee the Bill was abandoned.

The Borough Council of St. Marylebone obtained power to borrow money on the security of the rates for the purchase of the St. Marylebone undertaking and business of the Metropolitan Electric Supply Company Limited, the total sum required for purchase, costs and expenses being £1,416,444.

The Metropolitan District Railway Act authorises the Company to charge zone fares for the conveyance of passengers between certain specified stations. Among other enactments may be mentioned those to authorise the sale and disposal of the site of King's College Hospital and the acquisition of lands for the erection of a new hospital elsewhere in the county of London; to make provision for the application and distribution of the water stock issued to the New River Company in discharge of the sum payable as compensation for the transfer of their water undertaking to the Metropolitan Water Board, and for the reconstruction of the Company and its registration as a limited company; and to free Maidenhead Bridge from tolls, to enable the Corporation of Maidenhead to borrow money for discharging the mortgage debt on the structure, and for vesting the Bridge estate in the Corporation. Two other private statutes sanction the disappearance of as many ecclesiastical buildings in London: one of these being St. James's, Westmoreland St., Marylebone, the living of which was held for so many years by the late Rev. H. R. Haweis; and the other the church of St. Bartholomew-the-Less, situated within the precincts of the famous hospital.

[58] \*London Electric Lighting Areas Act, 1904 (4 Edw. VII., ch. 13—r.a. August 15th) is a measure of no very great interest except to the authorities and companies concerned. It was found expedient to make the boundaries of the areas within which the council of any metropolitan borough in London is authorised to supply electricity co-terminous, as far as may be, with the boundaries of the borough, and for that purpose to affect in certain cases the boundaries of the areas of supply of companies authorised to supply electricity; also to provide for agreements being made as between companies authorised to supply electricity for the purpose of making their areas of supply co-terminous, as far as might be, with the areas of the metropolitan boroughs. The new Act gives effect to these intentions. (E)

[59] \*Marine Insurance Bill, for codifying the law relating to marine insurance, was presented by the Attorney-General. [Withdrawn, August 8th.]

[60] Merchant Shipping (Lighthouses) Bill, presented by Mr. Plummer and supported by Mr. Charles McArthur, Mr. Evelyn Cecil, Sir J. Leng, Mr. T. P. O'Connor, and other members, the object of the measure being to transfer the whole administration of lighthouses, buoys, and beacons from Trinity House, the Commissioners of Northern Lighthouses, and the Commis-

sioners of Irish Lights, to the Board of Trade, and to create a committee, representative of shipping and trade interests, to assist the Board of Trade in such administration. Second reading was moved (May 13th) by Mr. Plummer, and was supported from both sides, though it was opposed by the Chancellor of the Exchequer and Sir M. Hicks-Beach. The principle of the measure was in the result affirmed by 155 to 129, but a further debate on a motion to send the measure to a standing committee stood adjourned. [Dropped.]

[61] \*Metropolitan Improvements (Funds) Act, 1904 (4 Edw. VII., ch. 2—r.a. March 29th).—Under "An Act to empower the Commissioners of H.M. Woods to form a Royal Park in Battersea Fields, in the county of Surrey," provision was made for the creation of a surplus fund derived from moneys payable under that Act, and for the accumulation of the said fund until it should be required for, and appropriated by Parliament to, the execution of improvements in the Metropolis or its neighbourhood; and the present Act authorises the appropriation of of that fund by the Commissioners of Works towards the opening of the Mall into Charing Cross and other works connected therewith. If any residue remains it may be applied to such other improvements in the Metropolis or its neighbourhood as may be thought fit. (E.)

[62] Mines (Eight Hours) Bill, presented by Mr. Osmond Williams, and supported by, among others, Sir C. Dilke, Sir W. Foster, Sir A. Rolit, and Mr. Norman, was the well-known measure to limit the hours of underground workers in mines to eight hours per day from bank to bank. Discussed on second reading in course of the afternoon of Feb. 26th, the debate standing adjourned. [Dropped.]

[63] Musical Copyright Bill, presented by Mr. Mount.—This measure was intended to amend certain provisions of the Act of 1902, from which, it was said, a serious increase in the repertoire and number of pirated copies of music printed and offered for sale had resulted. The Bill constituted it an offence for any person to print, publish, or sell, or have in his possession for those purposes, pirated music, and prescribed penalties for such offences. The Act of 1902 had been interpreted by the magistrates as giving no power to issue a search-warrant for shops and premises where pirated copies are printed or stored; this Bill gave that power. It was also proposed to give further powers as to the destruction of pirated copies. Second reading of the Bill was agreed to (Feb. 26th), and bill referred to Standing Committee on Law, from which it was reported with amendments (March 24th). Considered as amended (June 10th), when further modifications in the measure were made, the debate standing adjourned. [Dropped.]

[64] \*Naval and Military Medals Bill, proposed to regulate and restrict the wearing of naval and military medals and decorations, by imposing a penalty for the unauthorised wearing of the same, or the wearing with intent to deceive. Presented by the Earl of Donoughmore; passed Lords, withdrawn in Commons.

[65] Outdoor Relief (Friendly Societies) Act, 1904 (4 Edw. VII., ch. 32—r.a. Aug. 15th).—The Bill which passed—for there were three or four on the same subject before Parliament, including one by Lord Monkswell, with which progress was made in the Upper House—was that presented by Mr. Gretton, and it enacts

that "the discretion given by sect. 1 of the Outdoor Relief Friendly Societies Act, 1894, to the boards of guardians to take or not to take into consideration the amount received by a member of a friendly society when granting outdoor relief, shall be limited as herein-after provided. In granting outdoor relief to a member of any friendly society, the board of guardians shall not take into consideration any sum received from such friendly society as sick pay, except in so far as such sum shall exceed 5s. a week." On second reading in the House of Peers, the Earl of Wemyss (Aug. 12th) moved an amendment against any alteration in the principles of poor law relief as now administered save on the direct responsibility of the Government and after a full independent public inquiry into the working of the present law, and against proceeding with this measure meanwhile; but this was defeated by 30 to 9. (E.)

[66] **\*Penal Servitude Bill**, brought in by Mr. Akers-Douglas, and proposed to amend the law relating to penal servitude in England and Wales. In moving second reading (June 3rd) the Home Secretary explained that it proposed to make better provision for dealing with habitual criminals on whom ordinary sentences had no deterrent effect, and was based on the unanimous recommendations of a strong committee appointed in 1894 by Mr. Asquith when Home Secretary. A change in the present system was urgently needed. It was more important that the sentence should fit the criminal than that the punishment should fit the crime. The object should be not so much punishment as keeping the criminal out of temptation as long as possible, and the present bill would enable that purpose to be carried out. Another portion of the scheme dealt with the segregation of convicts into classes, with special treatment for each class. The measure would apply to persons previously convicted three times for not less than seven years and known to have afterwards led criminal lives. Second reading was agreed to after discussion. (Withdrawn Aug. 4th.)

[67] **\*Police Superannuation Bill**.—Brought in by Mr. Cochrane, Under Home Secretary, and proposed to amend the Police Act, 1890, with respect to the pensions of constables who continued to serve after they have become entitled to a pension. It was thought that the Bill would encourage efficient constables to remain in the force after 25 years' service by protecting them against forfeiture of pension after that period except for the commission of offences of a grave nature. Second reading agreed to after discussion (Mar. 23rd), and Bill considered by Standing Committee on Trade; withdrawn Aug. 4th.

[68] **\*Poor Law Authorities (Transfer of Property) Act, 1904** (4 Edw. VII., ch. 20—r.a. Aug. 15th), is "an Act to make provision for the transfer of property and other matters consequent upon the dissolution of districts and poor law unions or the addition of one poor law union to another." Presented by Earl Waldegrave. (E. & S.)

[69] **\*Port of London Bill**.—For details of this important measure see 1904 ed., sect. 107. It will be remembered that, after consideration in 1903 by a joint committee of both Houses, the measure still awaited further consideration in committee of the whole House, and as many points of importance were to be brought forward therein the Prime Minister proposed,

and the House accepted, a resolution under which the further proceedings on the Bill stood adjourned until the session of 1904. In May of the latter year the Bill was revived at the stage at which it had been left, but there were no effective proceedings upon it, and it was withdrawn Aug. 8th. (See also London Bills, sect. 57, ante.)

[70] **\*Post Office Act, 1904** (4 Edw. VII., ch. 14—r.a. Aug. 15th).—As the law stood, a commission equal to the original poundage charged on a postal order accrued at the end of every three months, and it not infrequently occurred that where a postal order had been accidentally mislaid, the aggregate of the commission chargeable had, when the order was presented, exceeded the amount payable. The Act charges one commission equal to the original poundage, if the order is not presented till after three months from its issue, but abolishes all further commissions. The opportunity was taken to remove an inconvenient restriction on the use of embossed stamps, the Treasury being authorised by warrant to regulate such use where those stamps have been cut out or otherwise separated from the paper, etc., on which they were impressed. (U.K.)

[71] **\*Prevention of Corruption Bill**.—The measure of the Lord Chancellor for the better prevention of corruption was reintroduced, and sent to the Commons May 19th (=). The provisions of the measure are generally known, as it is in substance the legislation first initiated by the late Lord Russell of Killowen.

[72] **Prevention of Cruelty to Children Act, 1904** (4 Edw. VII., ch. 15—r.a. Aug. 15th).—It provides: (Section 1) that if any person over the age of sixteen years, who has the custody, charge or care of any child under the age of sixteen years, wilfully assaults, ill-treats, neglects, abandons or exposes such child, or causes or procures such child to be assaulted, ill-treated, neglected, abandoned or exposed in a manner likely to cause such child unnecessary suffering, or injury to its health (including injury to or loss of sight, or hearing, or limb, or organ of the body, and any mental derangement) that person shall be guilty of a misdemeanour, and (a) on conviction on indictment shall be liable to a fine not exceeding £100, or alternatively, or in default of payment of such fine, or in addition thereto, to imprisonment, with or without hard labour, for any term not exceeding two years; and (b) on summary conviction shall be liable to a fine not exceeding £25, or alternatively, or in default of payment of such fine, or in addition thereto, to imprisonment, with or without hard labour, for any term not exceeding six months. A person may be convicted of such an offence either on indictment or by a court of summary jurisdiction, notwithstanding the death of the child. If it is proved that a person indicted was directly or indirectly interested in any sum of money payable in the event of the death of the child, and had knowledge that such sum was payable, the court may increase the amount of the fine to a sum not exceeding £200, or in lieu of awarding any other penalty sentence the person indicted to penal servitude for any term not exceeding five years. A person shall be deemed to be directly or indirectly interested in any sum payable in the event of the death of the child if he has any share in or any benefit from the payment of that money, though he is not a person to whom

it is legally payable. If any person (a) causes or procures any boy under the age of fourteen years, or any girl under the age of sixteen years, or, having the custody, charge or care of any such child, allows that child to be in any street, premises or place for the purpose of **begging or receiving alms**, or of inducing the giving of alms, whether under the pretence of singing, playing, or performing, offering anything for sale or otherwise; or (b) causes or procures any child of such age to be at any time in any street, or in any premises licensed for the sale of any intoxicating liquor, other than premises licensed according to law for public entertainments, for the purpose of **singing, playing, or performing**, or being exhibited for profit, or offering anything for sale, between 9 p.m. and 6 a.m.; or (c) causes or procures any child under the age of eleven years, or, having the custody, charge or care of any such child, allows that child to be at any time in any street, or in any premises licensed for the sale of any intoxicating liquor, or in premises licensed according to law for public entertainments, or in any circus or other place of public amusement to which the public are admitted by payment, for the purpose of singing, playing or performing, or being exhibited for profit, or offering anything for sale; or (d) causes or procures any child under the age of sixteen years, or, having the custody, charge or care of any such child, allows that child to be in any place for the purpose of being trained as an acrobat, contortionist, or circus performer, or of being trained for any exhibition or performance which in its nature is dangerous—he shall, on summary conviction, be liable to a fine not exceeding £25, or alternatively, or in default of payment of such fine, or in addition thereto, to imprisonment, with or without hard labour, for any term not exceeding three months. (Section 2) This section shall not apply in the case of any occasional sale or entertainment the net proceeds of which are wholly applied for the benefit of any school or to any charitable object, if such sale or entertainment is held elsewhere than in premises which are licensed for the sale of any intoxicating liquor, but not licensed according to law for public entertainments, or if, in the case of a sale or entertainment held in any such licensed premises a special exemption from the provisions of this section has been granted in writing under the hands of two justices of the peace. Any authority may, if they think it necessary or desirable so to do, from time to time by by-law extend or restrict the hours mentioned in provision (b) either on every day or on any specified day or days of the week, and either as to the whole of their district or as to any specified area therein. Provisions (c) and (d) shall not apply in any case in respect of which a licence granted under this Act is in force, so far as that licence extends. A petty sessional court, or in Scotland the School Board, may (Section 3) grant a licence for such time and during such hours of the day, and subject to such restrictions and conditions as the court or board think fit, for any child exceeding ten years of age to take part in any entertainment or series of entertainments to take place in premises licensed according to law for public entertainments, or in any circus or other place of public amusement, or to be trained for such, if satisfied of the

fitness of the child for the purpose, and that proper provision has been made to secure the health and kind treatment of the children taking part in the entertainment or series of entertainments, or being trained: and it shall be the duty of inspectors and other officers charged with the execution of the Employment of Children Act, 1903, to see that the restrictions and conditions of any licence are duly complied with. A constable may take into custody, without warrant, persons who commit certain offences under the Act (Section 4), and provision is made for the children being taken to a place of safety (Section 5). In a case of cruelty the court may order that the child be taken out of the custody of the person convicted or bound over to keep the peace, and be committed to the custody of a relation of the child or some other fit person, including any society or body corporate, until it attains the age of sixteen years, or for any shorter period (Section 6), and direct the parent to contribute to its maintenance (Section 7). Where any child under the age of sixteen years (Section 9) is brought before a petty sessional court under circumstances authorising the court to deal with the child under the Industrial Schools Acts, the court, if it thinks fit, may make an order for the committal of the child to the custody of a relation or other person. If it appears to any stipendiary magistrate, or to any two justices of the peace, on information made before him or them on oath, that there is reasonable cause to suspect that a child has been or is being assaulted, ill-treated, or neglected in a manner likely to cause it unnecessary suffering, or to be injurious to its health, such magistrate or justices may issue a warrant authorising a police officer to search for such child and detain it in a place of safety (Section 10). Where the person convicted of the offence of cruelty is a parent of the child, or is living with the parent, and is an habitual drunkard within the meaning of the Inebriates Acts, 1879 & 1888, the court, in lieu of sentencing such person to imprisonment, may make an order for his detention for any period named in the order not exceeding twelve months, in a retreat under the Acts, upon being satisfied that the expenses during detention will be defrayed (Section 11). In any proceeding the person charged shall be competent, but not compellable, to give evidence (Section 12), and the wife or husband shall be competent but not compellable to give evidence as a witness. The deposition of a child on oath may be taken (Section 13), and shall be admissible in evidence either for or against the accused person (Section 14). Where there is a dispute as to the age of a child (Section 17), and the child appears to the court to be under any specified age, such child shall for the purposes of this Act and the Employment of Children Act, 1903, be deemed to be under that age, unless the contrary is proved. A person may be charged with committing an offence against two or more children on the same information (Section 18), but the person charged shall not be liable to a separate penalty for each child unless upon separate informations. If any person be convicted by a court of summary jurisdiction and such person does not plead guilty or admit the truth of the information, he may appeal in England and Ireland to a court of quarter sessions and in Scotland to the High Court of Justiciary (Section 19). A

board of guardians, or in Scotland the parish council may out of any funds they control pay the expenses of any proceedings which they have directed to be taken under the Act (Section 21). Nothing in this Act shall be construed to take away or affect the right of any parent, teacher, or other person having the lawful control or charge of a child, to administer punishment to such child (Section 28). The Act came into operation Oct. 1st, 1904. (U.K.)

[73] **Private Legislation Procedure (Wales) Bill**, presented by Mr. Vaughan-Davies, and discussed on second reading (March 25th). The main object of the measure was to extend to Wales the operation of the enactment regarding private bill legislation already in force in Scotland. The third part of the Bill authorised the establishment of a **Joint Board** representing the councils of counties and county boroughs in Wales for the purposes of the Bill; but this part was eventually withdrawn, and the Bill after second reading was sent to a select committee, by whom it was in due course reported without amendment, but with a special report, for which see sect. 107, *post*.

[74] **Public Entertainment Bill**, presented by Capt. Jessel, supported by, among others, Mr. W. F. Smith, Sir G. Fardell, Dr. Macnamara, and Mr. T. P. O'Connor, proposed to legalise the performance in music-halls of ballets and sketches, provided that the duration of each such performance should not exceed forty minutes, and no more than six principal performers took part therein, and that there were an interval of at least thirty minutes between any two such ballets or sketches. [Dropped.]

[75] **\*Public Health Act, 1904** (4 Edw. VII., ch. 16—r.a. August 15th), presented by Earl Waldegrave, and enables regulations to be made for carrying into effect conventions with respect to the prevention of danger arising to public health from vessels, and the prevention of the conveyance of infection by means of vessels. The measure was an outcome of the International Sanitary Conferences held in Venice and Paris with reference particularly to the plague. (U.K.)

[76] **\*Public Works Loans Act, 1904** (4 Edw. VII., ch. 36—r.a. August 15th), enacts that for the purpose of local loans there may be issued by the National Debt Commissioners the following sums: namely, (a) For the purpose of loans by the Public Works Loan Commissioners any sum or sums not exceeding in the whole the sum of £4,500,000; (b) for the purpose of loans by the Commissioners of Public Works in Ireland any sum or sums not exceeding in the whole the sum of £900,000. (U.K.)

[77] **Railways (Private Sidings) Act, 1904** (4 Edw. VII., ch. 19—r.a. August 15th), presented by Sir J. Brunner, and supported by members on both sides. It amends the law relating to private sidings by enacting that the reasonable facilities which every railway company is required to afford shall include reasonable facilities for the junction of private sidings or private branch railways with any railway belonging to or worked by any such company, and reasonable facilities for receiving, forwarding, and delivering traffic upon and from those sidings or private branch railways. The Railway and Canal Commissioners may at any time review and rescind or vary any order made by them under this Act on the application of any party to the order; but, before such an

application is entertained by the Commissioners, the applicant shall show to the Commissioners that there is a *prima-facie* case for the application. (U.K.)

[78] **Rating of Machinery Bill**, proposed to amend the law relating to the rating of hereditaments containing machinery, and defined the machinery and appliances which were not to be taken as enhancing the value of hereditaments for purposes of rating. Presented by Mr. Chapman, and supported by Sir E. Strachey, Sir W. Houldsworth, and other members. Discussed on second reading, which was moved by Sir W. Holland (March 18th). The rejection of the measure was proposed by Sir J. Joicey. Mr. Grant Lawson, Secretary to the Local Government Board, said the Government left the question an open one to their supporters. Second reading was carried by 114 to 94, but the debate stood adjourned on a motion to refer the measure to the Standing Committee on Trade. [Dropped.]

[79] **Registration of Clubs (Ireland) Act, 1904** (4 Edw. VII., ch. 9—r.a. August 15th), presented by Mr. O'Neill, supported by Sir T. Esmonde, Mr. T. W. Russell, and others on both sides, the object of the enactment being to put a stop to bogus clubs formed merely for purposes of drinking. Comes into operation Jan. 1st, 1905. (I.)

[80] **\*Reserve Forces Bill**, presented by the Earl of Donoughmore, proposed to extend the Reserve Forces Acts to men outside the United Kingdom, so as to facilitate the return of residents and reservists in India and the Colonies to the colours, in case of mobilisation, and to sanction direct enlistment in the Reserve in the Colonies and India. Passed Lords and sent to Commons, where it was withdrawn (August 10th).

[81] **Revaccination Bill**, presented by the Duke of Northumberland, and proposed that children should be revaccinated within six months after they had attained the age of 12 years, applying to such revaccination certain provisions of the existing law, but exempting the "conscientious objector from penalties." The Marquis of Lansdowne (June 16th) said he was informed that whereas in 1895 the proportion of successful vaccinations to births was 54 per cent., in 1901 the proportion had risen to 76 per cent.; and for this reason the Government had not thought it desirable to attempt legislation in favour of compulsory revaccination. They accepted the principle of the measure, but could not commit themselves to details. Second reading was agreed to; Bill in due course sent to Commons (=).

[82] **\*Sale of Butter Bill** restricted the amount of water in ordinary butter to 16 per cent., and made provision for the inspection of butter manufactories; but permitted 20 per cent. of water in Irish salt firkin butter which was so branded or marked, pending some date which might afterwards be fixed. Introduced Feb. 10th, withdrawn August 4th.

[83] **Sale of Intoxicants to Children Bill**, presented by Lord Dunboyne, and was a short measure enacting, after amendment in committee, that every agent or servant of any licensed person who knowingly sold or delivered any intoxicating liquor to any person contrary to the provisions of the Intoxicating Liquors (Sale to Children) Act, 1901, should be liable to the same penalties as are provided by the aforesaid Act in the case of a similar offence

committed by such licensed person. Passed Lords and sent to Commons (=).

[84] **Savings Banks Act, 1904** (4 Edw. VII., ch. 8—r.a. Aug. 1st), was presented by Sir A. Rolitt, and widely supported on both sides. The general object is to carry out certain recommendations relative to trustee savings banks contained in the report of the Select Committee of the House of Commons on Savings Banks Funds, presented on July 17th, 1902 [see 1903 ed., sect. 133], and which were also recommended in the annual reports of the Trustee Savings Banks Statutory Inspection Committee. In each case the recommendation of these administrative reforms was unanimous. Amendments were made in the measure during its progress through the Commons. Under **Sec. 1** an auditor of a trustee savings bank is to be appointed for a term not exceeding one year, though a retiring auditor is to be eligible for reappointment. By **Sec. 2** the trustees of a trustee savings bank and the Postmaster-General may defray all or any of the expenses of any penny savings bank having a deposit account with the trustees or the Postmaster-General, as the case may be, incurred in obtaining necessary account-books, stationery, or similar articles, and in providing for the audit or inspection of the books and accounts of such penny savings bank, and the expenses so defrayed by the trustees are to be deemed necessary expenses within the meaning of the Act of '63. The trustees may, with the consent of the Inspection Committee (**Sec. 3**), grant to any officer of the bank who becomes incapable of discharging the duties of his office by reason of old age or permanent infirmity of body or mind, and who has completed not less than 20 years' service, compensation on his ceasing to hold office, by way either of a yearly allowance or of a gratuity of a capital amount, or by a combination of both these means; but such yearly allowance or gratuity is not to exceed such sum as might be granted under sects. 2 and 6 of the Superannuation Act, '59, to persons to whom a superannuation allowance may be granted under that Act. Any such compensation is to be paid as part of the current expenses of the bank, or, with the sanction of the Inspection Committee, out of any moneys standing to the credit of the separate surplus fund. Compensation payable by way of a yearly allowance shall only be continued so long as, in the opinion of the Inspection Committee, the surplus funds of the bank admit of, or can provide for, such payment. **Sec. 4** empowers trustee savings banks, with the consent of the National Debt Commissioners, to purchase land or erect buildings for the purposes of their savings bank, and for those purposes to apply money standing to the separate surplus fund account of their bank, and with the like consent to sell, exchange or lease any land or buildings acquired by them for the purposes of the bank. By **Sec. 5** any two or more trustee savings banks may, with the assent of the National Debt Commissioners, on the recommendation of the Inspection Committee, by special resolution of both or all such banks, become amalgamated. **Sec. 6** empowers trustees, on the recommendation of the Inspection Committee, and if authorised by the National Debt Commissioners, to make special investments. Trustees making special investments are to print, in the pass-books in use for the purpose of special investments, a notice stating that

the security of any special investment is not in any way guaranteed by the Government. As regards deposit accounts in excess of £200, **Sec. 8** prescribes that sect. 3 of the Savings Bank Act, '93 (which provides for the investment, unless the depositor otherwise directs, of any interest or dividend credited to him, and of any sums transferred to him, in excess of the limit of his deposit), shall cease to have effect. **Sec. 9** requires the National Debt Commissioners, in conjunction with the Postmaster-General, annually to prepare a statement showing the aggregate amount of the liabilities of the Government to depositors in Post Office Savings Banks, and the nature and amount of the securities held by the Commissioners to meet those liabilities; and similar statements of liabilities and securities held are to be prepared in regard to Trustee Savings Banks and Friendly Societies respectively; all such statements to be laid before Parliament. Under **Sec. 10** interest on the investments under the Trustee Savings Banks (Deficiency) Annuity Act, 43 and 44, ch. 36, is to be treated as income. **Sec. 11** prescribes that the entry in a depositor's book under sect. 2 of the Post Office Savings Bank Act, '61, of a deposit of less than £1 shall be conclusive evidence of title in the same manner as an acknowledgment of a deposit by the Postmaster-General is evidence of title under that section, and it shall not be necessary to transmit any such acknowledgment in the case of such a deposit. **Sec. 12** enables the Postmaster-General to enter into an arrangement with any Government Savings Bank authority in any British possession or foreign country for the transfer of sums standing to the credit of depositors from such a Government Savings Bank to the Post Office Savings Bank, or from the Post Office Savings Bank to such a Government Savings Bank. The Act extends to the United Kingdom, and to the Channel Islands and the Isle of Man. (U. K.)

[85] **\*Sea Fisheries Bill**, presented by the Earl of Onslow, and was to provide against the destruction of undersized flat fish, enabling the Board of Agriculture and Fisheries to make orders prohibiting the landing of any flat fish not exceeding the prescribed length, and to prohibit trawling in territorial waters. The Bill, after being considered by a Select Committee, was sent to the Commons, where it was withdrawn (Aug. 4th).

[86] **\*Seamen's and Soldiers' False Characters Bill**, enacted a penalty in relation to the falsification of seamen's and soldiers' certificates of service or discharge, and to false statements made, used, or given in connection with entry or enlistment into the naval, military, or marine forces. Presented by the Earl of Donoughmore; sent to Commons, withdrawn (Aug. 10th).

[87] **\*Secretary for Scotland Act, 1904** (4 Edw. VII., ch. 27—r.a. Aug. 15th), authorises the transfer to the Secretary for Scotland of certain powers and duties under the Acts relating to Reformatory and Industrial Schools. (S.)

[88] **\*Shop Hours Act, 1904** (4 Edw. VII., ch. 31—r.a. August 15th) provides for the early closing of shops, and was presented by the Under Home Secretary (April 26th). It provides (**Sec. 1**) that what is known as a "closing order" made under the Act by a local authority, and confirmed by the central authority—which terms are defined later on—in manner duly

provided by the Act, may fix the hours on the several days of the week at which, either throughout the area of the local authority or in any specified part thereof, all shops or shops of any specified class are to be closed for serving customers. By Sect. 2 the hour fixed by a closing order—"the closing hour"—is not to be earlier than seven in the evening on any day of the week, except that on one specified day of the week it may be an hour not earlier than one in the afternoon. A closing order may prohibit, either absolutely or subject to such exemptions and conditions as may be contained in the order, the carrying on of any retail trade after the closing hour in any place, not being a shop, within the area to which the order applies, for the carrying on of which it would be unlawful to keep a shop open after that hour. The order may define the shops and trades to which the order applies; authorise sales after the closing hour in cases of emergency and in other specified circumstances, and contain any incidental, supplemental, or consequential provisions. But nothing in the order is to apply to any fair lawfully held or a bazaar for charitable purposes, nor to any shop where the only trade or business carried on is one or more of the trades or businesses mentioned in the schedule to the Act. This schedule of excepted trades or businesses may be here conveniently set out:—

Post-office business.

The sale of medicines and medical and surgical appliances.

The sale by retail of intoxicating liquors for consumption on or off the premises.

The sale of refreshments for consumption on the premises.

The sale of tobacco and other smokers' requisites.

The sale of newspapers.

The business carried on at a railway book-stall or at a railway refreshment-room.

Where several trades and businesses are carried on in the same shop and any of those trades or businesses are of such a nature that if they were the only trades or businesses carried on in the shop the closing order would not apply to the shop, the shop may be kept open after the closing hour for the purposes of those trades and businesses alone, but on such terms and under such conditions as may be specified in the order; but it is provided that the terms and conditions as respects post-office business shall be subject to the approval of the Postmaster-General.

Section 3 enacts the procedure for making closing orders. Whenever a local authority are satisfied that a *prima-facie* case is made out, the authority is to give public notice in the prescribed manner of their intention, specifying therein a period within which objections may be made; and if after taking into consideration any objections they may have received they are satisfied that it is expedient to make the order, and that the occupiers of at least two-thirds in number of the shops to be affected by the order approve it, they may make it. The order is then to be submitted to the central authority, meaning in England the Home Secretary, who is to consider any objections, and who may either disallow it or confirm it with or without amendment. As soon as the central authority have confirmed any order it is to have the effect of an Act of Parliament; but every order is to be laid before Parliament as soon as may

be after it is confirmed, and is subject to cancellation if either House present an address against it within forty days. Provision is made under Sect. 4 for the revocation at any time by the central authority, on the application of the local authority, of a closing order. Penalties are imposed by Sect. 5 for offences under the Act. Under Sect. 6 the central authority may, for the purposes of any of their powers and duties under the Act, cause a local inquiry to be held, and by a subsequent section they may make regulations for carrying into effect the provisions of the measure. The expression "local authority" is in Sect. 8 defined to mean in London outside the City a metropolitan borough council, and elsewhere the council of an urban district with a population of over 20,000, and any council or other authority having power to appoint inspectors under the Shop Hours Acts, 1892 to '95. "Shop" includes any premises or place where retail trade (including the business of a barber) is carried on. Under Sect. 9, where an order under this Act is in force in any metropolitan borough or urban district, the council of the county in which the borough or district is situate may delegate to the council of the borough or district, either with or without any restrictions or conditions as they think fit, their powers under the Shop Hours Acts, 1892 to '95. (U. K.) See also sect. 108, Sunday Closing (Shops) Bill.

[89] Street Betting Bill, was presented by Lord Davey, and aimed at the suppression of betting in streets and other public places. Second reading of the measure was agreed to, the Government, subject to modifications, assenting (March 3rd), and the Bill sent with amendments to the Commons, June 7th (=).

[90] Sunday Closing (Shops) Bill, presented by Lord Avebury, and proposed to provide for the closing of shops on Sundays. In moving second reading (April 28th) the noble lord stated that the penalties proposed to be imposed for keeping open a shop on Sundays were 5s. for the first offence, £1 for the second, and £5 for the third or a subsequent conviction. There were, however, certain exemptions, including public-houses, refreshment-houses, tobacconists, newsagents, and chemists, while the transaction of post-office business was to be allowed. The Archbishop of Canterbury and Viscount Cross made a strong appeal to the noble lord not to press his motion to a division. Lord Avebury replied that he could not resist these appeals, and withdrew the measure.

[91] \*Telegraph (Construction) Bill, presented by Lord Stanley (June 15th), and proposed to amend the Telegraph Acts, with special reference to the use of land near—that is to say, within twenty feet of the road—for telegraphic lines, where the owner of the land refuses or fails to give his consent to the construction of the line. Power was also taken to require the lopping or to lop trees obstructing a telegraph line on a street or road. Withdrawn July 22nd.

[92] \*Telegraph (Money) Act, 1904 (4 Edw. VII., ch. 3—r.a. March 29th).—This measure authorises the issue, out of the Consolidated Fund, of any sums not exceeding in the whole £3,000,000 for the development of the Post Office telephone service, the money to be raised by terminable annuities chargeable on the Post Office vote. Lord Stanley stated (March 22nd) that £4,300,000 had been voted for this purpose in past years, that this sum was now very

heavily exhausted, and that the further sum asked for was required for the extension of trunk lines, which would absorb £1,300,000, £1,500,000 being needed for London exchanges, and £200,000 for provincial exchanges. He thought it would not be long before the telephone service became a paying concern. Competition with the National Telephone Company in areas supplied by the company was not contemplated by the Department. (U.K.) See also *Post Office Matters*, sect. 15, *ante*.

[93] *Trade Unions and Trade Disputes Bill*, presented by Mr. Paulton, and supported by Mr. Bell, Mr. Shackleton, Mr. Robson, Mr. D. A. Thomas, Mr. J. Burns, Sir C. Dilke, and others; proposed the legalisation of peaceful picketing, to so amend the law of conspiracy that an agreement or combination by two or more persons to do any act in contemplation or furtherance of a trade dispute should not be ground of action if such act when committed by one person would not be ground for an action, and to provide that an action should not be brought against a trade union or other association of individuals for the recovery of damage sustained by any person or persons by reason of the action of a member or members of such trade union or other association as aforesaid. Second reading moved by Mr. Paulton (April 22nd), and seconded by Mr. Johnson, it being stated by the former that the object in view was to restore the law to what Parliament deliberately intended it to be in 1875, and what was understood and believed to be the law prior to the recent decisions. As the law now stood, trade unions were exposed to overwhelming attacks upon their funds. He hoped the Government would leave this an open question. Colonel Pilkington moved, and Sir A. Hickman seconded, the rejection of the bill. Mr. Balfour said a Royal Commission had been appointed to inquire into the subject, and it was impossible for him to support the Bill till he had the report of the Commission. Sir R. Reid, in defending the clauses of the Bill, said the law of conspiracy had become wholly unintelligible. In the result second reading was carried by 238 to 199, but further debate on a motion to refer the measure to the Standing Committee on Law stood adjourned. [Dropped.]

[94] *Tuberculosis (Animals) Compensation Bill*, to provide for the payment of compensation to the owners of carcases of animals condemned after slaughter and destroyed by order of a magistrate on account of tuberculosis; presented by Mr. Price, and supported by members on both sides, read a second time (April 15th), and referred to select committee (see sect. 110, *post*). Reported without amendment July 19th (=). See also sect. 57, *London Bills*.

[95] *University of Liverpool Act, 1904* (4 Edw. VII., ch. 11—r.a. Aug. 15th), was presented by Sir John Brunner and supported by other members on both sides; it extends the privileges of graduates of the University of Liverpool in similar fashion to the Leeds University Act (see sect. 52, *supra*). (E.)

[96] *\*Valuation Bill*, introduced by Mr. Long; proposed to amend the law with respect to valuation authorities, and the effect of, and procedure for, making valuation lists, and to make certain amendments in the law relating to valuation which were regarded as necessary for the purpose of promoting uniformity of valuation as between valuation authorities.

It was stated by the President of the Local Government Board, in introducing the measure (April 26th), that the measure was based, in certain respects, on the recommendations of the Royal Commission, and extended to the rest of the country, subject to modifications, the system existing in London. They required a single authority for valuation and assessment purposes, and uniformity of assessment, and in order to secure this it was proposed to make the county council the valuation authority, and in the case of county boroughs the county borough councils, and to associate with the authority the surveyor of taxes with the right to act and vote. There were also provisions for the appointment of district committees. In London the county council was to be the authority, and the metropolitan boroughs the valuation districts. The Bill was duly brought in, but was never read a second time, being withdrawn Aug. 4th. The City of London expressed strong objections to it.

[97] *Weights and Measures Act, 1904* (4 Edw. VII., ch. 28—r.a. Aug. 15th). The Bill was presented by Mr. Bousfield, supported by Mr. Parker Smith and Sir John Brunner, and originally contained provisions that on and after a given date the systems of weights known as troy weight and apothecaries weight should be replaced by the metric system of weights, and that all commodities heretofore usually bought or sold by troy weight or apothecaries weight should thenceforward be bought and sold by the metric weights; but Mr. Bousfield (April 15th), in course of second-reading debate, expressed his willingness to withdraw these, and they were afterwards struck out. The new Act, which came into operation on Jan. 1st, 1905, provides that the enactment is to be construed as one with existing legislation on the subject; that the Board of Trade may make general regulations as to the verification and stamping of weights and measures, and the tests to be applied, etc., and generally for the guidance of local authorities in the execution of their powers under the Weights and Measures Acts. If any difference arises between any inspector of weights and measures and any other person as to the meaning or construction of the Board of Trade regulations, or as to the method of testing or verifying any weight, measure, weighing or measuring instrument, such difference shall, on the request of either party, be determined by the Board of Trade, whose decision shall be final. The Board shall provide for the holding of examinations for the purpose of ascertaining whether applicants for the post of inspector under a local authority nominated by that authority possess sufficient practical knowledge for the proper performance of the duties of inspectors of weights and measures, and for the grant of certificates to persons who satisfactorily pass such examinations. Any person who removes a stamp from any weight or measure or weighing or measuring instrument, and inserts the same into another weight or measure or weighing or measuring instrument, shall be deemed to forge or counterfeit a stamp, and be subject to a penalty. Nothing in the enactments referred to in the fourth schedule to the Act of 1889 shall render any baker or seller of bread, or journeyman servant or other person employed by such baker or seller of bread liable to any forfeiture or penalty for weighing any bread conveyed or carried out

in any cart or other carriage by means of any of the instruments for weighing included in the definition "weighing instrument" in sect. 35 of the Act of 1889. An inspector of weights and measures may, with the consent of the local authority, prosecute under the Acts in matters arising in the discharge of his duties as inspector. Came into operation Jan. 1st, 1905. (U.K.)

[98] **Weights and Measures (Metric System) Bill.**—Lord Kelvin presented to the House of Peers a measure for in due course rendering compulsory the use of the system of weights and measures commonly known as the metric system, and second reading was moved by Lord Belhaven and Stenton on Feb. 23rd. After some conversation, in which the measure was supported by Earl Spencer, the Earl of Rosebery, the Duke of Rutland, and Lord Tweedmouth, and approval of the metric system was expressed by other peers, the motion was agreed to. Bill was considered by a select committee, of which Lord Belhaven and Stenton was chairman, reported with amendments, and sent to the Commons (=).

[99] **Wild Birds Protection Act, 1904** (4 Edw. VII., ch. 4—r.a. April 28th) was presented by Mr. Sydney Buxton. It renders illegal the use of the pole trap, which is a steel spring trap with teeth, generally fastened by a chain to the top of a pole in a clearing of a wood. (U.K.) The **Wild Birds Protection (St. Kilda) Act, 1904** (4 Edw. VII., ch. 10—r.a. Aug. 15th), was presented by Sir H. Maxwell, and extends the provisions of the Wild Birds Protection Acts to the Island of St. Kilda, excepting as regards certain birds required for the support of the inhabitants of the island. (S.)

[100] **\*Wireless Telegraphy Act, 1904** (4 Edw. VII., ch. 24—r.a. Aug. 15th).—The object of this enactment is to give the Government control over wireless telegraphy, in order to preclude its improper use in time of war or in any other national emergency, and to regulate the working of different stations in such a manner as to secure the greatest efficiency of communication between all stations. In this view the Act declares that the establishment of wireless telegraph stations, whether on shore or on British ships, without a licence, shall be illegal, and authorises the Postmaster-General to grant licences for such stations, and to prescribe the conditions under which they may be worked. Special provision is made for experimental installations. (U.K.)

### III. COMMITTEES.

**Chantrey Trust.** See ART. p. 28.

[101] **Foreign Ships (Application of Statutory Requirements).**—On May 4th it was ordered, on the motion of Mr. G. Balfour, that a select committee be appointed to inquire to what extent the statutory requirements applying to British ships trading to and from ports in the United Kingdom should be made applicable to foreign vessels trading to and from such ports. The committee was duly nominated, and Mr. Bonar Law, Secretary to the Board of Trade, was called to the chair; evidence was taken, and the Committee reported (Aug. 2nd) that at this late period of the session it was not in their power to present a final report, and recommending that the inquiry be continued next session.

[102] **House of Lords Offices.**—The select committee of peers appointed to consider the House

of Lords Offices, in a report dated Aug. 4th, deplored the death of Mr. S. Arthur Strong, its distinguished librarian, and announced that the Clerk of the Parliaments had appointed Mr. Edmund Gosse to be his successor. In the same report was included a communication from the Treasury, stating that they had decided to forgo any claim to fees on the introduction of peers into the House, suggesting that the House itself should take steps for the formal abolition of the fees in question, and adding that, with the concurrence of the Earl Marshal, the introduction fee which had hitherto been paid to Garter King of Arms had been abolished. The committee on this recommended that the fees in question should be abolished.

[103] **Irish Valuation Acts.**—A Commons committee was appointed to inquire and report what changes in the Irish Valuation Acts are desirable in order to enable a revaluation of rateable property in any district to be made on a basis equitable to all classes of ratepayers, and to be brought into force in an effective manner; in continuation of the inquiry commenced in 1902 and further proceeded with in the following year. The Committee consider the existing system decidedly deficient in not having an automatic machinery for keeping it up to date. A revaluation of buildings, at least in the larger centres of population, is needed in order to put affairs on a proper basis. Once, however, that revaluation be made, it would be proper to cast upon the valuation authority the duty of reconsidering the valuation list every year, and making such alterations as might be necessary. There should be as close an association of the local authority as was consistent with the maintenance of a central system of valuation. They suggest the appointment of a small valuation committee, say of two or three members of the local authority, who would have ample access to the Commissioners' Department, so as to make any suggestions as to original valuations, and who would sit as assessors to the Chief Commissioner on appeals. The further appeal should be, as at present, to the Recorders or County Court Judges, with whom the committee recommend the association of two assessors to be appointed by the county borough or county council of the place in which the case had arisen. An appeal would lie on a case stated on a point of law to the Supreme Court.

[104] **Kitchen and Refreshment Rooms (House of Commons).**—This committee, of which Colonel Lockwood was chairman, reported that during the session to July 23rd, 1904, 151 breakfasts, 25,769 luncheons, 26,407 dinners, 249 suppers, 48,891 teas, and 5,053 meals at bars were served, making a grand total of 106,520 meals served in the House.

[105] **Police and Sanitary Committee.**—This committee again pointed out most strongly the desirability of embodying the clauses which deal with powers relating to police or sanitary regulations in a "Local Authorities Clauses Act" from which they might be incorporated by reference in the very numerous bills which are promoted by local authorities all seeking the same or similar powers (see also *London Bills*, sect. 57, *ante*).

[106] **Private Legislation Procedure.**—The Private Legislation Procedure (Wales) Bill was referred to a Select Committee (see sect. 73, *ante*) with an instruction to inquire and report upon

the working in Scotland of the scheme proposed in the Bill, and upon the expediency of extending the provisions of the Bill, with or without modifications, to other parts of the United Kingdom. The Committee met in May, when Mr. Jeffreys, Deputy Chairman of the House of Commons, was called upon to preside; ten sittings were held, and evidence was received from 22 witnesses. There was, it is stated, practical unanimity among the witnesses that, having regard to the special circumstances which prevail in Scotland, the working of the Private-Legislation Procedure (Scotland) Act had been on the whole successful, though many witnesses considered that the Act should be amended in several particulars. Wales stands in a somewhat different position to Scotland on the one hand or England on the other, and the committee did not think the precise procedure which had been found to work successfully in North Britain would be well adapted to the Principality. But the wants and wishes of that part of the kingdom should be met by some adaptation of the principles of the Scotch Act—viz. local inquiry and the devolution of powers to a competent tribunal, subject always to the complete control of Parliament. The committee did not think that any widespread or matured desire exists in England for an extension thereto of the Scottish system. Whatever desire or public need there might be for a less costly system than that of private bill procedure could be best met by some extension of the provisional order system. The evidence strengthened the conviction of the Committee that in any extension of the system of local inquiry, two fundamental principles must be maintained—viz. the effective control of Parliament and the complete absence of any taint of personal interest or local prejudice on the part of those who conduct the inquiry or are members of the Commission.

[107] **Public Accounts.**—There are numerous points of interest in the three reports from the Committee of Public Accounts which were laid before Parliament in course of the session. In relation to the Naval Works Acts accounts the Committee express the opinion that Parliament should not be asked on a token vote of a few thousand pounds to commit itself to the construction of a new work, of which the total cost may run into millions, and of which not even an approximate estimate is submitted. The Committee entertained serious doubts as to the financial method by which naval works are provided for by means of loans. "The same remark applies, of course, to military works, and other similar loan services. For special works of permanent character and large cost, it may, as an exceptional measure, be desirable to provide by loan repayable within a limited number of years. But the resort to such procedure should be the exception, not the rule." The Treasury handed in a statement from which it appeared that the total expenses, collected from various votes, of the Coronation of His Majesty, amounted to £359,289 ss. *id.* The Committee expressed the opinion that when the estimate for £125,000 for the expenses of the Coronation was submitted to Parliament, a note should have been appended explaining that this sum only represented a portion of the cost to be incurred. In reference to South African affairs they state that the Imperial Military Railways, that is, the railways in the Transvaal and Orange River

Colony, were taken during the war for military purposes, and a sum of about £1,250,000 spent upon them, it being believed by the military authorities that this money would be recovered from the colonies when the railways were handed back at the end of the war. No parliamentary sanction was obtained for the spending of the money, and the Treasury had no knowledge of it until some time afterwards. £350,000 was made a final charge to army votes, the remainder being carried to a suspense account in the hope that repayment would be made by the colonies. In March, 1904, as no repayment had taken place, provision was made for the money in Army Supplementary Estimates; and the matter then, for the first time, came within the knowledge of the House of Commons. The Committee "have no reason to believe that the money was other than necessary at the time for the working of the railways, but they desire to express their emphatic disapproval of the fact that the expenditure of this large sum for a purpose which had not been sanctioned by Parliament was not brought to the knowledge of the Treasury at the earliest moment, in order that the sanction and approval of the House of Commons might forthwith be obtained for it." The Committee go on to state that the final account of the Imperial Yeomanry Committee, which had been so long delayed, had been received, and showed that £1,265,000 was issued at various times by the War Office to the Committee; that for more than one-third (£460,000) no details or vouchers could be produced, and that failing these the Comptroller and Auditor-General asked for a certificate from the Accountants. He had received this certificate, but it was to an account in a summary form without any sub-vouchers for purchases. "It is obvious," say the Committee, "that this being the certificate of the Accountant of the expending parties, and unsupported by vouchers, is in the highest degree unsatisfactory, and precluded any real audit of the accounts." In course of their report on the Store Accounts of the Army the Committee remark, under the subheading "Supply Accounts, Durban Base," that in consequence of the change of base from Cape Town to Durban, when Sir Redvers Buller came out, no "less than £6,000,000 of stores went through Durban, and it was impossible in many cases to keep correct accounts. As a consequence the Comptroller and Auditor-General reports that there were serious losses by fraud and theft, and no less than forty-five convictions obtained. It was at first stated that the deficiencies amounted to £76,000; but many errors had been detected in the book-keeping, and the loss had been reduced to £32,000. A committee was still sitting upon the Durban Base Depot Accounts and storage of supplies, and the General Officer commanding in South Africa had also been asked for a report upon the Storage and Survey Boards.

[108] **Registration of Nurses.**—It was ordered (June 24th) that a Select Committee be appointed to consider the expediency of providing for the registration of nurses. The Committee was appointed accordingly, and Mr. Tennant was called to the chair. Evidence was taken, and it was resolved that it was inexpedient that the question of the desirability of registration for nurses in nursing homes should be included in

the inquiry. Late in the session the Committee agreed to report the evidence, and to recommend that the inquiry be continued next year.

[109] **Tuberculosis (Animals) Compensation.**—A committee was appointed to consider a bill on this subject (see sect. 94, *ante*), and Mr. Grant Lawson was chosen to preside over its deliberations. The Committee observe that apart from any question of the indirect effect upon the trade in meat of the present law and practice with regard to the seizure and condemnation of carcasses of animals on account of tuberculosis, they do not think that serious pecuniary loss is inflicted at present by such seizure and condemnation upon butchers who deal in high-class meat, the vast majority of carcasses seized being those of old dairy cows. The difficulty which stands in the way of the general adoption of a system of mutual insurance by butchers against loss by seizure is the variety of practice which at present exists with regard to the amount of tubercular deposit, the existence of which in a carcass is held to justify its total condemnation; and the Committee recommend that power should be given to the appropriate central authority in England, Scotland, and Ireland respectively to enforce uniformity in this matter upon all local authorities. The Committee, however, do not think that the case of the butchers would be entirely met by provisions facilitating mutual or other insurance, and suggest that a proportion of the loss from seizure should fall upon the public, the money to be provided by the Imperial Exchequer, the conditions upon which such assistance should be granted being that the butcher claiming should prove to the satisfaction of a court of summary jurisdiction (1) that he bought the animal for slaughter in good faith, as a sound animal fit for human food; (2) that at the time of purchase it exhibited no visible signs of tuberculosis; (3) that the price he paid for it was a fair market price for an animal of its class and weight free from tuberculosis; and (4) that he gave notice to the local authority at the earliest time reasonably possible after he became aware of the fact that he had upon his premises a carcass affected by tuberculosis. The Committee do not recommend that this assistance should be given in the case of animals or meat imported into the United Kingdom. See also sect. 57, *London Bills*.

[110] **Workmen's Trains.**—This inquiry, which was begun in 1893 on the initiative of Mr. Lough, was continued, but not concluded, the Committee, of which Lieut.-Col. Bowles was this year chairman, recommending that it be continued in the next session of Parliament.

**Seymour, Admiral of the Fleet Sir Edward H., G.C.B., O.M., Hon. LL.D. Camb.,** appointed a Member of the Order of Merit June 26th, 1902, was b. in 1840, and is a son of the late Rev. Richard Seymour. He was ed. at Radley, and entered the Navy in '52. He served through the Crimean War in the Black Sea, the China War '57-60, and the Egyptian War '82, taking part in most of the naval fighting in connection with those wars. As Commander was badly wounded in action on the river Congo. He became Captain '73, Rear-Admiral '89, and Vice-Admiral '95, and was Commander-in-Chief of the China station '98-1901. From '94 to '97 he served in the Admiralty as Superintendent of Naval Reserves. He led the Naval

Brigade of the Allied forces from Tientsin in a vain effort to rescue the Europeans in Peking at the time of the Boxer rising in 1900, and for his services was promoted to the rank of G.C.B. He was given a warm welcome home on his return in Aug. 1901, in Oct. 1902 was appointed H.M.'s First and Principal Naval Aide-de-Camp. Commander-in-Chief Plymouth 1903, and Admiral of the Fleet 1904. 9, Ovington Square, S.W.; United Service Club; Travelers', Wellington and Royal Societies.

**Shakespeare Memorial.** A movement is on foot to hold a Shakespeare Commemoration all over the world during the "Shakespeare week" 1905 (April 23rd to May 1st), with a view to collect funds for the erection of an adequate Shakespeare memorial in London. The London County Council has agreed to provide a suitable site for the memorial. A Provisional Committee was formed in 1904. Chairman, Dr. Furnivall. Treasurer, Lord Avebury. Hon. Secretary, Prof. I. Gollancz. Offices, 32, George Street, Hanover Square, W.

**Shorthand.** Throughout the country about 100 associations exist for the practice and propagation of Pitman's system, and shorthand writers are represented by the following societies:—The Incorporated Phonographic Society, established '90, of which Mr. Alfred Pitman is president, has established districts in many large towns, and has examined and granted diplomas to more than 700 shorthand teachers. The Society also conducts examinations in typewriting. The secretary is Mr. H. W. Harris, 100, Mattison Road, Finsbury Park, N. The Incorporated Society of Shorthand Teachers was established '94, for promoting the interests of teachers. The secretary is Mr. W. H. Jones, 8, Birch Grove, Rusholme, Manchester. The Institute of Shorthand Writers practising in the Supreme Court of Judicature (registered), established '82, has for its object the promotion of efficiency in note-taking in connection with legal proceedings, and admits members by examination. The hon. secretary is Mr. M. Levy, and the office, 118, Chancery Lane, W.C.

## SIAM.

Siam is a kingdom embracing part of the Indo-Chinese and part of the Malay peninsula. Its territories have dwindled very much in recent years, through the action of France. Agreements made between Siam and France in '93, and between Great Britain and France in '96, recognised as belonging to Siam all the region lying between Burma and Tenasserim on the west and the Mekong on the east, roughly speaking. Kiang Sen, on the Mekong, marks the northernmost point of Siamese territory, and from a point just below Stung-Treng the boundary leaves the river and passes in a S.W. direction to the coast. A Convention with France, settling all questions at issue between the two countries, was signed on Oct. 7th, 1902. This was never ratified, and on Feb. 13th, 1904, a new Treaty was signed. The Anglo-French Agreement 1904 also had reference to Siam. See *History* below.

The states of Kedah, Potine, Kelantan, and Tringganu in the Malay Peninsula acknowledge the sovereignty of Siam, but retain a certain amount of independence. The King appointed Mr. Graham as adviser to Kelantan in 1903.

The royal dignity is nominally hereditary, but each sovereign appoints his own successor. The ruling sovereign is Chulalongkorn I., b. Sept. 21st, 1853, succeeded Oct. 1st, '68. The heir to the throne is Prince Chowfa Maha Vajiravudh, b. Jan. 1st, '80. The executive power is exercised by the King in conjunction with a Council of Ministers. The Legislative Council consists of 51 members, including the Ministers, certain members appointed by the King, and 6 princes of the royal house. There are 41 provinces, each administered by a Commissioner appointed by the King, and some of the tributary districts are administered by their own chiefs. The standing army is only about 5000, but there is a general training of males as militia, and a small but effective navy is being built up, with a strong force of marine infantry. Buddhism is the State religion. Western ideas of civilisation are spreading to some extent, and a few of the Siamese youths are sent to Europe for their education. A limited number of "King's Scholars," selected by competitive examination, are sent to England each year at the King's expense. Several of the Royal Princes, like the Crown Prince, have received, or are receiving, a European education. Moreover, Europeans are now very largely employed in the administration. The country is very inadequately developed, partly because of the condition of the inhabitants, who formerly, at least, were virtually serfs, owing to a system of debt-slavery which obtained. The King, however, has issued decrees putting an end to slavery for the future.

Foreign trade centres at Bangkok, and is almost wholly in the hands of foreigners. There are railways from Bangkok to Petchaburi (95 miles), to Paknam (14 miles) and to Korat (165 miles); a branch line from the latter runs to Lopburi (26 miles), and is being extended to Chiang-mai (373 miles); while other lines from Bangkok to Simaparatha on the coast (87 miles), and to Tachin (20 miles) are under construction. Chief exports: rice, teak-wood, pepper, and fish. Of the imports about 34 per cent. come from Great Britain.

Area about 220,000 sq. miles; pop. estimated at 5,000,000, including Siamese 1,500,000, and Chinese and Malays about 1,500,000. Capital, Bangkok, pop. about 400,000, situated on the delta of the river Menam, the great natural and economical centre of the kingdom. Revenue, 1901, £1,874,300; expenditure, £1,676,000. Imports, 1902, £3,393,674; 1903, £4,000,000; exports, 1902, £4,533,974; 1903, £4,900,000.

General Adviser to the Siamese Government, Prof. E. H. Strobel, Professor of International Law at Harvard University, U.S.A.; Judicial Adviser, Mr. Stewart Black; Financial Adviser, Mr. W. J. F. Williamson, F.C.S.; Minister of the Interior, H.R.H. Prince Damrong; Minister of Justice, H.R.H. Prince Rabi.

Minister in London, Phya Rajā Nuprabandh, 23, Ashburn Place, South Kensington, S.W.—*Councillor of Legations*, F. W. Verney, 12, Connaught Place, W.—*Financial Agent in London*, C. Rivett Carnac.—*Consul-General*, James Riches, 6, Great Winchester Street, E.C.

British Minister and Consul-General, Mr. Ralph Paget, C.M.G.—*Consul*, W. R. D. Beckett.—*Consul at Chiangmai*, C. E. W. Stringer.—*Judge of H.M. Court at Bangkok*, W. H. P. Wilkinson (acting).—*Consul at Kedah, etc.*, C. W. S. Kynnersley, C.M.G. (at Penang).

## History, 1904.

A new treaty with France was signed at Paris (Feb. 13th) to take the place of the treaty of Oct. 1902, which was never ratified. It defined the frontier between Siam and Cambodia, and provided for its delimitation. This definition of the frontier provided for the transference to French government of an area of about 8000 square miles, while, by clause 4 of the Treaty, the Siamese Government abandoned all sovereign rights over the Luang-Prabang territory, on the right bank of the Mekong. France agreed to evacuate Chantaboon, but an agreement, provided for in the Treaty, was signed in July, by which the harbour of Krat, on the Gulf of Siam, was ceded to France. Krat is the terminus of the Bangkok Railway, and it was arranged that it should be occupied simultaneously with the evacuation of Chantaboon, which was made conditional on the delimitation of the frontier referred to above and the actual transference of the territory dealt with by the Treaty. Siam was placed under strict stipulations as to the troops it should keep in the Siamese basin of the Mekong, France requiring that the troops and officers must be Siamese and not foreigners, except with the consent of the French Government.

The period for ratification by the French Parliament (originally four months, ending June 13th) was extended, and the treaty was duly ratified in December, the transfer of Krat and the Isle of Kochong taking place early in Jan. 1905. The Budget Estimates for 1904-5 again showed a rising revenue, the highest yet reached. In August the Crown Prince of Siam entered upon a term in the Buddhist priesthood, in accordance with the custom of the country incumbent on Buddhist youths of all classes, his term lasting about three months. In September the task of re-organising the postal and telegraph services was entrusted to Phya Sri Sahadebh, Vice-Minister of the Interior.

By the Anglo-French Agreement (April 8th, 1904) the two Powers made a Declaration as to Siam: "That the influence of Great Britain shall be recognised by France in the territories situated to the west of the basin of the River Menam, and that the influence of France shall be recognised by Great Britain in the territories situated to the east of the same region, all the Siamese possessions on the east and south-east of the zone above described and the adjacent islands coming thus henceforth under French influence, and, on the other hand, all Siamese possessions on the west of this zone and of the Gulf of Siam, including the Malay Peninsula and the adjacent islands, coming under English influence. The two Contracting Parties, disclaiming all idea of annexing any Siamese territory, and determined to abstain from any act which might contravene the provisions of existing treaties, agree that, with this reservation, and so far as either of them is concerned, the two Governments shall each have respectively liberty of action in their spheres of influence as above defined."

Smith, Goldwin, D.C.L., was b. at Reading, Berks, 1823. Ed. at Eton and Oxford, graduating first class in classics '45; Fellow of Univ. Coll. Oxford '46. He was Assistant Sec. of the Royal Commission of Inquiry into the condition of the Univ. of Oxford '50, Secretary to a subsequent Commission, under which important University

reforms were introduced, and a member of the Education Commission in '58. **Regius Professor of History** ('58 to '66) at **Oxford**, and was brought prominently into notice by his lectures, which were characterised by great vigour and originality. He championed the cause of the North in the American Civil War, at the conclusion of which he visited the United States on a tour. In '68 he accepted an honorary **Professorship of History** at **Cornell Univ.**, New York, of which University he is now an Emeritus Professor. Since '71 he has resided at Toronto, where he has led an active literary life. During '91 he published "Canada and the Canadian Question," "A Trip to England" in '92, a "History of the United States" in '93, "Oxford and her Colleges," "Bay Leaves: Translations from Latin Poets," "Specimens of Greek Tragedy," "Essays on Questions of the Day," in '94, and "Guesses at the Riddle of Existence" ('96).

### SOCIALISM.

Socialism, primarily and broadly, is the name given to the doctrine which proclaims the equal right of all to the material conditions of existence—that is, to the enjoyment of the necessities, comforts, and luxuries of life—and at the same time the equal duty of all to labour in relatively equal proportion (so far as may be needful) for the maintenance of those material conditions. Socialism is thus, in its first intention, an economic doctrine. But by most schools of Socialists this has been, and is, regarded as the necessary foundation of a reconstruction of human life generally—i.e., of a complete readjustment of political, religious, and domestic relations, involving radical changes in their present forms. In the following article the Socialist organisations in England and abroad are briefly reviewed.

The English societies are: the **Social Democratic Federation**—Secretary, H. W. Lee, 3, Bolt Court, Fleet Street, E.C.; the **Fabian Society**—Secretary, E. R. Pease, 3, Clement's Inn, Strand, W.C.; and the **Independent Labour Party**—Assist.-Sec., Francis Johnson, 10, Red Lion Court, Fleet Street, E.C. The Social Democratic Federation has about 150 branches in existence, with a membership of 9500. The **Independent Labour Party** was formed at a conference held in Bradford early in '93, and has over 200 branches and 15,000 members. Ten seats were fought at the 1900 General Election, but only one was won. **Chairman**, Mr. Philip Snowden; **Treasurer**, Mr. T. D. Benson; **Assist. Sec.**, Mr. Francis Johnson.

The **Socialists of Germany** are known as the Social Democrats, and are led by Herren Bebel, Vollmar, and Singer. They form the strongest political party in the empire, and their aim is avowedly to replace the existing capitalistic order of society by one in which land, capital, and all the means of production and distribution will be owned and worked by the community for the benefit of all its members. They polled 3,010,771 votes at the 1903 election, and secured the return of 82 members to the Reichstag. The number of party organs is 76, 22 of which are dailies. An anti-doctrinaire party, led by E. Bernstein, long resident in England, has recently made much headway, and advocates co-operation with the ordinary political parties. See **GERMANY, Political Parties**.

In France the 1903 Congress at Bordeaux showed that French Socialists are divided into

two main groups: the Government Socialists, led by M. Millerand, an ex-Minister, who served under M. Waldeck-Rousseau; and the Revolutionary Socialists, led by M. Jules Guesde, who declare that Socialism is inconsistent with the opportunism required by participation in the work of government under existing conditions. A motion to expel M. Millerand was brought forward and hotly debated in 1903. Finally a resolution supporting M. Millerand, proposed by M. Jaurès, was carried by 109 votes to 89. In 1904, however, the Socialist Federation of the Department of the Seine resolved to exclude M. Millerand from the Socialist party. A split amongst the Radical Socialist group in Parliament followed, 65 members of the group forming a new party, which they called the Radical Socialist Left. M. Jaurès and others in April founded a new journal called *L'Humanité*.

In Austria the Socialist party is strongly organised, a powerful propaganda is carried on through the Press, and the influence of the party is very marked in the elections. In Bohemia and Silesia the movement has made great way, but not so much in the Alpine districts, though an anti-clerical and socialistic body, called the Styrian Peasants' League, has 10,000 members. Socialism in Austria is a political force, rather than a theoretical adherence to Communistic principles. The party organ is the *Arbeiter Zeitung*, which is ably conducted.

In Italy there are three sections making up the Socialist party. The Reform party is led by Signor Bissolati, the Revolutionary party by Signor Labriola, and a third group follows Signor Ferri. At the Socialist Congress held at Bologna in April 1904 an agreement as to Parliamentary action under Signor Ferri was come to, but he was condemned to 14 months' imprisonment for libel, and so had to retire from the leadership of the party.

In Russia there is a strong and growing Social Democratic party, which has a central executive and an official organ, the *Iskra*. The party aims at the abolition of autocracy and the establishment of a democratic republic. It also advocates the rights and claims of the workmen and the abolition of all survivals of the condition of serfdom. The strikes of 1903 were largely the work of this party. There is also a Socialist Revolutionary party, which believes in striking for freedom, and is specially endeavouring to stir up the peasantry. Under RUSSIA a full account is given of the events of 1904.

There is a Socialist party in Spain, led by Señor Iglesias, which in 1903 joined hands with the Republicans, and conducted a vigorous revolutionary propaganda.

The grant of universal suffrage in Belgium brought the Socialists of that country into great and unexpected prominence at the general elections in Oct. '04, and no less than 34 Socialist candidates were returned at the 1902 election. See **BELGIUM**. Socialism in Denmark is of the Marxist order; but here again, as in Austria, political discontent has driven many to join the Social Democratic Federation. These form the moderate section, and tend to join the Radicals, the extreme revolutionary section being very small in numbers. The Socialist party in Norway numbers about 56 unions, with a total membership of 6000. Its avowed aims are to abolish the private owner-

ship of land and of the instruments of production. A tacit alliance exists between the Socialists and the Radicals. In the towns of Sweden the movement has made some little headway. In the Netherlands, by a decree of the Cour de Cassation, the Socialist League was dissolved in '94 as an illegal association; but 52 branches of it united to form a new body, and it has recently been agitating vigorously for universal suffrage.

The Sixth International Socialist Congress met at Amsterdam Aug. 14th-20th, 1904. A resolution, which was passed at the German Socialist Congress at Dresden, adopted by the French Socialist party at its conference at Rheims, was carried by 25 votes to 5, 12 delegates abstaining. The resolution, while approving of Socialist Parliamentary groups running their own candidates for Parliamentary offices, condemned any idea of changing the Socialist tactics of the past, based on the struggle between the classes, by any concession to the established order of things. It declared that the Socialist party must refuse all responsibility for political and economic conditions based on capitalist production, and must accept no share in the Government in a *bourgeois* society.

**Society for the Rescue of Young Women and Children.** The Rescue Society was established in 1853, and incorporated in '86 for the reformation of openly immoral women and the guardianship and training of young girls exposed to danger. Maternity and Lock Hospital cases are also admitted. Seven Homes are maintained, accommodating 185 inmates. The industrial earnings were £1554 in 1903, or nearly one-third of the total cost. Funds are greatly needed. **Chairman of Committee and Treasurer, Mr. William S. Gard; Secretary, Mr. C. Stuart Thorpe. Offices, 79, Finsbury Pavement, E.C.**

**Society of Accountants and Auditors.** The, was incorporated in 1885. Its objects are to provide a central organisation for accountants and auditors, and generally to do all such things as from time to time may be necessary to elevate the status and procure the advancement of the interests of the profession, and to provide for the better definition and protection of the profession by a system of examinations. Candidates for membership (unless they have been in public practice for 7 years) must pass the examinations prescribed by the Council. **President, Wm. Geo. Rayner, London. Vice-President, Harry L. Price, Manchester; Solicitors, Norton, Rose, Norton, & Co.; Secretary, James Martin, 4, King Street, Cheap-side, London, E.C.**

**Society of Arts, John Street, Adelphi. Secretary, Sir Henry Trueman Wood, M.A.**

### SOCIOLOGY.

Sociology is the science of the origin, organisation and development of human society. Of individual workers in sociology Herbert Spencer undoubtedly stands first in this country. The completion of his great systematic work was accomplished during '96 by the publication of the third volume of "Principles of Sociology." In America many of the universities have organised separate schools or departments of sociology. Apart from individual workers and the teaching of the Positivist societies, respectively headed by Dr. Congreve and Mr. Frederic Harrison in this country, and the special societies con-

cerned with anthropology and economics—apart from these there are as yet few successful attempts to found schools of sociology. The Paris and the Edinburgh Schools were fully described in the '94 ed. and the American School at Hartford in the '95 ed.

The International Institute of Sociology is an association founded, under the presidency of Lord Avebury, by the most eminent sociologists of different countries in '93. The General Secretary is Dr. René Worms, 115, Boulevard St. Germain, Paris. The sixth international congress of Sociology will be held in 1908 in London, in the hall of London University, and the subject will be "Social Conflicts." A bibliography of contemporary productions in sociologic study and research is given each month in the *Revue Internationale de Sociologie* (price 20 fr. per annum), published in Paris (16, Rue Soufflot), and in the *American Journal of Sociology* (price 2s. 6d.), published by the University of Chicago Press. Since '96 there have been published (at 16, Rue Soufflot, Paris) 30 vols. of the *Bibliothèque Sociologique Internationale*, written by sociologists of all countries.

The Sociological Society was formed in 1903 to promote investigation and to advance education in the Social Sciences in their various aspects and applications. Its field covers the whole phenomena of society, and it affords a common ground on which workers from all fields and schools may meet—geographer and naturalist, psychologist and moralist, and all contributing their results towards a fuller Social Philosophy. The subscription is £1 1s. per annum, while the payment of £10 10s. qualifies for life membership. **Secretary and Treasurer, Victor V. Branford, M.A., 5, Old Queen Street, Westminster, S.W.**

The British Institute of Social Service was constituted July 18th, 1904, with the object of providing a central bureau or clearing-house of information as to all forms of practical social service. It does not trench upon the sphere of the Sociological Society, which is the study of social science. There is a similar institute in America, and the Musée Social of Paris is doing like work. **President, Earl of Meath; Joint Hon. Secs., Mr. Percy Alden, Mr. Budgett Meakin, Rev. Dr. Paton, and Mr. G. F. Warden. Offices, 35, Heath Hurst Road, Hampstead, N.W. See ECONOMICS and POLITICAL SCIENCE.**

**Soldiers' and Sailors' Families Association.** The, was founded in 1885 by Col. Sir James Gildea, C.V.O. C.B., who has been its Chairman and Treasurer since that date. The King is its Patron, Queen Alexandra its President, and the Prince of Wales, the Duke of Connaught, the Earl of Derby, and Col. Sir James Gildea are Trustees. The object of the Association is to aid the wives and families, without distinction, of men of all branches of the land and sea forces of the United Kingdom serving with the colours. During the South African War '99-1902 the Association expended on the wives and families of soldiers and sailors over £1,200,000. Its principle of assistance is local personal administration through the medium of about 12,000 ladies and gentlemen, representing parishes in each petty sessional division throughout the kingdom. The work is entirely voluntary, and there are no expenses, except those connected with the Head Office. **Secretary of the Association: Capt. Wickham Legg. Office, 23, Queen Anne's Gate, Westminster, S.W.**

**Soudan.** The, is that section of Africa which lies immediately south of the Sahara. Its limits are variously defined. It may be said to be bounded by the Sahara on the N., by the Abyssinian highlands on the E., by the lands draining to the Congo basin on the S., and by French West Africa on the W. Within these limits it has an area of 2,000,000 sq. miles, and a population estimated at from 80 to 90 millions. Lying mainly between 5° and 18° N. lat., it is entirely within the tropics. **Western and Central Soudan** are divided into the states of Gando, Sokoto, Adamawa, Bornu, Bagirmi, Wadai and Kanem. These have now all been absorbed into the provinces carved out by the European Powers. **Gando, Sokoto, and part of Bornu** are included in Nigeria (p. 76) under British rule. **Kuka**, on the western shore of Lake Chad, is the capital of Bornu, and has a population of about 60,000. It is a great meeting-place of caravan routes. **Adamawa** falls in the Cameroons, a German territory (see p. 239). **Bagirmi** lies mostly within the limits of French Congo, and by the Anglo-French agreement of March 21st, '99, **Wadai and Kanem** were recognised as being reserved to France. For details as to these states see FRANCE (p. 223). The **Eastern Soudan** comprises Darfur, Kordofan, Senaar, the Equatorial Province, and the rich Bahr-el-Ghazal Province (see p. 157). As to **French Soudan and the French Sahara** region, see FRANCE (p. 223).

## SPAIN.

By the constitution of 1876, Spain is declared a constitutional monarchy, with the executive power vested in the King, and the legislative power in the Cortes with the King. The Cortes consist of Senate and Congress. The Senate is composed of three classes: those who sit by right of royal or noble birth or official position, 100 members nominated by the Crown (these two classes not numbering more than 180 together), and 180 elected by the communal and provincial states, the church, the universities, and the largest taxpayers of the kingdom. The elected Senators must be renewed by one half every 5 years, and altogether whenever the Cortes are dissolved. The Congress contains 431 deputies, elected for 5 years by citizens of 25 years of age who have enjoyed full civil rights in any municipality for 2 years. There is some provision for minority representation, and for the election of ten deputies who, though not returned in any single district, yet receive a cumulative vote of more than 10,000 in several districts. The Senate and Congress are equal in authority, and either of them, or the King, can introduce new laws.

## The Army.

Under the terms of an order of Jan. 29th, 1903, the Army has been reorganised on the basis of an effective of 80,000 men; the second battalions of the infantry regiments and the fourth squadrons of the cavalry being reduced to skeleton formations. There are in all about 23,000 officers, provided for the old establishment, but the supernumeraries are on half-pay, and their places are not being filled. There are eight captain-generalities, but the eight army corps are replaced by divisions, and further reductions are being introduced. The headquarters are respectively: 1st, Madrid; 2nd, Seville; 3rd, Valencia; 4th, Barcelona; 5th, Saragossa; 6th, Burgos; 7th, Valladolid; 8th,

Corunna. The constitution, by units, of the army is: **Infantry**, 56 regiments, 20 battalions of Chasseurs, 4 African regiments, 2 regiments in the Balearic Isles, 2 regiments in the Canaries, recruiting cadres, etc. The **Cavalry**, 28 regiments, and 3 squadrons for foreign possessions. **Artillery**, 13 field, 1 siege and 3 mountain regiments (all with four 6-gun batteries), 14 fortress battalions, 1 Central Gunnery School, 1 Central Remount Committee, and 4 companies of artificers. The **Engineer Corps** consists of 4 regiments of sappers and miners, 1 pontoon regiment, 1 telegraph battalion, 1 railway battalion, 1 topographical brigade, 1 company of artificers, and 8 reserve depots, with 5 separate companies of sappers and miners for the Balearic Islands, etc. For recruiting purposes the Peninsula has 116 districts, the Canaries and Balearics have 2, and Ceuta and Melilla have 2. The total armed strength is estimated to be 500,000.

## The Navy.

There are 16,700 of all ranks in the Spanish Navy, and 9000 marines. All these are conscripts. The officers are divided as follows: 1 admiral, 4 vice-admirals, 11 rear-admirals, 22 captains, 47 commanders, 94 lieutenant-commanders, 131 lieutenants, 340 sub-lieutenants, 165 midshipmen, and 100 cadets.

The strength in ships built and building on Nov. 30th was:—

Built.	
Battleship . . . . .	1
Armoured cruisers . . . . .	2
Protected cruisers . . . . .	6
Torpedo vessels . . . . .	17
Torpedo-boat destroyers . . . . .	4
Torpedo boats . . . . .	10
Building.	
Armoured cruisers . . . . .	2
Protected cruisers . . . . .	2

The principal dockyards are situated as follows:—

**Cadiz.** Three docks take cruisers.  
**Cartagena.** One floating dock takes large cruisers.  
**Bilboa.** One dock takes any Spanish ship; two smaller.

## Local Government, Education, etc.

Each of the 49 provinces has its own parliament, and each commune its own elected ayuntamiento, presided over by the alcalde, for municipal and provincial administration; and by the constitution neither the Executive nor the Cortes can (although they do) interfere in municipal or provincial administration, except for the protection of national and permanent interests. The State Religion is the Roman Catholic, and the public worship of any other creed is forbidden. There were in 1902 3115 religious communities in the country, with 50,933 members, of whom 40,188 were women and 10,745 men. Of these 2611 obtained registration, 150 were held over, and the greater part of the remaining 354 were exempt from registration under the Concordat of 1851. Education is free but inefficient, the cost being borne mainly by the municipalities. There were 25,340 public schools in 1901. A decree for the regulation of non-official schools, numbering about 6180, came into force Sept. 25th, 1902, providing for their registration and

inspection, and for the appointment of properly qualified teachers.

Three-quarters of the total population are engaged in agriculture. The principal products are wine, cereals, minerals, and cotton textiles. Iron, coal, and copper are the chief minerals worked. Over 8300 miles of railway, all belonging to private companies, are open and worked. By the war with the United States in '98 Spain lost Cuba and all her West Indian possessions, besides the Philippine Islands. The Caroline, Pelew and Ladrone Islands were sold to Germany in '99.

The Canary Islands, off N.W. African coast, are ruled as an integral province of the kingdom. Bananas, potatoes, and tomatoes are their most valuable products. Area 2808 sq. m.; pop. 358,564. The population of Teneriffe is 95,000, of Grand Canaria 75,000, and of Palma 32,000.

### Statistics and Diplomatic.

**Area**, including the Balearic and Canary Isles, each considered a province, and the small possessions on the north coast of Africa, 194,783 sq. m.; estimated pop., 1900, 18,618,086. The population of Madrid is about 540,000, and of Barcelona 533,000. Estimated revenue, 1901, £35,488,166; expenditure, £36,184,930; public debt, £433,283,066, including over £76,000,000 of Cuban debt; imports, 1900, £34,495,864; exports, £28,954,715.

**Ministry:** *Premier and Minister of Marine* General Azcarraga. — *Finance*, Señor Castellano. — *Interior*, Marquis Vadillo. — *Foreign Affairs*, Marquis de Aguilar de Campos. — *Public Instruction*, Señor Lacierva. — *Justice*, Señor Ugarte. — *Agriculture*, Señor Cardenas. — *War*, General Villar.

**Ambassador in London**, The Duke of Mandas, 1, Grosvenor Gardens, S.W. — *First Secretary*, The Marquis of Villalobar, 18, Victoria Square, S.W. — *Consul-General in London*, Don Ernesto Merlé, 20, Mark Lane, E.C.

**British Ambassador in Madrid**, Sir A. Nicolson, Bart., K.C.B., K.C.I.E., K.C.V.O., C.M.G. — *Commercial Attaché*, H. W. B. Harrison.

**British Consuls:** *Consul-General at Barcelona*, J. F. Roberts. — *Consuls:* C. G. Wood (Bilbao), A. L. Keyser (Cadiz), C. M. Trayner (Corunna), J. G. Haggard (Malaga), J. E. Croker (Teneriffe). *Secretary of Legation*, F. L. Cartwright, M.V.O.

### Colonies.

**Fernando Po** is a volcanic island in the Gulf of Guinea, forming, with Elobey, Annobon, Corisco, and other islands, a Spanish colony. Area 780 sq. m.; pop. 24,000. Discovered in 1471 by a Portuguese sailor of same name, and ceded by Portugal to Spain in 1778. Capital, **Clarence Cove**, originally an English settlement, established in 1827. The natives, **Aniyo** or "Boobies," stupid and repulsive in appearance. **Exports:** indiarubber and palm oil. Now used as a place of exile for political offenders.

The **Muni River Settlements** consist of the country on the banks of the Muni and Campo rivers, on the west coast of Africa, in the Gulf of Guinea, and an agreement has settled the dispute about the boundary between French and Spanish territory in this region. The area is estimated at about 9000 sq. m.

**British Consul**, A. Nightingale (at St. Paul de Loanda).

**Rio de Oro** is a Spanish possession on the west coast of the Sahara, bounded on the north by Morocco and on the south by a line running

east from Cape Blanco, and, with **Adrar**, is placed under of the Governorship the Canary Islands, with a sub-governor at Rio de Oro. Area estimated at 243,000 sq. m.

### Sovereign.

**Alfonso XIII.** is the son of the late King Alfonso XII. and Queen Maria Christina, a daughter of the late Karl Ferdinand, Archduke of Austria. He was b. after his father's death, on May 17th, 1886, and his childhood was spent at Madrid and the Palace of Miramar, in San Sebastian. He has received a liberal education, and speaks English exceedingly well. Of his two sisters, the Princess of the Asturias, Maria-de-las-Mercedes, b. Sept. 11th, 1880, was married, Feb. 14th, 1901, to Prince Carlos of Bourbon, son of the Count of Caserta (offspring Alfonso, b. Nov. 30th, 1901, and another son b. Feb. 28th, 1903), and died in 1904. Her eldest son was proclaimed as successor to the throne (Oct. 20th, 1904). The other sister of the King is the Princess Maria Teresa, b. Nov. 12th, 1882. In Spain the sovereign comes of age at sixteen, and during the King's minority his mother reigned as Queen Regent. On May 17th, 1902, the regency ceased, and Alfonso XIII. assumed his full powers. He has a Civil List of about £280,000. The constitution provides that the Cortes must approve his marriage.

### Political Parties.

The chief parties are the **Liberals**, who are much divided into sections; the **Conservatives**, also broken up to some extent, and, until his retirement in 1903, led by Señor Silvela; the **Republicans**, and the **Carlists**.

**Don Carlos** (Carlos Maria de los Dolores Juan Isidore Josef Francisco Quirino Antonio Miguel Gabriel Rafael, Duke of Madrid), head of the **Carlist** faction, and cousin of King Alfonso XII., was b. March 30th, 1848. He is a son of Prince Juan and the Archduchess Maria Teresa of Austria. He was educated in Austria, and on Feb. 4th, '67, married Princess Margaret of Bourbon, daughter of Duke Carlos III. of Parma. By her he had a son, **Don Jaime**, b. June 27th, '70, who is an officer in the Russian army, and four daughters, before she died on Jan. 29th, '93. On April 28th, '94, he married Marie Berthe, Princess de Rohan. When Amadeo was chosen King of Spain in 1870 Don Carlos protested, and in 1873 he entered Spain, and remained in the north of the country despite all the efforts to dislodge him during the Republic, and after the accession of Alfonso XII. until 1876, when he fled to France. Afterwards he took up his abode at Venice, where he still lives.

The **Conservatives** were in power '95-7 and '99-1901, part of the time under Señor Silvela and part under General Azcarraga. The **Liberals** held office in '93-5, '97-9, and 1901-2. During 1902 Señor Sagasta twice resigned and twice reconstructed his Cabinet, the second time on Nov. 1st. He had to resign once more on Dec. 3rd, and Señor Silvela formed a Ministry (6th). At the General Election in 1903 there were returned 232 Ministerialists, 70 Liberals, 11 Democrats, 6 followers of the late Duke of Tetuan, 28 Republicans, 7 Carlists, 6 Catalanists, 8 Independents, and 4 others. Madrid, however, was swept by the **Republicans**, and the Republican movement made considerable headway during the year under the leadership of Señor Salmeron,

who said they intended to deliver themselves from the Jesuits and the Vatican. In July 1903 Señor Villaverde formed a new Administration, and Señor Silvela retired from politics altogether in October. In Dec. 1903 Señor Maura became Premier of "the most reactionary Government that Spain has tolerated since the Restoration," to quote the Paris correspondent of the *Times*, and a new party, the *Democrático Liberal party*, was formed. In Dec. 1904 Señor Maura's Cabinet fell, and was succeeded by an Administration under General Azcarraga.

### History, 1904.

A serious strike broke out at Barcelona (Jan. 4th) amongst the hands of all classes employed on steamers and sailing-ships. As many as 4000 men left work, and the strike spread to Alicante, Valencia, and other ports. Far more serious, however, was the attitude of the country in general towards the Government. The appointment of the ex-Archbishop of Manila, *Señor Nozaleda*, to the See of Valencia led to a significant outburst of criticism of the recent conduct of affairs under the existing oligarchical régime, and of the conduct of the war with America. Arbitration Treaties with England and France similar to those concluded by England with France and Italy (see INTERNATIONAL ARBITRATION, p. 273) were signed (Feb. 27th), and with the United States on Dec. 23rd. The King received a visit from the German Emperor at Vigo (March 15th), and with him reviewed the Spanish war-ships in the bay.

Under the Anglo-French Agreement signed at London (April 8th), Spanish interests in Morocco were admitted by both the British and French Governments, and the latter undertook to come to an understanding with Spain in regard to her interests in Morocco, and to communicate the terms of it to the British Government. Great Britain by the Agreement recognised the predominant influence of France in Morocco. Details of the Agreement are given on pp. 338-9, where also will be found particulars as to the Agreement subsequently come to between France and Spain.

**Spiritualism.** The London Spiritualist Alliance, Ltd., was founded in 1884, in succession to other societies of the same nature, which had preceded it; and was incorporated in '96. The chief work of the society has been to maintain and expound the principles of Spiritualism, viz., a belief in the existence and life of the spirit apart from, and independent of, the material organism, and in the reality and value of intelligent intercourse between spirits embodied and spirits disembodied. The Offices of the Alliance are at 110, St. Martin's Lane, W.C. The organ of the Society is *Light*, founded in '81. The first President of the London Spiritualist Alliance and editor of *Light* was, until his decease, Mr. W. Stainton-Moses, M.A. (Oxon.), whose writings, "Psychography," "Spirit Identity," "Spirit Teachings," etc., etc., are well known. The present President of the Alliance, and editor of *Light*, is Mr. E. Dawson Rogers. A valuable library of works on psychic science is available at the offices at St. Martin's Lane. Meetings are held for the discussion of matters of interest to students of psychology, and information can always be obtained by inquirers. It is impossible to say how many Spiritualists there are in Great Britain, but there are local organisations in almost all towns of any importance.

## SPORTS IN 1904.

Below we give a summary of the chief events and results in the various departments of sport and athletics for the year under review, arranged alphabetically.

### Athletics.

The principal competitions resulted as follows:—

**Northern Counties Cross-country Championship.**—Won by the Sutton Harriers, C. J. Straw, of Warrington, finishing first in 43 min. 35 sec.

**Midland Counties Cross-country Championship.**

—Won by the Birchfield Harriers, A. Meacham of that club finishing first in 62 min. 37 sec.

**Southern Counties Cross-country Championship.**

—Won by the Highgate Harriers, A. Shrubb, of South London Harriers, finishing first in 59 min. 5 sec.

**National Cross-country Championship.**—Won by the Highgate Harriers, A. Shrubb, of South London Harriers, finishing first in 54 min. 25 sec.

**Cross-country Championship of Scotland.**—Won by the Edinburgh Harriers, J. Ranken being first man home in 63 min. 44½ sec.

**Ten Miles Championship of Scotland.**—Won by T. Jack in 57 min. 9½ sec.

**Ten Miles Championship.**—Won by A. Shrubb in 54 min. 30½ sec.

**International Cross-country Championship.**—Won by England with 27 points; Wales second, 102; Scotland third, 113; and Ireland fourth, 120. A. Shrubb came in first, in 47 min. 58 sec.

**Oxford and Cambridge Cross-country Contest.**—Won by Cambridge with 21 points to 34.

**Oxford and Cambridge University Sports** ended in a victory for Cambridge by 8 events to 2. The results were as follows:—

100 Yards: R. W. Barclay, Cambridge, 10½ sec.

Half-mile: K. Cornwallis, Oxford, 1 min. 54½ sec. (a record for the sports).

One Mile: H. W. Gregson, Cambridge, 4 min. 20 sec.

Three Miles: A. R. Churchill, Cambridge, 14 min. 57½ min.

High Jump: E. E. Leader, Cambridge, 5 ft. 11 in.

Long Jump: T. A. Leach, Oxford, 21 ft. 2½ in.

120 Yards Hurdles: F. H. Teall, Cambridge, 16½ sec.

Hammer: N. Spicer, Cambridge, 114 ft. 10 in.

Weight: Hon. G. W. Lyttleton, Cambridge, 37 ft. 7 in.

Quarter-mile: R. W. Barclay, Cambridge, 50½ sec.

**Seven Miles Walking Amateur Championship.**—Won by G. E. Lerner in 52 min. 57½ sec.

**Fifty Miles Walking Championship.**—Won by F. B. Thompson, Ranelagh Harriers, who beat all records from 22 to 50 miles, completing the latter distance in 7 hours 57 min. 38 sec., and 50 miles 437 yards in 8 hours.

**Annual Sandhurst and Woolwich Sports** resulted in a win for the former by 5 events to 4.

The following were the results of the **Amateur Athletic Association Championships**:—

100 Yards: J. W. Morton, South London Harriers, 10 sec.

220 Yards: C. H. Jupp, London A.C., 22½ sec.

Quarter-mile: R. L. Watson, West of Scotland, 5½ sec.

120 Yards Hurdles: R. S. Stronach, Glasgow Academicals, 16 sec.

Half-mile: H. W. Workman, Cambridge Univ. A.C. and London A.C., 1 min 59½ sec.

One Mile : A. Shrubb (holder), South London, 4 min. 22 sec.

Two Miles Walk : G. E. Larner, Brighton and County Harriers, 13 min. 57 $\frac{1}{2}$  sec.

Four Miles : A. Shrubb (holder), 19 min. 56 $\frac{1}{2}$  sec.

Long Jump : P. O'Connor, Waterford A.C., 23 ft. 2 $\frac{1}{2}$  in.

Pole Jump : A. Puissegur, Racing Club de France, 10 ft. 6 in.

High Jump : P. O'Connor (holder), Waterford A.C., R. G. Murray, West of Scotland, and J. B. Milne, Dundee, tied at 5 ft. 9 $\frac{1}{2}$  in.

Hammer : T. R. Nicholson (holder), West of Scotland, 157 ft. 5 $\frac{1}{2}$  in.

Weight : D. Hangan, Gaelic A. A., 45 ft. 2 in.

In the contest between Harvard and Yale and Oxford and Cambridge Universities the former were victorious by 6 events to 3, as follows :—

100 Yards : W. A. Schick, Harvard, 9 $\frac{3}{4}$  sec.

Quarter-mile : E. J. Dives, Harvard, 49 $\frac{1}{2}$  sec.

Half-mile : H. E. Holding, Oxford, 1 min. 56 $\frac{1}{2}$  sec.

One Mile : H. W. Gregson, Cambridge, 4 min. 21 $\frac{1}{2}$  sec.

Two Miles : M. H. Goodby, Oxford, 9 min. 50 secs.

High Jump : P. Vietor, Yale, 6 ft.  $\frac{1}{8}$  in.

Long Jump : L. J. Sheffield, Yale, 21 ft. 10 $\frac{1}{2}$  in.

120 Yards Hurdles : E. J. Clapp, Yale, 15 $\frac{1}{2}$  sec.

Hammer : T. Shelvin, Yale, 152 ft. 8 in.

### Cricket,

The season was a dry one, June and July being particularly fine months, but August was somewhat unsettled. As a result of the dry wickets the batting averages were high, Hayward scoring over 3000 runs, and C. B. Fry, K. S. Ranjitsinhji, Hirst, Denton, and Tyldesley all making upwards of 2000 runs.

J. T. Hearne, Hallows, Blythe, Dennett, and Haigh were the most successful of the home bowlers, but Kotze, Sinclair, and R. O. Schwarz of the South African team all did well.

The positions of the Counties at the close of the 1904 season were as follows :—

County.	Pl.	W.	L.	D.	Pts.	Per-centage.
1 Lancashire	26	16	0	10	16	100'00
2 Yorkshire	27	9	2	16	7	63'63
3 Kent	21	10	4	7	6	42'85
4 Middlesex	18	9	4	5	5	38'46
5 Notts	20	7	4	9	3	27'27
6 Sussex	24	5	4	15	1	11'11
7 (Leicestershire	20	6	6	8	0	—
Warwickshire	16	5	5	6	0	—
9 Gloucestershire	18	5	6	7	-1	-9'09
10 Derbyshire	18	5	8	5	-3	-23'07
11 Surrey	28	6	12	10	-6	-33'33
12 Somerset	18	5	11	2	-6	-37'50
13 Worcestershire	18	3	8	7	-5	-45'45
14 Essex	20	3	10	7	-7	-53'84
15 Hampshire	18	2	12	4	-10	-71'42

Winchester beat Eton and Eton beat Harrow. Oxford and Cambridge match was drawn. Scores : Cambridge 253 and 390 (8 wickets), Oxford 149 and 221 (6 wickets). Highest scorers : J. F. Marsh, 172 (not out) and W. H. B. Evans, 65 and 86 (not out).

Gentlemen v. Players at Lord's was won by Gentlemen by 2 wickets. Scores : Players 327 and 255, Gentlemen 171 and 412 (8 wickets). King 104 and 109 (not out), Ranjitsinhji 121,

F. S. Jackson 58 and 80, and A. O. Jones 56 (not out).

Gentlemen beat Players at the Oval. Scores : Players 362 and 177, Gentlemen 578. Hayward 203, Bosanquet 145, W. L. Murdoch 140, J. H. Hunt 128.

North v. South at Scarborough was drawn ; at Hastings North won by 10 wickets.

The South African team had a most successful visit, winning 10 out of 22 first-class matches and losing only to Middlesex and Gentlemen of Ireland. L. J. Tancred was their leading batsman, scoring 1640 runs in 38 innings with an average of 48'23. Kotze took 117 wickets at an average of 19'34, Schwarz 96 at an average of 18'8, and Sinclair 100 at an average of 22'85.

Of the second-class counties Northamptonshire was the most successful.

The match between the champion county (Lancashire) and the Rest of England was drawn.

The chief Batting averages for 1904 were :—

	No. of Inns.	Times Not out.	Total Runs.	Most in an Inn.	Aver.
Ranjitsinhji,					
K. S. . . . .	34	6	2077	207*	74'17
Fry, C. B. . . .	42	2	2824	229	70'60
Tyldesley . . .	44	5	2439	225	62'53
Jones, A. O. . .	34	5	1756	187	60'55
Iremonger . . .	34	1	1983	272	60'09
Hayward . . .	63	5	3170	205	54'65
Hirst . . . . .	50	4	2501	157	54'36
Perrin, P. A. . .	32	4	1486	343*	53'07
Quaife, W. G. .	38	5	1689	200*	51'18
Evans, W. H. B.	19	1	861	115	47'83
Gillingham, F. H.	13	1	558	201	46'50
Jackson, Hon.					
F. S. . . . .	25	2	1037	158	45'08
Spooner, R. H.	46	3	1889	215	43'93
Foster, H. K. . .	38	0	1635	119	43'02
Marsh, J. F. . .	16	3	548	172*	42'15
Hill, A. J. L. . .	18	1	698	117	41'05
Tancred, L. J. .	35	4	1269	113	40'93
Warner, P. F. .	39	5	1390	163	40'88
Douglas, J. (Middlesex) .	16	2	572	153	40'85
Mason, J. R. . .	24	3	853	138	40'61
Glover, A. C. S.	27	2	1011	124	40'44
Knight . . . .	39	4	1412	203	40'34
Denton . . . .	55	3	2088	119	40'15

The chief Bowling averages for 1904 were :—

	Overs.	Mdns.	Runs.	Wkts.	Aver.
Huddleston . .	70	26	135	12	11'25
Humphreys, E. . . . .	208'3	69	496	30	16'53
Crawford, J. N. . . . .	262'5	59	745	44	16'93

Cuttell . . . . .	1021'2	345	2100	105	20'00

\* Signifies not out.

Warner's Australian Team won the majority of the test matches (1903-'4) against Australia. The first match, played at Sydney, was won by England by 5 wickets, R. E. Foster making the record score of 287, Braund 102, Trumper 185 (not out), and Noble 133. The second match, at Melbourne, was won by England by 186 runs. The third match, at Adelaide, resulted in favour of Australia by 216 runs, Trumper scoring 113 and Gregory 112. The fourth and deciding match went to England by 157 runs, Knight 70 (not out). The fifth match was secured by Australia by 218 runs. Altogether 20 matches were played in the course of the tour, of which 10 were won, 2 lost, and 8 drawn. The best batting averages in the tour were secured by R. E. Foster 47·18, Hayward 40·68, Tyldesley 34·11, and Hirst 32·37; and bowling by Rhodes, 63 wickets, average 15·06, Braund 37 wickets, average 19·7, Arnold 40 wickets, average 20·05, Bosanquet 36 wickets average 26·55, and Hirst 30 at an average of 27·06.

The Test Matches in 1905 will be played as follows:

May 29. Nottingham.  
June 15. Lord's.  
July 3. Leeds.  
" 24. Manchester.  
Aug. 14. Oval.

The last match only will, if necessary, extend beyond three days.

### Croquet.

The following were the results of the chief events:—

All England Championship.—R. C. J. Beaton beat F. W. Croft in the final by 2 and 18 points.

Ladies' Championship.—Miss Rowley beat Mrs. Richards by 13 and 25 points.

Mixed Doubles Championship.—Beaton and Miss Gower beat M. Barry and Miss Rowley.

Irish Championship.—Won by R. C. J. Beaton, and the Ladies' by Miss Coote.

Peel Memorial Competition at Roehampton.—Won by R. C. J. Beaton, and the Ladies' by Mrs. Dowson.

Association Gold Medal.—Won by Miss Gower.

Ladies' Gold Medal.—Won by Miss Rowley.

All-England Tournament under the American System.—Won by Miss Gower after a tie with C. D. Locock, C. Du Cane and R. C. J. Beaton coming next in order.

Ascot Heath Open Tournament.—C. E. Willis.

Hurlingham Open Tournament.—Miss Gower.

Oxford Open Tournament.—R. C. J. Beaton.

Roehampton Cup Tournament.—C. E. Willis.

South Hants Tournament.—R. C. J. Beaton.

Roehampton Open Tournament.—Miss N. Coote.

Brighton Open Tournament.—Miss Gower.

Eastbourne Open Tournament.—R. C. J. Beaton.

### Football.

1. Association.—The International matches resulted as follows:—

England beat Scotland 1 goal to 0. England has now won 11, Scotland 15, drawn 8.

England beat Ireland 3 goals to 1. England has now won 21, Ireland 1, drawn 1.

England and Wales drawn, 2 goals each. England has now won 20, Wales 2, drawn 4.

Scotland and Wales drawn, 1 goal each. Scotland has now won 24, Wales 0, drawn 5.

Scotland and Ireland drawn, 1 goal each. Scotland has now won 18, Ireland 1, drawn 2.

Ireland beat Wales 1 goal to 0. Ireland has now won 9, Wales 11, drawn 3.

As to other leading matches, Cambridge beat Oxford. In the final for the Association Cup, Manchester City beat Bolton Wanderers 1 goal to 0. Celtic beat Rangers 3 goals to 2 for Scottish Cup. Druids won Welsh Cup and Lingfield Irish Cup. North beat South. The Amateur Cup was won by Sheffield. The London Senior Cup was won by Leyton, the London Charity Cup by the Casuals, the Inter-Hospital Cup by Guy's, and the Sheriff of London Shield by the Corinthians, who beat Bury by 10 goals to 3.

The appended table shows the positions and points obtained by the competing clubs in the First Division in League matches, 1904:—

	Plyd.	W.	D.	L.	Pts.	Goals	
						For	Agst.
Sheffield Wednesday	34	20	7	7	47	48	28
Manchester City	34	19	6	9	44	71	45
Everton	34	19	5	10	43	59	32
Newcastle United	34	18	6	10	42	58	45
Aston Villa	34	17	7	10	41	70	48
Sunderland	34	17	5	12	39	63	49
Sheffield United	34	15	8	11	38	62	57
Wolverhampton Wanderers	34	14	8	12	36	44	66
Notts Forest	34	11	9	14	31	57	57
Middlesbrough	34	9	12	13	30	47	48
Small Heath	34	11	8	15	30	39	52
Bury	34	7	15	12	29	40	53
Notts County	34	12	5	17	29	37	61
Derby County	34	9	10	15	28	58	60
Blackburn Rovers	34	11	6	17	28	48	50
Stoke	34	10	7	17	27	64	57
Liverpool	34	9	8	17	26	49	62
West Bromwich Albion	34	7	10	17	24	37	61

Preston North End headed the Second League, Southampton the Southern League, and Tottenham Hotspurs the Western League.

2. Rugby.—The International games resulted as follows:—

Scotland beat England 2 tries to 1 try. Scotland has now won 12, England 10, drawn 10.

England and Wales drawn. England has now won 12, Wales 8, drawn 2.

England beat Ireland 2 goals and 3 tries to nothing. England has now won 19, Ireland 8, drawn 1.

Wales beat Scotland 4 goals and 1 try to 1 try. Scotland has now won 12, Wales 7, drawn 1.

Ireland beat Wales 1 goal and 3 tries to 4 tries. Wales has now won 11, Ireland 7, drawn 1.

Scotland beat Ireland 2 goals and 3 tries to 1 try. Scotland has now won 20, Ireland 4, drawn 3.

In other matches, Kent (champions South-Eastern Division) beat Devon (champions South-Western Division), and in the County Championship Final Kent beat Durham (champions Northern Division) by a goal and a try to 2 tries.

Oxford beat Cambridge. For Inter-Hospital Challenge Cup, London beat Guy's. Leicester won the Midland Cup for the seventh year in succession by beating Moseley.

### Golf.

The Open Championship was won by J. White at Sandwich with scores of 80, 75, 72, and 69 = 296; Braid and Taylor tied for second place with 297; T. Vardon was 4th, 301; H. Vardon 5th, 302; and Sherlock 6th, 309. The leading

Amateurs were J. Graham 8th, 310; and R. Maxwell 10th, 313.

The **Amateur Championship**: W. J. Travis, Garden City, U.S.A., beat Ed. Blackwell in the final by 4 up and 3 to play. The bronze medals were won by J. E. Laidlay and Horace G. Hutchinson.

**Scottish Amateurs beat English Amateurs** by 6 matches to 3. R. Maxwell, S. M. Fergusson, J. Graham, Ed. Blackwell, C. K. Hutchison, and C. E. Dick winning for Scotland; and H. G. Hutchinson, H. Fowler, and B. Darwin for England.

The **St. George's Vase** was won by J. Graham, 78 + 76 = 154; S. M. Ferguson 2nd, 79 + 80 = 159.

**Irish Championship**: H. A. Boyd beat J. P. Todd by 4 up and 2 to play.

**Irish Open Championship**: J. S. Worthington. South of Ireland Championship: D. Forster.

**Ladies' Championship**: Miss Dodd beat Miss Hezlet by 1 up.

**Scottish Ladies' Championship**: Miss M. Graham.

**Irish Ladies' Championship**: Miss Hezlet.

**Midland Ladies' Championship**: Miss E. C. Neville.

**Oxford beat Cambridge** at Wokingham by 14 holes to 12.

**Amateur Championship of India**: J. Drimmie beat A. F. Simson.

**Championship of Yorkshire**: H. H. Barker, Huddersfield, winning the club competition.

**Midland Competition**: C. A. Palmer, Handsworth, winning the club competition.

The chief medal competitions resulted as follows:—

**Centenary Medal, Tantallon Spring Meeting**: R. Maxwell, 79.

**Scratch Prizes, Sandwich Spring Meeting**: A. D. Blyth, 75; and S. M. Fergusson, 79.

**Hon. Company of Edinburgh Golfers' Spring Medal**: R. Maxwell, after a tie with J. E. Laidlay.

**Spring Medal, Blackheath**: J. L. Low, 106.

**Ranelagh Ladies' Spring Meeting—Scratch Prizes**: Miss E. C. Neville, 75; Miss Dodd, 79.

**Tantallon (Brodie) Scratch Medal**: J. E. Laidlay, 87.

**Spring Meeting, R. and A.**: R. Maxwell, Silver Cross, 79; Ed. Blackwell, Bombay Medal, 82.

**Hoylelake Spring Meeting—Club Gold Medal**: J. Graham, 79; also the Dbke of Connaught's Star, 76.

**Calcutta Cup, St. Andrews**: A. R. Macallan.

**Lubbock Medal, Hoylelake**: J. Graham, 76.

**Jubilee Vase, St. Andrews**: H. L. Boyd.

**King William IV. Medal—Autumn Meeting, R. and A.**: N. F. Hunter, 74.

**Silver Medal, A. G. Barry, 75. George Glennie Medal, E. Blackwell, 160.**

**Davie Cup, Hoylelake**: J. Ball, jun., 77.

The **International Match between English and Scottish professionals** resulted in a tie—8 matches all.

The **Professional Golfers' Association "News of the World" Cup** was won by J. H. Taylor, who beat A. H. Toogood in the final.

Various matches were played by the leading professionals with varying success, Braid, H. Vardon, Herd, and Taylor being far the most successful; but not one of the four could fairly claim any advantage on the year's play. White, owing to ill-health, was seen to little advantage, except in the championship.

## Hockey.

In the **International Matches** England and Scotland drew at Glasgow with 2 goals all, Wales beat Scotland by 5 goals to 1, and Ireland beat Scotland 8 goals to 1. England beat Wales 4 goals to 1. South of England beat North of England 6 goals to 3. Oxford beat Cambridge 1 goal to 0. Durham beat Yorkshire 3 goals to 1, Gloucestershire beat Devon 4 goals to 3, Kent beat Middlesex 4 goals to 1. Irish beat Scotch Ladies by 5 goals to 3. Kent beat Sussex by 4 goals to 1, Midland Counties beat Western Counties 3 goals to 2, Lancashire beat Notts 3 goals to 1, Midland Counties beat Northern Counties 2 goals to 1, Hampshire beat Sussex 2 goals to 1, Western Counties drew with Southern Counties, Derbyshire drew with Leicestershire, and Essex beat Hertfordshire 3 goals to 0.

## Hunting.

According to figures given by the *Field* there were in the United Kingdom in the 1904-5 season:—

	England and Wales.	Scotland.	Ireland.
Staghounds	. 19	—	4
Foxhounds	. 167	11	25
Harriers	. 96	2	33
Beagles	. 56	2	9

## La Crosse.

The home of La Crosse is Canada, but since its introduction into this country, some twenty years ago, it has made fair headway, especially during the last few years. The ruling bodies are the **South of England Association** (formed '82; hon. sec., Mr. F. B. O. Hawes, 1, Wellington Chambers, Buckingham Gate, S.W.), and the **North of England Association** (formed '80; hon. sec., Mr. G. H. Nield, 17, Piccadilly, Manchester). The supreme body is the **English Union** (formed '92), which governs all international matters, including the laws of the game, etc., the Executive Council being appointed by the committees of both associations, and meeting annually at Birmingham.

The principal matches resulted as follows:—

**Club Championship of England (Iroquois Cup)**: North Manchester (Northern Flag holders) beat Catford (Southern Flag holders) by 12 goals to 4.

**Southern Flag Competition—Final**: Catford beat Surbiton, 8 goals to 6.

**Northern Flag Competition—Final**: South Manchester beat Heaton Mersey 8 goals to 4.

**Southern Counties' Championship**: Essex and Middlesex drew; Essex beat Middlesex 9 goals to 4.

**North beat South** 4 goals to 3.

Cambridge beat Oxford 10 goals to 4. Essex beat Surrey 5 goals to 1; Middlesex beat Kent 11 goals to 7; Kent beat Essex 10 goals to 7; Essex beat Surrey 5 goals to 1; Kent beat Surrey 7 goals to 4; Middlesex beat Cheshire 10 goals to 5.

## Lawn Tennis.

The results of the principal matches were as follows:—

**Covered Courts Championship**.—H. L. Doherty (holder) beat M. J. G. Ritchie by 3 to 2. The Doubles were won by H. L. Doherty and G. W. Hillyard. Mixed Doubles: G. Greville and Mrs. Greville.

**French Covered Courts Championship.**—M. Decugis. The Doubles: M. J. G. Ritchie and G. M. Simond.

**Covered Court Championship of London.**—M. Decugis beat A. W. Gore in the final; the Doubles were won by R. F. and H. L. Doherty, and the Mixed Doubles by R. F. Doherty and Miss Eastlake Smith.

**Surrey Championship.**—S. M. Smith. Ladies': Miss Wilson. Doubles: H. S. Mahony and M. J. G. Ritchie.

**Middlesex Championship.**—H. S. Mahony (holder). Ladies': Miss Douglass.

**Northern Championship.**—Riseley beat Payn.

**Irish Championship.**—J. C. Parke. Ladies': Miss Longhurst. Doubles: Messrs. Good and Carey.

In the Championships the All Comers' was won by F. L. Riseley, who was beaten in the Championship Round by the holder, L. H. Doherty, by 3 sets to 1. For the Ladies' Miss Douglass beat Mrs. Sterry. The Ladies' Doubles were won by Miss Thomson and Miss Hurst, the Mixed Doubles by S. H. Smith and Miss Thomson. The All England Plate was won by Greville. The International Cup was competed for by Belgium and France, and won by the former.

At Reading H. S. Mahoney won the Singles and Miss Lane the Ladies'.

At Sheffield E. R. Allen won the Singles, E. R. and E. G. Allen the Doubles, and Mrs. Pickering the Ladies'.

Cambridge beat Oxford both in the Singles and Doubles by 5 sets to 4.

North London Championship.—H. S. Mahony, Miss Lane winning the Ladies'.

Welsh Championship.—S. H. Smith; Miss C. Wilson taking the Ladies'.

Queen's Club Tournament.—M. J. G. Ritchie; Miss A. M. Morton winning the Ladies'; R. F. Doherty and W. V. Eaves the Doubles.

County Championship Competition.—Gloucestershire beat Middlesex; the Ladies' was won by Surrey.

Leamington.—J. M. Boucher won the Singles and E. R. Allen and E. G. Allen the Doubles.

Edgbaston.—S. H. Smith won the Singles, Miss C. M. Wilson the Ladies', S. H. Smith and F. L. Riseley the Doubles, and S. H. Smith and Miss Thomson the Mixed Doubles.

Northumberland Tournament.—H. L. Doherty won the Singles and Miss Douglass the Ladies'.

Scottish Championship.—Wilding won; the Ladies' event going to Miss W. Longhurst.

Felixstowe.—E. R. Allen won the Singles and Miss Wilson the Ladies'.

Buxton.—W. V. Eaves won the Singles, and Miss Douglass the Ladies'.

All-England Ladies' Doubles.—Miss Douglass and Miss Thomson.

Northern Championship.—Won by S. H. Smith, the holder; the Ladies' by Miss Douglass. The Gentlemen's Doubles were won by Smith and Riseley, the holders; the Ladies' Doubles by Miss Thomson and Miss Douglass.

All-England Mixed Doubles.—S. H. Smith and Miss Thomson beat the holders, F. L. Riseley and Miss Douglass.

Brighton.—S. H. Smith the Singles, Miss Douglass the Ladies', and S. H. Smith and Miss Thomson the Mixed Doubles.

Eastbourne.—S. H. Smith beat the holder, M. J. G. Ritchie. Miss Douglass won the Ladies' and Mesars. Hillyard and S. H. Smith the Doubles.

### Racing Retrospect, 1904.

The flat-racing season of 1904 was brought to an abrupt conclusion a week prior to the expiry of the time-limit, owing to the abandonment of the Manchester November fixture because of the severe frost. The year was in other respects rendered memorable in the annals of the Turf. The Derby was decided in the midst of a storm of thunder, lightning, and hail of almost unprecedented fury; a gloom was cast over the racing community by the almost fatal accident which befel one of the leading jockeys, W. Lane, at the Lingfield meeting; and Mr. Sievier withdrew from active participation in the sport. Difficulties anent the starting question continued to occur. Despite the confidence of French trainers in Ajax, Gouvernant, Caius, and Maximum II., the honours were retained in this country by the success, in almost all the great events, of animals bred in and trained in the United Kingdom. Of those honours a considerable share must be conceded to Ireland, as the birthplace of the three-year-old champion, Pretty Polly, and her scarcely less distinguished stable companion, Delaunay.

Pretty Polly's record of 18 consecutive victories in her two first seasons, with some £34,000 to her credit in stakes, is one which will take some breaking. But for an unfortunate expedition to France, when, upset by the voyage, she succumbed to Presto II., she would be the holder of an unbeaten certificate. Some idea of the excellence of the Irish-bred filly may be gathered from the fact that in the race for the St. Leger she achieved an easy triumph over St. Amant and Henry the First, who had between them captured the remaining four of the greatest of the races reserved for three-year-olds—the Two Thousand Guineas, Derby, Newmarket Stakes, and Lingfield Stakes—in which she had not competed. The first-named, subsequent to the decision of the Derby, was in some quarters regarded as the champion of his year; but he met with a succession of defeats, in addition to that in the Doncaster race. After all, it is not unlikely that the second-best three-year-old was Delaunay, who proved victorious in all his races in most easy fashion, with the exception of the Cambridgeshire, where his splendid effort, under the heavy impost of 8 st. 10 lb., came close indeed to success.

The premier three-year-olds of 1903, Rock Sand and Zinfandel, worthily sustained their renown—the former taking two of the three "Ten Thousand Pounders," the Princess of Wales' Stakes, and the Jockey Club Stakes at Newmarket, in addition to other valuable prizes; and the latter, *inter alia*, the Gold Cup at Epsom, the Alexandra Plate at Ascot, and the Jockey Club Cup at Newmarket. Next to these two "cracks," possibly the best "Cup horse" seen out during the year was Robert le Diable, who proved himself not only possessed of brilliant speed but of sufficient stamina to secure the Doncaster Cup, run over a very severe course of two miles, from a field of tried stayers. The third of the "Ten Thousand Pounders," the Eclipse Stakes, at Sandown Park July meeting, fell to the share of the three-year-old Darley Dale, who had been specially prepared and reserved for the event, in which he experienced the good fortune of not having to encounter any of the genuine "top sawyers."

Amongst the juveniles who, on Jan. 1st, 1905,

enter upon their third year, **Cicero** stood out prominently. Not being entered in the Middle Park Plate, he had no opportunity of crossing swords with **Jardy**, one of the French champions, who easily cut the best England was able to send into the field. On the whole, the running in the great majority of the weight-for-age races was characterised by a degree of consistency which goes far to prove that the sport has been purged of many of its grosser elements, and even the great handicaps furnished comparatively few "surprises." The winners of such leading events as the **Cesaire-witch (Wargrave)**, the **Cambridgeshire (Hackler's Pride)**, the **Duke of York Stakes (Robert le Diable)**, and **Kempton Grand Prize** and **Kempton Jubilee Handicap (Ypsilanti)**, all carried such weights as to preclude the idea that their success was due to any leniency on the part of the handicappers. In the cross-country events, somewhat curiously and suggestively, the winners of the two chief events of that description, **Moifaa** (Grand National Steeplechase at Liverpool) and **Lord James** (Great Lancashire Steeplechase at Manchester), were both bred in our Australian Colonies, although from a stock originally English. In hurdle races the chief honours fell to **Vendale** (the previous year's Chester Cup winner) and **Karakoul**.

In dealing with stables at or near Newmarket the premier position must be given to **Mr. P. P. Gilpin**, for whom the year was a memorable one. In addition to preparing Major Loder's invincible **Pretty Polly** for all her races, he sent out such winners as **Delaunay**, **Hammerkop**, **L'Aiglon**, **Roe O'Neill**, to whom were credited the **Royal Stakes** at Epsom, the **Great Yorkshire Handicap** at Doncaster, the **Esher Stakes** at Sandown, and the **Manchester Summer Cup**; and the high-class two-year-olds **Desirée**, **Llangibby**, and **Nirvana**. **G. Blackwell's** *pièce de résistance* was, of course, **Rock Sand**, the property of **Sir James Miller**, for whom he also trained such useful winners as **Housewife**, **Pharisee**, **Cossack**, **Mozart**, and **Amitié**; and **Catscradle** for **Lord Rosebery**, another patron. **A. Hayhoe**, training for **Mr. L. de Rothschild**, had likewise an excellent season; for, in addition to the **Two Thousand** and **Derby** winner, **St. Amant**, good service was rendered by the two-year-olds **Khammurabi**, **Barbeque**, and **Cricket**. **G. Brewer**, for **Mr. Henning**, also made a capital show with a comparatively limited stud. To his share fell the **London Cup** at **Alexandra Park** with **Foundling**, the **Peveril of the Peak** Plate at **Derby** with **Airship**, and the **Dewhurst Plate** at **Newmarket** with **Rouge Croix**, and numerous prizes of less importance. The stables in charge of the **Hon. G. Lambton**, **J. Cannon**, **Reginald Day**, **H. Sadler**, **G. Chaloner**, and **F. Leach**, may also be mentioned as having had a fair average share of success. The horses racing in the **Royal livery** did not achieve much success, though in **Chatsworth His Majesty** unquestionably owns a fairly good horse, with whom several minor prizes were secured. The **Royal trainer, R. Marsh**, had not much better luck in regard to his other patrons.

Of the provincial stables none had a better season than that of **J. Fallon**, training at **Netheravon (Wilts)** for **Mr. A. P. Cunliffe** and **Captain Forester**. For the former gentleman **Ypsilanti** won the **Kempton Grand Prize** and **Kempton Jubilee Handicap**; and for the

latter **Hackler's Pride** and **Uninsured** took the **Cambridgeshire** and **Lincolnshire Handicaps**. **Capresi**, **Egyptian Beauty**, **Cyanean**, **Lapsang**, **Shanid Abou** and **Mountain King** also rendered good service. Next to **Fallon's** may be said to rank the stables of **P. Greusil**, at **Whatcombe**, and **W. T. Robinson** at **Foxhills**, near **Lambourn**. For **Lord Carnarvon** the former sent out **Robert le Diable** to a rare sequence of victories, which were supplemented by numerous successes achieved by the aid of **Santry**, **Vril**, **Colcu**, **St. Patrick's Day**, **Lady Honora**, and **Grandiflora**; whilst the latter took the **Chester Cup** and **Goodwood Plate** with **Sandboy**, the **Goodwood Stewards' Cup** with **Melayr**, and a multitude of other races with **Mark Time** and the two-year-old "flyer" **Vedas**. **J. Porter**, who trains at **Kingsclere**, **Hants**, for a number of leading sportsmen, was, on the whole, fairly successful. For the **Duke of Westminster** he won valuable prizes with **Rydal Head** and **Grey Plume**; for the **Duke of Portland** with **Darley Dale** and **Pamflete**; and for the **Earl of Crewe** with the two-year-old **Polymelus**.

As regards monetary values, the highest totals were reached by **Major E. Loder**, **Sir James Miller**, **Mr. L. de Rothschild**, the **Duke of Portland**, the **Earl of Rosebery**, **Mr. Musker**, **Mr. Gilpin**, and **Mr. Alexander**, all of whom are credited with winnings in stakes ranging from £34,000 to £10,000. At the same time, very respectable values were put together by the **Earl of Carnarvon**, **Lord Howard de Walden**, **Sir E. Cassel**, **Mr. Hall Walker**, **Mr. Henning**, **Mr. L. Neuman**, **Mr. Horatio Bottomley**, and a number of other noblemen and gentlemen.

As in 1903, **Gallinule** again headed the list of winning stallions, the total amount won by his progeny being increased, thanks to the prowess of his daughter **Pretty Polly**, to the large sum of £30,105. Next to him came **Sanfoin**, sire of **Rock Sand**, with £21,929; **St. Simon**, sire of **Darley Dale**, **Bitters**, **Pamflete**, and **Saltpetre**, with £17,577; **St. Frusquin**, sire of **St. Amant** and **Cricket**, with £17,341; **Cyllene**, sire of **Cicero**, **Cyclades**, **Cades**, and **Cyanean**, with £15,547; **Persimmon**, sire of **Zinfandel**, **Chatsworth**, and **Shah Jehan**, with £10,308; and **Rightaway**, sire of **Throwaway** and **Andover**, with £11,990. Amongst sires, until of late somewhat in obscurity, who have come into prominence, may be mentioned **Gone Coon**, sire of **Wild Lad**; **Missel Thrush**, **Black Duck**, **Bonnet Rouge**, and **Chalereux**. On the other hand, the stock of **Flying Fox** which have appeared in this country have proved disappointing, although those foaled and reared in France have carried all before them.

During the year the deaths were recorded of **Ormonde**, the **Duke of Westminster's** famous triple event winner of '86, **Victor Wild**, and **Grey Tick**, the last-named being fatally injured whilst competing for the **Great Metropolitan Stakes** at Epsom.

Between the two leading jockeys—**O. Madden** and **W. Lane**—there was a neck-and-neck race for supremacy, until the severe accident to the latter placed him *hors de combat* for the remainder of the season. Since then the position of the former has remained unassailable. The scores of the leading horsemen stood as follows in regard to winning mounts: **O. Madden**, 161; **W. Lane**, 124; **D. Maher**, 115; **W. Halsey**, 84; **E. Wheatley**, 83; **A. Sharples**, 77; **B. Dillon**, 75; **W. Griggs**, 66; **C. Trigg**, 61; **H. Randall**, 53; **Saxby**, 49; and **M. Cannon**, 47. The chief

honours really fall to Lane as the pilot of Pretty Polly in the majority of her races, including the "One Thousand," Oaks, and St. Leger. T. Heppell, J. Plant, and G. F. Bullock are young riders who have moved well up to the front, and given promise of taking an even more prominent position in ensuing seasons.

The demand and prices obtained for blood stock were both fairly sustained. At the chief yearling sales the principal run, as might have been anticipated, was upon the stock of Gallinule, several of which changed hands for large sums, the highest figure reached being 3600 guineas, the price realised at the Doncaster sales for a half-sister to Pretty Polly.

### Racquets.

The following were the results of the principal matches:—

**Military Championship.**—The Doubles were won by the holders, the 2nd Batt. Highland Light Infantry (Capt. Balfour Bryant and Lieut. Bramwell Davis); the Singles by Capt. Balfour Bryant.

**Oxford v. Cambridge.**—Oxford, represented by A. J. Graham and G. I. Branton, beat Cambridge, E. W. Bury and R. P. Keigwin, by 4 games to 2, but E. W. Bury beat A. J. Graham in the Singles by 3 to love.

**Public Schools Challenge Cup.**—Winchester (Hon. C. N. Bruce and E. L. Wright) beat Malvern (G. N. Foster and A. P. Day) by 4 games to love.

**The Championships.**—H. K. Foster beat E. M. Baerlein, the holder, by 3 games to 0, after winning the Open Competition by defeating E. H. Miles. In the Doubles E. M. Baerlein and E. H. Miles beat H. K. Foster and B. S. Foster, the holders, by 4 games to 2.

### Rowing.

The 61st Oxford and Cambridge University race was rowed on March 26th, 1904, the start taking place at 7.45 a.m. Cambridges won the toss and took the Surrey side. Oxford went off with the lead, and were clear at the mile-post in 4 min. 36 sec., and  $\frac{3}{4}$  length to good at Hammersmith Bridge in 8 min. 25 sec.; at the Doves Cambridge were level, at Chiswick Church  $\frac{1}{2}$  a length to the good in 13 min. 8 sec.; the Cambridge boat was leading by  $2\frac{1}{2}$  lengths at Barnes Bridge, and won by  $4\frac{1}{2}$  lengths in 21 min. 37 sec. Cambridge were coached by C. H. W. Taylor, and Oxford by W. A. L. Fletcher. The following are the names and weights of the crews:—

Oxford.—T. G. Brocklebank (Trinity), bow, 10 st. 9 lb.; R. W. Somers-Smith (Merton), 10 st. 9 $\frac{1}{2}$  lb.; A. H. Hales (Corpus), 12 st. 4 lb.; H. W. Jelf (Christ Church), 12 st. 7 lb.; P. C. Underhill (Brasenose), 12 st. 10 lb.; A. R. Balfour (University), 12 st., E. P. Evans (University) 13 st. 1 lb.; A. K. Graham (Balliol), stroke, 11 st.; E. C. T. Warner (Christ Church), cox., 7 st. 10 lb.

Cambridge.—H. Sanger (Lady Margaret), bow, 10 st. 7 lb.; S. M. Bruce (Trinity Hall), 12 st.; B. C. Johnstone (3rd Trinity), 12 st. 1 lb.; A. L. Lawrence (1st Trinity), 13 st.; R. V. Powell (3rd Trinity), 12 st. 3 lb.; P. H. Thomas (3rd Trinity), 12 st. 7 lb.; H. D. Gillies (Caius), 10 st. 5 lb.; H. V. Smith (Trinity Hall), stroke, 10 st. 5 $\frac{1}{2}$  lb.; B. G. A. Scott (Trinity Hall), 8 st. 4 lb.

The Torpids at Oxford left the crews at the head of the river as follows—New College 1st,

University 2nd, Brasenose 3rd, Magdalen 4th, Balliol 5th, and Trinity 6th.

The Cambridge Lent Races resulted in the placing of the colleges as follows—1st Trinity 1st, Lady Margaret 2nd, Jesus 3rd, 1st Trinity (2) 4th, Trinity Hall 5th, and 3rd Trinity 6th.

The Oxford Summer Eights resulted as follows—New College 1st, Magdalen 2nd, Christ Church 3rd, University 4th, Balliol 5th, Brasenose 6th.

The Cambridge Eights resulted as follows—3rd Trinity head of the river, 1st Trinity 2nd, Trinity Hall 3rd, Lady Margaret 4th, Caius 5th, Emmanuel 6th.

The Colquhoun Sculls at Cambridge were won by M. Donaldson, 1st Trinity.

The Oxford University Challenge Sculls were won by C. G. Kay-Mouatt, University, the Pairs by A. K. Graham and A. R. Balfour, and the Fours by University College.

Doggett's Coat and Badge was won by W. A. Pirrey, of Lambeth.

The Wingfield Sculls were won by St. G. Ashe, Thames Rowing Club, F. S. Kelly not turning out to defend his title.

The events at Henley Regatta resulted as follows:—

Grand Challenge Cup, Leander beat New College.

Diamonds, L. F. Scholes, Toronto Rowing Club, Canada, beat A. H. Cloutte, London Rowing Club.

Thames Challenge Cup, Caius College, Cambridge, beat St. John's College, Oxford.

Stewards' Challenge Cup, 3rd Trinity, Cambridge, beat Winnipeg Rowing Club, Canada.

Visitors' Challenge Cup, 3rd Trinity, Cambridge, beat University, Oxford.

Wyfold's—Birmingham Rowing Club beat London Rowing Club.

Silver Goblets, 3rd Trinity, Cambridge (C. J. D. Goldie and C. W. H. Taylor beat J. Beresford and H. T. Blackstaffe).

The Ladies' Challenge Plate, Eton beat 1st Trinity, Cambridge.

### Skating.

The following were the results of the principal events in 1904:—

**Amateur Championship of Europe at Davos.**—Gundersen, of Christiania, won the speed contest. The Figure Skating Championship was won by Salchow, of Stockholm, champion of Europe for the past three years. At the same place the English Figure Skating Competition was won by E. Gwynne Evans, Miss Squire being second.

The Symonds Shield for Tobogganing was won over the Klosters course by E. Gwynne Evans. The Symonds Cup, over the same course, by P. Allemann. The Ladies' Bowl was won by Mrs. Charles Furse, and the Freeman Trophy by Mrs. Higgin.

The Figure Skating Championship of the World at Berlin was again won by Herr V. Salchow, of Stockholm, and the pairs by Mr. and Mrs. Syers, of London.

The International Speed Skating, 500 and 1500 metres, were both won by Gundersen, of Christiania.

The Oxford and Cambridge Speed Skating contest was held at Davos, Oxford winning every event, C. Edgington, Oxford, covering the mile in the fast time of 3 min. 10 sec.

Mrs. Syers won the Annual Competition at Prince's, and Miss Squire the English Challenge Cup of the National Skating Association.

**Swimming.**

The following were the results of the principal events of 1904:—

**One Mile Amateur Championship.**—D. Billington, of Bacup; time, 27 min. 18 sec.

**200 Yards.**—C. E. Forsyth, Hyde Seal Swimming Club; time, 2 min. 37½ sec.

**Long Distance Amateur Championship,** from Kew to Putney.—J. A. Jarvis, of Leicester, the holder for the previous six years; 1 hr. 7 min. 32½ sec.

**Half-Mile Amateur Championship** was competed for at Swindon. C. E. Forsyth, Hyde Seal Swimming Club; 12 min. 23 sec.

At the **Cambridge University Sports** B. T. Verry, of Pembroke, was most successful, winning 6 events.

The **Oxford and Cambridge** contest was won by Cambridge, who finished first in the 50 and 100 yards races with W. R. V. Webb, and in the Quarter-mile with B. T. Verry. Cambridge also won the **Water Polo** match by 6 goals to 3.

On Aug. 20th M. A. Holbein, J. Haggerty, and S. W. Greasley started to swim the **Channel**. Holbein swam for 10 hours, and did 13½ miles, but was compelled to give up owing to repeated attacks of nausea. The others gave up after swimming for a short distance, on account of the cold.

**500 Yards Amateur Championship.**—C. E. Forsyth, 6 min. 33½ sec.; the previous holder, D. Billington, finished 2nd.

**100 Yards Amateur Championship.**—J. H. Derbyshire, 60½ sec.

**Tennis.**

**Gold Medal and Championship.**—V. H. Pennell beat E. H. Miles, the holder since 1899, who won the silver medal.

C. Fairs issued a challenge for the Championship and a stake of £500, which was accepted by the champion, Peter Latham, who won by 7 sets to 5. The French champion, Ferdinand Garcin, beat C. Fairs 3 sets to 2 at Prince's; but at Lord's Fairs beat him 3 sets to 2. Peter Latham also beat him at Lord's by 3 sets to 1.

**Silver Prize of the M.C.C.**—Sir Ed. Grey beat Mr. H. E. Crawley 3 sets to 1.

**Gold Prize.**—Mr. E. H. Miles beat Sir Ed. Grey 3 sets to 0.

**Cambridge University** (A. Buxton and J. L. Dewrance) lost to **Oxford University** (A. M. Robertson and O. V. G. Hoare) 3 sets to 0. In the **Singles Oxford** (A. M. Robertson) also defeated Cambridge (A. Buxton) by 3 sets to 2.

Several professional matches were played during the year, the most important being the following: E. Lambert beat Covey at Prince's and Newcastle; Covey receiving 15 beat E. Johnson by 3 to 2, and F. André 3 to 1; E. Johnson receiving 15 and a bisque beat F. Garcin 3 to 1, and receiving the same odds beat C. Fairs 3 to 0, but was beaten by P. Latham at the same odds 3 sets to 1. E. Lambert beat J. Fennel at Lord's 3 to 0.

**Yachting.**

The following were the results of the principal events in 1904:—

Owing to the entire failure of the large classes, the season of 1904 was almost entirely one of handicap racing. The new vessels which raced in the handicap matches were the American schooner *Ingomar*, built by Herreshoff in 1903, *White Heather*, *Merry Maid*, *Rosamond*,

*Zinita*, *Susanne*, and *Rosalind*. The *Ingomar*, brought over by Mr. Morton F. Plant, Commodore Larchmount Y.C., proved to be the finest and most handy yacht of her rig ever raced in English waters, and was the most successful boat of the year, proving herself superior to *Meteor* and *Hamburg* in German waters. *White Heather* was a 150-ton yawl designed by Fife for Mr. M. B. Kennedy. *Merry Maid* was a 100-ton cutter built by Camper and Nicholson for Mr. Hardcastle, but was only successful in strong breezes. *Rosamond* was a 50-ton yawl designed by Fife, and *Zinita* a 65-foot cutter by Fife, built for Mr. Connell. *Susanne*, a racing schooner of 80 rating, also designed by Fife, was rather tender in heavy winds. *Rosalind* was a useful type of yawl built by Stow. *Ingomar* had 17 winning flags and 12 first prizes; *Zinita*, 16 flags and 11 firsts; *Valdora*, 10 flags and 8 firsts; *Brynhiid*, 14 flags and 8 firsts; *Rosamond* and *Creole*, each 11 flags and 7 firsts; *Narahoe*, 8 flags and 6 firsts; *Merry Maid* and *Tully*, each 9 flags and 3 firsts; *Thérèse*, 7 flags and 3 firsts; and *Bona*, 6 flags and 3 firsts.

The King's Cup, sailed for by the Imperial Yacht Club of Germany at Kiel, was won by the German Empress's American schooner *Induna*. The King's Cup at the Royal Yacht Squadron Regatta on Aug. 2nd at Cowes was won by Sir James Pender's yawl *Brynhiid*, and the same boat was also successful in the race for H.M.'s Cup in the Royal Cinque Ports Yacht Club Regatta at Dover on July 16th. The Heligoland race for the German Emperor's Cup on June 18th was won by Dr. J. G. Douglas Kear's *Valdora*, and the Emperor's Cup at Cowes on Aug. 3rd by Col. Bagot's *Creole*. The Ryde Town Cup on Aug. 11th was won by *Thérèse*.

The only class racing of importance was in the 52-foot class, in which *Maymon*, *Moyana*, *Lucida*, and *Camellia* competed with varying success. *Maymon*, a new cutter designed by Fife for Mr. S. Butler, eventually proved the crack boat of her class, *Moyana* coming second; but in strong breezes *Lucida* was generally successful, and had the season been favoured with stronger breezes, might easily have proved the most successful type.

In the Solent 24-foot class, Mrs. Allen's new Fife boat *Susu* was most successful.

Mr. G. L. Watsons, the well-known designer, died in November.

**Stanford, Sir Charles Villiers, M.A., Mus.D., D.C.L.**, was b. at Dublin 1852, and ed. privately and at Queen's College and Trinity College, Cambridge, Leipzig and Berlin. He was organist of Trinity College and conductor of Cambridge University Musical Society 72-93, conductor of the Bach Choir '85-1902, conducted the Leeds Festivals 1901 and 1904, and is Professor of Music at Cambridge University and of Composition and Orchestral Playing in the Royal College of Music. His works have been produced at the Birmingham and Leeds Festivals, in London, and in Germany. His "Last Post" was heard first at the Hereford Festival in 1900, and more recent works are the opera "Much Ado about Nothing," "Requiem in A" (Birmingham, '97), "Te Deum" (Leeds, '98), "Violin Concerto in D," and "Five Songs of the Sea" (Leeds, 1904). 50, Holland Street, Kensington, W.

**State Children's Association** (with which is incorporated the Boarding-out Association).

The object of this Association is to obtain individual treatment for children under the guardianship of the State. It therefore seeks to obtain the dissolution of large aggregated schools, so that the children may be brought up, where possible, in families; to dissociate the children from all connection with the work-house and the officials who have to deal with a pauper class; and to obtain for the State further powers of control over neglected children. **Chairman**, the Right Hon. the Earl of Crewe; **Hon. Sec.**, Mrs. S. A. Barnett; **General Secretary**, F. P. Philp; **Provincial Secretary**, E. R. Philp; **Office**, 58, Old Broad Street, E.C.

**Stationery Office Publications.** His Majesty's Stationery Office is in Princes St., Westminster. **Controller**, Mr. T. Digby Pigott, C.B. (£1500); **Assistant Controller**, Mr. W. G. Newton (£700). The vast number of papers issued to the public under the superintendence of the Stationery Office, and of which the copyright is vested in the Controller, renders it impossible to enter much into detail; but they comprise books affecting the military, naval, and civil services, reports of the scientific results of the voyage of H.M.S. *Challenger*, calendars of State Papers, chronicles and memorials, and publications of the Record Commissioners, rules under the various Acts of Parliament, papers issued by, or affecting, the Board of Trade, the Board of Education, and the Local Government Board, Explosive and Factory Books and Forms, Customs Forms, and numerous miscellaneous books. The **Board of Trade Journal** (weekly) contains useful information for merchants and others, and the **Kew Bulletin** (monthly) contains valuable notes on Economic Produce and Plants. The ordinary publishers, who also supply all Parliamentary publications, including Acts of Parliament and the Reports of the Historical Manuscripts Commission, are Messrs. Wyman & Sons, Fetter Lane, London, E.C., Messrs. Oliver & Boyd, Tweeddale Court, Edinburgh, and Mr. E. Ponsonby, 116, Grafton Street, Dublin. Free Public Libraries are supplied by these agents at a discount of 25 per cent. from published prices. The *Labour Gazette* is published under special arrangement by Messrs. Horace Marshall & Son, Temple House, Temple Avenue; and the *Journal of the Board of Agriculture* by Messrs. Laughton & Co., of 1, Essex Street, Strand, W.C. The *Admiralty Charts* and other *Hydrographic Publications* are obtainable from Mr. J. D. Potter (agent for the sale of the *Admiralty Charts*), 145, Minories, E. Patent Specifications, the *Illustrated Journal of Patents* and the *Trade Marks Journal* are only to be obtained at the Patent Sale Office, Cursitor Street, Chancery Lane, London, E.C.

## STOCK EXCHANGE, LONDON

The London Stock Exchange was established in Capel Court in 1801, and has since been enlarged and extended until it reaches as far as Broad Street, and occupies nearly the whole of one side of Throgmorton Street. The interior is not divided in any way, but the dealers in the different classes of stocks are found grouped in their own particular place on the floor of the House, "House" being the colloquial name for the Stock Exchange itself. The building belongs to proprietors,

under a deed of settlement, and is managed by 9 elected trustees and managers. The capital is now £240,000 in 20,000 shares of £12 each, unlimited, but no call may exceed £2 in one year. Holders must be members of the Stock Exchange, and no person can hold more than 200 shares. The dividends for the past three years have been at the rate of £9 per share. There is also an issue of 4-per-cent. debentures amounting to £450,000.

The members of the Stock Exchange are quite distinct from the proprietors, and are governed by the "Committee for General Purposes," consisting of a chairman, deputy-chairman and 28 members, who make rules guiding the conduct of business and of the members themselves, and decide what stocks and shares shall be recognised and officially quoted, bargains in shares or stocks which have not received a "special settlement" not being subject to the Rules and Regulations, which are absolutely binding upon every member. To become a member the applicant must be of British birth, or, if a foreigner, he must have been naturalised for at least 4 years and have served as clerk to a member for 2 years. He has to be recommended by 3 members of standing, who will become surety for him to the extent of £750 each for 4 years after his election, the entrance fee being 500 guineas. Gentlemen who have served as "clerks in the House" for 4 years are admitted on a reduced fee of 250 guineas, and require only 2 sureties for £300 each. A member employing a clerk in the House "authorised to deal" has to pay for him an entrance fee of 50 guineas, and for an "unauthorised" clerk 10 guineas. The annual subscription for members and authorised clerks is 40 guineas, and for non-authorised 12 guineas. Members have to go through the form of re-election every year, in March, without further fee beyond the annual subscription, which is due and payable in April. At the present time the number of members is about 4832, and of clerks 3232, the numbers always varying. The whole of the money paid for entrance fees and subscriptions goes to the proprietors, who maintain the building in proper condition. The "Managers" and the "Committee for General Purposes" are two distinct and separate bodies, one being, in fact, the landlords of the building, and the others the tenants.

All bargains are settled according to the Rules and Regulations, which are very voluminous, and all transactions must be closed bi-monthly, either by the delivery of the stock bought or sold, or by "carrying-over"—that is, the postponement of the delivery until the next settling day. Bargains in Consols "for money" are settled the same day, but "for the account" monthly. All stock or shares bought must be paid for on the settling day, and in the case of no stock passing, any "difference" must be paid (on either side) on that day. In the case of a sale or purchase of registered stock 10 days are allowed for the preparation and execution of the necessary transfer deeds. There is no fixed official scale of brokerage, but custom has created one—viz.,  $\frac{1}{2}$  per cent. on home or foreign Government stocks,  $\frac{1}{4}$  per cent. on Indian, Colonial, and American dollar stocks, and in the case of English railway registered stock  $\frac{1}{2}$  per cent. on the proceeds: on shares not exceeding £2 10s., 6d. per share; not exceeding £7 10s., 1s.; £10, 1s. 3d.;

15, 18. 6d.; £20, 28.; £25, 28. 6d.; and exceeding £25,  $\frac{1}{2}$  per cent. on the money.

Consult "The Stock Exchange," by G. D. Ingaill and G. Withers (Arnold, 5s. net).

### STOCK EXCHANGE MOVEMENTS, 1904.

The most notable feature in the Stock Exchange during 1904 was the extreme depression which characterised the early part, the clearing-house, account after account, showing a reduced volume of business. In the beginning of September, however, a decided improvement was observable, and from that time onwards business increased, with a general advance in prices, broken only, in the beginning of December, by a collapse in the American section, where a large bull account had developed, and this to some extent affected other things. Notwithstanding this set-back, the quotations for American stocks, Home, Colonial and Foreign railways, and Industrial shares, were all higher at the end of the year than at the beginning, the movements in mine shares being irregular, while Consols and high-class investment securities as a rule showed a small depreciation, although above the lowest prices quoted.

When the year opened the markets were nervous on account of the tension between Russia and Japan, and when the war broke out there was a heavy fall in prices in Berlin and Paris, followed by a further scare some three weeks later, when, on sales chiefly from Berlin, consols changed hands at the record low price of 85 $\frac{1}{2}$  ex div. Afterwards matters improved, as the fear that the war would extend beyond the original disputants subsided, and a better tone generally was imparted by the announcement, about the middle of April, of the Anglo-French Agreement. All through the earlier months of the year the markets were disturbed by incidents connected with the war, one being the seizure of the *Malacca* on July 23rd; and again in August there was trouble over the action of Russia in regard to neutral shipping. The most serious incident of all was the attack made by the Russian Baltic Fleet upon the Hull fishing fleet on Oct. 21st. At that time, however, the markets were buoyant, and there was in point of fact little more than a momentary set-back in prices, and even this was quickly recovered.

The Stock Exchange itself was agitated by a demand for a reform of the constitution of "the House," and a petition having been presented to the Committee on March 5th, the annual election of committeemen was made on this day. As a result, on Nov. 12th the Committee issued new rules in connection with the admission of members, one limiting the number of members to 5000, another requiring that all members elected after a certain date should hold a share in the Stock Exchange building itself; and another giving a retiring member the right to nominate a successor. The immediate effect of this was a rush of applications for admission before the new rule as to holding a share came into force, the number very nearly completing the limit of 5000.

The money market was quiet throughout the whole year, only two changes being made in the Bank rate—viz., on April 14th, when it was reduced from 4 per cent., at which it had been fixed on Sept. 3rd, 1903, with a further reduction to 3 per cent. a week later, April 21st, at which it has since remained; although when money hardened up in the autumn there was some

talk of an advance. The Bank of England returns showed on Dec. 31st, 1903, coin and bullion, £28,911,813, and a note circulation of £28,787,760; and on Dec. 28th, 1904, coin and bullion, £29,927,273, and circulation £28,204,210; the largest stock of coin and bullion being held on Sept. 26th, when the amount was £38,921,363, with a note circulation of £28,204,210. The price of silver in January was 26 $\frac{1}{2}$ d. per oz., and 25 $\frac{1}{2}$ d. in June; but later there was a good recovery, and the price steadily advanced to 28 $\frac{1}{2}$ d. in December.

### Consols, Colonial and Corporation Loans.

Considering the disturbing influences, Consols fluctuated within narrower limits than usual; but the changes were constant, there being no steady movement for any length of time. At the beginning of the year the price was 87 $\frac{3}{4}$ , but owing to the war, and sales on foreign account, the price went back, until in March there was a sharp drop, which brought the price to about 85; in fact, it is said that a large block was taken off the market at below that figure. From this, however, there was a smart rally; and a good rise took place when the Anglo-French Agreement was announced in April, the best price being booked at the end of May or the beginning of June. At no time were Consols really in great demand, such recoveries as occurred being due more to repurchases to close bear accounts than to investment buying.

As regards Colonial loans they were entirely out of favour, and in nearly every instance prices gave way, showing little inclination to recover. In the beginning of July the Cape of Good Hope Government brought out a loan for £3,000,000, which was poorly taken up; but the prejudice against Colonials must have somewhat subsided, for in December Natal was very successful with a £2,000,000 3 $\frac{1}{2}$ -per-cent. loan.

Nor were Corporation Stocks at all popular, the idea gaining ground that money had been borrowed recklessly, and as recklessly spent, while the municipal assets had been already pledged as far as was prudent; but being in need of money several corporations adopted the somewhat novel plan of issuing debentures or bills payable at short dates. The result was, that in spite of cheap money all high-class securities depreciated during the year, in strong contrast to second-class and speculative stocks, which in nearly every class improved.

Notwithstanding the depression £5,000,000 Irish Land 2 $\frac{1}{2}$ -per-cent. stock was successfully issued at 87, the applications amounting to £52,000,000; and in April £2,500,000 India 3-per-cent. sterling was disposed of by tender, while in October, in response to an issue of £6,000,000 3-per-cent. Exchequer Bills, at a minimum of £98 16s., tenders were sent in to the extent of £20,500,000. As regards Municipal loans, £3,000,000 3-per-cent. Local Loans stock was advertised for tender at a minimum of 96 $\frac{1}{2}$  in January, the applications amounting to only £3,175,000, and in June a further £3,000,000 was offered at 97. In April the London County Council offered £5,000,000 3-per-cent. stock at 90, having previously, in February, invited tenders for £500,000 in bills, which were tendered for five times over and allotted at an average rate of £2 19s., a further offer of £1,463,000 in October being allotted at an average rate of £3 5s. 2d.

Amongst Colonials, the Cape of Good Hope issued £2,000,000 4-per-cent. Treasury Bills at 98½ in April, which fell very flat indeed; the other issues of importance being a **Sierra Leone** 4-per-cent. Loan for £1,250,000, issued in June at 98, and two 3½-per-cent. loans by **Natal** for £2,000,000, both issued at 95, one in April, which was not well supported, and another in December, which went off very well, while **New Zealand** borrowed £1,000,000 in December in 4-per-cent. 7-year debenture bonds. In May **Johannesburg** brought out a loan for £3,000,000 at 93.

### Foreign Stocks.

With the exception of the war stocks the foreign market was steady and good throughout the year, and prices generally improved, the advance being fairly well maintained. On the first outbreak of the war there was a general fall, which was soon recovered from; but later on there were one or two scares, and it was in February that the lowest prices were touched, when Berlin and Paris sold heavily on the fear that complications might arise, and then it was that **Russian fours** went to 87, while Spanish, Portuguese, Turkish, and French Rentes were at their worst towards the end of that month, Bulgarian being especially weak on the idea that the fact of Russia being otherwise engaged the opportunity would be seized upon to create a fresh disturbance in the Turkish provinces.

**Japanese** were at their lowest at the end of March. Stocks had, however, been largely oversold, and this bear account steadied the whole list, so that prices did not long remain at the low level, Russians recovering to over 90 and Japanese to 75; nor did either fluctuate very much afterwards, the news of the Japanese successes having comparatively small effect.

**Chinese loans** were affected almost as much as Japanese, but here too the recovery was sharp, the Silver Loan being especially benefited by the rise in the price of the metal.

**Argentine issues** were well supported, and advanced to record prices, rising smartly in August on a report that a scheme of unification would be carried through, while **Brazilians** and **Chilians** were freely bought later in the year, the latter on the settlement of the dispute with Bolivia. In February the terms fixed by the arbitrators in regard to the creditors' claims on **Venezuela** were announced, but this had little effect on the price of the bonds. The creditors of **Costa Rica** in January raised the question of the restitution of their original rights on the non-fulfilment of the terms of settlement, and in December the creditors of **Guatemala** claimed a return to the conditions existing under the settlement of 1895 for a similar reason.

In April there was a rise in **Colombians**, on the anticipation that they would get a share of the money paid by the United States Government for the Panama Canal. **Peruvian** shares and bonds were very active, and in November rose further on a rumour that the Government were going to pay up the arrears due to the Corporation. The report, however, conveyed no statement on the subject, and prices went back a little; the debentures, however, soon recovered, and reached 101 in December.

On the whole, with the exception of the war stocks, 1904 was a good year for Foreign loans. The chief stock creations in this section

were a **Greek** loan for £870,000 4-per-cent., issued at 84 in June, a **San Paulo** 5-per-cent. loan for £1,000,000 at 94, and a **Mexican** 4-per-cent. loan for £8,230,453 at 94 in December, while in May **Cuba** placed an issue of \$35,000,000. **Russia** made one or two issues, but they were not advertised here; but **Japan** offered £5,000,000 6-per-cent. at 93½, a similar amount being issued in New York, and in November a further £12,000,000 at 90½, both of which issues were well taken up, these being in addition to 100,000,000 yen in Treasury bonds issued at home.

### Home Railways.

At the beginning of the year the market was very dull, but when the Brighton dividend was announced there was a good rise, **Brighton "A"** jumping up 5 points; the first of the dividends on the heavy lines, on the other hand, bringing about a general relapse. In April, however, there was a turn for the better, and this held until the July dividends appeared, which, although about up to expectations, allowed only reduced balances to be carried forward. So things remained until August, when a little improvement made itself apparent, and this continued until the end of the year, in spite of very indifferent traffics, although only in one or two cases were the quotations current in May recovered.

**Dover "A"** had a rise to 64 in July on account of the larger sum allowed for the carriage of the mails; but this was not maintained, and bit by bit the price fell back to 56. **Chatham** ordinary stock was very steady, and rose to over 17.

**Metropolitan** stock also was a good market, and in November reached 102, one reason for this being the settlement of the long-standing dispute with the Great Central, and another the anticipation of the early electrification of the road, a trial trip from Baker Street to Uxbridge of a complete train being successfully made on Dec. 13th. The **Scotch** stocks, after being weak during the first half of the year, improved during the second half.

On the whole the prices on Dec. 31st compare very favourably with those of a year before, **Brighton** Deferred gaining as much as 20 points, **North-Western** 10, **Great Western** 8, **Great Eastern** 7, **Dover "A"** 6, **Metropolitan** 13, **District** 7, **Caledonian** 6, and **North British** 8. Of the July dividends the only one which showed an improvement on the previous year was the **Great Western**, which was at the rate of 4 per cent. against 3½ in 1903.

**Issues of stock** were neither numerous nor large during the year, the **Metropolitan** offering £500,000 3½-per-cent. preference in March at 91, and £750,000 4-per-cent. preference in December at 104; the **Great Central** £1,000,000 3½-per-cent. preference at 97 in April; the **Caledonian** £1,333,760 4-per-cent. preference in January at 95; and the **North British** £1,026,000 4-per-cent. preference at 115.

### Colonial and Foreign Railways.

Considerable activity was shown in this division both in Colonials and Foreigners. The most important event was the final agreement for the building of the **Grand Trunk Pacific** road, and in March the Grand Trunk directors deposited with the Government the necessary £1,000,000 guarantee required, and late in the year were able to sell to Messrs. Speyer Bros., of London and New York, £4,000,000 in 4-per-

cent. bonds, thus providing money to commence the work of construction. In the meantime the prices of Grand Trunk stocks fluctuated constantly, the ordinary being as low as 11 in March and as high as 21 in November; the preference stocks being at their worst in May, although the dividends for the past year were certainly good, the third preference getting 2 per cent. Traffics, however, were indifferent, and, more than this, the monthly returns showed heavy increases in the working cost; but, notwithstanding that traffics continued bad until almost the end of the year, the December quotations compared favourably with those of January. In May the Grand Trunk offered £5,000,000 new 4-per-cent. guaranteed stock at the price of 96½, which was taken up; and in September the Canadian Pacific offered £3,380,000 ordinary stock at 120 to the existing shareholders, the price giving them the equivalent of 5½ per cent. bonus on their holdings. Though Canadian Pacific shares fluctuated somewhat, the tendency during the whole year was upward, any set-back being due to sympathy with the American market; and although the highest price was only 138, against 142 in the previous year, there is still a gain of 13 points on the year, the proprietors having received two distributions of 3 per cent. in dividend, besides the bonus rights referred to equalising 58.

The upward movement in Argentine railways made further progress; and although the best prices were not maintained, the gain in every case was substantial, B. A. Rosario being in very good demand, in spite of a large addition to the capital, the least satisfactory movement being in Buenos Ayres Western, which, after rising to 136 in November, fell back to 124, which is below the price at the corresponding time last year. Mexican rails all had an exciting time, a buoyant feeling existing as regarded the expansion of trade in the country, and there was also a talk of amalgamation of the different roads. Under these conditions Mexican ordinary, which went to 15 in January, rose to nearly 30, and the first preference from 61 to 111, being helped by the declaration of an unexpectedly good dividend at the rate of 6 per cent. for the first half of the year. Nitrate Rails also appreciated on the better outlook for the nitrate industry, and after being from 7 to 8 during the greater part of the year, rose to nearly 10½ in December. Some sharp upward movements were seen in Cordoba Rosario, Antofagasta and Bolivia, and Costa Rica stocks. In July a prospectus was issued asking for £1,500,000 in 5-per-cent. bonds at 97½, for the purpose of constructing a railway from Shanghai to Peking; but the issue fell very flat, and the stock was quoted at a discount, although guaranteed by the Chinese Government.

**American Railways.**

The American market afforded, as usual, plenty of excitement, the ups and downs being on the customary wide scale. January saw the passing of the United States Steel dividend, with the result that both the preference and the common, both already weak, tumbled still further, and this affected the whole market. Later on in the month there was an all-round recovery, and in February a group of Western speculators attempted to inaugurate a boom in the market, which looked like succeeding with the very good Bank statement then being produced. A big fire in Baltimore checked the movements in railways, but gave a small filip to steel stocks on the idea that a large demand would arise for rebuilding. Then came, during the same month, the crash in the cotton market, while money was wanted for the Panama Canal and other purposes, and these difficulties added together brought about something very like a panic in the New York market.

In April prices improved a little, only to go flat again on bad crop reports; but by June a better tone was apparent, and this continued fairly well, with the usual ups and downs, until towards the end of the year. In July Readings saw a smart rise on a talk of the abolition of the voting control, and Unions developed a strong upward movement. In August good reports of the cotton crop sent all the southern railways up, and this was hardly

disturbed by the incident of the Presidential election. During this period, between August and October, there were some very big movements, Southern Common one day rising 5 points and Milwaukies 9; improvements also being apparent in Southern Pacifics and Norfolks. In October steel stocks began to improve, and the ordinary, which in the meantime had been down to below 9, and the preferences to 53, at the end of the month reached 22 and 84 respectively.

This, however, did not mark the top of the rise, which really culminated about the end of November or the beginning of December, for it was upon the 8th of the month that the entire market, railways and industrials as well, under the attacks of Mr. Lawson, a broker of Boston, suffered a very severe semi-panic, and after a small recovery this was again repeated; so that the year closed with a dull tone throughout in Americans, and especially in Anaconda Copper shares, though not at the worst. Notwithstanding this, however, Unions and Louisvilles showed a gain of 31 points compared with Dec. 31st last year, Milwaukie and Illinois 23, Ontario 22, Baltimore & Ohio and Norfolk & Western of 21, New York Central 20, Reading Common and Preferences 17, and Southern Common and Southern Pacific 14; these figures being 4 or 5 points below the highest prices reached, Unions having touched 119, Louisvilles 151, and Milwaukies 181. During the same period United States Steel Common rose

from 12½ on Dec. 31st, 1903, to 34 on Dec. 5th, 1904, and the Preference from 59 to 98 on Nov. 28th, the rise, after allowing for the reaction, at the end of the year being 18 in the one and 36 in the other.

### Mines.

During the greater part of the year the markets were unsatisfactory, business being very limited, with scares every now and then. The Chinese coolie was a source of continued trouble, and right up to the middle of the year the labour question was always cropping up. When the new labour arrived it was found to work well, and in the meantime the supply of native labour improved, and throughout the year the gold output from South Africa steadily improved month by month, commencing with 278,867 oz. in January and reaching 324,011 oz. in November, against 272,107 oz. in the preceding November; the total for eleven months being 3,303,905, as against 2,859,476 for the whole of 1903. The number of native labourers was 74,000, no return being made of the number of Chinese, though Mr. Wehrner Beit estimated them at 27,000. During the year prices were unsettled, but bit by bit improved, the movement being very gradual, and at no time was there anything like a boom, although the tone during the last two months was very good.

Rhodesia afforded some excitement through the discovery of banket reef in the district in which the Rhodesia Exploration Co. held claims; and its shares, which were as low as 2½ in February, rose to nearly 6½ in October. Later on there were reports of the discovery of extensive alluvial gold deposits in the Victoria district, but this excited only a moderate interest. These discoveries happened fortunately for the Chartered Co., which in September announced that it must raise more capital, notwithstanding the fact that it had issued 400,000 shares at 33s. 9d. in February, and proposed to issue 1,000,000 shares of £1 each at 21s., the market price of the shares then being 1½ to 1¾. The shareholders agreed to the issue, but refused to ratify an underwriting agreement in regard to half the issue, and the whole were taken by the existing shareholders. Immediately after this came the news of the banket reef discovery, and the price of the old shares recovered to over 2½. Otherwise Rhodesian shares were very dull all the year, and lower in price.

West Australians were unsettled and generally flat, especially Associated, which, after rising to 3½, dropped away to 1½ on the discovery that the estimate of the ore reserves was wrong; Golden Horseshoes also falling from 9 to 5½ from a similar cause.

West Africans were quite out of favour, and shrunk to little more than nominal prices; but towards the end of the year there was a recovery in a few of the better class, including Gold Coast Amalgamated, Abosso, and Wassau.

Indian mines were depressed, one cause being a discussion which arose as to the permanence of the reefs at depth, and there was also some falling-off in the outputs.

Diamond shares varied a good deal; De Beers, which in the early part of the year reached over 20, falling to below 17 in December; but some of the smaller companies came to the front, Lace rising from 1½ to nearly 3½, and Premier from 34 to 68.

Copper shares were in good demand towards

the end of the year, Tinto rising from 49 to 63, and Anaconda from 3 in February to 6½ in November, a set-back being brought about by the collapse in the New York markets.

The issue of new capital for mining purposes was limited, amounting to little more than £3,000,000, for £1,780,000 of which the Chartered Co. was answerable.

### Miscellaneous Shares.

There was rather a good market in all the good-class dividend-paying stocks, and prices improved, especially towards the end of the year, when gas stocks came to the front—Gas Light and Coke going up 10 points to 100, and South Metropolitan gas 14 to 131—but there was little movement and little advance in electrics. Telegraphs were also good, and National Telephone went from 78 to 101.

Brewery shares at one time went better, on the idea that the new Licensing Act would benefit the licensed trade, but on the whole the market was dull. Dock stocks fluctuated a good deal, but on balance improved, while shipping shares, with the exception of P. & O. Deferred, were dull. Bank stocks advanced, and Cotton and Textile shares, after being very flat on the short supply of the raw material, ended the year quite cheerfully, as also did steel and iron shares.

Caterer shares kept firm, with the exception of Aerated bread, which, on the announcement in October that there would be no further issue of shares at par, dropped suddenly from 9 to 6½, afterwards going lower still, the dividend also being reduced.

Omnibus stocks improved on the better prospects of the trade, and at the meetings both the L.G.O. and the Road Car stated they would in a short time put motor omnibuses on the road; but this had not been done, except experimentally, at the end of the year.

The Water Board arbitrators made their award in February, and as a result water stocks advanced, the bulk of the proprietors accepting the new water stock in exchange for their holdings, so that but a small amount was issued, £1,500,000 being offered for tender in October, when £3,000,000 was tendered for, and the stock was allotted at an average of £92 13s. 8d. per cent.

Hudson's Bays were very largely bought on the prospect opened out by the making of the new Grand Trunk Pacific railway, which would benefit their lands in the north-western districts, their £10 shares rising from 37 to 54, a dividend of 35s. and a return of 20s. per share capital having been made in July.

### New Issues.

Promotions were on a very limited scale during 1904, and out of a total of £123,000,000 Industrial ventures accounted for no more than £20,500,000, Mines for £5,700,000—some of this being further issues by existing companies, Breweries for £1,600,000, and Electric, Gas and Water Co.'s for £3,500,000. Railways, home, foreign, and colonial, took £17,500,000, Home Government stock issues £12,500,000, Foreign Loans £29,000,000, and Colonies and Corporations £32,500,000. Beyond the railway, Government and other issues already mentioned, other large emissions included £1,000,000 in debentures by the directors of Threlfall's Brewery Co., £1,250,000 3½-per-cent. bonds by

the Agricultural Bank of Egypt, £1,500,000 3-per-cent. at 91 by the East Indian Railway, and £500,000 by the British Cotton-growing Association, while £600,000 5-per-cent. preference stock offered by the Royal Mail Steam Packet Co. was so badly applied for that the directors withdrew the issue, and instead called up the £40 unpaid upon the existing stock.

**Stössel, General**, the gallant defender of Port Arthur, was born in 1848. His father and grandfather before him were officers, the latter in the Swedish and the former in the Russian Army. He was educated at the Pavloff Military Academy, and entered on active service in the army in '66. He served in the Russo-Turkish War, and was promoted for his services. Following the usual routine, he then held various commands, principally in Siberia, till he attained the rank of General commanding the 3rd Brigade East Siberian Sharpshooters at Port Arthur in '99. He served with his brigade in the campaign following the Boxer outbreak, and when the war with Japan commenced he was given the command at Port Arthur, which he so brilliantly and heroically defended. See RUSSO-JAPANESE WAR.

**Strauss, Richard**, musical composer, was b. June 11th, 1864, at Munich, where his early studies began, his father being first horn player in the orchestra of the Court Opera-house. In '81 a symphony from his pen, conducted by Hermann Levi, brought Strauss to the front. Appointed conductor at Meiningen in '85, from '89 to '94 he was Hofkapellmeister (with Eduard Lassen) at Weimar, and later conductor at the Munich Opera-house. He has written many charming songs, but his distinctiveness as a modern composer is chiefly due to extraordinarily elaborate instrumental works. Strauss, who has paid several visits to England, presided, with Willem Mengelberg, over the Amsterdam orchestra at a Richard Strauss festival at St. James's Hall in June 1903, when "Ein Heldenleben," "Also sprach Zarathustra," and other symphonic poems from his pen were performed.

**Stubbs, The Very Rev. C. W., D.D., Dean of Ely**, was b. at Liverpool in 1845, and ed. at the Liverpool Royal Institution School, and Sidney-Sussex College, Cambridge, of which he was an exhibitor, and is now an Hon. Fellow. He took his degree in Mathematical Honours in '68. He also took the Le Bas University prize for an English essay. He was ordained in '68, and became a curate at St. Mary's Church, Sheffield. In '71 he was appointed vicar of Grandborough, Bucks, in '84 vicar of Stokenham, Devon, and in '88 rector of Wavertree, near Liverpool. He was select preacher at Cambridge in '81, '94, '96, and 1901, Lady Margaret Preacher '96, Hulsean Lecturer 1904, select preacher at Oxford in '83 and '98-9, and at Harvard, U.S.A., 1900, and has attracted much attention by his sympathy with the workers of the country and his sermons on social subjects. He is a Broad Churchman and a well-known Liberal. His published works include "God and the People," a volume of selections from the writings of Mazzini, "Village Politics," "Land and the Labourers," "Christ and Democracy," "For Christ and City," "Christ and Economics," "Christus Imperator!" a "Creed for Christian Socialists," "Historical Memorials of Ely Cathedral," "Charles Kingsley and the Chris-

tian Social Movement," "Bryhtnoth's Prayer and other Poems," "Pro Patria!" occasional sermons in England and America; "The Social Teaching of the Lord's Prayer," Oxford University Sermons; "In a Minster Garden; a Causerie of Things Old and New"; "Gospel of St. Matthew and St. Mark," in Temple Bible; "Verba Christi," in Temple Classics; "Cambridge and its Story"; "Castles in the Air," and other poems.

**Sudermann, Herman**, German dramatist and novelist, was b. at Mazirken, in East Prussia, Sept. 30th, 1857; studied in the universities of Königsberg and Berlin, and acted as teacher and journalist without, for a long time, any success. He wrote a great number of novels which were not read and of dramas which were not acted. But success and fame came to him in '88 with his drama "Ehre" (Honour), which was at once translated into foreign languages. He then published a series of tales, mostly grim enough, of which "Frau Sorge" and "Der Katzensteg" and chiefly "Es war" seem the most impressive. Not without grave difficulties his drama "Sodom's Ende," '90, was brought on the stage. His greatest success was reached in "Die Heimat," which, translated, became, as "Magda," a favourite piece in various countries, and was represented by Duse, Sarah Bernhardt, and Mrs. Patrick Campbell. As to his later works, "Das Glück im Winkel" is probably the most sympathetic; the general opinion as to his "Reiherfedern," "Morituri," "Johannes," and "Das Johannisfeuer"—the latter represented in London by an excellent troupe in 1901, remains divided. An English version of his "Sodom's Ende" was produced in London in May 1902, and his comedy "Der Sturmgesselle Sokrates" was presented at the Royalty on Oct. 31st, 1903.

**Sunday League, National**, established 1855, has for its objects the opening of museums, art galleries, and libraries on Sunday afternoons, maintaining the musical "Sunday Evenings for the People," Sunday excursions, Sunday bands in the parks, and generally aims at promoting intellectual and elevating recreation on that day. The founder of the League was Mr. R. M. Morrell. **President**, Alderman Sir W. P. Treloar, J.P.; **Secretary**, Henry Mills; **Offices**, 34, Red Lion Square, High Holborn, London, W.C.

**Surveyors' Institution, The**, incorporated by royal charter to secure the advancement and facilitate the acquisition of that knowledge which constitutes the profession of a surveyor. The Institution has nearly 4000 members, and consists of fellows (F.S.I. or Chartered Surveyor), professional associates (P.A.S.I. or Professional Associated Chartered Surveyor), associates, honorary members, and Colonial fellows, with a class of students attached. The annual subscriptions are: Students, £1 1s.; associates and professional associates, £2 2s.; and fellows, £3 3s. An entrance fee of £3 3s. is paid by both classes of associates, and one of £5 5s. by fellows. **President**, Mr. Albert Buck; **Secretary**, Mr. Julian C. Rogers. **Offices**, 12, Great George Street, Westminster, S.W.

#### SWEDEN AND NORWAY.

In 1815 the kingdom of Sweden was united indissolubly with the kingdom of Norway without prejudice to the separate constitution, government, and laws of either. If the throne become vacant through the failure of legal heirs to

the succession, the Diets of both kingdoms elect, and in default of agreement an equal number of Swede and Norse deputies make an absolute nomination. Affairs common to both kingdoms are administered by a Council of State, on which both nations are represented.

A grave constitutional struggle has arisen between the two countries, from the demand for greater independence for Norway in her foreign policy, which is energetically backed by the Liberals. In June 1892 the Storting passed a resolution in favour of independent consulates, which King Oscar refused to sanction, and the Ministry in consequence resigned. A deadlock ensued, and in July a resolution was passed asking M. Steen to remain in office, and deferring the consulate question *sine die*. In '93 M. Steen resigned, and M. Stang, the Conservative leader, succeeded him, although he was in a minority. The general election of '97 resulted in the return of 79 Radicals and 35 Conservatives and Moderates, as against 59 Radicals and 55 Conservatives in the former Storting. The Radicals, not satisfied with the separate Norwegian flag which the King sanctioned in Oct. '97, pressed for a separate consular system and Ministry of Foreign Affairs for Norway.

An Arbitration Treaty with France was signed on July 9th, and with Great Britain on Aug. 11th, 1904, following the usual lines.

### Sweden.

Under the Swedish Constitution of 1809, with subsequent amendments, the executive power is lodged in the king, who also possesses legislative power in matters of political administration; in all other respects such power is exercised jointly by the Diet, which alone may impose taxes. The Diet consists of two Chambers, the First of 150 members (elected by provinces and municipalities for nine years), the Second of 230 members (150 representing rural and 80 urban constituencies), elected directly on a small property qualification for three years. Members of the Second Chamber are paid £66 per session.

The Swedish army underwent a reorganisation in 1901, which is progressive and will have its full effect in 1914. General personal service has been adopted, with short periods with the colours: one year for service in the Cavalry and Artillery, and eight months for the Infantry. The army will be substantially increased in strength. The 24 existing infantry regiments are to have a third battalion each, and 3 fortress regiments of similar strength are to be raised. Some of the new formations have already been brought into existence. On a peace footing there are 2606 officers, 1797 non-commissioned officers, 6347 corporals and others, 557 cadets, 7792 volunteers, and 22,332 men, being a total of 42,031; but when the recruits are under training the effective probably numbers 45,000. The artillery are to receive Krupp quick-firing guns. There are 4 corps of engineers. Steps are also to be taken to increase the body of reserve officers. One great object in the recent changes is to give a more homogeneous character to the forces. The plans for mobilisation of the reserves have been improved, and a Landsturm is being organised. The first-line troops on a war footing would probably number 205,000, the second line 75,000, and the Landsturm 20,000.

The total of the Naval Budget for 1904

was £1,184,362 (21,533,853 kr.). The amount to be devoted to new construction is £333,440 (6,062,550 kr.). The Swedish Navy in 1904 numbered about 7500 of all ranks. In addition there are about 20,000 yearly conscripts available, but the majority of these are seldom called upon. The officers are divided as follows: 1 vice-admiral, 4 rear-admirals, 6 commodores, 24 captains, 64 commanders, 55 lieutenants, 30 sub-lieutenants. The strength of ships built and building on Nov. 30th was:—

Built.	
Coast defence vessels . . . . .	12
Monitors . . . . .	4
Gunboats . . . . .	17

Building.	
Armoured cruiser . . . . .	1
Torpedo boat . . . . .	1
Submarine . . . . .	1

The principal dockyards in Sweden are situated as follows: Karlskrona—three dry docks, take any Swedish ship; three smaller. Stockholm—one dock takes cruisers.

Local affairs are administered through representative bodies elected in the 24 governments, and the communes or municipalities, into which the country is divided and subdivided. The larger towns have separate municipal councils. The State religion is Lutheran; all others, except the Jesuits, are tolerated. Elementary education is compulsory, free, and well organised. The chief exports are timber. The iron mines are very important and are making much progress; while there are large timber and woodwork industries, butter, metals, minerals, etc. The forest area is about 80,000 sq. miles. There are 7707 miles of railway, of which 2612 belong to the State.

Area, 172,876 sq. m.; estimated pop., 1903, 5,198,752. The capital, Stockholm, has a pop. of 305,819. Revenue and expenditure, 1903 4, £9,647,500; 1904-5, £9,892,770; debt, 1904, £19,111,100; imports, 1902, £28,066,500; 1903, £29,716,160; exports, 1902, £21,798,500; 1903, £24,525,000.

Ministry: Premier, Herr E. Gustaf Boström. Foreign Affairs, Count A. Gyldenstolpe.—Justice, Herr Berger.—War, Major-Gen. O. W. von Virgin.—Marine, Rear-Admiral Palander.—Interior, Herr Westring.—Finance, Herr Meyer.—Public Worship, Rector Carl von Friesen.—Agriculture, Herr Odelberg.—Without portfolio, Dr. Husberg and Herr Ramstedt. Minister in London, Baron Carl de Bildt, 59, Jermyn Street, S.W. Consul-General, D. Danielson, 24, Great Winchester Street, E.C. British Minister at Stockholm, Sir Rennell Rodd, K.C.M.G., C.B., C.V.O. Secretary of Legation, F. S. Clarke.

British Consuls, A. S. MacGregor (Stockholm); J. Duff (Gothenburg).

### Norway.

The Norse Constitution of 1814, several times modified since, vests the legislative power in the Storting, which has 114 members (38 from urban and 76 from rural districts), who are elected indirectly, the people every third year choosing delegates who elect the Storting. For business purposes it is divided into the Odelsting, composed of three-fourths of the members, and the Lagthing, consisting of the remainder; all new bills originate

in the former. If the two divisions do not agree, the combined house deliberates, and the measure must be passed by a two-thirds majority. The King has the right of vetoing the laws passed by the Storting, but if the same bill pass three Storthings separately and subsequently elected, his veto is overridden. The executive power is in the hands of the King with a Council of State composed of 2 Ministers and at least 7 Councillors.

The force now available for service beyond the frontier numbers, with officers and men, 25,109; but the total armed strength is estimated to be 70,000 on mobilisation. There is, however, the defect that there is no reserve of the line to fill up the gaps which might arise during a war, without taking men from the Militia (Landvaern). Besides the troops of the line there exists the Militia or Landvaern for the defence of Norway, in case the troops of the line should be taken over to Sweden.

The estimates for 1904-5 amounted to £216,865 (3,943,000 kr.), of which only £23,375 (425,000 kr.) will be devoted to new construction. The Navy numbers about 2000, of which 1000 are permanent, and the remainder yearly conscripts. The executive officers are divided as follows: 1 rear-admiral, 4 captains, 14 commanders, 28 lieutenant-commanders, 37 lieutenants, 30 sub-lieutenants. The strength in ships built, building, and projected on Nov. 30th was:—

	Built.	
Coast defence vessels . . . . .	4	
Torpedo vessels . . . . .	7	
Torpedo boats . . . . .	28	
	Building.	
Submarine . . . . .	1	
	Projected.	
Torpedo boats . . . . .	3	
Submarine . . . . .	1	

The principal dockyards of Norway are situated as follows: **Horten**—one dry dock takes small battleships. **Christiansand**—one dry dock takes small battleships.

For local government the country is divided into the towns of Christiania and Bergen and 18 counties, and these again into urban and rural communes, all with representative government. The State Religion is Lutheran. Education is compulsory for children from 6½ (in towns) and 7 (in the country) to 14, the local authorities chiefly providing the cost, with subsidies from the State. Of the total area, 26,330 sq. miles are under forest, and only 3 per cent. is cultivated. There are about 1276 miles of State railways and 185 miles worked by companies. There are important and growing industries in the country, including dairying, the timber and pulp trade, canned fish, etc. Timber, wood pulp, cellulose, animal produce, skins, and tallow are the chief exports, which go mainly to Great Britain, Germany, and Sweden. Grain, metal goods, textiles, groceries, coal and coke are the chief imports, sent mainly by Great Britain, Germany, Sweden, and Russia.

**Area**, 124,495 sq. m.; **pop.** in 1900, 2,239,880. The pop. of Christiania was 223,649 (Dec. 31st, 1903), and of Bergen 72,251. **Revenue**, 1902, £5,501,940, 1903, £5,426,367; **expenditure**, 1902, £5,615,470, 1903, £5,490,375; **debt**, 1904, £14,611,111; **imports**, 1902, £15,963,750, 1903, £16,267,000; **exports**, 1902, £9,377,010, 1903, £10,737,000.

**Ministry: President of the Council of Ministers and Minister of Justice**, Prof. Dr. jur. F. Hagerup.—**Trade and Industry**, Statsraad P. B. Vogt.—**Defence, War and Marine**, Statsraad J. Strugstad.—**Public Worship**, Statsraad N. Hauge.—**Finance**, Statsraad C. H. K. Michelsen.—**Public Works**, Statsraad Hansen.—**Agriculture**, Statsraad J. E. Mellbye.

**Resident Ministry at Stockholm: Minister of State**, Sigurd Ibsen.—*Without portfolios*, J. Schœning and B. Kildal.

**Minister in London**, Baron de Bildt.

**Consul-General**, Daniel Danielsson, 24, Great Winchester Street, E.C.

**British Minister (to Sweden and Norway)**, Sir Rennell Rodd, K.C.M.G., C.V.O., C.B.

**British Consul-General at Christiania**, Viscount Melville, I.S.O.—*Vice-Consul*, Edward F. Gray.—*Pro-Consul*, H. C. Dick.

### Sovereign.

**Oscar II.**, King of Sweden and Norway, was b. Jan. 21st, 1829. He is a grandson of Napoleon I.'s famous general, Marshal Bernadotte, who became King of Sweden in '18. King Oscar II. ascended the throne in '72, in succession to his brother Charles XV. He is an excellent scholar and writer, and has translated Goethe's "Faust" into Swedish. Issued in '88 a volume of minor poems under his *nom de plume* of "Oscar Frederik." He married, in '57, the Princess Sophia of Nassau, b. July 9th, '36, by whom he has issue four sons. The Crown Prince is Prince Gustaf, b. June 16th, '58, and married in '81 to Princess Victoria of Baden.

### Political Parties.

At the election for the Storting in Sept. 1900, 77 members of the Left were returned, and 37 members of the Right and Moderates. M. Blehr succeeded M. Steen as Premier on April 20th, 1902, and M. Hagerup succeeded him in Oct. 1903, the elections having resulted in the return of 63 members of the Right and Moderates, against 50 of the Left and 4 Socialists.

In Sweden there are three parties—the Conservatives, also called the Right or the Country party, the Liberals, and the Independents, including several Social Democrats. The elections to the Second Chamber in Sept. 1902 resulted in the return of 104 Liberals, 94 of the Right or Country party, and 32 Independents. The Liberals won heavily from the Right.

**Swinburne, Algernon Charles**, son of Admiral Swinburne, was b. in London 1837. Ed. at Balliol College, Oxford ('57). Visited Florence, and passed some time there. His first productions were two plays, "Queen Mother" and "Rosamond" ('61). These were followed by two tragedies, "Atalanta in Calydon" and "Chastelard," and "Poems and Ballads," which met with severe criticism. His later works are "A Song of Italy," "William Blake, a critical essay," "Songs before Sunrise" ('71), in which he glorifies Pantheism and Republicanism; "Studies in Song" ('81); "A Century of Rondels" ('83); "Life of Victor Hugo" ('86); a poem on "The Armada" ('88); "A Study of Ben Jonson" ('90); "Astrophel, and other Poems," "Studies in Prose and Poetry" ('94), "The Tale of Balen" ('96), "Rosamund, Queen of the Lombards" ('99), and "A Channel Passage, and other Poems" (1904).

## SWITZERLAND.

Switzerland is a Confederation of nineteen entire and six half cantons, which have been united for Federal purposes since 1848. The constitution of '74 vests supreme legislative and executive authority in two chambers—viz. (1) a **State Council** of 44 members, chosen two for each canton and one for each half-canton for three years; and (2) a **National Council** of 167 delegates of the Swiss people (of whom 29 are sent by Berne and 22 by Zurich), chosen also for three years, directly by manhood suffrage, one deputy for every 20,000 of the population. The united chambers form the Federal Assembly, to which is confided the supreme government. The executive authority is deputed to a **Federal Council** of seven members, elected for three years by the Assembly, the president and vice-president of which are elected annually, and are the first magistrates of the republic. The Council sits at Berne, which is the headquarters of the Federal administration. The principles of the **Referendum** see (p. 610) and of the **Initiative** are in force. The latter signifies the right of any 50,000 citizens to demand a direct popular vote on any constitutional question. The **Federal Government** can alone contract treaties or declare war. The army, postal system, finance and customs, are also under its control. Civil and criminal law, justice, police, public works, and schools are all left under the jurisdiction of the cantonal authorities, while labour legislation may be initiated either by the Confederation or by the cantons. The **neutrality** of the country is guaranteed by the Treaty of Vienna, 1815, as indispensable to the general interest of Europe. The Swiss agree to this, but yet claim the right to make alliances, and even to declare war.

The Federal forces do not constitute a standing army, the principle being that of a militia, and the liability to serve twelve years in the **Elite**, twelve in the **Landwehr**, and six in the **Landsturm**. During the twelve years in the **Elite** (ten for the cavalry) the aggregate service is 141 days in the Infantry, 146 in the Engineers, 160 in the Cavalry, and 163 in the Artillery.

The total military strength consists of:—**Elite** (20 to 32 years of age): 96 battalions of Infantry, 8 battalions of Rifles, 24 squadrons of Dragoons, 48 field batteries of 6 guns, 2 mountain batteries, 10 position batteries, and 12 companies of Light Horse. **Landwehr** (32 to 44 years of age): 96 battalions of Infantry, 8 bat-

talions of Rifles, 24 squadrons of Dragoons, 8 field batteries, and 15 position batteries. An aggregate total, in round numbers, of 200,000 men, of whom 130,000 are in the first 12 classes of the "**Elite**," formed into 4 army corps. In addition, the **Landsturm** can furnish fully 300,000, giving an armed strength of 500,000, maintained at a cost of about £1,000,000 a year for a total population of 3,500,000.

Complete liberty of conscience prevails; and about 59 per cent. of the population are Protestants and 40 per cent. Roman Catholics. Education is free and compulsory, and admirably organised from the primary schools to the universities. The chief occupation is agriculture, though there is much manufacturing industry. The principal exports are textiles, silk goods, clocks and watches, and food produce. There are about 2727 miles of railway open, most of which has been nationalised. The tariff settled in April 1891 is in force in Switzerland, which has commercial treaties with all the leading Powers. Some of these were arranged to expire on Dec. 31st, 1903, or one year after notice, and new treaties with Italy and Germany were arranged during 1904.

As to **Simplon Tunnel** and other similar works see **ENGINEERING**.

An **Arbitration Treaty** with Great Britain was signed Nov. 16th, 1904.

**Area**, 15,976 sq. m.; **pop.**, 1900, 3,315,443. There are 18 German-, 5 French-, and 1 Italian-speaking cantons. The chief towns are Zurich (pop. 152,942), Basle (111,099), Geneva (105,139), and Berne (64,864). **Federal revenue**, 1901, £4,075,986; **expenditure**, £4,221,324. **Revenue of 25 Cantons**, £4,841,520; **expenditure**, £4,863,856. **Federal debt**, 1901, £3,500,000. The aggregate cantonal debts amounted, in 1900, to £15,050,288. **Imports**, 1901, £42,000,000; 1902, £45,140,200; 1903, £47,135,700; **exports**, 1901, £33,463,000; 1902, £34,972,000; 1903, £35,536,800.

**President** for 1905, M. Ruchet. **Vice President**, M. Forrer.

**Minister to Great Britain**, Mons. Gaston Carlin, 38, Beauchamp Place, London, S.W.

**British Minister at Berne**, Sir W. Conyngham Greene, K.C.B.—*Secretary*, Lord Atcham, M.V.O.

**Consuls: Consul-General** at Zurich, Dr. H. Angst, C.M.G.; at Berne, G. de Muralt; at Geneva, Sir George Phillippi, K.C.; at Lausanne, Alfred Galland; at Lucerne, L. Falck.

**British Commercial Agent**, Mr. J. C. Milligan, British Consulate-General, Zurich.

## T

## TELEPHONES.

The **National Telephone Company**, which is an amalgamation of various companies that were formed in the past to develop the telephone industry of the country, is now, under licence from the Postmaster-General, conducting the greatest part of the telephone business in the United Kingdom in local areas, but the **trunk lines** (consisting of 396 trunk wire centres, 1418 trunk circuits, and about 102,800 miles of wire) connecting the various areas together are, in accordance with the Telegraph Act of 1892, worked by and are the property of the Postmaster-General. The capital expenditure on the

trunk wire system up to March 31st, 1904, was £2,200,024, and by the Telegraph Money Act, 1904 (see **SESSION**, sect. 92) the expenditure of a further sum of £3,000,000 on the development of the telephone system was authorised. Of this sum £1,300,000 is required for the extension of the trunk wire system and £1,700,000 for the development of the exchange system in London and the provinces.

The **National Telephone Company** in 1904 was working 1095 exchanges, and sending annually over its wires 938,000,000 messages. The Company had about 300,000 subscribers and a gross revenue of about £2,000,000. Under its

licence the Company has to pay the Government 10 per cent. of its gross receipts from telephone exchange business. This general licence expires on Dec. 31st, 1911, and the Postmaster-General had the option (though he decided not to avail himself of it) of determining it on certain terms at the end of 1904; but in some towns, where licences have been granted to municipalities, the Company has the option, under certain conditions, of getting its licence extended, and this has been done in one or two cases. In a few towns the Company is working its local system in competition with either the Post Office or the Corporation. See Session, sects. 15 and 92.

Lord Stanley has expressed the view that it is more to the country's interest not to wait till 1911 to buy the Company's plant throughout the country, but to acquire the whole telephone system of the country in the near future, provided that the price to be paid is reasonable.

The royalties paid to the Post Office during the year ended March 31st, 1904, were: National Telephone Co., £169,833; other licensees, £6206.

The Post Office has its own system of exchanges in the provinces, besides an exchange system in London. An agreement has been entered into between the Post Office and the Company as to London, providing for intercommunication between subscribers on the two systems, so that the competition is one of efficiency, and not of rates. For unlimited user the annual subscription is £17. Two alternatives, (1) a Message Rate Service with subscriptions of £5 and £4, and fees of 1d. and 2d. per call, and (2) a Party-line Message Rate Service, with subscriptions of £3 and £2 and similar message fees, are offered.

The municipalities at present working telephones are the corporations of Glasgow, Brighton, Portsmouth, Hull, and Swansea, besides Guernsey. The Tunbridge Wells Corporation adopted a proposal to sell their undertaking to the National Telephone Company on Nov. 12th, 1902. Licences have been granted to a large number of other towns throughout the kingdom.

The number of trunk line conversations during the year ended March 31st, 1904, was 13,467,975 (11,574,229 in previous year). The revenue from this service was £325,525 (£274,835 in previous year).

The number of subscribers to Post Office Provincial Telephone Exchanges on March 31st, 1904, was 5253, and the number of telephones rented was 6874 (5218 previous year). The rentals of these Exchange circuits and of private wires amounted to £206,786. The capital expenditure on provincial Exchanges up to 1904 was £269,718.

The number of telephones connected with the Post Office London Telephone system on March 31st, 1904, was 15632 (9122 previous year). As the accommodation at the Central Exchange will be exhausted in 1904-5, a second Exchange with a capacity of 18,000 lines is in progress. The capital expenditure on London Exchanges up to 1904 was £1,510,762.

There are International Telephone Lines connecting England and Belgium and England and France, the latter opened in 1904. Experiments showed that telephonic communication with Holland is not at present practicable.

## TEMPERANCE SOCIETIES AND INSTITUTIONS.

The Temperance movement had its origin in Scotland and Ireland in 1829, and in England in 1830, the British movement having been suggested by the earlier reform in the United States in 1826. At first societies were founded on the principle of abstinence from ardent spirits, but in less than ten years this abstinence was extended to all intoxicating beverages. Temperance organisations are now of great variety and extent, and the following analysis may enable the reader to form a clear conception of their distinctive characteristics.

I. In the first section may be included all societies which exist chiefly to inculcate total abstinence from all intoxicating liquors.

Of these societies some are national, such as the **British Temperance League** (Sec., Charles Smith, 29, Union Street, Sheffield); the **National Temperance League** (Sec., J. T. Rae, Paternoster House, London, E.C.); the **Scottish Temperance League** (Sec., W. J. Allison, 115, Bath Street, Glasgow); the **Irish Temperance League** (Sec., W. Wilkinson, 18, Lombard Street, Belfast).

Some are denominational, such as the Baptist, Congregational, Wesleyan and other Methodist bodies, the Society of Friends, Unitarian, etc.

Some are specially devoted to work among women, such as the **British Women's Temperance Association** (Sec., Miss Hunt, 47, Victoria Street, London, S.W.), the **Women's Total Abstinence Union** (Sec., Miss Boyd, 4, Ludgate Hill, E.C.), and the **World's Women's Christian Temperance Union**, founded by the late Miss Frances Willard (President, Lady Henry Somerset; Hon. Secs., Miss Agnes E. Slack, Ripley, Derbyshire, and Miss Anna A. Gordon, Evanston, Ill., U.S.A.).

Some particularly operate among distinct classes, such as lawyers, commercial travellers, caterers, railway servants, post-office officials, etc. Prominent among these is the **British Medical Temperance Association** (Gen. Sec., Dr. Ridge, Carlton House, Enfield).

Some are connected with the temperance teaching and training of the young, such as the **United Kingdom Band of Hope Union** (Sec., C. Wakely, 60, Old Bailey, E.C.), with its unions and branches; the **Young Abstinists' Union** (Sec., Miss Hooker, 18, Exeter Hall, London, W.C.), and other juvenile societies. All these are believed to number between two and three million members.

In this section also must be included district unions, such as the **North of England Temperance League**, the **Western Temperance League**, and the thousands of Local and Congregational societies spread over the United Kingdom.

II. The second section may be assigned to the **Independent Order of Good Templars** (first formed in New York in 1851, and extended to England in '68 by Joseph Malins), whose Grand Lodges for England, Wales, Scotland and Ireland constitute, with their subordinate Lodges, a great temperance confederacy of adults and juveniles. **Permanent Offices**, 168, Edmund Street, Birmingham.

III. The third section may be allocated to the **Church of England Temperance Society** (4, The Sanctuary, Westminster, S.W.) formed in 1862, and re-formed on the dual basis in 1873. One of its sections is confined to total abstainers only, and this includes the juvenile department,

The other section includes abstainers and non-abstainers, who co-operate in methods and measures for discouraging intemperance. A Women's Union is attached to the Society, with diocesan branches existing throughout the kingdom.

IV. Section 4 consists of organisations chiefly aiming to procure legislation for the promotion of sobriety.

Chief of these is the **United Kingdom Alliance** (Sec., W. Williams, 16, Deansgate, Manchester) formed in 1853, which celebrated its jubilee on October 20th, 1903. It has a large body of superintendent agents, lecturers, auxiliaries, etc. Its specific object is to obtain a law enabling the voters of each locality to exclude totally, or partially, the sale of intoxicating liquors; but it aids all legislation of a temperance character, and it is constantly circulating propaganda in favour of total abstinence. In connection with it is the **Scottish Permissive Bill and Temperance Association**, and the **Irish Temperance League**; and nearly all the powerful temperance associations of the country are in sympathy with its object.

The **National Temperance Federation** (168, Edmund Street, Birmingham) is composed of representatives of thirty leading temperance societies, and it keeps a watchful eye on all measures affecting temperance action before or coming before Parliament.

The **Central Temperance Legislation Board** (4, The Sanctuary, Westminster), established to obtain legislation on the lines of Lord Peel's Minority Report. The London United Temperance Councils, and similar councils, taking cognisance of parliamentary, county, and borough elections, and licensing affairs. The **Central Sunday Closing Association**, which seeks a law for closing drinking-shops in England during the whole of Sunday.

V. The fifth section is occupied by the **Army Temperance Association** (47, Victoria Street, Westminster, S.W.), and the **Royal Naval Temperance Society** (Miss Weston, Sailors' Rest, Portsmouth). Both are under official patronage.

VI. Section 6 comprises (1) **Friendly Orders**, such as the **Rechabites**, **Sons of Temperance**, and **Sons of the Phoenix**; (2) The **United**

**Kingdom Temperance and General Provident Institution**, and other insurance societies putting total abstainers into a distinct section.

VII. The seventh section is devoted to the **London Temperance Hospital** (Hampstead Road, N.W.), which has treated 20,000 in-patients and 250,000 out-patients. Alcohol is seldom prescribed, and the rate of mortality is low.

**Terry, Miss Ellen**, was b. at Coventry, Feb. 27th, 1848, and made her first appearance on the stage during Charles Kean's Shakespearian revivals in '58, playing the parts of Mamillius in "The Winter's Tale" and Prince Arthur in "King John." When only fourteen she was a member of Mr. Chute's Bristol company, which included Miss Kate Terry, Mr. William Rignold, Mr. George Rignold, Mr. Charles Coghlan, Mrs. Kendal, Mrs. Labouchere, Kate Bishop, and several other now prominent members of the profession. She reappeared in London March '63, as Gertrude in "The Little Treasure," and until Jan. '64 played Hero in "Much Ado about Nothing," Mary Meredith in "Our American Cousin," and other secondary parts. In that year she married and left the stage, but returned to it again in Oct. '67, in "The Double Marriage" at the New Queen's Theatre, London. She afterwards joined Mr. and Mrs. Bancroft at the Prince of Wales's Theatre, where she acted the part of Portia. On Dec. 30th, '78, she made her first appearance at the Lyceum, and has since, in conjunction with Sir H. Irving, played in the longest runs ever known of "Hamlet," "The Merchant of Venice," "Romeo and Juliet," "Much Ado about Nothing," and "Macbeth." She has also appeared as Viola in "Twelfth Night," as Marguerite in W. G. Wills' "Faust," as Lucy Ashton in "Ravenswood," as Queen Katharine in "Henry VIII.," as Cordelia in "King Lear," as Rosamonde in "Becket," and as Imogen in "Cymbeline." In June 1902 she played Mistress Page in "The Merry Wives of Windsor," produced at His Majesty's Theatre by Mr. Tree, Mrs. Kendal being also in the cast. In 1903 she entered into management at the Imperial Theatre. Miss Terry's son plays under the name of Gordon Craig, and her daughter under that of Edith Craig.

## TEXTILE INDUSTRIES OF THE WORLD.

### I. COTTON. II. WOOL. III. JUTE. IV. LINEN.

This article is devoted to the special treatment of the textile industries, for the purpose of affording some indication as to their broad trend. No attempt is made to discuss in detail the ramifications of each section of these industries, but attention is mainly confined to two important aspects:—

#### 1. The sources of supply of raw material.

2. The production of trade in manufactured goods in this country, contrasted with that of our principal competitors.

It does not appear that any attempt to present such figures, as this article does in a concise form, has been made before; and the compilation of these tables has involved a good deal of special investigation of official records, British and foreign. The particulars given below, it is hoped, will enable the reader to grasp the important and salient points connected with this branch of industry, the most important of any existing in this country from the point of view of its foreign trade.

#### I. THE COTTON INDUSTRY.

Reference is made elsewhere (see **TRADE**, 1904) to the extraordinary difficulties which attended the cotton industry during 1904, owing to the scarcity of supplies. Were this an accidental occurrence, not likely to be repeated, it would be of relatively little moment. As a matter of fact, however, it is likely to increase rather than diminish in importance, unless new sources of supply can be obtained.

The facts of the position may be briefly stated. Hitherto the cotton manufacturing industry has relied mainly upon the United States for its supplies. Out of an annual crop estimated at 16,000,000 bales, the United States furnishes on the average about 11,000,000 bales. India is responsible for a further 3,000,000 bales (of which, however, nearly half is consumed in that country itself), and the remainder is not of sufficiently high quality to be available for most manufacturers. Egypt produces another

1,000,000 bales, and a further 1,000,000 is derived from various parts of the world.

With the development of cotton manufacturing in the United States, and on the Continent, the proportion of the American cotton crop available for the United Kingdom diminishes, though the real requirements of its manufacturers increase. This is shown by the following table, which sets out the American crop at various dates during the past 21 years, and the takings of British, Continental, and American manufacturers respectively.

### Production and Consumption of Cotton.

	1882-3.	1892-3.	1902-3.	1903-4.
	(1000 Bales)	(1000 Bales)	(1000 Bales)	(1000 Bales)
American Crop	6,992	6,717	10,758	10,124
Consumption—				
British. . .	2,888	2,403	2,848	2,361
Continental. .	1,857	2,000	3,637	3,595
American. . .	2,141	2,535	4,153	4,065
Total. . .	6,886	6,938	10,638	10,021

While the American crop reached its maximum in '88-9, and has since been on a lower level, the demand, both from the Continent and from America, is increasing very rapidly. It will be seen from the above figures that during the period covered by the table both these sections have doubled their requirements, while the British share of crop has remained practically stationary. Proportionately the British share has fallen heavily, as will be seen from the following table giving the

### American Cotton Consumption.

Year ended Aug. 31st.	Northern Mills.	Southern Mills.	Total.
	Bales.	Bales.	Bales.
'90 . . .	1,799,258	546,894	2,346,152
'92 . . .	2,190,766	686,080	2,876,846
'94 . . .	1,601,173	718,515	2,319,688
'96 . . .	1,660,271	904,701	2,564,972
'98 . . .	2,211,740	1,231,841	3,443,581
1900 . . .	2,063,300	1,597,112	3,660,412
1902 . . .	2,050,774	1,937,971	3,988,745
1904 . . .	2,026,967	1,919,252	3,946,219

Four-fifths of the American crop is now consumed in the United States, while twenty years ago the proportion was less than one-third.

### Position of British and Foreign Cotton Manufacturers.

In this connection it is interesting to form some idea of the relative position of British and foreign cotton foreign manufacturers at different dates. The following estimate has been prepared by the Board of Trade, giving the number of spindles at various periods during the past 33 years.

### The World's Cotton Spindles.

	U.K.	Continent.	U.S.	Other Countries.	Approximate Total.
	Million spindles.	Mil. spin.	Mil. spin.	Mil. spin.	Mil. spin.
'70	37 $\frac{1}{2}$	13	7	—	57 $\frac{1}{2}$
'80	44 $\frac{1}{2}$	21	10 $\frac{1}{2}$	2	78
'90	44 $\frac{1}{2}$	26	14	4	88 $\frac{1}{2}$
1900	46	32	19	7	104
1903	48	33	22	7 $\frac{1}{2}$	110 $\frac{1}{2}$

It is evident from these figures that while the production in the United Kingdom is increasing, and is still much larger than in any other part of the world, its proportion to the whole output is very much smaller, and British makers consequently find increasing difficulty in obtaining adequate supplies. Further, and this concerns the cotton producers of the whole world, the supply of raw material is not developing so rapidly as the demand. It is estimated that 500,000 additional bales are required in the aggregate annually, while for some years the production has been almost stationary. Of course this difficulty is accentuated by the speculation in cotton which is so constantly taking place, but it is not caused by it. No effective remedy can be looked for, apart from a considerable increase in production, and it is therefore important to examine what the prospects are of that increase taking place.

### United States Cotton Supplies Decreasing.

Naturally attention must first be directed to the probability of a larger output from the United States, which is now and will probably remain the chief and most important source of supply, because the quality there is superior to that of any other part of the world. It cannot be said that the outlook in this connection is very hopeful, in spite of the estimated increased yield in 1904-5. As has been already pointed out, the maximum American production occurred some years ago,

### Proportional Distribution of American Cotton Crops.

5-yr. average.	Great Britain.	Continent.	United States, etc.
	%	%	%
'80-5 . . . . .	42'83	25'53	31'64
'85-90 . . . . .	41'23	25'94	32'83
'90-95 . . . . .	37'28	29'67	33'05
'95-1900 . . . . .	30'46	34'25	35'29
3-yr. average			
1901-3 . . . . .	27'68	33'44	38'88
1-yr. average			
1903-4 . . . . .	23'56	35'87	40'57

Two additional tables will further elucidate the real position. The first shows the amount of the American cotton crop over a series of years:—

### American Cotton Crop.

	1000 Bales.		1000 Bales.
'82-3 . . . . .	6,992	'99-1900 . . . . .	9,440
'92-3 . . . . .	6,717	1900-1 . . . . .	10,425
'95-6 . . . . .	7,162	1901-2 . . . . .	10,701
'93-7 . . . . .	8,714	1902-3 . . . . .	10,758
'97-8 . . . . .	11,181	1903-4 . . . . .	10,124
'98-9 . . . . .	11,235	1904-5 (estim'd)	12,162

American production has thus of late years been barely stationary, while American home requirements have very greatly increased, as will be obvious from the following figures of

and since then there has been diminution. While a larger area is being planted in the United States, every year, the yield per acre has been decreasing. The causes of this seem to be in the main two: (1) There has been great industrial expansion, chiefly in the Southern States, during the past ten years, and this has rendered the supply of coloured labour smaller and more precarious; (2) it seems probable that the soil itself in the older plantations has become less productive, owing to exhaustion. Though it is true that some American authorities contend that there are vast fields in the Southern States, and especially in Texas, suitable for the production of cotton, which have not yet been brought under cultivation, and that America may still be relied upon to furnish the world's needs, this is a possibility rather than a probability.

#### **British Cotton-Growing Association.**

The question of seeking supplies in other directions has therefore become very urgent. This task has been seriously taken up by the **British Cotton-Growing Association**, a body formed by the Lancashire producers between three and four years ago. Its efforts hitherto have necessarily been of a somewhat tentative character, and confined chiefly to investigation as to the parts of the British Empire which are capable of producing cotton. As far as they have gone, however, their investigations have been eminently satisfactory, and there seems to be little doubt that continued efforts on the same lines as so far adopted will lead to increased productions in various parts of Greater Britain, which will do much to relieve the scarcity. We may briefly summarise the results of the investigations which have hitherto been made.

#### **New Sources of Cotton Supplies.**

**India.**—As already stated, India is a large cotton producer, and has been so for many centuries. Unfortunately, however, the quality, never very excellent, has suffered a good deal from lack of improvement in the methods of picking, while at the same time the standard of quality in manufactured articles has been steadily growing higher. At the present time, therefore, but little of the long-staple varieties suitable for the requirements of the British manufacturers are produced. Attempts to introduce American seed into India have been made, and a good deal of money and energy has been expended in this direction, but they have proved abortive, as, for some reason not clearly known, **American varieties do not thrive in India**, and of late years attention has been directed to improving the indigenous growths rather than to acclimatise exotic varieties, but it seems doubtful whether India will ever be able to produce sufficient long-stapled cotton to be of real value to European and American manufacturers. Though indirectly something may be done by increasing the supply for Eastern countries, and so relieving the pressure so far as Europe is concerned.

**Egypt.** Egyptian cotton is good in quality, but unfortunately nearly the whole area suitable for cotton growing has already been taken up, and the prospect of increased supplies from this source are therefore not considerable. Possibilities undoubtedly exist with regard to the Soudan, which is favourably regarded by some experts from this point of view, and it is quite probable that important developments may take place there.

**British Central Africa.**—Investigations show that cotton growing in British Central Africa offers very promising prospects. The Protectorate contains an area of 20,000,000 acres suitable for cotton growing, and cotton has indeed been grown in a small way for centuries. Some thousands of acres are now being planted, and it is anticipated that good supplies will be available within a few years, though they will not be large in quantity until adequate railway accommodation is available. Small colonies of natives from India are settling in the district, and are found to furnish very satisfactory labour.

**West Africa.**—All the British colonies and protectorates in West Africa are capable of producing good cotton crops, but the possibilities in this connection are dependent upon improved transport facilities, which at present do not exist. In **Gambia** cotton has been grown for ages, and the same may be said of **Sierra Leone**. The **Gold Coast** offers less favourable prospects, and both in **Southern and Northern Nigeria** there are undoubted possibilities. In the former experimental plots have already been planted, and there are good transport facilities owing to the rivers. In the latter there is an immense area capable of cotton cultivation, and some of it has already been under the plant for centuries. Here again, however, transport facilities are urgently needed; but it is said that if these existed in adequate amount, **Northern Nigeria** alone would be capable of producing all the cotton **Lancashire** wants.

**Rhodesia.**—The cotton plant grows wild over nearly the whole of Rhodesia, and the results of experiments and investigations there have been so far encouraging as to lead to the sending out of an American expert to conduct experiments on a very large scale. This expert has already reported that he is very hopeful as to the general prospects, and the **British South Africa Company** is doing all it can to encourage the establishment of the industry. The chief difficulty here is the distance of the fields from the world's markets.

**Australia.**—In **Queensland** cotton has already been grown to a considerable extent, and it is known to exist in the **northern territory of South Australia**. In this region, however, the prospects cannot be regarded as very hopeful: the climate is tropical, and cotton cultivation is not possible with white labour. As the **Australians** are unwilling to admit any form of coloured labour into the **Island-Continent**, important developments in this region are hardly likely to take place.

**West Indies.**—In the early part of the nineteenth century a large proportion of the raw cotton used in this country came from the **West Indies**, but the growing of that staple was largely abandoned for sugar, though **Sea Island cotton**, one of the best varieties, has been continuously produced. Now, however, the cotton industry has been re-established on an extended scale; and **Sir Daniel Morris**, the Imperial Commissioner of Agriculture, hopes that within a few years the exports from the **West Indies** will reach 50,000 bales per annum.

This is a brief *résumé* of one of the most important and interesting industrial experiments which have ever been made; and should it ultimately be crowned with success, the effect will be beneficial not only to the industry but to the **British Empire** at large. The importance of the movement is such that it has

received warm commendation from various eminent personages, including H.M. the King.

### *Cotton Manufactures in various Countries.*

While it is impossible to give exact figures relative to the cotton manufactures of various countries, owing to the fact that in practically every case a large part of the output is consumed at home, and no figures are available as to any country's home trade, indications of the chief movements are to be found. The table already given of the spindles of the world furnishes a rough guide as to the progress of the industry in various countries. A further test of the progress of the chief nations concerned is to be found in the export figures.

Taking cotton yarn first, the following are the particulars of the exports of this country, Germany, and France during the past 11 years.

#### *Value of Exports of Cotton Yarn.*

	United Kingdom.	Germany.	France.
	(£1000)	(£1000)	(£1000)
1893 . .	9,055	910	—
1894 . .	9,286	785	—
1895 . .	9,291	835	103
1896 . .	10,045	810	133
1897 . .	9,930	1,050	108
1898 . .	8,923	985	113
1899 . .	8,059	1,145	252
1900 . .	7,741	1,455	217
1901 . .	7,977	1,425	158
1902 . .	7,494	1,585	127
1903 . .	7,407	1,603	163

British trade is very much larger than that of the other two countries put together, but it will be seen that it has shown a declining tendency for some time past, while that of both Germany and France has been improving on the whole. This, however, reflects no discredit upon British producers. Owing to a number of favourable circumstances they practically had a monopoly for many years; and that that monopoly has now disappeared, though a preponderating share still remains, merely indicates that their rivals have surmounted the difficulties which earlier they had to encounter.

As regards cotton manufactures, figures can be given relative to four countries, though it should be explained that with regard to the United States the statistics include cotton yarn.

#### *Value of Exports of Cotton Piece Goods.*

	United Kingdom.	Germany.	United States.	France.
	(£1000)	(£1000)	(£1000)	(£1000)
1893	54,699	7,715	2,562	—
1894	57,279	7,090	2,867	—
1895	54,455	9,195	2,758	4,731
1896	59,210	8,315	3,357	5,258
1897	54,044	8,800	4,208	4,773
1898	55,977	0.050	3,405	5,150
1899	59,489	10,305	5,113	6,970
1900	62,009	12,235	4,801	6,977
1901	65,708	10,990	4,054	7,054
1902	65,054	12,960	6,422	7,042
1903	66,220	13,181	6,443	6,814

British trade has been steadily growing in volume, and the increase has been much larger than in that of all the other three countries put together. The table affords an incidental illustration of the fallacy of percentage increases. The United States, for instance, starting from a very low level, shows an increase of about 200 per cent., while the United Kingdom has only an increase of about 20 per cent. In point of fact, however, British trade has increased £12,000,000, and that of the United States only £3,000,000.

## **II. THE WOOL INDUSTRY.**

While cotton is only grown in tropical and semi tropical countries, wool is mainly a product of temperate regions. The sheep is, however, an animal which can live under very varied climatic conditions, so that there are few countries of the world, except in the immediate regions of the Equator, where wool is not produced in fair quantities. Its use as a material for producing wearing fabric is, however, almost confined to the temperate regions, and it is from them that the world's supplies are mostly obtained. In a great many countries using wool freely for manufacturing purposes, the home supply is an important element, and even in Great Britain nearly a seventh of the quantity used is obtained from the British farmer. Under present conditions of cheap transit, however, the breeding of sheep is most economically and efficiently carried on where good grazing land is to be had very cheaply, and hence the world's sources of supply are, apart from domestic production, mainly from new and only partially developed countries. Some idea of the relative importance of the different sources of supplies may be gained from the following table.

### *Imports into Europe of Extra-European Wool.*

	Australasian.	Cape.	River Plate.	Other sorts.	Total.
	1000 Bales	1000 Bales	1000 Bales	1000 Bales	1000 Bales
1894	1862	249	422	497	3030
1895	2025	263	476	534	3298
1896	1790	299	517	505	3111
1897	1826	219	498	542	3115
1898	1679	287	543	494	3003
1899	1662	266	537	491	2756
1900	1437	131	396	455	2419
1901	1719	214	333	395	2861
1902	1654	245	468	427	2794
1903	1432	229	538	480	2679

It may be noted that, although European imports do not cover the whole of the demand, they do cover the great bulk of it. Not much wool is imported into the United States, and in other parts of the world in which woollen industries exist on a limited scale, the manufacturers are dependent on the domestic supply.

### *Australasia as a Wool Producer.*

Examining further the above table, as fairly comprehensive and representative of the world's supplies, certain striking facts make themselves at once apparent. The first of these is the immense predominance of Australasia as a wool producer. In good years it is responsible for

about two-thirds of the whole imports into Europe, and even in poor years the proportion considerably exceeds one-half. This point needs to be insisted upon, for it is the key to the whole question of supply—an important one at the present moment, because, as in the case of cotton, there is a dearth of wool, the significance of which is that the industries dependent upon it are materially affected. A further examination of the table reveals the cause of that dearth. It will be seen that during the period covered Australasian supplies reached their maximum in 1895, and were at their lowest in 1903, while from other sources shipments show on the whole a steadily increasing tendency. This shortage is then clearly due to Australasia, and is explained by the prolonged drought there, which decimated the flocks of sheep and caused wool supplies to shrink very considerably. There is, however, this important difference between the scarcity of wool and that of cotton—that the animal product is scarce temporarily only. Already there is every prospect that the supplies yielded by Australia in 1904 will show an increase of 10 per cent. over those of 1903. It will not be until 1905 that this increase will begin to tell in the import figures, but from that time onward,

in the absence of any further drought, a much nearer adjustment between imports and requirements may safely be calculated upon. Even in the improbability of supplies from Australia being permanently diminished, a stimulus would be given to production elsewhere, so that in time the balance would be redressed, however inconvenient might be the consequences meanwhile. The problem thus presented by wool is therefore of a comparatively insignificant character, compared with that of cotton. It may be noted, however, that it is of special importance to the United Kingdom, inasmuch as it consumes about two-thirds of the total European imports of Australasian wool. River Plate wool is mainly used on the Continent, and supplies from that part of the world show on the whole an increasing tendency.

#### Importation of Colonial Wool.

The effect on prices of the shortage in Australasian wool is shown in the following table, which sets out the importation of Colonial wool into Europe and America over a period of more than forty years, with the approximate average value per bale.

Year.	Australasian Bales.	Cape Bales.	Total Colonial Bales.	Average value per bale.	Total value.
				£ s. d.	£
'60	187,000	79,000	266,000	25 15 0	6,850,000
'70	546,000	152,000	698,000	16 15 0	11,691,000
'80	869,000	219,000	1,088,000	20 5 0	22,032,000
'85	1,094,000	188,000	1,282,000	14 0 0	17,948,000
'90	1,411,000	288,000	1,699,000	14 15 0	25,060,000
'95	2,001,000	269,000	2,270,000	11 0 0	24,970,000
'98	1,703,000	279,000	1,982,000	12 5 0	24,280,000
'99	1,641,000	267,000	1,908,000	14 10 0	27,666,000
1900	1,456,000	140,000	1,596,000	13 10 0	21,546,000
1901	1,745,000	217,000	1,962,000	10 10 0	20,601,000
1902	1,699,000	234,000	1,933,000	11 15 0	22,713,000
1903	1,451,000	234,000	1,685,000	13 10 0	22,747,000

It will be seen that imports of Australasian wool were steadily progressive until they reached their maximum in the year 1895, at which time the cost was the lowest on record. Since then, with fluctuations, due to market causes, into which it is not now necessary to enter, imports have fallen, and prices have been considerably higher than in 1895. They are likely to continue to be firm for some time to come. Increase in consumption is taking place yearly, and will probably for some time proceed at least as fast a pace as increase in the supplies. In all industries connected with wool, higher prices tend considerably to check the demand for manufactured goods. While woollen fabrics are necessarily used in most temperate climates, the consumer can economise by wearing garments longer and by buying them of cheaper material. This is important to bear in mind in connection with tables given later, relative to exports of woollen goods.

#### Consumption of Wool in the United Kingdom.

As showing how production in the United Kingdom has been affected by the scarcity, the following table is of interest:

Average.	Domestic Clip (Estimated).	Imports.	Exports.	Left for Home Cons'n.
	Mil. lbs.	Mil. lbs.	Mil. lbs.	Mil. lbs.
'61-70	150	220	87	283
'71-80	156	381	186	351
'81-90	134	578	322	390
'91-95	146	744	399	491
'96-1900	139	701	318	522
1899	140	698	315	523
1900	141	581	220	502
1901	138	716	313	541
1902	136	678	320	494
1903	133	639	321	451

It will be seen that the quantity left for home consumption was very much lower in 1902 and 1903 than in the previous years. It is not probable that so far any actual decrease in manufactures has occurred, the shortage having been made up by a considerable reduction in visible and invisible stocks; but should the dearth long continue—as however it is not likely to do—it would necessarily involve a decrease in the output of manufactures.

**Exports of Woollen and Worsted Yarn.**

This being the broad position as regards supply and demand for the raw material, it is now of interest to see how different countries are faring in the matter of exports. The following table gives the exports of woollen and worsted yarn from the United Kingdom, Germany, and France respectively.

	United Kingdom.	Germany.	France.
	£1000.	£1000.	1000
'93 . . . . .	4,532	1,895	—
'94 . . . . .	4,718	2,140	—
'95 . . . . .	5,372	2,340	1,244
'96 . . . . .	5,055	2,245	1,184
'97 . . . . .	4,840	2,230	967
'98 . . . . .	4,674	2,245	1,179
'99 . . . . .	4,876	2,865	1,483
1900 . . . . .	4,492	2,840	1,383
1901 . . . . .	3,488	2,815	969
1902 . . . . .	3,531	3,125	1,371
1903 . . . . .	4,198	3,589	1,359

The United Kingdom still remains the largest exporter of the three, but it is noticeable that its relative importance has seriously diminished during the period covered by the table; while both Germany and France, especially the former, have improved their position, and it is not improbable that in a few years the United Kingdom will lose the leading place. This can certainly not be regarded as satisfactory. The explanation is that yarn being a comparatively simple form of manufacture, any superiority British manufactures originally possessed in its production has now practically ceased.

**Exports of Woollen and Worsted Manufactures.**

Turning to the exports of woollen and worsted manufactures, the following table includes the same three countries as before, with the addition of the United States. As regards the last named, however, the figures include yarn as well as piece goods.

	United Kingdom.	Germany.	France.	United States.
	£1000.	£1000.	£1000.	£1000
'93 . . . . .	16,404	10,895	—	65
'94 . . . . .	14,911	9,335	—	155
'95 . . . . .	19,738	11,105	12,932	134
'96 . . . . .	18,269	10,780	11,766	183
'97 . . . . .	15,976	10,480	10,620	189
'98 . . . . .	13,700	10,055	8,914	218
'99 . . . . .	14,789	10,860	10,556	209
1900 . . . . .	15,682	11,790	9,089	260
1901 . . . . .	14,237	10,630	8,544	309
1902 . . . . .	15,261	13,345	8,810	302
1903 . . . . .	15,864	14,073	8,735	344

Here again the British have a superiority, but here also of later years the Germans are running them more and more closely in the race—though a considerable portion of their gain so far has been at the expense of France. United States exports have improved largely in percentages, but are still on a small scale, as the high duties on wool and all classes of

machinery hamper the export trade very considerably. It will be noticed that in nearly all the countries considerable fluctuations occur from year to year, and this leads to an important point which deserves emphasis—that this trade largely depends upon fashion as well as on the cost of the raw material. With all allowances, however, it would appear as if British manufacturers were not adequately holding their own against foreign competitors. The Germans have shown great ability for a great many years past to produce cheap goods with a good appearance, and it is this fact, no doubt, which has largely enabled them to develop their export trade. The speciality of France in this branch of manufacture is the production of very high-class goods, the demand for which is, on the whole, of decreasing quantity. British superiority is in medium qualities, and this is fairly well maintained, though there is no reason why more should not be done in other directions. It will be noticed that British export figures were largest in '95 and '96, and the subsequent diminution is largely due to the adoption of the Dingley Tariff in the United States in '97, which imposes such heavy duties on woollen and worsted goods as largely to destroy a profitable export trade which British exporters had previously carried on there.

**III. THE JUTE INDUSTRY.**

The supplies of jute are mainly derived from India, and though the crop of course varies from year to year, there are no points connected with it which need special mention. As giving some indication of what the supplies are, the following table will be found of interest:—

**Jute Shipments from Calcutta to Europe.**

Year ending July 31st.	Bales.
'97-8 . . . . .	3,504,474
'98-9 . . . . .	2,295,290
'99-1900 . . . . .	2,065,580
1900-1901 . . . . .	2,916,594
1901-2 . . . . .	3,472,490
1902-3 . . . . .	2,773,621
1903-4 . . . . .	3,186,000

As regards manufactures of jute, they form one of the smallest textile industries in the United Kingdom. As will be seen from the following table, Great Britain has an immense superiority over the only important European rival, France; but here again it is hardly satisfactory that while British shipments tend on the whole to decrease, those of France are growing in magnitude.

**Exports of Jute Yarn and Manufactures.**

	United Kingdom.	France.

## IV. THE LINEN INDUSTRY.

The United Kingdom does a satisfactory export trade in linen goods, the industry in the north of Ireland being particularly important, and the business tends on the whole to increase. The chief rival is France, whose trade is now much larger proportionately than it was a few years ago, though it is still insignificant as compared with British trade.

**Thames Conservancy.** The Conservators of the River Thames were constituted a body corporate by Act of Parliament in 1857, and their powers enlarged by various Acts from time to time. Their general jurisdiction extends over the entire waterway and foreshores of the river, and their powers are:—(1) The maintenance and improvement of the navigation; (2) the administration and control of the Harbour and the provision of moorings for vessels frequenting it; (3) the control of the explosives, petroleum, and carbide of calcium traffic, and of the fisheries of the river; (4) the prevention of pollution over practically the entire watershed of the river; (5) the preservation of the non-tidal part of the river as a place of recreation, and the control of the pleasure navigation. In '94 an Act was passed to amend the constitution of, and consolidate, amend, and extend the statutory powers of the Conservators, to make further provision for the preservation and improvement of the river for purposes of navigation for profit and pleasure, and as a source of water supply for the Metropolis and the suburbs thereof, and for other purposes. All the provisions of the existing law as to rights of navigation, removal of obstructions, piers and landing-places, beacons and lights, pleasure-boats, steam launches, houseboats, etc., are re-enacted, and in some cases strengthened, and power to dredge as far as the Nore is conferred. No further powers of taking water from the Thames than might previously be legally exercised are given by the Act to the Water Companies; but they are to contribute an additional amount to the sums formerly paid by them. The constitution of the Conservators consists of the following thirty-eight members: The County Councils of Middlesex, Surrey, Kent, Essex, Oxfordshire, Berks, Bucks, and Herts each appoint one Conservator; the Gloucestershire and Wilts County Councils jointly appoint one; the County Boroughs of Oxford, Reading and West Ham each appoint one, and the Metropolitan Water

Board, one, the Admiralty two, the Board of Trade two, Trinity House two, shipowners three, owners of sailing barges, lighters, and steam tugs two, dock-owners one, wharfingers one, Corporation of London six, and London County Council six. The Secretary of the Conservancy is Mr. R. Philipson, and the offices are on the Victoria Embankment, near Blackfriars Bridge, E.C. See also LONDON, PORT OF.

**Tittoni, Signor**, appointed Italian Foreign Minister in Nov. 1903, is the son of an Italian exile who fled from the Papal States in 1859 to England, and remained there till the Italian troops entered Rome. Signor Tittoni had never held Ministerial office till 1903, but had filled the office of President of the Provincial Council of Rome with credit, and took office with a good reputation. He is a member of the Right. He came to England with the King of Italy in Nov. 1903, and was appointed an Hon. G.C.V.O.

**Tolstoi, Count Lyof Nikolaivitch**, usually called Count Leon Tolstoi, the most eminent living Russian novelist, was b. Aug. 28th, 1828, at Yasnaya Poliana, in the government of Toula, where he still lives. Entered the army when 23, served in the Caucasus and at Sebastopol. First made literary reputation by his vivid sketches from Sebastopol. Leaving the army soon after the close of the Crimean war, he devoted himself to literature. His "War and Peace," a tale of the invasion of Russia by Napoleon in '12, is regarded by Russians as his masterpiece; but his "Anna Karenina," which appeared in '76, is better appreciated abroad. "The Cossacks" is another admirable work. He has written much on education, and published many short tales and reminiscences of childhood and youth. Latterly he has devoted himself to religious teaching. He makes "Resist not evil" the keystone of the Christian faith, and insists that the literal interpretation of the Sermon on the Mount is the only rule of the Christian life. His religious views are set forth in "Christ's Christianity" and "My Religion." Translations of his "Kreutzer Sonata" appeared in '90. In Oct. '92 he deposited his Memoirs and Diaries with the Curator of the Rumyantsov Museum on the condition that they should not be published till ten years after his death. In November he legally made over his whole fortune, including his real and personal estate, to his wife and children. He married in '61, and has nine children living. During '93 he wrote "The Kingdom of God Within Us," an important work on the social question; in '94 a powerful criticism of the Franco-Russian alliance, entitled "Patriotism and Christianity," appeared; and in '95 "The Four Gospels Harmonised and Translated" by himself. He was excommunicated by the Holy Synod in 1901.

## TRADE, BOARD OF.

The first Committee for Trade appears to have been appointed in the year 1622, during the reign of James I. It was reconstituted by Charles I., and held meetings from time to time from 1625 to 1640. During the Commonwealth the Council of State, which was constituted in 1649-50, passed a resolution directing "the whole Council or any five of them to be a Committee for Trade and Plantations." In 1660 Charles II. instituted a Council

for Trade and another Council of Foreign Plantations. These were amalgamated in 1672, but in 1675 their duties were transferred to the Privy Council. In 1695, under William III., and from time to time afterwards, the Council was revived; but on the motion of Burke it was abolished in 1782. In 1786 a permanent Committee was formed under an Order in Council, which still regulates the legal constitution of the Board. Acts have since been passed making the salary of the President (Rt. Hon. Gerald Balfour, M.P.), £2000 a year, and of the **Parliamentary Secretary** (Mr. A. Bonar Law, M.P.), £1200 a year. There is also a **Permanent Secretary** (Sir Francis Hopwood, K.C.B., C.M.G.). The working of the Department is now assimilated to that of the other great offices of State, its work being done by the President aided by a permanent staff. The work of the Department—which has enormously increased since 1786, by the growth of joint stock companies, the establishment and development of railways, the increase in shipping, and other industrial developments, which have imposed new administrative duties upon it—is divided amongst several departments, as follows:—

**Bankruptcy Department.** (Inspector-General, Edward Hough.) This was constituted in '83, in consequence of the Bankruptcy Act, '83. It is under an Inspector-General, whose duties are described in the separate article on BANKRUPTCY (p. 40).

**Commercial, Labour, and Statistical Department.** (Comptroller-General, H. Llewellyn Smith, C.B.) This Department gives advice to other Government Departments upon commercial matters, and prepares annually the Statistical Abstract for the United Kingdom, the Statistical Abstract for the Colonies, the Statistical Abstract for Foreign Countries, Returns relating to Foreign and Tariffs, and the Digest of Colonial Statistics. It supervises the monthly and annual trade accounts, and with the assistance of other Departments, prepares monthly and annual accounts of shipping and navigation, railway statistics, cotton statistics, emigration statistics, and alien immigration statistics. It edits the *Board of Trade Journal* of tariff and trade notices, instituted in July '86. The **Commercial Intelligence Branch** of this Department, which is located at No. 73, Basinghall Street, E.C., was established in '99 to provide the public with accurate information on tariff and trade matters. An Advisory Committee for the purpose of advising the Board on the work of the Commercial Intelligence Branch, has been appointed, with Mr. G. J. Stanley, of the Commercial Department of the Board of Trade, as secretary. The Imperial Institute (*q.v.*) is now a branch of this department. Through the Labour Department this Department collects and publishes statistics of wages ours of labour, the state of the labour market, and condition of the working classes, and publishes the monthly *Labour Gazette* and annual statistical reports on trade unions, strikes and lock-outs, and labour subjects generally. It is concerned with the administration of the Conciliation Act, '06, for the prevention and settlement of labour disputes.

**Companies Department.** (Comptroller, G. S. Barnes.) This is a new department.

It administers the Companies (Winding-up) Act, 1890, and Acts amending the same. It also carries out the duties connected with the Joint Stock Companies Acts, the Newspaper Law of Libel Act, and considers applications for charters from commercial companies. The Joint Stock Companies' Registry Office (Registrar of Joint Stock Companies, H. F. Bartlett, I.S.O.), is under this Department.

**Railway Department.** (Assistant-Secretary, Colonel Sir Herbert Jekyll, K.C.M.G.) This Department, formed in '40, inspects railways and their works before they are opened for public traffic, inquires into railway accidents, investigates complaints as to the hours of work of railway servants, approves byelaws of railway and canal companies, authorises the construction of railways and the raising of additional capital, considers and confirms provisional orders granted by the Light Railway Commissioners, grants provisional orders authorising tramway undertakings, issues regulations controlling steam, electric, and other forms of mechanical traction, and approves byelaws made by tramway undertakers. It also performs various duties under the Copyright Acts, reports to Parliament under the standing orders on the proposals in Bills with regard to level crossings on railways, and the tolls, rates, and charges on railways, tramways, and canals, etc., and prepares annual and special returns connected with these undertakings. Under this Department is the **Standards Department**, transferred from the Exchequer in '66, which tests and examines weights and measures used in trade and for scientific purposes, keeps the standards of weight and measurement at the **Standards Office**, 7, Old Palace Yard, and performs various duties under the Coinage Act, '70, the Sale of Gas Act, '59-60, and the Petroleum Act, '70.

**Marine Department.** (Assistant-Secretary, Walter J. Howell, C.B.) The business of this Department, created in '50, mainly consists of the administration of the **Merchant Shipping Act '94**, which consolidated all previous legislation relative to merchant shipping. These duties are of a varied and important character: amongst others, the detention and survey of unseaworthy ships, the examination of masters, mates and engineers, investigation into shipping casualties, engagement and discharge of seamen through the **Mercantile Marine Offices**, and supervision of the rocket life-saving apparatus on the coasts of the United Kingdom. It prepares Parliamentary returns, and publishes the Annual Wreck Register. A Sub-Department is the **General Register and Record Office of Shipping and Seamen** (Carlisle Place, Westminster, S.W.), and the Registrar-General of Shipping and Seamen is charged with special duties as to the registration of ships; the issue of certificates to officers in the mercantile marine, the custody of official logs, etc., and also performs certain duties in connection with the Royal Naval Reserve.

**Harbour Department.** (Assistant-Secretary, Hon. T. H. W. Pelham.) This was originally a subdivision of the Marine Department, but now exists separately. It has charge of the foreshores belonging to the Crown, and sees that no injury is done to navigable harbours and channels; it manages the harbours at Holyhead and Ramsgate, shares

with the Finance and General Department the control of the lighthouse funds of the Trinity House, the Commissioners of Northern Lighthouses, and the Commissioners of Irish Lights, and manages all Colonial lighthouses in the hands of the home Government. It deals with questions affecting wreck and salvage, foreign lighthouses, pilotage, and navigation. It considers applications for loans of public money for shipping purposes, makes provisional orders under the General Pier and Harbour and Pilotage Acts, examines and reports upon private Bills affecting tidal waters, and gives notice to British shipping of all foreign quarantine regulations. Since '96 it has dealt with applications for electric lighting provisional orders, and licences authorising the supply of electrical energy under the provisions of the Electric Lighting Acts, '82-90. It grants provisional orders authorising gas and water undertakings, controls matters connected with the Metropolitan Gas Companies and prepares returns relating to gas companies.

#### **Finance and General Department.**

(Assistant-Secretary, Sir T. W. P. Blomefield, Bart., C.B.). This Department was established in '51, and prepares the annual estimates for Parliament, manages the General Lighthouse Fund and the Ramsgate Harbour Fund, deals with variations of light dues, and controls the expenditure of the various lighthouse authorities. The accounts of the whole Board of Trade establishment and its subordinate offices are kept and examined, and prepared for the Exchequer and Audit Office by this Department. It also deals with the Merchant Seaman's Fund, pensions to merchant seamen from Greenwich Hospital Fund, seamen's savings banks, the transmission of seamen's wages both at home and abroad, the issue and payment of seamen's money orders, the wages and effects of deceased seamen, and the relief of distressed seamen. It receives, examines, and presents to Parliament the accounts of life assurance companies, and to it have been assigned the arrangements necessary for the receipt and payment of moneys in connection with the Bankruptcy Estates Account, under the Bankruptcy Act, '83, and the Companies (Winding-Up) Act, '90. It also performs various duties under the Patents, Designs and Trade Marks, Merchandise Marks, and Art Unions Acts. Under this department are the Patent Office (Comptroller-General of Patents, Designs and Trade Marks, C. N. Dalton, Esq., C.B.).

### **TRADE REVIEW OF 1904.**

In the 1904 edition, on pp. 226-233, there appeared an article discussing in considerable detail the broad trend of British foreign trade movements over a series of years, particularly in relation to foreign competition, and to the suggestion of a closer commercial union between Great Britain and her colonies. It is unnecessary to repeat the elaborate tables previously given, but it is of interest to see what the tendency of trade of recent years has been, as regards foreign countries, and our Colonial possessions. The nature and distribution of British imports and exports from this point of view is a matter of great importance, it need hardly be said.

#### **Sources of British Imports.**

Taking imports first, the following table shows the sources of our imports in the years named:—

Imports from	1899.	1901.	1903.
	(£1000)	(£1000)	(£1000)
Russia . . . . .	18,711	21,904	30,933
Scandinavia (including Denmark) . .	27,787	29,792	32,862
Germany . . . . .	30,123	32,207	34,533
Holland . . . . .	32,473	32,872	34,974
Belgium . . . . .	22,862	24,666	27,792
France . . . . .	53,001	51,213	49,347
United States . . . .	120,081	141,015	122,113
South and Central America . . . . .	22,629	26,019	35,199
Other countries . . . .	52,539	56,728	61,176
<b>Foreign Total . . . .</b>	<b>378,206</b>	<b>416,416</b>	<b>428,929</b>
British India . . . .	27,740	27,392	32,305
Straits Settlements and Ceylon . . . .	10,945	10,589	10,247
South Africa . . . .	6,077	5,132	5,795
Australia . . . . .	23,622	24,218	17,058
New Zealand . . . .	9,697	10,595	13,454
Canada . . . . .	20,206	19,855	26,669
Other possessions . . .	8,539	7,793	8,143
<b>Colonial Total . . . .</b>	<b>106,829</b>	<b>105,574</b>	<b>113,671</b>
<b>Grand Total . . . . .</b>	<b>485,035</b>	<b>521,990</b>	<b>542,600</b>

Roughly four-fifths of the imports of the United Kingdom come from foreign countries, and by far the largest single source of supply is the United States, which furnishes so much of the British food-supply. Treating Germany, Holland, and Belgium as a unit for trade purposes—since it is impossible to distinguish accurately between them, a large quantity of imports from Germany being shipped from Belgian and Dutch ports—they form the second largest foreign source of supply.

As regards supplies received from British possessions the improvement in 1903 in the case of India was mainly due to a better harvest in that country, while the decline in the case of Australia was due to the effects of drought. It is satisfactory to notice that, as regards Canada, a very marked increase was shown in 1903, and the 1904 figures seem likely to prove at least as good, as in both years the harvest in the Dominion was excellent.

#### **Destination of British Exports.**

As regards British exports it will be noticed that the shipments to foreign countries show but little variation, and they have not indeed expanded in a marked way even as compared with 1890, in which year the total was nearly £234,000,000. As regards British possessions, however, the movement since 1899 has been distinctly in an upward direction.

Looking at the export trade as a whole, two-thirds of it are seen to be done with foreign countries and one-third with British possessions, chiefly India, Australasia, and South Africa—though the figures in the last-named country for 1903 were abnormally high, owing to special

circumstances. The figures on the same basis as those for imports are as follows:—

Exports to	1899.	1901.	1903.
	(£1000)	(£1000)	(£1000)
Russia	16,139	14,211	16,164
Scandinavia (including Denmark)	14,314	13,521	12,976
Germany	37,978	34,221	34,516
Holland	14,044	13,744	14,040
Belgium	14,587	12,625	12,747
France	22,277	23,701	23,147
United States	34,975	37,651	41,605
China and Japan	15,419	15,097	11,635
Central and South America	21,340	21,629	25,054
Other countries	44,222	48,346	49,005
<b>Total foreign</b>	<b>235,285</b>	<b>234,746</b>	<b>240,889</b>
British India	31,968	35,746	35,320
Straits Settlements and Ceylon	4,124	4,877	4,712
Australasia	24,740	22,582	25,084
South Africa	12,209	18,939	27,011
Canada	8,323	9,250	12,744
Other possessions	12,886	14,724	14,613
<b>Total British possessions</b>	<b>94,250</b>	<b>113,118</b>	<b>119,484</b>
<b>Grand total</b>	<b>329,535</b>	<b>347,864</b>	<b>360,373</b>

### Percentages of Exports to Various Countries.

Exports to	1892.	1903.

<b>Grand total</b>	<b>100'0</b>	<b>100'0</b>

### SOURCES OF THE UNITED KINGDOM'S FOREIGN TRADE.

By way of following the movement rather more in detail, both imports and exports are here classified into categories.

#### Imports from Foreign Countries and British Possessions.

### Percentages of Imports from Various Countries.

As a supplement to the above tables it is interesting to see whether, for a considerable period of time, the imports and exports from various sources show much change. The following tables show the variations over a period of eleven years:—

Imports from	1892.	1903.
Russia	3'6	5'7
Scandinavia (including Denmark)	4'7	6'1
Germany	6'1	6'5
Holland	6'8	6'5
Belgium	4'0	5'1
France	10'3	9'1
United States	25'5	22'3
Central and South America	3'8	6'5
Other countries	12'2	11'3
<b>Total foreign</b>	<b>77'0</b>	<b>79'1</b>
British India	7'2	5'9
Straits Settlements and Ceylon	2'2	1'9
South Africa	1'2	1'1
Australia	5'4	3'1
New Zealand	1'8	2'5
Canada	3'3	4'9
Other possessions	1'9	1'5
<b>Grand total</b>	<b>100'0</b>	<b>100'0</b>

	1899 £1000.	1901 £1000.	1903 £1000.
<b>Food-stuffs, etc.</b>			
From foreign countries	166,964	183,274	181,677
From British possessions	43,377	41,488	50,608
<b>Total</b>	<b>210,341</b>	<b>224,762</b>	<b>232,285</b>
<b>Raw Materials and Articles mainly unmanufactured.</b>			
From foreign countries	100,957	118,472	124,997
From British possessions	49,665	48,728	48,513
<b>Total</b>	<b>150,622</b>	<b>167,200</b>	<b>173,510</b>
<b>Articles wholly or mainly manufactured.</b>			
From foreign countries	108,254	112,450	120,444
From British possessions	13,334	14,980	14,120
<b>Total</b>	<b>121,588</b>	<b>127,430</b>	<b>134,564</b>
<b>Miscellaneous.</b>			
From foreign countries	1,958	2,110	1,811
From British possessions	526	488	430
<b>Total</b>	<b>2,484</b>	<b>2,598</b>	<b>2,241</b>
<b>Summary.</b>			
From foreign countries	378,133	416,305	428,929
From British possessions	106,902	105,685	113,671
<b>Grand Total</b>	<b>485,035</b>	<b>521,990</b>	<b>542,600</b>

It will be seen that more than 40 per cent. of British imports consists of food-stuffs, and here the proportions have not greatly varied during the period covered by the table. Three-fourths of the supplies are derived from foreign countries, and there is no present sign that the proportion will be materially altered.

The same is true of the second category—raw materials and articles mainly unmanufactured. Indeed, in this case receipts from British possessions show a little downward tendency, while there has been an improvement of 24 per cent. with regard to manufactured articles and to the goods classed as miscellaneous.

On the whole it will be seen that though British imports are steadily increasing, the proportion derived from British possessions is not increasing at anything like the same rate.

### **Exports of Home Products to Foreign Countries and British Possessions.**

As regards exports the table on the same lines is as follows:

	1899 £1000.	1901 £1000.	1903 £1000.
<b>Food-stuffs, etc.</b>			
To foreign countries	6,420	6,829	7,876
To British possessions	6,452	8,777	8,501
<b>Total</b>	<b>12,872</b>	<b>15,606</b>	<b>16,377</b>
<b>Raw Materials and Articles mainly unmanufactured.</b>			
To foreign countries	26,271	32,963	32,386
To British possessions	2,489	3,336	2,993
<b>Total</b>	<b>28,760</b>	<b>36,299</b>	<b>35,379</b>
<b>Articles wholly or mainly manufactured.</b>			
To foreign countries	142,070	132,964	136,970
To British possessions	77,521	90,859	97,818
<b>Total</b>	<b>219,591</b>	<b>223,823</b>	<b>234,788</b>
<b>Miscellaneous.</b>			
To foreign countries	2,065	2,393	2,421
To British possessions	1,203	1,900	1,835
<b>Total</b>	<b>3,268</b>	<b>4,293</b>	<b>4,256</b>
<b>Summary.</b>			
To foreign countries	176,827	175,148	179,653
To British possessions	87,665	104,874	111,147
<b>Grand Total</b>	<b>264,492</b>	<b>280,022</b>	<b>290,800</b>

Raw materials exported consist mainly of coal, the shipments of which are for geographical reasons very small as regards the Colonies.

Articles wholly or mainly manufactured, which comprise nearly four-fifths of British exports, constitute the category which is of most interest here. It will be seen that while the shipments to foreign countries tend in a downward direction, those to British possessions

show a considerable increase. The trend of the export trade is decidedly in a Colonial direction, and it will probably not be many years before the shipments thither equal those to foreign countries. So far as manufacture goods are concerned, the summary shows the broad features of the growth, which is from all points of view significant.

### **TRADE MOVEMENTS, 1904.**

The broad features of trade in 1904 were comparative depression in the earlier months with an improved tendency later. The record is on the whole not very satisfactory, in view of the improved economic position of Australia and India, and of the prosperity which has been ruling in South America. There seems, however, but little doubt that an upward movement is in progress, which it must be borne in mind is not immediately indicated by the monthly figures. Orders are placed on the average about a quarter of a year before the figures in the Board of Trade Returns, so that the statistics say for June do not really indicate the state of business in that month, but what it was in the previous March.

Month.	Exports (Home Products only).		
	1902 (£1000.)	1903 (£1000.)	1904 (£1000.)
January	24,269	24,904	24,000
February	21,312	22,775	23,800
March	22,217	25,108	24,250
April	23,493	23,136	23,480
May	22,832	24,327	24,330
June	21,252	22,272	24,000
July	20,029	25,876	24,780
August	24,300	25,665	26,300
September	23,796	23,310	25,940
October	25,135	25,861	25,440
November	24,048	23,033	26,110
December	24,205	24,612	28,070
<b>Totals</b>	<b>283,488*</b>	<b>290,890*</b>	<b>300,600</b>

\* Totals as given officially after adjusting the monthly returns.

Month.	Imports.		
	1902 (£1000.)	1903 (£1000.)	1904 (£1000.)
January	50,142	46,227	45,920
February	41,681	40,501	44,100
March	40,898	46,915	48,600
April	46,200	43,802	45,100
May	43,354	41,915	44,700

December	48,170	52,319	52,840
<b>Totals</b>	<b>528,932*</b>	<b>542,806*</b>	<b>551,380</b>

\* Totals as given officially after adjusting the monthly returns.

**Coal.**

As regards the home demand there were few features of special interest. It was not very trying throughout the greater part of the year, owing to dullness in the manufacturing industries, especially that of Lancashire. No serious labour disputes occurred, but there was a certain amount of unrest in this respect.

As regards exports, the growth in the shipments to which attention was directed in the 1904 edition continued. The exports for the last three years have been as follows:—

1902 . . . . .	27,581,000
1903 . . . . .	27,262,000
1904 (ten months) . . . . .	22,471,000

This is a very considerable increase over the record, even of ten years ago. For 1893, for instance, the total exports did not much exceed 14,000,000. The problem raised in this connection is one of importance. Such large exports are inevitably exhausting the home supplies of coal, and so hastening the time when British commercial supremacy will be materially threatened. On the other hand, any arbitrary interference with the course of British trade abroad would bring serious evils of its own, which might seriously affect British industries generally.

A feature of the exports, which is often lost sight of, but which is prominently brought home by the new classification adopted in the official statistics, is that about three-quarters of the coal exported consists of steam coal, for the use of vessels. By thus supplying a large proportion of the world's commercial marine, the United Kingdom not only secures profits for its coal owners, but enables many British ships to take coal as ballast, and so charge lower rates than their foreign competitors. It is not worth while to discuss this class of exports by their nominal destination, as the countries to which the coal is consigned afford little indication of the nationalities actually using the coal. France, Germany, and Italy, are the best customers, but the coal sent to the ports of these countries is distributed among vessels of all nationalities.

**Copper.**

As for some years past, the copper market has largely been dominated by that big combination, the American Copper Company, which controls two-thirds of the production of the United States. It withholds information as to stocks which it possesses, and therefore the statistical tails are not easy to arrive at. The course of prices throughout 1904, however, was a pretty steadily upward one, though there was some reaction in December. Consumption again began to increase, as the shipbuilding and other industries became more active, and the price of G.M.B. at the end of November was 16 15s. per ton as compared with £56 12s. 6d. at the end of 1903.

The imports of unwrought and partly wrought copper showed a considerable increase in 1904, the total for the first eleven months being 502 tons, as compared with 57,553 tons during the same period of 1903.

**Cotton.**

1904, and especially the earlier part of it, was the most extraordinary year in the cotton trade. At the end of 1903 it was obvious that supplies were quite inadequate for the requirements

of the manufacturers of the world, and the shortage became acute in the early part of 1904. Speculators had taken advantage of the position to secure the control of supplies, and hence even the high prices ruling at the end of 1903 were surpassed early in 1904. The outbreak of the war between Russia and Japan stimulated the upward movement, and by the end of January Middling Upland stood at 8'36d. per lb. as compared with 7'40d. at the beginning of the month.

In February the market was in a demoralised and excited condition, but on the whole the tendency of prices was downward, mainly owing to rumours of difficulties between the leading bull operators in America.

In the early part of March there was another advance, but on the 18th of that month Mr. Sully, the chief American bull, unexpectedly announced that he was compelled to suspend payment, and the gamble was practically over.

With fluctuations prices then gradually declined as the year went on, and the price of Middling Upland in the middle of December was only 4'28d.

During the early part of the year an unprecedented amount of short time was run by the Lancashire mills, and great suffering and inconvenience were caused. Later, however, there was a strong reaction, and great activity prevailed in the manufacturing industry.

The outlook for 1905 is fairly satisfactory, as supplies are not likely greatly to exceed the consumptive requirements, but will probably be sufficient to meet them—that is, if the American crop reaches its expected total of 11,500,000 bales, which some authorities think may be exceeded.

As regards the general outlook for cotton supplies, the efforts which are being made to increase its production in various parts of the world, and the growth of the manufacturing industry on the Continent and in the United States, detailed particulars are given under the heading TEXTILE INDUSTRIES, on pp. 712–718.

As regards British exports, they of course suffered greatly during the period of scarcity, but afterwards recovered to such an extent that the diminution earlier in the year was made up. Shipments of yarn and twist show an increase, amounting for the first eleven months of 1904 to 146,933,700 lbs. as against 135,275,900 lbs. in the same period of 1903. Germany is still the most important customer, and the shipments to that country have been considerably larger owing to the activity of trade there. India's requirements also show a decided increase.

In Piece-goods the total for the first eleven months of 1904 was 5,031,253,800 yds. as compared with 4,738,661,700 yds. during the same period of 1903, and owing to the high level of prices ruling, the increase in values is considerably greater. About three-sevenths of the shipments are to British India, and the requirements of that country, owing to its improved economic position, were larger than in 1903. The next largest customer is China, which also bought more freely in 1904. There was a considerable falling off in the shipments to Japan, owing to the war, and also in the requirements of Australia, while exports to the United States also showed a decided diminution.

Shipments of cotton hosiery showed a marked increase, but those of sewing thread were on a limited scale.

### Iron and Steel.

Speaking generally, the iron and steel trades were depressed during 1904, neither the home nor the foreign demand showing much activity. Shipments to the United States in particular were reduced to a very low level, and the pig-iron industry, especially in the Cumberland district, was greatly depressed. There was no increase of dumping, as was freely anticipated in some quarters; as American and German manufacturers adopted the obvious course in times of depression, and reduced their output. Indeed, there was some attempt to regulate, by means of international understanding, the world's production and the course of prices.

It is not dumping which is the serious feature in the iron and steel situation, but the prospect of a great increase of American competition in neutral markets, a prospect which seems now not far from realisation, as the iron trade is again becoming active in the United States. On the other hand, British producers have done a very great deal during the past few years to modernise plant, and so prepare themselves for the emergency.

Pig-iron prices have been fairly steady throughout the year, with an upward tendency on the whole. British imports were slightly larger than in 1903, but much less than in 1902. The chief country which sends pig-iron to the United Kingdom is Sweden.

Exports show a considerable diminution, the total for the first eleven months of 1904 being 752,576 tons as compared with 1,011,192 tons in the same period of 1903. Germany is still the most important customer, and bought rather more freely, but shipments to the United States fell off from 322,836 tons to 51,385 tons. Italy, Holland, and Belgium were much better customers.

In railway material there was also a considerable decline, the total for the first eleven months of 1904 being 594,361 tons as compared with 679,103 tons in the same period of 1903. There was a considerable diminution in the supplies sent to South Africa and Australia. On the other hand, India and the Argentine Republic proved better customers.

Galvanised sheets were more largely exported, and there was an improvement in tin plates, especially as regards shipments to the United States, which is still Great Britain's best single customer.

In cutlery, trade was at about the same level as in 1903; while South Africa took less from us, and shipments to the United States slightly decreased, the requirements of most other countries were larger.

In hardware there was a very great improvement, exports being almost doubled; this was largely due to an improved demand from India.

As regards machinery the figures of 1904 were on the whole satisfactory. Exports of Locomotives showed some decline, in spite of a great increase as regards South American countries. Here again, however, there was a great diminution in the case of South Africa.

In Agricultural machinery a decidedly better trade was done, the total for the first eleven months of 1904 being £984,525 as compared with £898,792 during the same period of 1903. Five-eighths of this trade is done with countries in Europe, which are proving increasingly better customers.

In sewing machines British manufacturers have more than held their own, while the exports of mining machinery have expanded, this being one of the few items in which an increase is registered to South Africa.

The figures for textile machinery show an improvement, and altogether there is no present sign that Great Britain is losing its hold of the world's trade in this important department.

As regards cycles, the exports show a decline, attributable less to foreign competition than to a lessened demand for these articles all the world over, and the imports shrank to quite insignificant proportions.

### Sugar.

Prices of beet, and other classes of sugar, had a decidedly upward tendency during 1904. While at the end of November 1903 the quotation for 88 per cent. beetroot was 8s. 4½d. per cwt., it was as much as 13s. 9d. per cwt., on Nov. 30th, 1904. A somewhat heated controversy has arisen as to whether this serious rise has been occasioned by the Sugar Convention, and it is therefore of interest to summarise the facts of the situation and the contentions of the disputants.

The statistical position is undoubtedly adverse to the interests of consumers. Thanks to a dry summer on the European continent, the supplies from this source will undoubtedly be defective during the current season. Originally estimated at about 5,700,000 tons for 1904-5, it is now admitted, that they will barely reach 5,000,000 tons. Supplies from other quarters will probably show improvement, but certainly there will be a severe shortage. The position as regards production over a period of four years is shown in the following table:—

#### World's Production of Sugar.

Year ending	Europe.	Elsewhere.	Total.
Sept. 1st.	tons.	tons.	tons.
1902 .. ..	6,720,000	4,244,000	10,964,000
1903 .. ..	5,570,000	4,342,000	9,912,000
1904 .. ..	5,852,000	4,551,000	10,403,000
1905 (estimated)	4,950,000	4,782,000	9,732,000

As the world's normal consumptive demand is at least 11,000,000 tons, and probably more, it is evident that a considerable shortage must be experienced in 1904-5, especially as stocks are low. According to Mr. Czarnikow the world's visible supply on Dec. 1st, 1904, was only 1,657,349 tons, as compared with 2,326,903 tons on the same date in 1903, and 2,161,501 tons on Dec. 1st, 1902. Hence there can be no doubt that high prices will persist for some time.

Those who contend that the advance is due to the Sugar Convention, and is therefore likely to be more or less permanent, base their contention largely on the fact that the rise here has been accompanied by a fall in the old bounty countries, leading to increased consumption there, and so narrowing our sources of supply. They urge further that supplies from outside sources are growing very slowly, and that we are absolutely debarred from obtaining any from such countries as Russia, which are outside the Convention.

Others maintain that the present shortage is due to drought merely, that cultivation of beetroot on the Continent is not declining, and that had the present position occurred in the

bounty days, advantage would have been taken of it by the Cartels to force up prices to a still higher figure than that at which they stand at present. They maintain that the operation of the Convention will result in time in so greatly increasing the world's production as a whole as to lead to a steady era of low prices. This is the present position of a very interesting and important economic controversy.

As regards the trade of the United Kingdom in 1904, imports of refined sugar seriously declined, but those of unrefined showed an increase, as was to be anticipated under the circumstances. Particulars for the last four years are as follows :

Imports.			
First ten months.	Refined. cwts.	Unrefined. cwts.	Total. cwts.
1901 ..	16,380,645 ..	10,554,132 ..	26,934,777
1902 ..	15,675,429 ..	11,146,689 ..	26,822,118
1903 ..	16,197,690 ..	10,490,532 ..	26,688,222
1904 ..	14,291,745 ..	12,038,464 ..	26,330,209

The exports of confectionery, jam, etc., of which sugar is an important component, contrary to expectation, showed a very decided improvement as regards quantity, but we are practically stationary in the matter of values.

Exports of Confectionery, Jam, etc.			
Year	cwts.	£	
1900 .. ..	276,248 .. ..	606,867	
1901 .. ..	339,251 .. ..	749,572	
1902 .. ..	335,228 .. ..	845,819	
1903 .. ..	219,931 .. ..	802,879	
1904 (11 months)	289,841 .. ..	750,870	

**Tea.**

The main factor in this market was the raising of the duty in the United Kingdom from 6*d.* to 8*d.* per lb., a severe blow to the Indian and Ceylon industries, which were just beginning to recover from a prolonged period of depression. It is satisfactory, however, to note that exports to countries other than the United Kingdom continue to show healthy growth, and are now nearly twice as large as four years ago. The greatest expansion was in the exports to North America and Russia, in both of which the demand for Indian tea has taken a firm hold and is steadily increasing.

The following figures, compiled by Messrs. Gow, Wilson & Stanton, show the recent development :—

Exports of Indian Tea to countries other than the United Kingdom.	
First nine months	lb.
1900 .. ..	12,681,268
1901 .. ..	13,946,920
1902 .. ..	17,401,736
1903 .. ..	20,418,800
1904 .. ..	24,667,916

As regards shipments to this country, the figures of home consumption over a long period of years are appended. It will be seen that the United Kingdom now derives so small a proportion of its total supplies from countries other than India and Ceylon that the possibility of their rules showing great expansion is slight, and this adds significance to the above figures as to the growing trade with outside markets.

Tea entered for Home Consumption.				
Yr.	China 1000 lbs.	India 1000 lbs.	Ceylon 1000 lbs.	Total 1000 lbs.
'59	76,304	None	None.	76,304
'69	101,080	10,716	None.	111,796
'77	132,263	27,852	None.	151,115
'85	113,514	65,678	3,217	182,409
'92	33,483	109,528	63,102	207,114
'95	26,201	118,343	74,024	216,568
'98	14,695	133,431	82,472	235,415
'01	9,825	147,960	90,825	235,873
'02	11,531	148,728	85,541	254,440
'03	14,956	150,781	78,493	255,366
'04*	*10,543	*142,895	*73,514	*237,170

\* 11 months only.

**Wool.**

Supplies of wool in 1904 were again deficient, consequent upon the very serious reduction in the flocks of sheep in Australia, owing to the drought. The quantities available were again small; and without going in detail into the movements of the six series of London sales, it may be said that the tendency on the whole was in the direction of firmness. How long this state of things will continue, it is of course impossible to foresee, but there are signs of an increase in the consumptive demand, and supplies must inevitably increase slowly. It seems probable on the whole, therefore, that prices will for the present remain fairly firm, though there is undoubtedly considerable difference of opinion on this point in expert circles.

The following table shows the annual imports of wool over a series of years :—

Imports into the United Kingdom.			
	Colonial. Bales.	Foreign. Bales.	Total. Bales.
1884 ..	1,285,641 ..	318,998 ..	1,604,639
1888 ..	1,534,343 ..	468,617 ..	2,002,960
1892 ..	1,765,904 ..	505,638 ..	2,271,542
1896 ..	1,674,873 ..	402,181 ..	2,077,059
1898 ..	1,556,388 ..	526,595 ..	2,082,984
1900 ..	1,223,733 ..	459,706 ..	1,683,439
1901 ..	1,598,986 ..	445,890 ..	2,044,876
1902 ..	1,443,981 ..	483,900 ..	1,927,881
1903 ..	1,312,588 ..	506,081 ..	1,818,669

**Woolens and Worsteds.**

1904 was not a favourable year for this branch of industry. The home demand was checked by undoubted want of purchasing power on the part of the community, while export trade was of a moderate character. British exports of woollen yarn are now quite unimportant, and in worsted yarn there was considerable falling off, the figures for the first eleven months of 1904 being 47,866,000 lbs. as against 53,005,000 lbs. during the same period of 1893. Germany is by far the best customer, taking nearly three-fourths of the total.

The demand for alpaca and mohair yarns was about stationary.

In woollen piece-goods there was distinct improvement, the total for the last eleven months of 1904 being 59,967,600 yds. as against 45,874,200 yds. in the same period of 1903. Most of Great Britain's principal customers, notably Belgium, Turkey, and China, bought more freely.

In worsted piece-goods, on the other hand, there

was a decline. During the first eleven months of 1903 95,930,100 yds. were exported, but during the same period of 1904 the total was only 93,147,100 yds. The largest customer for these goods is the United States, shipments thither and to Canada being less than in 1903, and the same may be said of Continental countries generally and of South Africa. On the other hand, the deliveries to Argentina, India, and Australia showed substantial improvement.

There was an increased demand for flannels, mainly owing to army contracts for shipment to the Far East. The carpet trade was stationary. About one-third of the total exports of carpets goes to Canada.

### TRAMWAYS.

The following details were given in the returns annually issued by the Board of Trade (Railway Department) as to the Street and Road Tramways and Light Railways of the United Kingdom. The returns are made up to June 30th in each year named.

In 1903 there were 142 undertakings belonging to Local Authorities, with 1068 miles of line open for traffic, and 154 to other than local authorities, with 704 miles open for traffic. The capital expended on the former was £24,465,484, and on the latter £17,191,113.

The growth of tramways since 1878 may be seen from the gradual rise in the number of miles open, which was 269 miles in '78, 948 miles in '90, 1305 miles in 1901, and 1772 miles in 1903.

The following comparative figures show the advance made from June 30th, 1902, to June 30th, 1903.

	Year ended June 30th, 1902.	June 30th, 1903.
Authorised Capital	£51,677,471	£66,665,770
Paid-up Capital	£29,896,793	£40,177,097
Capital expended	£31,562,267	£41,656,597
Miles open	1,484	1,772
Electric Traction	870	1,258
Horse	384	334
Steam, Cable, etc.	230	180
Horses employed	24,120	20,005
Loco Engines	388	334
Cars running	7,752	8,951
Gross Receipts	£6,679,291	£8,090,042
Working expenses	£4,817,873	£5,511,259
Net Receipts	£1,861,418	£2,578,783
Passengers carried	1,394,452,983	1,681,948,655

### TREASURY.

The Lord High Treasurer, who, when existing, is the third great officer of State, had of old the appointment of all officers employed in collecting the revenues of the Crown, the nomination of all escheaters, and the disposal of all plans and ways relating to the revenue; and power to let leases of Crown lands. This definition of his powers and duties still holds good, to a great extent, in regard to the Treasury Board; although the management of the Crown lands has long since passed into the hands of the Commissioners of Woods and Forests. The Treasury has control over the management, collection, and expenditure of the public revenue (see p. 184), and exercises a general supervision and control over all the public departments, and no increase of salaries or additions to or material changes in the civil establishments can be made without its authority. All exceptional cases in matters

of revenue are referred to it, and it settles all questions regarding the amount of compensations, allowances, and pensions to be awarded in exceptional cases. It audits the civil list, and is the accounting department to the House of Commons for a number of Civil Service Votes, including those for rates on Government property, secret service, criminal prosecutions, revising barristers, learned societies, suppression of the slave trade, subsidies to telegraph companies, and for temporary commissions.

Since the days of George I. the powers and duties of the office of the Lord High Treasurer have been invariably executed by Commissioners, consisting of the First Lord of the Treasury, the Chancellor of the Exchequer, and three Lords Commissioners, who are usually designated Junior Lords. The First Lord, if he fill that office only, has no share in the management of the department; but some minor duties, such as recommending for Civil List Pensions, appertain to his position. A number of appointments are in his gift, and he is an *ex-officio* trustee of the National Gallery and British Museum. For nearly eighty years prior to '85 the office of First Lord was invariably held by the Prime Minister of the day. The departmental duties of the three junior lords are almost nominal. The Patronage Secretary to the Treasury is principal Government whip (see p. 420). The commissioners forming the Treasury Board seldom if ever meet; and in fact the real work of the department is performed by the Chancellor of the Exchequer, who is its effective head, aided in matters of detail by the Financial Secretary, and the Permanent Secretaries, Sir Edward Hamilton, K.C.B., K.C.V.O., I.S.O., and Sir George Murray, K.C.B., I.S.O.

The Chancellor of the Exchequer sees that the estimates sent in by the spending departments are framed with due regard to economy, is made acquainted with the views of the revenue departments regarding probable receipts, and then prepares and introduces his Budget. Appointments in the National Debt Office are in his gift, and not only questions affecting public revenue and expenditure, but the National Debt, and the best methods of reducing it, and the advances made by the National Debt Commissioners for local loans, are all matters within his special cognisance. He is master of the Mint, and he presides at the nomination of sheriffs. Like the First Lord of the Treasury, he is provided with an official residence at Downing Street. In connection with the Treasury there is a Parliamentary Counsel who drafts Government Bills, and a Solicitor who acts for the Government in certain legal prosecutions, and is the Crown's nominee when His Majesty becomes entitled to the personal estate of an intestate, and administration is granted by the court; and who is also King's Proctor for Divorce Interventions and Director of Public Prosecutions.

Tree, Herbert Beerbohm, the actor, is the son of a grain merchant named Beerbohm, and was b. in London in 1853. Shortly after entering his father's office in '70 he became a member of the Irrationals Amateur Dramatic Club, and joined the profession in '77. His first hit was as the timid curate in "The Private Secretary," at the Prince of Wales's; and immediately after he played the grim spy Macari in "Called Back." Taking the Comedy Theatre ('87), he produced "The Red

Lamp"; and in the autumn of the same year took the Haymarket Theatre, where "Captain Swift," "A Man's Shadow," "The Village Priest," "Hamlet," "The Dancing Girl," "Hypatia," Mr. H. A. Jones' "The Tempter" (93), "A Bunch of Violets," "John-a-Dreams" (94), "Trilby" (95), and "Henry IV." (96) have been notable successes. In April '97 he opened his new theatre, His Majesty's, in the Haymarket. Here he has produced the greatest of his successes: "Julius Cæsar" (98), "King John" (99), "A Midsummer Night's Dream" and "Herod" (1000), "Twelfth Night" (1901), "The Merry Wives of Windsor," with Miss Ellen Terry and Mrs. Kendal in the cast, "Ulysses," "The Eternal City" (1902), "King Richard II.," "The Darling of the Gods" (1903), and "The Tempest" (1904). His wife, an admirable Greek scholar formerly connected with Queen's College, is a very refined actress.

**Trinity House, The**, although it existed without doubt much earlier as a voluntary association, was first incorporated in the year 1514, by King Henry VIII., who alluded to the Corporation as "the Shipmen or Mariners of this our Realm of England," one of the chief objects being the relief, increase, and augmentation of the shipping of the kingdom. In the present day the Trinity House exists in several capacities: (1) **As the General Lighthouse Authority** for England and Wales, the Channel Islands, and Gibraltar, it deals with the lighthouses, light-vessels, buoys, beacons, fog-signals, and removal of dangerous wrecks on our shores, exercising control over the local light authorities within their own area, as well as over the other general lighthouse authorities of the kingdom. There are **District Stations** at Blackwall, Sunderland, Yarmouth, Harwich, Ramsgate, Cowes, Penzance, Milford, Cardiff, Holyhead, Alderney, Guernsey, and Gibraltar. (2) **As the Chief Pilotage Authority** of the kingdom it has the management of all matters relating to pilots and pilotage in the London, English Channel, and certain other districts on our coasts. (3) **As an Ancient Corporation** it possesses estates and almshouses, and awards pensions and bounties to distressed mariners and their widows. (4) **As Nautical Advisers** two of the Elder Brethren in turn assist the Judges in the Admiralty Division of the High Courts of Justice in determining marine causes tried at law. The **Elder Brethren** consist of members of the Royal Family and statesmen (eleven in number), retired officers of high rank in the Royal Navy, and commanders in the mercantile marine (13 in number), as shown in the accompanying list:—**Master**, Vice-Adm. H.R.H. the Prince of Wales, K.G.; **Deputy-master**, Capt. Sir George Vyvyan, K.C.M.G.; **Elder Brethren**, H.M. King Edward VII., Capt. John Fenwick, Capt. James Bucknell Atkins, Capt. William Ladds, Admiral Sir F. Leopold M'Clintock, Capt. Arthur Edward Barlow, Right Hon. Lord George Hamilton, M.P., Rear-Admiral Hector B. Stewart, Right Hon. the Earl of Rosebery, Capt. Adolphus Edmund Bell, Right Hon. Viscount Goschen, Field-Marshal H.R.H. the Duke of Connaught and Strathearn, Capt. A. S. Thomson, C.B., Capt. A. W. Clarke, Capt. Robert Hoare, Capt. H. A. Blake, Right Hon. Joseph Chamberlain, M.P., Capt. Laurence Hugh Crawford, C.B., Right Hon. A. J. Balfour, M.P., Right Hon. the Earl of Selborne, Rear-Admiral H.S.H.

Prince Louis of Battenberg, G.C.B. **Secretary**, Mr. Arthur Owen. **Headquarters**, Trinity House, Tower Hill, London.

### TRIPLE ALLIANCE.

The Triple Alliance was concluded in consequence of the occupation in 1881 of Tunis by France (at the suggestion of Prince Bismarck), and the consequent isolation of Italy, who, feeling herself menaced by France, became a party to the then existing alliance for mutual defence between **Germany and Austria**. That Alliance, which was directed against Russia, whose Eastern policy was held to threaten the balance of power in Europe, was made in 1879 by a treaty arranged within one year after the Berlin Congress by Prince Bismarck and Count Andrassy, and confirmed in '80, and **Italy joined it in '82**. The three allied nations agreed to defend the integrity of their Continental possessions, as then and now existing, against any other or others of the great Powers. In **October '87**, after a meeting between Bismarck and Crispi at Friedrichsruhe, a still closer alliance in the nature of an offensive and defensive league between the three Powers was concluded. The terms of the treaty have never been officially published, but it has been stated that Italy agreed, under certain contingencies, the most probable of which was a war between France and Germany, to invade South-Western France with 200,000 men. During 1901 M. Henri des Houx professed to give a secret clause of the treaty, according to which Italy bound herself to place two army corps at the disposal of Germany in case of a war with France, sending them into Germany across Austrian territory. Count von Bülow, the German Chancellor, declared, however, in 1902, that "none of the partners to the Alliance was obliged by the Alliance to maintain its military or naval forces at a prescribed level"; and that the "Alliance did not exclude the possibility of good relations between its partners and other Powers." The Italian Government also gave assurances to France that in no case could Italy become either the instrument or the auxiliary of an aggression against France. One main object of the Alliance was the maintenance of the balance of power in the **Mediterranean**, an object which undoubtedly had the sympathy of Great Britain, though no formal pledge was entered into by the British Government. **France and Russia** in '87 had been for some time on friendly terms, and it was no doubt their *rapprochement* which led to the closer bond between the three Powers. In '91 Admiral Gervais took his fleet to Cronstadt, and began the series of visits interchanged between France and Russia which eventually led to the formal acknowledgment of the **Dual Alliance**, which has since confronted the Triple Alliance in Europe, and which, in a way, confronts another dual alliance, the **Anglo-Japanese Alliance** (see JAPAN), in Asia. In June '91 the Triple Alliance was formally renewed, and again in '96 until **May 6th, 1903**. On June 28th, 1902, the three Powers agreed to prolong the Alliance for a further term. The revelations made by Prince Bismarck in '96 as to the existence of a secret treaty of "benevolent neutrality" between Germany and Russia until '99, when Count Caprivi succeeded Prince Bismarck as Imperial Chancellor, caused much excitement in Austria and Italy, of course, but had no effect on the Alliance. In '96, also,

Roumania joined the Triple Alliance, which guaranteed her territorial integrity and the maintenance of the *status quo* on the Lower Danube.

The rapprochement between Italy and France, which had in Dec. 1901 become a complete and friendly understanding in regard to all questions affecting the Mediterranean and Italian interests in Tripoli, was sealed in 1903 by the visit of the King and Queen of Italy to President Loubet and by the conclusion of a treaty of arbitration between the two countries on Dec. 25th, 1903 (see p. 289). This *rapprochement* is bound to affect the attitude of the three Powers concerned towards the Triple Alliance; and Signor Prinetti, then Italian Foreign Minister, in fact admitted in 1902 that it had deprived some of the considerations which had led Italy to enter the Alliance of much of their weight. Similarly, the better feeling that prevailed between France and Great Britain during 1903, and found expression in Royal and Presidential visits, and in 1904 in the Anglo-French Agreement (see p. 219), had its natural result in modifying the manner in which the Dual Alliance between France and Russia was regarded. Commercial considerations have also played their part during recent years in affecting these international relations. The new tariff passed by the German Reichstag in 1902, it was at once observed, would affect Austria-Hungary and Italy adversely, and it occasioned some outcry and not a few threats in those countries. The tendency is undoubtedly to give economic considerations more and more weight in matters of foreign policy. As a matter of fact, though Italy concluded commercial treaties with Germany and Austria-Hungary in 1904, the latter country's negotiations with Germany were without result up to the end of the year.

**Tuberculosis, Royal Commission** appointed to report with regard to it: (1) whether the disease in animals and in man is one and the same; (2) whether animals and man can be reciprocally infected with it; (3) under what conditions, if at all, transmission of the disease from animals to man takes place, and what are the circumstances favourable or unfavourable to such transmission. For 1904 *ad interim* report, see p. 370. Members: Sir Michael Foster, K.C.B., F.R.S., M.P. (Chairman), German S. Woodhead, Esq., M.D., Sidney H. C. Martin, Esq., M.D., F.R.S., John McFadyean, Esq., M.B., R. W. Boyce, Esq., M.D., F.R.S. **Secretary:** Dr. E. J. Steegmann. **Address:** 5, Old Palace Yard, Westminster, S.W.

## TURKEY.

An empire possessing extensive territories in South-Eastern Europe, Western Asia, and North Africa, governed by Sultan Abdul Hamid II. The Asian possessions are Asia Minor, Armenia and Kurdistan, Mesopotamia and Syria, and Yemen and the Hedjaz in Arabia. In Africa Tripoli and Bengazi belong to Turkey. Particulars are given below as to some of the more important of these provinces. Turks, Greeks, and Albanians make up 70 per cent. of the population in European Turkey. In Asiatic Turkey there are also large numbers of Turks, about 4,000,000 Arabs, and many Greeks, Kurds, Circassians, Armenians, etc. **Nominally subject to Turkey** are Bulgaria, Bosnia-Herzegovina, Samos, Crete,

and Egypt. There are, it is estimated, about 16,000,000 Mahometans and 5,000,000 Christians (of the Roman, Greek, and other Churches) within the empire, besides those of other faiths.

The commands of the Sultan are absolute, unless opposed to the express directions of the Koran, a legal and theological code upon which the fundamental laws of the empire are based. The legislative and executive authority is exercised through the Grand Vizier and the Sheik-ul-Islam, who are appointed by the Sultan, the latter with the nominal concurrence of the Ulema or general body of lawyers and theologians, over which the Sheik-ul-Islam, as head of the Church, presides. The Grand Vizier, as head of the temporal government, is assisted by the Medjliss-i-Hass or Cabinet of Ministers, of whom there are 12, including the Grand Vizier and the Sheik-ul-Islam. The 10 other Ministers each take charge of a department, *e.g.*, the Interior, War, Foreign Affairs, Finance, Justice, etc.

### The Army.

The Turkish military forces are organised on the territorial system, the whole empire being divided into seven territorial districts. By the recruiting law all Mussulmans are liable to military service. Christians and certain sects pay an exemption tax. The nomad Arabs, although liable to service by law, furnish no recruits, and many Kurds evade service. The conscription therefore falls somewhat heavily on the Osmanlis, or Turks proper.

The men liable to service are divided into—(1) Nizam, or regular army, and its reserve; (2) Redif, corresponding to Landwehr; and (3) Mustahfiz, or Landsturm. There are also 660 llaveh battalions, mostly skeleton formations, in which men supplementary to the establishments are enrolled. Liability to service until recently commenced at twenty years of age, and lasted for twenty years—*i.e.*, with colours of the Nizam, four years; in the Reserve of the Nizam, two years; in the Redif, four years in first class and four years in second class; and in the Mustahfiz, six years. An Irade issued in Nov. 1903 increases the total Nizam service to nine years and the Redif service to nine years, it being estimated that this will add 250,000 men to the army. The Cavalry are set down at 55,300; the Artillery (174 field and 22 mountain batteries) at 54,720—1356 guns; the Engineers at 7400; Infantry, 583,200: total, 700,620. The Nizam has 320 battalions, 203 squadrons, and 248 batteries, and the Redif 374 battalions, 666 supplementary battalions (incomplete), and 48 squadrons. An irregular "Hamidieh" Cavalry has been raised among the Kurds, and has 266 squadrons.

The total war strength is estimated to be: 46,400 officers, 1,531,600 men, 1530 guns, and 109,900 horses. The Ottoman army has been trained and reorganised largely by German officers, and is composed of the best fighting material, as the war with Greece proved.

### The Navy.

The Naval departments of the Ministry of Marine are under the control of Vice-Admiral Mehmet Rijaat Pacha, and the Civil under Djelal Bey. There are 31,000 officers and men in the Turkish Navy, and 9000 marines. The officers are divided as follows: 2 admirals, 9 vice-admirals, 16 rear-admirals, 30 captains, 90 commanders, 300 lieutenant-commanders, 250 lieutenants, 200 sub-lieutenants.

The strength in ships built and building for the Turkish Navy on Nov. 30th was:—

Built.	
Battleships	—
Protected cruisers	3
Torpedo vessels	6
Torpedo boat destroyers	4
Torpedo boats	25
Submarines	2
Building.	
Protected cruisers	3

#### Administration, Religion, etc.

For administrative purposes the empire is divided into vilayets or governments, subdivided into provinces (sanjaks), districts (kazas), sub-districts (nahies), and communities (kariés). These are governed by Valis, or Governors-General, with provincial councils, and by subordinate officials. Foreigners living in Turkey are amenable only to their respective Consular tribunals, except in cases where Turkish subjects are concerned, which come before the Turkish courts, when the case relates to landed property owned by foreigners, when it comes before a Turkish civil court. Mahometanism is the religion of only about half the population in European Turkey, though it is professed by the great majority of the inhabitants of Turkey in Asia. The Government recognises the ecclesiastical heads of the Roman, Greek, Armenian, Protestant, and other Churches, however. Education is given in nearly 2000 elementary schools attached to the mosques, and is free. There is a university at Constantinople.

#### Industries and Trade.

Agriculture is largely carried on, but in very primitive fashion, and is greatly hampered by the tithes and taxes levied on agricultural produce, even when exported from one province to another. Tobacco, cereals, cotton, coffee, wine, silk and fruits are the chief productions. The provinces in Asia abound in minerals, coal, borax, manganese, chrome, silver-lead, etc., which, however, are little worked. The United Kingdom sent 38.6 % of the imports into Turkey in '98-9, and 33.9 % in '99-1900, the figures for Austria and Germany being 21.3 % in the former and 21.5 % in the latter year, and for France 9.3 % and 12.1 %. Great Britain took 35.4 % of the exports in '99-1900. There are about 3000 miles of railway open. The capital is Constantinople, with a population of about 1,125,000.

#### Statistics and Diplomatie.

The area of Turkey, without the states nominally subject to it, is estimated at 1,111,741 sq. m.; and the total population at about 25,000,000. The area of Turkey in Europe is 65,350 sq. m., pop. 6,130,000; in Asia Minor, 193,540 sq. m., pop. 9,090,000; Armenia and Kurdistan, 75,000 sq. m., pop. 2,500,000; Mesopotamia, 143,250 sq. m., pop. 1,400,000; Syria, 114,530 sq. m., pop. 2,890,400; in Arabia, 173,700 sq. m., pop. 1,050,000; in Africa, 400 sq. m., pop. 1,000,000. Revenue, about £17,150,000; expenditure, not known. Public debt, 1902, £123,729,595. Imports, '98-9, £24,201,129; '99-1900, £22,269,580; exports, '98-99, £12,204,945; '99-1900, £14,174,005.

Ministry.—Grand Vizier, Férid Pasha.—President of the Council of State, Said Pasha.—

War, Riza Pasha.—Marine, Djélal Pasha.—Interior, Memdough Pasha.—Justice, Abdul Rahman Pasha.—Finance, Reshad Pasha.—Public Instruction, Hashim Pasha.—Agriculture, Mines and Forests, Selim Pasha Melhamé.—Customs, Nazif Pasha.—Commerce and Public Works, Zihni Pasha.—Foreign Affairs, Tewfik Pasha.—Director of Telegraphs, Hussein Effendi.

Ambassador in London, Musurus Pasha, 189, Queen's Gate, S.W.—Consul-General, Emin Effendi, 29, Mincing Lane, E.C.

British Ambassador at Constantinople, Right Hon. Sir Nicholas Roderick O'Connor, G.C.B., G.C.M.G.—Sec. of Legation, W. B. Townley.—Commercial Attaché, E. Weakley.

Judge of Supreme Consular Court, H. W. de Sausmarez; Assistant Judge, G. B. Piggott.

British Consuls-General, Major L. S. Newmarch (Bagdad), R. D. Hay, C.M.G. (Beirut), and H. A. Cumberbatch, C.M.G. (Smyrna).

British Consuls, H. C. A. Eyres (Constantinople), H. D. Burnham, C.M.G. (Aleppo), F. E. Crow (Basra), W. S. Richards (Damascus), G. P. Devey (Jiddah), J. Dickson (Jerusalem), H. Z. Longworth (Trebizond).

#### Ruler.

Abd-ul Hamid II., Sultan of Turkey, was b. Sept. 22nd, 1842, and was the second son of Sultan Abd-ul-Medjid. He was proclaimed Sultan in succession to his brother Murad V., who was deposed in consequence of his mental incapacity (Aug. 31st, '76), and died on Aug. 29th, 1904. His brother Mehmed-Reshad Effendi, b. Nov. 3rd, '44, is the heir-apparent to the throne, the succession, according to Turkish custom, vesting in the senior male descendant of the house of Othman, sprung from the Imperial Harem. The Sultan does not marry, but from the inmates of the Harem selects a certain number who are known as Ladies of the Palace, the others occupying positions subordinate to them. All children born in the Harem are held to be of legitimate and equal birth. The eldest son of the Sultan only succeeds when there are no uncles or cousins of greater age than himself. The Sultan has several children, the eldest being Mehmed-Selim Effendi, born Jan. 11th, '70. Under the rule of Abd-ul-Hamid the Ottoman Empire has been dismembered of some of its fairest regions. The Berlin Treaty, concluded after the disastrous war with Russia in '78, practically deprived the Sultan of Bulgaria, Bosnia, and Herzegovina in Europe, and of Ardahan, Kars, and Batoûm in Asia.

#### Albania.

Albania is a part of the Turkish Empire in Europe, extending along the Adriatic coast between Montenegro in the north and Greece in the south, and lying opposite the Italian coast. It includes the vilayets of Scutari, Yanina, and Kossovo. There are about 1,500,000 Albanians, divided into the Ghegs who live in the north of Albania, and the Tosks who dwell in the south. They are Mahomedans for the most part. The Sultan's bodyguard is recruited from Albania. Greece and Montenegro are both keenly interested in the future of Albania, and so is Italy for geographical reasons. She has disclaimed any territorial ambitions there, but she would not tolerate the occupation of Albania by any other Power. Many outrages by Albanians against

Christians were reported during 1902, and when the reform scheme proposed by Austria-Hungary and Russia had been accepted by the Porte early in 1903, the resentment of the Albanians was violently manifested.

### Armenia.

**Armenia**, together with **Khurdistan**, forms a part of the Turkish Empire in Asia. The total area is about 75,000 sq. m., and the population was recently estimated at from 2,500,000 to about 5,000,000. Tradition assigns the cradle of the human race to Armenia. The country contains some mineral wealth, which, however, needs developing. The province is divided into three vilayets or governments—Erzerum, Mamuret ul Aziz, and Diabekr, with the districts of Bitlis and Van. The inhabitants are of the Christian faith, most of them belonging to the Gregorian Church, which greatly resembles the Greek Church in doctrine and ritual. There are many, however, who acknowledge the authority of Rome, though retaining their own distinctive ritual. In '94 terrible atrocities were perpetrated upon the Armenians in the Sasun district. A Pan-Armenian Congress met at Brussels in July 1902, and formed a **Permanent International Committee** to watch over Armenian interests and promote reform. The revolutionary committees resumed their activity to some extent in 1903, partly because of the Macedonian outbreak and partly owing to fresh sufferings caused by the burden of Turkish taxation.

The Kurds committed many outrages in the villages near Mush in **April 1904**, burning the houses and massacring the inhabitants. There were similar massacres at Sasun also, and the whole Sasun region was desolated. **Earl Percy**, replying to questions in the House of Commons (**May 19th**), said the disturbances appeared to have been caused by the action of revolutionaries coming from Russian territory. H.M. Government had communicated with Russia and France, and hoped through the consuls of those countries to bring this unhappy difficulty to a peaceful solution. Mr. Bryce expressed the opinion that the troubles were due to the outrages perpetrated by the Kurds. Replying to the **Earl of Aberdeen** on **August 12th**, the **Marquis of Lansdowne** said it was not easy to trace the causes of unrest in Armenia to their source. The Government had done all in their power to allay the excitement which prevailed, and the British Ambassador at Constantinople had been unremitting in his efforts to persuade the Turkish Government to take such steps as seemed to him best calculated to have that result. It had been decided that permission should be granted to refugees to return to their homes, that a sum of money should be allocated for their assistance in rebuilding their houses, that barracks should be built to protect the Armenians against the raids of the Kurds, and that a **general amnesty** should be granted to all those who surrendered and were not caught in the actual commission of crime. The gendarmerie were also to be reorganised, and an inquiry was to be held into the mode and system of the Administration, with a view to checking existing abuses. These reforms seemed to have been carried out to some extent, and from the accounts which had been received earlier in the summer he would have been inclined to take a sanguine view of the

situation, had it not been for the fact of another serious conflict in the month of July.

**British Consul**, H. S. Shipley, C.M.G. (resides at Erzerum); **Vice-Consul**, W. J. Heathcote, Bitlis.

### Macedonia.

**Macedonia** is the country which lies principally in the three vilayets (or provinces) of Salonika, Monastir, and Kossova. It is bounded by Bulgaria on the north and by the **Ægean Sea** on the south; **Albania** lies on the west. There are large numbers of Bulgarians and Christians of other nationalities in Macedonia. These differ fiercely amongst themselves, the Bulgarian Exarch being at the head of the Bulgarian Christians, while the Patriarch of the Greek Orthodox Church is acknowledged by other Christians; and the Turks and Albanians oppress them all in brutal fashion, the authorities helping them as a rule. The real responsibility for the state of affairs in Macedonia, however, rests upon the Powers who have neglected to enforce the execution of Article 23 of the Treaty of Berlin. Under the previous Treaty of **San Stefano**, Macedonia was included in the principality of Bulgaria; and though the Treaty of Berlin altered this and left Macedonia to Turkey, it provided that reforms should be carried out in the provinces under the supervision of special commissioners. The Porte pursued its usual policy of evasion, the Powers did not insist, and so matters remained *in statu quo*. The Macedonian Committee at Sofia has long agitated for the introduction into Macedonia and the vilayet of Adrianople of reforms analogous to those given to Crete, and affairs reached a crisis in 1903. A rising took place in the vilayet of Monastir in Sept. 1902, which was followed by terrible atrocities. A scheme of reforms was then drawn up by the Porte, but no attempt was made to carry it out. The Governments of Austria-Hungary and Russia drew up at the close of 1902 a **Reform Scheme**, which the Sultan accepted and approved, but it was never carried out; and the year 1903 was marked by terrible excesses on the part of the Turkish troops, especially the **Bashi-Bazouks**, and by fierce and despairing fighting on the part of the revolutionary bands. **Bulgaria** informed the Powers that, unless they could give satisfactory assurances, "we shall be obliged to take necessary measures to prepare for all eventualities."

Ultimately, as the result of a Conference between the Czar and Emperor Francis Joseph at **Murstep**, a Joint Note was sent to the Porte insisting on the execution of the Reform Scheme, and demanding the Porte's consent to the introduction of a system of foreign control to ensure its execution. After considerable resistance the Porte assented (Nov. 25th, 1903), reserving the right to discuss details, particularly on the first two points. **M. Müller** and **M. Demerik** were then appointed as **Civil Agents or Assessors**.

After long delay, and as a result of considerable pressure on the part of the Powers, **Lieut.-General Emilio de Giorgis**, of the Italian Army, was appointed to take command of the gendarmerie (Jan. 2nd, 1904). The Porte, however, in a long Note addressed to Austria-Hungary and Russia, discussed the demands of the Powers in detail, and defined the extent of its acceptance of them. It laid down the condition that the subordinates of the two Civil Agents

should be accompanied in their official journeys of investigation, etc., by Ottoman officials. It stipulated also that reforms found to be necessary should be executed by the Inspector-General after the sanction of and on receipt of instructions from the Porte. These two conditions were rejected by Austria-Hungary and Russia (28th). The Porte replied (Feb. 6th) as to the Civil Agents, that it was incompatible with the prestige of the Porte for foreign officials to conduct inquiries in Turkish territory without the co-operation of Turkish officials; and that the mode of reorganisation of the gendarmerie must be determined by the Porte, whereas the Ambassadors in their memorandum of Jan. 28th laid it down that it was for General de Giorgis to do this. A scheme was accordingly drawn up by the foreign officers and communicated to the Porte (29th); but the Porte (March 3rd) refused to accept it, on the ground that it violated the sovereign rights of the Sultan. They made counter proposals (17th), which the Ambassadors of the two Powers in their turn refused to accept. They stated (19th) that the number of foreign gendarmerie officers to be appointed should not exceed 60, and claimed that efficient powers as to organisation and control should be placed in the hands of General de Giorgis. The Porte (25th) replied that the maximum number of foreign officers should be 25, and that they should occupy themselves solely with reorganisation and surveillance, the effective command remaining in the hands of Turkish officers. The two Ambassadors maintained their demand for the maximum of 60, but agreed to start with 25, and notified the Porte of the impending departure of the International Commission for Macedonia (28th). They further insisted (April 1st) on the immediate acceptance of the demands made on Feb. 29th and March 19th; and eventually it was understood that General de Giorgis would have power to dismiss officials if he found that necessary.

**An Agreement with Bulgaria** was signed (April 8th). Bulgaria undertook to prevent the formation of revolutionary committees and armed bands upon its territory, and it was agreed that special measures should be taken by both countries to prevent brigands and revolutionary bands from crossing the frontier. Turkey undertook to apply the Reform Scheme agreed upon with Austria-Hungary and Russia, to give full effect to a general amnesty granted by the Sultan, and to grant assistance to the villagers from Rumelia who had taken refuge in Bulgaria.

The majority of the foreign gendarmerie staff officers left Constantinople for Salonika (April 11th), and General de Giorgis followed (16th). The contracts with the officers were formally signed at Salonika (May 14th), and they left to take up their work in their respective districts. A large number of refugees had entered Macedonia by the end of the month, mainly under pressure from the Bulgarian Government; but the Adrianople refugees declined to return because of their destitution and lack of means to cultivate their lands. The work of the foreign officers was obstructed by the Turkish Government and officials from the first, and in various parts of the country strife between the villagers and the troops went on continuously. The **Balkan Committee** declared plainly that on the evidence of the Blue Book (Turkey, No. 4, 1904) dealing with the period up to Aug. 10th, the Reform Scheme had failed to put down mis-

government or to effect any real improvement in the situation. **A new system of tithe collection** had been introduced in about 30 villages in Monastir, and that was all that had been done.

**An official statement** was issued by the Austro-Hungarian Ministry for Foreign Affairs (Nov. 21st) based upon the official reports made by the Austro-Hungarian and Russian Civil Agents from January to November. In the first 6 months the Agents had referred 600 complaints received by them to the Inspector-General Hilmi Pasha, "who saw to their settlement." The general condition of the country had improved, and the peasants were eagerly resuming their long-neglected work. Up to August 6000, or about 86 per cent. of the total number of fugitives, had returned to the three Macedonian vilayets. The funds given to Hilmi Pasha for rebuilding houses were, however, quite insufficient. The gendarmerie included 23 per cent. of Christians, and had been placed on a stable financial basis.

Early in October the **Macedonian Inner Organisation** issued a memorandum on the situation, in which they said they would "continue the struggle in various forms and in greater or lesser degree, according to circumstances, until international military intervention shall *de facto* have superseded Turkish rule, and have created in Macedonia a new order of things, ensuring justice and humane existence."

In December the controversy as to an increase in the number of the gendarmerie officers was still going on; but on Dec. 26th the **Porte gave way**, and consented to admit 23 new officers, in addition to the 25 already appointed, but on condition that the Powers should undertake not to exceed that number, and that the new officers should be charged exclusively with the reorganisation work and not with the command of the gendarmerie, undertaking to issue instructions for the admission of the new officers on receiving a favourable reply.

The most serious aspect of the situation at the close of the year was the **internecine strife amongst the Christians of different sects**, Greeks and Bulgarians fighting one another continually, and Servians and Bulgarians meeting in conflict in the north-western districts.

**British Consul-General**, R. W. Graves, C.M.G. (Salonika); **Consul**, P. J. MacGregor (Monastir).

The **Balkan Committee** in England has done good service in placing the real state of affairs before the public. **President**, Mr. James Bryce, M.P.; **Chairman of Executive**, Mr. Noel Buxton; **Secretary**, Mr. W. A. Moore. **Office**, 10, Adelphi Terrace, London, W.C.

The **Macedonian Relief Fund** exists for the purpose of aiding the sufferers in the devastated provinces. **President**, The Bishop of London; **Chairman of Executive**, Mr. Bertram Christian; **Secretary**, Mr. Oliver Williams. **Office**, 116, Victoria Street, Westminster, S.W.

### Tripoli.

Tripoli is a Turkish province in Africa on the Mediterranean coast, bounded on the west by Tunis and Algeria, on the east by Egypt, and on the south-east and south by the Sahara. The estimated area, with Bengazi, is about 400,000 sq. miles, and the population about 1,000,000, mostly Berbers, though there are many Jews. Tripoli is the chief town, with a population of 40,000. The Turkish force in the

province number about 10,000. The trade of the province, about a fourth of which consists of the caravan trade with the Soudan, practically all passes through Tripoli and Bengazi. The chief exports are esparto fibre, skins and hides, ostrich feathers and sponges. Italy is understood to expect that in time the province will become hers, and in 1902, as a result of the rapprochement between France and Italy, an agreement was come to in which France intimated that she had no interests in Tripoli, and that consequently Italy had a free hand there. On the other hand the Sultan showed himself awake to the situation, and sent a number of troops into the province. **Revenue, 1901-2, £142,056; expenditure, £170,424. Imports, 1901 £364,000; exports, £332,500. Imports into Bengazi, 1902, £188,174; 1903, £234,360; exports, 1902, £338,555; 1903, £475,050. Imports into Derna, 1902, £23,597; 1903, £29,026; exports, 1902, £11,847; 1903, £16,499.**

**British Consul-General, J. C. W. Alvarez.**  
**Consul, C. S. Hampson (Bengazi).**

**Turner, Right Hon. Sir George, P.C., K.C.M.G.,** is a solicitor by profession. He has only been in active political life since 1889, when he was elected for St. Kilda in the Victorian Legislative Assembly. He took office as Commissioner of Customs and Minister of Health in '91, and held those portfolios in the Munro Ministry and that of Mr. Shiels. In '92 he became also Solicitor-General. He was chosen as the leader of the Opposition in '94, and it was on his motion that the Patterson Ministry was overthrown. At the general election of '94 his supporters secured a majority, and he was placed in power as Premier. His forte is organisation. He was one of the guests of the Imperial Government in London on the occasion of the Jubilee festivities in '97, and was then made a Privy Councillor. He resigned office Dec. 1st, '99, but after the general election of 1900 succeeded to office again, till he joined the first Commonwealth Ministry as Treasurer in Jan. 1901, retaining the office under Mr. Deakin in 1903, and under Mr. Reid in 1904.

## U

### UNITED STATES OF AMERICA.

The United States were constituted by the Declaration of Independence adopted by Congress, July 4th, 1776, and are now a confederation of forty-five North American sovereign states united together by a federal bond for Imperial objects, the local administration being reserved to each state. By the constitution of 1787 and subsequent amendments the government is intrusted to three separate authorities—the Executive, the Legislative, and the Judicial. The first is vested in a President elected on the Tuesday after the first Monday in November every leap year for four years by electors appointed by each separate state. The number of such electors is equal to the number of senators and representatives to which the State is entitled in Congress; but no senator or representative or office-holder under the Government can be an elector. The President, who has an annual salary of \$50,000, is commander-in-chief of the national forces, and has a veto on all laws passed by Congress, although a bill may become law in spite of his veto, on being afterwards passed by a two-thirds majority of each House of Congress. The administration is conducted under the immediate authority of the President by a Cabinet of eight Ministers chosen by him, and holding office at his pleasure, though confirmed by the Senate. The salary of each Minister is \$8,000 per annum. A Vice-President is chosen in the same manner as the President; he is *ex-officio* President of the Senate, and in case of the death or resignation of the President he assumes his office for the remainder of the term, and the Senate elects a temporary vice-president. He has a salary of \$8,000 per annum.

#### Congress and Judicature.

The Legislative power is vested in Congress, which consists of (1) the Senate, of 90 members—two chosen by each State Legislature for six years—who ratify or reject all

treaties made by the President, confirm or reject all appointments made by the President, and who constitute a High court of impeachment, with power only to remove or disqualify from office; (2) the House of Representatives, of 386 members, chosen every two years by all adult male citizens duly qualified according to the laws of their respective states, and apportioned among the states according to population. In addition to the representatives, delegates from the "territories" (districts not organised into states) are entitled to debate on matters pertinent to their interests, but must not vote. Congress may propose an amendment to the Constitution if two-thirds of both Houses deem it necessary; and such amendment shall be deemed to be incorporated in the Constitution when ratified by the legislatures of three-fourths of the several States. All members of Congress are paid \$5000 per annum, with travelling, etc., allowances, but the Speaker of the House of Representatives receives \$8000.

The judicial power is confided to a Supreme Court (the members of which are nominated by the President for life) with power to interpret the constitution, to decide all disputes between the Federal Government and the individual states, and to hear all causes arising under the federal laws, etc. There are about 60 Federal Courts, each appointed for a district, and above these 9 Circuit Courts, and the Supreme Court. Offences against the person and against property are dealt with by the State Courts, which also deal with matters of probate, divorce, and bankruptcy. There are Justices of the Peace and Police Judges in towns and cities, Courts of Record for the counties, and a Supreme Court for each State.

#### The Army.

An "Act to increase the efficiency of the Permanent Military Establishment of the United States" became law on Feb. 2nd, 1901, and is

being carried into effect. The maximum number of enlisted men is fixed at 100,000 (which was reached during the Philippine insurrection), including "native organisations" not exceeding 12,000, which the President might create, "when, in his opinion, the conditions of the Philippine Islands justify such action." The legal minimum is 60,000.

The settlement of Cuba and peace in the Philippines have enabled large forces to return home; and President Roosevelt, in his Message to Congress, Dec. 6th, 1904, said the Army had been reduced to the minimum at which it was possible to keep it with due regard to efficiency. More officers were needed. The regular forces consist of 15 regiments of Cavalry (47 officers and 780 rank and file each), a corps of Artillery, not to exceed 18,920 enlisted men, and comprising coast and field artillery; and 30 regiments of Infantry. The infantry regiment is to have the same establishment of officers as the cavalry unit, and is divided into three battalions of four companies. The company will have 3 officers and 64 rank and file; but the President has power to increase the number of privates from 48 to 127, provided that the total number of enlisted men is not exceeded. The Engineers are to form three battalions of four companies; the number of officers, which is considerably larger than that required, for duties with the troops, is fixed at 159, exclusive of a Chief of Engineers.

Opinions of experienced British and foreign officers show the United States army to have attained a high degree of efficiency. An important measure was the establishment in Feb. 1903 of a General Staff, comprising 42 officers, to report upon efficiency, preparation, distribution, supplies, etc., and to prepare plans for national defence and manœuvres.

Under a new Militia Law the organised militia have been reorganised, and the Adjutant-General's report, 1903, gave the total number as 116,542. Most of the states have prepared plans for rapid mobilisation, and within five years the force is expected to have assumed an efficient military character.

### The Navy.

The President of the United States is *ex-officio* Commander-in-Chief of the Navy. As his executive he appoints a Secretary of the Navy, a member of his Cabinet, on a four years' term. He also appoints an Assistant Secretary of the Navy, and these two political officials, who are usually civilians, exercise a general control and supervision of the ten departments or bureaux among which the business is distributed. These departments are very similar to those in the British Admiralty, and they are almost all of them under the direction of naval officers. There are also special boards, mostly departmental, who advise either the Secretary of the Navy or the chiefs of the bureaux on technical points. There is nothing approximating to the headquarters staff which is found in all naval administrations, based on the precedent of the organisation of land forces. In this respect the naval administration of the United States and Great Britain differ from almost all the rest. With regard to the estimates, the chiefs of the various bureaux prepare and make annually reports which are published, and in these reports they make recommendations with estimates of cost. The Secretary of the Navy

also makes an annual report, summarising the reports of his subordinates, with his own recommendations, which are submitted to Congress in the shape of Bills, which being passed by the House of Representatives and the Senate, and approved by the President, become law. The United States Navy is manned by voluntary enlistment.

The Admiralty Bureaux are as follows :—  
**Secretary of the Navy**, Hon. Paul Morton.  
**Assistant Secretary**, Charles Hial Darling.  
**Chief of the Bureau of Navigation and Principal Naval Adviser to the Secretary**, Rear-Admiral G. A. Converse.  
**Chief of the Bureau of Ordnance**, Rear-Admiral Newton E. Mason.  
**Chief of the Bureau of Equipment**, Rear-Admiral Henry N. Manney.  
**Constructor-in-Chief**, Washington L. Capps.  
**Engineer-in-Chief**, Rear-Admiral Charles W. Rae.  
**Paymaster-General**, Henry T. B. Harris, Esq.  
**Surgeon-General**, P. M. Rixey, Esq.  
**Chief of the Bureau of Yards and Docks**, Civil-Engineer M. T. Endicott.  
**Judge Advocate-General**, Captain S. W. B. Diehl.

There is also a General Board, for advisory purposes only, composed as follows :—Admiral-of-the-Navy George Dewey; Rear-Admirals H. C. Taylor, C. E. Clarke, A. Walker; Captains J. S. Sperry (President of the War College), S. Schroeder (Chief Intelligence Officer), William Swift and R. R. Ingersoll; Commander Sargeant, Lieut. Marble, and Colonel of Marines G. C. Reid.

The Naval Appropriation Bill, 1904, allowed a sum of £19,267,608 (\$96,338,038) for the charges of the Navy, and of this total it was proposed to devote £5,977,000 (\$29,885,000) to new construction. The General Navy Board has recommended an expenditure on new construction in 1905 of £8,250,000 (\$41,250,000), and the total amount of the Estimates as recommended is £22,906,127 (\$114,530,638).

The number of officers and men on the effective list of the United States Navy is 37,248 inclusive of marines. The average number afloat in 1904 was 27,556.

The executive officers of the United States Navy are distributed as follows :—1 admiral, 1 vice-admiral, 21 rear-admirals, 73 captains, 114 commanders, 172 lieutenant-commanders, 350 lieutenants, 100 sub-lieutenants, 130 ensigns, 90 naval cadets at sea.

The strength in ships of the United States Navy built, building and projected, on November 30th, was :

Built.	
Battleships, 1st class . . . . .	12
" 2nd class . . . . .	1
Coast defence ships . . . . .	11
Armoured cruisers . . . . .	2
Protected cruisers, 1st class . . . . .	3
" " 2nd class . . . . .	17
" " 3rd class . . . . .	2
Unprotected cruisers . . . . .	7
Torpedo boat destroyers . . . . .	20
Torpedo boats . . . . .	31
Submarines . . . . .	8
Building.	
Battleships, 1st class . . . . .	12

**Projected.**

Battleships, 1st class . . . . .	4
Armoured cruisers . . . . .	2
Scouts . . . . .	3
Destroyers . . . . .	6
Torpedo boats . . . . .	6

*Note.*—The battleships projected are the *New Hampshire*, which has been authorised, and three other vessels of 16,000 tons, which are to form part of the shipbuilding programme for 1905-6. The armoured cruisers are the *North Carolina* and *Montana*, of the 1904-5 programme.

The Government dockyards in the United States are situated as follows:—

**Brooklyn.** One dock takes any ship; two smaller.

**Norfolk, Va.** One dock takes any ship; one smaller.

**Mare Island, Cal.** One dock takes any ship.

**Boston, Mass.** One small dock.

**League Island, Pa.** One large wooden dock.

**Portsmouth, N.H.** One small dock.

The launches of the year 1904 for the United States constitute a record, no fewer than 7 battleships and 2 armoured cruisers having been put into the water. The battleships are: *Virginia*, on April 25th; *Louisiana*, on Aug. 27th, at Newport News; *Rhode Island*, on May 17th, by the Fore River Co.; *Connecticut*, on Sept. 27th, at the New York Navy Yard; *Nebraska*, on Oct. 10th, at Seattle; *Georgia*, on Oct. 11th, by the Bath Ironworks Co.; and *New Jersey*, on Nov. 10th, by the Fore River Co. The armoured cruisers are *California*, on April 28th, and *South Dakota*, on July 14th, both at San Francisco. There were also 2 protected cruisers and 2 gunboats launched.

The vessels completed during 1904 were the battleship *Ohio*, the protected cruisers *Chattanooga*, *Galveston*, *Tacoma*, *Des Moines* and *Denver*.

The commands of the various Fleets are divided as follows: **North Atlantic Fleet**, Rear-Admiral A. S. Barker; **Coast Squadron**, Rear-Admiral J. H. Sands; **Caribbean Squadron**, Rear-Admiral C. D. Sigsbee; **Pacific Squadron**, Rear-Admiral Henry Glass; **Asiatic Fleet**, Rear-Admiral Yates Stirling; **European Squadron**, Rear-Admiral T. F. Jewell; **South Atlantic Squadron**, Rear-Admiral F. E. Chadwick; **Atlantic Training Squadron**, Rear-Admiral W. C. Wise.

The **European Squadron**, under the command of Rear-Admiral Jewell, visited Gravesend in September. The officers lunched with the King, and several entertainments were devised for the ship's company.

**State and Local Government.**

The constitutions and modes of administration of the various States bear a close resemblance to each other—the executive being confided to a Governor and the legislative to two elective chambers, while each State has its own judicial system. Roughly speaking, each State has voluntarily surrendered to the central Government all federal matters (including taxation for federal purposes only, foreign affairs, the control of the army, navy, postal service, coinage, etc.), while reserving the right to administer all local affairs and to impose local taxes at its pleasure. For local government within the States the unit is the rural township, under officials appointed by the local electors, and these are combined to form

counties, though in the south and some other parts the county itself forms the unit. The soil of the United States not included within the boundaries of an individual state is divided into five "territories,"—Alaska, Oklahoma, New Mexico, Arizona, and Indian Territory. Three of these have local legislatures, but they are more directly under Federal control, and the Governor in each case is appointed by the President. Alaska and Indian Territory have no self-government. A Bill for the admission of Arizona, New Mexico and Oklahoma as States passed the House in 1902 and again in 1904. Hawaii is also a "territory" with a local legislature. When duly qualified by population, etc., it is competent for the confederacy to form the territories into new "States" and admit them into the Union. There are **Indian Reservations**, with an area of about 117,500 sq. miles, and an Indian population of about 270,000, situated not only in Indian Territory but also in Arizona, S. Dakota, Montana, and Oklahoma. The "district of Columbia," which is really the capital, **Washington**, and which has an area of 60 sq. miles, with a population of 278,718, is the seat of Federal Government, and is under the direct government of the Confederacy through three Commissioners appointed by the President.

**Education, Agriculture, Industries.**

Perfect equality is accorded to all religions in the United States. The Roman Catholics are the strongest religious body, Methodists, Baptists, Lutherans, and Presbyterians following in that order. Education is free and general, although backward in some of the former slave states, the cost being met from state or local funds, and the Federal Government contributing a portion. The number of pupils in 1902 in common, elementary, and secondary schools, supported by public taxation, was 16,352,703, while there were 1,728,137 in private schools, giving a total of 18,080,840. The amount expended on the public elementary and secondary schools in 1900-1 was £48,021,728. Uninhabited and uncultivated land is held to be national property, and titles to stated portions may be acquired under the homestead laws and the timber-culture Acts. In 1900 there were 5,739,657 farms in the country, with an acreage of 841,201,546 acres, giving an average of 146.6 acres per farm. The value of farms was put at \$16,674,690,247 for the land, and of the improvements, buildings, implements, live stock and products at \$3,839,311,591. The fixed capital invested in agriculture is therefore put at \$20,514,201,838, as compared with \$9,874,664,087 invested in manufactures. About 10,500,000 of the population are engaged in agriculture, and rather more than 7,000,000 in manufactures. Cereals, other farm and dairy produce, preserved vegetables and fruits, sugar, cotton, tobacco, live stock, timber, iron, silver, gold, coal and other minerals (see MINES AND QUARRIES OF THE WORLD for details) are the chief products, and there are many large and flourishing manufacturing industries, textiles, cotton (see TEXTILE INDUSTRIES OF THE WORLD), wool, silk, iron and steel, lumbering, etc., being the chief. The chief imports are food products, such as sugar, coffee, fruits, wines and spirits, tea, etc., raw materials like silk, rubber, fibres, hides and skins, tin, wool, etc.; manufactured goods, etc. About three-fifths of the imports consist of food and

raw material and two-fifths of manufactured goods. The chief exports are agricultural products, such as cotton, breadstuffs, meat, dairy produce, mineral produce, timber, and other raw materials, and manufactures including iron and steel, tobacco, implements, etc. The value of the farm products exported in 1902-3 was estimated at about £175,695,890, about one-half of which go to the United Kingdom. The manufactures amount to nearly one-third of the total exports. There were 203,132 miles of railway in operation in 1903, and 26,429 miles of street railways and traction lines, of which 25,789 miles are worked by electricity.

### **The Monroe Doctrine.**

The Monroe Doctrine, which is a cardinal point of American policy, was formulated by President Monroe in 1823, and has ever since been accepted as laying down the principles which guide the United States in respect to the relations of European Powers with the other countries upon the American continent. President Monroe said: "We owe it to candour, and to the amicable relations existing between the United States and those Powers [the Allied Powers of Europe], to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European Power we have not interfered, and shall not interfere. But with the Governments who have declared their independence and maintained it, and whose independence we have on great consideration and on just principles acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any unfriendly disposition towards the United States. It is impossible that the Allied Powers should extend their political system to any portion of either continent without endangering our peace and happiness; nor can any one believe that our Southern brethren, if left to themselves, would adopt it of their own accord. It is equally impossible, therefore, that we should behold such interposition in any form with indifference." President Roosevelt pointed out in 1902 that the Doctrine was not a means of aggression, but defensive in purpose; and that it would be respected just so long as the United States possessed a first-class Navy. In an address on the subject delivered to the Yale Law School in 1903, Mr. Whitelaw Reid said neither of the two essential propositions in President Monroe's Message "objects to transfer of dominion to Europeans by cession, purchase, or the voluntary act of the inhabitants; and neither of them gives any pledge to any American State that we would interfere in its behalf against the use of force for the collection of debts or the redress of injuries, or indeed against any European attack." Mr. Reid went on to ask, "Is the Monroe Doctrine to be construed into an International Bankruptcy Act, to be enforced by the United States for the benefit of any American Republic against all European creditors? Or, on the other hand, is it to degenerate into an international collection agency, maintained by the United States for the benefit of European Powers which may have just claims against American Republics? In a recent conspicuous case the President has very properly and wisely given a practical

negative to both these questions; while under his guidance the Secretary of State, with consummate skill, has secured the precedent that European Powers first procure our consent before attempting to collect debts by force on these continents, and then only on their promise not to take territory. Perhaps it is also a useful precedent, secured at the same time, that under such conditions the game does not prove worth the candle."

### **Immigration Law and Statistics.**

The United States Immigration Law, 1903, raises the head-tax on immigrants from 1 dollar to 2. The classes of aliens previously prohibited were Chinese labourers, persons under agreement to perform labour or service in the United States, idiots, insane persons, paupers, or persons likely to become a public charge, persons suffering from a loathsome or dangerous contagious disease, persons who had been convicted (except political offenders), polygamists, and persons whose ticket or passage is paid for by the money of another or who is assisted by others to come. To these the new Act adds epileptics, persons who have been insane within five years previous or who have had two or more attacks of insanity, professional beggars, anarchists or persons who believe in or advocate the overthrow by force of the government of the United States, or of all government, or of all forms of law, or the assassination of public officials. There are also in force the Chinese Exclusion Act and the Alien Contract Labour Law. During 1904, 812,870 immigrant settlers arrived in the United States, including 193,236 from Italy, 177,156 from Austria-Hungary, 145,141 from Russia and Finland, 51,571 from Sweden and Norway, 40,356 from England and Wales, 36,142 from Ireland, 11,092 from Scotland, and 46,380 from Germany. The immigrants denied admission numbered 7,994, and 779 aliens were deported in addition.

### **Pensions.**

The annual report of the U.S. Commissioner of Pensions showed that in the year 1902-3 there were on the roll 996,545 pensioners, of whom 729,356 were soldiers and 267,189 widows and dependants. The cost of the system during the year was put at \$141,752,870. It appears that the Civil War contributed 703,456 invalids and 248,390 widows to the total above given. The annual average value of the pensions in 1902-3 was \$133. Since the close of the Civil War in '65, \$2,942,178,145 has been expended on pensions.

As to the Panama Canal question, see ENGINEERING, pp. 168-9.

### **Newspapers.**

The United States Census Bureau states that in the census year (1900) there were 2226 daily newspapers in the United States, as follows:—Morning (including Sundays), 359; morning (excepting Sundays), 235=595; evening (including Sundays), 208; evening (excepting Sundays), 1423=1631. At the previous census there was a proportion of two evening papers to one morning, but now the proportion is three to one. In New York the daily papers circulate to the extent of a third more than the total population.

In New York, the *Journal* (Independent), owned by Mr. W. R. Hearst, possesses the largest circulation, and is recognised for its

"hustling" propensities. Then follows the *New York World*, a Democratic organ, with 278,607 in the morning and 357,102 in the evening; Sunday 383,650. Proprietor, Mr. Pulitzer. The *New York Herald* (Independent), standing third, is owned by Mr. Gordon Bennett, and is believed to be the best paying paper in the States. Its show of advertisements far exceeds its contemporaries. In standing and position, though not in actual circulation, the *New York Tribune* comes next. It belongs to Mr. White-aw Reid, who became editor-in-chief and chief proprietor in '72. The *New York Times* and the *New York Sun* must also be mentioned. Of purely evening papers the *New York Evening Post* deserves special mention for the high commercial tone and independent policy it adopts. It has no Sunday issue. The leading illustrated weekly papers are *Harper's Weekly*, *Collier's Weekly*, and *Leslie's Illustrated Weekly*; whilst *Judge*, *Puck*, and *Life* represent three of the best humorous journals of the States.

In Chicago, with a population of 1,698,575, there are 5 dailies which take premier places. The *Chicago Daily News* (Independent), owns the largest and most *bona-fide* circulation in the city. This is sworn by affidavit as 286,988 copies. Then follows the *Chicago American*, and the *Chicago Record-Herald*. The Republican organs are the *Tribune* and the *Inter-Ocean*. There are likewise daily papers not only for Germans and Jews, but also for Norwegians, Polish, and Bohemians.

In Philadelphia there is the *Philadelphia Public Ledger*, which formerly belonged to the Childs family and possessed honourable traditions amongst the United States press, and is now known under the title of the *Public Ledger and Philadelphia Times*. The *Philadelphia Record* (Independent Democrat), with a sworn sale of 181,790 copies daily, is another prosperous daily. The *North American*, the organ of the Republicans, does not issue on Sundays.

Boston, with 560,000 inhabitants, possesses 11 dailies, of which may be mentioned the two Independent organs, the *Boston Globe* and the *Boston Herald* the Democratic *Post* and the Republican *Record*. The *Evening Transcript*, which is the most distinctively Bostonian, has a high reputation for the literary quality of its Wednesday and Saturday supplements.

#### Statistics and Diplomatic.

The total area of the Union, including the Territories and Hawaii, is 3,566,104 sq. miles; the population was estimated at 80,847,000 on July 1st, 1903. At the census of 1900 it was 76,303,387, of whom 39,059,242 were males and 37,244,145 females. The whites numbered 66,893,405, and the coloured 9,192,389. The Indians number 270,544. The proportion of the foreign-born was 13.7. New York had a population of 3,437,202, Chicago of 1,698,575, and Philadelphia 1,293,697; Washington had a pop. of 278,718. The wealth of the country was estimated by the Census Office at \$65,037,091,197, or £13,000,000.

Revenue for year ending June 30th, 1903, £114,414,321; 1904, £110,378,982; expenditure for June 30th, 1903, £109,353,776; 1904, £123,889,412, including £10,000,000 in respect of the Panama Canal.

Imports for the year ending June 30th, 1903,

£209,417,677; 1904, £202,347,745; exports to June 30th, 1903, £289,945,593; 1904, £298,260,550. Public Debt, 1903, £449,669,892; 1904, £469,292,800.

Cabinet: *Secretary of State*, Col. John Hay. — *Secretary of the Treasury*, Leslie M. Shaw. — *War*, Hon. William Taft. — *Attorney-General*, W. H. Moody. — *Postmaster-General*, Robert J. Wynne. — *Navy*, Hon. Sterling Morton. — *Interior*, Ethan A. Hitchcock. — *Secretary of Agriculture*, James B. Wilson. — *Secretary of Commerce*, Mr. Victor Metcalf.

*Ambassador in London*, The Hon. Joseph H. Choate, 123, Victoria Street, S.W. — *First Secretary*, Henry White. — *Second Secretary*, John R. Carter. — *Third Secretary*, Craig W. Wadsworth.

*Consul-General to Great Britain and Ireland*, H. C. Evans, 12, St. Helen's Place, Bishopsgate Street, E.C. — *Vice-Consul-General*, Richard Westcott. — *Deputy-Consul-General*, Francis W. Frigout.

*British Ambassador at Washington*, Rt. Hon. Sir H. Mortimer Durand, G.C.M.G., K.C.S.I., K.C.I.E. — *Secretary of Embassy*, —. — *First Secretary*, Percy Wyndham. — *Second Secretary*, H. G. Dering. — *Third Secretary*, Hugh Gurney.

*British Commercial Agent*, E. Seymour Bell, 196, La Salle Street, Chicago.

*British Consuls: Consuls-General*, Sir P. Sanderson, K.C.M.G. (New York), C. W. Bennett, C.I.E. (San Francisco). — *Consuls*, Gilbert Fraser (Baltimore), Capt. W. Wyndham (Boston), Col. H. de Coëtlogon (Savannah), Alexander Finn (Chicago), H. T. C. Hunt (New Orleans), H. Nugent (Galveston), C. C. Bayley (New York), W. Powell (Philadelphia), James Laidlaw (Portland, Oregon).

#### President.

Colonel Theodore Roosevelt was b. in New York in '58. Ed. at Harvard, he began his political career in the New York Legislature in '82, and speedily took a prominent position there, becoming leader of the House in '84. He was a Civil Service Commissioner, U.S.A., '89-95, President of the New York Police Board '95-7, and was then appointed Assistant Secretary of the Navy. When the war with Spain broke out in '98 he raised a corps of Rough Riders and took them to Cuba, where they did splendid service. He has told the story himself in his book "The Rough Riders," '99, and is the author of many other successful books. He was made Governor of New York State in '98, and was the life and soul of the Republican fight for the Presidency in 1900, being himself nominated, against his wish, for the Vice-Presidency, and triumphantly elected, entering on his duties March 4th, 1901. On the assassination of President McKinley in 1901, he succeeded him for the remainder of his term of office. He is a great popular favourite, and one of the strongest and most straightforward men in American political life. His declarations on the necessity of controlling Trusts aroused great interest in 1902, and an attempt was made by some of the wirepullers to avoid his selection as the Presidential candidate in Nov. 1904. His popularity with the rank and file of the party proved too great, however, and he was unanimously and enthusiastically nominated at the Chicago Convention on June 23rd, 1904, and re-elected President by a sweeping majority on Nov. 8th. He

announced at once that he would not under any circumstances be a candidate for re-election. Address: White House, Washington, and Sagamore Hill, Long Island, New York.

### Presidential Election, 1904.

The 1904 Presidential Election took place on Nov. 8th. Mr. Roosevelt was nominated by all the 904 Republican delegates at the Chicago Convention (June 23rd), amidst great enthusiasm. The Republican platform declared that "Protection which guards and develops our industries is the cardinal policy of the Republican party. The measure of Protection should always be at least equal to the difference in cost of production at home and abroad." It pronounced in favour of "commercial reciprocity wherever reciprocal arrangements can be effected consistent with the principles of protection, without injury to American agriculture, labour, or industry." The gold standard was upheld, and legislation in favour of a powerful navy and to build up the mercantile marine was demanded. As to trusts and the labour question, the platform was as follows: "Combinations of capital and labour are the results of the economic movement of the age, but neither must be permitted to infringe upon the rights or interests of the people. Such combinations, when lawfully formed for lawful purposes, are alike entitled to the protection of the laws, but both are subject to the laws, and neither can be permitted to break them."

The Democratic Convention was held at St. Louis (July 6th). Demonstrations in favour of Mr. Cleveland and Mr. Bryan were followed by a renewal of the fight on the part of the latter against the gold standard; and in the end the Committee on Resolutions struck out one declaring that the "money standard of value was no longer open to question," "thus removing that issue from the field of political contention." This was a concession to the Populists, and as a concession to the Democrats of New York State the proposal to levy an income tax was also abandoned. In spite of this, the Convention nominated Justice Parker (Chief Justice of the Court of Appeal, 1889 to 1904) for the Presidency (9th) at first by 658 votes out of 994, and then unanimously. Directly he heard of his nomination, Justice Parker telegraphed to the Convention: "I regard the gold standard as firmly and irrevocably established, and shall act accordingly if the action of the Convention to-day shall be ratified by the people. As the platform is silent on the subject, my view should be made known to the Convention; and if this proves to be unsatisfactory to the majority I request you to decline nomination for me at once, so that another may be nominated before the adjournment."

The Convention then, by 798 votes to 184, adopted the following resolution: "The platform adopted by this Convention is silent on the question of a monetary standard because it is not regarded by us as a possible issue in this campaign, and only campaign issues were mentioned in the platform. Therefore there is nothing in the views expressed by you in the telegram just received which would preclude a man entertaining them from accepting nomination on the said platform." In accepting nomination, Justice Parker afterwards (Sept. 25th) again expressed his unqualified

belief in the gold standard, and declared that the necessity for tariff reform was never greater than at the present time. The existing high duties were a direct incentive to the formation of huge industrial combinations, which, secure from foreign competition, were enabled to monopolise the home market. He advocated further legislation with regard to the trusts if, contrary to his expectation, the existing laws proved inadequate. As the election drew near, Mr. Parker openly accused the Republicans of having formed an alliance with the Trusts for Mr. Roosevelt's return, and denounced the arrangement by which the President first appointed his private secretary, Mr. Cortelyou, Minister of Commerce, with power to inquire into the business secrets of all the corporations, and then appointed him campaign manager, to collect funds from the same corporations. These accusations President Roosevelt personally repudiated as "monstrous," declaring that "the assertion that there has been any blackmail, direct or indirect, by Mr. Cortelyou or by me, is a falsehood," and asserting that "if elected I shall go into the Presidency unhampered by any pledge, promise or understanding of any kind, sort or description, save my promise made openly to the American people that, so far as in my power lies, I shall see to it that every man has a square deal, no less and no more."

The election resulted in an overwhelming victory for the Republicans. The majority for Mr. Roosevelt was about 2,000,000 in terms of the popular vote, nearly three times as great as Mr. McKinley's in 1896. The electoral votes gave 325 for Mr. Roosevelt and 133 for Mr. Parker with Missouri in doubt. The Republican majority in the Senate exceeded 20, and the House of Representatives had a Republican majority of 98 as compared with 34 in the previous House.

### History, 1904.

In a special Message to Congress the President urgently called upon the Senate to ratify the treaty with the Republic of Panama (Jan. 4th), which they did on Feb. 23rd. The Republic, he said, was an accomplished fact, and the only question was whether or not the U.S. Government should build the Isthmian Canal.

A terrible fire broke out at Baltimore (Feb. 8th). The old centre of the city was absolutely destroyed, including the entire business quarter.

The negotiations between Japan and Russia had been watched with the closest attention by the U.S. Government, and on the outbreak of war a note was addressed to the Governments of Russia, Japan and China, expressing the earnest desire of the U.S. Government that the neutrality of China, and in all practicable ways her administrative entity, should be respected by both parties, and that the area of hostilities should be localised and limited as much as possible. See RUSSO-JAPANESE WAR.

The Supreme Court by 5 votes to 4 sustained the decision of the Circuit Court in the Northern Securities Company case, declaring the Company illegal (March 14th). The Court held that the combination would place the control of the two roads in the hands of the Securities Co. by virtue of its ownership of the bulk of the stock of both companies, and would thus destroy every motive for competition, to the benefit only of the stockholders. Mr. Sully, of the firm of

D. J. Sully & Co., who had largely controlled the Cotton Exchange for some time, and whose operations had run the price of cotton up to a high figure, failed (18th) and a panic ensued on the cotton market.

The President issued a decree awarding a pension to every soldier over 62 who took part in the Civil War, and as the effect would necessarily be to add largely to the already swollen pension list the decree called forth much severe criticism. Mr. Roosevelt was openly accused of seeking to influence votes for his re-election. A motion in the House of Representatives directing the Judiciary Committee to investigate the decree was only defeated by 3 votes, the normal Republican majority being 34 (April 9th). Congress was closed (28th) in the midst of a ferment as to the approaching Presidential election, and not without loud complaints as to the alleged extravagance of the Administration. For details as to the election see above.

During the year **Arbitration treaties** on the usual lines were concluded with France, Great Britain, Germany, Portugal, Spain, and Switzerland. The action of the President as to a Second Hague Conference is described under International Arbitration on p. 272.

The **bronze statue of Frederick the Great** which the German Emperor had offered as a gift of friendship to the American people was formally accepted and unveiled by the President at Washington, where it is placed in the grounds of the War College (Nov. 19th). The President expressed "deep appreciation of the friendly regard which it typifies for the people of this Republic both on the part of the Emperor and of the German people."

After the election Congress met (Dec 5th) and received the President's message (6th). Dealing with the relations of **Capital and Labour**, he expressed the view that labour organisations should be encouraged, and that they had a legal right to refuse to work with men who declined to join their organisations; but when they sought improper ends or employed improper methods they should be opposed as resolutely as the wrongdoing of any great corporation should be. There should be a stringent **Employers' Liability Law**. **Great corporations** were necessary, but should be managed with due regard to the interest of the public as a whole, and if necessary the law must be strengthened to enforce this. The means for improving **American trade with Asia** were discussed, and the revision of the **Naturalisation Laws** was advocated. A plea for a strong army and navy was followed by the declaration that the steady aim of the nation should be "to strive to bring ever nearer the day when there shall prevail throughout the world the peace of Justice." There was as yet no judicial way of enforcing a right in international law, and therefore disarmament was impossible. It was not possible as yet to arbitrate all matters of possible international difference, but at the **Second Hague Conference** it was to be hoped that the work already begun might be carried further towards completion. The **Philippines** could not yet be granted independence, but he hoped they would be able eventually to stand, if not alone, yet in such a relation to the U.S.A. as Cuba stood.

The **St. Louis Exhibition**, or **World's Fair**, was held in 1904 to celebrate the centennial of the Louisiana Purchase, by which the

territory of Louisiana, 1,000,000 square miles was acquired from Napoleon in 1803-4, and was formally opened on April 30th. About 14,000,000 people visited the Exhibition, which from the points of view of attendance, influence, and financial result, did not come up to expectations.

### **Territories and Dependencies.**

**Alaska** is a territory in the extreme N.W. of North America, purchased from Russia by the United States in '68. The area is 590,884 sq. m. and the population in 1900 was given as 63,592. The chief town is Juneau, pop. 3000, a point of departure for the **Yukon gold region**, so named from the river Yukon, which rises in British territory, and has a course of over 2000 miles to its mouth in Behring Sea. In 1900 Alaska was made a military department by the United States Government. There are valuable fisheries on the coast. The boundary line between Alaska and British territory, after being in dispute for a long time, was settled in 1903.

**Guam**, the largest of the Marianne or Ladrone Islands (see p. 240), was ceded to the United States by Spain in '98, for use as a coaling station. It has a good roadstead. Area, about 200 sq. m.; pop. about 9000. The capital is Agaña: pop. 6000.

The **Hawaiian Islands** are a group of eight inhabited and four uninhabited islands in the North Pacific, forming a territory of the United States. Area, 4990 sq. m.; pop. 154,000, including over 25,000 Chinese, over 60,000 Japanese, and about 28,500 whites. Capital, **Honolulu**, on the south-west coast of the island of Oahu, pop. 39,305. Until '93 the Government of the islands was that of a limited monarchy, under Queen Liliuokalani; but then a revolution broke out, the Hawaiian Republic was proclaimed, and a new Constitution was promulgated on July 4th, '94. The islands were annexed to the United States in '98, attached to the department of California for military purposes, and made a Territory in 1900, all whites and those of African or Hawaiian descent who were citizens of the Republic prior to the annexation being declared citizens of the United States. The administration is carried on by a Governor with a legislature of two Houses, a Senate of 15 and a House of 30 members. The natives almost all profess the Christian faith and education is general. **Exports**: sugar, rice, coffee, hides, wool, whale oil, and bone. The bulk of the trade is with the United States. Steamers connect the islands with America, Australasia, and China. **Imports**, 190-1, £5,082,810; **exports**, £5,784,291.

British Consul, W. K. Hoare (Honolulu).

The **Philippine Islands** form a large group of the Asiatic Archipelago. Area, 122,000 sq. m.; pop., according to a census taken in 1903, 6,976,574. The largest islands are Luzon (47,238 sq. miles) and Mindanao (36,237 sq. miles). The capital is Manila, with a population of over 302,000. The inhabitants, apart from the Europeans and Americans, consist of the aborigines, called Negritos; the Igolotes, probably of Chinese descent, who are the agriculturists of the islands; and the Tagalos, who are Malay immigrants. Until '98 the islands formed a Spanish colony, but after the **Americo-Spanish war** they were ceded to the United States, as territorial indemnity for t'

expenses of the war. In 1902 a Civil Governor was appointed, with a Legislative Body consisting of seven Commissioners, four Americans and three Filipinos. The islands are divided into 39 provinces, each under an elected Governor, and all the towns have self-government through an elected President and Councillors. Great mineral wealth is said to exist, and coal, iron, and gold are now being mined in Cebu and Luzon with some success. The chief industries are in the hands of the Europeans and the Chinese, who number about 25,000 and 100,000 respectively. Sugar, hemp, coffee, cigars, and tobacco are exported. The islands are specially rich in timber. Imports, 1901, £6,500,000, of which nearly one-half went from British ports; exports, £4,150,000, of which about two-thirds went to British ports.

Governor, Luke E. Wright (appointed 1904).

British Consul-General, W. J. Kenny (Manila).

**Porto Rico**, until '98 a Spanish colony, but then ceded to the United States by the Spanish-American treaty of peace, lies to the east of San Domingo, in the West Indies. It is administered by a Governor with an Executive Council, consisting of 6 officials and 5 natives appointed by the President, and a Legislative Assembly of 35 members elected on a franchise restricted by a small property qualification and a low educational test. Its area is about 3606 square miles, and the pop. 953,243, of whom about 60,000 are negroes, about 300,000 mulattoes, and about 590,000 whites. The chief towns are: San Juan, pop. 32,048; Ponce, 27,952. The island is mountainous, and the climate healthy. The country is generally fertile, and the chief exports are coffee, fruit, sugar, tobacco, and timber. Free trade between the island and the United States was inaugurated in July 1901 with very beneficial results on the sugar and tobacco trades. The United States send the great bulk of the imports and take most of the exports. Imports, 1902, £2,860,284; 1903, £2,726,728; exports, 1902, £2,637,399; 1903, £2,855,968.

British Consul, W. B. Churchward (San Juan).

**Samoa Islands.** By an agreement between Great Britain and Germany concluded Nov. 9th, '99, and approved in Jan. 1900 by the United States, the Samoa Islands, which lie in the Western Pacific, were divided, Upolu and Savaii being assigned to Germany, and Tutuila and the other Samoan islands E. of 171° E. long. to the United States, Great Britain renouncing all her rights over the islands. Tutuila (area 54 sq. miles, pop. 3800) has the magnificent harbour of Pago Pago. In Feb. 1900 the United States appointed a naval governor. The other islands have an area of about 25 sq. m., with about 2000 inhabitants. The U.S. and British Governments were (Oct. 14th, 1902) adjudged to be responsible for losses caused by the fighting in '99, under the decision of the King of Sweden. Imports, 1902-3, £32,430; exports, £8,820.

## UNIVERSITIES.

### England.

**Birmingham University**, incorporated by royal charter March 24th, 1900, grew out of Mason University College, Birmingham, which was founded by Sir Josiah Mason, Kt., in '75, and opened in '80, being subsequently incorporated by the Mason University College Act of '97. The University includes faculties of

science, arts, medicine, and commerce; others may be added by statute. It is a teaching and examining University, and on Oct. 1st, 1900, under the provisions of the Birmingham University Act, 1900, the whole of the endowments, equipment, and staff of Mason University College were merged in the University. These endowments amount to about £200,000, and in addition the University funds amount to upwards of £400,000. The following are the officers of the University: Chancellor, The Rt. Hon. J. Chamberlain, M.P.; Vice-Chancellor, C. G. Beale, Esq., M.A.; Pro-Vice-Chancellor and Treasurer, F. C. Clayton, Esq., J.P.; Principal, Sir Oliver J. Lodge, LL.D., F.R.S.; Vice-Principal and Registrar, R. S. Heath, M.A., D.Sc.; Dean of the Faculty of Science, J. H. Poynting, Sc.D., F.R.S.; Dean of the Faculty of Arts, Hermann G. Fiedler, M.A., Ph.D.; Dean of the Faculty of Medicine, vacant; Dean of the Faculty of Commerce, W. J. Ashley, M.A. Secretary, George H. Morley.

**Cambridge University.** About the middle of the thirteenth century students began to collect in hostels. The endowed colleges gradually absorbed the hostels, the last of which was annexed to Trinity in 1540. The legislative bodies are the Senate, which consists of graduates, and the Council, a smaller body elected therefrom. Like Oxford, the University underwent important changes in 1882, as did also many of the colleges in both universities. The following is the list of colleges: (Founded 1257), *Peterhouse*—Head, A. W. Ward, Litt.D. *Undergraduates*, 47; (1326), *Clare*, E. Atkinson, D.D., 178; (1347), *Pembroke*, A. J. Mason, D.D., 220; (1348), *Gonville and Caius*, E. S. Roberts, M.A., 218; (1350), *Trinity Hall*, E. A. Beck, M.A., 166; (1352), *Corpus Christi*, E. H. Perowne, D.D., 49; (1441), *King's*, A. A. Leigh, M.A., 148; (1448), *Queens'*, F. H. Chase, D.D., 99; (1473), *St. Catherine's*, C. K. Robinson, D.D., 65; (1496), *Jesus*, H. A. Morgan, D.D., 114; (1505), *Christ's*, John Peile, Litt.D., 179; (1511), *St. John's*, C. Taylor, D.D., 223; (1519), *Magdalene*, S. A. Donaldson, M.A., 36; (1546), *Trinity*, H. M. Butler, D.D., 629; (1548), *Emmanuel*, W. Chawner, M.A., 192; (1595), *Sidney Sussex*, Charles Smith, M.A., 72; (1800), *Downing*, Alex. Hill, M.A., M.D., 69. *Hostels* (1882), *Selwyn*, A. F. Kirkpatrick, D.D., 91; (1884), *Non-Collegiates*, 84. *Censor*, T. F. C. Huddleston, M.A. Total, 2879. The examinations necessary for the degree of Bachelor are the Previous ("Little Go"), General, and Special examinations. Candidates for Honours have to pass an additional examination in Mathematics, French or German with their Previous. The *Triplices*, which for Honour candidates take the place of the General and Special, are Classical, Mathematical, History, Law, Theology, Moral Science, Mechanical Science, Natural Science, Oriental Languages, and Mediæval and Modern Languages, Economics and Political Science. Women are admitted to the examinations for honour students, and reside mostly in *Newnham College* and *Girton College*. (See article EDUCATION, V., p. 148.) Vigorous efforts have been made to secure the advantages of degrees for women by resident and non-resident members of the University, but hitherto without success. In 1902 Mr. John Morley presented the Acton Library of from 60,000 to 70,000 volumes, dealing with "the history of civilised govern-

ments, the growth of faiths and institutions, the fluctuating movements of human thought, all the struggles of churches and creeds, the diverse types of great civil and ecclesiastical governors, the diverse ideals of states," to the University. The theological college of the Presbyterian Church of England was in '99 transferred to Cambridge and renamed **Westminster College**, but it has no official connection with the University. Many public schools are inspected by the University, and thousands of scholars in the Grammar and High Schools of the country compete in the **Cambridge Local Examinations**, while those who attend the University local lectures are also to be numbered by thousands. (See *University Extension*, p. 743.) The undergraduates have two most able organs, the *Cambridge Review*, and the *Granta*. Degrees: D.D., B.D., Sc.D., Litt.D., M.A., B.A., M.D., M.B., M.C., B.C., LL.D., LL.M., LL.B., Mus.D., Mus.M., Mus.B. Chancellor, His Grace the Duke of Devonshire, K.G., LL.D. Vice-Chancellor, E. A. Beck, M.A., Trinity Hall; High Steward, Lord Walsingham. Parliamentary representatives, Prof. Sir R. C. Jebb, Litt.D., and Sir J. E. Gorst, M.A. (see *PARLIAMENT*, p. 476). Proctors, 1904-5: W. L. H. Duckworth, M.A., Jesus; W. M. Fletcher, M.A., Trinity. Registrar, John Willis Clark, M.A. Assistant Registrar, E. G. Swain, M.A. Consult *Camb. Univ. Calendar and Ordinances of the University*.

**Durham University**, founded 1832, comprises **University College** (37), **Bishop Hatfield's Hall** (46), the **Durham College of Medicine** (52) and the **Durham College of Science** (71) at Newcastle-upon-Tyne. The students number 220 at Durham, and about 2000 (reckoning matriculated and non-matriculate students) at Newcastle. Unattached students first admitted '71. Affiliated are **Codrington College**, Barbados, and **Fourah Bay College**, Sierra Leone. Warden, the Dean of Durham, Very Rev. G. W. Kitchin, D.D., F.S.A., who is also President of the College of Science; President of the College of Medicine, Sir G. H. Philipson, M.A., M.D., D.C.L., LL.D. Degrees: D.D., B.D., M.A., B.A., D.C.L., B.C.L., M.D., M.B., M.Surg., B.Surg., M.Sc., B.Sc., D.Litt., B.Litt., D.Sc., M.Sc., B.Sc., Mus.D., Mus.B. Licences in theology, Diplomas in public health, in the theory and practice of teaching, and Certificates of proficiency in general education, are also granted. Local University Lectures are also given in connection with this University, and local examinations have been established. Consult *Durham University Calendar*.

**Leeds University**, founded in 1904. Chancellor, Marquis of Ripon. Registrar, W. F. Husband, LL.B.

**Liverpool University** grew out of University College, Liverpool, which was established and received its charter of incorporation in Oct. 1881, and was one of the three federal colleges of Victoria University. Application was made in Dec. 1902 to His Majesty's Privy Council praying for the grant of a charter establishing a University in Liverpool, which was granted in July of the following year. Chancellor, The Right Hon. the Earl of Derby, K.G., G.C.B., LL.D. Vice-Chancellor, A. W. W. Dale, M.A.; Registrar, Prof. P. Hebblethwaite, M.A. The Degrees which the University grants are as follows:—B.A., M.A., Litt.D., B.Sc., M.Sc., D.Sc., B.Eng., M.Eng., D.Eng., LL.B., LL.M., LL.D., M.B., Ch.B., M.D., Ch.M.

**London, The University of**, under its fourth royal charter, dated 1863, was constituted as an examining body with the power of conferring degrees. In '78 it received an additional charter admitting women to all degrees without exception. Besides holding examinations in London, the University extends them when required to the provinces and the colonies. From its foundation, in '36, to 1901 inclusive, it had examined 145,311 candidates. The **University of London Act, '98**, made provision for the reconstitution of the University of London as a teaching as well as an examining body, and for the appointment of a Commission, which duly reported; and the University of London is now reorganised in accordance with the statutes and regulations drawn up by the Commission. Under these statutes, which received the royal assent on June 29th, 1900, the University undertakes teaching functions in addition to its hitherto exclusively examination work. The Senate consists of the Chancellor, the Chairman of Convocation, and fifty-four persons appointed by the Crown, Convocation, the Faculties, and various other bodies. There are three Standing Committees of the Senate: the Academic Council, the Council for External Students, and the Board to Promote the Extension of University Teaching. Convocation consists of the Chancellor, the Vice-Chancellor, all members of the three Standing Committees of the Senate not already on Convocation, and the registered graduates of the University of prescribed standing. Members of Convocation not being females or otherwise disqualified constitute the Parliamentary constituency of the University. Convocation is represented by 16 members on the Senate. The Faculties are eight in number, but the Faculty of Laws is not yet constituted. The other seven, with their respective Deans, are: **Theology**, Rev. A. C. Headlam, D.D.; **Arts**, Prof. E. A. Gardner, B.A.; **Music**, Sir Walter Parratt, M.V.O., Mus. Doc.; **Medicine**, J. K. Fowler, M.D., F.R.C.P.; **Science**, A. D. Waller, M.D., F.R.S.; **Engineering**, Prof. J. D. Cormack, B.Sc.; **Economics**, G. Armitage-Smith, M.A. The Faculties are represented by 16 members on the Senate. The Teaching Staff is organised under two categories: (1) Appointed Teachers paid out of the University Funds; (2) Recognised Teachers appointed and paid by the Schools of the University and other approved Institutions, and recognised by the Senate as conducting work of University rank. Since 1900 the University, which formerly had its headquarters in Burlington Gardens, has been housed in the eastern and central portions of the main block and portions of the inner block of the buildings of which the whole were formerly occupied by the Imperial Institute at South Kensington. Parliamentary representative, Sir Michael Foster, K.C.B., D.C.L., D.Sc., M.D., F.R.S. Representative on the General Medical Council, Philip Henry Pye-Smith, M.D., F.R.C.P., F.R.S. The degrees conferred are: B.D., D.D., B.A., M.A., D.Lit., LL.B., LL.D., B.Mus., D.Mus., M.B. and B.S., M.D., M.Sc., B.Sc., D.Sc., B.Sc. (Eng.), D.Sc. (Eng.), B.Sc. (Econ.), D.Sc. (Econ.). For regulations as to the several Internal Examinations apply to the Academic Registrar; as to the External Examinations, to the External Registrar; as to University Extension Lectures and the Inspection and Examination of Schools, to

the University Extension Registrar, University of London, South Kensington. Consult *London University Calendar*.

Chancellor, the Rt. Hon. the Earl of Rosebery, K.G., K.T., LL.D., F.R.S.

Vice-Chancellor, Philip Henry Pye-Smith, M.D., B.A., F.R.C.P., F.R.S.

Chairman of Convocation, Sir Edward Henry Busk, M.A., LL.B.

Principal, Sir Arthur William Rücker, M.A., D.Sc., LL.D., F.R.S.

Registrar of the Academic Council, Philip Joseph Hartog, B.Sc.

Registrar of the Council for External Students, Alfred Milnes, M.A.

Registrar of the Board to Promote the Extension of University Teaching, Robert Davies Roberts, M.A., D.Sc.

Secretary to the Senate, Percy Maxwell Wallace, M.A.

Superintendent of Examinations, W. H. Sampson, B.A., B.Mus.

Clerk of Convocation, Henry Ebenezer Allen, LL.B., B.A.

**Oxford University.** This University seems to have grown up in the twelfth century, although to Alfred the Great used to be ascribed the foundation of one college, University, in 872. Originally the scholars at Oxford lived scattered about in various houses in the city, meeting for instruction, but in other respects resembling the non-collegiate students of the present day. The number of undergraduates in residence in 1903 was 3570. The number has doubled in the last forty years. The matriculations in 1903 were 879; 362 took the M.A., and 517 the B.A. degree. The University began to experience reform at the hands, to some extent, of devoted sons in 1854. The Ordinance of that year, amongst other changes, assigned positive and not merely ornamental duties to the professoriate. The second Universities Commission introduced some sweeping changes which began to take effect in '82. Not the least of them, as affecting the **personnel** of the Colleges, was the substitution of Prize and Tutorial Fellowships for Life Fellowships (which had been voided, as a rule, by marriage, or neglect, save under dispensation, to take Holy Orders, and for none other cause). The Government of the University vests in three bodies: **The Hebdomadal Council** (so called from meeting once a week in term), which alone has power of initiation, **Congregation** (consisting of resident M.A.s and members of superior faculties), which has power of rejection and amendment, and **Convocation** (all M.A.s and members of superior faculties), which has power of rejection alone. The two latter bodies consist of members of Colleges, Halls, or of the Non-Collegiate Body. The Colleges, with reputed dates of foundation, and Heads, are: University, 872 (?), J. F. Bright, D.D.; Balliol, 1262, E. Caird, M.A.; Merton, 1270, T. Bowman, M.A.; Exeter, 1314, W. W. Jackson, D.D.; Oriel, 1326, D. B. Monro, D.C.L.; Queen's, 1340, J. R. Magrath, D.D.; New College, 1386, W. A. Spooner, D.D.; Lincoln, 1427, W. W. Merry, D.D.; All Souls, 1437, Sir W. R. Anson, Bart., M.P., D.C.L.; Magdalen, 1456, T. H. Warren, M.A.; Brasenose, 1509, C. B. Heberden, M.A.; Corpus Christi, 1516; Christ Church, 1532, Dean, the Very Rev. T. B. Strong, D.D.; Trinity, 1554, H. F. Pelham, M.A.; St. John's, 1555, J. Bellamy, D.D.; Jesus, 1571, J. Rhys, D.Litt.; Wadham, 1613, P. A. Wright Hender-

son, D.D.; Pembroke, 1624, Rt. Rev. Bishop Mitchinson, D.C.L.; Worcester, 1714, C. H. O. Daniel, D.D.; Hertford, 1874, H. Boyd, D.D. The only remaining Public Hall: St. Edmund, 1226, E. Moore, D.D. New Foundation, Keble College, 1869, W. Lock, D.D. The **Non-Collegiate Body** was instituted in 1868; Censor, R. W. M. Pope, D.D. The Private Halls, which bear the name of their Master, are: (E. S.) Grindley's; (C. A.) Marcon's; (J. O'F.) Pope's; (Sir D.) Hunter-Blair's; (W.) Addis'. A statute (passed in '80, amended in '93), allowing colleges within His Majesty's dominions to affiliate, has been adopted by St. David's College, Lampeter, University College, Nottingham, University College, Sheffield, Reading College, and Hartley College, Southampton. Under a similar statute (of '87), applying to Colonial Universities, the following Universities enjoy the privileges therein contained:—Cape of Good Hope, Sydney, Calcutta, Punjab, Bombay, Adelaide, Madras, Melbourne, New Zealand, Allahabad, Toronto, Tasmania, Montreal, New Brunswick and Malta. The degrees ordinarily granted by the University are: Baccalaureate and Magistrate in Arts, and in the Sub-Faculty of Surgery, included in the Faculty of Medicine; the Baccalaureate and Doctorate in the Superior Faculties of Divinity, Law, and Medicine, and in the Faculty of Music, also (by a recent change) in Letters and Science. For the Baccalaureate in all these faculties except Divinity, an examination must be passed. For that Baccalaureate, and for all the Doctorates except Music, a thesis or exercise qualifies. The quasi-Faculty of Music stands alone, but to entrance into all the other faculties the attainment of the Baccalaureate in Arts is essential. It may be taken either as a Pass or in any one of the Honour "Schools" of Classics, in its two divisions of Moderations and Litteræ Humaniores, Mathematics (also divided into Moderations and Final Schools), Jurisprudence, Modern History, Theology, Natural Science, in one or more of its several branches, Oriental Languages, and English Literature. Equally with passing the examinations, residence for twelve terms (of which for these purposes there are four in each year) is essential, but it need not be continuous nor contemporaneous with the passing of examination, standing for which is reckoned from the date of matriculation, *i.e.*, formal entry into membership of the University. **Women** are admitted to the examinations for the B.A. degree, but here at present their privileges cease. They may join Somerville College, Lady Margaret College, St. Hugh's Hall, St. Hilda's, or the Home Students, a body in some degree resembling the Non-Collegiate Body (see **EDUCATION**, p. 149). Two colleges, neither of which has any official connection with the University, have within recent years removed to Oxford: **Mansfield**, Principal A. M. Fairbairn, in '89; **Manchester**, Principal J. Drummond, in '93. **Ruskin Hall**, which also is not officially connected with the University, was opened in St. Giles' Street in Feb. '99 for the furtherance of the education of the working classes. **Chief Officers** of the University: **Chancellor**, Viscount Goschen; **Vice-Chancellor**, W. W. Merry, D.D., Rector of Lincoln Coll.; **Proctors**, E. J. Palmer, M.A., Balliol, and J. L. Myres, M.A., Christ Ch.; **Parliamentary representatives**, Rt. Hon. J. G. Talbot and Sir W. R. Anson, Bart., D.C.L., All Souls'. See **RHODES SCHOLARSHIPS** as to

Mr. Rhodes' Scholarship Scheme. Clerk of the University, E. H. Bellamy.

Victoria University, of Manchester, founded and incorporated by royal charter 1880 and reconstituted 1903, grew out of Owens College, Manchester, which was established '51. John Owens, a Manchester manufacturer, vexed with the tests at the Universities, bequeathed, on his death in '46, £96,654 for the purpose of founding this college. In '80 the College became the first college of Victoria University. Total students, exclusive of evening students (1904-5): arts, science, and law students (including 242 women students), 842; and medical students (including 10 women students), 288. The admission of women was sanctioned by the Extension Act. There are three halls of residence—the "Hulme," the "Dalton," both for men only, and two Women's Halls of Residence: Ashburne House, Victoria Park, and the Victoria Church Hostel, Oxford Road. Chancellor, Earl Spencer, K.G.; Vice-Chancellor, Alfred Hopkinson, K.C., LL.D. Registrar, Edward Fiddes, M.A. Grants technical and commercial certificates, teaching diplomas and diplomas in Public Health to properly qualified candidates, and certificates to women, and examines schools. Its degrees are: B.A., M.A., B.Sc., M.Sc., LL.B., M.B. and Ch.B., Ch.M., Mus.B., Litt.D., D.Sc., LL.D., M.D., Mus.D., M.Com., B.Com., D.D., B.D.

#### Scotland.

Aberdeen University was founded in 1494 by Bishop Hoplinstone as a *Studium Generale*, in which he constituted a college in 1505 known as King's College. In 1593 George Keith, 5th Earl Marischal, founded Marischal College, which came to be also a university distinct from the former foundation. In 1860 these two universities were united in one institution, and now form the University of Aberdeen. Chancellor, The Right Hon. Lord Strathcona and Mount Royal. Lord Rector, Rt. Hon. C. T. Ritchie, M.P. Principal, The Very Rev. John Marshall Lang, D.D. Secretary of Court, Mr. R. Walker. Secretary of Senatus, Mr. D. R. Thom. Librarian, Mr. P. J. Anderson. There are 24 professors, 13 lecturers, and upwards of 850 matriculated students. In conjunction with Glasgow it sends one representative to Parliament (present member, the Right Hon. J. A. Campbell, LL.D.). It grants degrees in Arts, Science, Divinity, Law, and Medicine, and is empowered to admit women as well as men to those degrees. It also grants certificates of proficiency to women in the local examinations which it has instituted throughout the northern counties of Scotland. Its degrees are: M.A., D.Litt., D.Phil., B.D., D.D., B.L., LL.D., M.B., Ch.B., M.D., Ch.M., B.Sc., D.Sc., D.Sc. (Agr.); whereof D.D. and LL.D. are purely honorary.

Edinburgh University, founded 1582, has since become one of the chief medical centres in the world. During 1903 the total number of matriculated students was 2990. Of these 873 were enrolled in the Arts Faculty, 1451 in the Faculty of Medicine, 352 in Law, 50 in Divinity, 238 in Science, and 26 in Music. The aggregate value of the University fellowships, bursaries, and prizes now amounts to about £18,150 per annum, most of the bursaries being open to competition. Chancellor, Rt. Hon. A. J. Balfour; Lord Rector, Rt. Hon. Sir R. B. Finlay, K.C., M.P.; Principal, Sir William Turner, K.C.B., D.C.L.,

LL.D. Conjointly with St. Andrews it sends a representative to Parliament; present member Sir John Batty Tuke, K.B., M.D., D.Sc., LL.D. Its Degrees are: M.A., B.D., D.D., LL.B., B.L., LL.D., M.B., Ch.B., M.D., Ch.M., B.Sc., D.Sc., D.Litt., D.Phil., Mus.D., Mus.B. Women are admitted to the Arts, Divinity and Science classes, and to Graduation in Arts, Science and Music on the same terms as men. Of the above number of matriculated students, 300 were women, while 1014 women were attending extra-academical classes qualifying for graduation in Medicine, and 30 were also among the non-matriculated students, chiefly in attendance on the Music Classes. Women who have obtained their medical education in universities, or recognised extra-academical schools, are now admitted to degrees in medicine and surgery in the university. Secretary of Senatus, Prof. Sir L. J. Grant, Bart., B.A., LL.D. Consult *Edinburgh University Calendar*.

Glasgow University. Founded by a bull of Pope Nicholas V. in 1451; received a new charter from James VI. of Scotland in 1577; remodelled by the Universities (Scotland) Acts, 1858 and 1889. There were last session 2141 students (344 women), and of the total 959 were students in Arts (273 women) and 772 students of Medicine (65 women). Women students are taught separately at Queen Margaret College. See article on EDUCATION, V., p. 149. Chancellor, Rt. Hon. Lord Kelvin. Rector, Rt. Hon. George Wyndham, M.P. Principal and Vice-Chancellor, Robert Herbert Story, D.D., LL.D. Parliamentary representative, Rt. Hon. J. A. Campbell, LL.D. Registrar of General Council, James Coult, M.A. Degrees: M.A., D.Phil., D.Litt., B.Sc., D.Sc., B.L., LL.B., LL.D., M.B. and Ch.B., M.D., Ch.M., B.D., D.D. Among the distinguished alumni are Cardinal Beaton, John Knox, Adam Smith, Tobias Smollett, James Boswell, Thomas Campbell, Francis Jeffrey, Archbishop Tait, Principal Caird, Principal Shairp, Rev. R. S. Candlish, and Lord Kelvin, Lord Sandford, Sir Henry Craik, James Bryce, M.P., Sir H. Campbell-Bannerman, M.P., etc.

St. Andrew's University, founded 1411, is thus the most ancient of the universities of Scotland. It included three separate colleges and corporations: (1) St. Salvador's (1450), (2) St. Leonard's (1512), and (3) St. Mary's (1537). In 1747 the two first-named were united and took the faculties of arts and medicine; St. Mary's being devoted to theology. University College, Dundee (founded in 1880), was affiliated to and made to form part of the University of St. Andrews by an ordinance which received the approbation of Her Majesty Jan. 15th, '97. Chancellor, Lord Balfour of Burleigh. Vice-Chancellor and Principal, J. Donaldson, M.A., LL.D. Rector, Andrew Carnegie, LL.D. Jointly with Edinburgh University it returns a representative to Parliament—the present member is Sir John Batty Tuke, M.D. Secretary and Registrar, Andrew Bennett. Degrees: M.A., B.D., D.D., LL.D., M.B., Ch.B., M.D., M.S., B.Sc., D.Sc., D.Phil., D.Litt. The Bachelors in the several faculties—divinity, law, medicine, and science—have the hoods of their faculties bordered with white fur instead of lined with white satin. The diploma and title of LL.A. is also granted to women. In Oct. '92 the classes of the University and also the degrees of M.A. B.Sc., M.B., Ch.B., and M.D. were thrown open to women. Bursaries, scholarships and prizes of the aggregate annual

value of about £5500 are available for students of the several Colleges. A number of these bursaries are available for women students, and a Hall of Residence has been built on the University grounds for their accommodation. **Warden:** Miss Frances H. Melville, M.A.

**Carnegie Trust for the Universities of Scotland.** The, was constituted in 1901 to administer a sum of ten million dollars, in bonds of the United States Steel Corporation, given by Mr. Andrew Carnegie for improving and extending the opportunities for scientific study and research in the Universities of Scotland, and rendering attendance at these Universities more available to the deserving and qualified youth of that country to whom the payment of fees might act as a barrier to the enjoyment of these advantages. **Chairman,** The Earl of Elgin. **Treasurer,** Mr. John Ross, Solicitor, Dunfermline; **Secretary,** Mr. William S. McCormick; **Offices,** The Merchants' Hall, Edinburgh.

### Ireland.

See also Irish University Education on p. 280.

**Dublin University.** The University of Dublin, commonly known as **Trinity College, Dublin**, was founded in 1591 by Queen Elizabeth, under the style of the College of the Holy and Undivided Trinity, near Dublin, mother of the University (*Mater Universitatis*). Its constitution has been altered by the charter of Charles I., and by numerous Royal statutes. In the Act of Union between Great Britain and Ireland (1800) it is spoken of as the University of Trinity College. The tercentenary festival of the College was celebrated in July 1892. The **Chancellor** of the University is the Earl of Rosse, and the **Vice-Chancellor** the Right Hon. D. H. Madden, LL.D. The undergraduates exceed 800, and there are some 200 graduates attending lectures in the professional schools. Certificates of proficiency are granted to women. **Degrees:** D.D., B.D., M.A., B.A., M.D., M.B., M.Ch., B.Ch., LL.D., LL.B., Mus.D., Mus.B., M.Engin., B.Engin., Sc.D., Litt.D. The two last-named are new degrees, conferred only for original research and for literary eminence. **Parliamentary representatives:** Rt. Hon. Sir Edward Carson, K.C., and Jas. Campbell, LL.D. **Provost,** Anthony Traill, LL.D.; **Vice-Provost,** Rev. J. W. Barlow, M.A.; **Bursar,** Francis A. Tarleton, LL.D.; **Senior Proctor,** Rev. Thomas K. Abbott, Litt.D.; **Senior Lecturer,** Rev. John P. Mahaffy, D.D.; **Registrar,** Robert Y. Tyrrell, Litt.D.; **Librarian,** Rev. T. K. Abbott, Litt.D. There are 28 Junior Fellows and 40 Professors. Consult *Dublin University Calendar*.

**Ireland, Royal University of, Earlsfort Terrace, Dublin,** founded 1880 under the University Education (Ireland) Act '79. On its establishment **Queen's University**, founded '50, at Dublin, dissolved; and the relations of the Queen's Colleges at Belfast, Cork, and Galway to the new University were revised. Its degrees, exhibitions, and scholarships are open as well to female as male students. The number of candidates who entered themselves for the various examinations of the University in the year 1904 was 3267. **Chancellor,** Rt. Hon. the Earl of Meath. **Vice-Chancellor,** Rt. Rev. Monsignor Molloy, D.D., D.Sc. **Secretaries,** Sir James C. Meredith, LL.D.; J. McGrath, LL.D. The degrees are: LL.D., LL.B., M.D., M.B., M.Ch., B.Ch., M.A.O., B.A.O., D.Mus., B.Mus.,

M.E., B.E., D.Sc., B.Sc., D.Litt., D.Ph., M.A., B.A. Diplomas are granted in the treatment of Mental Diseases, Sanitary Science, Teaching, Agriculture, and Engineering. Consult *The Calendar*.

### Wales.

**Wales, University of,** is a federal teaching University. Its constituent colleges are the University College of Wales, Aberystwyth, the University College of North Wales, Bangor, and the University College of South Wales and Monmouthshire, Cardiff. It has powers to confer degrees in the faculties of Arts or Letters, Science, Technical or Applied Science, Law, Music, and Theology. The charter passed under the Great Seal on Nov. 30th, '93. The sum of £3000 was granted, and since then a slightly increased sum has been allowed by the Treasury. Statutes have been adopted, a Theological Board formed, certain theological colleges recognised as institutions in which candidates for theological degrees in the University may receive instruction, and the general work of organisation be proceeded with. The University Senate, which is composed of the heads of departments in the three constituent colleges, has settled upon the courses of study for the initial degrees of the University in Arts, Science, Music, and Law. The matriculation examinations are held each year in June. The number of qualified candidates for matriculation in 1904 was 492. The candidates for degrees are annually increasing, and in 1904 they were 181 as against 152 in the previous year. The chief officers of the University are: **Senior Deputy Chancellor,** Sir Isambard Owen, M.A., M.D.; **Vice-Chancellor,** Principal E. H. Griffiths, M.A., Sc.D., F.R.S., University College, Cardiff; **Registrar,** Mr. Ivor James, University Registry, Cathays Park, Cardiff.

### University Extension.

The object of this movement is to provide "the means of higher education for persons of all classes and of both sexes engaged in the regular occupations of life." It commenced in '72 with the **University of Cambridge**; about four years later **Oxford** took it up—abandoning it, however, until '85; and in '76 was formed the **London Society for the Extension of University Teaching** within the Metropolitan area. **Durham University** was for a time associated with Cambridge in forwarding the work in Northumberland and Durham; **Victoria University** is also in the field; and the **Scotch Universities** worked on a similar plan for some time. The **University of Sydney**, New South Wales, adopted the scheme in '87. An American Society for the Extension of University Teaching has been formed at Philadelphia and Chicago, and several other American universities have begun work on similar lines.

**Cambridge.**—Under the Local Lectures (University Extension) Scheme there are two principal terms in the year—September to December, and January to March—and a course of twelve lectures is given in each term. Lectures are also given less often in the summer term—April to July. Short courses of six lectures are also arranged where it is thought desirable. Of the whole number of centres connected with Cambridge, eight are affiliated—

viz., Derby, Exeter, Hull, Newcastle-on-Tyne, Norwich, Plymouth with Stonehouse and Devonport, Scarborough, and Sunderland. (See previous eds. for the privileges given to affiliated students.) A town may come under the operation of the ordinary scheme by providing a place of meeting for the lectures and classes, and an inclusive fee of £50 per full course or £30 per short course to the University. All the local expenses are met by the local committee, who also fix and receive the fees. In connection with various County Councils courses on scientific subjects, bearing on agriculture, have been given annually by lecturers of the Syndicate since '91, followed in the summer by courses of practical work in the University Laboratory attended by Teachers holding County Council scholarships. For this work the system is variously modified to suit local needs. Large summer meetings, attended by students from all parts of the world, are arranged at Cambridge at intervals during the month of August. Full particulars as to the Local Lectures may be obtained from the Secretary for Lectures, Rev. D. H. S. Cranage, M.A., Syndicate Buildings, Cambridge.

**London.**—The work of the London Society has been transferred to the University, and is now carried on by the London University Extension Board, the Registrar of which is R. Davies Roberts, M.A., D.Sc., University of London, South Kensington, S.W.

**Oxford.**—The University first took an active part in educating non-matriculated students by means of University Extension Courses in '78. In '85 the system was reorganised on its present lines. Local committees at 139 centres acted last year (1903-4) in concert with the Oxford University Delegates, and arranged 190 courses. The number of lecturers was 45, and of lectures given 2211. Much of the work hitherto done by University Extension Lectures has been of an experimental nature, but there are many gratifying signs that while the early enthusiasm of the movement is not spent, its educational efficiency is steadily increasing. The method of University Extension work is (except in class work in languages or laboratory work in Natural Sciences) invariably the lecture, followed or preceded by a class supplemented by weekly exercises corrected by the lecturer. The next summer meeting will be held in Oxford in August 1905. All information can be obtained from the Secretary, Mr. J. A. R. Marriott, M.A., Examination Schools, Oxford. At Reading there is the University College, which is now an affiliated University College (Mr. W. M. Childs, M.A., Principal).

## UNIVERSITY AND OTHER SETTLEMENTS.

**Toynbee Hall** (Canon Barnett, M.A., Warden; T. Edmund Harvey, M.A., L.C.C., Deputy Warden) opened in Commercial Street, Whitechapel, in 1884. This was an Oxford movement, in which Balliol College took a leading part. The settlement was named after Arnold Toynbee, a tutor in Balliol College, who in '75 had taken rooms in Whitechapel, and had helped in parish work in St. Jude's for the purpose of studying economic problems.

The Oxford House, Mape Street, Bethnal Green, is a Church of England movement, founded in '84. Associated with the House

are the "Oxford House Working Men's Club" with 300 members, the "University Club for Working Men" with 350 members, the "Webbe Institute for Working Lads" with 300 members, the "Repton School Club" with 100 boys as members, the Old Repton Club for former members of the Repton Club, the S. Anthony's Boys' Club, the Excelsior Hall and Baths, Mansford Street, and a convalescent home for men and boys at Bexhill-on-Sea. There is a Ladies' branch working at St. Margaret's House, Victoria Park Square. The Head of the House is the Rev. H. S. Woollcombe, M.A. Mr. D. Eyre, Barrister-at-Law, is Vice-Head.

**Cambridge House** is the successor of, and incorporates, an older institution, the Trinity Settlement, and was founded in '97. It is located at 131, 133 and 135 Camberwell Road, S.E., and the Head of the House is the Rev. W. J. Conybeare. The House is a settlement for laymen; for all Cambridge men, past and present; and is endeavouring to help in the religious, educational, social, and philanthropic work of South London. There is a Mission House and Settlement at Battersea carried on by Gonville and Caius College, Cambridge, with headquarters at Caius House, Battersea Square (warden, Rev. Arthur Shillito). The Settlement comprises a Church, a Hall for entertainments, and a large Club-house for men, boys and girls.

**Mansfield House**, Barking Road, Canning Town, E. (Warden, J. Bruce Wallace, M.A.; Co-Warden, Rev. H. Cubbon, M.A.), commenced by students of Mansfield College, Oxford, works on religious (unsectarian) as well as on social and educational lines. A new residence, at 89, Barking Road, was opened in Dec. '97; it contains rooms for 17 men, besides offices and a reception room. There are also a meeting hall and men's club at 143-7, Barking Road; the "Youths' Institute and Lads' Club," 310-14, Barking Road, which cost £8500, a Public Refreshment Room and Restaurant, at 316, Barking Road, and the "Wave" Lodging House, with 156 beds, at 235, Victoria Dock Road, under the control of the Settlement.

The **Bermondsey Settlement** of which the Rev. J. Scott Lidgett, M.A., is warden in Farncombe Street, Jamaica Road, the Women's Branch being at 147 and 149, Lower Road, Rotherhithe, S.E., and at St. George's House, West Lane, is largely supported by Methodists (but is undenominational in general character).

The **Robert Browning Settlement**, York Street, Walworth Road, S.E. (F. Herbert Stead, M.A., Warden), was incorporated Jan. 1st, 1903, and aims at the amelioration of the life and lot of the people dwelling in the Borough of Southwark. It includes a Hall, Men's House, Browning Tavern (195, Walworth Road, S.E.), Browning Club (197, Walworth Road, S.E.), the Dale Library of Christian Sociology, the Michael Faraday Home for Old Folks at 85, Goodrich Road, East Dulwich, and a Holiday Home at Horsham, Sussex. Secretary, Alderman Mather, 69, Queen's Road, Peckham, S.E.; Superintendent of Medical Mission, W. H. Unwin, M.D., F.R.C.S.

The **Passmore Edwards Settlement**, towards the cost of which Mr. Passmore Edwards gave £14,000, is situated at Tavistock Place, St. Pancras. It comprises a lecture-hall, accommodating 450 persons, class-rooms, gymnasium,

library, entertaining-rooms, and rooms for a Warden and 17 Residents. It was founded, under the initiative of Mrs. Humphry Ward, to continue and develop the work formerly carried on at University Hall and Marchmont Hall, and to be a centre of education, recreation, and social life for the district. The Settlement is a centre of the University Extension Society, and the classes include history, literature, elementary science, music, newspaper class, etc. Free popular lectures and concerts are given on Saturday and Sunday evenings. The clubs include a club for working men and women, with the title of "associates," the "Denison Club" for working men, a boys' club, and a factory girls' club. There is also an Invalid Children's School, started two years ago in conjunction with the London School Board, the first of its kind in England. Warden of the Settlement, Mr. R. G. Tatton; Hon. Sec., Mrs. Humphry Ward.

**Woodbrooke Permanent Settlement**, Selby Oak, near Birmingham, has been given to the Society of Friends by Mr. and Mrs. G. Cadbury, and is under the care of the Summer School Continuation Committee. In it Friends and those associated with them are given the opportunity of more fully qualifying themselves for any service to which they may feel called. There are a number of scholarships. Applications should be addressed to J. H. Barlow, Sunnybrae, Selby Oak, near Birmingham.

Closely connected with University settlements are the settlements of women workers. **St. Margaret's House**, Bethnal Green (Miss Harington, resident Head), is the women's branch of Oxford House. Two branches have been formed, one at Stratford, E., under Mrs. Crossley, which works in conjunction with Oxford Trinity College Settlement, Tenby Road, Stratford, and another under Miss Wintour, at St. Mildred's House, Millwall, in the Isle of Dogs, E.

**The Women's Settlement in Canning Town**, E. (Miss R. H. Cheetham, chief resident worker), works upon an unsectarian basis. The Residence is at 457, 459 and 461, Barking Road, E.; the Offices, Club Rooms and Lees Hall are at 81, Barking Road, E.; the Hospital and Nurses' Home at 538 and 540, Barking Road, E.; the Dispensary at Quadrant Street, Old Canning Town. Hon. Secretaries, Mrs. Coote, Miss Shephard and Miss C. Spicer. Senior Resident Medical Officer, Miss Janet A. S. Monat, M.B., Ch.B. The branches of work carried on include: Medical Mission Hospital for Women and Children, Dispensary, district nursing, clubs for women and girls, branch of the Metropolitan Association for Befriending Young Servants, work among the invalid and crippled children, guilds of play, mothers' meetings, and visiting. Ladies received as resident and non-resident workers at the Settlement, or as probationers at the Hospital.

A committee of women students of the Universities manages a thriving Settlement, known as the **Women's University Settlement**, at 44, 45, and 46, Nelson Square, Blackfriars Road, S.E.: Warden, Miss H. Gladstone. Courses of training are arranged here in social work amongst the poor, and resident students are received. Fees from £35 to £40 per annum; for students, £60.

**University College, London** (University of London), founded 1826, opened '28, incorporated by Royal Charter '36, and re-

incorporated with additional powers '69. The College is now one of the "Schools" of the University of London, and provides instruction in the Faculties of Arts (including Fine Art), Law, Science, Engineering, Economics, and Medicine. The classes in Arts, Fine Art, Law, Science, and Economics are open to men and women. In connection with the Faculty of Medicine is **University College Hospital** (see MEDICAL SCHOOLS, p. 368). The College possesses seven museums, including the **Edwards Museum of Egyptology**: the hall under the dome contains the Flaxman sculptures. During the session 1903-4 there were 1246 students. During 1902 a movement was started to incorporate the College in the University of London, and thus enable the University to start its career as a "Teaching" University, with buildings, teachers and equipment, under its direct control. In order to bring this about it will be necessary to set free the whole of the college buildings for University purposes by removing the Boys' School, and to make certain financial and constitutional arrangements. For this purpose a sum of £200,000 is required, towards which all but £20,000 has been subscribed: in order to enable the College when incorporated to carry out its University functions, with adequate buildings and endowments, a much larger sum, estimated at about £800,000, is required. Lord Brassey is the Chairman and Sir R. Farrant the Treasurer of the Appeal Committee. President, Rt. Hon. Lord Reay, G.C.S.I.; Principal, T. Gregory Foster, Ph.D.; Acting Secretary, W. W. Seton, M.A.

## URUGUAY.

Uruguay is a republic on the east coast of South America, south of Brazil. Capital, **Monte Video**, pop. 276,034, at the mouth of the Rio de la Plata. The Executive is vested in a President elected for four years by the two Chambers sitting together as a general assembly. The legislature is composed of a Senate of 19 chosen for six years by an electoral college, one-third retiring every two years, and a Chamber of 69 members elected for three years, one for each 3000 of the male adults. In the intervals between the annual sessions a permanent committee of two senators and five deputies assumes legislative power and control of general administration. The revenue is mainly derived from the Customs dues and a property tax. State religion Roman Catholic, but all others tolerated. Education obligatory; cost partly borne by the State. The army numbers about 4000, and there is a national guard of nearly 100,000. Cattle and sheep form the chief wealth of the country, but there is a future for agriculture, and some mining is done. Exports chiefly wool, jerked beef, hides, skins, etc. There are over 1200 miles of railway open.

**Area**, 72,210 sq. miles; pop. 978,000. **Revenue**, 1902-3, £3,475,211; **expenditure**, £3,439,010; **Debt**, 1904, £26,330,736 (including External Debt, £20,787,120; Internal Debt, £4,882,605; and International Debt, £661,011). **Imports**, 1902, £5,003,688; 1903, £5,341,270; **exports**, 1902, £7,149,471; 1903, £7,939,980.

**President**, Don J. Battle y Ordóñez (elected Feb. 28th, 1903).—**Vice-President**, Señor F. Canfield.

**Ministry: Interior**, Don Juan Campistegni.—**Finance and Public Works**, Don Jose Serrato,—

*Foreign Affairs*, Dr. Jose Romen.—*War*, Gen. Vasquez.

Chargé d'Affaires in London, Don Alfonso Saenz de Zumarán, 104, Victoria Street, S.W.—*Consul-General in London*, Dr. Carlos de Oliveira Nery, Clement's Inn, Strand, W.C.

British Minister at Monte Video, Walter Baring, Esq. *Consul*, V. K. Cornish (Monte Video).

### History, 1904.

A revolutionary movement in the Department of Florida was reported (Jan. 2nd). The Government called out the National Guards, and a state of siege was proclaimed. The Nationalist leaders denied that they had any revolutionary intentions, and blamed the Government for forcing the situation. General Saravia took command of the insurgents and began an advance southwards, but was defeated at Illescas (17th) and Nico Perez, being driven

back to the north with heavy loss. A Government force under General Munoz was badly cut up, however, by General Saravia (29th), and some alarm was felt at Monte Video, until the insurgents retired to the interior. They sustained a severe reverse in an engagement north of Paysandu (March 2nd). After considerable desultory fighting and an attempt on the life of the President, General Vasquez, the War Minister, defeated the insurgents, who were commanded by General Saravia in person, near Cachilla Negra (Sept. 3rd). Saravia was wounded, and, with other insurgent leaders, fled into Brazil, where he soon afterwards died. The basis for a settlement was then drawn up by the Government and accepted by the revolutionary leaders. It included a general amnesty, free elections, and the removal of the interdictions. Peace was concluded (24th) amidst great popular rejoicings.

## V

**Vacaresco, Mlle. Hélène**, the Roumanian poetess, belongs to one of the most illustrious families of her country, and is well known in most of the Courts of Europe as the favourite Maid of Honour of the Queen of Roumania (Carmen Sylva). She is the author of "The Bard of the Dambovitza," "Chants d'Aurore," "L'Âme Sereine," "Lueurs et Flammes," all *couronnés* by the French Academy. Her articles on the "Life and Manners of Roumanian Peasants" in the *Contemporary* during 1902 brought her prominently before the British reading public. In 1904 published "Kings and Queens I have Known."

### VACCINATION.

The Vaccination Act, '98, brought about great changes in the law. The three most important were the substitution of domiciliary vaccination for vaccination at public stations, the use of glycerinated calf lymph, and the exemption from penalties of conscientious objectors. The period within which a child is required to be vaccinated was extended to six months from the date of birth, and it is provided that a person can only be prosecuted twice in respect of the same child for neglecting to have it vaccinated, and the second prosecution can only be after the child is four years old. The public vaccinator of the district is required to call at the home of each child within a certain time after its birth, and vaccinate it if the parent raises no objection. The old system of arm-to-arm vaccination with human lymph, which was probably the source of much disease, was abolished, and public vaccinators are now required to use glycerinated lymph supplied by the Local Government Board. The lymph is obtained from specially selected calves which have been vaccinated, and is rendered free from disease germs by being kept in glycerine. Any parent who satisfies two justices, or a stipendiary magistrate, that he conscientiously believes that vaccination would be prejudicial to the health of his child can receive from them a certificate to this effect, and then becomes exempt from

penalties for non-vaccination of the child. The effect of this recognition of the conscientious objection is practically to make vaccination optional; but those who do not avail themselves of this means of escape become liable to prosecution where the child is not vaccinated within six months of birth.

There has been a steady increase in vaccination since the passing of the Act. Thus, in the year '99 there were 669,349 successful primary vaccinations in England and Wales, as against 500,314 in '98—an increase of 33·8 per cent. In 1900 the number was 676,807, while in 1901 it had risen to 710,785. During the latter part of 1901 and the beginning of 1902 the epidemic of small-pox in London gave rise to a large demand for vaccination. The effect was seen in the statistics, for in London in 1901 the number of successful primary vaccinations represented 85 per cent. of the total number of births; in 1900 the percentage was 65, and in '98 only 47. The percentage of children in England and Wales "unaccounted for," which was 21·5 in '98, fell to 17·2 in '99, to 15·8 in 1900, and to 13·0 in 1901; while the percentage of children known to be unvaccinated in the same years was 26·6, 20·8, 19·9, and 17·3.

Under the present law vaccination by a public vaccinator can be obtained, free of charge, in the case of any person who has not been previously vaccinated. Similarly, any person above the age of ten years, who has not been previously revaccinated within a period of ten years, can be revaccinated by the public vaccinator, free of charge. Vaccination officers, who are appointed by the Boards of Guardians, have the duty of enforcing the Vaccination Acts: they issue notices to parents, keep records as to vaccination of all the children in their district, and institute proceedings in cases of default. Both public vaccinators and vaccination officers are paid by fees for every birth registered in their district, in addition to fees for successful vaccinations.

The Imperial Vaccination League was formed in 1902 "to promote the study of the laws regulating vaccination, and to consider if in any way the vaccination law itself, or its ad-

ministration, admits of improvement." The League advocates general compulsory re-vaccination at the age of 12, or 10 in the presence of epidemic small-pox, "conscientious objection" being recognised as in the case of primary vaccination; the transfer of the administration of the vaccination laws from the Poor Law to some other Authority charged with Public Health functions; and the desirability of all establishments for the preparation of calf lymph being placed under Government inspection and control. See **SESSION**, sect. 81. **President**, The Duke of Northumberland; **Hon. Sec.**, Mrs. Garrett Anderson, M.D.; **Office**: 53, Berners Street, W.

The Jenner Society was formed in 1896, "to commemorate the name and work of Edward Jenner, M.D., of Berkeley, in the county of Gloucester, by collecting, diffusing, and popularising knowledge in regard to the history of small-pox and the value of vaccination as a protection against it; by promoting the practice of vaccination in a safe and efficient manner; and by furthering generally the adoption of those modes of preventing and treating disease which rest upon the foundation of Jenner's great inquiry." **President**, the Earl of Ducie; **Hon. Sec.**, Francis T. Bond, M.D., B.A. Lond., F.R.S. Edin., Gloucester.

On the other side there is the **National Anti-Vaccination League**, which carries on a vigorous crusade against vaccination. **Hon. Sec.**, Mr. Charles Gane. **Office**, 50, Parliament Street, S.W.

### VAGRANCY AND LABOUR COLONIES.

In July 1904 the President of the Local Government Board, after consultation with the Home Secretary, appointed an **Inter-Departmental Committee** to inquire into the vagrancy question. The terms of reference to the Committee were as follows: "To inquire and report with respect to England and Wales as to (1) the law applicable to persons of the vagrant class (*i.e.* the statutory provisions, and the by-laws, rules, and regulations made thereunder); (2) the administration of the law applicable to these persons; and (3) any amendments which should be made in it or in its administration." The Committee consisted of the Right Hon. John L. Wharton, M.P., Chairman, Sir W. Chance, Bart. (Hon. Secretary of the Central Poor-Law Conferences), J. S. Davy, C.B., and A. H. Downes, M.D. (Local Government Board Inspectors), Captain Eardley-Wilmot (H.M. Inspector of Prisons), Captain Showers (Chief Constable of Essex), and H. B. Simpson (of the Home Office), with F. L. Turner (of the Local Government Board) as Secretary. The Committee commenced taking evidence in the autumn.

For some years past the increase of vagrancy has attracted much attention, and has been the subject of frequent discussions at various Poor-Law and other conferences. In February 1904 an influential deputation from Boards of Guardians urged on the President of the Local Government Board the necessity of legislation to deal with vagrants, and asked for the appointment of a Commission to consider the question.

#### Vagrancy Law and Statistics.

Vagrancy is not a crime under the existing law; but in earlier days the vagrant was severely

repressed. At one time he was liable to punishment by death, while branding and similar punishments were freely bestowed. In spite of all this vagrancy flourished. What restrictions there now are on the vagrant are furnished by the **Vagrancy Act of 1824**. That Act, among a long list of various offences, mentions two (begging and sleeping out) which mainly affect the tramp, and imposes for these as penalty imprisonment with or without hard labour for periods not exceeding one or three months—the sentence to be longer in case of repetition of the offence. It will thus be seen that the law affords a considerable check on the tramp; but the difficulty arises first of all in proving the offence, and next in obtaining adequate punishment. Many magistrates are inclined to deal gently with the beggar, and a sentence of a few days' imprisonment has little effect as a deterrent.

There are no complete statistics of vagrancy, but estimates which can be relied on place the number of tramps at about 40,000 or 50,000. The number varies from time to time, according to the season and the state of trade. The Local Government Board issue returns of the number of tramps who receive relief at the casual wards on certain days in the year. These form only a part of the army of tramps, but the number on Jan. 1st, 1904, was 8519, and on July 1st, 1904, was 6748. In 1900 the corresponding numbers were 5579 and 4170; but since then there has been a steady increase, which is stated to be due to the termination of the South African War and depressed trade.

The only provision made by the State for the destitute wayfarer, whether he is a working man really in search of work or a professional tramp, is the casual ward at each workhouse. A person admitted to these wards is termed a "casual pauper," who is defined as being "any destitute wayfarer or wanderer applying for or receiving relief." The casual pauper is subject to severe regulations. In ordinary cases he is detained in the wards until 9 o'clock of the second morning after admission; and if he has been in the same wards previously during the month, until 9 o'clock of the fourth morning after admission. In exceptional cases he can be allowed to leave before this. He is required to perform a task of work for each complete day he is detained. The task is generally breaking stones (the quantity varying from 5 to 13 cwt., according to the kind of stone used) or picking oakum; but sometimes time-work in digging, cutting wood, or grinding corn is imposed—9 hours is the time specified. When detained only one night, a task equivalent to 3 hours' work is required. During the time of detention the diet is according to a scale prescribed by the Local Government Board, and is as follows: For breakfast and supper, either 8 oz. of bread, or 6 oz. of bread and 1 pint of gruel or broth; for dinner, 8 oz. of bread and 1½ oz. of cheese, or 6 oz. of bread and 1 pint of soup. Women casuals also have to perform a task, but it is much lighter, being generally domestic work. They receive a similar diet to the men, but of less quantity. Children under 7 are given a milk diet. The casual pauper is not allowed to mix with the ordinary inmates of a workhouse, and in many wards is confined in separate cells. On admission he is searched, bathed, and his clothes disinfected. Cases of refusal to per-

form the task of work are frequent, and usually result in short sentences of imprisonment.

In a recent report of the Commissioners of Prisons it is stated that in many instances vagrants appear to prefer prison to the casual wards; and it is suggested, as a reason, that the diet in the wards is inferior and the work heavier than in prisons. The system of the casual wards is repressive, but it cannot be said that it has been successful in reducing the numbers of vagrants. The great difficulty in the way of success lies in the lack of uniformity; for, while one union strictly enforces the regulations, another neighbouring union imposes no restrictions on the vagrant. It has been suggested in many quarters that some distinction should be made between the working man in search of work and the habitual tramp, and that, while the former should be helped on his way, the latter should be dealt with severely. Attempts to help the working man on tramp have been made by the way-ticket system, which has been tried in different counties. Under this system a pass is issued, which entitles the holder to obtain lodging and food on his route; but, so far, little success has attended the experiment, as only two or three counties have adopted it at a time.

### **Labour Colonies.**

Among those who are desirous of reforming the present system the proposal that meets with most favour is that the habitual vagrant should be committed to a Labour Colony, where he should be detained compulsorily for some considerable period. This proposal was contained in the Vagrancy Bill introduced by Sir John Gorst (see SESSION 1904), but no progress was made with the measure. It is felt by many that the children of vagrants should be taken out of the custody of their parents, and so prevented from learning to love the life. This view was accepted by the recent Departmental Committee on Physical Deterioration. Most of the outbreaks of small-pox in recent years are stated to have been due to infection conveyed by tramps. An important conference of sanitary authorities in England and Wales, held in London early in Nov. 1904, discussed this subject, and passed resolutions in favour of the adoption of strict measures with a view to preventing this danger, such as the compulsory vaccination and isolation of tramps suspected of infection and the detention of habitual vagrants in Labour Colonies.

In England the experiment of Labour Colonies as a means of dealing with the unemployed and men of the vagrant class has been tried only on a small scale: by the Salvation Army at Hadleigh, in Essex; by the Christian Service Social Union at Lingfield, in Surrey; and by the Church Army and some few other charitable bodies; but on the Continent Labour Colonies have existed for many years, and are an important institution.

Germany has the most complete system for the travelling unemployed. This consists of (1) numerous travellers' homes organised by the German Travellers' Homes Society, (2) relief stations maintained by the public authorities, and (3) Labour Colonies. Men travelling in search of work can obtain board and lodging at the homes on payment of a small charge, or, if they cannot pay, on performance of a task of work at a relief station. At these stations information is supplied as to work available

in the district. Labour Colonies are under the control of the Labour Colony Central Board, and are treated as charitable institutions. Their funds are obtained from grants from the provincial governments and local authorities and from private subscriptions and donations. There are at present 34 colonies within the German Empire, providing accommodation for about 4000 persons. During 1903 over 10,000 persons were admitted, and about the same number left. Nearly half of the number admitted remain in the colonies less than two months, but there are a considerable number who stay more than six months. The German colonies are voluntary: persons are not sent there for detention. It may be mentioned that the law in Germany gives the police extensive powers over beggars and vagrants, though it does not seem that these powers are much used.

The Wilhelmsdorf Colony, the earliest one founded, may be taken as the type of the colonies. It is open to all able-bodied men willing to work, if there is room, and a colonist is free to leave at any time. The work undertaken is chiefly agricultural, though there are some indoor occupations. After the first fortnight the colonist is credited with wages in addition to his board and lodging; the rate varies, but the average is usually about 3d. per day. The amount of the wages accumulates till the colonist leaves, when he receives an order for the balance left after deducting the cost of any clothes supplied and tobacco. It is stated that about two-thirds of the colonists have suffered imprisonment; but, notwithstanding this, discipline and order is easily maintained, and the men generally work well.

In Belgium is found the other class of Labour Colonies, where there is power of compulsory detention. These are managed by the State, and are of two kinds. In the Maisons de Refuge persons convicted of begging or vagrancy can be detained for any period not exceeding a year, or until their earnings amount to the sum of 15 francs. The Dépôts de Mendicité are for worse cases, such as habitual vagrants and persons of drunken and immoral habits; these are subject to detention for not less than two or more than seven years. The average number of inmates in the various colonies in 1901 was, in the first class 1761, and in the other 4542. In Merselas, the principal Dépôt de Mendicité, the colonists are divided into six classes, the worst class being kept apart from the others. All kinds of work are provided for the colonists, according to their capacity, and the men work with energy and interest. The average cost per annum, after deducting the value of work done, comes to less than £10 per head, half of this amount being paid in wages to the colonists. The wages are paid at the rate of 1½d. to 3d. per day, part of which may be spent at the canteen, the rest being kept until the colonist is discharged.

Labour Colonies of both kinds are found in Switzerland, where otherwise the general system much resembles that in Germany. In Holland there are compulsory colonies.

As regards the results obtained by the Labour Colonies abroad, the conclusion arrived at in a Board of Trade Report issued in December 1904 was "that, whatever be the object of these colonies, the great bulk of the material with which they deal consists, not of efficient workmen out of work, but of tramps, ex-prisoners,

and others, whose distress is caused by personal defects. They are not colonies of unemployed so much as receptacles for social wreckage." An earlier report of the same department states that if the intention is "to suppress begging, to clear the tramps from the highways and the beggars from the streets, to hide them away out of sight, to keep them out of mischief and to compel them to work, then the Labour Colony may be a means of accomplishing this. If it is intended to provide a refuge for those who have been in prison and who for that reason are unable to obtain employment, the Labour Colony is also a means of accomplishing this." It may be added that the Select Committee of the House of Commons on Distress from Want of Employment in 1896 reported strongly against Labour Colonies as a means of providing work for the unemployed.

**Vegetarian Federal Union, The**, is an association of such Societies throughout the world as may be willing to unite together for mutual counsel and the promotion of Vegetarianism—*i.e.* abstinence from the flesh of animals (fish, flesh, and fowl) as food, and the encouragement of the use of cereals, pulses, seeds, grains, fruits, nuts, and all the wholesome products of the vegetable kingdom. **President**, Mr. A. F. Hills, D.L.; **Treasurer**, T. A. Hanson; **Secretary**, Miss F. I. Nicholson. **Offices**, 16, Farringdon Street, London, E.C.

## VENEZUELA.

A republic in South America, consisting of twenty federal states. It is bounded on the north by the Caribbean Sea, on the south by Brazil and Colombia, on the west by Colombia, and on the east by the Atlantic Ocean and British Guiana. The long-standing boundary dispute between Great Britain, representing British Guiana, and Venezuela was settled by the award of the Arbitration Tribunal, which was delivered on Oct. 3rd, '99. It gave Great Britain the Schomburgk line, with the exception of Barima point, at the mouth of the Orinoco, and a strip of territory between the rivers Wenamu and Cuyuni; but it was decided that the mouth of the Orinoco should be open to the British, and both banks of a part of the river Cuyuni, where the Schomburgk line had given them only one bank.

It is governed by a **President**, assisted by and elected (for a period of two years) from a **Federal Council** of 19 members appointed by Congress every two years. Congress consists of a **Senate** of 24 members elected by the legislatures of each state, and a **House of Representatives** of 52 members, elected directly, one member to every 35,000 of population. The term of office for both houses is 4 years. The constituent states have each their own legislature and executive. The permanent army consists of about 9000 men, but there is a national militia estimated at 60,000 strong. Roman Catholicism is the state religion, but private exercise of all others is permitted. Education is in a backward state, but is compulsory and free. La Guayra is the chief port of the Republic, and is connected with Caracas by a railway which is a marvel of engineering skill. There are over 500 miles of railway being worked. Agricultural and pastoral pursuits are largely followed. The chief products are coffee, cocoa, timber, cattle and hides. The country is rich in minerals, including gold,

silver, copper and iron. There are valuable asphalt lakes near Lake Maracaibo.

The year 1902 was distinguished by the blockade instituted by **Great Britain and Germany** in default of the recognition and satisfaction of their claims on behalf of their subjects whose property in Venezuela had been destroyed and whose concessions had been violated without redress. The President of the United States suggested that the dispute should be referred to the Hague Tribunal, and ultimately this course was adopted with regard to one point—*viz.*, whether or no Great Britain and Germany, the Powers which had co-operated in exerting pressure on Venezuela by means of the blockade, together with Italy, who had acted in concert with them, were entitled to preferential treatment in respect of the amount of customs revenue which Venezuela was prepared to set aside for her creditors. The Tribunal decided, Feb. 22nd, 1904, that the three Powers were entitled to preferential payment in respect of the 30 per cent. levied on the customs receipts at La Guayra and Porto Caballo. Each party was ordered to pay its own costs, and the United States was commissioned to see that the judgment was carried out.

**Area**, 534,000 sq. m.; **pop.** 2,507,345. **Capital**, Caracas, **pop.** 72,429. **Revenue**, 1902, £988,608; **expenditure**, £1,031,444; **imports**, 1901, about £3,000,000; **exports**, about £5,000,000; **public debt**, 1902, £4,571,167, arrears of interest, £2,623,877.

**President**: General Cipriano Castro.

**British Minister at Caracas**, H. G. O. Bax Ironside, Esq. **Consuls**: W. Andral (Caracas), C. de Lemos (Ciudad Bolivar).

**Consul-General in England**, Dr. J. Tinoco, Liverpool. — **Consul in London**, N. J. H. Schotborgh, Finsbury Pavement House, E.C. — **Vice-Consul**, Walter White.

## History, 1904.

Congress, having declared itself a constituent Assembly (May 5th), conferred absolute dictatorial powers for one year on **General Castro**, with the title of Provisional President. The Government (June 30th), decided on the unification of the Venezuelan Debt, beginning with the foreign debt, composed of the 3-per cent. external, called the English debt, amounting to 80,000,000 fr. (£3,200,000), the railway or Disconto Bank debt, amounting to 62,000,000 fr. (£2,480,000), and the French, Spanish, and Dutch diplomatic debts, amounting to about 10,000,000 fr. (£400,000). The Customs revenue in part was indicated as the security.

**Vecsey, Franz von**, violinist, b. at Buda-Pesth, March 1893. Both parents cultivated amateurs. At four his musical intelligence and memory were marked, and at eight, when placed under Hubay at the Buda-Pesth Conservatorium, he successfully attacked Paganini's intricate pieces. Won the favour of the veteran Joachim, and played in public in Berlin and Hamburg. On May 3rd, 1904, at St. James's Hall, made his English debut, and evoked enthusiasm by finished rendering of Wieniawski's Concerto in D minor and works by Bach, Hubay, and Paganini. First impressions of his rare gifts were confirmed by subsequent performances of Mendelssohn's Concerto.

**Victoria and Albert Museum, The,** is in Exhibition Road, South Kensington. It was opened by Queen Victoria in June, 1857, as the South Kensington Museum, and retained that designation until May 17th, '99, when Her late Majesty laid the foundation stone for the new buildings, designed by Sir Aston Webb, R.A., which are to extend the Museum at a cost of over £800,000, and by her command the institution is now styled "The Victoria and Albert Museum." The **Art Branch** illustrates the application of fine art to the industries of all periods, and includes collections of original works of art in every class of material, reproductions in metal and plaster, and a gallery of paintings in oil and water-colour of the British school. The number of volumes in the National Art Library is upwards of 90,000, prints and original drawings 130,000, photographs about 150,000. The **Dyce Collection**, bequeathed by the late Rev. A. Dyce in '69, consists of a library of over 13,000 volumes, and a collection of paintings and works of art. The library bequeathed by Mr. John Forster in '76 includes the original MSS. of many of Charles Dickens' works. The **Science Branch** contains collections of instruments and models used in scientific research and instruction, and collections of models illustrating the application of science to machinery and industries, as well as a library of 90,000 volumes and a complete series of British Patent specifications. The directors of the museum (which is now under the control of the Board of Education) are: Art museum, Sir C. Purdon Clarke, C.I.E., F.S.A., F.R.I.B.A.; Science museum, W. J. Last, A.M.I.C.E. The museum is open free from 10 a.m. to 10 p.m. on Mondays, Tuesdays, and Saturdays. On Wednesdays, Thursdays, and Fridays, it is open from 10 a.m. till 4 p.m. in January, November, and December; till 5 p.m. in February and October; and until 6 p.m. from March to September inclusive. On these days, being Students' days, the charge of 6d. for admission to the main building is made for each person, excepting ticket-holders; but the museum buildings to the west of the Exhibition Road are open free. On Sundays the whole of the Museum (excepting the libraries) is open free from 2 p.m. till 4 p.m. in January, November, and December; till 5 p.m. in February and October; till 6 p.m. in March, April, and September; and until 7 p.m. in May, June, July, and August. There is at **Bethnal Green a Branch Museum** of objects of art and science, which is open free every week-day at 10 a.m., closing on Mondays, Thursdays and Saturdays at 10 p.m., and on Tuesdays, Wednesdays, and Fridays at 4 p.m. in January, November, and December, at 5 p.m. in February and October; and at 6 p.m. from March to September inclusive. On Sundays it is open from 2 p.m. till 4 p.m. in January, November, and December; till 5 p.m. in February and October; till 6 p.m. in March, April, and September; and until 7 p.m. in May, June, July, and August. The Victoria and Albert Museum also makes loans to 89 provincial museums and about 250 schools and classes of science and art, besides loans to exhibitions of an educational character.

### VICTORIA CROSS.

Since the publication of the 1904 edition, in which the total "winners" stood at 518, three additions have been made, viz.:—

Brevet-Major (since Lieut.-Colonel) John Edmund Gough, 2nd Batt. Prince Consort's Own Rifle Brigade, Darathole, Somaliland, Friday, April 24th, 1903 (*Gazette*, Jan. 15th, 1904).

Lieut. Herbert Augustine Carter (awarded D.S.O. at first) Indian Army, Mounted Infantry, Jidballi, Somaliland, Saturday, Dec. 19th, 1903 (*Gazette*, Dec. 9th, 1904); and

Lieut. Clement Leslie Smith, 2nd Batt. (old 46th) Duke of Cornwall's Light Infantry, Jidballi, Somaliland, Sunday, Jan. 10th, 1904 (*Gazette*, June 7th, 1904).

Colonel Gough is the youngest son of Sir Charles Gough and nephew to Sir Hugh, both V.C.'s of Indian Mutiny days, an elder brother being Lt.-Col. Hubert Gough, 16th Lancers; and Lieut. Smith the eldest son of the Rev. Canon Clement Smith, Rector of Whippingham, Isle of Wight, for years a Chaplain to the late Queen Victoria, and since 1901 to the King.

Lieut. Carter also is the son of a clergyman—the Rev. Conway A. D. Carter, M.A., Trinity College, Dublin, Rector of St. Erth, Hayle, Cornwall, and, like his fellow hero, Clement Smith, served in the old 46th—2nd Duke of Cornwall's Light Infantry—for two years, until his transfer to the Indian Service, May 1899.

The officers in command on the occasion of the above-named separate actions were: (1) Lt.-Col. Gough himself, who, however, expunged from the reports all mention of his own name having reference to personal acts of bravery; (2) Lt.-Col. P. A. Kenna, V.C., D.S.O., 21st Empress of India's Lancers; and (3) Major-General Sir Charles Egerton, G.C.B., D.S.O., Captain Wilfred J. Mitchell being in command of the Mounted Infantry.

The 521st award of the Cross brings the number of officers and men bearing the name of Smith (including Major Smyth, Queen's Bays—but now of the Carabineers) up to 10. In this connection there are also 6 Browns and 6 Jones', including the well-known officer with the prefix Mansel; there are also 4 Roberts', which include father and an only son. There are again the brothers Sartorius—Reginald and Euston—both Major-Generals. The Maudes were cousins, as were also the heroic Aitken, of Lucknow fame, and young Digby-Jones, R.E., who fell (after he had saved the position) at Wagon Hill, Ladysmith, Jan. 6th, 1900; a younger brother (Owen G. D.) being on the same day gazetted into the Corps. The foregoing are a few of the many curious coincidences, etc., to be found in the annals of even a few of the 521 officers and men on the register of it.

Three of the first five officers on whose breast Queen Victoria placed the Cross are still living, viz.: Admirals Raby, Bythesea, and Lucas. The last presentation by Her Majesty was at Windsor, Dec. 15th, 1900, when the following (5) were decorated, in the order named: Captain (now Major) Sir John Milbanke, Bart., 10th Hussars; Captain M. F. M. Meiklejohn, (2nd) Gordon Highlanders; Sergeant H. Engleheart, 10th Hussars; Driver H. H. Glascock, R.H.A.; and Private C. Ward, (105th) King's Own Yorks. Light Infantry—being the last man decorated by the Queen.

Ranks, Branches of the Services, Regiments, Corps, etc., having all appeared in the four issues of the work (1901-4), we now give a recital of where (by campaigns, etc.) the Cross has been gained during the past fifty years—

(Russian War (1854-5), 111; Persia (1856-7), 3; Indian Mutiny (1857-59), 182; New Zealand (1860-65), 15; China—Taku (1860), 7; Ditto, Taeping Rebellion (1862), 1; India—Umbeyla (1863), 2; Japan (1864), 3; Bhootan—India (1864-5), 2; Canada—not in action (1866), 1; West Coast of Africa—a negro (1866), 1; Little Andaman Isle, Bay of Bengal (1867), (strictly speaking, not under fire) 5; Abyssinia—Magdala (1868), 2; India—Looshai (1872), 1; Ashantee (1874), 4; Perak (1875), 1; Quetta—Baluchistan (1877)—not in action, 1; South Africa (1877), 1; Afghanistan (1878-79-80), 16; Zululand (1879), 23—11 being for Kork's Drift; Basutoland (1879 and 1881), 4; Sekukuni's Town—Northern Transvaal (1879), 2; Transvaal Revolt 1880-81, 6—3 being in Natal; Egypt (1882)—naval, 3; The "Red" Soudan—El Jeb and Tamai (1884—1 naval) 4; Nile Expedition (1884-5), 1; Burma (1889), doctors—2; Manipur (1891), 1; Hunza-Nagar—North-West of Cashmere (1891), 3; West Coast of Africa (1892—a negro), 1; Burmah (1893—a doctor), 1; Chitral (1895—a doctor), 1; Matabele Rebellion (1896), (Colonials), 3; India—Punjab Frontier (1897), 11; Khartoum—Omdurman (4), and at Kasalaf (1) (1898), 5; Island of Crete—Candia (1898)—a naval doctor, 1; South Africa—Boer War Oct. 14th, 1899, to Feb. 8th, 1902, 78—for full details see eds. 1901-3; Ashantee—fifth war in that country since 1823 (1900), 2; China (1900), 2—both naval; Somaliland (1902-3), 6; Northern Nigeria—Africa (1903), 1; and Tibet (1904)—none yet announced—in all, 521.

The survivors—active and retired—at the present moment include:

Magistrates—Bengal Civil Service, 1.  
Royal Navy and Marines—Admiral of the Fleet, 1; Admirals, 4; Lieutenants (R.N.), 1;

Midshipmen (late Indian Navy), 1; Chief Gunners, 1; C.O. Coast Guards, 1; Bluejackets, 4; A Lieut.-Colonel and a Major (R.M.), 2 = 15.

Army and Colonials: Field-M Marshals, 3; General Officers, 25; Colonels and Lieut.-Colonels, 22; Majors, 17; Captains, 18; Lieutenants and 2nd Lieutenants (1), 16; Ensigns, 1; Riding-Masters (18th Hussars), 1; Quarter-Masters (1 a Major), 2; Medical Officers, all ranks, 18; Sergeant-Majors (1 Police), 4; Colour-Sergeants (1 Musketry), 2; Trumpet-Majors, 1; Sergeants, 21; Corporals and Lance (2), 10; Bombardiers, 1; Gunners, 2; Drivers (R.A.), 2; Drummers, 1; Pipers, 1; Troopers (Colonial), 1; and Privates, 22 = 191.

Altogether, so far as it is possible to ascertain by careful research, 207.

Victoria and Albert, Royal Order of, was instituted in 1862, and enlarged in '64, '65 and '80; is for Ladies, and consists of four classes

**Vivisection.** A vigorous opposition to vivisection is carried on by the **National Anti-Vivisection Society**, which "advocates the total abolition of the scientific torture of animals, and seeks to attain this object by every possible means. The Society does not oppose, but on the contrary supports, any and every measure for the amelioration of the present condition of vivisected animals." The organ of the Society is the *Zoophilist and Animals' Defender*, edited by Edward Berdoe, L.R.C.P. Edin., M.R.C.S. Hon. Sec. and Treasurer, The Hon. Stephen Coleridge. Secretary, Robert Stewart. Offices, 92, Victoria Street, London, S.W. The London Anti-Vivisection Society was founded in 1876, and has offices at 13, Regent Street. Secretary, Mr. Sidney Trist, who edits the *Animals' Guardian*.

## W

**Wace, The Very Rev. Henry, D.D.,** Dean of Canterbury, was born in London Dec. 10th, 1836, and educated at Marlborough, Rugby, King's Coll., Lond., and Brasenose Coll., Oxon. He was ordained deacon in '61 and priest '62. From '61 to '69 he was curate at St. Luke's, Berwick Street, and St. James's, Piccadilly. He was appointed Chaplain of Lincoln's Inn, '72, Boyle Lecturer '74-5, Professor of Church History at King's Coll., '75; Bampton Lecturer '79, Preacher of Lincoln's Inn '80; Prebendary of St. Paul's '81, and Principal of King's Coll., London, '84. In '96 he was appointed rector of St. Michael's, Cornhill, and in April 1903 he was chosen to succeed Dr. Farrar at Canterbury. He has been active in literary work. In conjunction with Sir William Smith he edited the "Dictionary of Christian Biography," and he has published editions of the "Primary Works of Luther," of the Apocrypha for the "Preacher's Commentary," besides volumes of his own sermons and lectures.

**Wales, H.R.H. George Frederick Ernest Albert, Prince of,** Earl of Chester, Duke of Cornwall and York, Duke of Rothesay, Prince of Saxe-Coburg and Gotha, Duke of Saxony, Earl of Carrick and Inverness, Baron of Renfrew and Killarney, Lord of the Isles, and Great Steward of Scotland, Colonel-in-Chief of the King's Royal Rifle Corps, the Royal

Fusiliers, the Royal Welsh Fusiliers, the Royal Marines, and the Queen's Own Cameron Highlanders, K.G., K.T., K.P., G.C.M.G., G.C.V.O., I.S.O., the heir-apparent of King Edward VII., is the second son of King Edward VII. and Queen Alexandra, and was b. at Marlborough House on June 3rd, 1865, just seventeen months after his elder brother, the late Duke of Clarence. The two brothers were greatly attached to one another all through boyhood, and entered the navy together as cadets June 5th, '77. Two years were spent on the training ship *Britannia*, and then Prince George, accompanied by his brother, started for a three years' voyage round the world on board the *Bacchante*. In May '83 H.R.H. was made midshipman to the *Canada*, which was stationed on the North American coast. In '85 he was promoted to lieutenant, after passing his examinations with distinction, and in '90 was given the separate command of the gunboat *Thrush* on the West Indian station. He opened the Jamaica Industrial Exhibition during the same year, and in '91 was made commander. He visited Ireland in October, staying with the late Duke of Clarence in Dublin, but unfortunately contracted a dangerous fever while there. In '92, through the lamentable death of his elder brother, he became the heir to the throne, and took his seat in the House

of Lords as Duke of York. In May '93 his engagement to Princess Victoria Mary of Teck was announced. The marriage was celebrated in the Chapel Royal at St. James's Palace, July 6th, '93. The University of Cambridge conferred its Hon. LL.D. degree on H.R.H. in June '94. A son, Prince Edward Albert Christian George Andrew Patrick David, was born to the royal pair (June 23rd, '94), a second son, Prince Albert Frederick Arthur George, on Dec. 14th, '95, a daughter on April 25th, '97, a third son on March 31st, 1900, and a fourth on Dec. 30th, 1902. During '98 H.R.H. for some time hoisted his pennant on the *Crescent*, attached to the Channel Squadron. He was promoted to the rank of Rear-Admiral (Jan. 1st, 1901), and appointed Colonel-in-Chief of the Royal Marine Forces. On the death of H.M. Queen Victoria (Jan. 22nd, 1901), he succeeded his father as Duke of Cornwall, and with the Duchess left Portsmouth in the *Ophir* (March 16th) on a tour to the colonies, and to open the first Parliament of the Commonwealth of Australia. On Nov. 9th, 1901, H.M. the King's birthday, H.R.H. was given the title of Prince of Wales and Earl of Chester. In celebration of their safe return from their tour the Prince and Princess were entertained by the London Corporation at the Guildhall (Dec. 5th, 1901), on which occasion H.R.H. delivered his well-known advice to England to "wake up." In June 1902 he was promoted to the rank of General; in 1903 he was appointed President of the British Commission for the St. Louis Exhibition, 1904; in April 1904 he and the Princess paid a visit to the Emperor of Austria at Vienna; and in May they opened the Bradford Exhibition.

**Wallace Collection, The.** Hertford House, Manchester Sq., W. This collection of pictures, sculpture, arms and armour, furniture, and objects of art, was originally formed by the third and fourth Marquises of Hertford. By the fourth Marquis it was bequeathed to Sir Richard Wallace, Bart., by whom it was largely increased. Sir Richard left it to his wife, Lady Wallace, who died in 1897, and bequeathed it to the nation. Hertford House (the original of Gaunt House in Thackeray's "Vanity Fair") was purchased by the Treasury for £80,000, extensively altered, and opened to the public in June 1900. The Wallace Collection is open free on Mondays from 12 noon, and on Wednesdays, Thursdays, and Saturdays from 10 a.m., to 4, 5, or 6 p.m., according to the season; also on Tuesdays and Fridays, on payment of 6d., from 10 a.m. to 4, 5, or 6 p.m. The museum is also open on Sundays from April to October inclusive, from 2 to 5 or 6. Closed on Sundays during the remainder of the year, and on Good Friday, Christmas Eve, and Christmas Day. The Keeper of the Wallace Collection is Mr. Claude Phillips.

**Ward, Colonel Sir Edward W. D., K.C.B., Secretary of the Army Council and of the War Office,** Permanent Under-Secretary of State for War, was b. at Oban Dec. 17th, '53, educated at a private school, and entered the Army '74. He served in the Soudan expedition '85, and was promoted Major Army Service Corps '85, and Lieut.-Col. '90. He was D.A.A.G. Headquarters Staff, Ireland, '92-5, and then went on special service with the Ashanti Expedition '95-6, being promoted Brevet-Col. '98. He went out to Ladysmith at the time of the South African War, and was three times mentioned

in despatches for his services as A.A.G., and appointed Director of Supplies to the South African Field Force 1900. In 1901 he was appointed Permanent Under-Secretary of State for War, and in 1904 he was given in addition his present appointment.

**Waterworks Engineers, British Association of.** Established in April '66. President, F. J. Bancroft, B.Sc., A.M.I.C.E. Secretary and editor of Transactions, Mr. Percy Griffith, M.I.C.E., F.G.S. Offices, 54, Parliament Street, Westminster.

**Watson, William,** was b. in Wharfedale, Yorkshire; and even in his early youth gave evidence of the powers which have since ripened so splendidly. For long, however, he met with little but apathy and lack of public recognition. But in '92 a poem by him entitled "Wordsworth's Grave" put his name into all the critics' mouths, and everything he has since published has been eagerly sought after. He has well stood the test. His "Lachrymæ Musarum" contained a memorial poem on Tennyson, which was one of the finest tributes paid to the late Laureate. He has also published a collection of "Love Lyrics," and among his earlier efforts are "Epigrams of Art, Life, and Nature," and "The Prince's Quest." Early in '93 "The Eloping Angels," a poetical caprice, and an admirable volume of essays, "Excursions in Criticism," were published. His most important volume, thus far, entitled "Odes, and Other Poems," was published in Dec. '94, "The Father of the Forest" in '95, a volume of sonnets on the Armenian question entitled "The Year of Shame" in '96, and "The Hope of the World, and Other Poems," in '97. His "Collected Poems" appeared at the end of '98. A Civil List pension of £100 a year was conferred upon him in '95. Address: Devonshire Club.

**West India Committee, The.** Incorporated by Royal Charter. An Association of planters, merchants, and others interested in the West Indies. Founded circa 1760. Secretary, Algernon E. Aspinall, 15, Seething Lane, London, E.C.

## THE WEATHER OF 1904.

We are able, through the courteous assistance of Mr. W. Napier Shaw, M.A., F.R.S., Secretary of the Meteorological Office (see p. 380), to include in this issue the official figures giving, for the various districts named below, the accumulated temperature, the rainfall, and the duration of bright sunshine for the 52 weeks ended Dec. 31st, 1904. In explanation of the summary table the following points should be noted:—

**Accumulated Temperature** indicates the combined amount and duration of the excess or defect of temperature above or below 42° F. for the period named, and is expressed in day-degrees—a "day-degree" signifying 1° continued for 24 hours, or any other number of degrees for an inversely proportional number of hours. The Means with which the current values are compared are those for the corresponding period in the 20 years 1881-1900.

**Rainfall.**—The Mean amounts are those for the corresponding periods in the 35 years '66-1900, but the Mean numbers of rainy days are those for the 30 years '71-1900 only.

**Bright Sunshine.**—The Mean values employed are those for the corresponding periods in the 20 years '81-1900.

DISTRICTS.	ACCUMULATED TEMPERATURE OF THE AIR. Jan. 3rd—Dec. 31st, 1904.				RAINFALL. Jan. 3rd—Dec. 31st, 1904.				BRIGHT SUNSHINE. Jan. 3rd—Dec. 31st, 1904.			
	Above 42°.	Differ- ence from Mean.	Below 42°.	Differ- ence from Mean.	No. of Rainy Days.	Dif- ference from Mean.	Total Fall.	Dif- ference from Mean.	Hours Re- corded.	Per cent. of Pos- sible Du- ration.	Dif- ference from Mean.	Dif- ference from Mean.
	Day-deg.	Day-deg.	Day-deg.	Day-deg.			Ins.	Ins.

**West Indies.** The name given by Columbus to the islands surrounding the Caribbean Sea. They are divisible into the Bahamas, the Greater Antilles, and the Lesser Antilles. The last are also divided into Windward (*q.v.*) and Leeward (*q.v.*) groups; and to them may be added the islands off the Venezuelan coast. The total area is estimated at upwards of 90,000 square miles, and the total population at 5,000,000, of whom two-thirds are negroes.

**White, Sir George, Bart.,** son of Mr. Henry White, of Bristol, was b. in 1854, and is a pioneer of electric street traction, and was the first to introduce it into London, Dublin, Bristol, Middlesbrough, etc. He is head of the firm of George White & Co., of Bristol, president of the Bristol Stock Exchange, a J.P. for Bristol, and chairman of several railway and industrial concerns in Bristol and South Wales. He was created a baronet Aug. 26th, 1904. Cotham House, Bristol.

**Whyte, Rev. Alexander, M.A., D.D.,** was b. at Kirriemuir, Forfarshire, 1837; ed. at Aberdeen University (M.A. '62) and Free Church College, and ordained at Glasgow in '66. Four years later he became minister of Free St. George's, Edinburgh, the premier Presbyterian church in Scotland, and this position he still holds. He is a D.D. of Edinburgh University. In '98 he was elected Moderator of the Free Church General Assembly. Works: "Commentary on the Shorter Catechism," "The Four Temperaments," "Bunyan Characters" (3 vols.), "Samuel Rutherford's Correspondents," etc.

**Wilberforce, Archdeacon Albert Basil Orme,** is the youngest son of the late Bishop Wilberforce of Oxford and afterwards of Winchester, and was ed. at Eton and Exeter Coll., Oxford, where he graduated B.A. in '65, M.A. in '66, D.D. in '94. He was curate of Cuddesdon '66-7, chaplain to the Bishop of Oxford '66-70, curate of St. Jude, Southsea, '61-71, and rector of St. Mary's, Southampton, '71-94. In '94 he was made a Canon of Westminster, which Canonry carries with it the incumbency of St. John's, Westminster. The Speaker appointed him as his chaplain in Jan. '96, and in 1900 he was appointed to the Archdeaconry of Westminster. He is famous for his eloquence in the pulpit and as a temperance advocate. Address: 20, Dean's Yard, Westminster Abbey.

**Wills.** A will must be in writing, and must be signed, or, if already signed, must be acknowledged, by the testator in the presence of two witnesses, who must each sign the will in the presence of the testator and in the presence of each other. Any alteration in the will must be signed and attested in like manner. If a witness be a legatee, or the husband or wife of a legatee, he will lose the gift left to him, and his legacy will fall into the residuary estate; but the fact of a witness being a legatee will not invalidate the will. Property acquired after the date of the will passes under it, as the will is said to speak from the date of the testator's death and not from the date of the will. The last will in point of date is the one which will be admitted to probate. A will may be revoked in the following ways: (1) By the marriage of the testator; (2) By the testator destroying the will; (3) By a subsequent will, or portions of a former will by a codicil. The testator must appoint an executor or executors to carry out the provisions of the will, or it

will be necessary for the Probate Court to appoint an administrator *cum testamento annexo* (with the will annexed) in order to do so. Immediately upon the testator's death the executor becomes entitled to all the testator's personal property. He is bound first of all to bury the deceased and prove his will, then to pay out of it any debts due by the testator; and then to distribute the property, so far as it will go, in accordance with the will. Wills may be proved either at the Principal Registry, Somerset House, or at the District Registry of the district in which the testator had his permanent abode at the time of his death. Executors may prove the will personally without the aid of a solicitor. (For the Legacy and Succession duties payable, see DEATH DUTIES.) Should there be more than one executor, each can exercise all the powers of the office, except that all must join in bringing any action respecting the estate. The office continues to the survivors or survivor. Should the executor renounce, or die, before taking out probate, or not appear when cited to take probate, his rights of executorship cease entirely. But when the last surviving executor dies, then his executors are also executors of the original testator. If the executor is an infant, the Probate, Divorce, and Admiralty Division of the High Court will grant administration to his guardian or some other person who becomes administrator *durante minore etate* ("during the minority"). An executor merely in virtue of his appointment is released from any debts due from him to the testator, and may retain out of the assets any debt due from the testator to him in priority to all other debts of the same degree; but this provision is so guarded in equity as to be practically of no effect. Any person who takes upon himself to be executor without having been appointed, is said to be an executor *de son tort* ("of his own wrong"), and is not allowed to derive any benefit from the office. Should no executor be available, the Court will grant letters of administration *cum testamento annexo* ("with the will annexed"), as distinct from the ordinary letters of administration granted when a person dies without making a will.—**Letters of Administration.** In the event of a person having personal property dying without a will, application is made, generally by the deceased's relatives, or sometimes by a creditor, to the District Registrar of the Probate Court, who thereupon grants letters of administration to the person proposed for the office, who will have to make affidavits of the assets and debts, and sign the prescribed oath. He will then pay the debts owing by the deceased, and distribute the remainder of the estate in accordance with the various Acts dealing with the property of intestates. Copies of all wills that have been proved can be seen at Somerset House by any one on payment of the fee of 1s. See LAW CASES, 1904.

**Wilson, Sir Guy Fleetwood, C.B.,** Director of Army Finance, and Assistant Under-Secretary of State for War, was b. Oct. 21st, '51, and educated by private tutors abroad. He entered the Paymaster-General's Office, '70; was transferred to the War Office, '83; and appointed Secretary to the Special Committee on Army Reorganisation, '87. He was private secretary to Marquess of Hartington, Mr. W. H. Smith, Mr. Herbert Gladstone, Mr. Stanhope, and Sir

H. Campbell-Bannerman during the period '86-'93, and was then appointed Director-General of the Royal Army Clothing Department, and Assistant Under-Secretary of State in '98. He was given his present appointment in March 1904.

## WINES, SPIRITS AND BEER, CONSUMPTION OF.

During a number of years the late Mr. William Hoyle contributed to the *Times* an annual letter setting forth the national consumption and cost of intoxicating liquors in the preceding year. Since his death in '85 these annual letters have been continued by Dr. Dawson Burns. In preparing the letter for the year 1902 it became necessary to revise the estimates originally made by Mr. Hoyle, the effect of which revision was to raise the calculated expenditure about one-seventh; and Dr. Burns applied the correction needed to each year from 1880 to 1902. The result was to show that in that period the people of the United Kingdom expended no less than £3,654,590,246 upon the purchase of intoxicating liquors, or an annual average of £158,895,228.

The latest year for which official data are available (1903) showed an expenditure of £174,445,271, which was smaller than in any year since '97, when the expenditure stood at nearly £174,365,372. The increase in '99 over '98 was £9,000,000, but there was a decrease of £1,000,000 in 1900, a further decrease of £3,330,300 in 1901, a decrease of £2,250,000 in 1902, and a still further decrease of £5,054,546 in 1903—a total decrease in 1903 as compared with '99 of £11,600,000.

In analysing the Drink Bill for 1903 we see that the total expenditure is made up as follows:—

	£
British and Foreign Spirits . . . . .	55,551,228
Beer (Malt Liquor) . . . . .	104,846,160
Wine . . . . .	12,547,883
Other Liquors . . . . .	1,500,000

£174,445,271.

This gives an average of £4 2s. 4d. per head of the entire population (42,372,556); but as probably one-third of the population spent little or nothing on strong drink, the average would be raised to £5 9s. 9d. per head. As the aggregate expenditure is made up of that of the three kingdoms, a further analysis shows that the expenditure in England was £145,211,636 (£4 7s. per head); in Scotland, £14,922,600 (£3 5s. 2d.); and in Ireland, £14,311,034 (£3 4s. 10d.).

Applying the analysis to the liquors, it is seen to be as follows:—

	Spirits.	Beer.	Wine.	Other Liquors
	Gallons.	Barrels.	Gallons.	1000 Galls.
England	29,953,803	31,152,382	11,850,778	14,000
Scotland	7,418,266	1,262,87c	1,394,209	500
Ireland.	4,553,386	2,533,466	697,105	500
United Kingdom	41,925,455	34,948,72c	13,942,092	15,000

The intoxicating element in all alcoholic liquors is alcohol, and the total consumption

of alcohol in 1903 was 89,646,519 gallons, or per head 2·12 gallons.

If inquiry is carried further, and it is sought to compare the expenditure on alcoholic liquors in the United Kingdom with the expenditure in British Colonies and other countries, it may be said that, owing to the different prices and different liquors, the difficulty of anything like a correct comparison is exceedingly great. Comparisons with our Colonies are the most reliable, and next to them with the United States. In 1903 the Drink Bill of New South Wales was £3 7s. 5d. per head; in Victoria, £3 7s. 5d.; in New Zealand, £3 10s. 7d. In the United States for 1903 the official estimate of expenditure was about £290,340,000, the population exceeding 70,000,000.

### WIRELESS TELEGRAPHY.

In the 1901 and 1902 eds. articles appeared describing the mechanism employed by Mr. Marconi in his method of telegraphic signalling. By means of his transmitter he conveys electric-wave impulses into space, and these impulses are gathered up by his receiver, the essential feature of which is the so-called "coherer." Mr. Marconi has been able to arrange a selective action in his instruments, rendering it possible for two stations to converse without being heard by other stations.

Consult "The Work of Hertz and his Successors," by Prof. O. Lodge; "Wireless Telegraphy," by R. Kerr; and "A History of Wireless Telegraphy, 1838-1899," by J. J. Fahie.

#### The Marconi System.

In '96 Mr. Marconi, under good Italian credentials, was able to accept the invitation of the British Telegraph Department to make experiments with his system. Early work was done on Salisbury Plain, across the Bristol Channel, and between Alum Bay and Bournemouth (a distance of 16 miles). At the close of '98 experiments were set on foot between the South Foreland lighthouse and the East Goodwin lightship, 12 miles away, and communication was established. On March 28th, '99, the first message was exchanged between France and England. This was followed by successful demonstrations made during the '99 Naval Manœuvres. The Admiralty definitely adopted the system during 1900, and all battleships and a very large number of cruisers are now fitted with it, or with modifications of it. The Marconi apparatus is working commercially on board many of the largest passenger steamers afloat. There are numerous land stations in Great Britain and Europe equipped with the system. An agreement has been made between the Marconi International Marine Communication Co. and Lloyds by which the latter corporation exclusively adopted the system for use at their stations at home and abroad till 1915.

On Dec. 12th, 1901, Mr. Marconi succeeded in deciphering wireless messages sent from the Poldhu Station, Cornwall, to him at St. John's, Newfoundland, where he had erected a temporary station for the purpose. The intervention of the Anglo-American Telegraph Co. compelled him to cease operations there, since the company held a monopoly of all telegraphic communications within the colony till 1904. Arrangements were then

made for the continuance of the experiments in Canada and the United States. Mr. Marconi went across the Atlantic in the *Philadelphia*, and on March 3rd, 1902, announced that actual messages were received by him over a distance of 1551 miles, and a test letter at a distance of 2099 miles, all being recorded on a tape receiver, and the records being attested by the ship's officers. The *Carlo Alberto* in Oct. 1902 conveyed Mr. Marconi from England to Nova Scotia, and daily communication was kept up with the Poldhu Station all the way across to the station at Glace Bay. An official wireless message was sent from Lord Minto, Governor-General of the Dominion, to King Edward on Dec. 22nd; and Mr. Marconi himself sent messages to the King and to the King of Italy, receiving their congratulations on his great achievement. Another station for Transatlantic messages has been established at Cape Cod, Massachusetts; and the Italian Parliament early in 1903 voted £32,000 for the erection of a large power station in Italy for communicating with America.

In June 1904 a daily news bulletin was issued every morning to the passengers on board the Cunard liner *Campania*, and since then all the Cunard mail steamers have been supplied with a similar *Daily Bulletin*, on the Marconi system.

In Nov. 1904 the Marconi station at Poldhu transmitted a wireless message to another station at Ancona, Italy, a distance of about 1000 miles, almost entirely overland, the waves having to pass over the Alps to reach their destination.

On Dec. 30th, 1904, the Post Office announced that provisional arrangements had been made with the Marconi International Marine Communication Co. for the acceptance and prepayment at telegraph offices in the United Kingdom of telegrams for transmission from wireless stations on the coast to ships at sea. The arrangement came into operation on Jan. 1st, 1905. The charge is 6½d. a word, with a minimum of 6s. 6d. for each telegram.

#### The De Forest System.

The principal system in America is that of the De Forest Wireless Telegraph Co. The inventor, Dr. de Forest, is a graduate of Yale, and claims that he can syntonise his circuits. The receiver in this system is a telephonic apparatus, and from 20 to 30 words a minute can be transmitted and recorded. The main advantage claimed for it is that its usefulness is not impaired by the presence of other systems unless the transmitting stations are practically in juxtaposition.

The De Forest Wireless Telegraph Co. transmitted a regular daily news service from the St. Louis Exhibition in 1904 to various newspapers, and messages were sent from the long-distance tower to Chicago, 300 miles away. The speed attained was from 25 to 35 words a minute. The capacity of the De Forest system for operating simultaneously several different transmitters was clearly shown, and the ability of the operator to tune his receivers at will to various transmitters with different wave-lengths. In Dec. 1904 the company established communication between Kansas City and Cleveland, a distance of about 800 miles, which it claimed to be the longest overland wireless communication on record.

During the earlier months of the Russo-Japanese War the *Times* sent a correspondent to the seat of war with a De Forest wireless equipment, the transmitter being installed on board the despatch boat *Haimun*, and a receiving station being set up at Wei-hai-Wei. So successful was the experiment that the Russians rated the correspondent as "a spy," and the Japanese placed such severe limitations upon his movements that nothing further could be accomplished. In the correspondent's own words: "I am convinced that it will ultimately prove that the *Times* has been the first and last journal to use wireless telegraphy to report naval warfare. Although I am positive that in our hands the system was always put to proper uses, yet the possibilities and the dangers are so great that in future the use of all wireless communications during military and naval operations will be controlled by international law."

**Witte, Sergiej Juliewitsh**, the Russian statesman, is of German origin, was b. July 29th, 1849, at Tiflis, ed. at Odessa in mathematics and physics, and entered on the career of railway administration. He first arrived at marked distinction by his clever organisation of the transport of troops in the war of '77-8; was called to St. Petersburg for employment there '79, and appointed in '86 director of Russian south-west railways. In '88 he became head of the Railway department in the Ministry of Finance, also chairman of Commission on Tariffs; in '92 Minister of Means of Communications, and in '93 his successful career was crowned by his appointment as Minister of Finance. He has concluded several treaties of commerce, especially with Germany; and in Jan. 1903 received the expression of the Czar's gratitude in a Rescript, which said: "You have awakened the best forces of national labour to a sense of self-reliance, ensured the independence and the stability of the monetary circulation, increased the resources of the State, and thereby enabled it to balance its Budgets, gradually increasing year by year, without a deficit." In August 1903 he was removed from the Ministry of Finance and made President of the Committee of Ministers. He is author of a book on "The Principles of Railway Rates," '83, and on "Friedrich Liss, the Economist," '88, both in Russian.

**Women's Suffrage.** The National Union of Women's Suffrage Societies comprises all the Women's Suffrage societies in Great Britain which work on a non-party basis, and for Women's Suffrage only. Secretaries: Miss Edith Palliser and Miss F. Sterling, 25, Victoria Street, Westminster; Miss Esther G. Roper, 5, John Dalton Street, Manchester. The Executive

Committee of the National Union meets at the office of the Central Society for Women's Suffrage, 25, Victoria Street, Westminster, of which Miss Edith Palliser is secretary. In the Colonies the movement has made considerable progress, and in New Zealand, South Australia, New South Wales, Tasmania and Western Australia the goal has been reached. Full suffrage was granted to the women of the Commonwealth Australia for the Federal Parliament in May of 1902. Sir Charles McLaren moved (March 16th, 1904), in the House of Commons, "That the disabilities of women in respect of the Parliamentary Franchise ought to be removed by legislation." Colonel Denny seconded, and in course of the subsequent discussion the motion was supported by Sir J. Rolleston, Dr. Shipman, and Mr. Emmott, and opposed by Mr. Labouchere, Mr. Cremer, and Mr. Bond; being in the result carried by 182 to 68.

**Women's Horticultural College.** A scheme of training for colonial life is in successful operation here. The college is situated at Swanley, in Kent. Hon. Treasurer, Mrs. John Hopkinson, Holmwood, Wimbledon Common, S.W.

**Wood, Field-Marshal Sir Henry Evelyn**, V.C., G.C.B., G.C.M.G., was b. at Cressing in 1838, and entered the Navy in '52. Served in the Crimea, and was severely wounded at the assault on the Redan. In '55 he joined the Army as cornet of the 13th Light Dragoons. Served in India in 17th Lancers, and, while commanding the 1st Regt. of Beatson's Irregular Horse, won the Victoria Cross, '58. Served throughout the Ashanti war. Previous to the Zulu war he joined the Middle Temple, and was called to the bar '74. After defeating the Zulus at Kambula, he became brigadier-general, and was present at Ulundi. In '79 he met with a triumphant reception in England, and became K.C.B. Served through the Transvaal war as major-general, and was one of H.M.'s Commissioners for settling the Transvaal limits ('81). Created G.C.M.G. Commanded the 2nd Brigade, 2nd division, in the Egyptian expedition, receiving the thanks of Parliament in '82. Raised the Egyptian Army in '83, and served in Nile expedition. From '89 to '93 he commanded the Aldershot district, from '93 till '97 he was Quartermaster-General, and from Oct. '97 till Oct. 1901 Adjutant-General. Commands the 2nd Army Corps. Promoted to the rank of field-marshal April 1903. He has published a book on his reminiscences of the Crimea, "Cavalry in the Waterloo Campaign," and "Cavalry Achievements." Clubs, Army and Navy, United Service. Address, Millhurst, Harlow, Essex.

## Y

**Young Men's Christian Association, The**, has 7505 centres scattered throughout the world, with a total membership of 620,721; and in the United Kingdom 1512 centres, with 120,550 members. The headquarters of the Y.M.C.A. are at Exeter Hall, Strand. Secretary of the National Council, Mr. W. H. Mills; Secretary of the London Central Association, Mr. J. H. Putterill.

**Young Women's Christian Association, The**, has about 275,000 members in all parts of the world. The British membership is 93,000, including 14,000 in London. Head Offices, 25 and 26, George Street, Hanover Square, W. The World's Y.W.C.A., organised for the development and extension of Y.W.C.A.s in all lands, also has its office at 26, George Street, Hanover Square, W.

## THE BEST LIFE POLICY

Is obviously that which yields the largest sum when it becomes due, with the greatest convenience and advantage to its holder till that time. The Bonus Policies issued by

## THE SCOTTISH WIDOWS' FUND Life Assurance Society,

In which the whole Profits are divided among the Policyholders, fully answer that description, in proof of which the results, both during their lifetime and at death, of practically every Policy issued during the last fifty years, are published in the Society's Prospectus. The results clearly show that the Society's Policies are not only

### EXCEPTIONALLY PROFITABLE

from the Life Assurance point of view, but also that, being of known Cash Value, they are Negotiable Documents always available for all purposes of Family and Business Security, and open Funds of Credit to their holders

At any time that suits their convenience.

---

### FINANCIAL RESOURCES

**REALISED FUND over . £17,300,000**  
**ANNUAL REVENUE . . £1,750,000**

Which all belong to the Policyholders.

---

*Forms of Proposal and Prospectuses containing the above-mentioned results and all needful information may be obtained on application at any of the Society's Offices or Agencies.*

THE CAPITAL, amounting to FIVE MILLIONS, was fully subscribed before the Society commenced business in 1845, and the shares are held by a body of Shareholders, comprising some of the highest and most influential members of the Legal Profession. The success which has attended the operations of the Society is founded on its strong financial position, the eligible character of the risks constituting the bulk of its business, and the promptitude and liberality with which its engagements are met.

# EMPLOYERS' LIABILITY ASSURANCE CORPORATION, LTD.

HAMILTON HOUSE, VICTORIA EMBANKMENT, LONDON, E.C.  
(Corner of TEMPLE AVENUE.)

CAPITAL (fully subscribed) . . . . .	£750,000
SECURITY for Policy-holders . . . . .	£1,356,643

## EMPLOYERS' LIABILITY.

Insurance of all liabilities created by the Workmen's Compensation Acts, 1897 and 1900, Employers' Liability Act, 1880, and Common Law, for all accidents happening during the period of insurance, however protracted the disablement may be, without litigation with workpeople, also Third Party and Lift Insurances.

## FIDELITY GUARANTEES.

Bonds to the High Court of Justice, and to all Government and Municipal Departments. Mercantile Guarantees for every position.

## PERSONAL ACCIDENT INSURANCE.

The most liberal policy, world-wide, large benefits, and low premiums.

## HEALTH INSURANCES.

Against disablement from disease.

S. STANLEY BROWN, *General Manager.*

# LIVERPOOL VICTORIA LEGAL FRIENDLY SOCIETY.

Established 1843.

Chief Office—ST. ANDREW STREET, HOLBORN CIRCUS, LONDON, E.C.

BRANCH OFFICES IN ALL THE PRINCIPAL TOWNS.

This Society has been in active operation over 60 years. It is specially established for the insurance of sums up to £200 upon lives up to 85 years of age, by weekly, monthly, quarterly, half-yearly, and yearly payments, to meet the convenience of the Assurers. Endowment Assurances, payable at ages 14, 21, 30, 40, 50, or 60, or upon the completion of 15, 20, 25, or 30 years' payments. Free Policies, Reversionary and Cash Bonuses, Surrender Values, etc.

**Perfect Security to the Assured. Free Policies have been issued and Bonuses have been allotted to more than 400,000 Policyholders.**

The healthy and prosperous condition of the Institution is shown by the following figures:—

RESERVE FUNDS .. .. .	2½ Millions
CLAIMS PAID .. .. .	5½ Millions
ANNUAL INCOME .. .. .	£970,000
CASH BONUSES PAID .. .. .	£121,000

GOLD MEDAL AWARD, PARIS EXHIBITION, 1900.

ARTHUR HENRI, *Secretary.*

# EQUITABLE LIFE ASSURANCE SOCIETY.

(FOUNDED 1762.)

THE OLDEST MUTUAL LIFE OFFICE IN EXISTENCE.

ALL the policies which became claims in the year 1903 were, taken together, increased **100 PER CENT.**; in other words, the amount paid, on the average, was

## DOUBLE THE ORIGINAL AMOUNT ASSURED.

This result is possible only because the "OLD EQUITABLE" has never employed Agents, or paid Commission. Over £2,500,000 has thus been saved.

Write for Prospectus to H. W. MANLY, Actuary and Secretary, at the Society's Offices :

**Opposite the MANSION HOUSE, LONDON, E.C.**

HEAD OFFICE, INSURANCE BUILDINGS  
FARRINGDON ST. LONDON E.C.

Applications for Agencies invited. Life—Accident—Industrial.

# CLERGY MUTUAL ASSURANCE SOCIETY,

2 & 3, THE SANCTUARY, WESTMINSTER, S.W.      FOUNDED 1829.

Patrons—THE ARCHBISHOP OF CANTERBURY; THE ARCHBISHOP OF YORK.  
President—THE BISHOP OF LONDON. Vice-President—THE LORD HARRIS.

Chairman—THE DEAN OF CANTERBURY.

Deputy-Chairman—SIR PAGET BOWMAN, Bart.

Secretary—W. N. NEALE, Esq. Actuary and Manager—FRANK B. WYATT, Esq., F.I.A.

The Society offers the **BENEFITS** of **MUTUAL LIFE ASSURANCE** on highly favourable terms to  
**THE CLERGY AND THEIR RELATIVES.**

**THE WHOLE OF THE PROFITS BELONG TO THE MEMBERS.**  
**Accumulated Fund, £4,194,485. Annual Income, £398,982.**  
**Bonuses Distributed, £3,723,720.**

The **ANNUAL PREMIUMS** are **LOWER** THAN THOSE USUALLY CHARGED.

Under the "**REDUCED PREMIUM**" system—applicable to Whole-Life and Endowment Assurances—only **FOUR-FIFTHS** of the ordinary Annual Premium is payable, the other one-fifth remaining a debt to be repaid out of Bonus.

Notwithstanding the **LOWNESS** of the Premiums charged, the Bonuses are on an **EXCEEDINGLY HIGH SCALE**. For the 20 years ending May 1901, the Bonuses distributed were equal to an average Cash Return of no less than **45 per cent.** of the Premiums paid.

The **CONDITIONS OF ASSURANCE** are most-favourable, and **SURRENDER VALUES**, **PAID-UP POLICIES**, and **LOANS ON DEPOSIT OF POLICIES** are all on an exceedingly liberal scale.

## IMPORTANT NOTICE.

*No Agents employed and no Commission paid for introduction of business, whereby about £10,000 a year is saved to the Members.*

*Assurances can be readily effected by direct communication with the Office. 2 & 3, The Sanctuary, Westminster, S. W.*

SECRETARY.—A. E. MANN.

INSPECTOR OF BRANCHES.—D. BREMNER.

The present Subscribed Capital of the Bank is **£14,000,000.** in **140,000** Shares of **£100** each, held by upwards of **10,100** Shareholders. The sum of **£20** has been paid on each Share, thus making the paid-up Capital **£2,800,000.** The Rest or Surplus Fund is **£1,400,000.**

Current Accounts are opened with, and the usual Banking facilities granted to, persons properly introduced. The Bank takes the Agency of Private Country Banks, Joint Stock Banks, and other Public Companies in England or the Colonies; attends to the purchase and sale of British and Foreign Stocks; collects Dividends on Government Funds, Railway Stock, Foreign and other Securities, payable in England or abroad; acts as Agents for the receipt of Military and other Pay and Allowances; and generally transacts every description of Banking business.

Sums of **£10** and upwards may be deposited, subject to seven days' notice of withdrawal, or repayable at call. Interest is allowed thereon, according to the class of Deposit, but subject to alteration by public advertisement in the *Times* newspaper. Cheques cannot be drawn against Deposit Accounts, nor will Depositors be entitled to any of the usual Banking facilities of a Current Account. A receipt is given for each deposit, which is not transferable, and must be surrendered on repayment of the amount, according to the conditions printed thereon.

Circular Notes of **£10**, **£25**, and **£50** are issued for the use of Travellers, payable in the principal towns of Europe, Asia, Africa, America, and Australasia. They are issued free of expense, and are payable by the Agents abroad, at the exchange of the day, without any deduction whatever for commission.

Letters of Credit are also granted on the Chief Towns and Cities abroad. They may be obtained at the Bank in Lothbury, or any of its Branches.

The Officers of the Bank are bound not to disclose the transactions of any of its Customers.

LONDON, January, 1905.

A. E. MANN, Secretary.

# EAST LONDON CHURCH FUND.

**Patron:** THE LORD BISHOP OF LONDON.

**Presidents:** THE BISHOP OF ISLINGTON.

THE BISHOP OF STEPNEY.

## OBJECT!

This Fund exists for the sole purpose of bringing **more Christian Workers** into the East End. It already helps to maintain **400 Assistant Curates and other Workers**. The annual grants list amounts now to £20,900.

## WANTED!

**NEW ANNUAL SUBSCRIPTIONS**, as at present annual subscriptions amount to £5,000 only, while the annual expenditure is nearly £21,000.

**Bankers:** BANK OF ENGLAND.

**Secretary:** REV. G. N. WALSH, M.A.

**Office:**

70, HAMILTON HOUSE, BISHOPSGATE STREET WITHOUT, E.C.

# EAST LONDON FUND FOR THE JEWS.

**Patron:** THE LORD BISHOP OF LONDON.

**President:** THE BISHOP OF STEPNEY.

**OBJECT:** Evangelization of the Jews in East and North London.

**METHOD:** Grants to incumbents for the supply of clerical or lay agents to work amongst their Jewish parishioners.

**NEEDS:** Income for 1903 was £1,982. An additional £1,000 per annum is urgently required for grants to East End parishes.

Cheques and P.O.'s crossed "London and County Bank," should be made payable to the Secretary, **Rev. A. M. CAZALET, M.A.**

**Office:** 71, HAMILTON HOUSE, BISHOPSGATE STREET WITHOUT, E.C.

# A STRONG BULWARK.

Rome is bent upon ruling all British subjects; and, because she WILL dictate the policy which her bond-servants adopt in all the affairs of life, she may be justly charged with a conspiracy to render this country unfit for representative institutions. Her concealed aim is to destroy the free Constitution of this realm, and to place all power at the disposal of a tyrant, who will humble himself before the Court of Rome. This grave peril can only be removed by united Protestant effort.

During the past few years Imperial Protestant Unity has proved a strong bulwark against Rome's attack. Time after time she has assailed the Protestant Constitution of the United Kingdom, and on each occasion she has received well-merited defeat. The Imperial Protestant Federation is thankful that it has been enabled to defend this realm against so many Papal plots; but it is not content with the victories of the past. It is determined, with God's blessing, to carry the warfare into the enemy's camp, and to strive to recover the ground which has been lost. Reader! Will you, according to your means, succour this vigilant confederacy of Fifty-six Societies, whose power is FELT in every Colony of the British Crown? Will you also send for a free copy of a pamphlet called "The Political Aspect of Popery"?

**IMPERIAL PROTESTANT FEDERATION,  
DUDLEY HOUSE,**

**36-38, SOUTHAMPTON STREET, STRAND, LONDON, W.C.**

*Please mention HAZELL'S ANNUAL when writing.*

# BAPTIST MISSIONARY SOCIETY,

19, FURNIVAL STREET, LONDON. E.C.

THIS SOCIETY WAS FOUNDED IN 1792.

ITS FIRST MISSIONARY WAS

WILLIAM CAREY, "The Father and Founder of Modern Missions."

THE FIELDS OF LABOUR ARE—

India, Ceylon, China, Africa, West Indies, Palestine, Italy, and France.

Number of European Missionaries	...	...	...	...	...	153
Number of Missionaries' Wives and Lady Helpers	...	...	...	...	...	120

## These Homes were the first to abandon the discredited Barrack System, to secure Family Life for the Boys.

THE COTTAGE HOMES AT FARNINGHAM are for 330 Boys, who are Homeless and Destitute. They are placed in families of 30 each, with a Foster Father and Mother to take care of them. They are fed, clothed, and educated, and receive careful moral and religious training.

Suitable boys are prepared for Confirmation. Seventy were presented at last Visitation. They are taught to be industrious by being employed in Tailoring, Shoemaking, Carpentering, Printing, Breadmaking, Painting, Plumbing, Gasfitting, Blacksmithing, Engine-Room Work, Gardening, Farming, etc., etc. Apprenticeships are found for them. They are looked after as "Old Boys," and a house is always kept ready for them to return to during holidays, when out of work, or convalescent after sickness.

Boys are either admitted on payment by benevolent persons of 7s. a week, or can be elected free or on part payment by votes of the subscribers.

THE HOMES FOR ORPHANS at Swanley are designed for 175 Boys, whose mothers need to go out to earn their living. They do what they can towards the support of their own boys, and friends who have known them in better days help them. Every boy admitted to the Orphanage is paid for at the rate of £21 per annum. The living is upon the same lines as at Farningham, but the education is more extended. Many benevolent people are glad in this way to support an Orphan Boy, or to help a necessitous mother who cannot pay the whole of the fees.

The Committee most earnestly appeal for help to enable them to make self-supporting boys.

**Treasurer**—EDMUND S. HANBURY, Esq., Poles, Ware, Herts.

**Secretary**—Mr. WM. ROBSON, 100, Temple Chambers, Temple Avenue, E.C.

**Mr. CHAS. N. BARNES.**

More than **6,000** children have already been rescued by the Children's Home. **1,500** now in residence, and the number increases rapidly. Special provision is made for crippled and afflicted children. An income of at least **£40,000** a year is required to support this work, which cares for children of all classes, all creeds, and no creed. No Election by Subscribers. The child's need is the one condition of admission.

**£16 will support a child for a year. Donors of £50 are entitled to name a Col.**

## FUNDS URGENTLY NEEDED.

Remittances should be addressed to—

**Rev. Arthur E. Gregory, The Children's Home, Bonner Road, London, N.E.,**

And crossed "LONDON CITY AND MIDLAND BANK."

# THE SURGICAL AID SOCIETY.

*Chief Offices—SALISBURY SQUARE, FLEET STREET, LONDON, E.C.*

**Patron—HIS MAJESTY THE KING.**

This Society was established in 1862 to supply Leg-instruments, Spinal Supports, Trusses, Elastic Stockings, Artificial Limbs, &c., and every other description of mechanical support to the Poor.

**Over 400 Patients are Relieved every week.**

Annual Subscription of 10/6, Life Subscription of £5 5s., entitled to two recommendations per annum.

***Contributions are earnestly solicited.***

**BANKERS—MESSRS. BARCLAY & Co., LTD., 54, Lombard Street.**

**RICHARD C. TRESIDDER, Secretary.**

# THE NATIONAL BENEVOLENT INSTITUTION,

**FOUNDED BY THE LATE PETER HERVÉ.**

***Established 1812.***

***Incorporated by Royal Charter.***

Under the immediate Protection and Patronage of **His Most Excellent Majesty the King.**

***Treasurer—E. JACKSON BARRON, ESQ.***

This Institution was founded for the purpose of granting Annuities to distressed members of the Upper and Middle Classes of Society, who have attained the age of 60 years and upwards.

The Pensioners are elected half-yearly, in May and November, by the votes of the Life Governors and Subscribers.

The sum disbursed in Pensions now amounts to upwards of **£14,200**, per Annum.

The total number of Aged Persons who have been supported by the Institution is **2,928**, the gross sum distributed to them up to the present exceeding **£594,190**.

Subscriptions, from 5s. and upwards, will be thankfully received at the Office, and any further information given between the hours of 10 and 4 daily. (Saturdays 10 to 2.)

**Office—65, Southampton Row, Bloomsbury, W.C.**

**HENRY C. LATREILLE, Secretary.**

# THE ROYAL BLIND PENSION SOCIETY.

**Patron:** HIS MAJESTY THE KING.

**Vice-Patrons:** { H.R.H. THE PRINCE OF WALES, K.G.  
H.R.H. THE DUKE OF CONNAUGHT, K.G.

**President:** HIS GRACE THE DUKE OF GRAFTON, K.G.

**Honorary Secretaries:** Messrs. GEORGE POCKOCK and PERCY R. POCKOCK.

This Society grants Pensions to the blind Poor at their own homes in sums ranging from 10s. to 25s. per month.

Elections take place in May and November in each year.

In addition to those elected by the votes of Subscribers, not less than two are added at every election by rotation. Others are nominated from time to time to receive the "Queen Victoria," "Thomas Pocock," and "James Templeton Wood" Memorial Pensions.

To be eligible, applicants must be totally blind, above 21 years of age, of good character, and in receipt of an income not exceeding £20 if single, and £30 if married.

The receipt of parish relief is not a disqualification.

Applications must be made on the printed form provided by the Society.

Subscribers of 10s. 6d. annually, or Donors of Five Guineas, are entitled to One Vote at every election, and the multiples thereof in proportion.

The payment of a Legacy to the Society confers upon each Executor the privilege of One Life Vote for every £25 bequeathed.

The yearly report, containing the rules, accounts, and all information, will be forwarded on application.

Contributions will be gratefully received by the Treasurer, or by the BANK OF ENGLAND, or by Messrs. BARCLAY & Co.

JOHN C. BUMSTED, Esq., *Treasurer and Chairman of Committee.*

W. ELLIOTT TERRY, *Secretary.*

237, SOUTHWARK BRIDGE ROAD, LONDON, S.E.

## SONS OF THE CLERGY CORPORATION

(Founded A.D. 1655.) (Incorporated by Royal Charter, A.D. 1678.)

For the Relief of Necessitous Clergymen, their Widows, aged Single Daughters, and Children of every Diocese in England and Wales.

**President**—The ARCHBISHOP OF CANTERBURY. **Vice-President**—Earl EGERTON OF TATTON.

**Treasurers**—

SIR REGINALD HANSON, BART., LL.D., ALDERMAN; SIR WILLIAM TOMLINSON, BART., M.P.; REV. CANON C. F. NORMAN, M.A.

The Governors now assist annually about 300 Clergymen by Grants, and over 400 Clergy Children by Grants towards Education, Apprenticeship, and outfit (about one-fourth of whom are Orphans), and over 1040 Clergy Widows and aged Single Daughters (712 of whom are Pensioners).

**By far the oldest, largest, and most comprehensive of Clergy Charities.**

Donors of Thirty Guineas and upwards are elected Governors of the Corporation.

**More Annual Subscriptions and Donations are needed.**

LEGACIES also form a most important feature in the annual receipts of this ancient Society.

The 251st Festival will be celebrated in St. Paul's Cathedral, on Monday, the 8th May, 1905. Tickets are issued to Subscribers and Donors.

**SIR PAGET BOWMAN, Bart., Regr.,**

CORPORATION HOUSE, BLOOMSBURY PLACE, LONDON, W.C.

# RESCUE SOCIETY.

SOCIETY FOR THE RESCUE OF  
YOUNG WOMEN & CHILDREN.

ESTABLISHED 1853.

**Seven Homes.**

The Committee appeal to the Benevolent Public  
on behalf of

**Forsaken and Suffering  
Women and Girls,**

FOR THE

**GREATLY NEEDED SUPPORT**  
to enable the continuance and extension  
of their long-established  
**PREVENTIVE & RESCUE WORK.**

The 51st Annual Report (free on application) tells of 18,679 girls and young women having been sheltered, fed, clothed, and trained for periods averaging several months each. Seven Homes are now maintained, providing for rescue and preventive, maternity and medical cases.

## CONTRIBUTIONS

Will be thankfully received and acknowledged by the Secretary, Mr. C. STUART THORPE, to whom all Cheques and Money Orders (crossed BARCLAY & CO., Ltd.) should be made payable, and sent to the Offices of the Society, 79, Finsbury Pavement, London, E.C.

# Sheltering Homes for Destitute Children.

**MYRTLE STREET, LIVERPOOL.**

Where over **200** Children yearly are rescued from starvation and moral danger. About **150** yearly are emigrated and placed in Canadian families of good standing and repute.

**£500** additional income is urgently required to keep up this work.

**THE SMALLEST GIFT WELCOMED.**

President: SAMUEL SMITH, M.P.

Hon. Treasurer: E. C. THIN, Esq., 24, Chapel Street, Liverpool.

Secretary and Superintendent: Mrs. LOUISA BIRT, Myrtle Street, Liverpool.

# NATIONAL ORPHAN HOME, HAM COMMON, SURREY.

FOUNDED 1849.

*Under the Patronage of*

H.R.H. The Princess Christian, H.R.H. The Duchess of Albany.

Chairman: HIS GRACE THE DUKE OF PORTLAND.

Orphan Girls received from 7 to 15 without distinction of religion, and trained for domestic service. Up to the present time over 1,000 Orphan Girls have been educated in the Home, and have gone forth to occupy useful positions in life.

**DONATIONS, SUBSCRIPTIONS, and LEGACIES are sorely needed.**

The Home is open to inspection at all times.

Bankers: Lloyd's Bank, 16, St. James's Street, S.W.

Secretary: GEO. DE C. HOBSON, The Orphanage, Ham Common, Surrey.

# BRITISH ORPHAN ASYLUM, SLOUGH.

Patron—His Majesty the King.

Patroness—Her Majesty Queen Alexandra.

Instituted 1827. For the Maintenance and Education of Orphans from all parts of the British Empire, of all denominations, whose parents were once in prosperous circumstances. Boys and Girls are admitted by Election, Presentation, and in some cases by purchase, between the ages of 7 and 12, and are retained until 15.

The Elections take place in January and July. Forms of Application and all particulars may be obtained from the Secretary.

The Institution is unendowed, and the Committee earnestly appeal for *New Annual Subscriptions* and *Donations*, which are much needed. Annual Subscriptions:—For One Vote, 10s. 6d.; for Two Votes, £1 1s. Life Subscription:—For One Vote, £5 5s.; for Two Votes, £10 10s. Life Presentation, £350.

**Bankers:** MESSRS. WILLIAMS, DEACONS BANK, Limited, 20, Birchin Lane, E.C.

## AN URGENT APPEAL FOR IMMEDIATE AND GENEROUS HELP.

THE WANT OF FUNDS IS MOST SERIOUS.

SOME OF MANY PRESSING NEEDS ARE:—

**FOR GENERAL FUND**—*Largely increased* annual help of at least £4,000.

**FOR LABRADOR**, hitherto self-supporting, but crippled for a time in its resources, £2,000 for just another year. (£500 for last year is still wanted.)

**THE MISSION IN TIBET** should be *strengthened* at this important juncture; instead of which its continuation may soon be impossible for want of means!

While Overshadowing all is a Deficit, up to date, of nearly £10,000.

*Indeed, so urgent is the Need for Funds, that Retrenchment is inevitable, the Maintenance of existing work a problem, and Curtailment only too possible.*

---

## WILL NOT FRIENDS HELP TO REMEDY THIS?

Contributions will be thankfully received, and information given, by the Rev. W. WETTON Cox, at the Offices of the LONDON ASSOCIATION, 7, New Court, Lincoln's Inn, London, W.C., who will also gladly arrange for Meetings, Sermons, Lectures, etc.

Founded at Southwark, 1799.

Rebuilt at Leatherhead, 1902.

## THE ROYAL HOSPITAL

FOR

## DISEASES OF THE CHEST, CITY ROAD, LONDON, E.C.

**Patron—HIS MAJESTY THE KING.**

**President—The LORD ROTHSCHILD. Treasurer—S. HOPE MORLEY, Esq.**

**Chairman of Council—Sir T. ANDROS DE LA RUE, Bart.**

**Vice-Chairman—The Hon. LIONEL ASHLEY.**

This Hospital was the first of its kind established in Europe, and has uninterruptedly since 1814 carried on its great work in the midst of the suffering poor of the Metropolis.

It treats annually about 750 In-Patients, who come from all parts of the country, and the attendances of Out-Patients each year number about 26,000.

The Charity's Income from all sources barely exceeds £3,000, whereas its Annual Expenditure averages £7,500,

**LEAVING AN ANNUAL DEFICIT of £4,500.**

**NO WARDS ARE CLOSED**, but the Committee will have to consider this question at an early date if increased support is not forthcoming.

**Donors of Ten Guineas become Life Governors.**

**Annual Subscribers of Three Guineas and upwards have the right to recommend both In- and Out-patients.**

**Annual Subscriptions are most needed, and will be gratefully acknowledged by the Secretary,**  
**A. T. MAYS.**

# THE REVIEW OF REVIEWS.

*A Magazine for the English-Speaking Race,*

Edited by W. T. STEAD,

PUBLISHED ON THE 10th OF THE MONTH.

**Price Sixpence.**

Annual Subscription, Post Free, **8s. 6d.**, to any part of the World.

**It is a Compendium of the Periodical Literature of the World.**

Its great object is to make the world more vivid, more real, more interesting to the people who live in it; to keep people in touch with the great movements which stir mankind. The endeavour, month by month, is to produce a Magazine which will enable the dweller in the remotest country-side to feel something of the glow and rushing life of the great world from which he is secluded, and at the same time to enable those who are in the midst of the rush and whirl of every-day events to form some idea of the drift and tendency of the great drama of contemporary history.

Sir MOUNTSTUART E. GRANT DUFF, writing to the Editor on one occasion, said :—

*"I have read the REVIEW OF REVIEWS very steadily ever since it appeared, often agreeing and often disagreeing very much with your views, but I invariably find in it something interesting, which I should have quite certainly missed if I had not read it."*

THE "REVIEW OF REVIEWS" CIRCULATES AMONG ENGLISH-SPEAKING  
PEOPLE IN ALL PARTS OF THE WORLD.

The "**Progress of the World**" is recorded from month to month in a series of brightly-written and copiously illustrated papers.

The "**History of the Month in Caricature**" is a section of the Magazine which has been very popular from the first.

The **Character Sketch** is a Biographical Study by the Editor, specially illustrated.

The **Leading Articles in the Magazines** are carefully edited and summarised from all the leading reviews and magazines of the world.

The **Book of the Month** supplies the reader with a painstaking Review of some one book which has been issued during the month; this feature has always been greatly appreciated by subscribers.

**Interviews on Topics of the Month.** Four such Interviews appear in every number.

**Impressions of the Theatre.** The Editor is contributing an interesting series of articles on the Theatres which have already attracted much notice.

**No Busy Man or Woman can afford to do without the "REVIEW OF REVIEWS."**

*Intending Subscribers should send 8s. 6d., with full postal address, to THE MANAGER.*

"REVIEW OF REVIEWS" OFFICE, MOWBRAY HOUSE, NORFOLK ST., LONDON, W.C.

**THE STUDENT'S ENGLISH DICTIONARY.** Literary Scientific, Etymological, and Pronouncing. By JOHN OGILVIE, LL.D. New Edition thoroughly Revised and greatly Augmented. Edited by CHARLES ANNANDALE, M.A., LL.D., Editor of the New Edition of "The Imperial Dictionary." Extensive and Useful Appendices. Nearly 800 Engravings on Wood.

"Leaving out of account the unwieldy and expensive recent editions of Webster and Worcester, we have no hesitation in saying that this is by far the most useful one-volume English dictionary at present existing."—*Athenæum*.

*In One Vol., fcp. 4to, cloth, 3s. 6d. ; half-roxburgh, 5s. 6d. ; half-morocco, 7s. 6d.*

**THE CONCISE DICTIONARY OF THE ENGLISH LANGUAGE.** Etymological and Pronouncing, Literary, Scientific, and Technical. By CHARLES ANNANDALE, M.A., LL.D. New Edition, Revised and Extended.

"Stands towards other dictionaries of the smaller character in the relation of the 'Imperial' to rival lexicons—in other words, it holds the 'premier' place."—*Spectator*.

*In Four Vols., imperial 8vo, half-roxburgh, £4 net ; or half-morocco, £5 net*

**THE IMPERIAL DICTIONARY OF THE ENGLISH LANGUAGE.** A Complete Encyclopædic Lexicon, Literary, Etymological, Scientific, Technological, and Pronouncing. By JOHN OGILVIE, LL.D. New Edition, carefully Revised and greatly Augmented. Edited by CHARLES ANNANDALE, M.A., LL.D. Illustrated by above 3,000 Engravings on Wood.

"So far as vocabulary and treatment are concerned, we should not wish for anything better than the new 'Imperial.' The etymology is clear and concise, and the illustrations are copious appropriate, and well executed."—*Times*.

London : BLACKIE & SON, LIMITED, 50, Old Bailey.

## The FAST MAIL STEAMERS of the NORDDEUTSCHER LLOYD

Sail regularly from SOUTHAMPTON as under:

**NEW YORK.**—Express Service on Wednesdays, calling at Cherbourg, by 23 and 23½-knot Steamers, "Kaiser Wilhelm II.," "Kronprinz Wilhelm," and "Kaiser Wilhelm der Grosse."

Twin-screw Service on Sundays during season (May to October), calling alternately at Cherbourg, by Steamers of over 10,000 tons, specially constructed for steadiness at sea.

**CHINA AND JAPAN.**—By FAST MAIL STEAMERS, with all Modern Improvements, leaving every 14 days, taking passengers for Gibraltar, Genoa, Naples, Egypt, Aden, Colombo, Penang, Rangoon (by special connection at Penang in correspondence with the British S. N. Co.), Singapore, Hong-Kong, Shanghai, and Japan Ports without transshipment.

**AUSTRALIA AND NEW ZEALAND.**—By FAST MAIL STEAMERS every 21 days, taking passengers for Genoa, Naples, Egypt, Aden, Colombo, Fremantle (for Perth and West Australian Gold Fields), Adelaide, Melbourne, Sydney, Tasmania, and New Zealand.

**ALEXANDRIA** from Marseilles fortnightly, calling at Naples.

### LUXURIOUS TRAVEL.

All the above services are performed by steamers of modern construction, containing the latest appliances for safety and comfort. The New York Line of the Norddeutscher Lloyd is well known, and hardly calls for mention; but travellers to the East, Australia, and South America, and Round-the-World Tourists, should apply for plans and particulars of the splendid new, large, twin-screw N.D.L. steamers, of 10,000 tons and over, with large state-rooms for two passengers, and also single cabins, now running in these services.
